

Dr. Visit Information

Questions to Ask

Many times when you get to the physician's office you forget many of your questions. If you will use this sheet to jot down your questions as you think of them you will be ready when the physician comes in the room.

Help me to Remember Sheet

This sheet is completed during the doctor's visit. You use it to take notes and then ask the physician to review it before you leave the office to ensure you have correctly heard everything he told you. There is a line he can sign. A copy can be made and inserted into the patient's chart if he so desires.
