

Name an elective course and professor you would recommend to younger students and explain why. (From BMD 311, Fall 2001)

- Air Force Studies, Capt. Vrooman provides basic knowledge of function and doctrine of the military.
- Ancient Greek and Medieval Philosophy, traces the progression of ideas and scientific thought.
- BMD 210 Infectious Disease, the information you learn will open your eyes to a lot of things. Dr. Davis is fun with his slides. • Dr. Davis, good basic knowledge of microbiology and he keeps the class interesting.
- British Lit I. Mrs. Rush –She is not difficult and a great class to start off taking – you are familiar with subject matter.
- British Literature- Spain, she makes the poems interesting by putting a modern spin to the old poems; also she really enjoys teaching and it shows.
- CPR (EMT 100 or 101) – Dave Faggard, because CPR is important for everyone to know and overview of cardiovascular system, fun class – learn how to use a defibrillator.
- EH215 (British Lit I) – Dr. Payne, easy course with interesting subject matter.
- Ethics with Youngblood teaches you how to think much differently than most other classes.
- First Aid because everyone needs to know what to do in case of an emergency.
- From saltbox to skyscraper - Dr. Howe and Marine biology – Dr. Kool.
- Human Genetics – Dr. Brown – you get credit for it and it's very interesting (is a science elective).
- Interpersonal communication, Schaffer, mainly because it helps in day to day communication with individual and also with professionalism.
- Intro to Music with Dr. Grunner... it was a great class and I had fun. I didn't see it as a requirement I have to fulfill like I have with other electives.
- Music appreciation, Jean Early, helps you to appreciate music.
- Music literature 101, Dr. Bohnet, it widens your thinking.
- Personal fitness, Jones, prevent unwanted pounds during time of inactivity.
- Philosophy, logic by Dr. Meeker it is a great way to broaden one's reference base being that those philosophers are referenced in many current literatures. Helps in keeping one more logical, as well.
- Philosophy, Milford (a different school) It's an interesting and easy course.

- Psychology – Mr. Johnson (WSCC) because he always made the material interesting and relevant even when you did not think it was possible.
- Psychology (General), Jerry Williams very interesting, amount of work you do determine the grade – makes you want to learn.
- Psychology, Dr. Williams, interesting, informative and fun.
- Quant. (whoever teaches) because it finishes up your minor in Chemistry if you're a BMD major.
- Racquetball, any instructor, it is a break from stressful class while still earning college credit.
- Rock wall climbing, Professor Geoff, because fun to exercise.
- Sexual Behavior, Johnson, interesting and educational on a uncomfortable subject.
- Social stratification, Dr. Flynn –, important to learn about how stratified U.S. is.
- Sociology, you can learn a lot about society and how people interact.
- Spanish I, Ms. Hanrath, because she's a good teacher and she makes learning Spanish interesting.
- Spanish under Mr. Carlon because he makes it fun and it is easy.
- Western Civilization I – Dr. Monheit. I couldn't tell he graduated from Princeton he broke the information down to our level.
