****Other options may be available but may extend the time to graduate.**

Progression

Students must maintain an overall GPA of 3.0 on all work attempted in the program. A maximum of two (2) courses with a grade of C can be counted toward a degree, however, only one C is permitted in the specialization courses for the clinical nurse educator or clinical nurse manager or in the following bridge courses; NU 530 Health Assessment, NU 531 Advanced Pathophysiology, and NU 532 Advanced Pharmacology. If a second C is earned in these courses the course in which the second C is obtained must be repeated. Any combination of three (3) courses with grades of C or less including C grades of repeated courses will result in dismissal from the program. Further, student may withdraw failing from only two courses, the third withdrawal failing results in dismissal.

Students are required to apply for registered nurse licensure upon completion of the nursing foundation component of the curriculum. Prior to enrolling in the specialty component of the curriculum students must possess their RN licenses or hold a temporary registered nurse license. Any student failing the licensure examination or allowing their temporary permit to expire will be withdrawn from the program.
