September 2017
Dear Graduate Student:

I wish to congratulate you on initiating work on a thesis or dissertation for a graduate degree. This will be a significant undertaking but one which you will take pride and satisfaction in accomplishing. The conduct of your study and the process of writing a thesis or dissertation constitute the heart of the professional skills of a graduate education.

The contents of a thesis or dissertation are very important. You, your major professor, and your committee are responsible for the accuracy and the validity of the content of a thesis or dissertation. You and they are also responsible for the form, and we in the Graduate School wish to assist you. That is the purpose of these guidelines. Form is critical, because errors in writing and formatting distract the reader, and may suggest that this lack of attention to detail affected the results and conclusions of your study. There is a practical consideration also; the document is electronically published and also bound in paper copies. Every page must meet the exact standards for these processes.

Dissertations and theses are published and distributed through ProQuest Information and Learning. They are also deposited in the University Library, catalogued, and made available to the public. Several professional societies include theses and dissertations in bibliographies, so wide dissemination is likely. You, your major professor, your committee, and the Graduate School must necessarily be concerned that your professional reputation appears in the best light and that the quality of your work enhances the image of the University.

English is an expressive and flexible language, but its richness creates pitfalls. Clarity in written communication is most certainly an important skill necessary in scholarly endeavors. I hope you will look upon the writing of your thesis or dissertation as an opportunity to perfect your use of this skill. It is, and will be, of great importance to you both personally and professionally.

As you prepare to present the results of your research, the Graduate School wishes you well. I encourage you in your intellectual enterprise and look forward to the day when I can recommend you to the President of the University of South Alabama for the degree toward which you are now working.

Sincerely,

J. Harold Pardue, Ph.D.
Dean of the Graduate School
I. GETTING STARTED

A. Expectations: Your thesis or dissertation is a significant and time-consuming undertaking that must reflect a mastery of your field, contribute to the existing body of knowledge of your field and demonstrate the level of high quality expected by the Graduate School and University.

B. GS 4 form: Completion of this form is REQUIRED and is the first step in this process. Further details on the GS 4 form are in Section II of this guide.

C. Prospectus: Prospectus approval MUST be granted before a research project is initiated, as well as before data collection, if your study involves human research. Further details on developing your prospectus are in section III.

D. IRB Approval: If your study involves human research, you must obtain USA Institutional Review Board (IRB) approval prior to data collection, see http://www.southalabama.edu/departments/research/compliance/humansubjects/

II. APPOINTMENT OF GRADUATE FACULTY TO A DISSERTATION OR THESIS COMMITTEE

A. Completion and submission of the GS #4 form is REQUIRED. This form is located at http://www.southalabama.edu/departments/eforms/graduateschool/gsform4.pdf

III. PROSPECTUS

A. The prospectus is a written document that contains key elements:

1. Problem/topic
2. Review of existing body of knowledge
3. Description of study (must include subjects, procedures, equipment, materials, schedule, and other pertinent information)
4. Anticipated nature of results
5. Description of anticipated method of analysis
6. Implications and impact on existing body of knowledge

B. You must present your prospectus to your committee. Your department may require an oral defense. The prospectus signature page must be signed by the chair of the committee, the members of the committee, the department chair and the College/School director of Graduate Studies.
C. An example of a prospectus signature page is at the end of this document.

E. Any subsequent deviations in the conduct of the study from those presented in your approved prospectus MUST be approved by your committee and the IRB as appropriate.

F. After the study has been completed, the prospectus is used to form the basis for your thesis or dissertation. A detailed Thesis/Dissertation Guide, as well as other resources, is available at http://www.southalabama.edu/gradatemajors/graduateschool/thesis.html
