

UNIVERSITY OF SOUTH ALABAMA COLLEGE OF MEDICINE

SUMMER COURSE IN MEDICAL NEUROANATOMY/NEUROSCIENCE - 2008

Department: Department of Cell Biology and Neuroscience

Dates: June 3 – July 1, 2008

Qualifications: A student must be registered in an accredited medical, dental, or graduate school program, and must have written approval from his/her Course Director, Departmental Chairperson, or Dean of Students or Academic Affairs. Additionally, undergraduate and graduate students in various health related programs, including occupational therapy, physical therapy, speech and language pathology, nursing, physician assistants, neuropsychology, physiological psychology, pharmacy and bioengineering are encouraged to apply.

Course Fee: Tuition - \$1,250.00. To secure a placement in the class, a deposit of \$150.00, payable to the Department of Cell Biology and Neuroscience, University of South Alabama, College of Medicine, must accompany the application. ***The deadline for receipt of the completed application and deposit is May 20, 2008.*** The deposit will be applied to the course fee, or will be refunded if the applicant is not accepted, or withdraws prior to **June 7, 2008, the deadline for submitting the remainder (\$1150) of the course fee.**

Description: The summer program in Medical Neuroanatomy/Neuroscience presents an integration of essential neuroanatomy, neurobiology, and clinical neuroscience as a foundation for understanding the function of the human nervous system in health and disease. This goal is accomplished through an integrated series of basic neuroscience and clinically related lectures, comprehensive “wet”, slide, and neuroimaging laboratories, and small group discussion/problem solving/clinical case studies. The three midterm exams and a final examination consist of USMLE format of clinical vignette-based questions.

This summer course is designed to meet the needs of medical and dental students who must remediate deficiencies in their neuroanatomy/neuroscience requirement, incoming medical and dental students who wish to prepare for medical school or decompress the first year of medical school, as well as graduate and undergraduate students in health-related professions who are interested in, or require, a rigorous, comprehensive, and in-depth study of the human central nervous system. This is a 4 credit, 90 hour course, which is equivalent to the course offered in second year medical curricula.

Information: For further information about the summer course in medical neuroanatomy/neuroscience and off-campus housing, please contact:
