#### How to approve a Purchase Requisition in Banner 9

As individuals create Purchase Requisitions online in Banner, the Purchasing Department will create a purchase order once the requisitions have been routed through a series of electronic approval queues. An approval queue is a repository for purchase requests until the ultimate user with the appropriate authority has approved the document. Approval queues act as an electronic signature on the requisition and reduces the amount of manual paper processing.

Until a document has been approved and processed through the approval queues, the order cannot be converted to a purchase order and forwarded to the vendor.

To access documents waiting your approval:

1. You can either manually enter the FOAUAPP (User Approval) in the Search Box, or use the Menus option to access forms in Banner 9.
