Chemical-Biomolecular Eng

Department Information

Department of Chemical and Biomolecular Engineering website
https://www.southalabama.edu/colleges/engineering/chbe/index.html

Chemical Engineering is a profession in which knowledge of mathematics, chemistry, biology and other natural sciences gained by study, experience, and practice is applied with judgment to develop economical ways of using material and energy for the benefit of mankind. The program required for the degree of Bachelor of Science in Chemical Engineering provides fundamental instruction in mathematics, chemistry, biology, physics, and engineering. This education prepares the graduate to seek employment in petrochemical, pharmaceutical, healthcare, microelectronics, polymers, energy and environmental industries. In addition, the graduate is adequately prepared to pursue graduate school.

Chemical engineering students are required to take the Chemical Engineering discipline specific Fundamentals of Engineering (FE) examination in Alabama or another state prior to graduation. All electives must be approved by the student's advisor. Degree requirements include a minimum of 18 semester hours of approved electives in the Humanities and Social Sciences.

Satisfactory completion of the 126 hour program outlined below leads to a Bachelor of Science in Chemical Engineering. Students must also comply with the College of Engineering Requirements for a Degree, which are covered in the Bulletin under the College of Engineering.

BSChE Program Educational Objectives

The educational objectives of the Department of Chemical & Biomolecular Engineering’s undergraduate program are that, within a few years of program completion, graduates will have used the knowledge and skills gained through academic preparation and post-graduation experience so they have:

1. Advanced in the chemical engineering profession, obtained professional licensure, and applied engineering knowledge and problem-solving skills to multi-disciplinary projects.
2. Incorporated economic environmental, social, regulatory, constructability, safety, and sustainability considerations into the practice of chemical engineering.
3. Exhibited effective communication skills, teamwork, leadership, initiative, project management, and professional and ethical behavior.
4. Continued their technical and professional development, which may include graduate level education, continuing education, and participation in professional organizations.

BSChE Student Outcomes

By the time of graduation from the BSChE program, a student will have demonstrated attainment of the following outcomes:

1. an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. an ability to communicate effectively with a range of audiences
4. an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgements, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgement to draw conclusions.

7. an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The BSChE curriculum is designed to ensure the attainment of the student outcomes.

The Bachelor of Science in Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET, http://www.abet.org

### Areas Of Study

Chemical Engineering (BS)
Chemical Engineering (MS)

### Courses

#### Chemical Engineering (CHE)

</thead>
<tbody>
<tr>
<td>CHE 190</td>
<td>Special Topics</td>
<td>1 TO 5 cr</td>
<td>Topics of current Chemical Engineering interest. Requires permission of department chair. Fee.</td>
</tr>
<tr>
<td>CHE 203</td>
<td>Material &amp; Energy Balances</td>
<td>4 cr</td>
<td>Application of multicomponent material and energy balances to chemical processes involving phase changes and chemical reactions. Minimum grade of 'C' is required and only 2 attempts are permitted. Fee Pre-requisite: CH 132 Minimum Grade of C and CH 132L Minimum Grade of C and MA 126 Minimum Grade of C and (EH 101 Minimum Grade of C or EH 105 Minimum Grade of C or ACT English 27 or SAT Critical Reading 610 or READING TEST SCORE 33 or University - EH101 Exempt P ).</td>
</tr>
<tr>
<td>CHE 290</td>
<td>Special Topics</td>
<td>1 TO 5 cr</td>
<td>Topics of current chemical engineering interest. Requires consent of department chair. Fee.</td>
</tr>
<tr>
<td>CHE 311</td>
<td>CHE Separations I</td>
<td>3 cr</td>
<td>Applications of material balances and equilibrium relations to equilibrium stage design. Design of single stages and cascades for absorption, stripping, distillation, liquid-liquid extraction, and bioseparations. Fee. Co-requisite: CHE 331 Pre-requisite: CHE 203 Minimum Grade of C.</td>
</tr>
<tr>
<td>CHE 321</td>
<td>Transport Phenomena I</td>
<td>3 cr</td>
<td>Fundamentals of momentum transfer with applications in fluid flow through pipes and process equipment. Fee. Pre-requisite: MA 238 Minimum Grade of C and CHE 203 Minimum Grade of C and PH 201 Minimum Grade of C.</td>
</tr>
</tbody>
</table>

#### CHE 322  Transport Phenomena II  3 cr
Fundamentals of conductive, convective, and radiative modes of heat transfer with applications in the design of heat exchanges. Fee. Pre-requisite: CHE 321 Minimum Grade of C.

#### CHE 331  CHE Thermodynamics I  3 cr
This course introduces the fundamentals of thermophysical property estimation and modeling of non-ideal pure and multicomponent fluid systems, including an introduction to multicomponent vapor/liquid equilibria. Fee. Co-requisite: CHE 351 Pre-requisite: CH 201 Minimum Grade of C and CHE 203 Minimum Grade of C and MA 238 Minimum Grade of C and CH 201L Minimum Grade of C and PH 201 Minimum Grade of C.

#### CHE 332  CHE Thermodynamics II  3 cr
This class is an advanced thermodynamics course that uses a molecular level viewpoint to introduce students to applications of thermodynamics principles to complex chemical engineering problems including multicomponent, non-ideal fluid phase equilibria (VLE, VLLE, SLE), and chemical reaction equilibria. The concepts of chemical potential, fugacity, partial molar and excess properties as well as complex activity coefficient models are introduced to solve these problems. Fee. Co-requisite: CHE 352 Pre-requisite: CHE 331 Minimum Grade of C.

#### CHE 342  Engineering Communication - W  3 cr
Formal and informal reports, oral presentations, and visual aids. Fee. Co-requisite: CHE 352 Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C.

<td>Special Topics</td>
<td>1 TO 3 cr</td>
<td>Topics of current chemical engineering interest. Requires consent of department chair or departmental approval. Fee.</td>
<td></td>
</tr>
<tr>
<td>CHE 494</td>
<td>Directed Studies</td>
<td>1 TO 3 cr</td>
<td>Directed study, under the guidance of a faculty advisor, of a topic from the field of chemical engineering, not offered in a regularly scheduled course. A written report is required. May be repeated for a maximum of 6 credit hours. Requires consent of the department chair and minimum GPA of 3.00 for admission or departmental approval. Fee.</td>
<td></td>
</tr>
<tr>
<td>CHE 499</td>
<td>Honors Senior Project</td>
<td>1 TO 6 cr</td>
<td>Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of chemical engineering. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition. A minimum of 4 credit hours is required, but students may enroll for a maximum of 6 credit hours over two semesters. Requires completion of an approved project prospectus. Pre-requisite: CHE 322 Minimum Grade of C and CHE 332 Minimum Grade of C.</td>
<td>Pre-requisite: CHE 322 Minimum Grade of C and CHE 332 Minimum Grade of C.</td>
</tr>
<tr>
<td>CHE 501</td>
<td>Chemical Engineering Seminar</td>
<td>0 TO 1 cr</td>
<td>A weekly research seminar for Chemical Engineering graduate students. Students will attend research presentations by faculty, invited speakers and other students rehearsing for their proposal presentations, thesis defenses or conference presentations. Topics will include research, research methods, safety and responsible conduct of research.</td>
<td></td>
</tr>
</tbody>
</table>
CHE 510  Adv Chemical Thermodynamics  3 cr  Advanced classical and molecular thermodynamics as applied to non-ideal multicomponent phase and reaction equilibria for chemical engineering applications. An introduction to statistical thermodynamics will also be given. Fee.

CHE 520  Adv Transport Phenomena I  3 cr  An advanced treatment of the principles and methods of transport phenomena. Detailed coverage of several key aspects of energy and momentum transfer including creeping flows, boundary layers and lubrication theory.

CHE 525  Chemical Reactor Analysis  3 cr  Design, modeling and analysis of non-ideal chemical reactor systems. Includes effects of mass transfer in heterogeneous catalytic reactors, non-steady-state heat transfer and residence time distributions.

CHE 530  Synthetic Fuels  3 cr  Fundamentals of gasification and liquefaction concepts applied to fossil fuels and biomass conversion.

CHE 550  Chemical Process Control  3 cr  Sampled-data algorithms, feedback, feedforward, deadtime compensation, advanced control schemes applied to chemical engineering processes. Fee.

CHE 551  Adv Chem Engineering Modeling  3 cr  Advanced mathematical modeling of chemical process systems for design and analysis.

CHE 563  Simulation of Chem Processes  3 cr  In this course, students utilize modern software, tools, such as Aspen Plus, to model steady state chemical processes. Simulation topics include physical property selection, flowsheet generation, separations and reactors. Fee.

CHE 570  Separation Processes  3 cr  Analysis and design of separation processes. Topics include molecular diffusion and convective mass transfer with applications in the chemical, petroleum and pharmaceutical industries. Fee.

CHE 575  Chem Proc Synth Optimization  3 cr  Use of analysis, synthesis, and optimization in process development. Fee.

CHE 580  Chem Process Safety and Design  3 cr  Fundamental principles of chemical process safety, fires and explosions and design for the mitigation of associated hazards. Fee.

CHE 590  Special Topics -  3 cr  Topics of current chemical engineering interest. Requires consent of the department chair or departmental approval. Fee.

CHE 592  Directed Independent Study  1 TO 6 cr  Directed study, under the guidance of a faculty advisor, of a topic from the field of chemical engineering, not offered in a regularly scheduled course. A written report is required. Requires consent of the department chair and overall minimum GPA of 2.5 for admission or departmental approval. Fee.

CHE 594  Project in Chem Engineering  3 cr  Approved investigation of original problems under direction of a faculty member. Requires approved prospectus. Fee.

CHE 599  Thesis  1 TO 6 cr  May be taken more than once. Only 6 hours may be applied for credit toward a degree. Requires approved prospectus. Fee.

Engineering (EG)

EG 101  Intro to Engineering & Design  2 cr  A course for first time engineering students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. Introduction to engineering fundamentals through reading, homework assignments, laboratory investigations, guest lecturers and group discussions on the engineering profession. Pre-requisite: (MA 113 Minimum Grade of D or MA 172 Minimum Grade of D) or (MA 125 Minimum Grade of C or MA 132 Minimum Grade of D). MA 113 and MA 125 can be taken concurrently with this course.

EG 201  Intro to Engr & Prob Solving  2 cr  A course for first-time transfer students that helps maximize the student's potential to achieve academic success and to address the transition from community college to four-year college. Introduction to engineering fundamentals and problem solving techniques through reading, homework assignments, laboratory investigations, guest lecturers and group discussions on the engineering profession. Pre-requisite: MA 126 Minimum Grade of C.

<td>Systems Eng Fundamentals</td>
<td>3 cr</td>
<td>Fundamentals of systems engineering, structure of complex systems, system development process, systems engineering management and documentation, needs analysis, requirements development, engineering design and development, integration and test, change management, process improvement. Fee.</td>
</tr>
<tr>
<td>SE 602</td>
<td>Risk and Failure Analysis</td>
<td>3 cr</td>
<td>Risk Analysis needs, risk analysis methods, performance requirement analysis, trade studies, failure analysis needs, failure analysis tracking, and failure analysis methods. Pre-requisites: Requires a background in calculus-based statistics and permission of instructor. Fee.</td>
</tr>
</tbody>
</table>
SE 603 Integration, Test & Evaluation 3 cr
Interface control documents, design reviews, requirements management, allocation of test methods to requirements, test plans, test procedures, test execution, and failure tracking and resolution. FEE
Pre-requisite: SE 601 Minimum Grade of C.

SE 604 Software Systems Engineering 3 cr
Software development methodologies, software development tools, change management, software concept development, software requirements development and allocation, coding and unit test, program technical interfaces, software engineering management. Fee.
Pre-requisite: SE 601 Minimum Grade of C.

SE 605 Project Engineering 3 cr
Management of system design, development and risk, work breakdown, structure, systems engineering management plan, design reviews, budget and schedule analyses, negotiation and conflict resolution, contracts, customer interactions, team selection, failure resolution. Fee.

SE 606 Systems Architecture 3 cr
The systems architecture is that foundational structure of a system, capturing the core capability and structure of the system. This course will cover principles of systems architecting, system architecture drivers, relationship of systems architecture to system requirements, common tools and techniques to include design structure matrices, IDEF0, SysML, and simulation.
Pre-requisite: SE 601 Minimum Grade of C.

SE 607 Systems Simulation 3 cr
This course rigorously examines system modeling and simulation methodologies, emphasizing statistical analysis and discrete-event simulation via simulation software.

SE 608 Reliability Engineering 3 cr
This course rigorously examines reliability and maintainability methodologies, emphasizing mathematical constructs, design concepts, and data analysis employed to quantify reliability, availability, and maintainability measures for operational readiness, support system design, and system effectiveness.

SE 609 Engineering Research Methods 1 TO 3 cr
This course is a fast tracked course examining quantitative and qualitative methods for conducting meaningful inquiry and research. Topics include research ethics, intent, design, methodologies, techniques, formatting, data management, analysis, publication, and presentation utilizing common statistical approaches.

SE 610 Systems Thinking 3 cr
The act of systems thinking is taking a step back from the details considered during engineering design, and looking at the whole picture. This class exposes the student to a conceptual framework to allow them to properly define complex systems and enterprises drawing from synthesizing techniques from systems science, soft systems methodologies, and systems engineering. The class demonstrates the ability to leverage the simultaneity of perspectives, the role of paradox, and the centrality of soft issues in resolving complexity.

SE 611 Socio-Technical Systems 3 cr
Socio-Technical systems are those systems which contain and/or are strongly influenced by human, social and institutional elements. Because of those influences, they quickly become dependent on community partnerships, infrastructure constraints, and government-aspects that are not traditionally part of the engineering equation. This course considers the systems engineering approach as it relates to the challenges of socio-technical systems.
Pre-requisite: SE 601 Minimum Grade of C.

SE 612 Production System Engineering 1 TO 3 cr
This course rigorously examines principles, design, models and techniques for operational planning and analysis of production and distribution systems emphasizing quantitative methods.

SE 690 Special Topics in SE 3 cr
Topics of current interest in Systems Engineering. Fee.

SE 692 Directed Studies 3 cr
Directed study, under the guidance of a faculty advisor, of a topic from the field of Systems Engineering not offered in a regularly scheduled course. Prerequisite: Instructor's permission.

SE 699 Dissertation 1 TO 6 cr
An investigation of an original problem in Systems Engineering under the guidance of the student's major professor. Prerequisite: Approval of the dissertation prospectus by the student's Advisory Committee, the Graduate School, and consent of the Director of Engineering Graduate Studies.
