

Practice problems for Calculus I Test II.

- Chapter 3 Review (p 214 ff.) #1, 3, 4–6, 10, 11, 13–41, 45–48, 52, 54a, 55, 70, 71.
- §3.7 #41, 42, 45 – 48.

Some of the §3.7 problems are in the homework, and some were done in class. The ones done in class you should redo on your own and then use your notes to check your work.

Sorry this isn't very original, but this is where most test problems will be pulled from. Answers to the odd problems are in the back of the book. I'll have *answers* (not solutions) to the even problems in a couple of days. If you have any problems you want explicit solutions for, either come to my office or ask in class on Friday (review day).
