

BMD 415 Practice Exam 2  
October 21, 2002

1. loose CT
2. transitional epithelium
3. stratified cuboidal
4. sweat
5. dense regular CT
6. fibroblast
7. red marrow
8. compact bone
9. Schwann cell nucleus
10. axon
11. cerebellum
12. folds
13. (myelinated) axons
14. Schwann / fibroblasts
15. skeletal muscle
16. fibroblast
17. smooth muscle
18. both
19. eosinophil
20. antiparasitic/phagocytize Ab-Ag complex
21. lymphocyte
22. platelet
23. monocyte
24. becomes macrophage
25. large artery
26. elastic plates
27. arteriole (long section)
28. smooth muscle
29. vein
30. medium artery
31. vein
32. valves
33. subcapsular sinus
34. differentiation of T lymphocytes
35. T lymphocytes (PALS)
36. central artery
37. esophagus
38. muscularis mucosa
39. HCl
40. pepsinogen
41. duodenum
42. Brunner's glands
43. Paneth cell
44. small intestine
45. villus
46. lacteal
47. tenia coli
48. large intestine
49. deoxygenated blood
50. bile
51. taste bud
52. stratified squamous
53. mucus
54. serous fluid
55. hyaline cartilage plates
56. lymphocytes
57. arrector pili muscle
58. sebaceous gland
