

Department of Physics - University of South Alabama
Presents Colloquium Speaker

Dr. Neeti Parashar
(Purdue University Calumet)

Thursday, September 18, 2008
4:00 p.m., ILB Room 250

Past and Present in High Energy Physics

I shall give a very general overview of experimental particle physics, where we started from and where we are today. I will concentrate on the major collider detectors in the world at the Fermi National Accelerator Laboratory in Batavia, Illinois and the European Organization for Nuclear Research (CERN) in Geneva, Switzerland. I shall also emphasize why this research is so important to the growth of a society and how undergraduate students in any science discipline can learn and contribute to this effort.

All interested persons are invited to attend.
Refreshments are served at 3:45 p.m.

Host: Dr. R. Godang
