

Computer Technology

QuickBooks Pro: Part I

William H Ishee, CPA

Learn the number one small business accounting software through hands-on training and take your new skills back to your home or office through this two-part course taught by a seasoned pro! You can integrate QuickBooks in your day-to-day business operations with helpful accounting and office management skills. The instructor will cover topics such as setting up a new company and modifying QuickBooks preferences to meet your needs. In addition, you will learn to manage the revenues and expenses in your business, to reconcile bank statements, and to work with reports and graphs. This most recent revision of QuickBooks integrates Excel spreadsheet functions and enhances the flexibility of the software's powerful reporting features.

PREREQUISITE: Working knowledge of Windows required.

NOTE: Course fee includes textbook. Refund period only valid up to three business days prior to course start date. Approved by the State Board of Public Accountancy for 16 hours CPE credit.

for details!**

QuickBooks Pro: Part II

William H Ishee, CPA

This second half of the QuickBooks Pro course for the number one small business accounting software builds on the terminology and skills introduced in Part I. The instructor, who offers an exceptional working knowledge of the software, discusses the following topics in Part II: handling pass-through expenses, setting up payroll, payroll processing, using a payroll service inventory, sales tax, estimates, time tracking, period end adjustments and closing procedures. Additional time is devoted in Part II to working with reports and graphs. Both Parts I and II will help you integrate QuickBooks in your day-to-day business operations with helpful accounting and office management skills. And, as noted in the Part I course description, QuickBooks integrates Excel spreadsheet functions and enhances the flexibility of the software's powerful reporting features.

PREREQUISITE: You must have completed QuickBooks Pro: Part I.

NOTE: Course fee includes textbook. Approved by the State Board of Public Accountancy for 16 hours CPE credit. Refund period only valid up to three business days prior to course start date.

Adobe Photoshop/

Adobe Photoshop Elements

Michael J Behr

Explore your creative options and produce quality images using Adobe Photoshop and Adobe Photoshop Elements. This course will highlight the major differences between the two graphics programs so you can decide which software package is best suited to your needs. These powerful software packages offer fast, professional-quality photo enhancement and photo retouching tools. You will learn to adjust color and density of pictures taken with a conventional film camera, a digital camera, or a scanned image. In addition, the course teaches you how to turn color images into black and white pictures and colorize black and white pictures. The instructor will cover the basic and most-needed controls and tools these programs offer, and then he will begin using more advanced tools such as "Adjustment Layers", "Masks", and Blending Modes." Layers, selections, filters, and channels will be demystified. All handouts included in course fee. To succeed in this class you should be fairly proficient with keyboarding skills and knowledge of using a PC.

NOTE: Required course in Photography Certificate program. *This course qualifies for discounts, coupons and value pricing.*

Applications of Modern Shipbuilding Design

Begin building your new career today!

Designed to provide the practical skills and knowledge needed for an entry level position in marine design.

Learners with basic AutoCAD skills and an interest in modern shipyard practices:

- Learn marine materials, classification societies, safety issues, shipbuilding terminology, fabrication strategies and standard shipyard drawing standards.
- Practice modeling structural piping HVAC and equipment parts within an industry-standard advanced 3D shipbuilding software package.
- Create realistic production output such as assembly drawings and parts nesting.

This course was created in direct response to needs of the shipbuilding industry with national and regional firms contributing to curriculum development. Learners can look forward to gaining exposure to 12 key shipbuilding competencies within a framework of learning, practice, and hands-on application.

Our instructors, who are experienced marine engineers and naval architects, will share their shipyard knowledge and experience. The course fee includes the outstanding textbook, Klaas van Dokkum's "Ship Knowledge" 2005, 3rd Edition.

PREREQUISITE: BASIC AUTOCAD SKILLS AND MATH AND READING COMPREHENSION ON A 12TH GRADE LEVEL
