

Syllabus: MA 150 Contemporary Mathematics and Statistics Seminar

Last updated Spring 2004

Bulletin description:

This course gives an overview of modern mathematics and statistics from the point of view of the practitioners. The course is designed for majors in mathematics and statistics at all levels as well as those students who are considering mathematics or statistics as a major or minor area of study. Topics usually included are elements of geometry, algebra, analysis, methods of statistical inference, the role of the computer in analytical sciences; these topics vary from semester to semester. This course cannot be taken for credit simultaneously with ST 150, but may be repeated in different semesters.

NOTE: May be offered for Honors Credit.
