Department of Speech Pathology and Audiology web site
http://www.southalabama.edu/colleges/alliedhealth/speechandhearing

The mission of the Department of Speech Pathology and Audiology is to provide undergraduate, masters and doctoral programs that challenge the students to achieve the highest standards of academic learning, scientific inquiry and clinical excellence. The Department of Speech Pathology and Audiology seeks to deliver a comprehensive program of academic, research and clinical training in the areas of speech, language and hearing development and disorders. The Department offers the Bachelor of Science in Speech and Hearing Sciences, the Master of Science in Speech-Language Pathology, the Doctor of Audiology, and the Doctor of Philosophy in Communication Sciences and Disorders, degree programs.

The undergraduate program readies the graduate to undertake professional study on the graduate level. Students in Speech-Language Pathology who complete the master's program will meet all the academic and practicum requirements to be eligible for the Clinical Fellowship (CF) that leads to national certification (C C C - S L P) by the American Speech-Language-Hearing Association (ASHA) and eligibility for the Alabama State License. Students in Audiology who complete the Doctor of Audiology program will meet all the academic and practicum requirements for national certification (C C C -A) and also be eligible for the Alabama State License.

The master's program (Master of Science in Speech-Language Pathology) education program in Speech-Language Pathology at the University of South Alabama is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, (800)-498-2071 or (301)-296-5700.

The doctoral program (Doctor of Audiology) education program in Audiology at the University of South Alabama is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, (800)-498-2071 or (301)-296-5700.

Areas Of Study

Audiology (AuD)
Bachelor of Science in Speech and Hearing Sciences (SHS)
Communication Sciences and Disorders (PhD)
Speech-Language Pathology (MSSLP)

Courses

Allied Health Professions (AHP)

AHP 101 Freshman Sem in Allied Health  2 cr
A course for first-time students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. Taught in small groups, the course provides an introduction to the nature of higher education with special emphasis on health-related disciplines. Appropriate reading and writing assignments will be required.

AHP 510 IPE Autism Spectrum Disorders  1 cr
This foundational course is designed to prepare graduate students in OT, PT, SLP, MD and ED to provide high-quality services to individuals with autism spectrum disorder and other developmental disabilities. The emphasis will be on interprofessional education using team-based instruction to support effective interprofessional practice in both educational and health care settings. ADDITIONAL RESTRICTION: Students can only be enrolled following successful application and admission. Contact the course instructor for information on application.

Audiology (AUD)

AUD 630L Electroac Char of Amp Sytm Lab  1 cr
This class will take a practical, "hands-on approach" to working with hearing aid amplification and will compliment the written class work presented in AUD 630 - Electroacoustic Characteristics of Amplification Systems. Topics covered will include earmolds and earmold impressions, earmold and tubing modifications, hearing aid components, measurement of electroacoustic characteristics of hearing aids, troubleshooting hearing aid problems, and performing minor repairs on hearing aids. Co-requisite: AUD 630

AUD 631L Sel Fit & Verif of Amp Sys Lab  1 cr
This class will take a practical, "hands-on approach" to working with hearing aid amplification and will compliment the written class work presented in AUD 631 - Selection, Fitting, & Verification of Amplification Systems. Topics covered will include selection of appropriate hearing aids, modifications and adjustment of digital hearing aids, manipulation of hearing aid software, verification of hearing aid performance with real ear measurement, and use of FM systems and other hearing aid accessory devices. Co-requisite: AUD 631

AUD 612 Anatomy-Physio Hearing Mech  4 cr
Study of the anatomy and physiology of the nervous system, the anatomy and physiology of the outer, middle, inner ear, including the vestibular system, and the central auditory nervous system.

AUD 613 Psychoacoustics  3 cr
Study of the principles, procedures and research involved in the field of psychoacoustics and of the relationships between the physical dimensions of auditory stimuli and the resultant perceptual experience as well as the relationships among psychoacoustic testing and both auditory physiology and the audiologic evaluation process. Participation in laboratory assignments will be required.

AUD 614 Instrumentation and Acoustics  3 cr
Study of basic electricity, acoustics and measurement of sound properties, wave analysis, transducers, measuring and calibration systems, speech processing systems, and system interaction and integration.

AUD 616 Resrch Design Hearing Sci  3 cr
Research designs utilized in the hearing sciences; elements of research proposals and studies; how to critique a research study; how to conduct a literature review; APA format; students will be required to write precis of research articles and write a research proposal. Elements of modern statistics including sets and functions, probability theory, hypothesis testing, analysis of variance models, correlation, and regression.

AUD 621 Professional Issues  3 cr
This course will address a variety of professional issues such as organizations, societies, and their histories; codes of ethics; scopes of practice; credentialing and licensure; the development of the AUD; guidelines and position statements generated by ASHA and AAA; standards and best practices; methods and models of service delivery; and audiology practice management.
AUD 622  Medical Audiology  4 cr
This course will address acquired and congenital diseases and disorders of the outer, middle, and inner ear and the central auditory nervous system occurring across the lifespan; imaging techniques; non-audiologic medical and surgical interventions for these conditions; and cerumen management techniques; and appropriate methods for monitoring of patients prescribed potentially ototoxic medications.

AUD 623  Pharma & Ototox Monitoring  3 cr
This course will provide the basic science background necessary to understand the effects of medications on the auditory and balance systems. This course will also address drug treatment strategies for hearing loss and balance disorders. Topics will include mechanisms of drug actions, side effects, how age and disease affect these mechanisms, and specific effects of certain drugs on the hearing and balance system. This course will additionally address appropriate methods for identification and monitoring of patients prescribed potentially ototoxic medications.

AUD 630  Electroac Char of Amp Systems  3 cr
This course will address styles and types of earmolds, hearing aids, and assistive listening devices; components common to all amplification systems as well as optional features (such as directional microphones, volume controls, telecoils, etc.) and their electroacoustic properties and functioning; use of ANSI standards; physical, acoustic and electroacoustic modifications of earmolds and amplification systems.

AUD 631  Sel, Fit & Verif of Amp Sys  3 cr
This course will address the principles of selection, fitting, and verification of amplification systems, including hearing aids and assistive listening devices; subjective and objective audiologic assessments used to determine need for, select, and fit appropriate amplification systems for patients of all ages; and techniques used to select and fit amplification systems. The course will also address subjective and objective verification procedures, specifically addressing the importance of including Real-Ear Measures and subjective self-assessment measures in the amplification process.

AUD 632  Hearing Aid Lab  1 cr
This course will address the principles of verification and validation; tools used to verify appropriate fitting of amplification systems (such as real-ear probe-mic equipment) and techniques used to validate fitting (such as software packages, and subjective and objective audiologic measures); cochlear implant remapping.

AUD 633  Advanced Sensory Aids  3 cr
This course will address advanced technologies for individuals with hearing-impairment such as cochlear and brainstem implants, vibrotactile aids, and implantable devices, as well as the selection and fitting of these technologies.

AUD 640  Basic Audiologic Assessment  3 cr
This course will address the principles of cross-check, the test battery approach, differential diagnosis, relevant test equipment, instruments, and transducers, administration and interpretation of the pure-tone testing, clinical masking, case history, otoscopy, and tuning-fork tests, speech audiometry; tests for pseudo-hypoacusis, ototoxicity, site-of-lesion testing and historical assessments; and informal assessment procedures.

AUD 641  Immit & Otoacous Emission Meas  3 cr
This course will address administration and interpretation of acoustic immittance and otoacoustic emission measures across the lifespan. Topics will address standard and multi-frequency tympanometry, acoustic reflex testing, and eustachian tube function testing; spontaneous, transient and distortion-product OAE measurement; and the influence of intrinsic and extrinsic variables, including cochlear and retro-cochlear pathology, on outcomes and differential diagnosis.

AUD 642  Pediatric Audiology  3 cr
This course will address issues associated with providing audiologic services to pediatric and developmentally delayed populations. Issues will include gestational development, test administration and interpretation; genetic transmission of hearing loss, risk factors for hearing loss; principles of screening and the development and construction of a screening program; universal newborn hearing screening and early hearing detection and intervention programs.

AUD 643  Audiology and Aging  3 cr
This course will address the issues associated with providing audiologic services to older adults. Issues will include effects of aging on anatomy, physiology, and function, and test administration and interpretation issues specific to older adults.

AUD 645  Evoked Potential Measures  3 cr
This course will address instrumentation (transducers and electrode types); application and interpretation of evoked potential (EP) measures including ENOG, ECochG, ABR, middle and late potentials, across the lifespan; sedation protocols; assessment protocols associated with different EP measures and the populations to which they are applied; population norms; intrinsic and extrinsic variables affecting EP results; differential diagnosis of auditory neuropathy; troubleshooting.

AUD 647  Adult Audio Rehabilitation  3 cr
This course will address the implications of hearing loss in adulthood including the educational, vocational, social and legislative concerns of adults with hearing loss; assessment tools and intervention techniques used to maximize communication skills, including communication strategy training, speechreading, and group therapy approaches.
AUD 648  Counseling Hear Imp-Families  3 cr
This course will address various theories, principles and techniques associated with the social and psychological aspects of disability as well as issues specific to and techniques used when counseling patients with hearing loss and their families.

AUD 649  Ped Habil & Educ Audiology  3 cr
This course will address the speech, language, and communication of children with hearing impairment. Manual and oral modes of communication will be discussed, including American Sign Language, Signing Essential English I and II, Cued Speech, Total Communication, and Auditory-Verbal Therapy. Other issues to be addressed will include the development, management, and utilization of hearing and middle ear system screening programs, classroom acoustics, selection and fitting of classroom-based amplification, and federal law associated with children with special needs. Taught Spring Semester.

AUD 650  Assess-Treatmnt Cent Aud Proc  3 cr
This course will address the development, assessment, and interpretation of an auditory processing test battery across the lifespan, as well as intervention approaches.

AUD 651  Industrial-Forensic Audiology  3 cr
This course will address federal noise standards, effects of noise exposure on the auditory system, sound measurement and instrumentation, development and implementation of a hearing conservation program, hearing protection devices and forensic audiology.

AUD 652  Tinnitus and Hyperacusis  3 cr
This course will address assessment and intervention approaches used in the management of tinnitus and hyperacusis.

AUD 653  Spch-Lang Path for Audiologist  3 cr
This interprofessional education (IPE) course will address the foundational knowledge and skills necessary for audiologists to work together with speech-language pathologists in interprofessional collaborative teams. Specifically, this course will address the scope of practice in audiology, speech-language screening, speech-language report literacy and special topics.

AUD 654  Vestibular Assessment  4 cr
This course will include a discussion of the peripheral and central anatomy and physiology of the balance system and the test measures used to assess the function of this complex system. Topics will include case history and screening measures, as well as test protocols and analysis of results on electroneystagmography/ videonystagmography, rotational testing, posturography, and vestibular evoked myogenic potentials. Taught Spring Semester.

AUD 655  Management of Vestibular Disor  2 cr
This course will focus on peripheral and central disorders of the vestibular system and the interpretation of results on diagnostic tests in disordered patients. Pharmacological and surgical treatments of dizziness will be discussed, as well as rehabilitative techniques to manage the vestibular pathology.

AUD 656  Advanced Neurophys Measures  3 cr
This course will address advanced electrophysiological techniques, including ENOG, ALR, ERPs (i.e. P300, etc), and neuroimaging techniques (fMRI and PET) with an emphasis on auditory and cognitive processing, across the lifespan; source localization techniques; instrumentation; stimulus and acquisition parameters; measurement procedures; analysis and interpretation.

AUD 657  Clinical Practicum I  1 TO 2 cr
Students will become familiar with and conduct basic audiologic procedures on non-clinic populations. New Course Description: by means of various lab assignments. Students will also be involved in clinical activities in the USA Speech & Hearing Center while under direct supervision. Special Fee.

AUD 658  Clinical Practicum II  3 cr
Students will obtain experience administering a number of audiologic assessments and intervention techniques to clinic populations in the USA Speech and Hearing Center and external practicum sites while under direct supervision.

AUD 659  Clinical Practicum III  3 TO 6 cr
Students will obtain experience administering a number of audiologic assessment and intervention techniques to clinic populations in the USA Speech and Hearing Center and external practicum sites while under direct supervision. Special Fee.

AUD 660  Supervision in Audiology  2 cr
This course includes a description of supervision and supervisors, the development of supervisory behaviors, components of the supervisory process, models for the assessment of supervisees, analyzing the supervisory process, supervision across settings, supervision of non-audiology personnel, and accountability.
AUD 674  Special Projects in Audiology  3 cr  
Student will be required to develop a variety of projects during their academic training, some of which will be further developed and completed during this course.

AUD 675  Special Topics in Audiology  1 cr  
Student will identify cases or service delivery issues of clinical or professional interest and present these cases or issues to fellow students, clinical supervisors, and faculty via chat room in a grand rounds format.

AUD 676  Externship  3 TO 11 cr  
Off-campus opportunity to obtain clinical experience in a full-time setting. In addition, students may be required to identify cases or service delivery issues of clinical or professional interest and present these cases or issues to fellow students, clinical supervisors, and faculty via an online forum in a grand rounds format.

Communication Sciences-
Disordr (CSD)

CSD 600  Doctoral Colloquium  1 cr  
This seminar is designed to provide a forum for presentation and discussion of faculty and doctoral student research projects. Topics may also include: teaching and learning styles and grant writing. Must be repeated until candidacy is achieved.

CSD 650  Research Methods in CSD  3 cr  
Current methods and strategies used in research of communication processes.

CSD 651  Speech and Hearing Sci & Inst  3 cr  
Advanced review of the process of speech production, acoustic phonetics, coarticulation, and speech perception with emphasis on laboratory research methods.

CSD 662  Studies in Speech Science  3 cr  
Basic and advanced principles of the acoustics and physiology of speech production.

CSD 663  Studies in Hearing Science  3 cr  
Advanced study of psychological and physiological acoustics.

CSD 664  Studies in Language Science  3 cr  
Intensive study of the theoretical foundations underlying syntax, semantics, pragmatics, phonology, psycholinguistics, neurolinguistics, sociolinguistics, and applied pragmatics.

CSD 665  Studies in Commun Neuroscience  3 cr  
Advanced study of neurosciences as they relate to processes and pathologies of human communication, including functional neuroanatomy and clinical neurology. Interdisciplinary research paradigms will also be discussed.

CSD 672  Laboratory in Speech Science  1 cr  
Laboratory experiences in speech science.

CSD 673  Laboratory in Hearing Science  1 cr  
Laboratory experiences in hearing science.

CSD 674  Laboratory in Language Science  1 cr  
Laboratory experiences in language science.

CSD 675  Lab in Commun Neuroscience  1 cr  
Laboratory experiences in communication neuroscience.

CSD 682  Seminar in Speech Science  3 cr  
Intensive review of current research in speech production. May include normal and disordered processes. Topics may include acoustic phonetics, physiological phonetics, prosody, production and perception, fluency and voice. May be repeated.

CSD 683  Seminar in Hearing Science  3 cr  
Intensive literature review of current knowledge and research in hearing and hearing disorders. Topics may include cochlear mechanics, complex signal processing, electrophysiological measures, development of hearing, hearing in the elderly, and hearing in other species. May be repeated.

CSD 684  Seminar in Language Science  3 cr  
Intensive literature review of current methods, problems, and strategies in language research. Topics may include normal language acquisition, language-learning disorders, clinical aphasiology, and neurolinguistics. May be repeated.

CSD 694  Directed Study -  1 TO 3 cr  
Independent study under the direction of a graduate faculty member. May be repeated. Requires special permission.

CSD 695  Directed Research  1 TO 3 cr  
Research under the direction of a graduate faculty member. May be repeated. Requires special permission.

CSD 696  Profess Pract - Administration  2 cr  
Supervised professional experiences in administration under the guidance of faculty mentors. May be repeated.

CSD 697  Profess Pract - Clin Supervision  2 cr  
Supervised professional experiences in clinical teaching under the guidance of faculty mentors. May be repeated.

CSD 698  Profess Practicum - Teaching  1 TO 2 cr  
Supervised professional experiences in academic teaching under the guidance of faculty mentors. May be repeated.

CSD 799  Dissertation Research  1 TO 9 cr  
Independent research under the direction of a graduate faculty member. May be repeated. Requires special permission.

Speech Language Pathology  
(SLP)
SLP 510  Intro to Research Design  3 cr
A general presentation of research procedures. The student will learn to read and evaluate professional literature and develop a research prospectus.

SLP 521  Advanced Speech Science  3 cr
The study of physical and acoustic concepts involved in speech production and perception including instrumental measurement and analysis.

SLP 532  Clinical Linguistics  3 cr
This course gives the student an overview of the linguistic theories and approaches that are relevant to the field of speech sciences. There will be a particular emphasis on those areas of linguistics that underpin the diagnostic and assessment procedures used in Speech Pathology. The course will focus on development and language use in normal populations and will show how knowledge of the pattern of typically developing language users can be applied to clinical contexts.

SLP 533  Pediatric Language Disorders  3 cr
Clinical assessment and management of language problems in infants, toddlers, and preschoolers, including language disorders associated with other developmental disorders and AAC.

SLP 534  School-Aged Language Disorders  3 cr
This course covers assessment and intervention approaches for school-age language disorders, children beyond age 5 years. Topics include speech-language services at the discourse level; the relationship between language and literacy; service delivery models including integration; educational laws and policies.

SLP 541  Adv Articulation Disorders  3 cr
Advanced study of disordered speech-sound production including these: development, assessment and intervention of articulation and phonological disorders in children.

SLP 551  Voice and Resonance Disorders  3 cr

SLP 561  Fluency Disorders  3 cr
Study of theories, research, and contemporary treatment procedures in the area of fluency disorders.

SLP 565  Neuromotor Disorders of Commun  3 cr
Review of neuroanatomy and physiology, nature of neuromuscular pathologies, methods of assessment and rehabilitation of neuromotor disorders of speech production.

SLP 566  Aphasia & Neuro Lang Disorders  3 cr
Study of the nature, characteristics, and clinical management of acquired neurogenic language disorders associated with focal lesions to the left or right hemisphere, including aphasia and right hemisphere syndrome.

SLP 567  Acq Cognitive Comm Disorders  3 cr
Study of the nature, characteristics, and clinical management of cognitive-communication disorders associated with diffuse brain lesion, including traumatic brain injury and dementia.

SLP 568  Dysphagia  4 cr
This course provides an in-depth study of healthy and disordered swallowing function across the lifespan. Specifically, students will learn normal anatomy and physiological processes of the upper aerodigestive tract, how to conduct clinical and instrumental evaluations of swallowing function, and develop individualized, targeted treatment plans for various swallowing impairments.

SLP 588  Audiology for Speech-Lang Path  3 cr
This course will address the SLP scope of practice, audiological tests, amplification, report literacy, and special topics. An interprofessional team approach with audiology will address co-management of services in individual with communication disorders.

SLP 590  Dir Independent Research -  1 TO 3 cr
Independent research under the direction of a graduate faculty member. May be repeated. Requires permission of the instructor and the Graduate Advisor.

SLP 592  Seminar in Comm Disorders -  1 TO 3 cr
This course is designed to provide the opportunity for in-depth study of special interests. Requires permission of the Graduate Advisor.

SLP 594  Independent Study  1 TO 3 cr
Independent study under the direction of a graduate faculty member. May be repeated. Requires permission of instructor and Graduate Advisor.

SLP 596  Clin Pract Speech-Lang Pathol  1 TO 3 cr
Supervised clinical experience in speech-language pathology. May be repeated.

SLP 597  Off-Campus Clinical Practicum  3 TO 5 cr
Students will complete a 14-week, part time clinical practicum at an off-campus site. Pre-requisite: SLP 596 Minimum Grade of B.

SLP 598  Clinical Externship  10 TO 12 cr
Supervised clinical experience in a professional service facility. Requires special permission.

SLP 599  Thesis  1 TO 3 cr
One to three credits per semester with a maximum of three hours credit. Regular standing required. Requires permission of the Graduate Advisor.

Speech And Hearing Sci (SHS)
SHS 290  Speech Improvement Classroom  3 cr
Survey of minor speech problems in children and adults through application of speech improvement technique.

SHS 301  Intro to Comm Disorders  3 cr
Overview of major disorders of human communication and the role of the Audiologist and Speech-Pathologist in assessing and treating them.

SHS 302  Audiology and Hearing Sciences  3 cr
This course addresses basic principles of hearing science, including the physical properties of sound, sound generation, transmission, and measurement, anatomy and physiology of the hearing mechanisms; an introduction to the profession of audiology.

SHS 315  Fundamentals of Speech Science  3 cr
An introduction to the anatomy and physiology of speech production and the acoustic properties of speech.

SHS 331  Normal Language Acquisition-W  4 cr
Acquisition of communicative behavior in normal children during the first decade of life; development of syntax, semantics, pragmatics, cognition; clinical laboratory experience with children.
Pre-requisite: SHS 341 Minimum Grade of C or SPA 341 Minimum Grade of C.

SHS 341  Clinical Phonetics  4 cr
Transcription techniques for the analysis of speech. Includes a study of the dynamics of speech sound production. Must have CLS 114. SHS 341 may be taken concurrently with SHS 291, SHS 290, and CLS 115. Special permission is needed from Instructor to take course.
Pre-requisite: SHS 301 Minimum Grade of C or SPA 341 Minimum Grade of C. SHS 301 can be taken concurrently with this course.

SHS 414  Neurobiol Bases Human Comm  3 cr
Introduction to neuroscience and clinical neurology as they apply to the processes of normal and disordered communication. Topics include neurophysiology, neuroanatomy, and neuropsychology.
Pre-requisite: (SHS 331 Minimum Grade of C or SPA 331 Minimum Grade of C) and (SHS 341 Minimum Grade of C or SPA 341 Minimum Grade of C) and SHS 315 Minimum Grade of C.

SHS 431  Intro to Language Disorders  3 cr
A survey of language disorders in preschool and school-age children; assessment and intervention.
Pre-requisite: SHS 331 Minimum Grade of C or SPA 331 Minimum Grade of C.

SHS 453  Intro to Speech Disorders  3 cr
An introduction to disorders of articulation, voice, and fluency. Theoretical and etiological foundations will be surveyed as well as philosophical orientations to therapy.
Pre-requisite: SHS 341 Minimum Grade of C or SPA 341 Minimum Grade of C and SHS 315 Minimum Grade of C.

SHS 473  Audiology I  3 cr
This course is an introduction to the following topics - disorders of hearing, etiologies of auditory and vestibular disorders found in populations of all ages and evaluation techniques used by audiologists.
Pre-requisite: SHS 302 Minimum Grade of C.

SHS 474  Audiology II  3 cr
This course is a study of the principles of the management of hearing loss in children and adults; relevant legislation; and treatment and education options.
Pre-requisite: SHS 473 Minimum Grade of C.

SHS 480  Issues in Clinical Pract - W  4 cr
Introduction to the clinical setting; organizations and statutes that govern professional service; instrumentation, procedures and approaches to remediation. Observation of therapy and indirect participation as a clinical aide are also a major part of this course. Special permission is required from instructor to take course.
Pre-requisite: (SHS 331 Minimum Grade of C or SPA 331 Minimum Grade of C) and (SHS 341 Minimum Grade of C or SPA 341 Minimum Grade of C) and (SHS 431 Minimum Grade of C or SPA 431 Minimum Grade of C). SHS 431 can be taken concurrently with this course.

SHS 490  Special Topics -  1 TO 3 cr
Topics to be determined by student need and interest. Content will vary. A subtitle identifying the topic will be entered on the student's record. May be repeated for a total of 6 hours. Requires permission of the department chair.

SHS 494  Directed Independent Study  1 TO 3 cr
Independent study under the direction of a faculty member. Requires permission of the department chair.

SHS 499  Senior Honors Project - H - W  3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project relevant to the field of Speech and Hearing Sciences study that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty members chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours. Requires permission of department chair and completion of an approved project prospectus.

Faculty
ADAMS, ELIZABETH M.
Associate Professor
BS, Spring Hill College
PHD, University of South Alabama

BEVERLY, BRENDA L.
Associate Professor
BSED, Bloomsburg U of Pennsylvania
MS, Bloomsburg U of Pennsylvania
PHD, University of Tennessee-Knox

BEVERLY, TONIA M.
Assistant Professor
BS, University of South Alabama
MS, University of South Alabama
AUD, University of Florida

BROWN, GIDGET R.
Instructor
BSSH, University of South Alabama
MS, University of South Alabama

CHONG, HAERI
Assistant Professor
BS, Sungkyunkwan University
MS, Sungkyunkwan University

ČOJIĆ, TATIJA M.
Assistant Professor
BA, University of Belgrade
MS, University of Belgrade

DAVIS, TARA M.
Associate Professor
BA, Louisiana State University
MCD, Louisiana State U - Hlth Sci
PHD, University of Texas-Dallas

FLAGGE, ASHLEY G.
Assistant Professor
BS, University of South Alabama
AUD, University of South Alabama
PHD, University of South Alabama

GARAND, KENDREA L.
Assistant Professor
BA, North Carolina State U-Raleigh
MS, Purdue University-Main Campus
CSCD, University of Pittsburgh
PHD, Medical U of South Carolina

GORDON-HICKEY, SUSAN
Associate Professor
BA, University of Florida
AUD, University of South Alabama
PHD, University of South Alabama

HILL, GRAYSON B.
Instructor
BS, University of Montevallo
MS, University of Montevallo

HUDSON, KENDRA D.
Senior Instructor
BS, University of Montevallo
MS, University of Montevallo

NICHOLS, AMY C.
Assistant Professor
BA, University of Central Florida
AUD, University of South Alabama
PHD, University of South Alabama

RAMKISSOON, ISHARA
Associate Professor
BSSH, University of Durban
MA, University of Illinois-Urbana
PHD, University of Illinois-Urbana

RISHIQ, DANIA
Assistant Professor
BS, Applied Science University
MA, University of Tennessee-Knox
PHD, Univ of Tenn Hlth Sci Center

ROBERTS, WILDER M.
Assistant Professor
BS, University of Montevallo
MS, University of Montevallo
AUD, University of Florida

SMITH, KIMBERLY A.
Assistant Professor
BS, Old Dominion University
MS, Old Dominion University
PHD, University of SC-Columbia

WILES, BRENT L.
Instructor
BA, University of South Alabama
MS, University of South Alabama
