**Adobe Photoshop/
Adobe Photoshop Elements**
Michael J Behr

Explore your creative options and produce quality images using Adobe Photoshop and Adobe Photoshop Elements. This course will highlight the major differences between the two graphics programs so you can decide which software package is best suited to your needs. These powerful software packages offer fast, professional-quality photo enhancement and photo retouching tools. You will learn to adjust color and density of pictures taken with a conventional film camera, a digital camera, or a scanned image. In addition, the course teaches you how to turn color images into black and white pictures and colorize black and white pictures. The instructor will cover the basic and most-needed controls and tools these programs offer, and then he will begin using more advanced tools such as "Adjustment Layers", "Masks", and Blending Modes." Layers, selections, filters, and channels will be demystified. All handouts included in course fee. To succeed in this class you should be fairly proficient with keyboarding skills and knowledge of using a PC.

NOTE: Required course in Photography Certificate program. *This course qualifies for discounts, coupons and value pricing.*

Computer Technology

CompTIA A+ Hardware Technician Course

Chris Dow, The Computer Trainers

CompTIA's A+ Certification is the entry level certification in the Information Technology industry. This course is designed to prepare students to sit for the certification exams and to give practical job skills into the field. The course provides in-depth knowledge of computer maintenance and repair including how to maintain, troubleshoot and support system devices such as power supplies, motherboard, memory, hard drives. It also covers software issues such as comparison of various operating systems and how they work with hardware and software. The course may be taken as a single course or as a component of either the Computer & Network Administration or Engineer Training Programs. (Students apply for admission and pass an assessment interview as part of the registration process.)

Call 431-6536 for class dates beginning in 2009.

MCSA Certification Training

Chris Dow, The Computer Trainers

Released in late 2002, the MCSA certification is one of the most popular certifications for technical professionals in the IT industry today. This course prepares students to take the core and elective certification exams which validate their skills and expertise to successfully manage and maintain networking systems and develop the competencies to move up the ladder in the industry. The program now includes training on the latest Microsoft client operating system: Vista. (This course leads to an additional MCTS certification)

Included in the course are the following Microsoft training modules: Installing, Configuring, and Administering Microsoft Windows XP Professional; Managing and Maintaining a Windows 2003 Server Environment; Implementing, Managing, and Maintaining a Microsoft Windows Server 2003 Network Infrastructure; Configuring Microsoft Windows Vista Client

PREREQUISITES: A+ and N+ (Students apply for admission and pass an assessment as part of the registration process.)
