

Trefoil Knot

Susan Williams

Precrease as shown. Fold into a tube with corners, as for Thoki Yenn's "Umulus Rectangulum" model. The lower edge has a hem to lock the overlapping sides of the tube in place. Make sure the right edge of the diagram is on the outside of the tube when you overlap the sides. For the two off-center bends, form the corners on the two edges separately, then tuck one inside the other.

When you have completed 3 units, insert the top edge of each unit into the bottom (hemmed) edge of the next, using the photo of the completed model as a guide.

Make 3 units. I used $a = .5$
