It's Big...and...It's Bold

In order to keep up with industry changes and requests from our customers, Publication Services recently acquired a new large format printer that produces high quality prints in a myriad of sizes. This printer is capable of reproducing images up to 60" wide. Advanced ink technology protects the print with a polymer coating that increases resistance to fading and adheres the ink more evenly across the entire surface of the media.

There is a wide variety of media available including bond, photobase paper (satin or glossy finish), vinyl, canvas, and backlit mylar. Our artists can help design murals, banners, displays, and presentations in spectacular color. Photographs can be enlarged and reproduced with uncompromised accuracy and quality. High resolution output accentuates the color and detail of the project.

Call 380-2828 to set up an appointment with one of our graphic designers. We can also schedule a time for your department to tour our entire facility and learn more about the many services available to YOU!

**With imagination and expertise
we will make your next project a home run.**

We Have What It Takes... To Get The Job Done!
