

BMD 415 Lab Final Part 2 December 4, 2003

1. podocyte
2. endothelial cell
3. posterior lobe
4. pituicyte
5. PTH
6. calcitonin
7. Sertoli cell
8. early
9. secondary follicle
10. primary oocyte
11. canal of Schlemm
12. aqueous humor
13. amlleus
14. scala vestibuli
15. transitional
16. inner long. & outer circ.
17. epi/NE
18. androgens
19. seminal vesicle
20. simple cuboidal
21. oviduct
22. simple columnar ciliated
23. nerve fiber layer
24. RGC
25. macula
26. crista ampullaris
27. macula densa
28. rennin
29. follicular cell
30. TH
31. erectile tissue
32. tunica albuginea
33. uterus
34. proliferative
35. thick descending limb
36. thin limb
37. islet of Langerhans
38. 1: insulin/glucagons
39. acrosome
40. tail
41. placenta
42. maternal blood
43. ROS
44. RPE
45. OHC
46. IHC
47. vas deferens
48. inner long., mid. Circ., outer long.
49. ciliary epithelium
50. secretes aqueous
