

Alternative Masters Programs Transcript Analysis

Students interested in pursuing a degree in the Alternative Masters program must first have a transcript analysis done by the Graduate Studies office. This analysis details what undergraduate courses a student is deficient in based on the program the student wants to pursue. (*Link to program sheets for specific course requirements.*)

Once the analysis is completed, a letter is sent to the student outlining all deficiencies and/or prerequisites that must be completed prior to applying to the graduate program.

Allow five to seven business days for a response.
