Students must complete a minimum of nine semester hours beyond the Introductory and Intermediate sequences. At least three of those nine hours must be taken on campus at the University of South Alabama. LG 333 and LG 334 are recommended. Remaining credits are to be selected from the upper-division courses in Spanish. Native or near-native speakers of a language may not enroll in upper-level conversation courses.

Note: The Minor in Language cannot fulfill the minor requirement for Language Majors.
Modern Languages And Literature (BA) - French Concentration

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L, GY 111 & GY 111L, GY 112 & GY 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, PH 201 & PH 201L, PH 202 & PH 202L. Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern Languages and Literature at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.
B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Modern Requirements (49 Hours)**

**Modern Languages And Literature Core (9 Courses, 25 Hours)**

A. 25 hours: IS 100, LG 110, LG 205, EH 235, IST 300, LG 290 or LG 390, LG 480, LG 490

**French Concentration (8 Courses, 24 Hours)**

A. 18 hours: Introductory sequence: LG 111, LG 112, Intermediate sequence: LG 211 and LG 212, or LG 213, LG 326, LG 327
B. 6 hours from: LG 311, LG 312, LG 314, LG 412, LG 415, LG 416, LG 492

**Minor Or Concentration Requirements (18-24 Hours)**

A minor or a concentration in a second language is required for this degree program

## Degree Requirements

### General Education Requirements (53-57 Hours)

#### Area I - Written Composition (2 Courses, 6 Hours)
- A. 3 hours: EH 101
- B. 3 hours: EH 102

#### Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
- A. 3 hours: CA 110
- B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
- C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

#### Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
- A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

#### Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
- A. 3 hours from: HY 101, HY 102, HY 135, HY 136
- B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

#### Area V (3 Courses, 9-10 Hours)
- A. Foreign Language. 6 hours from any one group:
  - LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

  Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

- B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
  - AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L,
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (49 Hours)**

**Modern Language And Literature (9 Courses, 25 Hours)**
A. 25 hours: IS 100, LG 110, LG 205, EH 235, IST 300, LG 290 or LG 390, LG 390, LG 490, LG 480

**Russian Concentration (8 Courses, 24 Hours)**
A. 12 hours: Introductory sequence: LG 171 and LG 172, or LG 173, Intermediate sequence: LG 271, LG 272
B. 3-6 hours from: LG 374 and/or LG 376
C. 6-9 hours from among the following to total 24 hours in the concentration: LG 372, LG 373, LG 374, LG 375 (to be taken three times for a minimum of three course credits), LG 376, LG 380, LG 381

**Minor Requirements (18-24 Hours)**
A minor or concentration in a second language is required for this degree program

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LG 181 & LGS 182

   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
   AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L,
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (49 Hours)**

**Modern Languages And Literature (9 Courses, 25 Hours)**
- A. 25 hours: IS 100, LG 110, LG 205, EH 235, IST 300, LG 290 or LG 390, LG 390, LG 490, LG 480

**Spanish Concentration (9 Courses, 27 Hours)**
- B. 12 hours from: LG 333, LG 334, LG 336, LG 431
- C. 3 hours from: LG 432, LG 433

**Minor Requirements (18-24 Hours)**
A minor or a concentration in a second language is required for this degree program

**Notes**

*Recommended Course

**See Degree Requirements
Modern Languages And Literature (BA) - German Concentration

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L, GY 111 & GY 111L, GY 112 & GY 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, PH 201 & PH 201L, PH 202 & PH 202L. Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (0-23 Hours)
A. Foreign Language. 6 hours from any one group:
LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & GLS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern Languages and Literature at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.
B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (49 Hours)**

**Modern Language And Literature Core (9 Courses, 25 Hours)**
A. 25 hours: IS 100, LG 110, LG 205, EH 235, IST 300, LG 290 or LG 390, LG 390, LG 490, LG 480

**German Concentration (8 Courses, 24 Hours)**
A. 12 hours: Introductory sequence: LG 151 and LG 152, or LG 153, Intermediate sequence: LG 251, LG 252
B. 6 hours from: LG 361, LG 362, LG 363, LG 364

6 hours from: LG 366, LG 367, LG 368

**Minor Or Second Concentration Requirements (18-24 Hours)**

A minor or concentration in a second language is required for this degree program

Museum Studies Program
http://www.southalabama.edu/colleges/artsandsci/museumstudies/

Museums, institutions dedicated to the acquisition, preservation, study, and exhibition of works of artistic, historical, or scientific value, play an integral role in today’s societies through the act of discovery and the preservation of knowledge of both the past and present. The Museum Studies Program, using an interdisciplinary approach (e.g. humanities, social sciences, visual arts), offers a minor that allows students to gain a firm understanding of the histories, theories and skills involved in museum work. The minor in Museum Studies provides basic preparation to enter the museum industry by introducing students to both the variety of roles played by museums in today's societies and the diversity of museum careers.

For additional information about the program, please contact Dr. Philip Carr, Museum Studies Program, Archaeology Museum, ARCM 107, 6052 USA Drive South, University of South Alabama 36688-0001. Phone (251) 460-6907; E-mail address pcarr@southalabama.edu; or Dr. Marsha Hamilton, Department of History, 5991 USA Drive North, Room 344, University of South Alabama, Mobile, AL 36688-0001; e-mail address mhamilton@southalabama.edu.

Minor In Museum Studies

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Core Requirements

1. Twenty-one (21) credit hours in approved courses; nine (9) hours must be taken at the University of South Alabama.
2. At least one (1) course must be taken in each of the three primary disciplines of anthropology, art history and history.
3. MUM 201: Introduction to Museum Studies
4. EH 372: Technical Writing
5. At least three (3) and no more than six (6) credit hours from AN 496: Anthropology Internship, ARH 360: Traineeship in Museum Work, HY 498: Internship in History, or IST 498: Internship.
6. Two (2) of the following courses: AN 435 Museum Methods in Archaeology, ARH 493: Methodology of Art History, HY 496: Introduction to Public History.

Music

Department Information

Department of Music website
http://www.southalabama.edu/colleges/music/

The Department of Music of the University of South Alabama is an accredited institutional member of the National Association of Schools of Music, 11250 Roger Bacon Drive, Suite 21, Reston, Virginia 20190; (703) 437-0700. Degree programs are offered for those students pursuing careers in music performance, music education, music business, and those who wish to combine studies in music with other academic disciplines.

All first-time freshmen must successfully complete CAS 100: First Year Experience as a degree requirement. Students must enroll during their first term at USA, except for summer-entry students who must enroll in the fall semester following entry.

Placement In Music Theory

Transfer students intending to take music theory must take a Theory Placement Examination. Contact the Music Office for details.

Placement In Applied Music Classes

All students not previously enrolled in private music study at the University of South Alabama must audition prior to enrolling. Contact the Music Office for audition requirements and scheduling. All students enrolled in private music study must fill out a Teacher Preference form for each Applied Music course in which they are enrolled. These forms must be filed on-line to the Music Office before registration begins. Once a student is registered and knows their schedule, they must submit their schedule information to their Applied teacher.

Applied Music

Applied music is an integral and vital part of the total education in the field of music. In addition to performing in recitals, full-time music students are also required to attend concerts and recital class (MUA 100) for six semesters and take part in various programs given during their course of study.

Students choosing a minor in music must include applied music courses at the 200 level.

Credit for applied music is based on the minimum practice time per week, not on the length of the lesson period. Courses that show one hour's credit require one 30-minute lesson per week with a minimum practice period of 30 minutes per day. A two-hour course requires 60 minutes of lesson time a week and at least 60 minutes of practice time per day. Those that show three hours' credit require 60 minutes of lesson time per week with a minimum of two hours per day for practice. Satisfactory achievement and development are best achieved by practicing twice the above minimum requirements.

A student may take no more than two applied music courses in any given semester unless permission is obtained from the student's advisor, major applied teacher, and department chair.

Senior Recital Requirements

A public senior recital (MUA 400) is required for the BM degree. Specific requirements vary according to the chosen concentration. See the Department of Music Student Handbook for details.

Applied Music Levels

Students must audition in order to enroll in Applied Music courses. Contact the Department of Music for information.

100 Level (Elective) is designated for students majoring in other academic disciplines (when possible) or music majors who wish to study in a secondary applied area.

200 Level (Major/Lower Division) is designated for the first four semesters of study as a music major. A student must pass an examination at the end of the fourth semester in order to enroll at the 300 or 400 level. Music minors will also enroll at the 200 level.
300 Level (Major/Upper Division) is designated for the junior and senior music major in all concentrations except Performance.

400 Level (Major/Performance) is designated for the junior and senior music major with a concentration in Performance.

**Minor**

Students pursuing a Bachelor of Music degree are not required to have an academic minor with the exception of the Bachelor of Music with Elective Studies in Outside Fields.

**Music Organizations**

The Department of Music sponsors performing organizations open to all students of the University, providing satisfactory audition requirements have been met. Ensemble participation is recognized as an essential literature class in music and music education. The appropriate MAJOR ensemble (Wind Ensemble, Orchestra, Marching Band, Symphony Band or Concert Choir) must be elected each semester that a student is enrolled as a full-time student in music. Lower division credit is for 1st and 2nd year students. Upper division credit is for 3rd and 4th year students and reflects increased responsibility and leadership within the section and/or ensemble as assigned by the conductor/director. Graduate credit requires assisting the conductor/director with logistics, rehearsals, and presentation of concerts. Each course number is to be repeated four times for a two-year sequence of the course. All Bachelor of Music degree majors in guitar and piano must satisfactorily complete a minimum of six semester hours in a major ensemble, to be taken for three consecutive years and one semester hour in another ensemble in which they will play their principal performing instrument. Students are, in addition, encouraged to elect additional hours in both major and small ensembles. Consult the appropriate curriculum in the section entitled Music Organizations for the requirements.

The organizations include the Concert Choir; University Chorale; Marching Band; University Symphony Band; Wind Ensemble; University Band; Orchestra; Jazz Band; Woodwind, Brass, Guitar, Percussion, Trumpet, Clarinet, Trombone, Tuba-Euphonium, Flute, World Music, String, and Piano Ensembles; and Opera and Musical Theatre Workshop.

**Master Of Music Graduate Studies**

The Master of Music degree offers concentrations in Collaborative Keyboard, Music Education, Music Education-Alt. Choral or Instrumental, and Performance (Piano, Vocal, Brass, Percussion and Woodwinds). The program is designed to provide professional advancement for musician living and working along the Gulf Coast, produce research and/or performances, qualify students for admission to doctoral programs, and fulfill the mission of the University by offering high-quality teaching and public service that increases the education level of Alabama citizens, who can better participate in a global community and attain a higher quality of life.

The department's graduate faculty engage students to think critically as they address music practices and issues. Courses examine how music creates, sustains and changes personal lives, organizations, cultural institutions and society. Each concentration consists of 32-35 hours which culminate in performances, portfolios, recordings, or projects representing pedagogical work. The Music Education—Alt. Choral or Instrumental concentration consists of 46 hours culminating in a supervised student internship. Graduates of the traditional Music Education concentration and the Music Education—Alt. Choral or Instrumental concentrations are eligible for the Class A Professional Educator Certificate from the Alabama State Department of Education.

**Requirement For Admission**

All applications must receive approval from the Graduate Coordinator of Music, the Director of Graduate Studies for the College of Arts and Sciences, and the Graduate Dean. The Office of Admissions should receive a resume limited to one page and three letters of recommendation addressing academic or professional abilities. Students are admitted each semester and must meet the following additional requirements:

**Regular Admission**

**Undergraduate Requirements**

Students must submit official copies of undergraduate transcripts indicating the following:

- A bachelor's degree in music.
- At least a 2.5 GPA on all undergraduate work, or at least a 2.75 GPA on the last 60 hours of undergraduate work.

For the Music Education—Alt. Choral or Instrumental concentration, students must also submit official copies of undergraduate transcripts indicating the following:
• A bachelor’s degree from a regionally accredited institution with a minimum overall GPA of 2.75 or a master’s or higher degree with a GPA of at least a 3.0. This GPA must be documented on the official transcript of the degree granting institution and must be the GPA that was used as the basis for granting the degree, not a GPA that includes post-degree courses. If admitted on master’s or higher degree GPA, courses from that degree cannot be used to meet certification requirements.

• An academic major in the teaching field, appropriate credit hours in the teaching field (30/18: 30 hours in the field with 18 hours in upper-division), or a passing score on the prescribed Praxis subject assessment.

• GPA Exception for unconditional admission to Alternative Class A State Department of Education-approved programs: Individuals who have earned a bachelor’s degree from a regionally accredited institution at the time the degree was earned and do not meet the minimum overall undergraduate GPA of 2.75, but have at least a 2.0 overall undergraduate GPA, may seek provisional admission to an Alternative Class A program if the alternate score on the Alabama prescribed Praxis subject-area test is obtained. The alternate scores can be found on the Alternate Score Requirements document at www.alsde.edu (Department Offices: Educator Assessment: Educator Assessment Policies). The ONLY tests and scores accepted are those listed on the Alternate Score Requirements document. All other requirements for admission must also be met.

• Students must pass a criminal background check.

International Students:

• International students must submit documentation of TOEFL test scores of 525 or above (197 on computer-based test or 71 on internet-based test).

• Students who are required to take the English Language Proficiency Examination and whose scores suggest an English language deficiency must take the appropriate English as a Second Language courses. These courses are not counted as part of the 32-hour degree program.

Departmental Admissions Requirements:

• Passing score in Graduate Music Theory and Music History Diagnostic Exam or Bachelor of Music degree from USA.

• Admittance requirements per area of specialization:
  • Collaborative Keyboards
    • Audition - recording or live. Admittance determined by area faculty
    • Contact Piano Area Coordinator for date, time and location
  • Music Education
    • Teaching Certificate
      • Video of teaching: 10 - 25 minutes. Acceptability determined by music education faculty
      • Contact Music Education Area Coordinator for date, time and location
  • Music Education-Alt, Choral or Instrumental
    • Interview with Music Education Faculty
    • Contact Music Education Area Coordinator for date, time and location
  • Performance Piano, Brass, Percussion and Woodwinds
    • Audition - recording or live. Admittance determined by area faculty
    • Contact Area Coordinator for date, time and location
  • Performance: Voice
    • Audition - live on-site or live streamed via internet. Admittance determined by area faculty
    • Diagnostic exam in vocal diction (Italian, German, and French)
    • Contact Vocal Area Coordinator for date, time and location
  • Diagnostic Exams
    • Students admitted to graduate degree programs in the USA Department of Music must take graduate diagnostic exams in music theory and history. USA graduates are exempt. Diagnostic exams are administered twice a year, in August and January. The results of the exams are advisory only; however, students may not take graduate-level
Areas Of Study

Degrees, Programs, Or Concentrations

Minor in Music................................................................. 936
Music (BM) - Elective Studies in Business Concentration......................................................... 937
Music (BM) - Vocal Music Education Concentration................................................................. 942
Music (BM) – Elective Studies in Specific Outside Fields Concentration.................................. 948

Non-degree Admission
Students may register for and complete up to 12 hours without formal entrance into the program.

Degree Requirements And Courses
Students must complete a minimum of 32 semester hours of credit (46 hours of credit for Music Education – Alt. Choral or Instrumental) in approved 500-level courses. A minimum of 20 semester hours must be completed at the University of South Alabama. Up to 12 hours of USA courses taken while in another program (or non-degree status) may be applied. Only courses not applied to another degree may count. Maximum of 12 hours with grades of "A", "B", or "S" of approved transfer credit is allowed. If the university is non-accredited, the individual USA graduate program will determine if the quality and content of the courses meet the standards of the program.

Grade Requirements
• A minimum of a 3.0 GPA on all work attempted is required for graduation.
• Courses in which a student receives a "D" or below will not be counted toward the degree program.
• A maximum of two courses with a grade of "C" will be counted toward the degree program.
• Students receiving four grades of "C" or below, regardless of the overall GPA will be dismissed from the program.
• A student who receives a failing grade in a course for graduate credit may be dismissed from the program.

Time Limitations
• All degree requirements must be completed within seven calendar years.
• Most students who take six-eight hours per semester (including summer term) complete the degree within a two-year period (two and a half for Music Education - Alt. Choral or Instrumental).
• The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

Course Load
Six to ten credit hours per semester constitute a full-time course load.

Note: No more than twelve credits in this area are applicable toward a degree.

Music (BM) - Elective Studies In Business Concentration

Degree Requirements

General Education Requirements (35-38 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (2-3 Courses, 6-9 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
Note: Students must select a six-hour sequence in literature or history. If a literature sequence is selected, choose a 6 hour sequence of EH 215 and EH 216, EH 225 and EH 226, or EH 235 and EH 236.

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, *HY 135, *HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, *ECO 215, *ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112. No more than 6 hours in any one discipline may be counted. Note: Students must select a six-hour sequence in literature or history. If a history sequence is selected, choose a 6 hour sequence of HY 101 and HY 102 or HY 135 and HY 136.

Area V (2 Hours)
A. 2 hours: CAS 100

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

Major Requirements (89-92 Hours)

Music Core Requirements (35 Courses, 54 Hours)

Music Theory (7 Courses, 19 Hours):
A. 19 hours: MUT 112, MUT 113, MUT 212, MUT 213, MUT 312, MUT 313, MUT 361

Music Literature (4 Courses, 10 Hours)
A. 10 hours: MUL 235, MUL 236, MUL 335 (W), MUL 336 (W)

Applied Music (7 Courses, 14 Hours)
A. 14 hours: MUA/B2** (8 hours), MUA/B3** (6 hours), MUA 400 (senior recital, no credit)
Major Ensemble (7 Courses, 7 Hours)
A. 4 hours from: MUO 111, MUO 115, MUO 116, MUO 117, MUO 127, MUO 130, MUO 133, MUO 137
B. 3 hours from: MUO 411, MUO 415, MUO 416, MUO 417, MUO 427, MUO 430, MUO 433, MUO 437

Recital Class (6 Courses, 0 Hours)
A. 6 semesters of MUA 100 no credit

Piano (4 Courses, 4 Hours)
A. 4 hours from: MUE 102, MUE 103, MUE 202, MUE 203 OR MUE 212, MUE 213, MUE 312, MUE 313

Concentration Requirements For Elective Studies In Business (10 Courses, 35-38 Hours)
A. Music Business (4 courses, 11 hours): MUS 204, MUS 304, MUS 305, MUS 404
B. Business (5 courses, 15 hours): ACC 211, ACC 212, ECO 215, ECO 216, MKT 320
C. Internship (1 course, 9-12 hours): MUS 470

Minor Requirements (0 Or 18-24 Hours)
A minor is not required for this degree program

Notes:
* Recommended Course

+Concentration

No courses for the Baccalaureate music core or concentration are offered during the Maymester or summer semester.
Music (BM) - Vocal Music Education Concentration

Degree Requirements

General Education Requirements (35-38 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (2-3 Courses, 6-9 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236 Note: Students must select a six-hour sequence in literature or history. If a literature sequence is selected, choose a 6 hour sequence of EH 215 and EH 216, EH 225 and EH 226, or EH 235 and EH 236.

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 227, MA 237, MA 238
B. 8-10 hours in laboratory sciences from: AN 210, BLY 101, BLY 102, CH 101, CH 103, CH 131 or CH 141, CH 132 or CH 141, GEO 101, GEO 102, GY 111, GY 112, PH 101, PH 104, PH 114 or PH 201, PH 115 or PH 202.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, "HY 135, "HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 1122. No more than 6 hours in any one discipline may be counted. Note: Students must select a six-hour sequence in literature or history. If a history sequence is selected, choose a 6 hour sequence of HY 101 and HY 102 or HY 135 and HY 136.

Area V (2 Hours)
A. 2 hours: CAS 100

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (86 Hours)

Music Core Requirements (35 Courses, 54 Hours)

Music Theory - (7 Courses, 19 Hours)
A. 19 hours: MUT 112, MUT 113, MUT 212, MUT 213, MUT 312, MUT 313, MUT 361

Music Literature - (4 Courses, 10 Hours)
A. 10 hours: MUL 235, MUL 236, MUL 335 (W), MUL 336 (W)

Applied Music - (7 Courses, 14 Hours)
A. 8 hours: MUA 222
B. 6 hours: MUA 322
C. MUA 400 (senior recital, no credit)
Major Ensemble - (7 Courses, 7 Hours)
   A. 4 hours from: MUO 111, MUO 115, or MUO 116 AND
   B. 3 hours from: MUO 411, MUO 415, or MUO 416

Recital Class - (6 Courses, 0 Hours)
   A. 6 semesters of MUA 100 (no credit)

Piano - (4 Courses, 4 Hours)
   A. MUE 102, MUE 103, MUE 202, MUE 203 OR MUE 212, MUE 213, MUE 312, MUE 313

Concentration Requirements For Vocal Music Education (12 Courses, 32 Hours)

Methods - (5 Courses, 6 Hours)
   A. 6 hours: MUA 181 (2 semesters), MUS 202, MUS 203, MUE 448

Education Courses - (2 Courses, 6 Hours)
   A. 6 hours: EPY 351, EDU 400

Music Education Courses - (2 Courses, 6 Hours)
   A. 6 hours: MUE 444, MUE 455

Conducting And Technology - (2 Courses, 5 Hours)
   A. 5 hours: MUT 364, MUS 201 OR EDM 310

Student Teaching - (1 Course, 9 Hours)
   A. 9 hours: SED 470

Minor Requirements (0 Or 18-24 Hours)
   A minor is not required for this degree program

Notes:
* Recommended Course
   1. Required for Candidacy – EH 101, EH 102, CA 110, MUS 201 (or EDM 310), EPY 351 and EDU 400
   2. Candidacy Required – MUE 444 and MUE 455
   3. Completion of a Music Education concentration and teacher certification requires a grade-point average of at least 2.5 on all course work attempted, no grade below a "C" in professional teacher education, and at least a 2.75 grade-point average on all work attempted in the teaching specialization (music).

Music (BM) – Elective Studies In Specific Outside Fields Concentration

Degree Requirements

General Education Requirements (35-38 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
- A. 3 hours: EH 101
- B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours)
- A. 3 hours: CA 110
- B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236 Note: Students must select a six-hour sequence in literature or history. If a literature sequence is selected, choose a 6 hour sequence of EH 215 and EH 216, EH 225 and EH 226, or EH 235 and EH 236.

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
- A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
- B. 8-10 hours in laboratory sciences from: AN 210, BLY 101, BLY 102, CH 101, CH 103, CH 131 or CH 141, CH 132 or CH 141, GEO 101, GEO 102, GY 111, GY 112, PH 101, PH 104, PH 114 or PH 201, PH 115 or PH 202.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
- B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 250, SY 109, SY 112. No more than 6 hours in any one discipline may be counted. Note: Students must select a six-hour sequence in literature or history. If a history sequence is selected, choose a 6 hour sequence of HY 101 and HY 102 or HY 135 and HY 136.

Area V (2 Hours)
- A. 2 hours: CAS 100
- B. Electives: Variable to complete 120-hour degree total

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (81-84 Hours)

Music Core Requirements (35 Courses, 54 Hours)

Music Theory- (7 Courses, 19 Hours):
- A. 19 hours: MUT 112, MUT 113, MUT 212, MUT 213, MUT 312, MUT 313, MUT 361

Music Literature - (4 Courses, 10 Hours)
- A. 10 hours: MUL 235, MUL 236, MUL 335 (W), MUL 336 (W)
Applied Music - (7 Courses, 14 Hours)
A. 8 hours: MUA/B2**
B. 6 hours: MUA/B3**
C. MUA 400 - senior recital, no credit

Major Ensemble - (7 Courses, 7 Hours)
A. 4 hours from: MUO 111, MUO 115, MUO 116, MUO 117, MUO 127, MUO 130, MUO 133, MUO 137
B. 3 hours from: MUO 411, MUO 415, MUO 416, MUO 417, MUO 427, MUO 430, MUO 433, MUO 437

Recital Class - (6 Courses, 0 Hours)
A. 6 semesters of MUA 100 (no credit)

Piano - (4 Courses, 4 Hours)
A. 4 hours from: MUE 102, MUE 103, MUE 202, MUE 203 or MUE 212, MUE 213, MUE 312, MUE 313

Concentration Requirements For Elective Studies In Specific Outside Fields (3-8 Courses, 9 Hours)

Applied Music - (1 Course, 2 Hours)
A. 2 hours: MUA/B3**

Major Ensemble - (1 Course, 1 Hour)
A. 1 hour: MUO 411, MUO 415, MUO 416, MUO 417, MUO 427, MUO 430, MUO 433, MUO 437

Upper Division Electives - (6 Hours):
A. 6 hours from: MUE 300-MUE 499, MUL 300-MUL 499, MUO 300-MUO 499, MUT 300-MUT 499

Minor Requirements (18-21 Hours)
A minor is required for this degree program.

+Concentration

No courses for the Baccalaureate music core or concentration are offered during the Maymester or summer semester.
Music (BM) – Instrumental Music Education Concentration

Degree Requirements

General Education Requirements (35-38 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236  Note: Students must select a six-hour sequence in literature or history. If a literature sequence is selected, choose a 6 hour sequence of EH 215 and EH 216, EH 225 and EH 226, or EH 235 and EH 236.

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours in laboratory sciences from: AN 210, BLY 101, BLY 102, CH 101, CH 103, CH 131 or CH 141, CH 132 or CH 141, GEO 101, GEO 102, GY 111, GY 112, PH 101, PH 104, PH 114 or PH 201, PH 115 or PH 202.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, *HY 135, *HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112. No more than 6 hours in any one discipline may be counted. Note: Students must select a six-hour sequence in literature or history. If a history sequence is selected, choose a 6 hour sequence of HY 101 and HY 102 or HY 135 and HY 136.

Area V (2 Hours)
A. 2 hours: CAS 100

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (86 Hours)

Music Core Requirements (35 Courses, 54 Hours)

Music Theory - (7 Courses, 19 Hours)
A. 19 hours: MUT 112, MUT 113, MUT 212, MUT 213, MUT 312, MUT 313, MUT 361

Music Literature - (4 Courses, 10 Hours)
A. 10 hours: MUL 235, MUL 236, MUL 335 (W), MUL 336 (W)

Applied Music - (7 Courses, 14 Hours)
A. 8 hours: MUA/B2**
B. 6 hours: MUA/B3**
C. MUA 400: Senior recital no credit

**Major Ensemble - (7 Courses, 7 Hours)**
A. 4 hours from: MUO 117, MUO 127, MUO 130, MUO 133, MUO 137
B. 3 hours from: MUO 117, MUO 427, MUO 430, MUO 433, MUO 437

**Recital Class - (6 Courses, 0 Hours)**
A. 6 semesters of MUA 100 (no credit)

**Piano - (4 Courses, 4 Hours)**
A. 4 hours from: MUE 102, MUE 103, MUE 202, MUE 203 OR MUE 212, MUE 213, MUE 312, MUE 313

**Concentration Requirements For Instrumental Music Education (13 Courses, 32 Hours)**

**Methods - (6 Courses, 6 Hours)**
A. 6 hours: MUE 240, MUE 241, MUE 242, MUE 243, MUE 346, MUO 111/MUO 411 OR MUO 115/MUO 415

**Education Courses - (2 Courses, 6 Hours)**
A. 6 hours: EPY 351, EDU 400

**Music Education Courses - (2 Courses, 6 Hours)**
A. 6 hours: MUE 444, MUE 455

**Conducting And Technology - (2 Courses, 5 Hours)**
A. 5 hours: MUT 362, MUS 201 OR EDM 310

**Student Teaching - (1 Course, 9 Hours)**
A. 9 hours: SED 470

**Minor Requirements (0 Or 18-24 Hours)**
A minor is not required for this degree program.

**Notes:**
* Recommended Course

1. Required for Candidacy - EH 101, EH 102, CA 110, MUS 201 (or EDM 310), EPY 351 and EDU 400
2. Candidacy Required - MUE 444 and MUE 455
3. Completion of a Music Education concentration and teacher certification requires a grade-point average of at least 2.75 on all course work attempted, no grade below a “C” in professional teacher education, and at least a 2.75 grade-point average on all work attempted in the teaching specialization (music).

**Notes**

*Core

**Gen Ed, see Degree Requirements

+Concentration

No courses for the Baccalaureate music core or concentration are offered during the Maymester or summer semester.

Italics indicate requirements from the State Department of Education.
(CP) Candidacy Prerequisite

BOLD courses require admission to candidacy.
Music (BM) – Instrumental Performance Concentration

Degree Requirements

General Education Requirements (35-38 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236  Note: Students must select a six-hour sequence in literature or history. If a literature sequence is selected, choose a 6 hour sequence of EH 215 and EH 216, EH 225 and EH 226, or EH 235 and EH 236.

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours in laboratory sciences from: AN 210, BLY 101, BLY 102, CH 101, CH 103, CH 131 or CH 141, CH 132 or CH 141, GEO 101, GEO 102, GY 111, GY 112, PH 101, PH 104, PH 114 or PH 201, PH 115 or PH 202.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, *HY 135, *HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112.  A.  No more than 6 hours in any one discipline may be counted. Note: Students must select a six-hour sequence in literature or history. If a history sequence is selected, choose a 6 hour sequence of HY 101 and HY 102 or HY 135 and HY 136.

Area V (10 Hours)
A. 2 hours: CAS 100
B. 8 hours electives

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (77 Hours)

Music Core Requirements (35 Courses, 54 Hours)

Music Theory - (7 Courses, 19 Hours)
A. 19 hours: MUT 112, MUT 113, MUT 212, MUT 213, MUT 312, MUT 313, MUT 361

Music Literature - (4 Courses, 10 Hours)
A. 10 hours: MUL 235, MUL 236, MUL 335 (W), MUL 336 (W)
Applied Music - (7 Courses, 14 Hours)
A. 8 hours: MUA/B2**
B. 6 hours: MUA/B4**
C. MUA 400 (senior recital, no credit)

Major Ensemble - (7 Courses, 7 Hours)
A. 4 hours from: MUO 117, MUO 127, MUO 130, MUO 133, MUO 137 AND
B. 3 hours from: MUO 417, MUO 427, MUO 430, MUO 433, MUO 437

Recital Class - (6 Courses, 0 Hours)
A. 6 semesters of MUA 100 (no credit)

Piano - (4 Courses, 4 Hours)
A. 4 hours: MUE 102, MUE 103, MUE 202, MUE 203 OR MUE 212, MUE 213, MUE 312, MUE 313

Concentration Requirements For Instrumental Performance (13-19 Courses, 23 Hours)

Applied Music - (3 Courses, 6 Hours)
A. 6 hours: MUA/B 4**
B. MUA 300 (junior recital, no credit)

Pedagogy/Literature - (2 Courses, 5 Hours)
A. 5 hours from: MUE 4** (pedagogy) and MUL 4** (literature)

Ensemble - (5 Courses, 3 Hours)
A. 1 hour from: MUO 417, MUO 427, MUO 430, MUO 433, MUO 437 AND
B. 2 hours (4 courses) from: MUO 118, MUO 119, MUO 120, MUO 121, MUO 123, MUO 124, MUO 125, MUO 129, MUO 131, MUO 136, MUO 138, MUO 139, MUO 140, MUO 141, MUO 142, MUO 144, MUO 145

Upper-Division Electives - (9 Hours)
A. 9 hours from: MUE 300-MUE 499, MUL 300-MUL 499, MUO 300-MUO 499, MUT 300-MUT 499

Minor Requirements (0 Hours, Or 18-24 Hours)
A minor is not required for this degree program.

**Gen Ed, see Degree Requirements

+Concentration

No courses for the Baccalaureate music core or concentration are offered during the Maymester or summer semester.
Music (BM) – Vocal Performance Concentration

Degree Requirements

General Education Requirements (35-38 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (2-3 Courses, 6-9 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236  Note: Students must select a six-hour sequence in literature or history. If a literature sequence is selected, choose a 6 hour sequence of EH 215 and EH 216, EH 225 and EH 226, or EH 235 and EH 236.

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours in laboratory sciences from: AN 210, BLY 101, BLY 102, CH 101, CH 103, CH 131 or CH 141, CH 132 or CH 141, GEO 101, GEO 102, KY 111, KY 112, PH 101, PH 104, PH 114 or PH 201, PH 115 or PH 202.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, *HY 135, *HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (8 Hours)
A. 2 hours: CAS 100
B. 6 hours: electives

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (79 Hours)

Music Core Requirements (35 Courses, 54 Hours)

Music Theory - (7 Courses, 19 Hours)
A. 19 hours: MUT 112, MUT 113, MUT 212, MUT 213, MUT 312, MUT 313, MUT 361

Music Literature - (4 Courses, 10 Hours)
A. 10 hours: MUL 235, MUL 236, MUL 335 (W), MUL 336 (W)

Applied Music - (7 Courses, 14 Hours)
A. 8 hours: MUA 222
B. 6 hours: MUA 423
C. MUA 400 (senior recital, no credit)
Major Ensemble - (7 Courses, 7 Hours)
   A. 4 hours from: MUO 111, MUO 115, MUO 116
   B. 3 hours from: MUO 411, MUO 415, MUO 416

Recital Class - (6 Courses, 0 Hours)
   A. 6 semesters of MUA 100 (no credit)

Piano - (4 Courses, 4 Hours)
   A. 4 hours: MUE 102, MUE 103, MUE 202, MUE 203 OR MUE 212, MUE 213, MUE 312, MUE 313

Concentration Requirements For Vocal Performance (13-17 Courses, 25 Hours)

Applied Music - (3 Courses, 6 Hours)
   A. 6 hours: MUA 423
   B. MUA 300 (junior recital, no credit)

Pedagogy/Literature - (2 Courses, 5 Hours)
   A. 5 hours: MUE 448 and MUL 444

Ensemble - (3-5 Courses, 3 Hours)
   A. 1 hour from: MUO 411 OR MUO 415
   B. 2 hours: MUO 416

Diction And Language - (4 Courses, 8 Hours)
   A. 8 hours: MUS 202, MUS 203, LG 111, LG 151

Upper-Division Electives - (3 Hours)
   A. 3 hours from: MUE 300- MUE 499, MUL 300- MUL 499, MUO 300- MUO 499, MUT 300- MUT 499

Minor Requirements (0 Hours)
   A minor is not required for this degree program

### Notes

- *Core
- **Gen Ed, see Degree Requirements
- +Concentration

No courses for the Baccalaureate music core or concentration are offered during the Maymester or summer semester.
Music (MM) - Collaborative Keyboard Concentration

Degree Requirements

Degree Requirements And Courses
Students must complete a minimum of 32 semester hours of credit in approved 500-level courses. A minimum of 20 semester hours must be completed at the University of South Alabama. Up to 12 hours of USA courses taken while in another program (or non-degree status) may be applied. Only courses not applied to another degree may count. Maximum of 12 hours with grades of "A", "B", or "S" of approved transfer credit is allowed. If the university is non-accredited, the individual USA graduate program will determine if the quality and content of the courses meet the standards of the program.

Grade Requirements
• A minimum of a 3.0 GPA on all work attempted is required for graduation.
• Courses in which a student receives a "D" or below will not be counted toward the degree program.
• A maximum of two courses with a grade of "C" will be counted toward the degree program.
• Students receiving four grades of "C" or below, regardless of the overall GPA will be dismissed from the program.
• A student who receives a failing grade in a course for graduate credit may be dismissed from the program.

Time Limitations
• All degree requirements must be completed within seven calendar years.
• Most students who take nine hours per semester complete the degree within a two-year period.
• The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

Course Load
Six to ten credit hours per semester constitute a full-time course load.

Collaborative Keyboard Degree Checklist (15 Courses, 32 Hours)
• All master’s degree students will be advised by the Graduate Music Program Coordinator to ensure timely completion of the curriculum.
• The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

A. 2 hours: MUL 501
B. 6 hours: MUL 546, MUL 566
C. 2 hours: MUO 507 - 1 hour each course
D. 12 hours from: MUL 535, MUL 590, MUT 512, or MUT 513
E. 8 hours in Applied Collaborative Keyboard: MUA 507, MUA 508, or MUA 509
F. 2 hours: MUA 500 - 1 hour recitals (Submit form at least 2 weeks prior)

Comprehensive Exams
Each student will be evaluated to ensure achievement of program outcomes. This evaluation may be in the form of a comprehensive exam or other measurement tools, such as a recital. If unsatisfactory, after corrective action, the evaluation may be repeated up to two (2) times. Eligibility for graduation is contingent upon successful completion of the degree requirements specified by both the University and the Department of Music, including (1) Completion of all coursework with a minimum grade point average of 3.0 (A=4.0) and (2) Successful completion of comprehensive examinations after all course work is completed.

Approval of committee must be secured no less than two weeks prior to the scheduled date of the recital. The Graduate Coordinator will complete the “USA Graduate School Comprehensive Examination Committee Appointment Request and Evaluation Report” Form prior to recital. The Student will sign the form upon notification of recital results. A recital program will be attached and the form with program will be sent to the Graduate College.
Music (MM) - Music Education Concentration

Degree Requirements

Degree Requirements And Courses

Students must complete a minimum of 35 semester hours of credit in approved 500-level courses. A minimum of 20 semester hours must be completed at the University of South Alabama. Up to 12 hours of USA courses taken while in another program (or non-degree status) may be applied. Only courses not applied to another degree may count. Maximum of 12 hours with grades of "A", "B", or "S" of approved transfer credit is allowed. If the university is non-accredited, the individual USA graduate program will determine if the quality and content of the courses meet the standards of the program.

Grade Requirements

- A minimum of a 3.0 GPA on all work attempted is required for graduation.
- Courses in which a student receives a "D" or below will not be counted toward the degree program.
- A maximum of two courses with a grade of "C" will be counted toward the degree program.
- Students receiving four grades of "C" or below, regardless of the overall GPA will be dismissed from the program.
- A student who receives a failing grade in a course for graduate credit may be dismissed from the program.

Time Limitations

- All degree requirements must be completed within seven calendar years.
- Most students who take nine hours per semester complete the degree within a two-year period.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

Course Load

Six to ten credit hours per semester constitute a full-time course load.

Music Education Degree Checklist (13-20 Courses, 35 Hours)

- All master's degree students will be advised by the Graduate Music Program Coordinator to ensure timely completion of the curriculum.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

A. 2 hours: MUL 501
B. 2 hours: Applied Music (500-level)**
C. 12 hours: MUE 512, MUE 513, MUT 513
D. 1 hour: Ensemble (500-level) courses
E. 2 hours: MUE 585 - Practicum in Music Education, 1 hour each course
F. 1 hour: MUE 589
G. 4 hours from: MUL 535 or MUL 590
H. 3 hours from: EDF 515, EDU 567, or SPE 500
I. 4 hours from: MUE 520, MUE 540, or MUE 560
J. 4 hours from: MUT 512, MUE 520, MUE 540, MUE 560, or MUL 535, MUL 590

**Applied Music: Maximum of 6 hours will apply towards degree

**Ensemble: Maximum of 6 hours will apply towards degree

MUE 589

Students submit one Portfolio/Final Project to the faculty committee three weeks prior to an oral examination during finals week of the semester of graduation with two of the following:
• A video recording (min. 35 minutes) of the candidate’s teaching or conducting, illustrating the students learning/rehearsing process with notable progress, accompanied by a written self-critique;
• A project representing pedagogical work in music education (e.g. choral arrangement; folk song collection and analysis; curriculum project; marching band unit; a composition or arrangement or set of compositions or arrangements with notes for rehearsal and/or performance)
• A paper demonstrating knowledge of music or teaching specialization (e.g. a history, theory or research paper; an article published in a music teaching periodical)

Comprehensive Exams
Each student will be evaluated to ensure achievement of program outcomes. This evaluation may be in the form of a comprehensive exam or other measurement tools, such as a recital. If unsatisfactory, after corrective action, the evaluation may be repeated up to two (2) times. Eligibility for graduation is contingent upon successful completion of the degree requirements specified by both the University and the Department of Music, including (1) Completion of all coursework with a minimum grade point average of 3.0 (A=4.0) and (2) Successful completion of comprehensive examinations after all course work is completed.

Approval of committee must be secured no less than two weeks prior to the scheduled date of the recital. The Graduate Coordinator will complete the “USA Graduate School Comprehensive Examination Committee Appointment Request and Evaluation Report” Form prior to recital. The Student will sign the form upon notification of recital results. A recital program will be attached and the form with program will be sent to the Graduate College.

- A student who receives a failing grade in a course for graduate credit may be dismissed from the program.

Time Limitations

- All degree requirements must be completed within seven calendar years.
- Most students who take nine hours per semester complete the degree within a two-year period.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

Course Load

Six to ten credit hours per semester constitute a full-time course load.

Music Education Degree Checklist (13-20 Courses, 35 Hours)

- All master's degree students will be advised by the Graduate Music Program Coordinator to ensure timely completion of the curriculum.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

A. 2 hours: MUL 501
B. 2 hours: Applied Music (500-level)**
C. 12 hours: MUE 512, MUE 513, MUT 513
D. 1 hour: Ensemble (500-level) courses
E. 2 hours: MUE 585 - Practicum in Music Education, 1 hour each course
F. 1 hour: MUE 589
G. 4 hours from: MUL 535 or MUL 590
H. 3 hours from: EDF 515, EDU 567, or SPE 500
I. 4 hours from: MUE 520, MUE 540, or MUE 560
J. 4 hours from: MUT 512, MUE 520, MUE 540, MUE 560, or MUL 535, MUL 590

**Applied Music: Maximum of 6 hours will apply towards degree

**Ensemble: Maximum of 6 hours will apply towards degree

MUE 589

Students submit one Portfolio/Final Project to the faculty committee three weeks prior to an oral examination during finals week of the semester of graduation with two of the following:
• A video recording (min. 35 minutes) of the candidate’s teaching or conducting, illustrating the students learning/rehearsing process with notable progress, accompanied by a written self-critique;
• A project representing pedagogical work in music education (e.g. choral arrangement; folk song collection and analysis; curriculum project; marching band unit; a composition or arrangement or set of compositions or arrangements with notes for rehearsal and/or performance)
• A paper demonstrating knowledge of music or teaching specialization (e.g. a history, theory or research paper; an article published in a music teaching periodical)

Comprehensive Exams

Each student will be evaluated to ensure achievement of program outcomes. This evaluation may be in the form of a comprehensive exam or other measurement tools, such as a recital. If unsatisfactory, after corrective action, the evaluation may be repeated up to two (2) times. Eligibility for graduation is contingent upon successful completion of the degree requirements specified by both the University and the Department of Music, including (1) Completion of all coursework with a minimum grade point average of 3.0 (A=4.0) and (2) Successful completion of comprehensive examinations after all course work is completed.

Approval of committee must be secured no less than two weeks prior to the scheduled date of the recital. The Graduate Coordinator will complete the “USA Graduate School Comprehensive Examination Committee Appointment Request and Evaluation Report” Form prior to recital. The Student will sign the form upon notification of recital results. A recital program will be attached and the form with program will be sent to the Graduate College.
Music (MM) - Music Education Concentration - (Alternative Choral Or Instrumental)

Degree Requirements

Degree Requirements And Courses

This program is designed to provide initial teacher preparation at the graduate level primarily for students interested in pursuing a career in teaching but whose undergraduate degree did not include a teacher education program. Students must complete a minimum of 46 semester hours of credit in approved 500-level courses. A minimum of 20 semester hours must be completed at the University of South Alabama. Up to 12 hours of USA courses taken while in another program (or non-degree status) may be applied. Only courses not applied to another degree may count. Maximum of 12 hours with grades of “A”, “B”, or “S” of approved transfer credit is allowed. If the university is non-accredited, the individual USA graduate program will determine if the quality and content of the courses meet the standards of the program.

Grade Requirements

- A minimum of a 3.0 GPA on all work attempted is required for graduation.
- Courses in which a student receives a “D” or below will not be counted toward the degree program.
- A maximum of two courses with a grade of “C” will be counted toward the degree program.
- Students receiving four grades of “C” or below, regardless of the overall GPA will be dismissed from the program.
- A student who receives a failing grade in a course for graduate credit may be dismissed from the program.

Time Limitations

- All degree requirements must be completed within seven calendar years.
- Most students who take nine hours per semester complete the degree within a two-and-a-half-year period.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

Course Load

Six to ten credit hours per semester constitute a full-time course load.

Music Education ALT. Choral Or ALT. Instrumental Degree Checklist (14 Courses, 46 Hours)

- All master's degree students will be advised by the Graduate Music Program Coordinator to ensure timely completion of the curriculum.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

A. 2 hours: MUL 501 Graduate Research in Music
B. 2 hours: Applied Music (500-level)**
C. 8 hours: MUE 512 Foundations of Music Education, MUE 513 Curriculum and Assessment in Music Education
D. 1 hour: Ensemble (500-level)**
E. 3 hours: MUS 501 Music Education Technology
F. 7 hours: MUE 502/MUE 540 (Choral Music Education) MUE 501/MUE560 (Instrumental Music Education
G. 4 hours from: MUT 512 or MUT 513 (Music Theory)
H. 4 hours from: MUL 535 or MUL 590 (Music History)
I. 9 hours: SPE 500, RED 541, EPY 525
J. 6 hours: MUE 570 Internship in Music Education

**Applied Music: Maximum of 6 hours will apply towards degree
**Ensemble: Maximum of 6 hours will apply towards degree
MUE 570
The internship is a supervised learning experience in a work setting similar to that in which the educator will eventually be employed. The internship provides the student an opportunity to apply the theories and concepts learned during the graduate program of study. Students enroll in MUE 570 during the final semester of study after all other degree coursework.

Alabama State Department Of Education Certification Requirements:
A Student applying for initial teacher certification will be required to pass the appropriate Praxis II test(s) and have a successful score on his/her edTPA portfolio. ALSDE certification requirements are subject to change and students will be required to meet those which are in place the semester they are applying for certification. Prior to registering for any Praxis II exam, please verify current requirements by going directly to the ALABAMA portion of the Praxis II website at:

https://www.ets.org/praxis/al
Music (MM) - Performance Concentration (Piano, Voice, Brass, Percussion, Woodwinds)

Degree Requirements

Degree Requirements And Courses

Students must complete a minimum of 32 semester hours of credit in approved 500-level courses. A minimum of 20 semester hours must be completed at the University of South Alabama. Up to 12 hours of USA courses taken while in another program (or non-degree status) may be applied. Only courses not applied to another degree may count. Maximum of 12 hours with grades of "A", "B", or "S" of approved transfer credit is allowed. If the university is non-accredited, the individual USA graduate program will determine if the quality and content of the courses meet the standards of the program.

Grade Requirements

- A minimum of a 3.0 GPA on all work attempted is required for graduation.
- Courses in which a student receives a "D" or below will not be counted toward the degree program.
- A maximum of two courses with a grade of "C" will be counted toward the degree program.
- Students receiving four grades of "C" or below, regardless of the overall GPA will be dismissed from the program.
- A student who receives a failing grade in a course for graduate credit may be dismissed from the program.

Time Limitations

- All degree requirements must be completed within seven calendar years.
- Most students who take nine hours per semester complete the degree within a two-year period.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).

Course Load

Six to ten credit hours per semester constitute a full-time course load.

Note: No more than twelve credits in this area are applicable toward a degree.

Performance Degree Course Requirements By Concentration

- All master's degree students will be advised by the Graduate Music Program Coordinator to ensure timely completion of the curriculum.
- The time required for degree completion depends on how many courses a student can take each semester and the ability of that student to complete the recital(s) or final project(s).
- Select Concentration for specific requirements

Piano
Voice
Brass
Percussion
Woodwinds

Piano Performance Degree Checklist (14-19 Courses, 32 Hours)

A. 8 hours: MUL 501, MUA 599, MUS 585, MUL 585
B. 3 hours: three Ensemble (500-level) courses, 1 hour each course
C. 12 hours from: MUL 535, MUL 590, MUT 512, MUT 513
D. 8 hours from: MUL 501, MUA 502, or MUA 503
Voice Performance Degree Checklist (14-19 Courses, 32 Hours)
A. 8 hours: MUL 501, MUE 548, MUL 544, MUL 545
B. 3 hours: three Ensemble (500-level) courses, 1 hour each course
C. 12 hours from: MUL 535, MUL 590, MUT 512, MUT 513
D. 8 hours from: MUA 521, MUA 522, MUA 523
E. 1 hour: MUA 500 Graduate Recital (Submit form at least 2 weeks prior)
   All Recitals: Students are required to write program notes under the supervision of their applied professor. Notes must
   include biographical information about composer and information about the piece. Cite sources, if used.

Brass Performance Degree Checklist (13-19 Courses, 32 Hours)
A. 8 hours: MUL 501, MUE 519, MUL 512
B. 3 hours: three Ensemble (500-level) courses, 1 hour each course
C. 12 hours from: MUL 535, MUL 590, MUT 512, MUT 513
D. 8 hours from: MUB 551, MUB 552, or MUB 553 (trumpet); MUB 561, MUB 562, or MUB 563 (French horn); MUB 571, MUB 572, or MUB 573 (trombone); MUB 581, MUB 582, or MUB 583 (baritone horn); or MUB 586, MUB 587, or MUB 588 (tuba)
E. 1 hour: MUA 500 Graduate Recital (Submit form at least 2 weeks prior)
   All Recitals: Students are required to write program notes under the supervision of their applied professor. Notes must
   include biographical information about composer and information about the piece. Cite sources, if used.

Percussion Performance Degree Checklist (14-19 Courses, 32 Hours)
A. 8 hours: MUL 501, MUE 587, MUL 587, MUS 587
B. 3 hours: three Ensemble (500-level) courses, 1 hour each course
C. 12 hours from: MUL 535, MUL 590, MUT 512, MUT 513
D. 8 hours from: MUA 586, MUA 587, MUA 588
E. 1 hour: MUA 500 Graduate Recital (Submit form at least 2 weeks prior)
   All Recitals: Students are required to write program notes under the supervision of their applied professor. Notes must
   include biographical information about composer and information about the piece. Cite sources, if used.

Woodwinds Performance Degree Checklist (13-19 Courses, 32 Hours)
A. 8 hours: MUL 501, MUE 564, MUL 564
B. 3 hours: three Ensemble (500-level) courses, 1 hour each course
C. 12 hours from: MUL 535, MUL 590, MUT 512, MUT 513
D. 8 hours from: MUB 501, MUB 502, MUB 503 (flute); MUB 511, MUB 512, MUB 513 (oboe); MUB 521, MUB 522, MUB 523 (clarinet); MUB 531, MUB 532, MUB 533 (bassoon); or MUB 541, MUB 542, MUB 543 (saxophone)
E. 1 hour: MUA 500 Graduate Recital (Submit form at least 2 weeks prior)
   All Recitals: Students are required to write program notes under the supervision of their applied professor. Notes must
   include biographical information about composer and information about the piece. Cite sources, if used.

Native American Studies
http://www.southalabama.edu/colleges/artsandsci/nativeamerican/

The Native American Studies Minor provides an interdisciplinary approach to understanding the experience of the Indigenous people of North America through courses in the humanities and social sciences. Employing course work across various disciplines, the minor examines both historical and contemporary issues from the perspective of Native Americans. The Native American Studies minor allows students to augment a wide range of majors, and position them for employment in government, education, and other areas by providing an increased understanding of the unique history, cultural traditions, and political status of Native Americans. The field of Native American Studies works to demonstrate the relevance of the American Indian perspective to the contemporary economic, political, and social issues locally and around the world.

For a description of these courses, please refer to the appropriate departments. For further information about the program contact Dr. Philip Carr, Native American Studies Program, Department of Anthropology, HUMB21 University of South Alabama, Mobile, AL 36688-0002. Phone (251) 461-1948, E-mail address: pcarr@southalabama.edu

Minor In Native American Studies

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Core Requirements
1. Students must complete at least 18 credit hours in approved courses, of which, at least 9 hours must be taken at this University.
2. The courses must include at least one course from humanities and one from the social sciences.
3. All students must take NAS 101: Introduction to Native American Studies.
4. A minimum of nine hours must be at the course level 300 or above.

southalabama.edu/bulletin 2021-22 GRADUATE/UNDERGRADUATE BULLETIN
The College of Nursing is dedicated to the education of professional nurses who provide the highest quality health care to the communities they serve. The practice of nursing is both an art and a science; the focus of nursing is the diagnosis and treatment of human responses to actual or potential health problems.

The College of Nursing has two locations, one is on the USA main campus, and the other is on the USA Baldwin County campus in downtown Fairhope. The resources of the University, the USA Hospitals and clinics, and the numerous clinical agencies provide excellent opportunities for students to acquire the knowledge and skills essential for professional nursing.

Mission

The mission of the College of Nursing is to provide quality innovative educational programs to a diverse student body, to participate in research and scholarly activities, and to provide service to the University, the profession, and the public. The College accomplishes this by providing a caring, engaging environment for the empowerment of student learning potential, the professional development of faculty, and the promotion of the nursing profession.

Goals

1. Cultivate a caring, innovative, and engaging environment to facilitate teaching, learning, scholarship, and service.
2. Deliver innovative quality nursing programs that meet the needs of a diverse student body and other communities of interest.
3. Promote the discovery, communication, and preservation of knowledge through scholarly activities and leadership.
4. Provide service to the University, the profession, and the public.
5. Develop community partnerships to promote nursing and the enhancement of the health care delivery system using interprofessional approaches.

Accreditation

The baccalaureate program is approved by the Alabama Board of Nursing and the baccalaureate, master’s program in nursing, Doctor of Nursing Practice degree program and post-graduate APRN certificate programs are accredited by the Commission on Collegiate Nursing Education:

655 K Street, NW, Suite 750
Washington, DC
20001

P: (202) 887-6791
F: (202) 887-8476

Student Responsibility

While the University of South Alabama will endeavor to provide timely and accurate advisement, it is the responsibility of the student to know and satisfy the degree requirements of the academic program, to be aware of the University calendar, http://www.southalabama.edu/academiccalendar/index.html and to understand and comply with University academic policies and procedures.

Degrees Offered

The College of Nursing offers the Bachelor of Science in Nursing (BSN) degree, the Master of Science in Nursing (MSN) degree, and the Doctor of Nursing Practice (DNP) degree.
Certificates Offered

Post-Graduate Certificates are awarded to students completing planned programs of study in a nursing specialty area and subspecialty areas.

Nursing (BS) - Accelerated

Degree Requirements

General Education Requirements (Bachelor Degree)

Gen Ed Formatting Note: Graduate of a regionally accredited baccalaureate program with a minimum 3.0 GPA on a 4.0 scale.

Area I - Written Composition
No credit hours are needed in this area

Area II - Humanities & Fine Arts
No credit hours are needed in this area

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11 Credit Hours)
A. 8 Credit hours from: BLY 101 & BLY 101L, CH 101 & CH 101L

Area IV – History, Social & Behavioral Sciences (1 Courses, 3 Credit Hours)
A. 3 Credit hours: PSY 120

Area V (21 Credit Hours)
A. 4 Credit hours from: BLY 213 & BLY 214, BMD 210, BMD 210L
B. 8 Credit hours: BMD 251, BMD 252
C. 3 Credit hours from: ST 210, BUS 245, PSY 220, ST 305

Major Requirements (62 Credit Hours)

Nursing (BS) Major Core (23 Courses, 62 Credit Hours)
A. 62 credit hours: HSC 342, HSC 343, NU 300, NU 301, NU 304, NU 325, NU 327, NU 311, NU 312, NU 332, AHN 447, AHN 448, CMN 350, CMN 351, CMN 420, CMN 421, MCN 352, MCN 353, MCN 354, MCN 355, NU 412, NU 414, NU 460

Minor Requirements (0 Credit Hours)
A minor is not required for this degree program

Notes:
* PSY 120 is required
*Microbiology with Lab (4 Credit Hours) is required

Additional Information

Bachelor Of Science In Nursing – Accelerated BSN/MSN Pathway
The College of Nursing has a special Accelerated BSN/MSN Pathway for academically qualified and highly-motivated individuals that have a bachelor's degree in another field. The pre-professional component, as listed below, must be completed prior to admission to the professional component. The professional component of the curriculum, which normally takes 5 semesters to complete, can be completed in 12 months of full-time study. The curriculum and credit hours are the same as required for the traditionally taught BSN degree offered by the College, except that the course schedule is accelerated and is not confined by the traditional academic calendar. Students in the first 12 months of the Accelerated BSN/MSN Pathway follow the same promotion/progression policies as the students in the traditionally-taught BSN. Students having difficulty maintaining the pace of
the program may request a transfer to the traditional program if they are in good academic standing. At the end of the 12-months of study, students are awarded the BSN degree and are prepared for the RN licensure (NCLEX) examination.

Students who have completed a prior bachelor degree may apply to the University of South Alabama as a pre-nursing student. Upon completion of the Pre-nursing requirements, students may apply for admission to the Professional Component of the Accelerated BSN Pathway.

Admission Criteria For Accelerated BSN/MSN Pathway

1. Graduate of a regionally accredited baccalaureate program with a minimum GPA of 3.0 on a 4.0 scale.
2. A minimum grade of “C” in following prerequisite courses: Biology with Lab, Anatomy and Physiology I with Lab, Anatomy and Physiology II with Lab, Microbiology with Lab, Chemistry with Lab, Statistics, and General Psychology.

Application Procedures Accelerated Pathway

Applicants must submit an application for admission to the Professional Component of the BSN degree program. The application form is available on the College of Nursing’s website. Applications are reviewed carefully to determine that students have satisfied all pre-nursing requirements of conduct, health, scholastic achievement, and aptitude for nursing. The College of Nursing Admissions Committee and the Dean of the College of Nursing reserve the right to select the applicants best qualified for and most likely to succeed in the study of nursing. Failure to comply with legal, moral, and legislative standards for licensure to practice as a registered nurse in the State of Alabama merits immediate dismissal from the nursing program.

Application Procedures

1. Submission of a completed application to the College of Nursing via electronic application found online at https://secure.touchnet.net/C21704_ustores/web/store_main.jsp?STOREID=44&SINGLESTORE=true.
2. Payment of $50 non-refundable application fee via debit or credit card. There is a $20.00 fee for non-sufficient fund.
3. Transfer credit must comply with College of Nursing policies.
4. Notification of missing documents will be sent to your JagMail email account.
5. Submission of Health Data Forms and evidence of health insurance required upon admission.
6. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Deadlines

Fall Semester Deadline is March 15
Spring Semester Deadline is July 15

In keeping with the dynamic changes in the nursing and health field, the baccalaureate curriculum may undergo change. Changes in curricula and/or admission requirements will be published as far in advance as possible. Advisors are available to assist students in adapting to those changes and planning their course of study accordingly. Applicants must meet with their advisor before applying to the Professional Component.

Academic Progression Policy For Accelerated BSN

The University of South Alabama College of Nursing will recommend for promotion only those students who, in the judgment of the faculty, satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing. Students continually in adjustment difficulties may be dropped from the nursing program.

1. A grade of “C” or higher is required for all nursing courses. Students repeating a course must take NU 302 Essentials of Professional Nursing at the same time.
2. Student receiving a failing grade in either a didactic course or a clinical course that are co-requisites must repeat both courses the following semester to progress in the program.
3. Students withdrawing from a first semester course “failing” are encouraged to take NU 302 Essentials of Professional Nursing.
4. Accelerated students earning a first grade of “D”, “F”, or “U” are advised regarding the benefit of moving to the traditional BSN program.
5. A second “D”, “F”, or “U” will result in an academic dismissal from the College of Nursing.
6. A minimum cumulative GPA of 2.0 at USA is required to continue in the nursing program. Students with a GPA below 2.0 may not register for nursing courses.
7. A dosage calculation test is required prior to promotion to NU 300/NU 301, MCN 352/MCN 353, MCN 354/MCN 355, AHN 447/AHN 448, and NU 460. A score of 100% on one of two attempts or successful completion of standards based grading opportunities must be achieved to pass.

8. After completion of the ATI Capstone course embedded into NU 412, all students are required to complete the ATI RN Comprehensive Predictor. The ATI Capstone course will be a component of NU 412. If the student does not score at least 72% on the ATI RN Comprehensive Predictor, the student will be required to complete the Virtual ATI review course. Upon successful completion of 75% of Virtual ATI, a grade of “S” will be given for the course. If less than 75% of Virtual ATI is completed by the end of the semester, a grade of “I” will be given. Once the student has completed 75% of Virtual ATI, the grade will be changed to “S” for the course. Failure to complete 75% of the virtual ATI requirements as stated in the syllabus by the end of the following semester will result in a grade of “U” (unsatisfactory) for the course.

9. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug test, (d) adverse background check, or (e) disruptive behavior including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.

10. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal of the program.

11. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.

12. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.

Uniform Policy

The Uniform policy is provided to students at the time of admission.

Graduation Requirements

Accelerated BSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar’s Office. Deadlines for each semester application are located on the Registrar’s website at https://www.southalabama.edu/departments/registrar/commencement/index.html.

Admission To Graduate Program

Upon satisfactory completion of the BSN degree the Accelerated BSN/MSN student will complete all necessary paperwork for reclassification as a graduate student to continue through the remainder of the MSN Degree program. During this phase of the curriculum, financial aid is restricted to the types and amounts for which a graduate student is eligible.

Students in the MSN specialty component of the curriculum prepare for a career in informatics, nurse executive administration, clinical nurse leader, or clinical nurse specialist in adult/gerontological nursing. Students who wish to pursue nurse practitioner preparation must obtain a minimum of 2 years of clinical experience before beginning clinical nurse practitioner specialty courses. Courses for the specialty component of the curriculum are offered on-line. Clinical requirements are completed in faculty-facilitated preceptorships.
Nursing (BSN) - RN-BSN

Degree Requirements

General Education Requirements (59 Credit Hours)

Gen Ed Formatting Note: Graduate of an Associate Degree in Nursing

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 Credit hours: EH 101
B. 3 Credit hours: EH 102

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Credit Hours)
A. 3 Credit hours from: PSY 120, PSY 250
B. 3 Credit hours from: HY 101, HY 102, HY 135, HY 136
C. 6 Credit hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (18 Credit Hours)
A. 4 Credit hours from: BLY 213 & BLY 214, BMD 210, BMD 210L
B. 8 Credit hours: BMD 251, BMD 252
C. 3 Credit hours: ST 210, BUS 245, PSY 220, ST 305
D. 3 Credit hours: CIS 150, *CIS 010

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (24 Credit Hours)

Nursing RN To BSN Major Core (6 Courses, 24 Hours)
A. 24 Credit hours: NU 450, NU 451, NU 452, NU 453, NU 454, NU 455
Minor Requirements (0 - Credit Hours)

A minor is not required for this degree program

Notes:
* CIS 010 Computer Proficiency Exam (must replace 3 credits)

Additional Information

RN To BSN And RN To BSN/MSN Pathways For Associate Degree And Diploma Nurses

The College of Nursing has a Pathway designed especially for registered nurses pursuing the Bachelor of Science in Nursing Degree. The RN to BSN Prerequisites consist of eighteen (18) courses, totaling 59 semester Credit hours. These general education courses may be completed at any regionally accredited institution. They must be successfully completed before admission to the Professional Component. It is the policy of the College of Nursing to average grades for all coursework repeated.

1. The Professional Component consists of six (6) fully online nursing courses for a total of 24 Credit hours.
2. These courses must be completed at the University of South Alabama.
3. Upper division nursing courses taken at another institution will not transfer or apply toward the 24 Credit hours required to earn the BSN degree at USA.
4. Students proceed through the six online nursing courses at their desired pace.
5. The Professional Component may be completed in a minimum of two (2) semesters.
6. The Professional Component must be completed within five (5) years of beginning the BSN curriculum.
7. Thirty Credit hours of nursing credit are awarded the semester students graduate.

Admission Criteria For RN-BSN Pathways

1. Citizen or Permanent Resident of the United States of America.
2. Completion of an accredited diploma or associate degree in nursing and a current registered nurse licensure with no restriction. Restrictions include participation in voluntary discipline programs.
3. Complete all eighteen (18) required pre-requisite courses at a regionally accredited school. These 59 Credit hours of general education courses are in addition to the nursing courses completed to become a Registered Nurse.
4. Minimum grade of “C” in all pre-requisite courses.
5. RN-BSN Pathway: Minimum GPA of 2.5 on all prerequisites courses and Minimum University GPA of 2.0.
6. RN-BSN/MSN Pathway: Minimum cumulative GPA of 3.0 on all academic course work completed at all institutions, including repeated courses. And a Minimum University GPA of 3.0.

Application Procedures

RN to BSN and RN to BSN/MSN applicants are required to complete a primary application in Nursing CAS at www.NursingCas.org., as well as a supplemental application available on the College of Nursing's website. Students who drop out of the program for two or more consecutive semesters must apply for readmission through the Office of the Admission. Readmission is not automatic.

Admission Procedures For RN-BSN Pathway

1. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
2. Completion of Primary and Supplemental Applications:
   a. Primary Application submitted through Nursing Centralized Application System (NursingCAS) at www.NursingCAS.org. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
   b. Supplemental Application submitted online at https://secure.touchnet.net/C21704_ustores/web/store_main.jsp?STOREID=48&SINGLESTORE=true. This application requires a non-refundable processing fee of $50.00, a Personal Goal Statement, and a résumé /CV documenting clinical experience. a. Application can be submitted via credit or debit card. There is a $20.00 fee for non-sufficient funds.
3. Degrees must be from a regionally accredited institution.
4. Submission of Health Data forms and evidence of health insurance required upon admission.
5. Admission will be contingent on a negative drug screen and results of acceptable background check.
6. Students are responsible for all costs related to monitoring/proctoring tests and identity authentication when required by a course.

Application Deadline
Fall Semester Deadline is March 15
Spring Semester Deadline is July 15
Summer Semester Deadline is January 15

The deadlines for admission to RN-BSN program are rolling. We will accept applications past the stated deadline for the RN-BSN and RN-BSN/MSN pathways.

Academic Progression Policy For RN-BSN
The University of South Alabama College of Nursing will recommend for promotion only those students who, in the judgment of the faculty, satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing.

1. In accordance with University policy, students may not use the Grade Replacement Policy to replace professional nursing courses.
2. A grade of "C" or higher is required for all professional nursing courses. A student may repeat only one nursing course in the curriculum. A second "D", "F", or "U" will result in an academic dismissal from the nursing program.
3. A minimum GPA of 2.0 at the University of South Alabama is required to continue in the program and for graduation.
4. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program. (a) Conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug screen, (d) adverse background check, or (e) disruptive behavior including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
5. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
6. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
7. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to testing will result in removal from the program.
8. Students must complete the RN-BSN program with 5 years. If a student's progression is interrupted for any reason, it is the student's responsibility to contact the Office of Student Services.

Graduation
RN-BSN students who will complete all BSN degree requirements are required to apply for graduation by the application deadline established by the Registrar’s Office. Deadlines for each semester application are located on the Registrar’s website at https://www.southalabama.edu/departments/registrar/commencement/index.html.

RN-BSN Students May Continue To MSN Program
Students who have completed the RN-BSN program at the University of South Alabama may continue on to pursue their MSN degree at the University. Once the RN-BSN student applies to graduate with their BSN degree, they may apply for admission to start the MSN program after graduation.

Students in this pathway are guaranteed seats in non-Nurse Practitioner tracks upon successful completion of the BSN component of the pathway. Students may pursue the following specialties toward the completion of their MSN degree: Informatics, Nursing Administration, Clinical Nurse Leader, or Clinical Nurse Specialist in Adult/Gerontological Nursing. Students who wish to pursue nurse practitioner preparation must obtain a minimum of 2 years of clinical experience before beginning clinical nurse practitioner specialty courses and have a competitive overall undergraduate GPA to compete for a seat in the NP specialty they select. Students are admitted to a specialty track and may not change their track without permission. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the MSN program. Courses for the specialty component of the curriculum are offered on-line. Clinical requirements are completed
facult-facilitated preceptorships. Curriculum for all MSN specialties are located in the Graduate section under Master of Science in Nursing.

**Admission To Graduate Program**

Upon satisfactory completion of the BSN degree the RN-BSN/MSN student will contact the Graduate Advisors at congradapp@southalabama.edu for additional information regarding the Supplemental Application needed for admission as a graduate student to continue through the MSN Degree program. Applicants must meet the admission requirements for the MSN program to take these courses. Courses meet MSN degree requirements only if completed within five years of MSN graduation.

**Academic Progression Policy**

RN-BSN/MSN Students follow the Academic Progression Policy for the RN-BSN program while completing the BSN degree, then they will follow the Academic Progression Policy for the MSN program while in the second portion of the program.

**Program Completion Requirements**

Students in the RN-BSN/MSN pathway will graduate with both BSN and MSN degrees. Deadlines for each semester application are located on the Registrar’s website at [https://www.southalabama.edu/departments/registrar/commencement/index.html](https://www.southalabama.edu/departments/registrar/commencement/index.html)
Nursing (BSN) - Traditional

Degree Requirements

General Education Requirements (62 Credit Hours)

Area I - Written Composition (2 Courses, 6 Credit Hours)
A. 3 Credit hours: EH 101
B. 3 Credit hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Credit Hours)
A. 3 Credit hours: CA 110
B. 3 Credit hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 Credit hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, DRA 111, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11 Credit Hours)
A. 3 Credit hours from: MA 110, MA 112
B. 8 Credit hours from: BLY 101 & BLY 101L, CH 101 & CH 101L

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Credit Hours)
A. 3 Credit hours from: HY 101, HY 102, HY 135, HY 136
B. 9 Credit hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V – (21 Credit Hours)
A. 4 Credit hours from: BLY 213 & BLY 214, BMD 210 & BMD 210L
B. 8 Credit hours: BMD 251, BMD 252

D. 3 Credit hours: CIS 150, **CIS 010
E. 3 hours: ECO 215, ECO 216

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (62 Credit Hours)

Nursing (BS) Major Core (23 Courses, 62 Credit Hours)
A. 62 Credit hours: HSC 342, HSC 343, NU 300, NU 301, NU 304, NU 325, NU 327, NU 311, NU 312, NU 332, AHN 447, AHN 448, CMN 350, CMN 351, CMN 410, CMN 421, CMN 352, MCN 353, MCN 354, MCN 355, NU 412, NU 414, NU 460
Minor Requirements (0 Credit Hours)

A minor is not required for this degree program

Notes:
* PSY 120 is required
*CIS 150 Introduction to Computer Applications elective or **CIS 010 Computer Proficiency Exam (must replace 3 credits)

Additional Information

Bachelor Of Science In Nursing Program (BSN)

The BSN program prepares graduates for professional nursing practice. Upon completion of the program graduates are eligible to apply for the National Council Licensure Examination (NCLEX) to become licensed as a Registered Nurse.

The BSN program is offered in a traditional four- year format with nursing courses concentrated in the junior and senior years. The BSN program is also offered in an accelerated format for Associate Degree and diploma- prepared nurses.

BSN Program Learning Outcomes

Upon completion of the Baccalaureate Program, graduates should be able to:

1. Deliver professional nursing care for diverse populations across the lifespan to optimize health care outcomes.
2. Demonstrate the application of theory and evidence from contemporary nursing science and related disciplines as a basis for clinical reasoning, management, and evaluation of professional nursing care through the use of professional writing and clinical judgment.
3. Model responsibility and accountability for one's personal and delegated nursing care and lifelong learning to ensure excellence in nursing practice.
4. Translate evidence into professional nursing practice to individualize patient care designed to improve care outcomes.
5. Select principles of leadership and management that guide nursing, influence health policy, and transform health care delivery systems.
6. Collaborate with inter-professional health care teams and consumers in delivering and advocating for safe and effective use of health care resources.
7. Integrate professional nursing values in meeting current and emerging health needs in a dynamic, global society.
8. Evaluate effective use of technology and information management to provide patient-centered care across the lifespan in a variety of environments.

Bachelor Of Science In Nursing – Traditional Pathway

Students wishing to complete the Bachelor of Science in Nursing degree who have not completed a prior bachelor degree, may apply to the University of South Alabama as a pre-nursing student. Upon completion of the Pre-nursing requirements, students may apply for admission to the Professional Component of the Traditional BSN Pathway.

Admission Criteria

1. A minimum GPA of 2.75 on all prerequisite courses for the Traditional Pathway.
2. A minimum grade of “C” in all prerequisite courses.

Application Procedures

Applicants must submit an application for admission to the Professional Component of the BSN degree program. The application form is available on the College of Nursing’s website. Applications are reviewed carefully to determine that students have satisfied all pre-nursing requirements, and satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing. The College of Nursing Admissions Committee and the Dean of the College of Nursing reserve the right to select the applicants best qualified for and most likely to succeed in the study of nursing. Failure to comply with legal, moral, and legislative standards for licensure to practice as a registered nurse in the State of Alabama merits immediate dismissal from the nursing program.

1. Submission of a completed online application to the College of Nursing is required.
2. Payment of $50 non-refundable application fee via debit or credit card. There is a $20.00 fee for non-sufficient funds.
3. Transfer credit must comply with College of Nursing policies.
4. Notification of missing documents will be sent to your JagMail email account.
5. Submission of Health Data Forms and evidence of health insurance required upon admission.
6. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Deadlines
Fall Semester Deadline is March 15
Spring Semester Deadline is July 15
Summer Semester Deadline is January 15

In keeping with the dynamic changes in the nursing and health field, the baccalaureate curriculum may undergo change. Changes in curricula and/or admission requirements will be published as far in advance as possible. Advisors are available to assist students in adapting to those changes and planning their course of study accordingly. Applicants MUST meet with their advisor at least two semesters before applying to the Professional Component.

College Of Nursing Early Acceptance Program (CONEAP)
The College of Nursing has an early acceptance program for highly qualified high school seniors and students who have completed their freshman year at USA. Students selected for the early acceptance program and who fulfill all program requirements are guaranteed admission to the upper division professional component of the nursing curriculum. To be considered for the CONEAP, high school seniors must have earned a minimum high school grade-point average of 3.5 based on a 4.0 system as computed by USA, submit an ACT score of at least 25 composite (or 1200 SAT), and must have demonstrated leadership qualities and motivation toward the study of nursing. Students who are admitted to the CONEAP are encouraged to complete all Pre-Professional Nursing courses at USA; their curriculum includes core requirements and prerequisites for the upper division nursing program. Transient courses may be accepted upon approval from the College of Nursing Administration. Students participating in the College of Nursing's Early Acceptance Program must maintain an overall grade point average (GPA) of 3.2 throughout all course work, must be continuously enrolled a minimum of 12 Credit hours each semester (does not include summer terms) and making acceptable progress toward completing the pre-professional component of the curriculum to be admitted to the professional component of the program. All application documents must be submitted by the end of the senior year in high school to be considered. Applications received at other times will be considered on a space available basis. For questions and applications, contact USA Admissions, 2500 Meisler Hall, Mobile, Alabama 36688-0002 or call (800) 872-5247 or (251) 460-6141.

A second opportunity for participation in the CONEAP is available to students who have completed their freshman year of pre-nursing prerequisite courses at USA and have achieved an overall GPA of 3.2 or above (as computed by the USA Registrar’s Office). Additional requirements students must complete for admission: BLY 101 with Lab, MA 110 or MA 112, and CH 101 with Lab, and be approved by the Associate Dean for Academic Affairs for the College of Nursing. To remain in the CONEAP, the student must maintain a 3.2 GPA throughout all course work and all final grades must be a C or better. Application documents will be accepted at the end of the spring term of the freshman year up until the beginning of the fall term of the sophomore year.

Academic Progression Policy
The University of South Alabama College of Nursing will recommend for promotion only those students who, in the judgment of the faculty, satisfy the requirements of emotional and physical health, conduct, scholastic achievement, and aptitude for nursing. Students continually in adjustment difficulties may be dropped from the nursing program.

1. A grade of “C” or higher is required for all nursing courses. A student may repeat only one nursing course. Students repeating a course must take NU 302 Essentials of Professional Nursing at the same time.
2. Student receiving a failing grade in either a didactic course or a clinical course that are co-requisite must repeat both courses the following semester to progress in the program.
3. Students withdrawing from a first semester course “failing” must take NU 302 Essentials of Professional Nursing.
4. A second "D", "F", or "U" will result in an academic dismissal from the College of Nursing.
5. A minimum cumulative GPA of 2.0 at USA is required to continue in the nursing program. Students with a GPA below 2.0 may not register for nursing courses.
6. A dosage calculation test is required prior to promotion to NU 300/NU 301, MCN 352/MCN 353, MCN 354/MCN 355, and AHN 447/448 and NU 460. A score of 100% on one of three attempts or successful completion of standards based grading opportunities must be achieved to pass.
7. After completion of the ATI Capstone course embedded into NU 412, all students are required to complete the ATI RN Comprehensive Predictor. If the student is unsuccessful on the ATI RN Comprehensive Predictor, the faculty-selected
NCLEX remediation questions will be assigned with completion necessary to pass the course. All students, regardless of ATI RN Comprehensive Predictor performance, are also required to attend the 3-day ATI Live Review given on campus each semester. Failure to complete the ATI Capstone course, ATI RN Comprehensive Predictor and/or remediation, other course requirements as stated in the syllabus, and attend the ATI Live Review will result in a grade of “U” (unsatisfactory) for the NU 412 course and the student must repeat NU 412 the next term.

8. Failure to show good ethical and moral character including but not limited to any of the following may result dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug test, (d) adverse background check, or (e) disruptive behavior, including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.

9. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.

10. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.

11. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.

12. Once students are admitted to the professional component of the BSN curriculum, the program must be completed within 5 years. If a student's progression is interrupted for any reason, it is the student's responsibility to contact the Office of Student Services and apply for readmission. Students are readmitted on a space-available basis. Any alteration in usual progression may lengthen the student's program. In keeping with dynamic changes in health care and nursing, the curriculum may undergo change. Changes in curricula and/or admission requirements will be published as far in advance as possible. Advisors are available to assist students in adapting to those changes and planning their course of study accordingly.

Uniform Policy
The Uniform policy is provided to students at the time of admission.

Graduation Requirements
Traditional BSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar's Office. Deadlines for each semester application are located on the Registrar's website at https://www.southalabama.edu/departments/registrar/commencement/index.html.

Nursing (MSN) - BSN-Prepared RNs

Degree Requirements

BSN-MSN Pathway (36-57 Credit Hours)

Master Of Science In Nursing Degree (36-57 Credit Hours)

MSN With Clinical Concentration (11-18 Courses, 36-57 Credit Hours)
   A. Support Courses (3 Courses, 9 Credit hours)
   B. Core Courses (4 Courses, 12 Credit hours)
   C. Clinical Concentration (4-11 Courses, 15-36 Credit hours)

MSN With Non-clinical Concentrations (12 Courses, 37 Hours)
   A. Core Courses (4 Courses, 12 Credit hours)
   B. Non-clinical Concentration (8 Courses, 25 Credit hours)

Course Requirements

Support Courses (3 Courses, 9 Credit Hours)
   A. 9 Credit hours: NU 518, NU 545, NU 578

MSN/DNP Core Courses (4 Courses, 12 Credit Hours)
   A. 12 Credit hours: NU 607, NU 608, NU 610, NU 613

Clinical Concentrations (4-11 Courses, 15-36 Credit Hours)
   A. 24 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 568, AHN 571, AHN 572, AHN 573, AHN 574, AHN 575, AHN 576, AHN 577
   B. 24 Credit hours: Adult-Gerontological Primary Care Nurse Practitioner: AHN 581, AHN 588, AHN 591, AHN 592, AHN 593, AHN 594, AHN 595, AHN 596, HSC 601, HSC 602, HSC 603
   C. 17 Credit hours: Adult-Gerontological Clinical Nurse Specialist: NU 515, U 516, NU 517, AHN 516, AHN 517, AHN 518, Elective NU 519
   D. 15 Credit hours: Clinical Nurse Leader: NU 535, NU 536, NU 537, NU 538
   E. 36 Credit hours: (Family NP/Adult-Gerontological Acute Care: AHN 538, AHN 548, AHN 549, AHN 550, AHN 551, AHN 552, AHN 553, AHN 554, AHN 555
   F. 36 Credit hours: Dual Role (Family NP/Emergency NP): NU 580, NU 581, NU 582, NU 583, NU 584, NU 585, NU 586, NU 587, NU 588
   G. 24 Credit hours: Family Nurse Practitioner: CMN 568, CMN 571, CMN 572, CMN 573, CMN 574, CMN 575, CMN 576, CMN 577
   H. 24 Credit hours: Neonatal Nurse Practitioner: MCN 568, MCN 571, MCN 572, MCN 573, MCN 574, MCN 575, MCN 576, MCN 577
   I. 24 Credit hours: Pediatric Acute Nurse Practitioner: MCN 558, MCN 562, MCN 563, MCN 564, MCN 565, MCN 566, MCN 567, MCN 571
   J. 24 Credit hours: Pediatric Primary Care Nurse Practitioner: MCN 548, MCN 551, MCN 552, MCN 553, MCN 554, MCN 555, MCN 556, MCN 557
   K. 24 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 548, CMN 551, CMN 552, CMN 553, CMN 554, CMN 555, CMN 556, CMN 557
   L. 24 Credit hours: Women’s Health Nurse Practitioner: MCN 538, MCN 541, MCN 542, MCN 543, MCN 545, MCN 546, MCN 547
Non-Clinical Concentrations (8 Courses, 25 Credit Hours)

A. 25 Credit hours: Executive Nursing Administration: HSC 571, NU 539, NU 553, NU 554, NU 561, NU 565, NU 566, NU 567, NU 568
B. 25 Credit hours: Nursing Informatics: ISC 550, ISC 555, NU 539, NU 556, NU 557, NU 558, NU 559, NU 553, NU 554, NU 565

Subspecialties (8-11 Credit Hours)
Subspecialties are elective courses students may add to the degree program.

A. 11 Credit hours: Addictions Nursing: HSC 580, HSC 581, HSC 582, NU 510, NU 511, NU 512 May be added to any concentration.
B. 9 Credit hours: Advanced Forensic Nursing: NU 500, NU 501, NU 502, NU 503, NU 504, NU 505 May be added to any concentration.
C. 8 Credit hours: Cardiovascular: AHN 630, AHN 631, AHN 632, AHN 633 May be added to Adult-Geront Acute NP, Dual Role (Family NP/Adult Geront Acute NP/Emergency NP).
D. 8 Credit hours: Clinical Lipidology: HSC 595, HSC 596, HSC 597, HSC 598 May be added to Adult-Geront Primary Care NP, Adult-Geront Acute NP, Adult-Geront CNS, Family NP, Dual Role (Family NP/Adult-Geront Acute NP), Dual Role (Family NP/Emergency NP), and Women’s Health NP.
E. 15 Credit hours: Emergency Nurse Practitioner: NU 570, NU 571, NU 572, NU 573, NU 574, NU 575, NU 576, NU 577 May be added to Family NP, Dual Role (Family NP/Adult-Geront Acute Care NP), Dual Role (Family NP/Emergency NP), or taken as a Post Graduate Certificate if already certified.
F. 11 Credit hours: Nurse Educator: NU 620, NU 621, NU 622, NU 623 May be added to any concentration.
G. 9 Credit hours: Palliative Care: AHN 530, AHN 531, AHN 532, AHN 533 May be added to Adult-Geront Primary Care NP, Adult-Geront Acute NP, Adult-Geront CNS, Family NP, Dual Role (Family NP/Adult-Geront Acute NP), Dual Role (Family NP/Emergency NP), Psychiatric Mental Health NP, and Women’s Health NP.

Elective Courses (1-3 Credit Hours)

A. 1 Credit hour: NU 509
B. 3 Credit hours: NU 597

Additional Information

MASTER OF SCIENCE IN NURSING (MSN)
Organized within the graduate school at the University, the College of Nursing has several pathways, specialization, and sub-specialization options within the MSN program. In addition to admitting baccalaureate-prepared registered nurses, the college offers an accelerated BSN/MSN track for non-nurses (see Bachelor of Science in Nursing section), a pathway for associate degree or diploma-prepared nurses who have a baccalaureate degree in a field other than nursing, a special pathway for highly qualified associate degree and diploma nurses who do not hold a baccalaureate degree, and tracks for MSN-prepared nurses who are interested in certification in a new specialty area.

Master Of Science In Nursing Program Learning Outcomes
Upon completion of the Master of Science in Nursing Program, graduates should be able to:

1. Integrate advanced knowledge, evidence, and theories from nursing and related disciplines into a specialized area of advanced nursing practice through the use of scholarly writing.
2. Demonstrate competence in advanced nursing roles to meet current and emerging health needs of a global changing society.
3. Use scientific inquiry to identify problems and individualize patient care designed to improve care outcomes.
4. Apply advanced knowledge of leadership and management to influence health policy to transform care delivery systems.
5. Contribute to the focus and direction of the nursing profession.

Areas Of Specialization
Several concentration areas are offered to meet the career goals of students. Students may prepare as a clinical nurse leader or for advanced nursing practice in one of the nurse practitioner roles or the clinical nurse specialist role. Available NP include Adult-Gerontological Acute Care Nursing, Adult-Gerontological Primary Care Nursing, Dual Role (Family Nursing/Adult-Gerontological Acute Care Nursing), Dual Role (Family Nursing/Emergency Nursing), Family Nursing, Neonatal Nursing, Pediatric Acute Care
Nursing, Pediatric Primary Care Nursing, Psychiatric Family Nursing, Women's Health Nursing. Clinical Nurse Specialist is available in Adult-Gerontological Nursing. Concentrations are also available for students pursuing careers in Clinical Nurse Leader, Executive Nursing Administration and Nursing Informatics. Sub-specializations are available in Addictions Nursing, Advanced Forensic Nursing Care, Cardiovascular, Clinical Lipidology, Nursing Education, and Palliative Care. Emergency Nurse Practitioner is offered only as a post graduate certificate. See the MSN section for additional course listings.

Graduate Assistantships
A limited number of graduate assistantships are available to students in full-time status. Additional information and an application can be obtained by contacting the College of Nursing graduate office.

BSN-Prepared RN’S

Regular Admission Criteria
1. Graduate of an approved regionally accredited bachelors program with a major in nursing.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary, disciplinary, alternative program, cannot be admitted.
3. A minimal grade-point average of 3.0 on all BSN work (A=4.00).
4. Submission of a résumé which documents clinical experience. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
5. Submission of Health Data Forms and evidence of health insurance required upon admission.
6. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Provisional Admission Criteria
1. Graduate of an approved regionally accredited bachelors program with a major in nursing.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary, disciplinary, alternative program, cannot be admitted.
3. A minimal grade-point average of 2.75 on all BSN work (A=4.00).
4. Submission of a résumé which documents clinical experience. Prior to enrolling in a nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty.
5. Submission of Health Data Forms and evidence of health insurance required upon admission.
6. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Non-Degree Admission Criteria
1. Hold a bachelor's degree from an approved regionally accredited institution.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. A minimal grade-point average of 2.75 on all BSN work (A=4.00).

Enrollment in selective courses may not be available to non-degree students due to class size or required prerequisite.

Application Procedures
Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website at https://www.southalabama.edu/colleges/con/msn/msnadmmiss.html or by contacting the college directly at College of Nursing, University of South Alabama, Mobile, Alabama 36688; congradapp@southalabama.edu; Telephone: (251) 445-9400.

To be considered for admission to the MSN program, the applicant must meet the following requirements:
1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Completion of Primary and Supplemental Applications:
   a. Primary Application submitted through Nursing Centralized Application System (NursingCAS) at www.NursingCAS.org from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
   b. Supplemental Application submitted directly to USA Admissions Office. This application requires a non-refundable processing fee of $100.00, a Personal Goal Statement, and a résumé/CV documenting clinical experience. Prior to
enrolling in nurse practitioner clinical courses, students are required to have at least 2 years of experience in an area appropriate to their specialty.

4. Students are admitted to a specialty track and may not change their track without permission.
5. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the MSN program.
6. BSN degree must be from a regionally accredited institution.

Application Deadlines
Applications are accepted year round, and must adhere to the following application deadlines:

- Fall Semester Deadline is February 15
- Spring Semester Deadline is July 15
- Summer Semester Deadline is November 15

Academic Progression Policy
Students in the BSN-MSN program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in this program can have a maximum of two Cs.
3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support (NU 518, NU 545, NU 578) or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug test, (d) adverse background check, or (e) disruptive behavior including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
7. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
8. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
9. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
10. A student who has been academically dismissed is not eligible for readmission to the MSN program.

Graduation Requirements For BSN-prepared RN’S
The MSN program must be completed within 5 years of matriculation. MSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar’s Office. Deadlines for each semester application are located on the Registrar’s website at https://www.southalabama.edu/departments/registrar/commencement/index.html
Nursing (MSN) - RN-MSN With Non-Nursing Baccalaureate

Degree Requirements

RN To MSN Pathway (47-68 Credit Hours)

Master Of Science With Clinical Concentrations (14-21 Courses, 47-68 Hours)
A. RN-BSN Bridge Courses (3 Courses, 11 Credit hours)
B. Support Courses (3 Courses, 9 Credit hours)
C. MSN/DNP Core Courses (4 Courses, 12 Credit hours)
D. Clinical Concentrations (4-11 Courses, 15-36 Credit hours)

Master Of Science In Nursing With Non-Clinical Concentrations (16 Courses, 51 Credit Hours)
A. RN-BSN Bridge Courses (3 Courses, 11 Credit hours)
B. Core Courses (4 Courses, 12 Credit hours)
C. Non-clinical Concentration (8 Courses, 25 Credit hours)

Course Requirements

RN-MSN Bridge Courses (3 Courses, 11 Credit Hours)
A. 14 hours: NU 450, NU 452, NU 404

Support Courses (2 Courses, 6 Credit Hours)
A. 9 Credit hours: NU 518, NU 545, NU 578

MSN/DNP Core Courses (4 Courses, 12 Credit Hours)
1. 12 Credit hours: NU 607, NU 608, NU 610, NU 613

Clinical Concentrations (4-11 Courses, 15-36 Credit Hours)
A. 24 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 568, AHN 571, AHN 572, AHN 573, AHN 574, AHN 575, AHN 576, AHN 577
B. 24 Credit hours: Adult-Gerontological Primary Care Nurse Practitioner: AHN 581, AHN 588, AHN 591, AHN 592, AHN 593, AHN 594, AHN 595, HSC 601, HSC 602, HSC 603
C. 17 Credit hours: Adult-Gerontological Clinical Nurse Specialist: NU 515, NU 516, NU 517, AHN 516, AHN 517, AHN 518, Elective NU 519
D. 15 Credit hours: Clinical Nurse Leader: NU 535, NU 536, NU 537, NU 538
E. 36 Credit hours: Dual Role (Family NP/Adult-Gerontological Acute Care NP): AHN 538, AHN 548, AHN 549, AHN 550, AHN 551, AHN 552, AHN 554, AHN 555
F. 36 Credit hours: Dual Role (Family NP/Emergency NP): NU 580, NU 581, NU 582, NU 583, NU 584, NU 585, NU 586, NU 587, NU 588
G. 24 Credit hours: Family Nurse Practitioner: CMN 568, CMN 571, CMN 572, CMN 573, CMN 574, CMN 575, CMN 576 CMN 577
H. 24 Credit hours: Neonatal Nursing Practitioner: MCN 568, MCN 571, MCN 572, MCN 573, MCN 574, MCN 575, MCN 576, MCN 577
I. 24 Credit hours: Pediatric Acute Care Nurse Practitioner: MCN 558, MCN 562, MCN 563, MCN 564, MCN 565, MCN 566, MCN 567, MCN 571
J. 24 hours: Pediatric Care Nurse Practitioner: MCN 548, MCN 551, MCN 552, MCN 553, MCN 554, MCN 55, MCN 556, MCN 557
K. 24 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 548, CMN 551, CMN 552, CMN 553, CMN 554, CMN 555, CMN 556, CMN 557
L. 24 Credit hours: Women's Health Nurse Practitioner: MCN 538, MCN 541, MCN 542, MCN 543, MCN 544, MCN 545, MCN 546, MCN 547

Non-Clinical Concentrations (8 Courses, 25 Credit Hours)
A. 25 Credit hours: Executive Nursing Administration: HSC 571, NU 539, NU 561, NU 553, NU 554, NU 565, NU 566, NU 567, NU 568
B. 25 Credit hours: Nursing Informatics: ISC 550, ISC 555, NU 539, NU 556, NU 557, NU 558, NU 559, NU 553, NU 554, NU 565

Subspecialties (8-11 Credit Hours)
A. 11 Credit hours: Addictions Nursing: HSC 580, HSC 581, HSC 582, NU 510, NU 511, NU 512 May be added to any concentration.
B. 9 Credit hours: Advanced Forensic Nursing: NU 500, NU 501, NU 502, NU 503, NU 504, NU 505 May be added to any concentration.
C. 8 Credit hours: Cardiovascular: AHN 630, AHN 631, AHN 632, AHN 633 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Dual Role (Family NP/Adult-Geron Acute Care NP), and Dual Role (Family NP/Emergency NP).
D. 8 Credit hours: Clinical Lipidology: HSC 595, HSC 596, HSC 597, HSC 598 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), and Women's Health NP.
E. 15 Credit hours: Emergency Nurse Practitioner: NU 570, NU 571, NU 572, NU 573, U 574, NU 575, NU 576, NU 577 May be added to Family NP, Dual Role (Family NP/Adult-Geron Acute Care NP), Dual Role (Family NP/Emergency NP) or taken as a post Graduate Certificate if already Family NP certified;
F. 11 Credit hours: Nurse Educator: NU 620, NU 621, NU 622, NU 623 May be added to any concentration.
G. 9 Credit hours: Palliative Care: AHN 531, AHN 532, AHN 533 May be added to Adult-Geron Primary Care NP Adult-Geron Acute NP, Adult-Geron CNS, Family NP, and Women's Health NP.

Elective Courses - (1-3 Credit Hours)
A. 1 Credit hour: NU 509
B. 3 Credit hours: NU 597

Additional Information

RN - MSN PATHWAY FOR RN'S WITH A NON-NURSING BACCALAUREATE DEGREE

This pathway is available to persons who are registered nurses and have a baccalaureate degree from a regionally accredited institution in a discipline other than nursing.

Admission Criteria

1. Graduate of an approved regionally accredited Associate Degree program with a major in nursing.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. A minimal grade-point average of 2.75 on all undergraduate work (A=4.00).
4. Submission of a résumé which documents clinical experience. Prior to enrolling in a nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty.
5. Submission of Health Data Forms and evidence of health insurance required upon admission.
6. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing’s website at https://www.southalabama.edu/colleges/con/msn/msnadmiss.html or by contacting the college directly at College of Nursing, University of South Alabama, Mobile, Alabama 36688; congradapp@southalabama.edu; Telephone: (251) 445-9400.
To be considered for admission to the RN-MSN program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Completion of Primary and Supplemental Applications:
   a. Primary Application submitted through Nursing Centralized Application System (NursingCAS) at www.NursingCAS.org. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
   b. Supplemental Application submitted directly to the USA Admission Office at the USA College of Nursing. This application requires a non-refundable processing fee of $100.00, a Personal Goal Statement, and a résumé /CV documenting clinical experience.
4. Students are admitted to a specialty track and may not change their track without permission.
5. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the program.
6. All degrees must be from regionally accredited institutions.

**Application Deadlines**

Applications are accepted year round, and must adhere to the following application deadlines:

- Fall Semester Deadline is February 15
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 15

**Provisional Acceptance Progression Requirements**

The following nursing courses must be completed with a GPA of at least 2.75 prior to enrolling in graduate nursing specialty courses: NU 404, NU 450, and NU 452. Students who have earned a GPA of less than 2.5 will be academically dismissed from the Graduate School. Students in the RN to MSN track follow the same progression as students in the regular MSN program.

**Academic Progression Policy**

Students in the RN-MSN program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of two “C”s.
3. A maximum of two (2) courses with a grade of “C” can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug test, (d) adverse background check, or (e) disruptive behavior, including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
7. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
8. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
9. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
10. A student who has been academically dismissed is not eligible for readmission to the MSN program.
Graduation Requirements

The MSN program must be completed within 5 years of matriculation. MSN students who will complete all degree requirements are required to apply for graduation by the application deadline established by the Registrar’s Office. Deadlines for each semester application are located on the Registrar’s website at https://www.southalabama.edu/departments/registrar/commencement/index.html.
# Nursing Post-Graduate Certificate

## Degree Requirements

### Clinical Concentrations (4-11 Courses, 15-36 Credit Hours)

A. 24 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 568, AHN 571, AHN 572, AHN 573, AHN 574, AHN 575, AHN 576, AHN 577

B. 24 Credit hours: Adult-Gerontological Primary Care Nurse Practitioner: AHN 581, AHN 588, AHN 591, AHN 592, AHN 593, AHN 594, AHN 595, AHN 596, HSC 601, HSC 602, HSC 603

C. 17 Credit hours: Adult-Gerontological Clinical Nurse Specialist: NU 515, NU 516, NU 517, AHN 516, AHN 517, AHN 518. Elective NU 519

D. 15 Credit hours: Clinical Nurse Leader: NU 535, NU 536, NU 537, NU 538

E. 36 Credit hours: Dual Role (Family NP/Adult-Gerontological Acute Care NP): AHN 538, AHN 548, AHN 549, AHN 550, AHN 551, AHN 552, AHN 553, AHN 554, AHN 555

F. 36 Credit hours: Dual Role (Family NP/Emergency NP): NU 580, NU 581, NU 582, NU 583, NU 584, NU 585, NU 586, NU 587, NU 588

G. 15 Credit hours: Emergency Nurse Practitioner: NU 570, NU 571, NU 572, NU 573, NU 574, NU 575, NU 576, NU 577. May be added to Family NP, Dual Role (Family NP/Adult-Geron Acute Care NP), Dual Role (Family NP/Emergency NP), or taken as a Post Graduate Certificate if already Family NP certified.

H. 24 Credit hours: Family Nurse Practitioner: CMN 568, CMN 571, CMN 572, CMN 573, CMN 574, CMN 575, CMN 576, CMN 577

I. 24 Credit hours: Neonatal Nurse Practitioner: MCN 568, MCN 571, MCN 572, MCN 573, MCN 574, MCN 575, MCN 576, MCN 577

J. 24 Credit hours: Pediatric Acute Care Nurse Practitioner: MCN 558, MCN 562, MCN 563, MCN 564, MCN 565, MCN 566, MCN 567, MCN 571

K. 24 Credit hours: Pediatric Primary Care Nurse Practitioner: MCN 548, MCN 551, MCN 552, MCN 553, MCN 554, MCN 555, MCN 556, MCN 557

L. 24 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 548, CMN 551, CMN 552, CMN 553, CMN 554, CMN 555, CMN 556, CMN 557

M. 24 Credit hours: Women's Health Nurse Practitioner: MCN 538, MCN 541, MCN 542, MCN 543, MCN 544, MCN 545, MCN 546, MCN 547

### Non-Clinical Concentrations (8 Courses, 25 Credit Hours)

A. 25 Credit hours: Executive Nursing Administration: HSC 571, NU 539, NU 561, NU 553, NU 554, NU 565, NU 566, NU 567, NU 568

B. 25 Credit hours: Nursing Informatics: ISC 550, ISC 555, NU 539, NU 556, NU 557, NU 558, NU 559, NU 553, NU 554, NU 565

### NURSING POST-GRADUATE CERTIFICATE PROGRAM

The Nursing Post-Graduate Certificate Program is designed for registered nurses with a graduate degree in nursing who seek academic preparation in a new specialty or subspecialty area of advanced practice nursing. Nursing Post-graduate certificate students can select any of the specialty options offered by the program. Each certificate program is designed to be in compliance with national certification requirements including required support courses, didactic specialty courses, and clinical hours.

### Nursing Post-Graduate Certificate Program Learning Outcomes

Upon completion of the Nursing Post-Graduate Certificate Program, graduates should be able to:

1. Integrate advanced knowledge and theories from nursing and related disciplines into a specialized area of advanced nursing practice.
2. Demonstrate competence in advanced nursing roles to meet current and emerging health needs of a specific population or system.
3. Use scientific inquiry to identify problems within an organization or specific patient population to improve care outcomes.
4. Apply advanced knowledge of leadership and management to transform care delivery systems in a specialized area of advanced nursing practice.
5. Contribute to the focus and direction of the nursing profession within a specialized area of advanced nursing practice.
6. Demonstrate professional skills through collecting, organizing, and communicating information in professional writing and presentations.

Admission Criteria

Graduate of an approved regionally accredited master's or doctoral program with a major in nursing.

1. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
2. A minimal grade-point average of 3.0 on all graduate work (A=4.0). Enrollment in selective courses may not be available to non-degree students due to class size or required prerequisite.
3. Submission of a résumé which documents clinical experience. Prior to enrolling in nurse practitioner clinical course, students are required to have at least 2 years of experience in an area appropriate to the specialty track.
4. Submission of Health Data Forms and evidence of health insurance required upon admission.
5. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website at https://www.southalabama.edu/colleges/con/dnp/dnpapplic.htm or by contacting the college directly at College of Nursing, University of South Alabama, Mobile, Alabama 36688; condnpadmit@southalabama.edu; Telephone: (251) 445-9400.

To be considered for admission to the Post Graduate Certificate program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Completion of Primary and Supplemental Applications is required.
   a. Primary Application submitted through Nursing Centralized Application System (NursingCAS) at www.NursingCAS.org. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
   b. Supplemental Application submitted directly to the DNP Office at the USA College of Nursing. This application requires a non-refundable processing fee of $100.00, a Personal Goal Statement, and a résumé /CV documenting clinical experience.
4. Applicants to the Nursing Post Graduate Certificate pathways must have minimal GPA of 3.0 on all graduate work (A=4.0).  
5. Students are admitted to a specialty track and may not change their track without permission.
6. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the Nursing Post Graduate Certificate program.
7. MSN or DNP degrees must be from regionally accredited institution.

Application Deadlines

Applications are accepted year round, and must adhere to the following application deadlines:

- Fall Semester Deadline is February 15
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 15

Academic Progression Requirements For The Nursing Post-Graduate Certificate

Students in the Nursing Post-Graduate Certificate program must meet the following requirements to progress in the program:
1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.

2. Students in these programs can have a maximum of two “C”s.

3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.

4. A student earning a third "C" or lower will be academically dismissed from the program.

5. A student earning two grades of "F" in the program will be academically dismissed.

6. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug test, (d) adverse background check, or (e) disruptive behavior, including online behavior. All student must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.

7. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.

8. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.

9. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.

10. A student who has been academically dismissed is not eligible for readmission to the College of Nursing Graduate programs.

Program Completion

Students in the Nursing Post Graduate Certificate Pathway are required to complete all specialty courses and any support courses not previously completed. Nursing Post-Graduate certificate students are not required to complete graduate core or research courses (see the previous section on MSN Curriculum for the BSN-prepared RN for a listing of courses for each specialty area). The Nursing Post-Graduate Certificates Program must be completed within 2 years from the semester the specialty option coursework begins.
Nursing Practice (DNP) - BSN To DNP

Degree Requirements

Master Of Science In Nursing Degree Requirements (11-18 Courses, 36-57 Credit Hours)

MSN With Clinical Concentrations (11-18 Courses, 36-57 Credit Hours)
A. Support Courses - (3 Courses, 9 Credit hours)
B. Core Courses - (4 Courses, 12 Credit hours)
C. Clinical Concentrations - (4-11 Courses, 15-36 Credit hours)

MSN With Non-Clinical Concentrations (12 Courses, 37 Credit Hours)
A. Core Courses - (4 Courses, 12 Credit hours)
B. Non-Clinical Concentration - (8 Courses, 25 Credit hours)

Doctor Of Nursing Practice Degree Requirements (24 Credit Hours Remaining After Completion Of NU 607, NU 608, NU 610, And NU 613)

Core Courses - (4 Courses, 12 Credit Hours)
A. Core Courses - 4 Courses, 12 Credit hours: NU 607, NU 608, NU 610, NU 613 completed in MSN
B. DNP Residency Courses - 4 Courses, 12 Credit hours

Course Requirements

Support Courses - (3 Courses, 9 Credit Hours)
A. 9 Credit hours: NU 518, NU 545, NU 578

MSN/DNP Core Courses - (8 Courses, 24 Credit Hours)
A. 24 Credit hours: NU 607, NU 608, NU 610, NU 611, NU 612, NU 613, NU 615, NU 616

Clinical Concentrations - (4-11 Courses, 15-36 Credit Hours)
A. 24 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 568, AHN 571, AHN 572, AHN 573, AHN 574, AHN 575, AHN 576, AHN 577
B. 24 Credit hours: Adult-Gerontological Primary Care Nurse Practitioner: AHN 581, AHN 588, AHN 591, AHN 592, AHN 593, AHN 594, AHN 595, AHN 596, HSC 601, HSC 602, HSC 603
C. 17 Credit hours: Adult-Gerontological Clinical Nurse Specialist: NU 515, NU 516, NU 517, AHN 518, Elective NU 519
D. 36 Credit hours: Dual Role (Family NP/Adult-Gerontological Acute Care NP): AHN 538, AHN 548, AHN 549, AHN 550, AHN 551, AHN 552, AHN 553, AHN 554, AHN 555
E. 36 Credit hours: Dual Role (Family NP/Emergency NP): NU 580, NU 581, NU 582, NU 583, NU 584, NU 585, NU 586, NU 587, NU 588
F. 24 Credit hours: Family Nurse Practitioner: CMN 568, CMN 571, CMN 572, CMN 573, CMN 574, CMN 575, CMN 576, CMN 577
G. 24 Credit hours: Neonatal Nurse Practitioner: MCN 568, MCN 571, MCN 572, MCN 573, MCN 574, MCN 575, MCN 576, MCN 577
H. 24 Credit hours: Pediatric Acute Care Nurse Practitioner: MCN 558, MCN 562, MCN 563, MCN 564, MCN 565, MCN 566, MCN 567, MCN 571
I. 24 Credit hours: Pediatric Primary Care Nurse Practitioner: MCN 548, MCN 551, MCN 552, MCN 553, MCN 554, MCN 555, MCN 556, MCN 557
J. 24 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 548, CMN 551, CMN 552, CMN 553, CMN 554, CMN 555, CMN 556, CMN 557
K. 24 Credit hours: Women’s Health Nurse Practitioner: MCN 538, MCN 541, MCN 542, MCN 543, MCN 544, MCN 545, MCN 546, MCN 547

Non-Clinical Concentrations (8 Courses, 25 Credit Hours)
A. 25 Credit hours: Executive Nursing Administration: HSC 571, NU 539, NU 561, NU 553, NU 554, NU 565, NU 566, NU 567, NU 568
B. 25 Credit hours: Nursing Informatics: ISC 550, ISC 555, NU 556, NU 557, NU 558, NU 559, NU 553, NU 554, NU 565

DNP Residency Courses (4 Courses, 12 Credit Hours)
A. 12 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 604, AHN 617, AHN 618, AHN 619
B. 12 Credit hours: Adult-Gerontological Primary Care Nurse Practitioner: AHN 693, AHN 694, AHN 695, AHN 696
C. 12 Credit hours: Adult-Gerontological Clinical Nurse Specialist: AHN 634, AHN 635, AHN 636, AHN 637
D. 12 Credit hours: Dual Role (Family NP/Adult-Gerontological Acute Care NP):
   Option: a). Family NP: AHN 680, AHN 681, AHN 682, AHN 683 or
   Option: b). Adult-Gerontological Acute Care NP: AHN 670, AHN 671, AHN 672, AHN 673
E. 12 Credit hours: Dual Role (Family NP/Emergency NP): NU 680, NU 681, NU 682, NU 683
F. 12 Credit hours: Executive Nursing Administration: NU 661, NU 662, NU 663, NU 664
G. 12 Credit hours: Family Nurse Practitioner: CMN 680, CMN 681, CMN 682, CM 683
H. 12 Credit hours: Neonatal Nurse Practitioner: MCN 674, MCN 675, MCN 676, MCN 677
I. 12 Credit hours: Nursing Informatics: NU 656, NU 657, NU 658, NU 659
J. 12 Credit hours: Pediatric Acute Care Nurse Practitioner: MCN 604, MCN 617, MCN 618, MCN 619
K. 12 Credit hours: Pediatric Clinical Nurse Specialist: MCN 637, MCN 638, MCN 639, MCN 640
L. 12 Credit hours: Pediatric Primary Care Nurse Practitioner: MCN 654, MCN 655, MCN 656, MCN 657
M. 12 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 604, CMN 617, CMN 618, CMN 619
N. 12 Credit hours: Public Health Administration: CMN 643, CMN 644, CMN 645, CMN 646
O. 12 Credit hours: Women’s Health Nurse Practitioner: MCN 644, MCN 645, MCN 646, MCN 647

Subspecialties (8-11 Credit Hours)
Subspecialties are elective courses students may add to the degree program.
A. 11 Credit hours: Addictions Nursing: HSC 580, HSC 581, HSC 582, NU 510, NU 511, NU 512 May be added to any concentration.
B. 9 Credit hours: Advanced Forensic Nursing: NU 500, NU 501, NU 502, NU 503, NU 504, NU 505 May be added to any concentration.
C. 8 Credit hours: Cardiovascular: AHN 630, AHN 631, AHN 632, AHN 633 May be added to Adult-Geron Acute NP, Dual Role (Family NP/Adult Geron Acute Care NP), and Dual Role (Family NP/Emergency NP).
D. 8 Credit hours: Clinical Lipidology: HSC 595, HSC 596, HSC 597, HSC 598 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), and Women’s Health NP.
E. 15 Credit hours: Emergency Nurse Practitioner: NU 570, NU 571, NU 572, NU 573, NU 574, NU 575, NU 576, NU 577 May be added to Family NP, Dual Role (Family NP/Adult-Geron Acute Care NP), Dual Role (Family NP/Emergency NP), or taken as a Post Graduate Certificate if already Family NP certified.
F. 11 Credit hours: Nurse Educator: NU 620, NU 621, NU 622, NU 623 May be added to any concentration.
G. 9 Credit hours: Palliative Care: AHN 530, AHN 531, AHN 532, AHN 533 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), Psychiatric Mental Health NP, and Women’s Health NP.

Elective Courses - (1-3 Credit Hours)
A. 1 Credit hour: NU 509
B. 3 Credit hours: NU 597
Additional Information

BSN TO DNP PATHWAY
The BSN to DNP curriculum consist of 69 to 87 Credit hour. The program can be completed in ten semesters of full-time study or in sixteen semesters of part-time study. Full-time study is defined as six or more Credit hours per semester. Permission to take more than twelve Credit hours per semester must be obtained from the Associate Dean for Academic Affairs prior to the student enrolling. The program must be completed within 7 years of matriculation.

Course work is offered on-line and students are required to come to campus at least one time when they begin the clinical portion of their specialty program for an intensive classroom, clinical skills, and evaluation sessions. Specialty tracks within the College of Nursing’s graduate program require a practice component. Faculty assist students in locating a site and preceptor if it is indicated. Students who are unsuccessful in being accepted by an agency in their home community may have to travel to another area to complete practice requirements.

The program does not require a thesis or dissertation; however, students are required to complete a major synthesis project that results in a quality improvement change and has a substantial effect on health care outcomes. Residency requirements for the synthesis project can be completed in the student’s home region with an approved mentor.

Admission Criteria
To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Prior to enrolling in nurse practitioner clinical courses, students are required to have at least 2 years of experience in an area appropriate to their specialty.
4. Applicants to the BSN to DNP pathway must have a minimal GPA of 3.0 on all BSN work (A=4.0).
5. BSN degree must be from a regionally accredited institution.
6. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the DNP program.
7. Submission of Health Data Forms and evidence of health insurance required upon admission.
8. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Procedures
Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing’s website at https://www.southalabama.edu/colleges/con/dnp/dnpapplic.htm or by contacting the college directly at College of Nursing, University of South Alabama, Mobile, Alabama 36688; condnpadmit@southalabama.edu; Telephone: (251) 445-9400.

1. Admission to the program is limited and selective.
2. Completion of Primary and Supplemental Applications is required.
   a. Primary Application submitted through Nursing Centralized Application System (NursingCAS) at www.NursingCAS.org. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
   b. Supplemental Application submitted directly to the DNP Office at the USA College of Nursing. This application requires a non-refundable processing fee of $100.00, a Personal Goal Statement, and a résumé /CV documenting clinical experience.
3. Students are admitted to a specialty track and may not change their track without permission.

Application Deadlines
Applications are accepted twice a year, and must adhere to the following application deadlines:

- Fall Semester Deadline is February 15
- Spring Semester Deadline is July 15
- Summer Semester Deadline is December 15
Academic Progression Policy

Students in the BSN-DNP program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of two "C"s.
3. A maximum of two (2) courses with a grade of "C" can be counted towards a degree; however, only one (1) "C" is permitted in support or specialization courses. If a second "C" or lower is earned in a support (NU 518, NU 545, NU 578) or specialization course, the course in which the second "C" or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third "C" or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. The final outcome of the DNP Project Planning and Development course and the Progression course is “Successful/Unsuccessful.” Students receiving two grades of “U” in these courses will be academically dismissed.
7. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug test, (d) adverse background check, or (e) disruptive behavior, including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.
8. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
9. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
10. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
11. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

DNP Residency Coursework Policy

The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Progression Course prior to moving forward with the next course in the DNP Residency progression.

Graduation Information

Students in the BSN-DNP program will apply for two separate graduations. Applications should be submitted to the Registrar’s Office the semester before the anticipated graduation. Each candidate must submit an application for the Master of Science in Nursing degree upon completion of the degree requirements. Upon completion of requirements for the Doctor of Nursing Practice degree, each candidate must submit an application for that degree. The student’s curriculum schedule indicates the semester in which each degree should be awarded. See the University Calendar for specific application deadlines.
Degree Requirements

Degree: Doctor Of Nursing Practice (DNP)

MSN Clinical Nurse Leader Bridge To DNP Executive Nursing Administration Pathway (14 Courses, 42 Credit Hours)

A. MSN Clinical Nurse Leader (Completed before admission)
B. Bridge Course - (2 Courses, 6 Credit hours)
C. DNP Core Courses - (8 Courses, 24 Credit hours)
D. DNP Residency Courses - (4 Courses, 12 Credit hours)

Course Requirements

Bridge Courses (2 Courses, 6 Credit Hours)
A. 6 Credit hours: NU 560, NU 565

DNP Core Courses (8 Courses, 24 Credit Hours)
A. 24 Credit hours: NU 607, NU 608, NU 610, NU 611, NU 612, NU 613, NU 615, NU 616

DNP Residency Courses (4 Courses, 12 Credit Hours)
A. Executive Nursing Administration (12 Credit hours): NU 661, NU 662, NU 663, NU 664

Subspecialties (8-11 Credit Hours)
Subspecialties are elective courses students may add to the degree program.
A. 11 Credit hours: Addictions Nursing: HSC 580, HSC 581, HSC 582, NU 510, NU 511, NU 512  May be added to any concentration.
B. 9 Credit hours: Advanced Forensic Nursing: NU 500, NU 501, NU 502, NU 503, NU 504, NU 505  May be added to any concentration.
C. 11 Credit hours: Nurse Educator: NU 620, NU 621, NU 622, NU 623  May be added to any concentration.

Elective Courses - (1-3 Credit Hours)
A. 1 Credit hour: NU 509
B. 3 Credit hours: NU 597

Additional Information

MSN IN CLINICAL NURSE LEADER BRIDGE TO DNP EXECUTIVE NURSING ADMINISTRATION

Admission Criteria
To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Prior to enrolling in nurse practitioner clinical courses, students are required to have at least 2 years of experience in an area appropriate to their specialty.
4. Applicants to the MSN to DNP pathway must have a minimal GPA of 3.0 on all MSN work (A=4.0).
5. MSN degree must be from a regionally accredited institution.
6. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the DNP program.
7. Submission of Health Data Forms and evidence of health insurance required upon admission.
8. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Procedures

Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing’s website at https://www.southalabama.edu/colleges/con/dnp/dnpapplic.htm or by contacting the college directly at College of Nursing, University of South Alabama, Mobile, Alabama 36688; condnpadmit@southalabama.edu; Telephone: (251) 445-9400.

6. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
7. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
8. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
9. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

**DNP Residency Coursework Policy**

The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Progression Course prior to moving forward with the next course in the DNP Residency progression.

**Graduation Information**

The program must be completed in five years of matriculation for the MSN Clinical Nurse Leader Bridge to DNP Executive Nursing Administration Pathway. Each candidate for the Doctor of Nursing practice degree must submit an application for the degree the semester preceding their anticipated graduation through the Registrar’s Office. See the University Calendar for specific deadlines. Deadlines for each semester application are located on the Registrar’s website at [https://www.southalabama.edu/departments/registrar/commencement/index.html](https://www.southalabama.edu/departments/registrar/commencement/index.html).
Nursing Practice (DNP) - MSN To DNP Adding A New Concentration Area

Degree Requirements

MSN To DNP Adding A New Concentration Pathway (20-26 Courses, 62-81 Credit Hours)

DNP Adding Clinical Concentration (21-26 Courses, 62-81 Credit Hours)
A. Support Courses (3 Courses, 9 Credit hours)
B. Post Graduate Clinical Concentrations (6-11 Courses, 17-36 Credit hours)
C. DNP Core Courses (8 Courses, 24 Credit hours)
D. DNP Residency Courses (4 Courses, 12 Credit hours)

DNP Adding Non-Clinical Concentrations (20 Courses, 61 Hours)
A. Post Graduate Non-clinical Concentration (8 Courses, 25 Credit hours)
B. DNP Core Courses (8 Courses, 24 Credit hours)
C. DNP Residency Courses (4 Courses, 61 Credit hours)

Course Requirements

Support Courses (3 Courses, 9 Credit Hours)
A. 9 Credit hours: NU 518, NU 545, NU 578

Post Graduate Clinical Concentrations (6-11 Courses, 17-36 Credit Hours)
A. 24 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 568, AHN 571, AHN 572, AHN 573, AHN 574, AHN 575, AHN 576, AHN 577
B. 24 Credit hours: Adult-Gerontological Primary Care Nurse Practitioner: AHN 581, AHN 588, AHN 571, AHN 588, AHN 591, AHN 592, AHN 593, AHN 594, AHN 595, AHN 596, HSC 601, HSC 602, HSC 603
C. 17 Credit hours: Adult-Gerontological Clinical Nurse Specialist: NU 515, NU 516, NU 517, AHN 516, AHN 517, AHN 518, Elective NU 519
D. 36 Credit hours: Dual Role (Family NP/Adult-Gerontological Acute Care NP): AHN 538, AHN 548, AHN 549, AHN 550, AHN 551, AHN 552, AHN 553, AHN 554, AHN 555
E. 36 Credit hours: Dual Role (Family NP/Emergency NP): NU 580, NU 581, NU 582, NU 583, NU 584, NU 585, NU 586, NU 587, NU 588
F. 24 Credit hours: Family Nurse Practitioner: CMN 568, CMN 571, CMN 572, CMN 573, CMN 574, CMN 575, CMN 576, CMN 577
G. 24 Credit hours: Neonatal Nurse Practitioner: MCN 568, MCN 571, MCN 572, MCN 573, MCN 574, MCN 575, MCN 576, MCN 577
H. 24 Credit hours: Pediatric Acute Care Nurse Practitioner: MCN 558, MCN 562, MCN 563, MCN 564, MCN 565, MCN 566, MCN 567, MCN 571
I. 24 Credit hours: Pediatric Primary Care Nurse Practitioner: MCN 548, MCN 551, MCN 552, MCN 553, MCN 554, MCN 555, MCN 556, MCN 557
J. 24 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 548, CMN 551, CMN 552, CMN 553, CMN 554, CMN 555, CMN 556, CMN 557
K. 24 Credit hours: Women's Health Nurse Practitioner: MCN 538, MCN 541, MCN 542, MCN 543, MCN 544, MCN 545, MCN 546, MCN 547

Post Graduate Non-Clinical Concentration (8 Courses, 25 Credit Hours)
A. 25 Credit hours: Executive Nursing Administration: HSN 571, NU 539, NU 561, NU 553, NU 554, NU 565, NU 566, NU 567, NU568
B. 25 Credit hours: Nursing Informatics: ISC 550, ISC 555, NU 539, NU 556, NU 557, NU 558, NU 559, NU 553, NU 554, NU 565

**DNP Core Courses (8 Courses, 24 Credit Hours)**

A. 24 Credit hours: NU 607, NU 608, NU 610, NU 611, NU 612, NU 613, NU 615, NU 616

**DNP Residency Courses (4 Courses, 12 Credit Hours)**

A. 12 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 604, AHN 617, AHN 618, AHN 619

B. 12 Credit hours: Adult-Gerontological Primary Care Nurse: AHN 693, AHN 694, AHN 695, AHN 696

C. 12 Credit hours: Adult-Gerontological Clinical Nurse Specialist: AHN 634, AHN 635, AHN 636, AHN 637

D. 12 Credit hours: Dual Role (Family NP/Adult-Gerontological Acute Care NP) **Option:**
   a.) Family NP: AHN 680, AHN 681, AHN 682, AHN 683 or
   b.) Adult-Gerontological Acute Care NP: AHN 670, AHN 671, AHN 672, AHN 673

E. 12 Credit hours: Dual Role (Family NP/Emergency NP): NU 680, NU 681, NU 682, NU 683

F. 12 Credit hours: Executive Nursing Administration: NU 661, NU 662, NU 663, NU 664

G. 12 Credit hours: Family Nurse Practitioner: CMN 680, CMN 681, CMN 682, CMN 683

H. 12 Credit hours: Neonatal Nurse Practitioner: MCN 674, MCN 675, MCN 676, MCN 677

I. 12 Credit hours: Nursing Informatics: NU 656, NU 657, NU 658, NU 659

J. 12 Credit hours: Pediatric Acute Care Nurse Practitioner: MCN 604, MCN 617, MCN 618, MCN 619

K. 12 Credit hours: Pediatric Clinical Nurse Specialist: MCN 637, MCN 638, MCN 639, MCN 640

L. 12 Credit hours: Pediatric Primary Care Nurse Practitioner: MCN 654, MCN 655, MCN 656, MCN 657

M. 12 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 604, CMN 617, CMN 618, CMN 619

N. 12 Credit hours: Public Health Administration: CMN 643, CMN 644, CMN 645, CMN 646

O. 12 Credit hours: Women’s Health Nurse Practitioner: MCN 644, MCN 645, MCN 646, MCN 647

**Subspecialties (8-11 Credit Hours)**

Subspecialties are elective courses students may add to the degree program.

A. 11 Credit hours: Addictions Nursing: HSC 580, HSC 581, HSC 582, NU 510, NU 511, NU 512 May be added to any concentration.

B. 9 Credit hours: Advanced Forensic Nursing: NU 500, NU 501, NU 502, NU 503, NU 504, NU 505 May be added to any concentration.

C. 8 Credit hours: Cardiovascular: AHN 630, AHN 631, AHN 632, AHN 633 May be added to Adult-Geron Acute NP, Dual Role (Family NP/Adult Geron Acute Care NP), and Dual Role (Family NP/Emergency NP).

D. 8 Credit hours: Clinical Lipidology: HSC 595, HSC 596, HSC 597, HSC 598 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), and Women’s Health NP.

E. 15 Credit hours: Emergency Nurse Practitioner: NU 570, NU 571, NU 572, NU 573, NU 574, NU 575, NU 576, NU 577 May be added to Family NP, Dual Role (Family NP/Adult-Geron Acute Care NP), Dual Role (Family NP/Emergency NP), or taken as a Post Graduate Certificate if already Family NP certified.

F. 11 Credit hours: Nurse Educator: NU 620, NU 621, NU 622, NU 623 May be added to any concentration.

G. 9 Credit hours: Palliative Care: AHN 530, AHN 531, AHN 532, AHN 533 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), Psychiatric Mental Health NP, and Women’s Health NP.

**Elective Courses (1-3 Credit Hours)**

A. 1 Credit hour: NU 509

B. 3 Credit hours: NU 597
Additional Information

MSN TO DNP ADDING A NEW CONCENTRATION

Admission Criteria
To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Prior to enrolling in nurse practitioner clinical courses, students are required to have at least 2 years of experience in an area appropriate to their specialty.
4. Applicants to the MSN to DNP pathway must have a minimal GPA of 3.0 on all MSN work (A=4.0).
5. MSN degree must be from a regionally accredited institution.
6. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the DNP program.
7. Submission of Health Data Forms and evidence of health insurance required upon admission.
8. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Procedures
Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website at https://www.southalabama.edu/colleges/con/dnp/dnpapplic.htm or by contacting the college directly at College of Nursing, University of South Alabama, Mobile, Alabama 36688; condnpadmit@southalabama.edu; Telephone: (251) 445-9400.

1. Admission to the program is limited and selective.
2. Completion of Primary and Supplemental Applications is required.
   a. Primary Application submitted through Nursing Centralized Application System (NursingCAS) at www.NursingCAS.org. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
   b. Supplemental Application submitted directly to the DNP Office at the USA College of Nursing. This application requires a non-refundable processing fee of $100.00, a Personal Goal Statement, and a résumé /CV documenting clinical experience.
3. Students are admitted to a specialty track and may not change their track without permission.

Application Deadlines
Applications are accepted three times a year, and must adhere to the following application deadlines:

• Fall Semester Deadline is February 15
• Spring Semester Deadline is July 15
• Summer Semester Deadline is December 15

Academic Progression Policy
Students in the MSN-DNP Adding a Concentration program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of two “C”s.
3. A maximum of two (2) courses with a grade of “C” can be counted towards a degree; however, only one (1) “C” is permitted in support or specialization courses. If a second “C” or lower is earned in a support (NU 518, NU 545, NU 578) or specialization course, the course in which the second “C” or lower is obtained must be repeated before a student may move forward with a specialty course. All corresponding specialty clinical and didactic courses must be taken in sequence.
4. A student earning a third “C” or lower will be academically dismissed from the program.
5. A student earning two grades of "F" in the program will be academically dismissed.
6. The final outcome of the DNP Project Planning and Development course and the Progression course is "Successful/Unsuccessful." Students receiving two grades of "U" in these courses will be academically dismissed.
7. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state, (c) positive drug test, (d) adverse background check, or (e) disruptive behavior, including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above state incidents.
8. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.
9. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.
10. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.
11. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

DNP Residency Coursework Policy
The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Progression Course prior to moving forward with the next course in the DNP Residency progression.

Graduation Information
The MSN to DNP adding a new Concentration program must be completed in seven years of matriculation. Students in this program will receive a post-graduate certificate from the College of Nursing upon the completion of all certificate requirements. All post-graduate certificate requirements must be completed within 2 years from the semester the specialty option coursework begins. No application is required for the completion of the post-graduate certificate.

Students will only apply to graduate when they have completed all the requirements for the DNP degree.

Deadlines for each semester application are located on the Registrar’s website at https://www.southalabama.edu/departments/registrar/commencement/index.html.
Nursing Practice (DNP) - MSN To DNP For Advanced Practice Nursing Roles

Degree Requirements

Doctor Of Nursing Practice (DNP)

MSN To DNP For Advanced Practice Nursing Roles Pathway (12 Courses, 36 Credit Hours)
A. DNP Core Courses - (8 Courses, 24 Credit hours)
B. DNP Residency Courses - (4 Courses, 12 Credit hours)

Course Requirements

DNP Core Courses - (8 Courses, 24 Credit Hours)
A. 24 Credit hours: NU 607, NU 608, NU 610, NU 611, NU 612, NU 613, NU 615, NU 616

DNP Residency Courses - (4 Courses, 12 Credit Hours)
A. 12 Credit hours: Adult-Gerontological Acute Care Nurse Practitioner: AHN 604, AHN 617, AHN 618, AHN 619
B. 12 Credit hours: Adult-Gerontological Primary Care Nurse Practitioner: AHN 693, AHN 694, AHN 695, AHN 696
C. 12 Credit hours: Adult-Gerontological Clinical Nurse Specialist: AHN 634, AHN 635, AHN 636, AHN 637
D. 12 Credit hours: Dual Role (Family NP/Adult-Gerontological Acute Care NP)
   Option a). Family NP: AHN 680, AH 681, AHN 682, AHN 683 or
   Option b). Adult-Gerontological Acute Care NP: AHN 670, AHN 671, AHN 672, AHN 673
E. 12 Credit hours: Dual Role (Family NP/Emergency NP): NU 680, NU 681, NU 682, NU 683
F. 12 Credit hours: Executive Nursing Administration: NU 661, NU 662, NU 663, NU 664
G. 12 Credit hours: Family Nurse Practitioner: CMN 680, CMN 681, CMN 682, CMN 683
H. 12 Credit hours: Neonatal Nurse Practitioner: MCN 674, MCN 675, MCN 676, MCN 677
I. 12 Credit hours: Nursing Informatics: NU 656, NU 657, NU 658, NU 659
J. 12 Credit hours: Pediatric Acute Care Nurse Practitioner: MCN 604, MCN 617, MCN 618, MCN 619
K. 12 hours: Pediatric Clinical Nurse Specialist: MCN 637, MCN 638, MCN 639, MCN 640
L. 12 Credit hours: Pediatric Primary Care Nurse Practitioner: MCN 654, MCN 655, MCN 656, MCN 657
M. 12 Credit hours: Psychiatric Mental Health Nurse Practitioner: CMN 604, CMN 617, CMN 618, CMN 619
N. 12 Credit hours: Public Health Administration: CMN 643, CMN 644, CMN 645, CMN 646
O. 12 Credit hours: Women's Health Nurse Practitioner: MCN 644, MCN 645, MCN 646, MCN 647

Subspecialties (8-11 Credit Hours)

Subspecialties are elective courses students may add to the degree program.

A. 11 Credit hours: Addictions Nursing: HSC 580, HSC 581, HSC 582, NU 510, NU 511, NU 512 May be added to any concentration.
B. 9 Credit hours: Advanced Forensic Nursing: NU 500, NU 501, NU 502, NU 503, NU 504, NU 505 May be added to any concentration.
C. 8 Credit hours: Cardiovascular: AHN 630, AHN 631, AHN 632, AHN 633 May be added to Adult-Geron Acute NP, Dual Role (Family NP/Adult-Geron Acute Care NP), and Dual Role (Family NP/Emergency NP).
D. 8 Credit hours: Clinical Lipidology: HSC 595, HSC 596, HSC 597, HSC 598 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), and Women's Health NP.
E. 15 Credit hours: Emergency Nurse Practitioner: NU 570, NU 571, NU 572, NU 573, NU 574, NU 575, NU 576, NU 577 May be added to Family NP, Dual Role (Family NP/Adult-Geron Acute Care NP), Dual Role (Family NP/Emergency NP), or taken as a Post Graduate Certificate if already Family NP certified.
F. 11 Credit hours: Nurse Educator: NU 620, NU 621, NU 622, NU 623 May be added to any concentration.

G. 9 Credit hours: Palliative Care: AHN 530, AH 531, AHN 532, AHN 533 May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), Psychiatric Mental Health NP, and Women’s Health NP.

Elective Courses - (1-3 Credit Hours)
A. 1 Credit hour: NU 509
B. 3 Credit hours: NU 597

Additional Information

Doctor Of Nursing Practice Degree Program
The Doctor of Nursing Practice (DNP) is a professional degree and prepares graduates to provide the most advanced level of nursing care for individuals and communities. This includes the direct care of individual patients, management of care for individuals and populations, administration of health care and nursing systems, and the development and implementation of health policy. The program is designed to be in compliance with The Essentials of Doctoral Education for Advanced Nursing Practice as put forth by the American Association of Colleges of Nursing.

The College of Nursing has several pathways, specialization, and sub-specialization options within the DNP program. The pathways include the MSN to DNP for Advanced Nursing Practice roles, MSN to DNP adding a new advanced practice certification area, MSN to DNP Clinical Nurse Leader Bridge to Executive Nursing Administration, and the BSN to DNP.

Areas Of Specialization
Several concentration areas are offered to meet the career goals of students. Available Nurse Practitioner options include Adult-Gerontological Acute Care Nursing, Adult-Gerontological Primary Care Nursing, Dual Role (Family Nursing/Adult-Gerontological Acute Care Nursing), Dual Role (Family Nursing/Emergency Nursing), Family Nursing, Psychiatric Mental Health Nursing, Neonatal Nursing, Pediatric Acute Care Nursing, Pediatric Primary Care Nursing, Women’s Health Nursing. Clinical Nurse Specialist is available in Adult-Gerontological Nursing. Concentrations are also available for students pursuing careers in Executive Nursing Administration, Nursing Informatics, and Clinical Nurse Leader Bridge to DNP Executive Nursing Administration. Emergency Nursing is offered only as a post-graduate certificate. Sub-specializations are available in Advanced Forensic Nursing Care, Cardiovascular, Clinical Lipidology, Nursing Addictions, Nursing Education, and Palliative Care.

Doctor Of Nursing Practice Program Learning Outcomes
Upon completion of the Doctor of Nursing Practice program, graduates should be able to:

1. Assume organizational and system leadership in the analysis, delivery, and management of nursing care.
2. Implement the highest level of advanced nursing care to produce high-quality, cost-effective outcomes for diverse patient outcomes.
3. Use theories, concepts, and analytic methodologies to design, implement, and evaluate practice by applying evidence to transform nursing systems.
4. Contribute to the knowledge of best-practices and dissemination of outcomes through professional writing and presentations.
5. Develop practice standards based on the integration of ethics and evidence-based nursing care.
6. Build interdisciplinary professional collaboration through leadership and mentorship.

MSN TO DNP FOR ADVANCED NURSING ROLES PATHWAY
The DNP curriculum consists of 36 Credit hours for the student holding a Master of Science in Nursing degree with preparation in an area of advanced practice nursing. Students who graduated with an MSN from the University of South Alabama College of Nursing and completed the following courses NU 607, NU 608, NU 610, and NU 613 during the MSN coursework may complete the DNP program with an additional 24 Credit hours if the previous coursework is within the seven year limit. The MSN to DNP program can be completed in four semesters of full-time study. Full-time study is defined as six or more Credit hours per semester. Permission to take more than 12 Credit hours per semester must be obtained from the Associate Dean of Academic Affairs. Part-time study is also available.

The program must be completed in five years of matriculation for the MSN to DNP for Advanced Practice Nursing Roles Pathway.

Course work for the MSN to DNP program is offered completely on-line. Students are not required to come to campus during the MSN to DNP program. Electives can be taken but are not required. The program does not require a thesis or dissertation;
however, students are required to complete a major synthesis project that results in a quality improvement change and has a substantial effect on health care outcomes. Residency requirements for the synthesis project can be completed in the student's home region with an approved mentor.

Admission Criteria
To be considered for admission to the DNP program, the applicant must meet the following requirements:

1. Citizen or Permanent Resident of the United States of America.
2. Current registered nurse licensure with no restrictions. Nurses with any restrictions on their license, including participation in a voluntary disciplinary alternative program, cannot be admitted.
3. Prior to enrolling in nurse practitioner clinical courses, students are required to have at least 2 years of experience in an area appropriate to their specialty.
4. Applicants to the MSN to DNP pathway must have a minimum GPA of 3.0 on all MSN work (A=4.0).
5. MSN degree must be from a regionally accredited institution.
6. Students must be in good standing with all academic institutions/nursing programs that they have attended in order to be admitted to the DNP program.
7. Submission of Health Data Forms and evidence of health insurance required upon admission.
8. Admission will be contingent on a negative drug screen and results of an acceptable background check.

Application Procedures
Admission to the program is limited and selective. Application forms and other information may be obtained from the College of Nursing's website at https://www.southalabama.edu/colleges/con/dnp/dnpapplic.htm or by contacting the college directly at College of Nursing, University of South Alabama, Mobile, Alabama 36688; condnpadmit@southalabama.edu; Telephone: (251) 445-9400.

1. Admission to the program is limited and selective.
2. Completion of Primary and Suplemental Applications is required.
   a. Primary Application submitted through Nursing Centralized Application System (NursingCAS) at www.NursingCAS.org. Official transcripts of all college and university studies, regardless of the outcome of enrollment, must be sent directly from the home institution to the NursingCAS. These documents become the property of the NursingCAS and will not be returned to the applicant. Applicants are responsible for any fees required by NursingCAS for their services.
   b. Supplemental Application submitted directly to the DNP Office at the USA College of Nursing. This application requires a non-refundable processing fee of $100.00, a Personal Goal Statement, and a résumé /CV documenting clinical experience.
3. Students are admitted to a specialty track and may not change their track without permission.

Application Deadlines
Applications are accepted three times a year, and must adhere to the following application deadlines:

• Fall Semester Deadline is February 15
• Spring Semester Deadline is July 15
• Summer Semester Deadline is December 15

Academic Progression Policy
Students in the MSN-DNP for Advanced Practice Nursing Roles program must meet the following requirements to progress in the program:

1. Maintain an overall GPA of 3.0. Any term in which a graduate student drops below a 3.0 Program GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 Program GPA or be dismissed.
2. Students in these programs can have a maximum of one “C.” A student earning a second “C” or lower will be academically dismissed from the program.
3. A student earning one grade of “F” in the program will be academically dismissed.
4. The final outcome of the DNP Project Planning and Development course and the Progression course is “Successful/Unsuccessful.” Students receiving two grades of “U” in these courses will be academically dismissed.
5. Failure to show good ethical and moral character including but not limited to any of the following may result in dismissal from the program: (a) conviction of a crime, (b) disciplinary action against a nursing license in Alabama or any other state,
(c) positive drug test, (d) adverse background check, or (e) disruptive behavior, including online behavior. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours of any of the above stated incidents.

6. All students must notify the Associate Dean for Academic Affairs or the Dean of the College of Nursing immediately or no later than 48 hours following an arrest. Failure to report an arrest may result in removal from the program.

7. All students are subject to testing for controlled substances and must submit to random drug testing as requested. A positive test or refusal to submit to testing will result in removal from the program.

8. All students are subject to a background check and must submit to additional background checks as requested. An adverse finding or refusal to submit to a background check may result in removal from the program.

9. A student who has been academically dismissed is not eligible for readmission to the DNP program and is not eligible for admission to the MSN program.

DNP Residency Coursework Policy

The DNP Residency Coursework includes the DNP Project Planning and Development, Residency I, Residency II, and Residency III. Students who do not meet all requirements in a course must complete a DNP Progression Course prior to moving forward with the next course in the DNP Residency progression.

Scientific Review Committee Policy

The DNP project will be reviewed by the USA College of Nursing DNP Scientific Review Committee to evaluate rigor and feasibility. The review process will occur during Project Planning and Development. The DNP project must be reviewed by the Scientific Review Committee before enrolling in Residency I.

Graduation Information

The program must be completed in five years of matriculation for the MSN to DNP for Advanced Practice Nursing Roles Pathway. Each candidate for the Doctor of Nursing Practice degree must submit an application for the degree the semester preceding their anticipated graduation through the Registrar’s Office. See the University Calendar for specific deadlines. Deadlines for each semester application are located on the Registrar’s website at

Nursing Subspecialty Options

Degree Requirements

The following subspecialties can be added to specific APRN pathways as designated:

1. Addictions Nursing (11 Credit Hours): HSC 580, HSC 581, HSC 582, NU 510, NU 511, NU 512
   May be added to any concentration.
2. Advanced Forensic Nursing (9 Credit Hours): NU 500, NU 501, NU 502, NU 503, NU 504, NU 505
   May be added to any concentration.
3. Cardiovascular (8 Credit Hours): AHN 630, AHN 631, AHN 632, AHN 633
   May be added to Adult-Geron Acute NP, Dual Role (Family NP/Adult Geron Acute Care NP), and Dual Role (Family NP/Emergency NP).
4. Clinical Lipidology (8 Credit Hours): HSC 595, HSC 596, HSC 597, HSC 598
   May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Adult-Geron Acute NP), and Women's Health NP.
5. Nurse Educator (11 Credit Hours): NU 620, NU 621, NU 622, NU 623
   May be added to any concentration.
6. Palliative Care (9 Credit Hours): AHN 530, AHN 531, AHN 532, AHN 533
   May be added to Adult-Geron Primary Care NP, Adult-Geron Acute NP, Adult-Geron CNS, Family NP, Dual Role (Family NP/Adult-Geron Acute NP), Dual Role (Family NP/Emergency NP), Psychiatric Mental Health NP, and Women’s Health NP.

Department of Occupational Therapy website
http://www.southalabama.edu/colleges/alliedhealth/ot

Occupational Therapy is a health care profession devoted to providing skilled treatment that helps individuals achieve independence in all aspects of their lives. Occupational therapists work with persons with acute and chronic physical, psychosocial, mental and developmental disabilities. An occupational therapist may aid in the growth and development of premature babies; create a learning environment for physically and mentally challenged children; adapt home environments for persons with stroke, cerebral palsy, spinal cord injury and other disabilities; or create activities that are designed to restore mental health for persons with emotional, mental, or substance abuse problems. Occupational therapy focuses on "skills for the job of living" which includes all of the necessary skills for individuals to "live life to its fullest" and lead independent and satisfying lives.

The Master of Science degree program in Occupational Therapy (MSOT) is an entry-level professional program designed to enable the student to develop advanced critical reasoning skills and to prepare the graduate for professional practice in a variety of settings. Graduates will also have the capability of assuming responsibilities in the areas of administration, program development, consultation and research in occupational therapy.

The program consists of 95 semester hours and is seven consecutive semesters in length. This includes 24 weeks of full-time Level II Fieldwork as required by accreditation standards. Level II Fieldwork is available in a variety of medical and community sites representing a diverse range of learning opportunities for students. All Level II Fieldwork must be completed within 12 months following completion of academic requirements.

The program is designed to accommodate applicants who have a baccalaureate degree in another field.

Criteria For Admission

MSOT Program

A new class of MSOT students begins each year in the fall semester. Applications are available in July each year for fall of the following year. Selected applicants, who meet all academic admission requirements, may be invited for an interview. Students offered admission may choose to guarantee a seat by submitting a matriculation fee (applied toward tuition) or be placed on the alternate list. All students accepted to the program must complete a criminal background check. Admission is contingent on the background check being clear of criminal charges. Admissions information is available on the Occupational Therapy Department website with instructions.

Incoming Fall Term 2022

The candidate is expected to satisfy the following minimum requirements:

- Baccalaureate degree from an accredited college or university earned by May 2022
- Applicants must have a minimum 3.0 (A=4.0) overall cumulative GPA. Minimum 3.0 GPA OT prerequisite courses.
- GRE scores on the verbal and quantitative sections, and the analytical section reported from the same test date is required.

You may not mix/match scores from different exam attempts.

GRE scores must have been taken within the past 5 years. No minimum scores required.
Applicants must have a minimum grade of “B-” in each of the OT prerequisite courses (see list below).

International students must meet the minimum requirements for admission and apply to the University Office of International Services with certified translations of transcripts at least 60 days prior to applying to the occupational therapy program. International coursework must be evaluated by the USA Office of International Services to verify equivalency to USA courses. International applicants must have a TOEFL score = 100 on Internet based tests, OR ITEP Academic = 4.9, OR IELTS = 7.5, OR PTE Academic = 75. Applicants who hold a bachelor’s degree from an accredited U.S. institution are not required to submit TOEFL results.

Completion of OTCAS Application with all required documents including official transcripts and course verification
Completion of USA Supplemental Application and payment
Prerequisite Courses Required for all applicants
Developmental (life span) psychology (PSY 250)
Abnormal psychology (PSY 340)
Statistics (ST 210)
**Anatomy & physiology I (BMD 251)
**Anatomy & physiology II (BMD 252)
**Kinesiology (biomechanics) preferred / or physics with algebra/trigonometry (KIN 380 or PH 114)
** These prerequisite courses must be taken no more than ten years prior to submitting your application.

AP credit and CLEP scores are not accepted for any of the prerequisite courses.

Fall review of qualified applicants- OTCAS deadline for materials is Sept. 17, 2021
Spring review of qualified applicants- OTCAS deadline for materials is Jan. 21, 2022
Selected applicants will be invited for an interview as part of the application process.

In order to be considered for admission to the MSOT program at USA, students should submit to OTCAS
Completed USA OT Supplemental Application which will be uploaded in the documents section;
Pay the $75 non-refundable supplemental application fee and upload the receipt in documents;
Upload required documents (transcripts, etc..) in OTCAS
GRE scores submitted to OTCAS by deadline
Complete the OTCAS application process
Have transcripts verified by OTCAS. Please note that the OTCAS verification process may take 4-6 weeks.

Transcripts submitted must demonstrate completion of a minimum of 4 of the prerequisite courses at time of application.

The student must be able to complete the last two courses during the semester of application. (for example, to apply for Fall, you must have 4 completed prerequisite courses with grades on transcripts, and you will complete the last two required courses by December. If you still have courses to take in the Spring, you can not apply until Spring.)

Additional Requirements
1. Occupational Therapy is a full-time graduate program that provides scientific evidence and clinical education needed for clinical practice. Course work and clinical fieldwork placements are full-time in nature. Students must be able to manage full-time clinical placements which are scheduled both on weekdays and weekends, between semesters and within semesters, not always following the academic calendar. Students should have the resources to commute to clinical placements that are not local to the Mobile area.
2. Students matriculating into and within Occupational Therapy will be required to have continuous health coverage and provide documentation of this throughout the program of study. Students are responsible for the cost of this health insurance coverage.
3. Students matriculating into and within Occupational Therapy will be required to complete background checks, drug screens, immunizations, and specific trainings at various times within the program and clinical fieldwork placements. We are unable to accept students into the clinical programs that are unable to sit for the NBCOT exam or achieve licensure in the US. Students are responsible for the costs of these.

4. Students will not be required to have observation hours due to COVID-19 at time of application, however, you may be required to complete observation or complete an additional assignment prior to start of OT classwork as part of your matriculation requirement.

5. Selected applicants will be invited to participate in an interview as part of the application process.

This will be a rolling application process with deadlines in Fall 2021 and Spring 2022.

Admissions Information And Instructions

All applicants who have met the prerequisite requirements and wish to apply to the Master of Science in Occupational Therapy program at University of South Alabama must complete and/or submit the following items:

1. OTCAS application completed by due date.
2. The Supplemental Application must be uploaded to OTCAS by due date.
3. A $75.00 non-refundable USA OT Dept. application fee with copy of your receipt must be uploaded to the OTCAS application by due date.
4. GRE scores: All applications must submit official report of GRE scores by due date directly from the testing service to the OTCAS code: 2109. Verbal, Quantitative, and Analytical Writing sections are utilized. GRE scores must have been taken within the past 5 years.
5. Official Transcripts from all colleges and universities attended should be sent directly to OTCAS and updated upon completion of degree requirements.
6. The Department of Occupational Therapy will not process any application that is incomplete (for any items noted above) or that is not submitted by the deadline.
7. Preference MAY BE shown to Alabama residents, however, highly qualified out-of-state applicants whose academics and experiences indicate that they may be a success in both the program and the OT profession will be given the same consideration as residents. Residency and tuition information.
8. Students accepted to the program must submit completed health and physical forms to include required immunizations for completion of their matriculation package. Accepted students must also read, sign, and submit the Core Performance Standards document outlining fundamental tasks of which applicants should be capable upon entering the OT program.
9. Acceptance into the MSOT program is provisional pending a clear background check, submission of required medical forms, and completion of bachelor’s degree.
10. Acceptance into the MSOT program is provisional pending completion of any additional required prerequisite courses with a grade of “B-” or better and submission of required medical forms as supplied in the acceptance packet. Failure to make a grade of “B-” or better in any required prerequisite course will result in a nullification of acceptance into the professional program. **Spring Semester 2020 only, courses listed as Pass in the Pass/Fail grading system or Satisfactory in the Satisfactory/ Unsatisfactory grading system will be accepted for prerequisite courses.
11. Accepted students must submit a $300 matriculation fee with the Statement of Intent to reserve a seat in the class. This fee is non-refundable and is applied to the student’s first semester tuition. Students offered admission may elect not to pay the matriculation fee and be placed on the alternate list.

More Information:

If you have further questions about the application process, please contact the OT Department:

Phone: (251) 445-9222

Email: otadmissions@southalabama.edu

**PLEASE NOTE: A record of criminal charges, including misdemeanor and felony charges, may result in denial of access to fieldwork sites, inability to sit for the NBCOT board exam, inability to obtain a state license to practice, and/or limit job opportunities.

ACOTE® Accredited Educational Programs

ACOTE® accredited occupational therapy and occupational therapy assistant educational programs satisfy the states’ educational requirements in all states, the District of Columbia, and Puerto Rico. Students graduating from an ACOTE® accredited occupational therapy and occupational therapy assistant educational program are eligible to take the National Board
for Certification in Occupational Therapy (NBCOT) certification exam and apply for licensure in all states, the District of Columbia, and Puerto Rico. For more information regarding state qualifications and licensure requirements, please refer to the AOTA State Licensure webpage.

**RSOT**

The Master of Rehabilitation Sciences in Occupational Therapy (RSOT) is aimed at providing students with rich, robust, clinically relevant, and evidence-based learning experiences. Graduates will have a strong understanding of entry-level and advanced clinical services, will utilize evidence-based research relevant to the field, demonstrate leadership skills that impact delivery of high quality care for patients, and develop skills needed to serve as a patient educator, clinical educator, or faculty member. This program is intended to support international clinicians and academicians wishing to gain further experience with a variety of disorders and principles of rehabilitation. This program is not accredited by the Accreditation Council of Occupational Therapy Education and does not lead to licensure or certification in the United States. Graduation from this program does not guarantee admission to a Master of Science in Occupational Therapy or Doctor of Occupational Therapy Program. Students enrolled in this program are not eligible for federal financial aid. Admission to the RSOT program is on a competitive basis. For admissions information, visit the department’s website.

The RSOT program is an in-residence program requiring 30 credit hours. The program runs August to July and is divided into three semesters (Fall, Spring and Summer).

The admissions paperwork and requirements for the Master of Rehabilitation Sciences – Occupational Therapy (RSOT) for international students are listed below.

- Completed International Application
- Bachelor’s Degree Certificate*
- Official Academic Records from an Accredited University*
- Test score meeting minimum English Proficiency Requirements
  - Minimum Duolingo: 95
  - Minimum TOEFL: 61
  - Minimum IELTS: 5.5
  - Minimum iTEP: 3.6
  - Minimum Pearson Academic: 44
- F-1 Affidavit of Financial Support
- Certificate of personal deposit
- Copy of passport

*Note that unofficial transcripts and scores may be submitted for admissions decisions. Official transcripts and scores are required prior to completion of the first semester of coursework.

Please send this paperwork to Ms. Deb Tittle, International Programs Admissions Coordinator, at dhtittle@southalabama.edu.

Expenses
Students admitted in the Occupational Therapy program will be charged a matriculation deposit of $300 required to secure a seat in the entering class. This amount is not refundable but will be applied towards tuition expenses after classes begin. Students should be prepared for extra expenses associated with professional studies including books, local travel to and from fieldwork sites and out-of-town travel and living expenses during Level II Fieldwork assignments. Special lab fees are assessed for the following courses:

Retention Policies In accordance with the Policies of the University of South Alabama Graduate School:

- A minimum overall 3.0 GPA on all work attempted in the student's specific program of study is required. A maximum of two courses with the grade of "C" may be counted toward a degree program.
- Any term in which a graduate student drops below a 3.0 GPA, the student is placed on probationary status and has a period of two terms to attain a 3.0 GPA or be dismissed from the Graduate School.

In addition, the following Departmental Retention Policies apply:

- Students in the Master of Science in Occupational Therapy degree program are required to achieve a minimum grade of "C" in each course in the occupational therapy curriculum. This minimum grade of "C" reflects only the letter grade since many courses will require an 80% or 90% competency in order to be considered passing level.
- A student who receives a grade below "C" will be academically dismissed.
- Any combination of nine (9) semester hours of grades of "C" in OT courses will result in academic dismissal.
- If for any reason a student must withdraw from the occupational therapy program, re-admission will require approval of the department chairperson and the Dean of the Pat Capps Covey College of Allied Health Professions.
- All occupational therapy coursework taken prior to Level II Fieldwork must be successfully completed with a grade of "C" or better and a minimum GPA of 3.0 in order for a student to be eligible to proceed with Level II Fieldwork.
- Level II Fieldwork will be graded as Pass/Fail using the criterion scores developed by the American Occupational Therapy Association. A student will be allowed to withdraw from fieldwork, without penalty, under special circumstances, for example, a serious illness/newly acquired disability. Withdrawal from Level II Fieldwork requires the recommendation of the Academic Fieldwork Coordinator and the permission of the Department Chairperson. All repeat fieldwork experiences must be completed within one year.
- If a student fails a Level II Fieldwork course (OT 550, OT 555), a "U" or unsatisfactory will be recorded as the grade. IF the student is permitted to repeat the Level II Fieldwork course, the student may be required to complete remediation tasks prior to repeating the course. The Academic Fieldwork Coordinator will schedule the repeated fieldwork at the earliest available time, but no later than 12 months following completion of all other academic requirements. A student failing to satisfactorily complete two out of three attempts of the 12-week fieldwork placements (OT 550, OT 555) shall be dismissed from the program.

Note: In some semesters, courses may not start and/or finish during the regular University beginning and ending dates for the semester. For example, one course may start at the beginning of a semester and finish at the semester midpoint, while another course starts at the midpoint of the semester and finishes at the semester's end. Accreditation: The Department of Occupational Therapy MSOT Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, Suite 200, Bethesda, MD 20814. ACOTE's phone number is (301) 652-6611 (x2914). Graduates of the program will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). Most states require licensure in order to practice; however, state licenses are usually based on the results of NBCOT Certification Examination. A felony conviction may adversely affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure.

Clinical fieldwork placements will be provided, as safely available, to our students and may require variations in dates for starting and for completion of the clinical rotations. In addition, simulation may be utilized for the completion of level I fieldwork.

Philosophy

Department Information

Department of Philosophy website
http://www.southalabama.edu/philosophy

Undergraduate Studies

Through reasoned reflection, philosophy seeks to understand human experience in all its various aspects. Courses examine the moral, social, political, aesthetic, and religious dimensions of human existence, topics in special fields such as science, and the historical development of philosophy. In these courses students can develop skills in the presentation, interpretation, analysis, and evaluation of differing viewpoints, and refine their own beliefs about deeply important issues. Philosophy majors can choose from three concentrations: Philosophy, Religion, or Classics.

General Education Requirements For Philosophy Majors

General Education Requirements for Philosophy are specified on the College of Arts and Sciences section.

All first-time freshmen must successfully complete CAS 100: First Year Experience as a degree requirement. Students must enroll during their first term at USA, except for summer-entry students who must enroll in the fall semester following entry. PHL 461 will fulfill the technology proficiency requirement for Philosophy majors.

Philosophy Majors can now fulfill the Minor requirement by taking one of the other concentrations offered.

- Majors concentrating in Classics can fulfill the Minor requirement by using Philosophy or Religion concentration.
- Majors concentrating in Philosophy can fulfill the Minor requirement by using Religion or Classics concentration.
- Majors concentrating in Religion can fulfill the Minor requirement by using Philosophy or Classics concentration.

Graduate Studies

Although the Department of Philosophy has no graduate program, graduate-level courses are offered for those students who need such work.

Minor In Classics

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

A minimum of 18 hours must be taken in approved Classics course listings. No more than two 100-level courses may count towards the Classics minor. The minor is interdisciplinary in nature and cross-listed course offerings may be used outside of Classics (CLA) discipline. Students minoring in Classics must fulfill the Foreign Language requirement by taking either 2 semesters of Latin or 2 semesters of Ancient Greek.

Philosophy Majors can now fulfill the Minor requirement by taking one of the other concentrations offered.

• Majors concentrating in Classic can fulfill the Minor requirement by using Philosophy or Religion concentration.
• Majors concentrating in Philosophy can fulfill the Minor requirement by using Religion or Classics concentration.
• Majors concentrating in Religion can fulfill the Minor requirement by using Philosophy or Classics concentration.
Minor In Philosophy

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

A minimum of 18 semester hours in Philosophy, to include a logic course (PHL 121 or 321). At least nine hours must be taken in residence. No more than two 100-level courses may be counted toward the minor.

Philosophy Majors can now fulfill the Minor requirement by taking one of the other concentrations offered.

- Majors concentrating in Classic can fulfill the Minor requirement by using Philosophy or Religion concentration.
- Majors concentrating in Philosophy can fulfill the Minor requirement by using Religion or Classics concentration.
- Majors concentrating in Religion can fulfill the Minor requirement by using Philosophy or Classics concentration.
Minor In Philosophy And Medicine

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

All Philosophy and Medicine minors must take 18 credit hours, including the following three courses (9 credit hours), in no particular order:

• PHL 220: Medical Reasoning
• PHL 240: Classical Philosophy
• PHL 333: Biomedical Ethics

Philosophy and Medicine minors must take an additional 9 hours in Philosophy, with at least 2 courses at the 300/400 level. Students are especially recommended to take some of the following: PHL 245 Renaissance/Enlightenment; PHL 321 Symbolic Logic; PHL 327 Philosophy of Science; PHL 431 Advanced Ethical Theory; PHL 441 Theory of Knowledge.
Minor In Religion

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

A minimum of 18 hours must be taken in approved course listings. No more than two 100-level courses may count towards the minor. The minor is interdisciplinary in nature and cross-listed course offerings may be used outside of Religion (REL) discipline. A minimum of 9 hours of coursework must be taken at the 300 and/or 400 level at the University of South Alabama.

Philosophy Majors can now fulfill the Minor requirement by taking one of the other concentrations offered.

• Majors concentrating in Classic can fulfill the Minor requirement by using Philosophy or Religion concentration.
• Majors concentrating in Philosophy can fulfill the Minor requirement by using Religion or Classics concentration.
• Majors concentrating in Religion can fulfill the Minor requirement by using Philosophy or Classics concentration.
Philosophy (BA) Classics Concentration

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Course, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136).

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (30 Hours)**

**Philosophy (BA) Classics Concentration (5 Courses, 15 Hours)**

A. 15 hours: PHL 120, CLA 240, PHL 245, PHL 321, PHL 461

B. 15 hours from: 3 additional Classics (CLA) courses at 300 or 400 level, 2 additional Classics (CLA) courses at any level, Fulfill Foreign Language Requirement by taking 1 year of Latin or 1 year of Ancient Greek

**Minor Requirements (18-24 Hours)**

A minor is required for this degree program

**Notes:**

**Additional Information**

PHL 240 and PHL 245 do not have to be taken in sequence and should be taken early in the major. Credit for PHL 499, Honors Thesis, is only given as an addition to the hours required for the major.

**Graduation Plan**

**Philosophy (BA) : Classics Concentration (30 Total Hours)**

111, LGS 131, LGS 141, LGS 142, LGS 161, LGS 162, LGS 171, LGS 172, LGS 175, LGS 181, LGS 182, LGS 201, LGS
110, PHL 120, PHL 121, PHL 131, PHL 231, PHL 240, REL 100, REL 200, REL 201

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122
& BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L,
GEO 102 & GEO 102L, GEY 111 & GEY 111L, GEY 203, MAS 101, MTH 101, MTH 102, MTH 201 & MTH 201L,

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101,
HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:

   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 &
   LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142,
   LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172,
   LGS 181 & LGS 182

   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and
   Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another
   test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who
   pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete
   only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.
B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:

   AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101
   & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L,
   GEY 111 & GEY 111L, GEY 112 & GEY 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136).

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (30 Hours)**

**Philosophy (BA) Philosophy Concentration Core (5 Courses, 15 Hours)**

A. 15 hours: PHL 120, PHL 240, PHL 245, PHL 321, PHL 461

B. 15 hours from: 3 additional Philosophy (PHL) courses at the 300 to 400 level, with at least one being either PHL 431 or PHL 441, and 2 additional PHL courses at any level, PHL 321

**Minor Requirements (18-24 Hours)**

A minor is required for this degree program

**Notes:**

**Additional Information**

PHL 240 and PHL 245 do not have to be taken in sequence and should be taken early in the major. Credit for PHL 499, Honors Thesis, is only given as an addition to the hours required for the major.

Philosophy (BA) Religion Concentration

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:

   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136).

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (30 Hours)**

**Religion Concentration Core (5 Courses, 15 Hours)**

A. 15 hours: PHL 120, PHL 240, PHL 245, PHL 321, PHL 461  
B. 15 hours from: 3 additional Religion (REL) courses at the 300 or 400 level and 2 additional Religion (REL) courses at any level.

**Minor Requirements (18-24 Hours)**

A minor is required for this degree program

**Notes:**

* Recommended Course

**Additional Information**

PHL 240 and PHL 245 do not have to be taken in sequence and should be taken early in the major. Credit for PHL 499, Honors Thesis, is only given as an addition to the hours required for the major.

**Graduation Plan**

**Philosophy (BA) : Religion Concentration (30 Total Hours)**

Department of Physical Therapy website
https://www.southalabama.edu/colleges/alliedhealth/pt

A physical therapist, also called a PT, is a healthcare professional who provides direct patient care to persons who have disorders of movement, mechanical, physiological and developmental impairment and functional limitations, whether caused by injury, disease, or pain to help them achieve maximum physical function and mobility. Physical therapists have the necessary training to meet the total range of primary patient care responsibilities involved in preventing disabilities and promoting restoration of function to the physically impaired, including musculoskeletal, neuromuscular, cardiovascular/pulmonary and integumentary disorders that interfere with physical function. The Physical Therapist performs an examination and then uses clinical reasoning to plan and implement patient-centered PT intervention. Physical Therapists practice in rehabilitation centers, private practices, hospital-based and outpatient-based centers, home health care, sports medicine centers, school systems, and in universities to restore movement and function.

As its mission: The Department of Physical Therapy is: "Committed to high quality education, promoting and generating scholarship, and engaging in local to global service."

DPT, University of South Alabama
MD, University of South Alabama

WHITE, LAURA W.
Assistant Professor
BS, Baylor University
MS, Univ of Alabama-Birmingham
DSCPT, Univ of Alabama-Birmingham
Physical Therapy (DPT)

Degree Requirements

The degree offered by the department is the Doctor of Physical Therapy (DPT), designed as a first-professional degree for students who want to enter the physical therapy profession.

The entry-level Doctor of Physical Therapy (DPT) program consists of eight consecutive semesters of full-time professional graduate study. The curriculum plan, by semester, of courses required once admitted to the DPT program can be found on the department website: http://www.southalabama.edu/colleges/alliedhealth/pt/courses.html. The DPT is a clinical doctorate degree, not a research degree, and is awarded after successful completion of the prescribed sequence of 121 semester hours (listed below) including classroom and clinical laboratory coursework and 34 weeks of full-time physical therapy internships. As an entry-level program, the DPT is designed as a first PT degree and is not appropriate for students who already hold a PT degree. The goals and objectives of the program are guided by the criteria and guidelines set forth by the Evaluative Criteria for Accreditation of Educational Programs for the Preparation of Physical Therapists (Commission on Accreditation in Physical Therapy Education). Graduates of the program are eligible to take the National Physical Therapy Exam for licensure.

The program begins each year in the Fall semester. The application deadline for Fall semester is December 1st of the previous year. All applicants must apply through the Physical Therapy Centralized Application Service (PTCAS) http://www.ptcas.org/ptcas/public/Listing.aspx?seqn=405&navid=10737426783 and submit a supplemental application and supplemental application fee directly to the PT department. International Students should carefully review earlier deadlines and additional requirements listed after Minimal requirements for all applicants (see below).

DPT Early Acceptance Program (DPTEAP)

The DPT Early Acceptance Program (DPTEAP) allows for some highly qualified high school seniors who meet the qualifications to gain early provisional acceptance to the graduate program prior to starting college. Details are described in the Early Acceptance Program section of the Office of Admissions website at http://www.southalabama.edu/departments/admissions/earlyacceptance/index.html

In addition, a link to the application for this program is also found on this webpage and the "Special Programs" section of the Office of Admissions Website. The application deadline for this program is February 1 of the senior year in high school.

Regular Graduate Applicants

It is required that applicants complete a bachelor's degree prior to starting the PT program. These applicants must hold a bachelor's degree (or be able to complete the degree prior to starting the PT program) in any field from a regionally accredited college or university and complete all prerequisites for regular graduate admission as listed below with a GPA > 3.00. These applicants may apply by December 1st if they will complete their bachelor's degrees before the upcoming Fall semester.

Minimum Requirements For All Applicants

1. The applicant must meet all applicable requirements including prerequisites.
2. Graduate Record Exam (GRE) scores must be officially reported to the University of South Alabama Office of Admissions by December 1st (use institution code 7799). The GRE must have been taken within the last 5 years. Verbal, Quantitative and Analytical Writing sections will be utilized.
3. Regular Graduate applicants must have a minimum 3.0 (A=4.0) overall grade point average (GPA).
4. All applicants must have a minimum grade of "C" in each of the prerequisite courses.
5. Observation or work experience in Physical Therapy (50 hours minimum) under the supervision of a licensed Physical Therapist must be documented and submitted to PTCAS.
6. Applicants may only have a maximum of 2 science course prerequisites remaining by the application deadline. The remaining prerequisites must be completed in the spring and summer prior to the start of the program.

International applicants must have a TOEFL score = 600 (250 on computer based or 100 on Internet based tests), TSE = 60 and TWE = 4.5 and must submit the following to the Department of Physical Therapy by October 15 of the year prior to admission: TOEFL score, official transcripts with certified translations of transcripts, supplemental application and non-refundable supplemental application processing fee of $75.00. In addition, international students must submit PTCAS application
and official GRE scores by December 1st. Materials being sent by mail carrier must be postmarked NO later than December 1st. This DPT program is not ideal for students who already have a physiotherapy degree.

NOTE: If selected for interview, the applicant must achieve a satisfactory interview score, and if accepted into the program, must submit a health form and physical examination which includes required immunizations.

**Program Prerequisites**

(For Optimal Preparation, On-line Science Labs Are Discouraged)

Prerequisites Required For All Applicants:

- English Composition (2 courses)
- Social Sciences (3 courses–at least two of which must be Psychology)
- Precalculus Algebra/Trigonometry or Higher Mathematics (1 course)
- Statistics (1 course)
- College Physics - with labs (2 semester or 3 quarter sequence)
- General Chemistry for science majors - with labs (2 semester or 3 quarter sequence)
- General or Cell Biology for science majors - with labs (2 semester or 3 quarter sequence)
- Human Physiology, OR a course sequence in Anatomy and Physiology (minimum 6 credits). Human Physiology is preferred.

\[a\] For all prerequisite courses, credit older than ten years from the application deadline must be repeated or validated by examination or other appropriate mechanism.

\[b\] Botany may not be used to satisfy this prerequisite.

Electives should be concentrated in a back-up major of the student's choice.

**Essential Functions**

Core Performance Standards, which are fundamental tasks that must be performed to successfully complete the program, have been outlined and are available upon request from the program and on the department website.

**Expenses**

Students admitted in the Physical Therapy program will be charged a matriculation deposit of $300 required to secure a seat in the entering class. This amount is not refundable but will be applied towards tuition expenses after registration.

Students should be prepared for extra expenses (estimates available on the website) associated with professional studies including books, local travel to and from clinical facilities and for out-of-town travel and living expenses during the 34 weeks of clinical internship in the first year and the final year. It is highly recommended that students have a laptop computer. Special lab fees are assessed for the following courses:

<table>

</tr>
</tbody>
</table>
A Resource Fee of $133/semester is charged to all health professions students.
A $25.00 professional liability fee is assessed annually ($12.00 each in fall and spring and $1.00 in summer).

Scholarships

The Department of Physical Therapy currently has eight scholarships that are awarded to students after admission to the program, in year-1, year-2 and year-3. These scholarships are listed on the department webpage.

Accreditation And Licensure

The entry-level Doctor of Physical Therapy program at the University of South Alabama is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). 1111 N. Fairfax Street, Alexandria, VA 22314; Telephone: (703) 706-3245; Web site: http://www.capteonline.org; E-mail: accreditation@apta.org;

Graduates of the program are eligible to sit for the National Physical Therapy Examination (NPTE) to gain licensure. Applicants are hereby informed that a history of felony conviction, use of drugs or intoxicating liquors, which affects professional competence, or narcotic law conviction will prevent physical therapy licensure.

See Alabama Board of Physical Therapy site: http://www.pt.alabama.gov/

DPT Curriculum Sequence

Doctor of Physical Therapy (DPT)

After admission, the Doctor of Physical Therapy (DPT) degree requires the following course sequence to complete the professional degree:

Physical Therapy (MS)

Degree Requirements

The Department of Physical Therapy offers a Master of Sciences in Physical Therapy aimed at providing students with rich, robust, clinically relevant, and evidence-based learning experiences. Graduates will have a strong understanding of entry-level and advanced clinical services, will utilize evidence-based research relevant to the field, demonstrate leadership skills that impact delivery of high quality care for patients, and develop skills needed to serve as a patient educator, clinical educator, or faculty member. This program is intended to support international clinicians and academicians wishing to gain further experience with a variety of disorders and principles of rehabilitation. This program is not accredited by the Accreditation Council of Physical Therapy Education and does not lead to licensure or certification in the United States. Graduation from this program does not guarantee admission to a Doctor of Physical Therapy Program. Students enrolled in this program are not eligible for federal financial aid. Admission to the MSPT program is on a competitive basis. For admissions information, visit the department’s website.

The MSPT program is an in-residence program requiring 30 credit hours. The program runs August to July and is divided into three semesters (Fall, Spring and Summer).

The MSPT program requires the following coursework:

**Physician Assistant Program Master Of Health Science Degree**

**What Is A Physician Assistant?**
Physician Assistants (PAs) are highly skilled nationally certified and state-licensed medical professionals who practice medicine on healthcare teams with physicians and other members of the health professions. The quality and value of the services they provide is well recognized in virtually all medical and surgical specialties and subspecialties to include: physicians practices (private and group, institutional settings, correctional institutions, rural and urban community health centers, the uniformed services and other federal government agencies, nursing homes, schools and other university-based facilities and retail clinics.

Physician Assistants take medical histories, perform physical examinations, order and analyze diagnostic data (i.e. laboratory and imaging studies), and perform major and minor therapeutic procedures. The Physician Assistant develops and implements a patient-centered treatment plan, to include appropriate decisions regarding referral and interprofessional collaboration with other members of the healthcare team. Physician Assistants prescribe medications in all 50 states, the District of Columbia and all U.S. territories, to include scheduled pharmaceuticals per State law.

Culturally appropriate patient education and counseling are important aspects of a physician assistant's daily activities. Physician Assistants advise patients concerning health promotion and disease prevention, with special emphasis on social determinants of health, health screenings, health disparities and health risk behaviors.

To perform at this level of responsibility, the education of Physician Assistants is provided by physicians and highly skilled physician assistants to assure patient-care functions provided by the Physician Assistant are equivalent in quality to those of the physician who delegates them.

**Mission, Vision, And Goals**

**Mission**
The mission of the University of South Alabama Physician Assistant Program is to educate compassionate and competent individuals from diverse backgrounds to become highly qualified physician assistants in accordance with the highest professional standards to provide a broad spectrum of preventative and curative health care to patients in various communities and clinical settings with physician supervision including underserved populations in Alabama both rural and urban. The emphasis of the program is one of primary care, including a broad foundation in the medical and surgical specialties.

**Vision**
The Physician Assistant Studies program curriculum is closely related to the goals of the University of South Alabama as well as to the degree. The program fosters an environment that promotes the acquisition and application of culturally sensitive, patient-oriented clinical knowledge and skills to produce a diverse workforce of primary care physician assistants who practice medicine with competence, professionalism, and compassion, driven by academic excellence and a spirit of service to the community.
Goals

The goals of the program are to:

1. Promote and support to provide PA education, emphasizing primary care to the residents of the State of Alabama, as well as those with a desire to serve rural and medically underserved communities within the State of Alabama;
2. Promote excellence in health care by preparing competent physician assistants to practice evidence-based medicine in all clinical settings, especially in Alabama;
3. Ensure opportunities for placement of qualified military veterans through participation as a PAEA Member Program offering assistance for veteran entry into physician assistant programs;
4. To recruit, select, and educate a highly qualified diverse student body, (to include underrepresented minorities, environmentally or economically disadvantaged, rural, racially, ethnically, culturally), and provide fair and equitable admission criteria;
5. Prepare physician assistant students to provide patient-centered health care services as part of an inter-professional, collaborative team in a variety of clinical settings;
6. Charge physician assistant students to become graduates who reflect high standards of legal, ethical, and moral conduct;
7. Foster the growth and development of PA education by preparing physician assistant graduates who possess depth of knowledge, clinical skills and abilities for excellence in practice;
8. Promote in our physician assistant students the importance of lifelong learning skills and ongoing professional development to meet and/or exceed contemporary standards within their area(s) of clinical practice.

</tr>
<tr>
<td>Class Type: On site, no on-line classes</td>
</tr>
<tr>
<td>Curriculum: 121 Credit Hours</td>
</tr>
</tbody>
</table>

Advanced Placement, Deceleration, Dismissal

The program does not offer advanced placement. Students can request a deceleration period after acceptance and matriculation into a cohort. Transfer credits or credit for experiential learning cannot be substituted for any course in the program, and no transfer credit is accepted from other PA programs. In addition, any grade below a C will result in academic dismissal from the program, and withdrawal from any course will automatically result in dismissal from the program.

Clinical Rotations

The program attempts for every student to have a well-rounded clinical experience, as best achieved through a variety of clinical sites. To maximize one's learning, students will rotate through academic health centers, military institutions and rural facilities in Mobile, Pensacola, and the Mississippi Gulf Coast. Rural rotations in Primary Care and Pediatrics are required. The program considers any rotation within 75 miles as commutable.

Employment

Program policies strictly prohibit the program, its academic and clinical affiliates and preceptors from employing any PA students, or utilizing them in lieu of administrative office or clinical staff while attending the program. PA students are also strongly discouraged from accepting any other employment while attending the program. Employment while in the program has the potential to negatively impact the student's rigorous PA training curriculum.

Measures Of Success

Please visit our website for information about the program's success at http://www.southalabama.edu/colleges/alliedhealth/pa/mission.html

Mandatory

Mandatory remediation will be required of any student who is in danger of not meeting the educational goals of the program as stated in student handbooks. The criteria for remediation are set in the “Goal” section below. The student's progress will be subsequently monitored to assure improvement in deficient areas, and future remediation will be arranged as needed.

The goal of the didactic remediation policy of the Department of Physician Assistant Studies is to remediate students who are not performing at the optimal level which is defined below:

1. An average of <80% on two consecutive examinations
2. A single score of <75%
3. A student cited for lack of professionalism
4. A score of <80% on an end of term grade
5. A failing score on a Clinical Skills Practicum

The goal of the clinical remediation policy is to remediate any student who is not performing at the optimal level during the clinical year. These are defined below:
1. An individual "Average" score or less on mid-rotation evaluation
2. End-of-Rotation exam scores < 65%
3. A grade of "C" on the final clinical rotation grade
4. A student cited for lack of professionalism

Accreditation
The Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) has granted Accreditation-Continued status to the University of South Alabama Physician Assistant Program sponsored by the University of South Alabama. Accreditation-Continued is an accreditation status granted when a currently accredited program is in compliance with the ARC-PA Standards.

Accreditation remains in effect until the program closes or withdraws from the accreditation process or until accreditation is withdrawn for failure to comply with the Standards. The approximate date for the next validation review of the program by the ARC-PA will be September 2024. The review date is contingent upon continued compliance with the Accreditation Standards and ARC-PA policy.

Competencies For The Physician Assistant Profession
Graduates are expected to demonstrate the highest level of professionalism, be able to provide excellent comprehensive patient care and have the highest level of medical knowledge and communication skills as outlined at http://www.nccpa.net/uploads/docs/PACOMPETENCIES.pdf

Matriculation Requirements
1. Acknowledgement of acceptance by deadline on notification by submission of a signed Statement of Intent Form and a nonrefundable $500 matriculation deposit which will be applied toward the first semester's tuition to guarantee a seat in the class, to be received no later than the deadline stated in acceptance letter.
2. Completion of outstanding required prerequisite course work with a grade of "C" or higher one semester prior to matriculation into the program. Failure to make a grade of "C" or higher in any required prerequisite course will result in nullification of acceptance into the PA program. Updated transcripts will be required.
3. Submission to criminal background checks and urine drug screens before matriculation and prior to beginning clinical rotations. The fees are the student's responsibility. Failure to submit to and satisfactorily pass both screenings can result in dismissal from the program.
4. Completion of immunizations, titer's, and a physical exam upon acceptance and prior to entering clinical rotations. The fees are the student's responsibility.
5. Maintenance of the American Heart Association Healthcare Providers BLS Certification throughout the program. The fees are the student's responsibility.
6. Maintenance of approved health insurance throughout the program. The fees are the student's responsibility.
7. Understanding of and the abilities to adhere to the Technical Standards for Physician Assistants as stated. (See below.)

Physician Assistant National Certifying Examination (PANCE) Pass Rates
Please visit our website at http://www.southalabama.edu/colleges/alliedhealth/pa/accreditation.html

Program Completion Requirements
The program consists of preclinical and clinical components. The preclinical component is designed to provide a solid foundation for the clinical component. During the clinical component the student refines the medical knowledge and clinical skills needed for professional practice.

Successful completion of the program requires that the student be able to:
1. Complete 121 hours of graduate course work consisting of 73 credit hours of didactic course work and 48 credit hours of clinical course work.
2. Obtain an accurate and detailed patient history.
3. Perform complete and focused physical examinations
4. Establish working and differential diagnosis
5. Order and interpret diagnostic evaluations to include: laboratory tests (blood, urine, spinal fluids, cultures), imaging studies (plain film radiography, radiographic contrast studies, ultrasound studies, computerized tomography studies, MRI studies & electrocardiogram.

6. Develop and manage a treatment plan.

7. Record patient data: (a) Written notes and charting, and (b) Electronic medical record.

8. Order and/or administer therapeutic medications (a) in hospitals and clinics and (b) via written or electronic prescription.

11. Interact with patients and the medical community in a professional manner.

12. Make appropriate referrals.

**Technical Standards**

Students in the USA Physician Assistant program must be able to fulfill the program’s Technical Standards, which include General, Observational, Communication, Motor, Critical Thinking, and Interpersonal abilities as well as possessing certain Behavioral and Social Attributes. To evaluate whether you meet the criteria, please visit our website at [http://www.southalabama.edu/colleges/alliedhealth/pa/technical.html](http://www.southalabama.edu/colleges/alliedhealth/pa/technical.html) for details.

**Minimum Requirements For Admission**

Applicants who wish to apply to the USA PA program must meet the following minimum requirements. Please note that admission to the USA PA program is very competitive and accepted students typically exceed the minimum requirements.

1. **Completion of a Baccalaureate degree in any field** from a U.S. regionally accredited institution prior to the starting date of the program is required.

2. **A Minimum overall GPA, science GPA and last 60 hours GPA of 3.0** on a 4.0 scale as calculated by CASPA (includes post-baccalaureate undergraduate work and graduate work from U.S. regionally accredited institutions).

3. **Completion of prerequisite course work completed with a grade of "C" or higher** from a U.S. regionally accredited institution. These courses must be completed successfully one semester prior to matriculation, failure to do so will result in the student losing their seat in the program. Unless specified, prerequisite courses should be one semester of at least 3 credit hours. Prerequisite required courses are:
   - General Biology plus lab (4 credits).
   - General Chemistry I and II plus lab (8 credits).
   - Human Anatomy and Human Physiology OR Anatomy and Physiology I and II.
   - Microbiology.
   - Organic Chemistry.
   - Mathematics (College Algebra minimum).
   - Statistics.
   - General Psychology.
   - Medical Terminology (1 credits).

   For guidelines on courses accepted, please visit [http://www.southalabama.edu/colleges/alliedhealth/pa/admissions.html](http://www.southalabama.edu/colleges/alliedhealth/pa/admissions.html).

4. **Completion of the General Graduate Record Examination (GRE) within the past five (5) years.** We require a minimum score of 145 in both the Verbal and Quantitative sections and completion of the Analytical Writing section in one test date.

5. **Completion of at least 100 hours direct patient care experience is required.** Applicants will document these hours on their CASPA application. Please see website [http://southalabama.edu/alliedhealth/pa/](http://southalabama.edu/alliedhealth/pa/) for definition, details and examples.

6. **Submission of at least three (3) reference letters, one of which must be from a Physician Assistant (PA), Medical Doctor (MD), or Doctor of Osteopathic Medicine (DO)** submitted to CASPA by the **October 1st deadline.** Reference letters sent directly to our office will not be accepted.

7. Submission of completed and verified application materials **by October 1st.** The program will not review applications that are incomplete, received after the deadline, or do not meet the minimum standards. Please see the website for details [http://www.southalabama.edu/colleges/alliedhealth/pa/applications.html](http://www.southalabama.edu/colleges/alliedhealth/pa/applications.html).

**Application And Admission Information**

Please see our website for more detailed information: [http://www.southalabama.edu/colleges/alliedhealth/pa](http://www.southalabama.edu/colleges/alliedhealth/pa)

Applicants are selected based on a holistic evaluation. Many factors are taken into consideration:

- GPAs (overall GPA, science GPA, last 60 hour GPA, both undergraduate and graduate level work).
- GRE scores (quantitative, verbal, and analytical writing sections)
- Direct Patient Care/Health Care/PA Shadowing Experience
- Community Service/Volunteerism
- Additional completion of upper level science coursework completed with a grade of "C" or higher in Immunology, Genetics, Biochemistry, Pathophysiology, and Pharmacology.
• Background and Experience
• Rural/Underserved (Childhood residence in rural county as defined by HRSA rural grant Qualifier)
• Additional Degree or Training: additional degree (Master's or Doctorate), current health training certifications or registrations, e.g., EMT, CNA, CMA.
• Military Service: includes all branches of service.
• Disadvantaged Background:
  • Economically and/or environmentally disadvantaged, as defined by HRSA and detailed on the CASPA application.
• Please see website for more details, http://www.southalabama.edu/colleges/alliedhealth/pa.

Residency Preference
Preference is shown to Alabama residents; however, highly qualified Service Area and out-of-state applicants whose academics and experiences indicate that they may be a success in both the program and the PA profession will be given consideration. Non-residents will be required to pay the non-resident tuition and fees as set by the University. For information on residency please contact the Office of the Registrar at http://www.southalabama.edu/departments/registrar/residency.html.

Interviews
The applicant will attend one interview session to be held in the fall prior to matriculation. Notification of applicant status may be e-mailed at any time during the interview cycle until the class positions are filled.

Physics

Department Information

Department of Physics website
https://www.southalabama.edu/physics/

The curriculum in the Department of Physics serves three groups of students: those preparing for careers in physics, those pursuing professional fields such as medicine and engineering, and those electing physics and astronomy as part of the natural science requirement for Bachelor of Arts or Bachelor of Science Degrees. The degree program in physics allows for flexibility to the extent that the serious student can select related courses in biology, chemistry, geology, computer science, and engineering to prepare for a career in such interdisciplinary areas as biophysics, geophysics, oceanography, and environmental science. Three options for a Bachelor of Science degree in Physics are offered. One option (the Premedical Option) is for those students pursuing medicine as a career. Links to sample programs and requirements for each option are given in the degree General Comments sections of each Area of Study. Students pursuing a degree in Physics also must have a minor in another discipline. In addition, the Department of Physics offers a double major with the Meteorology program within the Department of Earth Sciences.

All first-time freshmen must successfully complete CAS 100: First Year Experience, as a degree requirement. Students must enroll during their first term at USA, except for summer-entry students who must enroll in the fall semester following entry.

The Physics Pre-Medical Option requires a minimum of 129 hours, while the other Physics options require a minimum of 120 hours.

Degree Requirements

General Education Requirements (50-53 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours, Arts And Sciences Majors Take 5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 100, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L, GY 111 & GY 111L, GY 112 & GY 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, PH 201 & PH 201L, PH 202 & PH 202L. Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 123 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LG 143 & LG 144, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LG 181 & LG 182

   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern Languages and Literature at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

   B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
      AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L,
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

Major Requirements (72 Hours)

Physics (BS) - Meteorology Double Major Core (# Courses, # Hours)
A. 34 Physics hours: PH 107, PH 201, PH 202, PH 303, PH 348, PH 366, PH 367, PH 385 (W), PH 411, PH 448, PH 463
B. 33 hours Meteorology courses from: MET 353, MET 341, MET 354, MET 355, MET 356, MET 357, MET 454, MET 456 (W)
C. 8 additional technical courses are required: CH 131, CH 132, CIS 210 or CIS 227, MA 125, MA 126, MA 227, MA 238, ST 315
D. 2 courses are highly recommended as electives for students planning to find employment with the National Weather Service: *GY 475, *MET 492

Minor Requirements (0 Hours)
A minor is not required for this degree program

Notes:
* Recommended Courses

GY 475, MET 456 (W), and MET 356 are only offered in the summer.

With the exception of PH 303 and PH 448, which are offered every year, all upper division Physics courses are offered every other year.

All Physics majors will be required to take an assessment exit exam, at no cost to the student, and an exit interview before graduation as directed by the department.

General Comments
- PH 114 and PH 115 with either PH 201 or PH 202 may be substituted for PH 201 and PH 202 with the prior approval of the physics department chair.
- The sequences PH 114/PH 115 and PH 201/PH 202 may not both be taken for credit.

Additional Information
The Meteorology program, with the Department of Earth Sciences, and the Department of Physics jointly offer a double major in Meteorology and Physics. This curriculum is intended for students who anticipate graduate study in Atmospheric Science, yet wish a very strong background in Physics. As constructed, this curriculum will require the student to complete an extra seventeen (17) hours over the maximum 120 hours required for either major alone. The changes from the current Option B: General Physics curriculum for a student intending to pursue graduate study in Meteorology include: removal of six (6) Physics Elective hours, two courses, and the addition of PH 367. Requirements removed from the regular Meteorology curriculum are the completion of Meteorology electives and the satisfaction of one of the four Meteorology Tracks; the Physics Major will replace the normal requirements for a Meteorology track and the electives. Only Meteorology-Physics double majors may have these track and elective requirements waived. The double major satisfies the minor requirement for the College of Arts and Sciences.
Graduation Plan

Physics (BS) - General Physics

Degree Requirements

General Education Requirements (50-53 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours, Arts And Sciences Majors Take 5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 6 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L, GY 111 & GY 111L, GY 112 & GY 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, PH 201 & PH 201L, PH 202 & PH 202L. Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (0-23 Hours)
A. Foreign Language. 6 hours from any one group:

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:

southalabama.edu/bulletin 2021-22 GRADUATE/UNDERGRADUATE BULLETIN
Major Requirements (43 Hours)

Physics (BS) - General Physics Core (14 Courses, 43 Hours)
A. 34 hours (11 courses): PH 107, PH 201, PH 202, PH 303, PH 348, PH 354, PH 366, PH 385 (W), PH 411, PH 448, PH 463
B. 9 hours (3 courses) Physics Electives from: PH 301, PH 311, PH 346, PH 349, PH 367, PH 390, PH 449, PH 494, PH 499
C. 11 hours from (3 additional technical courses are required): CH 131, CH 132, CIS 210, or CIS 227
D. 15 hours (4 mathematics courses) are prerequisites to upper division Physics courses: MA 125, MA 126, MA 227, MA 238

Minor Requirements (18-24 Hours)
A minor is required for this degree program

Notes:
With the exception of PH 303 and PH 448, which are offered every year, all upper division Physics courses are offered every other year.

All Physics majors will be required to take an assessment exit exam, at no cost to the student, and an exit interview before graduation as directed by the department.

General Comments
• PH 114 and PH 115 with either PH 201 or PH 202 may be substituted for PH 201 and PH 202 with the prior approval of the physics department chair.
• The sequences PH 114/PH 115 and PH 201/PH 202 may not both be taken for credit.

LGS 206, LGS 207, LGS 210, LGS 211, LGS 241, LGS 242, LGS 261, LGS 281, LGS 282, MUL 101, PHL 110, PHL
120, PHL 121, PHL 131, PHL 231, PHL 240, REL 100, REL 200, REL 201

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122
& BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GCO 101 & GCO 101L,
GEO 101 & GEO 101L, GEO 102 & GEO 102L, GY 111 & GY 111L, GY 112 & GY 112L, MAS 134 & MAS 134L,
Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101,
HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 &
   LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142,
   LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172,
   LGS 181 & LGS 182

   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern
   Languages and Literature at the level equivalent to the second semester of the foreign language sequence, or by passing
   another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level).
   Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required
   to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
   AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101
   & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L,
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

**Major Requirements (46 Hours)**

**Physics (BS) - Grad School Prep Core (15 Courses, 46 Hours)**

A. 40 hours 13 courses): PH 107, PH 201, PH 202, PH 303, PH 348, PH 349, PH 366, PH 367, PH 385 (W), PH 411, PH 448, PH 449, PH 463  
B. 6 hours (2 courses) Physics electives from: PH 301, PH 311, PH 346, PH 354, PH 390, PH 494, PH 499  
C. 11 hours from (3 additional technical courses are required): CH 131, CH 132, CIS 210 or CIS 227  
D. 15 hours (4 mathematics courses) are prerequisites to upper division Physics courses: MA 125, MA 126, MA 227, MA 238

**Minor Requirements (0 Hours)**

A minor is not required for this degree program

**Notes:**

* Recommended Course

With the exception of PH 303 and PH 448, which are offered every year, all upper division Physics courses are offered every other year.

All Physics majors will be required to take an assessment exit exam, at no cost to the student, and an exit interview before graduation as directed by the department.

**General Comments**

- PH 114 and PH 115 with either PH 201 or PH 202 may be substituted for PH 201 and PH 202 with the prior approval of the physics department chair.
- The sequences PH 114/PH 115 and PH 201/PH 202 may not both be taken for credit.

**Additional Information**

---

**Graduation Plan**

**Physics (BS): Grad School Prep (120 Total Hours)**

### Notes

*Recommended Course

**See Degree Requirements
Physics (BS) - Premedical Option

Degree Requirements

General Education Requirements (50-53 Hours)

Area I - Written Composition (2 Courses, 6 Hours)

A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours, Arts And Sciences Majors Take 5 Courses, 15 Hours)

A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)

A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L, GY 111 & GY 111L, GY 112 & GY 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, PH 201 & PH 201L, PH 202 & PH 202L. Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)

A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)

A. Foreign Language. 6 hours from any one group:

LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LG 141 & LG 142, LG 141 & LG 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern Languages and Literature at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:

AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L,
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

Major Requirements (31 Hours)

Physic (BS) - Premedical (10 Courses, 31 Hours)

A. 28 hours (9 courses): PH 107, PH 201, PH 202, PH 303, PH 348, PH 366, PH 385 (W), PH 448, PH 463
B. 3 hours (1 hour) Physics electives from: PH 311, PH 346, PH 349, PH 354, PH 367, PH 390, PH 411, PH 449, PH 494, PH 499
C. 33 hours from (9 additional technical courses are required): CH 131, CH 132, CH 201, CH 202, BLY 121, BLY 122, BLY 302 or BMD 350, CH 441 or BMD 321, CH 441 or BMD 322
D. 6 hours from (2 additional courses in Social and Behavioral Sciences required): PSY 120, SY 109 or SY 112
E. 15 hours (4 mathematics courses) are prerequisites to upper division Physics courses: MA 125, MA 126, MA 227, MA 238
F. 3 hours (1 additional course in statistics is required): ST 210

Minor Requirements (18-24 Hours)

A minor is required for this degree program

Notes:

* Recommended Course

With the exception of PH 303 and PH 448, which are offered every year, all upper division Physics courses are offered every other year.

All Physics majors will be required to take an assessment exit exam, at no cost to the student, and an exit interview before graduation as directed by the department.

General Comments

- PH 114 and PH 115 with either PH 201 or PH 202 may be substituted for PH 201 and PH 202 with the prior approval of the physics department chair.
- The sequences PH 114/PH 115 and PH 201/PH 202 may not both be taken for credit.

Additional Information

Major in Physics (Premedical Option) is designed for a student intending a career in a health professional field such as Medicine. Besides Physics, the Curriculum includes extra courses in Chemistry and recommended courses in Biology, Psychology and the Social Sciences to prepare the student for the MCAT exam. Because of these additional requirements there are relative few elective hours in this program and the overall hours total is 129 hours instead of the nominal 120 hours.
## Graduation Plan

**Notes**

*Recommended Course

**See Degree Requirements**
Political Science And Criminal Justice

Department Information

Department of Political Science and Criminal Justice website
https://www.southalabama.edu/colleges/artsandsci/pscj/

Undergraduate Studies

The courses offered in the Department of Political Science and Criminal Justice are designed to achieve three important objectives:

1. To provide a broad and comprehensive education with exceptional social science training—promoting critical thinking, analytic, oral communication, and writing skills.
2. To help students advance toward professional careers in a diversity of fields including law enforcement; education; government; law; corrections; public policy; business; journalism; NGOs and non-profits; and more.
3. To prepare students to be leaders in their communities and to seize meaningful opportunities to effect positive changes locally, nationally, and globally.

Criminal Justice

The curriculum in Criminal Justice provides students interested in law enforcement, criminal law, corrections, and the criminal court system with a broad educational background emphasizing social science and the University's general education skills of critical thinking, writing, communication, and analysis. Students in the department acquire knowledge of the criminal justice field. The program addresses issues relating to the entire criminal justice system, from the nature of crime and delinquency to society's varied responses to crime. Such a focus includes the organization and operation of each of the components in the field.

Political Science

Political Science is a broad discipline that includes studies of governments, politics, and policies. Political scientists may focus on political behavior, decision making, processes, institutions, and public policies. Inquiry in political science addresses the domestic and international policies of the United States and all other countries and regions. Political scientists study the political values, attachments, and activities of people, individually and in groups. Political science examines both what preferences people share and how they differ according to their personal attributes and positions in the economy and society. Political science also studies how people regard and trust each other as well as their leaders and governments.

First Year Experience Requirement

All first-time freshmen must successfully complete CAS 100: First Year Experience as a degree requirement. Students must enroll during their first term at USA, except for summer-entry students who must enroll in the fall semester following entry.

Technological Competency Requirement

Research Methods (PSC 310 (W)/CJ 310 (W)) will satisfy the technology competency requirement for both political science and criminal justice majors. Enrollment in PSC 310 (W) or CJ 310 (W) is required for both political science and criminal justice majors.

Departmental Honors

The Department of Political Science and Criminal Justice offers an opportunity for students in Political Science or Criminal Justice who are not in the University's Honors College to graduate with departmental honors. In order to graduate with departmental honors, the student needs to have at least a 3.50 grade point average (overall and in the major) and maintain that average upon graduation. In addition, the student must complete a two-semester departmental honors thesis project with a faculty mentor and a committee.

Graduate Studies In Public Administration

The Master of Public Administration degree (MPA) curriculum in the Department of Political Science and Criminal Justice is a professional degree program designed principally for present and future administrators, officers in government, other public related organizations, not for profit agencies, and agencies that interact with governmental institutions and funding. It is a broad discipline, open to qualified students after completion of their undergraduate degree.
Students entering the program come from varied academic and vocational backgrounds. Accordingly, no specific undergraduate major is required for admission to the MPA Program. However, certain course prerequisites must be satisfied prior to enrollment in any of the required core courses of the curriculum.

**Requirements For Admission To The MPA Program**

Students are admitted each semester. The following criteria supplement the Graduate School criteria (see Categories of Admission).

**Regular Admission To The MPA Program**

1. Students must have a minimum undergraduate GPA of 2.5 on all undergraduate work (on a 4-point scale) or a GPA of 2.75 over the last 60 hours of undergraduate work.

2. Students must have taken PSC 130 Intro to US Government or its equivalent prior to taking core MPA courses. A minimum grade of C for this course is required. Students may be admitted to the program without having taken PSC 130, provided they enroll in the course in their first year.

3. Students are encouraged to apply in the fall semester, but are admitted each semester.

## Degree Requirements

### General Education Requirements (53-57 Hours)

#### Area I - Written Composition (2 Courses, 6 Hours)
- A. 3 hours: EH 101
- B. 3 hours: EH 102

#### Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
- A. 3 hours: CA 110
- B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
- C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

#### Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
- A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

#### Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
- A. 3 hours from: HY 101, HY 102, HY 135, HY 136
- B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

#### Area V (3 Courses, 9-10 Hours)
- A. Foreign Language. 6 hours from any one group:
  - LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182
  - Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.
- B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (39 Hours)**

**Criminal Justice Core (8 Courses, 24 Hours)**

**Criminal Justice Elective (5 Courses, 15 Hours)**
- A. 15 hours: CJ 300-400 Level Electives

**Minor Requirements (18-24 Hours)**
- A minor is required for this degree program

**Notes:**

**Additional Information**

Majors in Arts and Sciences may be completed with a minimum of 120 semester hours unless designated otherwise. At least 30 hours of course work, which represents 25% of the required 120 hours, must be at the upper division level in order to fulfill the University's residency requirement. At least 15 of the 30 upper-division hours must be in the major or concentration area. An overall grade-point-average (GPA) of 2.0 is required for graduation. In addition, a minimum GPA of 2.0 is required in the student's major or concentration area.

The major in criminal justice requires 39 semester hours, including CJ 105, PSC 130, CJ 210, CJ 215, CJ/PSC 310 (W), CJ/PSC 330, CJ 360, and CJ 492 (W)—plus 15 semester hours of criminal justice electives at the 300/400 level. CJ 105 is a prerequisite for most upper-level CJ courses. Criminal Justice majors must earn a grade of "C" or higher in CJ 105 and in the Capstone Seminar, CJ 492 (W). Students pursuing a degree in Criminal Justice also must have a minor in another discipline.

In addition, all Criminal Justice majors must take the ETS major field test in criminal justice as part of their Capstone Seminar, CJ 492 (W), and receive a satisfactory score. (The standards for passing are determined by the Department of Political Science and Criminal Justice.) Students with unsatisfactory scores on the ETS test can retake the test, or they may be required to repeat coursework in criminal justice. The ETS is administered in the Capstone Seminar, CJ 492 (W). All CJ core courses must be completed prior to enrolling in CJ 492 (W).

All criminal majors must demonstrate competency in oral and written communication. Students will be expected to deliver presentations, particularly in the Capstone Seminar. The University of South Alabama requires two Writing-Intensive (W) courses for graduation. CJ 492 (W) fulfills one Writing-Intensive requirement, and CJ/PSC 310 (W) fulfills the second.

Students must have a minimum of 12 hours of graduate elective and thesis credit combined. They must also complete a thesis in compliance with Graduate School requirements.</td>
<td></td>
</tr>
<tr>
<td>Any substitutions for the above requirements must be approved in writing by the Director of the MPA Program.</td>
<td></td>
</tr>
<tr>
<td>A candidate for the MPA degree must complete successfully a comprehensive written examination covering the eight core courses listed previously. To be eligible to take this examination, a student must have achieved at least a 3.00 (B) grade-point average on the core curriculum course work. Normally, the examination will be administered during the Fall and Spring Semesters. The comprehensive examination may be attempted no more than twice.</td>
<td></td>
</tr>
</tbody>
</table>

Internship

Students in the MPA Program who are not suitably employed full-time in public agencies may be allowed to enroll in PSC 596, Graduate Internship in Public Administration, for a maximum of six semester hours. Normally, admission to the Internship Program will be dependent upon the following prerequisites:

1. Satisfactory completion of at least six of the required core courses;
2. Approval by the internship professor of the prospective intern's qualifications and proposed project; and
3. Placement of the student in an appropriate agency of the government or other public service institution.
The length of the internship and corresponding credit (at the rate of three to six hours per semester), not to exceed a total of six hours, will be determined for each student on the basis of the student's particular needs and opportunities.

Each intern will be required, in consultation with the intern professor, to develop a research design for the project to be undertaken during the internship. Each intern will also be required to write a paper showing how that research design has been carried out. Particular emphasis will be placed in the paper upon the relationship between the internship experience and academic course work. Close and continuing supervision of each intern's progress will be provided by the intern professor.
Minor In Criminal Justice

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Requirements For A Minor In Criminal Justice

The minor in Criminal Justice requires 18 semester hours, including CJ 105, plus 15 semester hours of criminal justice electives, including 6 hours at the 200-400 level, and 9 hours at the 300-400 level. CJ 105 is a prerequisite to most other CJ courses, and a minimum grade of C in CJ 105 is required for the CJ minor.

Minor In Political Science

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Requirements For A Minor In Political Science

For a minor in political science a student must take a minimum of 18 semester hours in political science, of which 6 hours are required including PSC 130, and either PSC 250 or PSC 270, and 12 hours of 300/400 level PSC electives. PSC 130 is a prerequisite to most upper-level PSC courses, and a minimum grade of C is required in PSC 130 for the PSC minor.

Political Science (BA)

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours. Arts And Sciences Majors Take 5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 142 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (36 Hours)**

**Political Science Core (5 Courses, 15 Hours)**
- A. 15 hours: PSC 130, PSC 250, PSC 270, PSC/CJ 310 (W), PSC 492 (W)

**Political Science Electives (7 Courses, 21 Hours)**
- A. 21 hours: PSC 300-400 Level Electives

**Minor Requirements (18-24 Hours)**

A minor is required for this degree program

**Notes:**

**Additional Information**

Majors in Arts and Sciences may be completed with a minimum of 120 semester hours unless designated otherwise. At least 30 hours of course work, which represents 25% of the required 120 hours, must be at the upper division level in order to fulfill the University's residency requirement. At least 15 of the 30 upper-division hours must be in the major or concentration area. An overall grade-point-average (GPA) of 2.0 is required for graduation. In addition, a minimum GPA of 2.0 is required in the student's major or concentration area.

The major in political science requires 36 semester hours, including PSC 130, PSC 250, PSC 270, PSC/CJ 310, and PSC 492 (W)---plus 21 hours of PSC electives at the 300/400 level. PSC 130 is a prerequisite for most other PSC courses. Political Science majors must earn a grade of "C" or higher in PSC 130 and also in the Capstone Seminar, PSC 492 (W). Students pursuing a degree in Political Science must have a minor in another discipline.

In addition, all political science majors must take the ETS major field test in political science and receive a satisfactory score (The standards for passing are determined by the Department of Political Science and Criminal Justice). Students with unsatisfactory scores on the ETS test can retake the test, or they may be required to repeat coursework in political science. The ETS is administered in the Capstone Seminar, PSC 492 (W), which is typically offered in the Fall Semester only. All PSC core courses must be completed prior to enrolling in PSC 492 (W).

All political science majors must demonstrate competency in oral and written communication. Students will be expected to deliver presentations, particularly in the Capstone Seminar. The University of South Alabama requires two Writing-Intensive (W) courses for graduation. PSC 492 (W) fulfills one Writing-Intensive requirement, and CJ/PSC 310 (W) fulfills the second.

Department Information

Department of Psychology website
http://www.southalabama.edu/psychology

Undergraduate Studies

The objective of psychology, as a science, is to understand, explain, and predict the behavior of organisms. The Department of Psychology has developed and organized its course offerings to meet three major goals:

1. To provide a strong foundation for those students who plan to enter a graduate school of psychology after completing their undergraduate degree requirements.
2. To assist those students who are planning careers in psychology or in related fields by providing a flexible curriculum that can be designed to meet the career goals of individual students.
3. To meet the needs of those students who are taking psychology courses as part of their liberal arts education.

All first-time freshmen must successfully complete CAS 100: First Year Experience as a degree requirement. Students must enroll during their first term at USA, except for summer-entry students who must enroll in the fall semester following entry.

Accelerated Bachelor’S To Master’S Program In Psychology (ABM)

See Graduate School Bulletin for rules for all Accelerated Bachelor’s to Master’s Programs https://www.southalabama.edu/bulletin/current/colleges-schools/graduate-school/index.html.

Program Description

The USA accelerated bachelor’s to master’s (ABM) in Psychology provides exceptional undergraduate students the opportunity to earn a bachelor’s and master’s degree at an accelerated pace in Psychology. While still an undergraduate, ABM students may count up to 12 credit hours of graduate course work towards their graduate degree. ABM students typically complete the master’s degree within one academic year after completing the undergraduate degree.

Psychology majors are encouraged to apply for the Accelerated Bachelor’s to Master’s (ABM) Program in Psychology. This program is designed to allow the student to complete the Bachelor’s degree in Psychology and the Master’s degree in Psychology (Behavior and Brain Sciences program only) in five years.

Admission Procedures

Admission will be a competitive process. The minimum standards are:

• Have completed at least 90 credit hours
• Have completed at least 30 credit hours at USA
• Must have at least a 3.3 GPA (Cumulative and Psychology)
• Requires 2 letters of recommendation
• Must have a verifiable score on either the ACT, SAT, or GRE

Admission will be based on characteristics of the applicant and research match to the Psychology faculty. Applicants must transmit a personal statement and have two referees submit a letter of recommendation to the graduate program coordinator.

Once admitted into the ABM program, students must maintain at least a 3.0 GPA and remain in good standing to progress into the graduate program.

Program Procedures

ABM students may begin taking graduate courses after completing at least 90 hours of undergraduate credit. Typically, during their senior undergraduate year, students will take 7 graduate credits per semester for 2 semesters (14 hours) while they are also taking undergraduate courses. Of these 14 graduate hours, 6 hours can count toward both degrees (Bachelor’s and Master’s) if the courses are completed with grades of at least B. Courses with a grade of C can count toward the undergraduate degree but not the graduate degree. Courses with a grade below C cannot count toward the undergraduate or graduate degree.
Upon completing the undergraduate degree, students will apply to the Psychology (Behavioral and Brain Sciences) Master's program. ABM students who are in good standing will be accepted into the Psychology Master’s program.

Completion of the Master of Science (Behavioral and Brain Sciences) requires successful completion of all requirements, including at least 36 graduate credit hours. Graduate credit taken while an undergraduate that is completed with at least the grade of B will be transferred into the Master’s program upon acceptance and will apply toward the 36 hours required for the Master of Science degree.

A student who withdraws or is dismissed from the ABM program may not count graduate coursework towards both degrees. Graduate courses for which an undergraduate student did not earn an “A” or “B” grade, may not be counted towards the graduate degree.

An ABM student must be a full time student and must complete all degree requirements for the master’s within three semesters of the semester in which they were admitted to the Graduate School. An exception for a fourth semester may be granted where an additional semester is required for final revisions to and submission of a defended thesis. Exceptions to the ABM policy are at the discretion of the Dean of the Graduate School.

Graduate Study In Psychology

The Department of Psychology accepts applicants to the Master of Science program (Behavioral and Brain Sciences) and to the Doctor of Philosophy program in Clinical/Counseling Psychology (CCP). Students admitted to the CCP program with a Bachelor’s degree will complete the Master of Science program (Clinical and Counseling Psychology).

The Master of Science degree program in Psychology (Behavioral and Brain Sciences) is designed to provide individuals with knowledge of current theories, principles, and methods of psychology in preparation for future work toward a doctoral degree, employment in a research setting or employment in a college teaching position. The Department of Psychology currently accepts applicants to the Master of Science degree program, with an interest in one or more areas of concentration in the Behavioral and Brain Sciences. The available areas of concentration include: Behavioral Statistics/Computational Modeling, Personality and Measurement, Cognitive and Perceptual Processing, Psychophysiology, Social/Developmental Psychology, and College Teaching Preparation.

Students enrolled in the Doctor of Philosophy in Clinical and Counseling Psychology have the opportunity to earn a Master's of Science in Psychology as they progress towards completion of the doctoral degree. Students interested in a graduate degree in Clinical and Counseling Psychology are encouraged to see the full program description of the doctoral program in Clinical and Counseling Psychology under the heading "The Graduate School" for more information [www.southalabama.edu/ccp/](http://www.southalabama.edu/ccp/).

Requirements For Admission

Students are admitted Fall Semester only. Applications to the Doctoral CCP Graduate Program should be completed by December 15. Applications to the Masters program in Behavioral and Brain Sciences should be completed by February 15. Late applications will be considered only if there are still openings available. Please note that the Psychology Graduate Program is a competitive program with a limited capacity and admits students to begin in the Fall Semester only.

In addition to the Graduate School application form and required supporting documentation, the Department of Psychology Master of Science requires a statement of purpose, and three letters of recommendation. Applicants to the Psychology Master of Science concentration in Behavioral and Brain Sciences typically have a minimum GPA of at least a 3.0 on all undergraduate work and have completed at least 21 hours of psychology courses, including at least one course in statistics and one in experimental methods. In exceptional cases, applicants may be considered with at least a 2.5 GPA on all undergraduate work, or at least a 2.75 GPA on the last 60 hours of undergraduate work. Applicants typically submit official GRE scores and have a minimum combined score of 300 (verbal + quantitative).

Applicants to the Doctor of Philosophy in Clinical and Counseling Psychology should see [www.southalabama.edu/ccp/](http://www.southalabama.edu/ccp/).

Non-degree Students

Applicants for non-degree status in psychology are considered only in exceptional cases and will normally be admitted only if they meet regular admission standards. Following admission, non-degree students must have permission of the department chair and director of graduate studies of the college for each course they wish to enroll in. Enrollment will be approved on a space-available basis with preference being given to degree students. Non-degree students must satisfy the same prerequisites and corequisites as degree students.
Progress Toward Degree
All graduate students will be evaluated each semester to determine if they are making satisfactory progress toward completion of degree requirements. Students will be given written reports, including specific deficits, if they are not making satisfactory progress. Such students will have one semester to remedy the specific deficits listed or will be subject to dismissal from the program.

Graduate Assistantships
Each year the Psychology Department recommends qualified applicants to the Dean of the Graduate School for graduate assistantships. Application forms for graduate assistantships may be obtained from the Graduate School. The deadline for receipt of completed doctoral assistantship applications is December 15.

Psychology (BA)

Degree Requirements

General Education Requirements (36 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours. Arts And Sciences Majors Take 5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**UNDERGRADUATE STUDIES**

The objective of psychology, as a science, is to understand, explain, and predict the behavior of organisms. The Department of Psychology has developed and organized its course offerings to meet three major goals:

1. To provide a strong foundation for those students who plan to enter a graduate school of psychology after completing their undergraduate degree requirements.
2. To assist those students who are planning careers in psychology or in related fields by providing a flexible curriculum that can be designed to meet the career goals of individual students.
3. To meet the needs of those students who are taking psychology courses as part of their liberal arts education.

**Major Requirements (36 Hours)**

**Psychology Core Basic (4 Courses, 12 Hours)**

A. 15 hours: PSY 120, PSY 220, PSY 320, PSY 310

**Psychology Core Experimental/Learning (2 Courses, 6 Hours)**

A. 6 hours from: PSY 416, PSY 420 or PSY 317**, PSY 428, PSY 475

**Psychology Core Personality/Social And Abnormal (2 Courses, 6 Hours)**

A. 6 hours from: PSY 340, PSY 435, PSY 440

**Psychology Core Developmental (1 Course, 3 Hours)**

A. 3 hours from: PSY 350, PSY 456

**Psychology Core Capstone Course (1 Course, 3 Hours)**

A. 3 hours from: PSY 412, PSY 414,

**Psychology Core Elective (2 Courses, 6 Hours)**

**Minor Requirements (0 Hours)**

A minor is required for this degree program

**Requirements For A Minor In Psychology**

A minimum of 21 semester hours in Psychology, including PSY 120 or PSY 121, PSY 220 and 15 semester hours of electives (twelve of those must be in courses numbered 300 or above).

**Notes:**

* Recommended Course

** You may take either PSY 420 or PSY 317 but not both.

The remaining six hours of electives needed for a major may be taken from any courses not taken previously (excluding PSY 250).

Students who are preparing for graduate study are encouraged to take all courses listed in the undergraduate core and any additional courses recommended by their faculty advisor. Student research is encouraged by the faculty and students may obtain course credit for individual student research projects in PSY 494. Students pursuing a degree in Psychology also must have a minor in another discipline.
Additional Information

Accelerated Bachelor’S To Master’S Program In Psychology (ABM)

See Graduate School Bulletin for rules for all Accelerated Bachelor’s to Master’s Programs https://www.southalabama.edu/bulletin/current/colleges-schools/graduate-school/index.html.

Program Description

The USA accelerated bachelor’s to master’s (ABM) in Psychology provides exceptional undergraduate students the opportunity to earn a bachelor’s and master’s degree at an accelerated pace in Psychology. While still an undergraduate, ABM students may count up to 12 credit hours of graduate course work towards their graduate degree. ABM students typically complete the master’s degree within one academic year after completing the undergraduate degree.

Psychology majors are encouraged to apply for the Accelerated Bachelor’s to Master’s (ABM) Program in Psychology. This program is designed to allow the student to complete the Bachelor’s degree in Psychology and the Master’s degree in Psychology (Behavior and Brain Sciences program only) in five years.

Admission Procedures

Admission will be a competitive process. The minimum standards are:

- Have completed at least 90 credit hours
- Have completed at least 30 credit hours at USA
- Must have at least a 3.3 GPA (Cumulative and Psychology)
- Requires 2 letters of recommendation
- Must have a verifiable score on either the ACT, SAT, or GRE

Admission will be based on characteristics of the applicant and research match to the Psychology faculty. Applicants must transmit a personal statement and have two referees submit a letter of recommendation to the graduate program coordinator.

Once admitted into the ABM program, students must maintain at least a 3.0 GPA and remain in good standing to progress into the graduate program.

Program Procedures

ABM students may begin taking graduate courses after completing at least 90 hours of undergraduate credit.

Typically, during their senior undergraduate year, students will take 7 graduate credits per semester for 2 semesters (14 hours) while they are also taking undergraduate courses. Of these 14 graduate hours, 6 hours can count toward both degrees (Bachelor’s and Master’s) if the courses are completed with grades of at least B. Courses with a grade of C can count toward the undergraduate degree but not the graduate degree. Courses with a grade below C cannot count toward the undergraduate or graduate degree.

Upon completing the undergraduate degree, students will apply to the Psychology (Behavioral and Brain Sciences) Master's program. ABM students who are in good standing will be accepted into the Psychology Master's program.

Completion of the Master of Science (Behavioral and Brain Sciences) requires successful completion of all requirements, including at least 36 graduate credit hours. Graduate credit taken while an undergraduate that is completed with at least the grade of B will be transferred into the Master’s program upon acceptance and will apply toward the 36 hours required for the Master of Science degree.

A student who withdraws or is dismissed from the ABM program may not count graduate coursework towards both degrees. Graduate courses for which an undergraduate student did not earn an “A” or “B” grade, may not be counted towards the graduate degree.

An ABM student must be a full-time student and must complete all degree requirements for the master’s within three semesters of the semester in which they were admitted to the Graduate School. An exception for a fourth semester may be granted where an additional semester is required for final revisions to and submission of a defended thesis. Exceptions to the ABM policy are at the discretion of the Dean of the Graduate School.

Programs Offered:

Bachelor Of Science In Radiologic Sciences

Since its inception in 1976, the Department of Radiologic Sciences has provided a quality educational program with a sustained emphasis upon graduating competent and compassionate healthcare professionals. In so doing, our graduates are prepared to practice their profession in the often complex and global society of the 21st century.

The baccalaureate program is designed to provide graduates with enhanced career opportunities in radiology as administrators, educators, and advanced imaging specialists. The curriculum provides a broad education in liberal arts and basic sciences and an in-depth study in radiologic sciences.

Educational opportunities in diagnostic imaging and advanced imaging modalities such as mammography, magnetic resonance imaging, vascular radiography, computed tomography, radiology administration, ultrasound, and radiation therapy are offered. Following completion of the pre-professional component and admission to the professional component of the program, students will study general radiography for three semesters. At the end of this first year in the professional component, students will select one of the following tracks to complete: general radiography to include one advanced imaging modality, radiology administration, ultrasound, or radiation therapy.

The general radiography track curriculum includes diagnostic radiology and either mammography, computed tomography, magnetic resonance imaging, vascular radiography, and/or radiology administration. Students completing didactic and clinical requirements in these tracks will be eligible to seek certification through the American Registry of Radiologic Technologists (ARRT) in radiography and the advanced modality studied (excluding radiology administration).

The other two baccalaureate tracks allow students completing the first year of general radiography curriculum to select either ultrasound or radiation therapy during their second year. Those who choose one of these tracks will not be eligible to seek ARRT certification in radiography, but will be eligible for ARRT certification in radiation therapy or ARRT and American Registry of Diagnostic Medical Sonographers (ARDMS) certification as an ultrasonographer upon completion of didactic and clinical requirements.

Certificates:

The certificate program in Radiology Administration would allow a student who is registered as a radiologic technologist with the American Registry of Radiologic Technologist (ARRT) to receive didactic instruction and practical experience in radiology administration. This will prepare the student to sit for the certified radiology administrator (CRA) examination given by the Association for Medical Imaging Management (AHRA). This certificate program will be offered as a pre-baccalaureate or a post-baccalaureate option for a student. The program will be three semesters in length and consist of thirteen semester hours.
The courses offered will include instruction in human resource management, asset resource management, fiscal management, operations management and communication and information management.

Radiation Therapy
The certificate program in radiation therapy would allow a student who is registered as a radiologic technologist with the American Registry of Radiologic Technologist (ARRT) and who has a baccalaureate degree or is seeking a baccalaureate degree to receive didactic instruction and clinical experience in radiation therapy. This will prepare the student to sit for the certification examination given by the ARRT. This certificate program will be offered as a pre- baccalaureate or a post-baccalaureate option for a student. The program will be three semesters in length and consist of 44 semester hours. The courses offered will include instruction in patient care, treatment, dosimetry, simulations, and procedures performed by the radiation therapist.

Ultrasound
The certificate program in ultrasonography (US) would allow a student who is registered as a radiologic technologist with the American Registry of Radiologic Technologist (ARRT) to receive didactic instruction and clinical experience in US. This will prepare the student to sit for the certification examination given by the American Registry for Diagnostic Medical Sonography (ARDMS). This certificate program will be offered as a pre-baccalaureate or a post-baccalaureate option for a student. The program will be three semesters in length and consist of 34 semester hours. The courses offered will include instruction in patient care, image production, and procedures performed by the ultrasound technologist.

Magnetic Resonance Imaging
The certificate program in magnetic resonance imaging (MRI) would allow a student who is registered as a radiologic technologist with the American Registry of Radiologic Technologist (ARRT) to receive didactic instruction and clinical experience in MRI. This will prepare the student to sit for the certification examination given by the ARRT. This certificate program will be offered as a pre-baccalaureate or a post-baccalaureate option for a student. The program will be three semesters in length and consist of twelve semester hours. The courses offered will include instruction in patient care, image production, and procedures performed by the MRI technologist.

Computed Tomography
The certificate program in computed tomography (CT) would allow a student who is registered as a radiologic technologist with the American Registry of Radiologic Technologist (ARRT) to receive didactic instruction and clinical experience in CT. This will prepare the student to sit for the certification examination given by the ARRT. This certificate program will be offered as a pre-baccalaureate or a post-baccalaureate option for a student. The program will be three semesters in length and consist of twelve semester hours. The courses offered will include instruction in patient care, safety, image production, and procedures performed by the CT technologist.

Interventional Radiography
The certificate program in Interventional Radiography (IR) would allow a student who is registered as a radiologic technologist with the American Registry of Radiologic Technologist (ARRT) to receive didactic instruction and clinical experience in cardiac and vascular interventional radiography. This will prepare the student to sit for the certification examination given by the ARRT. This certificate program will be offered as a pre-baccalaureate or a post- baccalaureate option for a student. The program will consist of three semesters in length and consist of twelve semester hours. The courses offered will include instruction in patient care, image production, and procedures performed by the interventional and cardiac radiography technologist.

Mammography
The certificate program in mammography would allow a student who is registered as a radiologic technologist with the American Registry of Radiologic Technologist (ARRT) to receive didactic instruction and clinical experience in mammography. This will prepare the student to sit for the certification examination given by the ARRT. This certificate program will be offered as a pre-baccalaureate or a post-baccalaureate option for a student. The program will consist of three semesters in length and consist of twelve semester hours. The courses offered will include instruction in patient care, image production, and procedures performed by the mammography technologist.

*NOTE: Federal financial aid is not available at this time for these certificate programs for non-degree seeking students.

Pre-professional Component
Degree seeking students must complete the 56-63 semester hour pre-professional component prior to enrolling in professional component courses.
Professional Component

The professional component (Typically, students' junior and senior years) consists of two years of academic and clinical study in Radiologic Sciences. The program is six semesters in length, including two summer terms. All candidates must have satisfied the pre-professional component to qualify for the degree-seeking professional component, but completion of that component does not guarantee admission to the professional component. Enrollment in the professional component is limited by the number of clinical positions available, which is equally true for the advanced modalities. During the professional component, students must be prepared to travel up to 90 miles from campus in order to participate in the clinical education component of the curriculum.

Program Accreditation

The radiography and radiation therapy programs are accredited by the Joint Review Committee on Education in Radiologic Technology, 20 North Wacker Drive, Suite 2850, Chicago, Illinois, 60706-3182. For more information go to www.jrcert.org.

Admission Requirements For The Bachelor Of Science In Radiologic Sciences Program

1. Completion of all required pre-professional courses by the end of the summer semester prior to desired admission for Fall semester. Students are admitted to the professional component in the Fall semester only.
3. Acceptance to the University of South Alabama.
4. Submit official college transcripts for all coursework not completed at the University of South Alabama. Transcripts are not required if the coursework has already been transferred to USA.
5. Application deadline is May 1.
6. Submit official ACT or SAT scores, regardless of previous educational background. If individual scores for Math, English and Natural Sciences on the ACT are below 18, it is strongly advised that the test be retaken. ACT or SAT scores must be submitted by the application deadline of May 1.
7. Submission of three (3) completed personal reference forms by the application deadline. Reference forms are available at http://www.southalabama.edu/colleges/alliedhealth/radiologicsciences.
8. Have a minimum cumulative overall (USA and transfer) GPA of 2.0 ("C" average) on previously completed college-level courses, as well as at least a "C" in all math and Sciences courses. Transcripts must be submitted by the application deadline.
9. Students applying for admission to the professional component must complete four (4) hours of observation in a hospital Radiology department prior to reporting for the admission interview. Following submission of the departmental application, applicants may call the Department of Radiologic Sciences at (251) 445-9346 any time after February 1st during the year in which they plan to apply, and schedule a hospital observation appointment. Observation form and instructions are available at http://www.southalabama.edu/colleges/alliedhealth/radiologicsciences.
10. Meet program technical/core performance standards. Core performance standards are fundamental tasks and skills that are required for successful completion of the program. They have been outlined and are available upon request and on the department website under Frequently Asked Questions (FAQ).
11. Complete a brief writing assignment conducted on the day of interview.
12. Complete a personal interview with members of the Radiologic Sciences Admissions Committee.
13. Applicants will be screened on the basis of past educational performance and the potential for the number of openings available. Therefore, acceptance into the University does not guarantee admission into the program. Likewise, admission into the program does not guarantee a position in a particular track/modality for one's senior year.
14. Student acceptance into the program is provisional pending completion of a drug screen and background check requirements as specified in the acceptance letter. Refusal to submit will result in nullification of acceptance into the program.
15. Proof of medical insurance must be provided and maintained throughout the program following official notification of acceptance into the program. Due date will be specified in the acceptance letter.
16. ARRT certified radiographers who have completed the pre-professional component and are seeking the baccalaureate degree may apply for admission into the second year (senior year) of the professional component.
17. International students must score a minimum of 76 on the TOEFL exam to include the following minimum sub-scores on the IBT:
   - Listening 20  Speaking 20  Reading 18  Writing 18
   The IELT exam will not be used as an admission requirement to the Radiologic Sciences Program.
Special Fees

- Books: Approximately $700-800
- Uniforms: Approximately $250
- Clinical Data System: One-time payment of $150
- Drug Screen: Approximately $25
- Background Check: Varies based on number of prior residences, but approximately $50
- Personal Medical Insurance: Must possess throughout program

Degree Requirements

General Education Requirements (56-63 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-12 Hours)
A. 3-4 hours from: MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 4 hours from: BLY 101 & BLY 101L or BLY 121 & BLY 121L
C. 4 hours from: BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours: PSY 120
B. 3 hours from: HY 101, HY 102, HY 135, HY 136
C. 6 hours from: AN 100, AN 101, CA 100, CA 211, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 250, SY 109, SY 112

Area V - Pre-Professional Required Courses (15-22 Hours)
A. 8 hours: BMD 251, BMD 252
B. 3 hours: CIS 010, CIS 150
C. 4-5 hours from: PH 104, PH 104L, PH 114, PH 114L
D. 3 hours from: BUS 245, ST 210, ST 305

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (38 Hours)

Radiologic Science -First Year Professional Component (13 Courses, 38 Hours)
A. Fall- 15 hours: RAD 300, RAD 304, RAD 307, RAD 310, RAD 312
B. Spring- 15 hours: RAD 301, RAD 308, RAD 315, RAD 318, RAD 335
C. Summer- 8 hours: RAD 302, RAD 309, RAD 320

Radiologic Sciences -Second Year Professional Component (39 Hours)

Track 1: General Radiography To Include One Advanced Modality *. (Study Of Ultrasound Or Radiation Therapy Is Not An Option In The General Radiography Track) (30-44 Hours).
A. Fall - 12 hours: RAD 403, RAD 411, RAD 415
   Plus hours from one of the modalities:
   a. Mammography 4 hours from: RAD 480 & RAD 475 or RAD 476
   b. Computed Tomography 4 hours from: RAD 477 & RAD 475 or RAD 476
   c. Magnetic Resonance Imaging 4 hours from: RAD 483 & RAD 475 or RAD 476
   d. Vascular Radiography 4 hours from: RAD 486 & RAD 475 or RAD 476
   e. Radiology Administration 6 hours: RAD 430 & RAD 432
B. Spring - 8 hours: RAD 404, RAD 437, RAD 496
   Plus hours from one of the modalities:
   a. Mammography 4 hours from: RAD 481 & RAD 475 or RAD 476
   b. Computer Tomography 4 hours from RAD 478 & RAD 475 or RAD 476
   c. Magnetic Resonance Imaging 4 hours from RAD 484 & RAD 475 or RAD 476
   d. Vascular Radiography 4 hours from RAD 487 & RAD 475 or RAD 476
   e. Radiology Administration 6 hours: RAD 433 & RAD 435
C. Summer - 7 hours: RAD 405, RAD 494, RAD 497
   Plus hours from one of the modalities:
   a. Mammography 4 hours from: RAD 482 & RAD 475 or RAD 476
   b. Computer Tomography 4 hours from RAD 479 & RAD 475 or RAD 476
   c. Magnetic Resonance Imaging 4 hours from RAD 485 & RAD 475 or RAD 476
   d. Vascular Radiography 4 hours from RAD 481 & RAD 475 or RAD 476
   e. Radiology Administration 1 hour: RAD 440

Track 2: Ultrasound Only (30-36 Hours)
A. Fall - 9-17 hours: RAD 417, RAD 421, RAD 423, RAD 411**
B. Spring - 9 hours: RAD 418, RAD 424, RAD 496
C. Summer - 9-11 hours: RAD 320**, RAD 425, RAD 427, RAD 497

Track 3: Radiation Therapy Only (42-44 Hours)
A. Fall - 15 hours: RAD 441, RAD 448, RAD 446, RAD 450, RAD 452
B. Spring - 16 hours: RAD 442, RAD 455, RAD 453, RAD 458, RAD 496
C. Summer - 11-13 hours: RAD 443, RAD 456, RAD 454, RAD 497, RAD 320**
** RAD 320 and RAD 411 required if not previously completed

* Students who choose to complete Track 1 (Radiography to include one advanced modality) will be eligible to apply for continuation in the program to study any additional modality to include ultrasound and radiation therapy in a non-degree seeking student status. Please note that non-degree seeking students are not eligible for federal financial aid.

Minor Requirements (0 Hours)
A minor is not required for this degree program

Notes:
* Recommended Course
Additional Information

Graduation Plan

Multiple Degree Plans Available. Select To View Option:

- Jump to Radiologic Sciences (BS):
- Jump to Mammography, MRI, IR, CT
- Jump to Radiology Administration
- Jump to Ultrasound
- Jump to Radiation Therapy

Radiologic Sciences (BS): (126-153 Total Hours)

***The total number of hours for the RAD degree depends on which Track is chosen by the student.

At the end of the first professional year, students will be asked to make a choice on how they wish to complete the degree. There are three tracks from which to choose to complete the second professional year.

- Track I – General Radiography plus one advanced imaging modality (Vascular Imaging, CT, MRI, Mammography)
- Track 2 – Ultrasound only
- Track 3 – Radiation Therapy only

In addition to one of the modalities in Track 1, students may choose to add studies in Radiology Administration.

Students may also choose to complete the second professional year as described for Track 1, and then later apply for admission to any advanced modality including Ultrasound or Radiation Therapy. Please note that students with bachelor’s degrees in Radiologic Sciences do not currently qualify for federal financial aid benefits when pursuing additional certifications such as Radiation Therapy.

**Bridge Program Students**

Registered Radiographers wishing to complete a bachelor’s degree in Radiologic Sciences are responsible for completing all requirements from the first and second year of the pre-professional component of the program prior to enrolling in the professional component of the Radiologic Sciences program. Upon successful completion of the bridge course, the Radiologic Sciences advisor will request for 38 hours of alternative credit (i.e. credit from the first professional year of the Radiologic Sciences program) to be added to the students’ Degree Audit. Bridge student will choose either TWO advanced imaging specialties from the Second Professional Year Track I, ONE advanced imaging specialty and Radiologic Administration from the Second Professional Year Track I, the Second Professional Year for Ultrasound---Track II only, or the Second Professional Year for Radiation Therapy---Track III only. Bridge program students complete the program in 4 semesters (includes 2 summer terms). Students participating in the bridge program may have RAD 411 waived after successfully completing RAD 491 if the student will otherwise meet the upper-division residency requirement.

**Bridge Students Only**

Sociology, Anthropology, And Social Work

Department Information

Department of Sociology, Anthropology and Social Work website
https://www.southalabama.edu/colleges/artsandsci/syansw/

Departmental Mission Statement

The Department of Sociology, Anthropology and Social Work seeks to equip students with conceptual tools to enhance their social and cultural awareness and with methodological tools to obtain empirical knowledge to empower them to engage in improvement of social conditions. Acknowledging the inextricable link between teaching and scholarly research, we strive for excellence in both areas to unite students and faculty in a common experience of learning and discovery through pure and applied research to prepare students for service through careers and civic engagement.

Undergraduate Programs

Sociology is the scientific study of social behavior and social phenomena. Our program seeks to provide students with knowledge and insight about why groups, institutions, organizations, and societies (and the people in them) behave in the ways they do. Popular courses within the program address such diverse social phenomena as Drug Use, Marriage and Family, Culture, Religion, Crime and Deviance, Medicine, Disasters, Race, Gender, and Aging. We also focus on equipping students with the tools of social research methods and statistics - two very highly-sought-after skills in today's labor market.

Anthropology is the study of humans, past and present. To understand the full sweep and complexity of cultures across all of human history, anthropology draws and builds upon knowledge from the social and biological sciences as well as the humanities and physical sciences. A central concern of anthropologists is the application of knowledge to the solution of human problems. Historically, anthropologists in the United States have been trained in one of four areas: archaeology, biological/physical anthropology, sociocultural anthropology, and linguistic anthropology. Anthropologists often integrate the perspectives of several of these areas into their professional lives.

Social work is a social science and a profession devoted to helping people solve problems and issues in their lives. Social workers, help individuals, families, groups, organizations, and communities to achieve an effective level of psychosocial functioning and seek social reform to improve societal well-being, with an emphasis upon marginalized and oppressed communities. Social work is founded upon the ethical principles of service; social and economic justice; personal dignity and worth; the importance of human relationships; integrity; and competence.

All first-time freshmen must successfully complete CAS 100: First Year Experience as a degree requirement. Students must enroll during their first term at USA, except for summer-entry students who must enroll in the fall semester following entry.

• SY 382 will fulfill the technology proficiency requirement for Social Work majors.
• SY 409 will fulfill the technology proficiency requirement for Sociology majors.
• AN 454 will fulfill the technology proficiency requirement for Anthropology majors.

The Department also offers an accelerated bachelor’s to master’s degree in sociology. For general information see the Graduate School, Admission Requirements and Procedures, Accelerated Bachelor’s to Master’s Program

Anthropology (BA)

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182
   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.
B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (38 Hours)

Anthropology (BA) Core (13 Courses, 38 Hours)
A. 26 hours: AN 100, AN 101, AN 121/AN 121L, AN 300, AN 454, SY 109, one 300 or 400 level Archaeology course, one 300 or 400 level Biological Anthropology course, and one 300 or 400 level Cultural Anthropology course
B. 12 hours from: Choose 4 AN electives

Minor Requirements (18-24 Hours)
A minor is required for this degree program

Notes:

**Notes**

**See Degree Requirements**
Minor In Anthropology

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Requirements For A Minor In Anthropology

A minimum of 18 semester hours in Anthropology, including AN 100 and AN 101. At least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University. At least 9 hours of courses in the minor must be upper-division.
Minor In Sociology

Degree Requirements

If a minor is required in your degree program, at least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University.

Requirements For A Minor In Sociology
A minimum of 18 semester hours in Sociology, including SY 109. No more than six semester hours of Directed Studies may be used in meeting the minor requirements. At least 9 (lower and/or upper-division) hours of courses in the minor must be completed at the University. At least 9 hours of courses in the minor must be upper-division.
Social Work (BSW)

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
  A. 3 hours: EH 101
  B. 3 hours: EH 102

Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
  A. 3 hours: CA 110
  B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
  C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101
  D. 6 hours from: AFR 101, ARH 100, ARH 103, ARH 123, ARH 203, ARS 101, CLA 110, DRA 110, EH 215, EH 216, EH 225, 
     EH 226, EH 235, EH 236, LG 101, LG 102, LG 111, LG 112, LG 121, LG 122, LG 131, LG 132, LG 141, LG 142, LG 151, 
     LG 152, LG 153, LG 171, LG 172, LG 173, LG 201, LG 202, LG 211, LG 212, LG 213, LG 221, LG 222, LG 231, LG 232,

     206, LGS 207, LGS 210, LGS 211, LGS 241, LGS 242, LGS 261, LGS 262, LGS 281, LGS 282, MUL 101, PHL 110, PHL 
     120, PHL 121, PHL 131, PHL 231, PHL 240, REL 100, REL 200, REL 201

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
  A. 3 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
  B. 4 hours from: BLY 101 & BLY 101L or BLY 121 & BLY 121L,
  C. 4 hours from: AN 121 & AN 121L, BLY 102 & BLY 102L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, 
     MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, 
     PH 201 & PH 201L, PH 202 & PH 202L

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
  A. 3 hours from: HY 101, HY 102, HY 135, HY 136
  B. 9 hours from: *AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, *ECO 216, GEO 114, GEO 115, GS 101, HY 101, 
     HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
  A. Foreign Language. 6 hours from any one group:
     LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & 
     LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, 
     LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, 
     LG 181 & LGS 182
  B. 3 hours: ST 210

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)
All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (42 Hours)**

**Social Work (BSW) Core (14 Courses, 42 Hours)**

A. 42 hours: SW 200, SW 201, SW 214, SW 220, SW 301, SW 302, SW 401, SW 402, SW 412, SW 414, SY 220, SY 381, SY 382, and 1 Field of Practice Elective (SW 300, SW 340, SW 350, SW 360, SW 360, SW 420, or SY 372)

**Minor Requirements (18-24 Hours)**

A minor is required for this degree program

*If Sociology (6 Courses, 18 Hours): SY 109, SY 220, SY 381, SY 382, and 2 Electives (at least 1 sociology electives must be 300-level or higher)

**Notes:**

**Additional Information**

**Social Work Admission Policy And Procedures**

The social work program has policies and procedures for admission that are consistent with the goals of our national accrediting agency, the Council on Social Work Education. The policies and procedures ensure that students have a liberal arts base, demonstrate a beginning knowledge of social work and identification with the profession, have content in diversity, populations-at-risk, social and economic justice, and can demonstrate effective communication skills prior to entry into the professional program.

**Admission Policy**

Students who want to major in social work are admitted to the pre-professional social work major and remain in the pre-professional major until they meet requirements to be admitted into the social work major. Prior to entering the major, please consider consulting with a pre-professional social work advisor from Academic Advising and Transfer Services at the earliest opportunity. The admission policy is applicable to all students: new freshmen, transfer students, students seeking a second bachelor’s degree, and students changing their major. In order to be admitted into the social work major, students must meet the following criteria:

- Have a 2.60 overall GPA in courses taken at USA.
- Have completed SW 200, SW 214, and SW 220 with a grade of "C" or better.
- Have completed the BLY 101/BLY 102 or BLY 121/BLY 122 and a second natural science course with lab earning a grade of "C" or better in both courses and labs.
- Have completed EH 101 and EH 102 with a grade of "C" or better.
- Have completed the Math requirement.
- Have completed the Statistics requirement (ST 210).
- Have completed a minimum of 56 credit hours.
- Meet all requirements specified by the program for demonstrating behavior consistent with the NASW Code of Ethics.

Students entering the pre-professional social work major who have 45 or more credit hours are strongly encouraged to take SW 200, SW 214, and SW 220 in their first semester. Students who have not been admitted to the major may not enroll in SW 201, SW 300, SW 301, SW 302, SW 401, SW 402, SW 412, or SW 414.
Admission Procedures

Once the specified requirements are complete, the student must submit an application for admission to the social work major. Students who meet the minimum prerequisite requirements are not guaranteed admission into the social work major. The application process is competitive and admission is dependent upon available space. Students are encouraged to consult with their advisor prior to submitting this application.

The student’s application for admission to the major will be reviewed by the BSW program faculty and a determination will be made on whether or not the student will be admitted to the major. Following this determination, students will be notified in writing concerning the faculty decision.

Once the student is admitted to the major, the program will initiate a change of major to the university. The criteria for continuation as a major include:

- Maintain a 2.50 grade point average in social work courses.
- Maintain an overall 2.60 grade point average at USA.
- Demonstrate acceptable professional conduct, personal integrity and emotional stability requisite for effective social work practice.
- Demonstrate identification with the profession of social work.
- Demonstrate behavior consistent with Code of Ethics for the National Association of Social Workers.

Transfer Students

Social work course credit will only be granted for courses transferred from programs accredited by the Council on Social Work Education or in CSWE Candidacy. In order to receive a degree in social work from the University of South Alabama, students must complete SW 401, SW 402, SW 412, and SW 414 and meet the university residency requirements. The program director will evaluate social work transfer credits to determine equivalency. No credit will be given for life or prior work experience.

### Notes

**See Degree Requirements**

**Must have one history elective and one literature elective. In addition, students must choose a second history or literature to complete a two-part sequence.**

***All Arts and Sciences majors require a minor between 18 and 24 hours. This plan incorporates a sociology minor (18 credit hours).***
Sociology (BA)

Degree Requirements

General Education Requirements (53-57 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LGS 106 & LGS 107, LGS 110 & LGS 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182
   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern and Classical Languages at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.
B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

**Major Requirements (33 Hours)**

**Sociology (BA): (11 Courses, 33 Hours)**

A. 18 hours: SY 109, SY 112, SY 406, SY 407, SY 409, AN 100 or AN 101
B. 15 hours from: 5 SY electives

**Minor Requirements (18-24 Hours)**

A minor is required for this degree program

Sociology (MA)

Degree Requirements

Master Of Arts Program In Sociology

The Master of Arts Program in Sociology provides students with advanced training in sociological theory and social science research methods for enhanced understanding of several specialized subject areas of sociology: applied sociology, crime and deviance, family, gender, medical sociology, social psychology, social stratification and labor markets, and the sociology of religion. In addition to working closely with sociology graduate faculty, students can collaborate with graduate faculty in anthropology and social work and can simultaneously pursue a graduate certificate in gerontology. The Master of Arts Program in Sociology can prepare students for doctoral-level study or for careers in teaching, private industry, government, or community and social service.

Students can apply for admission to the Master of Arts Program in Sociology to begin study in the Fall or Spring semester. However, it is highly recommended that students apply for admission to begin study in the Fall semester as per the academic structure of the Master of Arts Program in Sociology. See below, and the Graduate School, for important application deadlines.

The following Requirements for Admission to the Master of Arts Program in Sociology supplement the categories of admission as stipulated by the Graduate School.

Requirements For Admission

Regular Admission

1. Baccalaureate degree or coursework in a social science discipline from an accredited institution of higher education.
2. Applicants to graduate programs in Arts and Sciences typically have a minimum GPA of at least a 3.0 on all undergraduate work. In exceptional cases, applicants may be considered with at least a 2.5 GPA on all undergraduate work, or at least a 2.75 GPA on the last 60 hours of undergraduate work.
3. Completion of the University of South Alabama on-line Graduate Application for Admission.
4. Official academic transcripts from each college or university attended, even if the applicant did not earn credit at the institution.
5. Submission of a statement of purpose—approximately two (2), single-spaced pages in length—that provides an intellectual autobiography of the applicant, an indication of the applicant's areas of specialized interest within sociology, and a description of the applicant's academic and career goals.
6. One (1) writing sample, preferably generated for evaluation in completed coursework toward the baccalaureate degree.
7. Two (2) letters of recommendation that detail the applicant's capacity for success in, and for timely completion of, a master's program of study. Each letter of recommendation should also address the applicant's ability and willingness to work cooperatively within the Department of Sociology, Anthropology, and Social Work and cooperatively among the University of South Alabama's broader academic community. Both letters of recommendation must be written by college or university faculty members who are familiar with the applicant's academic work.

Applicants who wish to be considered for financial assistance through a Graduate Assistantship must submit a Graduate Assistant Appointment Form directly to the Master of Arts Program in Sociology, care of the Graduate Coordinator. Applicants who wish to be considered for Fall admission to the Master of Arts Program in Sociology, and for a Graduate Assistantship, should submit all pertinent application materials to the appropriate recipient by March 1. Review of admission and Graduate Assistantship applications will begin immediately thereafter and continue until all available Graduate Assistantships are awarded.

Non-Degree Admission

Applicants with a baccalaureate degree from an accredited institution of higher education who prefer not to earn the terminal master's degree in sociology can apply for admission to the Master of Arts Program in Sociology as a Non-Degree student. A suitable academic background for coursework in sociology is expected. After completing the University of South Alabama on-line Graduate Application for Admission, permission to enter graduate-level courses in sociology in the Department of Sociology, Anthropology and Social Work should be obtained from the Department's Graduate Coordinator. Non-Degree students subsequently seeking admission to the Master of Arts Program in Sociology must follow and meet the requirements for admission as above outlined. No more than twelve (12) credit hours of graduate-level coursework completed as a Non-Degree student can be applied toward coursework requirements for the Master of Arts degree in sociology.
Program Requirements

To earn the Master of Arts degree in sociology, students must complete thirty (30) credit hours of graduate-level work with a minimum cumulative grade point average of 3.0. At least twenty-four (24) credit hours of graduate-level work must be in sociology. A student who receives two (2) grades of ‘C’ or lower in any graduate-level course while enrolled in the Master of Arts Program in Sociology will be recommended to the Dean of the Graduate School for academic dismissal.

Program requirements, both for master’s students planning to ultimately pursue doctoral-level study and for master’s students planning to ultimately pursue a career in teaching, private industry, government, or community and social service, are as follows:

1. Core Coursework

   Contemporary Sociological Theory (SY 506), Social Research Design (SY 507), and Social Research Analysis (SY 509).

2a. Master’s Practicum Report Proposal, SY 592

For master’s students planning to ultimately pursue a career in teaching, private industry, government, or community and social service, completion of Master’s Practicum Report Proposal (in conjunction with course co-requisite SY 596, Sociology Internship) to generate a practicum report proposal, directed by a member of the sociology graduate faculty, that the student must formally defend. The practicum report proposal and practicum report proposal defense must be approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University’s graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the practicum report proposal defense as Pass or Fail, the latter score initiating one (1) opportunity to re-defend the practicum report proposal within three (3) calendar weeks from the original score notification. Two consecutive practicum report proposal defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology.

2b. Master’s Thesis Proposal, SY 598

For master’s students planning to ultimately pursue doctoral-level study, completion of Master’s Thesis Proposal focused on the specialized subject area of research interest in sociology to generate a thesis proposal, directed by a member of the sociology graduate faculty, that the student must formally defend. The thesis proposal and thesis proposal defense must be approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University’s graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the thesis proposal defense as Pass or Fail, the latter score initiating one (1) opportunity to re-defend the thesis proposal within three (3) calendar weeks from the original score notification. Two consecutive thesis proposal defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology.

3a. Master’s Practicum Report, SY 593

For master’s students planning to ultimately pursue a career in teaching, private industry, government, or community and social service, completion of Master’s Practicum Report based on work in SY 596, Sociology Internship, that satisfied the practicum report proposal. The practicum report must be defended and approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University’s graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the practicum report defense as Pass or Fail, the latter score initiating one (1) opportunity to re-defend the practicum report within three (3) calendar weeks from the original score notification. Two consecutive practicum report defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology. Upon passing the practicum report defense, students must provide the Chair of the Department of Sociology, Anthropology and Social Work with a PDF copy of the practicum report for approval. Students must follow all thesis preparation deadlines and approval guidelines as outlined by the Graduate School.

3b. Master’s Thesis, SY 599

For master’s students planning to ultimately pursue doctoral-level study, completion of Master’s Thesis focused on the specialized subject area of research interest in sociology that satisfies the Master’s thesis proposal. The thesis must be defended and approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University’s graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the thesis defense as Pass or Fail, the
latter score initiating one (1) opportunity to re-defend the thesis within three (3) calendar weeks from the original score notification. Two consecutive thesis defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology. Upon passing the thesis defense, students must provide the Chair of the Department of Sociology, Anthropology and Social Work with a PDF copy of the thesis for approval. Students must follow all thesis preparation deadlines and approval guidelines as outlined by the Graduate School.

The Master of Arts Program in Sociology also offers an accelerated bachelor’s to master’s degree in sociology. For general information see the Graduate School, Admission Requirements and Procedures, Accelerated Bachelor’s to Master’s Program.

Program Requirements

To earn an accelerated Master of Arts degree in sociology, students must complete thirty (30) credit hours of graduate-level work with a minimum cumulative grade point average of 3.0. At least twenty-four (24) credit hours of graduate-level work must be in sociology. A student who receives two (2) grades of “C” or lower in any graduate-level course while enrolled in the Accelerated Bachelor’s to Master’s Program in sociology will be recommended to the Dean of the Graduate School for academic dismissal from the program.

Program requirements, both for students planning to ultimately pursue doctoral-level study and for students planning to ultimately pursue a career in teaching, private industry, government, or community and social service, are as follows:

1. Core Coursework

   Contemporary Sociological Theory (SY 506), Social Research Design (SY 507), and Social Research Analysis (SY 509) completed as an undergraduate.

2a. Master’s Practicum Report Proposal, SY 592

For accelerated master’s students planning to ultimately pursue a career in teaching, private industry, government, or community and social service, completion of Master’s Practicum Report Proposal (in conjunction with course co-requisite SY 596, Sociology Internship) to generate a practicum report proposal, directed by a member of the sociology graduate faculty, that the student must formally defend. The practicum report proposal and practicum report proposal defense must be approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University’s graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the practicum report proposal defense as Pass or Fail, the latter score initiating one (1) opportunity to re-defend the practicum report proposal within three (3) calendar weeks from the original score notification. Two consecutive practicum report proposal defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology.

2b. Master’s Thesis Proposal, SY 598
For accelerated master's students planning to ultimately pursue doctoral-level study, completion of Master's Thesis Proposal focused on the specialized subject area of research interest in sociology to generate a thesis proposal, directed by a member of the sociology graduate faculty, that the student must formally defend. The thesis proposal and thesis proposal defense must be approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University's graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the thesis proposal defense as Pass or Fail, the latter score initiating one (1) opportunity to re-defend the thesis proposal within three (3) calendar weeks from the original score notification. Two consecutive thesis proposal defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology.

3a. Master's Practicum Report, SY 593

For accelerated master's students planning to ultimately pursue a career in teaching, private industry, government, or community and social service, completion of Master's Practicum Report based on work in SY 596, Sociology Internship, that satisfied the practicum report proposal. The practicum report must be defended and approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University’s graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the practicum report defense as Pass or Fail, the latter score initiating one (1) opportunity to re-defend the practicum report within three (3) calendar weeks from the original score notification. Two consecutive practicum report defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology. Upon passing the practicum report defense, students must provide the Chair of the Department of Sociology, Anthropology and Social Work with a PDF copy of the practicum report for approval. Students must follow all thesis preparation deadlines and approval guidelines as outlined by the Graduate School.

3b. Master's Thesis, SY 599

For accelerated master's students planning to ultimately pursue doctoral-level study, completion of Master's Thesis focused on the specialized subject area of research interest in sociology that satisfies the Master's thesis proposal. The thesis must be defended and approved by a faculty committee, the Chair of which must be a member of the sociology graduate faculty. The faculty committee must also include one member of the graduate faculty from within the Department of Sociology, Anthropology and Social Work and one member of the University's graduate faculty from outside of the Department of Sociology, Anthropology and Social Work. The faculty committee will evaluate the thesis defense as Pass or Fail, the latter score initiating one (1) opportunity to re-defend the thesis within three (3) calendar weeks from the original score notification. Two consecutive thesis defenses evaluated by the faculty committee as Fail will result in dismissal from the Master of Arts Program in Sociology. Upon passing the thesis defense, students must provide the Chair of the Department of Sociology, Anthropology and Social Work with a PDF copy of the thesis for approval. Students must follow all thesis preparation deadlines and approval guidelines as outlined by the Graduate School.

The mission of the Department of Speech Pathology and Audiology is to provide undergraduate, masters and doctoral programs that challenge the students to achieve the highest standards of academic learning, scientific inquiry and clinical excellence. The Department of Speech Pathology and Audiology seeks to deliver a comprehensive program of academic, research and clinical training in the areas of speech, language and hearing development and disorders. The Department offers a minor in Speech and Hearing Sciences, Bachelor of Science in Speech and Hearing Sciences, Master of Science in Speech-Language Pathology, Master of Science in Rehabilitation Sciences in Speech-Language Pathology, Doctor of Audiology, and Doctor of Philosophy in Communication Sciences and Disorders degree programs.

The undergraduate program in Speech and Hearing Sciences readies the graduate for a variety of career and educational options based on the knowledge gained from this degree and individual interests and skills. Students who complete the Master of Science in Speech-Language Pathology degree program will meet all the academic and practicum requirements to be eligible for the Clinical Fellowship (CF) that leads to national certification (CCC-SLP) by the American Speech-Language-Hearing Association (ASHA) and eligibility for the Alabama state licensure. Students who complete the Doctor of Audiology degree program will meet all the academic and practicum requirements for national certification (CCC-A) and will also be eligible for the Alabama state licensure.

The Department of Speech Pathology and Audiology offers a Master of Science in Rehabilitation Science, Speech-Language Pathology (MSRS SLP) degree aimed at providing students with rich, robust, clinically relevant, and evidence-based learning experiences. Graduates will have a strong understanding of entry-level and advanced clinical services, will utilize evidence-based research relevant to the field, demonstrate leadership skills that impact delivery of high quality care for patients, and develop skills needed to serve as a patient educator, clinical educator, or faculty member. This program is intended to support international clinicians and academicians wishing to gain further experience with a variety of disorders and principles of rehabilitation. This program is not accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) and does not lead to licensure or professional certification in the United States. Graduation from this program does not guarantee admission to a Master of Science in Speech-Language Pathology or Doctor of Audiology programs. Students enrolled in this program are not eligible for federal financial aid. Admission to the MSRS SLP program is on a competitive basis. For admissions information, visit the department’s website. The MSRS SLP program is an in-residence program requiring 30 credit hours.
The Master of Science in Speech-Language Pathology program at the University of South Alabama is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, (800)-498-2071 or (301)-296-5700.

The Doctor of Audiology program at the University of South Alabama is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850, (800)-498-2071 or (301)-296-5700.

BA, University of South Alabama  
MS, University of South Alabama
Audiology (AuD)

Degree Requirements

The Doctor of Audiology (AuD) is a professional doctoral degree and is administered through the Pat Capps Covey College of Allied Health Professions. The AuD serves either as preparation for professional clinical audiologists or as preparation for further graduate study leading to the PhD degree. The AuD program provides a broad range of basic science courses and specialized offerings emphasizing assessment, intervention, and prevention techniques used with individuals of all ages who have hearing, auditory processing, or balance related disorders. Students are prepared for careers as clinicians in schools, hospitals, rehabilitation centers, private practice and community clinics.

Clinical practicum opportunities occur at the on-campus Speech and Hearing Center and many affiliated rehabilitation centers, schools, private practices, ENT clinics, and hospitals. Within this framework, students are prepared to meet the academic and clinical practicum requirements for national certification (the Certificate of Clinical Competence, CCC-A, awarded by the American Speech-Language-Hearing Association) and Alabama state licensure. The AuD Program is a full-time in-residence program, and typically extends for 11 academic semesters including three semesters of full-time clinical externship.

Details regarding the admissions process and deadline are available on the Department of Speech Pathology and Audiology website.

Regular Admission

To be considered for admission, applicants must:

1. Have earned or be in the process of completing a baccalaureate degree from an accredited college or university.
2. Demonstrate a preferred minimum 3.0 (A=4.0) overall undergraduate GPA.
3. Complete the Graduate Record Examination (GRE), including analytical writing section, within the last five years and submit according to application instructions.
4. International applicants must submit documentary evidence showing TOEFL test scores of at least 600 (written form), 250 (computer version), or 100 (internet based version), or bachelor's or graduate degrees earned at accredited United States institutions of higher education. A minimal IELTS score of 7 is considered equivalent to the TOEFL scores required.
5. Provide three references from faculty at the undergraduate institution. Two of these references should be provided by Ph.D. faculty within the applicant's undergraduate department.
6. Include a Personal Essay stating the applicant's reasons for pursuing the degree, and addressing specific questions outlined in the application instructions.

Because the number of applicants is greater than the number of vacancies in the program, admission is competitive, and applicants are evaluated based on the criteria stated above. Students are admitted in fall semester only. Details regarding the Admissions process and deadline are available on the Department of Speech-Pathology and Audiology website.

Applicants for admission to the MS SLP or AuD program with record of academic misconduct violation(s) or who have been convicted of or plead guilty to misdemeanor or felony offense(s) will be evaluated on an individual basis. Admission may be denied to applicants with any academic misconduct violation(s) and conviction/guilty plea of misdemeanor and/or felony offense(s) as these violations may impact clinical placement opportunities and professional certification and state licensure upon graduation.

Retention Policies

1. Any term in which a graduate student enrolled in the AuD program drops below a 3.0 GPA, the student will be placed on probationary status and has a period of one semester to attain a 3.0 GPA or be dismissed from the program.
2. Any student who receives a grade lower than a "C" in a graduate level course will be dismissed from the program.
3. A "C" in any combination of two or more AUD courses will result in academic dismissal.
4. A passing grade on comprehensive examinations administered during the 1st, 2nd, and 3rd years of the AuD program is required in order to progress to the next year of study. Students who successfully complete an optional research-based thesis and successfully defend this project are only required to complete the comprehensive examination process in years 1 and 2 of the AuD program. In the event that the thesis is not satisfactorily completed, the student will be required to successfully pass the 3rd year comprehensive examination prior to graduation.
5. Students whose performance falls below standards in a course or clinical experience may be required to complete additional and/or augmentative coursework or clinical experiences as needed to meet ASHA’s standards for clinical certification. As such, graduation could be delayed.

6. If for any reason a student must withdraw from the AuD program, re-admission will require approval of the Department Chair and the Dean of the Pat Capps Covey College of Allied Health Professions.

7. If a student is dismissed from a program prior to the end of the regular semester and that dismissal occurs after the University’s refund deadline, the student will not receive any type of refund even if the next series of classes have not begun.

Requirements For The Degree

The Doctor of Audiology (AuD) degree requires:

- A minimum of eleven full-time semesters of academic study. Typically, the final three semesters are spent off campus completing a full-time externship.
- A minimum GPA of 3.0.
- A passing grade on comprehensive examinations administered during years 1, 2, and 3 of the program. Students must also complete formative assessments throughout the program. Students who successfully complete an optional research project under the mentorship of program faculty and successfully defend this project are only required to complete the comprehensive examination process in years 1 and 2 of the AuD program. In the event that the research project is not satisfactorily completed, the student will be required to successfully pass the 3rd year comprehensive examination prior to graduation.
- Demonstration of academic and clinical competencies as reflected in the ASHA Standards for Clinical Certification for Audiology.
- Completion of at least 1820 supervised clinical clock hours.
- The Praxis Examination in Audiology must be taken prior to graduation.

Communication Sciences And Disorders (PhD)

Degree Requirements

The Doctor of Philosophy (PhD) Program in Communication Sciences and Disorders (CSD) offers students specialization in speech-language pathology, communication sciences, or audiology. This individualized, mentored, and interdisciplinary program is designed to provide a formal course of academic instruction and advanced research training in CSD aimed at developing leaders in research, teaching, and professional service. The mission of the PhD program is to prepare students for responsible and successful careers as scholars by enabling them to gain the necessary knowledge and skills in the CSD discipline. Graduates will be prepared for research, scientific writing, teaching and supervision/mentorship through pedagogy, mentorship, and internship activities. The student’s ability to engage in original research and scholarship is enhanced by coursework in experimental research design and statistics, as well as various out-of-department opportunities.

Completion of the PhD degree in CSD requires the following:

1. Admission to PhD CSD program
2. Admission to doctoral candidacy
3. Successful completion of a dissertation project
4. Completion of additional program requirements (e.g., training in human subjects research)

Regular Admission

To be considered for admission, applicants must:

1. Have earned or be in the process of completing a graduate degree from an accredited college or university.
2. Demonstrate a preferred minimum 3.0 (A=4.0) overall undergraduate GPA.
3. Complete the Graduate Record Examination (GRE), including analytical writing section, within the last five years and submit according to application instructions.
4. International applicants must submit documentary evidence of English proficiency through submission of English proficiency exam results, including TOEFL or IELTS, or have earned a bachelor’s or graduate degrees accredited United States institutions of higher education.
5. Provide three references from faculty at the graduate institution. At least two of these references should be provided by Ph.D. faculty within the applicant’s graduate department.
6. Include a Personal Essay stating the applicant’s reasons for pursuing the degree, experience that has prepared the applicant for the PhD program, potential research areas of interest, professional goals following degree completion.

Because the number of applicants is greater than the number of vacancies in the program, admission is competitive, and applicants are evaluated based on the criteria stated above. Students are admitted at the start of Fall, Spring, or Summer term. Details regarding the admissions process and deadline are available on the Department of Speech-Pathology and Audiology website.

Graduate Assistantships

Graduate assistantships are available annually on a competitive basis.

Transfer Credit

Transfer of credits toward the PhD requires approval of the PhD Admissions Committee, Department Chair, Director of Graduate Studies for the Pat Capps Covey College of Allied Health Professions, and the Dean of the Graduate School.

Comprehensive Examination

The student must pass a comprehensive examination following successful completion of academic coursework. The comprehensive examination is comprised of written and oral portions encompassing major and minor content areas, and research design and statistical procedures. Examination questions are designed by the faculty on the Comprehensive Exam Committee to assess overall knowledge, integration, and understanding acquired during the program of study.
Candidacy

The student's admission to doctoral degree candidacy is based upon successful completion of academic coursework, predissertation research project, and written and oral components of the comprehensive examination. A GPA of 3.0 must be maintained throughout academic coursework.

Typically, students who enter the program with a Master's degree complete these requirements by the end of their 2nd year and no later than the end of their 3rd year of program enrollment.

Dissertation/Dissertation Defense

After admission to candidacy, the student and his/her Major Advisor determine the dissertation topic and develop the Dissertation Committee. After determining the topic and Committee, the student prepares a Dissertation Prospectus, which is submitted in written form and orally defended. Once the Prospectus is approved by the Dissertation Committee, the student may move forward with completion of the Dissertation project.

The Dissertation is submitted in written form and orally defended. The committee’s acceptance of the dissertation is the final component needed at the departmental level before granting the PhD degree. All students must abide by the deadlines for final oral examination and final dissertation submission set by the Graduate School. The deadlines for submission to the Dean of the Graduate School are provided in the latest edition of the Graduate School Bulletin. While only 21 semester hours of dissertation research may count towards the degree, a student must continually enroll in CSD 799 (Dissertation Research) until the final dissertation document has been approved by the Dean of the Graduate School.

Time Limit

Students are expected to complete all requirements for the PhD degree within seven calendar years from admission to the PhD program. After reaching candidacy, students must complete the dissertation requirement within three years. Extensions may be requested and granted under appropriate circumstances.
Minor In Speech And Hearing Sciences

Degree Requirements

The Department of Speech Pathology and Audiology offers a minor degree in Speech and Hearing Sciences for students across the University community with an interest in learning about communication sciences and disorders. Students in the minor degree program in Speech and Hearing Sciences will learn about communication across the lifespan, gain knowledge of communication disorders, and have a basic understanding of how to interact with individuals with communication disorders in educational, social, and employment settings. The undergraduate minor in Speech and Hearing Sciences requires a minimum of 19 credit hours. A "C" or better must be earned for all courses.

Note: Prerequisites must be met to enroll in SHS 331, SHS 341, SHS 373, SHS 374, SHS 414, SHS 431, SHS 453, and SHS 480.

Requirements For The Speech And Hearing Sciences Departmental Honors Program

Students in the Bachelor of Science in Speech and Hearing Sciences degree program may complete requirements to earn the Departmental Honors designation. Students will work with a faculty mentor from the Speech and Hearing Sciences program and two other faculty members to complete a Senior Honors Thesis project. See the SHS webpage for specific criteria.
Rehabilitation Sciences, Speech-Language Pathology (MSRS SLP)

Degree Requirements

The Master of Science in Rehabilitation Science, Speech-Language Pathology (MSRS SLP) degree program is aimed at providing students with rich, robust, clinically relevant, and evidence-based learning experiences. Graduates will have a strong understanding of entry-level and advanced clinical services, will utilize evidence-based research relevant to the field, demonstrate leadership skills that impact delivery of high quality care for patients, and develop skills needed to serve as a patient educator, clinical educator, or faculty member. This program is intended to support international clinicians and academicians wishing to gain further experience with a variety of disorders and principles of rehabilitation. This program is not accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) and does not lead to licensure or professional certification in the United States. Graduation from this program does not guarantee admission to a Master of Science in Speech-Language Pathology or Doctor of Audiology programs. Students enrolled in this program are not eligible for federal financial aid. Admission to the MSRS SLP program is on a competitive basis. For admissions information, visit the department’s website. The MSRS SLP program is an in-residence program requiring 30 credit hours.

The program runs August to July and is divided into three semesters (Fall, Spring and Summer). The MSRS SLP program requires the following coursework:

<table>
<thead>

Speech And Hearing Sciences (BS SHS)

Degree Requirements

General Education Requirements (56-60 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-12 Hours)
A. 3-4 hours from: MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 4 hours from: BLY 121 & BLY 121L
C. 4 hours from: BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, PH 115 & PH 115L, PH 201 & PH 201L, PH 202 & PH 202L

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 3 hours: PSY 120
C. 6 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 250, SHS 210, SY 109, SY 112

Area V - Pre-Professional Major & Electives (15-18 Hours)
A. 0-3 hours from **CIS 010, CIS 150, CIS 250
B. 4 hours: BMD 251
C. 4 hours: BMD 252
D. 3 hours from: ST 210, ST 305
E. 4 hours from: PH 104 & PH 104L or higher

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

All undergraduates must complete two designated writing credit (W) courses, at least one of which must be in the student's major or minor.

Major Requirements (53-54 Hours)

Electives (6 Courses, 18 Hours)
A. 3 hours from: PSY 250, PSY 350
B. 3 hours from: PSY 250, BLY 207, HSC 450, SY 372, LS 479, GRN 290, IST 201, IST 401, SY 435
C. 3 hours from: PSY 270, PSY 485, IST 320, IS 100, IS 200, AN 100, AN 101, AN 340, AN 344, AN 347, AN 496, AFR 101, LG 110, LG 305, GS 101, PSC 452, REL 352, REL 354, REL 355, SY 220
D. 6 hours from: PSY 250, PSY 250, PSY 270, PSY 485 (PSY courses of your choice – any Psychology course besides PSY 120)
E. 3 hours from: AN 100, AN 101, AN 340, AN 344, AN 347, AN 496, AFR 101, BLY 207, GRN 290, GS 101, HSC 450, IST 100, IST 200, IST 320, IST 401, LG 110, LG 305, LS 479, PSC 452, PSY 250, PSY 270, PSY 485, REL 352, REL 354, REL 355, **SHS 210**, SY 220, PSY 250, PSY 350, PSY 485, REL 352, REL 354, REL 355, SHS 210, SY 220, PSY 250, PSY 350, SY 372, SY 435

Required Speech And Hearing (SHS) Courses (11 Courses, 35-36 Hours)
A. 32 hours: SHS 201, SHS 302, SHS 315, SHS 331, SHS 341, SHS 373, SHS 374, SHS 414, SHS 431, SHS 453
B. 3-4 hours from: SHS 480, SHS 481

Minor Requirements (0 Hours)
A minor is not required for this degree program

Notes:
* Recommended Course
Courses in BOLD are recommended for the program.

Additional Information
** Students complete BMD 251, BMD 252, CIS 150 or CIS 010 or CIS 250, and PH 104 & PH 104L during the first two years. An overall GPA of 2.75 is recommended prior to enrolling in SHS 315 and SHS 341. Students must maintain a grade of C or better in all upper-level (300-400) SHS courses. Select students will take SHS 481 in place of SHS 480. Students will be selected to take SHS 481 on a competitive basis and must submit an application and its supplemental items to the Department of Speech Pathology and Audiology by the advertised deadline. Students selected to take SHS 481 will be required to maintain an overall GPA of 3.0 or higher and must earn a B or better in all SHS courses. A minimum of 120 credit hours is required. Students will need to take general electives to fill out any remaining credit hours needed.

### Notes

1. Student has the option of passing the Computer Proficiency Exam (CIS 010) or taking CIS 150 or CIS 250.
*** A two-course sequence must be completed in either Literature or History.

* Recommended Course

** See Degree Requirements

Requirements For The Speech And Hearing Sciences Departmental Honors Program

Students in the Bachelor of Science in Speech and Hearing Sciences degree program may complete requirements to earn the Departmental Honors designation. Students will work with a faculty mentor from the Speech and Hearing Sciences program and two other faculty members to complete a Senior Honors Thesis project. See the SHS program webpage on the Department of Speech and Pathology and Audiology website for specific criteria.
Speech-Language Pathology (MSSLP)

Degree Requirements

The Master of Science in Speech-Language Pathology (MSSLP) serves either as professional preparation for clinical certification by the American Speech-Language-Hearing Association (ASHA) or as preparation for graduate study leading to the Ph.D. degree. The MSSLP program provides a broad range of basic science courses and specialized offerings emphasizing evaluation and treatment of language, articulation, fluency, voice, swallowing, and neurologically-based communication disorders. Students are prepared for careers as clinicians in schools, hospitals, rehabilitation centers, and community clinics.

Clinical practicum experiences occur at the on-campus Speech and Hearing Center and many affiliated clinics, rehabilitation centers, schools, and hospitals. Within this framework, students must meet the academic and practicum requirements leading to the Clinical Fellowship (CF) that occurs post graduation. Completion of the CF results in eligibility for national certification, the Certificate of Clinical Competence (CCC-SLP) awarded by ASHA, and eligibility for State of Alabama Licensure. The MSSLP program is a full-time, in-residence program. For students with a background in communication sciences and disorders, the MSSLP program typically extends for five academic semesters, including one semester of clinical externship. For those students who do not have a background in communication sciences and disorders, the program of study can be expected to last six academic semesters.

Typical Requirements For The Degree

The Master of Science in Speech-Language Pathology degree requires:

1. A minimum of five semesters of full-time study. The final semester is spent off campus completing the externship. Students who enter the program without a background in communication sciences and disorders will require additional coursework and six semesters of full-time study.
2. A minimum GPA of 3.0.
3. A passing grade on comprehensive examinations before leaving for the externship, or satisfactory completion of a thesis.
4. Demonstration of academic and clinical competencies as reflected in the 2020 Standards for Clinical Certification in Speech-Language Pathology Verification by Program Director document. This includes verification of completed coursework in biological science, physical science, social/behavioral science, and statistics. Typically, this coursework is completed at the undergraduate level.
5. Completion of 375 supervised clinical clock hours in the required areas as stipulated by ASHA. Students without an undergraduate degree in Communication Sciences and Disorders or related field must complete 25 hours of clinical observation before beginning the supervised clinical experience to meet the 375 clinical clock hour requirement.

Regular Admission

To be considered for admission, applicants must:

1. Have earned or be in the process of completing a baccalaureate degree from an accredited college or university.
2. Demonstrate a preferred minimum 3.0 (A=4.0) overall undergraduate GPA.
3. Complete the Graduate Record Examination (GRE), including analytical writing section, within the last five years and submit according to application instructions.
4. International applicants must submit documentary evidence showing TOEFL test scores of at least 600 (written form), 250 (computer version), or 100 (internet-based version), or bachelor’s or graduate degrees earned at accredited United States institutions of higher education. A minimal IELTS score of 7 is considered equivalent to the TOEFL scores required.
5. Provide three references from faculty at the undergraduate institution. Two of these references should be provided by Ph.D. faculty within the applicant's undergraduate department.
6. Include a Personal Essay stating the applicant’s reasons for pursuing the degree, and addressing specific questions outlined in the application instructions.

Because the number of applicants is greater than the number of vacancies in the program, admission is competitive, and applicants are evaluated based on the criteria stated above. Students are admitted in fall semester only. Details regarding the Admissions process and deadline are available on the Department of Speech-Pathology and Audiology website.
Retention Policies

1. Any term in which a graduate student enrolled in the MSSLP program drops below a 3.0 GPA, the student will be placed on probationary status and has a period of one semester to attain a 3.0 GPA or be dismissed from the program.
2. Any student who receives a grade lower than a "C" in a graduate level course will be dismissed from the program.
3. A "C" in any combination of two or more MSSLP courses will result in academic dismissal.
4. Students whose performance falls below standards in a course or clinical experience may be required to complete additional and/or augmentative coursework or clinical experiences as needed to meet ASHA’s standards for clinical certification. As such, graduation could be delayed.
5. If for any reason a student must withdraw from the MSSLP program, re-admission will require approval of the Department Chair and the Dean of the Pat Capps Covey College of Allied Health Professions.
6. If a student is dismissed from a program prior to the end of the regular semester and that dismissal occurs after the University’s refund deadline, the student will not receive any type of refund even if the next series of classes have not begun.

Systems Engineering Program website
https://www.southalabama.edu/colleges/engineering/phd-se

Doctor Of Philosophy (Ph.D.)

The Doctor of Philosophy (Ph.D.) in Systems Engineering offers students a holistic approach to the design and understanding of complex systems. NASA defines systems engineering as “a holistic, integrative discipline, wherein the contributions of structural engineers, electrical engineers, mechanism designers, power engineers, human factors engineers, and many more disciplines are evaluated and balanced, one against another, to produce a coherent whole that is not dominated by the perspective of a single discipline.” At USA, we emphasize a model-based systems engineering approach (MBSE) in many of our courses. The main objectives of the Ph.D. program are to (1) provide our graduates with the ability to approach all systems (engineered, environmental, coastal, biological, social/organizational, etc.) with the ability to understand the entire system lifecycle in a manner that meets the needs of industry, and (2) prepare our graduates for leadership positions requiring applied research along with critical and creative thinking. This program is appropriate for students who want to pursue research-based careers in industry, government, or academia. The program requires coursework across multiple engineering disciplines, and specific, validated systems research resulting in a publicly defended doctoral thesis.

Requirements For Admission (With Master's Degree)

In addition to meeting Graduate School requirements, the requirements for admission with a Master's degree to the Ph.D. Program are as follows:

1. A written Statement of Purpose outlining the applicant's professional goals and commitment to completing the degree requirements.
2. Three letters of recommendation from individuals familiar with the student's academic and technical abilities.
3. A M.S. degree in a discipline related to engineering (e.g. civil, computer, chemical, electrical, industrial, mechanical engineering, etc.).
4. A B.S. degree in a discipline related to engineering (e.g. civil, computer, chemical, electrical, industrial, mechanical engineering, etc.) (The Ph.D. Admission committee reserves the right to review the coursework at the B.S. level before making any admission decision.)
5. A grade point average of 3.0 or greater (on a scale of 4.0) on all graduate coursework.
6. Applicants whose highest degree is a graduate degree from an accredited institution of higher education will not be required to provide GRE scores.
7. For international students whose native language is not English, a minimum score of 79 on the Internet-based TOEFL, or a minimum score of 213 on the computer-based TOEFL, or a minimum score of band 6.5 on the IELTS test, or a minimum overall score of 58 on the Pearson PTE Academic Test.
8. Official transcripts from all colleges and universities attended by the applicant.

Students may be required to present GRE scores to be eligible for some assistantships or fellowships.

Final admission decisions are made based upon an evaluation of the applicant's complete file which consists of all official academic transcripts, undergraduate grade-point average, GRE scores (when required), three letters of reference regarding the
applicant's ability to succeed in the Ph.D. in Systems Engineering, the applicant's statement of purpose, and TOEFL or IELTS or iTEP or Pearson PTE Academic score (for International applicants), applicant's work history, program enrollment and funding availability if required by applicant.

Admission may be granted by the Systems Engineering Program Director in special cases where a holistic evaluation of the credentials is appropriate.

Requirements For Admission (With Bachelor's Degree)

In addition to meeting Graduate School requirements, the requirements for acceptance without a Master's degree are as follows:

1. A Bachelor's degree in a discipline related to engineering (e.g. civil, computer, chemical, electrical, industrial, mechanical engineering, etc.). Other STEM Bachelor's degrees MAY be considered if the degree led to working in an Engineering field and the applicant has gained experience. (Factors such as length of time and experience gained will be considered at the admission committee's discretion. The Ph.D. admission committee reserves the right to review the coursework at the B.S. level before making any admission decision.)
2. A grade point average of 3.0 or greater (on a scale of 4.0) on all undergraduate coursework.
3. A grade of B or higher for all graduate courses to be considered as transfer credits from previous institutions attended. Only graduate credits that have not been applied to another degree can be considered for transfer.
4. Official transcripts from all colleges and universities attended.
5. A minimum score of 151 in the Verbal portion and a minimum score of 151 in the Quantitative portion of the Graduate Record Examination (GRE).
6. For international students whose native language is not English, a minimum score of 79 on the Internet-based TOEFL, or a minimum score of 213 on the computer-based TOEFL, or a minimum score of band 6.5 on the IELTS test, or a minimum overall score of 58 on the Pearson PTE Academic Test.

Applicants for the Ph.D. program must submit officially certified scores on the Graduate Record Exam (GRE). This requirement is waived for students who received an engineering B.S. degree from the University of South Alabama. (Those students may be required, however, to present GRE scores to be eligible for some assistantships or fellowships.) Applicants holding a current P.E. license, or holding a Bachelor's degree in an engineering discipline (e.g. civil, computer, chemical, electrical, industrial, or mechanical engineering), or a minimum of five years of engineering work experience, may request that the GRE requirement be waived.

Final admission decisions are made based upon an evaluation of the applicant's complete file which consists of all official academic transcripts, undergraduate grade-point average, GRE scores (when required), three letters of reference regarding the applicant's ability to succeed in the Ph.D. degree in Systems Engineering, the applicant's statement of purpose, TOEFL or IELTS or iTEP or Pearson PTE Academic scores (for International applicants), applicant's work history, program enrollment and funding availability if required by applicant.

Admission may be granted by the Systems Engineering Program Director in special cases where a holistic evaluation of the credentials is appropriate.

Master Of Science In Systems Engineering (MS)

The program for the Master of Science in Systems Engineering (MSSE) focuses on holistic views of systems. As the complexity of everything increases, it is important for engineers to recognize that everything can be viewed as a system. The MSSE takes a total system lifecycle view – from cradle to grave. The program provides an ideal mix of theory and a practical experience-based approach to systems engineering. It is suitable for both working engineers looking for a broader view of engineering as well as for full-time students wishing to find out more about systems. Courses include the system lifecycle, project engineering, systems thinking and software systems engineering. At USA, we emphasize a model-based systems engineering approach (MBSE) in many of our courses. Graduates will have acquired the background needed to move into any industry that understands and values early concept development, the importance of solid systems requirements, systems integration, and verification and validation. Program admission and MS degree requirements, as well as plan of study options (thesis, project, and coursework only), are described under the College of Engineering section of this Bulletin. Most graduate courses in Systems Engineering are offered in late afternoon or early evening, in a blended classroom/webcast format to accommodate remote and practicing engineers.

Admission may be granted by the Systems Engineering Program Director in special cases where a holistic evaluation of the credentials is appropriate.

Requirements For Admission To MSSE Program

The following requirements are additional to the admission criteria for the College of Engineering (see Admission to Graduate Programs):
Regular Admission
1. A grade-point average of 3.0 or greater on a scale of 4.0 on all undergraduate work.
2. A minimum score of 151 on the GRE quantitative section and a minimum score of 146 on the GRE verbal section.
3. For students whose native language is not English, a minimum score of 79 on the internet-based TOEFL or a minimum IELTS band score of 6.5 or a minimum overall score of 58 on the Pearson PTE Academic Test.

Provisional Admission
1. A minimum grade-point average of 2.5 on a scale of 4.0 on all undergraduate work.
2. A minimum score of 141 on the GRE quantitative section and a minimum score of 138 on the GRE verbal section.
3. For students whose native language is not English, a minimum score of 79 on the internet-based TOEFL or a minimum IELTS band score of 6.5 or a minimum overall score of 58 on the Pearson PTE Academic Test.

Applicants for the MSSE program must submit officially certified scores on the Graduate Record Exam (GRE). This requirement is waived for students who received an engineering BS degree from the University of South Alabama. (Those students may be required, however, to present GRE scores to be eligible for some assistantships or fellowships.) Applicants holding a current P.E. license, or holding a Bachelor's degree in an engineering discipline (e.g. civil, computer, chemical, electrical, industrial, or mechanical engineering), or a minimum of five years of engineering work experience, may request that the GRE requirement be waived.

Final admission decisions are made based upon an evaluation of the applicant’s complete file which consists of all official academic transcripts, undergraduate grade-point average, GRE scores (when required), and TOEFL or IELTS or iTEP or Pearson PTE Academic score (for International applicants), applicant's work history, program enrollment and funding availability if required by applicant.

Admission may be granted by the Systems Engineering Program Director in special cases where a holistic evaluation of the credentials is appropriate.

# Systems Engineering (MS)

## Degree Requirements

### Requirements For Systems Engineering (MS) — 30 Credit Hours

All MSSE students are required to pass a written Comprehensive Examination. Students completing the thesis option will give an oral presentation of their work (i.e. thesis defense) which will count as the Comprehensive Examination.

### Core Courses For All MSSE Options
- SE 500: Engineering Probability & Statistics
- SE 601: Systems Engineering Fundamentals
- SE 602: Risk and Failure Analysis
- SE 603: Integration, Test & Evaluation
- SE 606: Systems Architecture

Master of Science students in Systems Engineering must complete the core courses listed plus the courses listed for one of the options:
- Option 1: Thesis Option
- Option 2: Course Only Option
- Option 3: Project Option

### Option 1: Thesis Option (30 Hours)
This option includes a traditional 6-credit Master’s Thesis.

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Hours</th>

<td>6</td>
</tr>
<tr>
<td>Thesis or Dissertation credit hours required</td>
<td>6</td>
</tr>
<tr>
<td><strong>Total credit hours required for completion</strong></td>
<td><strong>30</strong></td>
</tr>
</tbody>
</table>

Students completing the thesis option will give an oral presentation of their work (i.e. thesis defense) which will count as the Comprehensive Examination.

### Option 2: Project Option (30 Hours)
This reflects the option of the student working on a project related to their employer’s discipline and interest.

<table>

</tr>
</tbody>
</table>
Support Courses credit hours required  N/A
Required or Free Electives credit hours required  12
Project credit hours required  3
Total credit hours required for completion  30

Students completing the project option will give an oral presentation of their work which will count as the Comprehensive Examination.

Option 3: Course Only Option (30 Hours)
This allows a student to take 10 courses, pass the comprehensive exam and graduate.

<table>
<thead>
<tr>

Required Examinations

Required Examinations in the Systems Engineering PhD program have two parts. There is a written component, and an oral component to each. The exams are:

• Qualifying Exam: Written and Oral
• Proposal Defense: Written and Oral
• Dissertation Defense: Written and Public Oral Defense
Systems Engineering Certificate Program

Degree Requirements

The University of South Alabama Systems Engineering Certificate is a 12-hour academic program. The program is intended to give students a solid grounding in systems engineering. This program is meant for those who do not want to pursue a full Master’s degree, but need to know more about systems engineering than is typically covered in a Bachelor’s degree.

Program Requirements: For acceptance in the program, applicants should have an engineering Bachelor’s degree or equivalent math/science degree. Award of the Systems Engineering Certificate requires satisfactory completion of 12 credit hours with a minimum GPA of 3.0.

Theatre And Dance

Department Information

Department of Theatre & Dance website
https://www.southalabama.edu/colleges/artsandsci/theatre/

The programs are designed to provide students with a theoretical foundation and a practical proficiency in the arts of theatre.

The Bachelor of Arts (B.A.) allows the student to gain a better understanding of the theatre, while the Bachelor of Fine Arts (B.F.A.) provides pre-professional training in the same field. Both include lectures, workshops, and practical experience in all phases of the theatre. Please note: Admittance to the Theatre Arts (BFA) Performance Concentration requires a successful audition and interview. Incoming students who are interested in this concentration will be initially enrolled as drama (BA) students.

All first-time freshmen must successfully complete CAS 100: First Year Experience as a degree requirement. Students must enroll during their first term at USA, except for summer-entry students who must enroll in the fall semester following entry. DRA 150 will fulfill the technology proficiency requirement for Theatre & Dance majors.

Drama (BA)

Degree Requirements

General Education Requirements 53-57 Hours

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (5 Courses, 15 Hours)
A. 3 hours: CA 110
B. 3 hours from: EH 215, EH 216, EH 225, EH 226, EH 235, EH 236
C. 3 hours from: ARH 100, ARH 103, ARH 123, ARS 101, DRA 110, MUL 101

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L, GY 111 & GY 111L, GY 112 & GY 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, PH 101 & PH 201L, PH 202 & PH 202L. Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (4 Courses, 12 Hours)
A. 3 hours from: HY 101, HY 102, HY 135, HY 136
B. 9 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (3 Courses, 9-10 Hours)
A. Foreign Language. 6 hours from any one group:
   LG 101 & LG 102, LG 106 & LG 107, LG 110 & LG 111, LG 111 & LG 112 or proficiency test or LG 113, LG 121 & LG 122, LG 131 & LG 132 or proficiency test or LG 134, LGS 131 & LGS 132, LG 141 & LG 142, LGS 141 & LGS 142, LG 151 & LG 152 or proficiency test or LG 153, LGS 161 & LGS 162, LG 171 & LG 172 or LG 173, LGS 171 & LGS 172, LGS 181 & LGS 182

   Students may fulfill the foreign language requirement by passing a proficiency test offered by the Department of Modern Languages and Literature at the level equivalent to the second semester of the foreign language sequence, or by passing another test (e.g., AP (Advanced Placement) or CLEP (College Level Examination Program) at the equivalent level). Students who pass a proficiency test at the level equivalent to first semester of the foreign language sequence are required to complete only the second semester and will fulfill the foreign language requirement with 3 credit hours of course work.

B. Natural Sciences/Math. 3-4 hour lab science or math/stat course from:
   AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L,
Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

**Major Requirements (45 Hours)**

**Drama Major Core (17 Courses, 45 Hours)**

A. 30 hours: DRA 100, DRA 101, DRA 106, DRA 125, DRA 135, DRA 136, DRA 150, DRA 235, DRA 340, DRA 350, DRA 351, DRA 480

B. 3 hours from: DRA 220, DRA 221, or DRA 323

C. 3 hours from: DRA 330, DRA 331, or DRA 334

D. 9 additional electives hours in DRA, of which at least 6 must be upper division

**Minor Requirements (22 Hours)**

A minor is required for this degree program

**Notes:**

**Additional Information**

DRA 150 satisfies the Technology Proficiency for the major.

DRA 350 and DRA 351 satisfy the Writing requirement for the major.

**Graduation Plan**

**Drama (BA): Drama (120 Total Hours)**

**First Year - Fall Semester**

Theatre Arts (BFA) - Performance Concentration

Degree Requirements

General Education Requirements (32-35 Hours)

Area I - Written Composition (2 Courses, 6 Hours)
A. 3 hours: EH 101
B. 3 hours: EH 102

Area II - Humanities & Fine Arts (4 Courses, 12 Hours)
A. 6 hours from EH 302, EH 322, EH 323, EH 460, EH 461, EH 462, EH 463, EH 472, or EH 390 w/Drama Topic

Area III – Natural Sciences & Mathematics (3 Courses & Labs, 11-14 Hours)
A. 3-4 hours from: MA 110, MA 112, MA 113, MA 115, MA 120, MA 125, MA 126, MA 227, MA 237, MA 238
B. 8-10 hours from: AN 121 & AN 121L, BLY 101 & BLY 101L or BLY 121 & BLY 121L, BLY 102 & BLY 102L or BLY 122 & BLY 122L, CH 101 & CH 101L, CH 103 & CH 103L, CH 131 & CH 131L, CH 132 & CH 132L, GEO 101 & GEO 101L, GEO 102 & GEO 102L, GE 111 & GE 111L, GE 112 & GE 112L, MAS 134 & MAS 134L, PH 101 & PH 101L, PH 104 & PH 104L, PH 114 & PH 114L, PH 115 & PH 115L, PH 201 & PH 201L, PH 202 & PH 202L. Note: BLY 121 and BLY 122 are restricted to Arts and Sciences science majors, Allied Health science majors, Engineering majors, and Computer Science majors. Students cannot receive credit for both BLY 101 and BLY 121 or for both BLY 122 and BLY 102.

Area IV – History, Social & Behavioral Sciences (6 Courses, 12 Hours)
A. 6 hours from: HY 101, HY 102, HY 135, HY 136
B. 6 hours from: AN 100, AN 101, CA 100, CA 211, CJ 105, ECO 215, ECO 216, GEO 114, GEO 115, GS 101, HY 101, HY 102, HY 135, HY 136, IS 100, IST 201, NAS 101, PSC 130, PSY 120, PSY 250, SY 109, SY 112

Area V (0-23 Hours)

Students must complete a 6 credit hour sequence either in literature (Area II – EH 215 & EH 216, EH 225 & EH 226, or EH 235 & EH 236) or history (Area IV – HY 101 & HY 102 or HY 135 & HY 136)

Major Requirements (85 Hours)

Dramatic Arts Core (11 Courses, 27 Hours)
A. 30 hours: DRA 100, DRA 101, DRA 106, DRA 125, DRA 135, DRA 136, DRA 150, DRA 235, DRA 340, DRA 351, DRA 480

Performance Concentration (21 Courses, 58 Hours)
A. 25 hours: DRA 100, DRA 104, DRA 105, DRA 220, DRA 221, DRA 300, DRA 301, DRA 302, DRA 323, DRA 496
B. 9 hours from: DRA 420 (must include 1 semester of "Acting Shakespeare"
C. 3 hours from: DRA 330, DRA 331, or DRA 334
D. 12 hours from Drama electives, of which at least 6 must be upper division
E. 9 hours from Art and/or Music electives (must include MUA 124 or MUE 121)

Minor Requirements (0 Hours)

A minor is not required for this degree program
Notes:
Admittance to the Theatre Arts (BFA) Performance Concentration requires a successful audition and interview. Incoming students who are interested in this concentration will be initially enrolled as drama (BA) students.

Accounting (ACC) (ACC)

ACC 211 Financial Accounting 3 cr
The course provides an understanding of ways in which financial accounting information supports business decision-making. The focus is on the financial statements and the transactions and processes that produce them. ACC 211 and ACC 212 must be taken in sequence.

ACC 212 Managerial Accounting 3 cr
The course provides an understanding of ways in which managerial accounting information supports business decision-making. The focus is on identifying, measuring, analyzing, interpreting, and communicating financial information to managers for the pursuit of an organization's goals. ACC 211 and ACC 212 must be taken in sequence. Pre-requisite: ACC 211 Minimum Grade of C.

ACC 310 Intro to Acc & Bus Software 3 cr
An introductory course in practical application and study of current accounting and business software. The course provides an overview of commonly used business and accounting software with practical applications. Pre-requisite: ACC 212 Minimum Grade of C.

ACC 321 Acct for Entrepreneurial Bus 3 cr
A study of the analysis and use of accounting information by entrepreneurial businesses. Among the topics covered are typical financing sources of entrepreneurial businesses and valuation of closely held businesses. In addition, the course includes coverage of how financial statements can be used to: manage a business, monitor an entity's performance, determine credit decisions, manage cash flow, and prepare forecasted financial statements. Pre-requisite: (ACC 212 Minimum Grade of C or BMS 212 Minimum Grade of D).

ACC 331 Taxation of Individuals 3 cr
Basic federal income tax law and tax planning considerations relating to individuals. Pre-requisite: ACC 212 Minimum Grade of C or BMS 212 Minimum Grade of C.

ACC 341 Accounting Information Systems 3 cr
The study of accounting as a comprehensive information system which provides for planning and control, special reports, and preparation of external financial statements. Pre-requisite: (ACC 212 Minimum Grade of C or BMS 212 Minimum Grade of D) and CIS 250 Minimum Grade of D.

ACC 371 Intermediate Accounting 1 3 cr
Accounting theory as related to income measurement; preparation of balance sheets and income statements; recognition, measurement, and reporting of assets. Pre-requisite: ACC 212 Minimum Grade of C and (MA 112 Minimum Grade of D or MA 120 Minimum Grade of D or MA 125 Minimum Grade of D or MA 126 Minimum Grade of D).

ACC 372 Intermediate Accounting II 3 cr
Includes measurement, recognition and reporting of liabilities, equities, investments, and deferred taxes; EPS, and the preparation of cash flow statements. Coverage of selected professional pronouncements. Pre-requisite: ACC 313 Minimum Grade of C or ACC 371 Minimum Grade of C.

ACC 380 Cost Accounting for Managers 3 cr
Managers must use cost and revenue data to make decisions about which products or services to produce. This course teaches managers about cost-accounting theory and practice including job-order and process-cost systems, cost-volume-profit relationships, budgets, standard costs, variance analysis, direct costing, and cost allocation. Pre-requisite: ACC 212 Minimum Grade of C.

ACC 381 Cost Accounting 3 cr
Includes cost-accounting theory and practice involving such topics as job-order and process-cost systems, cost-volume-profit relationships, budgets, standard costs, variance analysis, direct costing, and cost allocation. Pre-requisite: (ACC 212 Minimum Grade of C or BMS 212 Minimum Grade of D).

ACC 410 Forensic Accounting 3 cr
An intro to principles for forensic accounting and professional ethics. Civil and criminal procedures and litigation services are covered. The courses introduces forensic accounting topics such as fraud, bankruptcy, digital forensics, and financial statement misrepresentation. Pre-requisite: ACC 372 Minimum Grade of C.

ACC 416 Int'l and Advanced Accounting 3 cr
Study of accounting in a global context including standards and issues and the roles and responsibilities of accountants. Additional topics include: business combinations, partnership accounting, interim and segmented reporting. Pre-requisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C.
**ACC 432**  Tax of Partnerships and Corps  
An examination of the federal tax treatment of partnerships and corporations. Topics include: tax aspects of the formation of the entity, elements of gross income, treatment of property dispositions, allowable deductions and credits, determination of entity and investor basis, and liquidation of the entity.
Pre-requisite: (ACC 331 Minimum Grade of C or ACC 411 Minimum Grade of D) and (ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C).

**ACC 451**  Auditing - W  
Theory and application of the attest function, ethical issues, and written communication for accountants. Includes standards, objectives, review of internal control structures, tests of controls, substantive testing and reporting. Ethical issues and the preparation of written letters and formal reports are covered.
Pre-requisite: (ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C) and MGT 305 Minimum Grade of D.

**ACC 452**  Advanced Auditing & Analytics  
Advanced study of the application of auditing standards, internal control evaluations, applications of statistics, audits of information systems, internal and operational auditing, and legal and reporting obligations.
Pre-requisite: ACC 451 Minimum Grade of C.

**ACC 461**  Acc for Gov and Not-For-Profit  
A study of the concepts and procedures underlying fund accounting, budgetary control, and financial reporting requirements for governmental and non-profit entities.
Pre-requisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C.

**ACC 490**  Special Topics  
Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration.
Prerequisite: Approval of Department Chair.

**ACC 494**  Directed Studies  
Primarily designed to give superior students an opportunity to study some phase of accounting of particular interest. Conferences, a bibliography, and a formal research report are required. Requires permission of Department Chair, 2.5 GPA or better and junior or senior standing.

**ACC 496**  Accounting Internship  
The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair.
Pre-requisite: ACC 314 Minimum Grade of C or ACC 372 Minimum Grade of C.

**ACC 498**  Accounting Internship II  
The Internship experience is designed to give students practical experience in their field of study. Students complete directed learning experiences under the supervision of the Department Chair. Prerequisites: Junior or Senior standing, declared major in accounting, overall GPA of at least 2.5 and internship agreement signed by the Department Chair.
Pre-requisite: ACC 496 Minimum Grade of P.

**ACC 510**  Forensic Acc. & Litig. Svcs.  
An intro to forensic accounting form the CPA perspective, focusing on civil and criminal procedures, and litigation services. Includes topics such as fraud, bankruptcy, digital forensics, and financial statement misrepresentations.

**ACC 511**  Financial Accounting Theory  
The evolution of general accounting theory leading up to and including the Conceptual Framework will be discussed as well as the specific theory underlying certain accounting topics of current interest.

**ACC 521**  Advanced Managerial Accounting  
Advanced managerial and cost accounting topics. Tools for planning and control, development of cost information for decision making, cost allocation, inventory management systems, capital budgeting, performance measurement, transfer pricing and multi-national considerations.

**ACC 530**  Tax Planning and Research  
An examination of tax research tools, their utilization, and various tax planning considerations. Students are required to conduct research and tax planning upon assigned topics, and write a report on their findings.

**ACC 532**  Tax Partnerships/Corporations  
An examination of the federal tax treatment of partnerships and corporations. Topics include: tax aspects of the formation of the entity, elements of gross income, treatment of property dispositions, allowable deductions and credits, determination of entity and investor basis, and liquidation of the entity.

**ACC 534**  Tax of Gifts, Trusts & Estates  
An examination of the federal tax treatment of gratuitous transfers made during life and at death.

**ACC 535**  Multi Tax  
This course addresses the increased importance of international and multi-jurisdictional taxation in today's global environment. It introduces students to the principles guiding nexus, geographic allocation of income and the avoidance of double taxation. The course helps students develop an understanding of the U.S. tax rules that may apply to income involving the U.S. and other countries. It also helps students understand multistate tax rules. Students will develop an understanding of the tax implications resulting from business that is conducting electronically. Students will apply multi-jurisdictional tax principles and rules to solve case studies.
ACC 541  Advanced Accounting Systems  3 cr
Analysis of accounting information system case studies in order to expose students to real-world system problems and applications. Course work includes hands-on work with a variety of computer-based accounting application packages.

ACC 552  Advanced Auditing & Analytics  3 cr
Advanced study of the application of auditing standards, internal control evaluations, applications of statistics, audits of information systems, internal and operational auditing, and legal and reporting obligations.

ACC 561  Acc of Government and NFPE  3 cr
A study of the concepts and procedures underlying fund accounting, budgetary control, and financial reporting requirements for governmental and not-for-profit entities.

ACC 570  Professional Accounting I  3 cr
A study of the issues and responsibilities relevant to the public accounting profession, including financial, regulation, assurance, and business considerations.

ACC 571  Professional Accounting II  3 cr
A study of contemporary issues and responsibilities relevant to the accounting profession, including ethical, legal and international considerations.

ACC 572  Fraud Ex  3 cr
Overview of the nature of occupational fraud and how it is committed included an introduction to the actions that can be taken to determine the presence of occupational fraud and procedures that can be implemented to deter fraud. Students will also learn how financial statement fraud and reporting occur, including investigation and financial fraud prevention techniques.

ACC 580  Emerging Issues in Accounting  3 cr
A study of current and emerging issues and responsibilities relevant to the accounting profession, with special emphasis on technology advancements, new services, regulatory changes, and international developments in accounting and business.

ACC 590  Special Topics  3 cr
Designed to provide graduate students an opportunity to study selected topics. Prerequisites: Permission of Department Chair. A student may count no more than three hours of Special Topics in the MBA degree program.

ACC 594  Independent Study in Account  3 cr
Readings and research on selected topics. Conference and formal research report required. Permission of department chair.

AHN 447  Adult Gerontological Nursing  4 cr
Synthesize theories, concepts, research, issues and trends in caring for adult gerontological population with complex multisystem health care needs. Emphasis is on the role of the professional nurse in health promotion and maintenance, illness care, and rehabilitation of adult gerontological population in a variety of acute and community settings.
Co-requisite: AHN 448
Pre-requisite: CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C.

AHN 448  Adult Gerontological Nsg Clin  4 cr
The focus of this course is the application of theories, concepts, evidence, issues and trends in caring for adult gerontological population experiencing complex multisystem health care needs. Emphasis is on the role of the professional nurse and on the use of the nursing process with adult gerontological population experiencing complex multisystem health care needs and their families.
Co-requisite: AHN 447
Pre-requisite: CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C.

AHN 513  AG/CNS Clinical Progression  1 TO 9 cr
The purpose of this progression practicum course is to facilitate student independence in the Adult-Gerontological Clinical Nurse Specialist role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Adult-Gerontological Clinical Nurse Specialist role. The emphasis is on the three spheres of influence and the continuum of healthcare services from wellness through acute care.

AHN 515  A/G CNS Shadowing Intensive  1 cr
This is a clinical practice course in adult health nursing. The focus is on the application of theories, concepts, research, and issues and trends in adult health nursing. The emphasis is on the role of the professional nurse in adult health nursing and on the use of the nursing process with adult/gerontological patients experiencing health concerns in the acute care setting.
AHN 516  CNS Adult Geron Pract I  3 cr
The purpose of this precepted practicum course is to provide students an immersion experience in the CNS role in the Acute Care setting through health promotion, wellness, and disease management across the lifespan from adolescent to adult to older adult. The focus of the course is to develop the CNS's ability to assimilate and apply evidence-based information in nursing care activities, to appraise nursing practice standards and norms, and to influence organizations to support the delivery of nursing care and achieve optimal health outcomes. The emphasis is on the CNS core competencies of Systems Leadership, Collaboration, Consultation, and Ethical Decision-Making/Moral Agency/Advocacy.
Co-requisite: NU 515
Pre-requisite: NU 578 Minimum Grade of C.

AHN 517  CNS Adult Geron Pract II  3 cr
The purpose of this precepted practicum course is to provide students an immersion experience in the CNS role in both the Acute Care setting and the Emergency or Urgent Care setting, through health promotion, wellness, disease management, and acute health problems across the lifespan from adolescent to adult to older adult. The focus of the course is to enhance knowledge of differential diagnoses and pharmacological management with clinical time spent in the emergent/urgent care and acute/primary care settings. The emphasis is on all three spheres of influence and the CNS competencies of Direct Care and Research. The student should participate in direct interactions with patients and families, consultations, coaching, development of evidenced based policies/guidelines/protocols, educational guidance of other nursing personnel, and implementation of practices that improve quality and promote cost-effective outcomes.
Co-requisite: NU 516

AHN 518  CNS Adult Geron Pract III  3 cr
The purpose of this precepted practicum course is to provide an immersion experience in the CNS role, in both the Acute Care setting and the Outpatient Primary or Specialty Care setting, through health promotion, disease management, acute and chronic illness care, and exacerbations of chronic illness management across the lifespan from adolescent to adult to older adult. The focus of the course is to develop the CNS's ability to assimilate and apply evidence-based information in nursing care activities, to appraise nursing practice standards and norms, and to influence organizations to support the delivery of nursing care and achieve optimal health outcomes. The emphasis of this course is on the patient, nurse, and organization/system spheres of influence and the CNS competencies of Direct Care and Coaching.
Co-requisite: NU 517
Pre-requisite: NU 516 Minimum Grade of C and AHN 517 Minimum Grade of C and NU 607 Minimum Grade of C and NU 613 Minimum Grade of C and NU 610 Minimum Grade of C.

AHN 519  Diag Reason & Adv Pat Mgt CNS  4 cr
The purpose of this elective course is for the CNS to integrate advanced pharmacology, pathophysiology, and assessment for the diagnosis and management of acute and chronic problems of the adolescent/adult/old adult patients across the continuum of health services. The course focuses on the formulation of differential diagnoses and the development of pharmacologic and non-pharmacologic plans of care for the individual patients rather than aggregates. The emphasis is placed on synthesis and application of evidence-based practice to the development of differential diagnoses as a basis for health promotion and management.
Co-requisite: NU 516

AHN 530  Found Palliative Care/Adv Role  2 cr
This didactic course prepares the Adult-Gerontological with Palliative Care Specialty student a forum for the evaluation of issues and trends encountered by the DNP in palliative care. Students learn to coordinate and develop primary and palliative health care programs for individuals and populations across the adult lifespan. Emphasis is on critical analysis and management of issues by the DNP in an interdisciplinary health care delivery system.

AHN 531  Adv Palliative Cr/End of Life  2 cr
This course provides students an in-depth study of the health care management for patients seeking palliative and end of life care. Emphasis is on the interaction among health care providers and psychological/spiritual care of the patient and family.
Pre-requisite: AHN 530 Minimum Grade of C.

AHN 532  Adv Chronic Illness Care  2 cr
This course provides a study of the illness trajectories of chronic diseases that are among the leading causes of death in our society. Assessment and management of the illnesses as well as associated pain and symptoms will be examined. The focus is assisting patients, families, and other health professionals anticipate/prevent/reduce adverse symptoms from life threatening illnesses to maximize quality of life.
Pre-requisite: AHN 531 Minimum Grade of C.

AHN 533  Adv Palliative Care Practicum  1 TO 9 cr
This course provides preceptor and faculty a facilitated experience in which students have the opportunity to become proficient at providing comprehensive care to patients with life threatening, progressive illness by engaging in holistic assessment of pain and quality of life in a variety of settings. Advanced knowledge of palliative/end of life care will be integrated into assessing and managing the complex psychological, ethical, social, spiritual issues, and grief reactions while working as a member of a palliative care team.
Pre-requisite: AHN 530 Minimum Grade of C.
AHN 538  HPDP Dual Role (FNP/AGACNP)  2 cr
This didactic course prepares the Dual Role (Family NP/Adult-Gerontological Acute Care NP) student to identify and implement appropriate and culturally sensitive health promotion, health protection, and disease prevention strategies across the lifespan for clients in emergency, urgent, and ambulatory care settings. Emphasis is on health promotion, health protection, and disease prevention with strategic planning at the primary, secondary, and tertiary levels. Effective strategies for life-style behavioral changes will also be evaluated.

AHN 547  DR AG Acute Shadow Intensive  1 cr
The purpose of this course is to provide opportunity for the Dual Role Acute Care Nurse Practitioner student to gain experience in a adult-gerontological acute setting prior to entering adult-gerontological acute specialty specific courses.

AHN 548  Family Prim Care NP I  4 cr
The purpose of this didactic course is to prepare (Family NP/Adult-Gerontological Acute Care NP) students to assess, diagnose, and manage selected health care needs of women and childbirth, infants, children, and families in a caring, competent manner. Emphasis is placed on (1) synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management; (2) wellness and the pathophysiology and epidemiology underlying acute and chronic health problems; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus is on the advanced practice nursing of individuals and families in primary healthcare settings. Co-requisite: AHN 549 Pre-requisite NU 518 Minimum Grade of C and NU 545 Minimum Grade of C.
Co-requisite: AHN 549
Pre-requisite: NU 518 Minimum Grade of C and NU 545 Minimum Grade of C. NU 518 and NU 545 can be taken concurrently with this course.

AHN 549  Family Prim Care NP Prac I  4 cr
The purpose of this practicum course is to provide opportunities for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to apply concepts from AHN 548 in selected clinical settings. The emphasis is on culturally competent delivery of health care, diagnostic reasoning, and decision making/critical thinking through communication and collaboration. The focus is continued refinement of cognitive and clinical skills needed to provide comprehensive health assessments, diagnoses, and management of selected health care needs of women and childbirth, infants, children, and families in primary healthcare settings. Co-requisite: AHN 548
Co-requisite: AHN 548
Pre-requisite: NU 578 Minimum Grade of C.

AHN 550  Family Prim Care NP II  4 cr
This didactic course prepares the Dual Role (Family NP/Adult-Gerontological Dual Role) students to identify and implement appropriate and culturally sensitive health promotion and disease prevention strategies across the lifespan for clients in emergency, urgent, and ambulatory care settings. Emphasis is placed on health promotion and disease prevention with strategic planning at the primary, secondary, and tertiary levels. Prevention, early diagnosis, prompt treatment, and in-depth patient education will be emphasized. Effective strategies for life-style behavioral changes will also be evaluated. Co-requisite: AHN 551 Pre-requisite: NU 578 Minimum Grade of C and AHN 548 Minimum Grade of C.
Co-requisite: AHN 551
Pre-requisite: NU 578 Minimum Grade of C and AHN 548 Minimum Grade of C. NU 578 can be taken concurrently with this course.

AHN 551  Family Prim Care NP Pract II  5 cr
The purpose of this course is to provide a preceptor and faculty facilitated experience for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to practice within an advanced nursing framework. The focus is on the role of the Family Nurse Practitioner in the health care management of children, adults, and families in primary health care settings with the application and synthesis of knowledge and skills acquired from AHN 550 and previous courses. Emphasis is on leadership, professionalism, and collaboration with other health care providers in a culturally diverse environment. Co-requisite: AHN 550
Co-requisite: AHN 550

AHN 552  Adult-Geron Acute Care NP I  4 cr
The purpose of this course is to prepare Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to assess, diagnose, and manage selected health care needs of young and older adults across the wellness-illness continuum in a caring, competent manner. Emphasis is placed on (1) synthesis of theoretical, scientific, and contemporary clinical knowledge used to develop differential diagnoses as a basis for health promotion, disease prevention, and management; (2) wellness and the pathophysiology and epidemiology underlying complex acute, critical, and chronic illness, disability, and/or injury; and (3) collaboration using appropriate processes for patient-centered, quality care in a culturally diverse system. The focus is on advanced practice nursing with the entire adult-older adult age spectrum and families in emergency, urgent, and ambulatory settings. Co-requisite: AHN 553 Pre-requisite: AHN 538 Minimum Grade of C and AHN 549 Minimum Grade of C and AHN 551 Minimum Grade of C and NU 607 Minimum Grade of C and NU 608 Minimum Grade of C.
Co-requisite: AHN 553
Pre-requisite: AHN 538 Minimum Grade of C and AHN 549 Minimum Grade of C and AHN 551 Minimum Grade of C and NU 607 Minimum Grade of C and NU 608 Minimum Grade of C. NU 607 and NU 608 can be taken concurrently with this course.
AHN 553  Adult-Ger Acute Care NP Prac I  4 cr
The purpose of this practicum course is to provide opportunities for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to apply concepts from AHN 552 in selected clinical settings. Emphasis is on critical thinking, diagnostic reasoning, differential diagnosis, communication, and collaboration in a culturally diverse system. The focus is refinement of cognitive and clinical skills needed to provide competent patient-centered care to young adults, adults, and older adults across the wellness-illness continuum with acute, critical and chronic illness, disability, and/or injury in emergency, urgent, and ambulatory care settings. Co-requisite: AHN 552
Co-requisite: AHN 552

AHN 554  Adult-Ger Acute Care NP II  4 cr
The purpose of this didactic course is to (1) provide the Dual Role (Family NP/Adult-Gerontological Acute Care NP) students with an in-depth study of the health care management of young adults, adults, and older adults across the wellness-illness continuum and to (2) provide a forum for the critical analysis and evaluation of issues and trends encountered by the Adult-Gerontology Acute Care Nurse Practitioner in an interdisciplinary health care delivery system. Emphasis is on leadership and professionalism in a culturally diverse system. The focus is on ensuring quality, patient-centered care of the adult-older adult population with selected complex acute, critical and chronic illness, disability, and/or injury to improve health outcomes in emergency, urgent, and ambulatory settings. Co-requisite: AHN 555 Pre-requisite: AHN 552 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C
Co-requisite: AHN 555
Pre-requisite: AHN 552 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 610 and NU 613 can be taken concurrently with this course.

AHN 555  Adlt-Ger Acute Care NP Prac II  5 cr
The purpose of this practicum course is to provide a preceptor and faculty facilitated experience for Dual Role (Family NP/Adult-Gerontological Acute Care NP) students to practice within an advanced nursing framework by synthesizing and applying the knowledge and skills required in AHN 554 and previous courses. Emphasis is on leadership, professionalism, and collaboration in a culturally diverse system. The focus is on implementing the role of the Adult-Gerontology Acute Care Nurse Practitioner in the health care management of young adults, adults, and older adults across the wellness-illness continuum with acute, critical and chronic illness, disability, and/or injury in emergency, urgent, and ambulatory health care settings. Co-requisite: AHN 554
Co-requisite: AHN 554

AHN 558  Dual Role FNP Clin Progression  1 TO 9 cr
The purpose of this progression practicum course is to facilitate student independence in the Dual Role Family Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Family Nurse Practitioner role of the Dual Role (FNP/AGACNP) program.

AHN 559  Dual Role-AGAC Clin Progression  1 TO 4 cr
The purpose of this progression practicum is to facilitate student independence in the Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Dual Track AGACNP Nurse Practitioner role.

AHN 566  AG/ACNP Clinical Progression 1 TO 4 cr
The purpose of this progression practicum is to facilitate student independence in the Adult-Geron Acute Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Adult-Geron Acute Care Nurse Practitioner role.

AHN 568  Intro to Adult-Geron Acute NP  3 cr
The purpose of this first didactic course is to prepare the Adult Geron Acute Care Nurse Practitioner students to assess, diagnose, and manage selected health care needs of adults and children. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.
Co-requisite: AHN 571
Pre-requisite: NU 545 Minimum Grade of C and NU 518 Minimum Grade of C. NU 545 and NU 518 can be taken concurrently with this course.

AHN 571  HPDP Adult-Geron Acute Care NP  2 cr
The purpose of this didactic course is to prepare the Adult Geron Acute Care Nurse Practitioner student to identify and implement appropriate health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.
Co-requisite: AHN 568
Pre-requisite: NU 578 Minimum Grade of C.
AHN 572  Adult-Geron Acute NP I  3 cr
The purpose of this didactic course is to prepare Adult Geron Acute Care Nurse Practitioner students to assess, diagnose, and manage selected health care needs of adults. The focus is on advanced practice nursing with adults and families in primary and acute care settings. Emphasis is placed on the wellness and the pathophysiology and epidemiology underlying acute and chronic health problems. Co-requisite: AHN 573
Pre-requisite: AHN 568 Minimum Grade of C and NU 578 Minimum Grade of C.

AHN 573  Adult-Geron Acute NP Prac I  3 cr
The purpose of this practicum course is to provide opportunities for students to apply concepts in select clinical settings. Focus is on adults and families in primary and acute care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking. Co-requisite: AHN 572
Pre-requisite: NU 578 Minimum Grade of C.

AHN 574  Adult-Geron Acute NP II  3 cr
The purpose of this course is provide an in-depth study of the health care management of the Adult Geron Acute Care patient. Emphasis is on the interaction among health care providers in a culturally diverse environment. Co-requisite: AHN 575
Pre-requisite: AHN 572 Minimum Grade of C.

AHN 575  Adult-Geron Acute NP Prac II  3 cr
The purpose of this course is to provide an opportunity for the Adult Acute Care Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of adults. Emphasis is on collaboration with other health care providers in a culturally diverse environment. Co-requisite: AHN 574

AHN 576  Adult Geron Acute NP Prac III  4 cr
The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Adult Geron Acute Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses. Co-requisite: AHN 577
Pre-requisite: (NU 607 Minimum Grade of C and AHN 574 Minimum Grade of C and AHN 575 Minimum Grade of C).

AHN 577  Adult Geron Acute NP III  3 cr
The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in advanced adult gerontological acute care nursing. Emphasis is on a critical analysis and management of issues by the Adult Geron Acute Care Nurse Practitioner in an interdisciplinary health care delivery system. Co-requisite: AHN 576
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and AHN 574 Minimum Grade of C).

AHN 581  HP/DP Adlt-Geron Prim Care NP  2 cr
The purpose of this didactic course is to prepare the Adult-Gerontological Primary Care Nurse Practitioner nursing student with a knowledge base for identifying and implementing appropriate health promotion and disease prevention strategies with older adults. The focus is on advanced practice nursing of adults and older adults in multiple health care settings. Emphasis is placed on health promotion/disease prevention and related health issues with strategic planning at the primary, secondary, and tertiary levels of prevention. Various issues are explored which are pertinent to the advanced practice role. Co-requisite: AHN 588, HSC 601

AHN 588  Intro to Adult-Geron Prim NP  2 cr
The purpose of this course is to expand the Adult-Geron Primary Care Nurse Practitioner student’s knowledge and skills for obtaining, recording, and analyzing a systemic health assessment of the adult and older adult. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management. Co-requisite: AHN 581, HSC 601
Pre-requisite: NU 545 Minimum Grade of C and NU 518 Minimum Grade of C. NU 545 and NU 518 can be taken concurrently with this course.

AHN 591  Adult-Geron Prim NP I  2 cr
This didactic course prepares the Adult-Geron Primary Care Nurse Practitioner student to assess, diagnose, and manage selected health care needs of culturally diverse adult and well and frail geriatric populations. The focus is on the advanced practice nursing of adults and their families in a variety of health care settings. Emphasis is placed on wellness, the pathophysiology and epidemiology underlying acute and chronic health problems with a focus on the unique health care needs of elders. Co-requisite: AHN 592, HSC 602
Pre-requisite: AHN 588 Minimum Grade of C and NU 578 Minimum Grade of C. NU 578 can be taken concurrently with this course.

AHN 592  Adlt-Geron Primary NP Pract I  3 cr
The purpose of this practicum course is to provide opportunities for Adult-Geron Primary Care Nurse Practitioner students to apply concepts from AHN 591 in primary and acute care settings with adults and families experiencing health concerns. This clinical course will offer clinical hours for targeting adult health and gerontological health issues. Students will divide clinical hours between young adults, middle aged adults, and elders. Co-requisite: AHN 591, HSC 602
Pre-requisite: NU 578 Minimum Grade of C.
AHN 593  Adult-Gero Prim NP II  3 cr
The purpose of this course is to provide the Advanced Adult-Geron Primary Care Nurse Practitioner student an in-depth study of health care management of adults, well and frail elders, and their families within the framework of advanced nursing. The focus is on selected acute and chronic complex health care problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.
Co-requisite: AHN 594
Pre-requisite: AHN 591 Minimum Grade of C.

AHN 594  Adult-Geron Prim NP Prac II  3 cr
The purpose of this course is to provide opportunity for the Adv Adult-Geron Primary Care Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of adult and geriatric patients with physical and psychiatric-mental health concerns. Emphasis is on collaboration with other health care providers in a culturally diverse environment. This clinical course will offer experience with diverse populations including young and middle aged adults and elders in a variety of settings.
Co-requisite: AHN 593

AHN 595  Adult-Gero Primary Care NP III  2 cr
The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in adult and gerontological nursing care. Emphasis is on critical analysis and management of issues by the Advanced Adult-Geron Primary Care Nurse Practitioner in an interdisciplinary health care delivery system.
Co-requisite: AHN 596, HSC 603
Pre-requisite: AHN 593 Minimum Grade of C and NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.

AHN 596  Adult-Geron Prim NP Prac III  4 cr
The purpose of this culminating course is to provide a preceptor- and faculty facilitated experience in the Advanced Adult-Geron Primary Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses. Students will have clinical experiences with all ages of adults and elders in a variety of settings.
Co-requisite: AHN 595, HSC 603
Pre-requisite: NU 607 Minimum Grade of C. NU 607 can be taken concurrently with this course.

AHN 597  A/G Primar Shadowing Intensive  1 cr
The purpose of this course is to provide opportunity for the Adult-Gerontological Primary Care Nurse Practitioner student to gain experience in an adult-gerontological primary setting prior to entering adult-gerontological primary specialty courses.

AHN 598  AG/PCNP Clinical Progression 1 TO 4 cr
The purpose of this progression practicum is to facilitate student independence in the Adult-Geron Primary Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Adult-Geron Primary Care Nurse Practitioner role.

AHN 604  Adult-Geron Acute Care NP PP&D  3 cr
This course assists the Adult-Geron Acute Care Nurse Practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Adult-Gerontological Acute Care Nurse Practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

AHN 617  AG ACNP Residency I  3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Adult-Geron Acute Care Nurse Practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Adult-Geron Acute Care Nurse Practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Adult-Geron Acute Care Nurse Practitioner student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the Adult-Geron Acute Care Nurse Practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. Direct practice/management is required.
Pre-requisite: AHN 604 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

AHN 618  AG ACNP Residency II  3 cr
Provides Adult-Gerontological Acute Care Nurse Practitioner students the opportunity to fully express all DNP competencies. The Adult-Gerontological Acute Care Nurse Practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.
Pre-requisite: AHN 617 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.
AHN 619  AG ACNP Residency III  3 cr
Final course in residency series as Adult-Gerontological Acute Care Nurse Practitioner student continues to implement and evaluate project plan. Provides Adult-Geron Acute Care Nurse Practitioner student the opportunity to fully express all DNP competencies. The Adult-Gerontological Acute Care Nurse Practitioner student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project. Pre-requisite: AHN 618 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

AHN 630  Dysrhythmias and the Heart  2 cr
The first of four cardiovascular specialization courses focuses on the development of a methodical approach to dysrhythmia interpretation. Emphasis is on diagnosis and management of the patient with cardiac dysrhythmias via an evidence-based approach.

AHN 631  Foundations of Cardiac Care  2 cr
This second of four cardiovascular specialization courses focuses on health promotion, prevention, health disparities and cultural competence for patients with common cardiovascular disorders. Emphasis is on cardiovascular nurse practitioner's role in managing patients as an integral part of the interdisciplinary health care team. Pre-requisite: AHN 630 Minimum Grade of C. AHN 630 can be taken concurrently with this course.

AHN 632  Diag & Mgmnt of Acute CVD  2 cr
The third of four cardiovascular specialization courses focuses on advanced healthcare management of patients with acute cardiovascular disorders. Emphasis is on diagnosis and management, to include assessment, diagnostic procedures, treatment and pharmacological management. Particular attention will be given to cardiovascular health disparities in a culturally diverse environment. Pre-requisite: AHN 631 Minimum Grade of C.

AHN 633  Dig/Mgmt Complex CV Disorders  2 cr
The third of four cardiovascular specialization courses focuses on advanced healthcare management of patients with complex cardiovascular disorders. Emphasis is on diagnosis and management, to include assessment, diagnostic procedures, treatment and pharmacological management. Particular attention will be given to cardiovascular health disparities in a culturally diverse environment. Pre-requisite: AHN 632 Minimum Grade of C.

AHN 634  Adult-Geron CNS PP&D  3 cr
This course assists the Adult-Gerontological Clinical Nurse Specialist DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning development as a preliminary step to the Adult-Gerontological Clinical Nurse Specialist students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination. Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

AHN 635  Adult-Geron CNS Residency I  3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Adult-Gerontological Clinical Nurse Specialist student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Adult-Gerontological Clinical Nurse Specialist student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Adult-Gerontological Clinical Nurse Specialist student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the Adult-Gerontological Clinical Nurse Specialist student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required. Pre-requisite: AHN 634 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

AHN 636  Adult-Geron CNS Residency II  3 cr
Provides Adult-Gerontological Clinical Nurse Specialist students the opportunity to fully express all DNP competencies. The Adult-Gerontological Clinical Nurse Specialist student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project. Pre-requisite: AHN 635 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.
AHN 637  Adult-Geron CNS Residency III 3 cr
Final course in residency series as Adult-Gerontological Clinical Nurse Specialist student continues to implement and evaluate project plan. Provides Adult-Gerontological Clinical Nurse Specialist student the opportunity to fully express all DNP competencies. The Adult-Gerontological Clinical Nurse Specialist student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.
Pre-requisite: AHN 636 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

AHN 670  AG-ACNP(DR) PP&D 3 cr
This course assists the DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

AHN 671  AG/ACNP (DR) Residency I 3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. In this course, students will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the student will work with the primary faculty advisor to develop a project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.
Pre-requisite: (NU 608 Minimum Grade of C and AHN 670 Minimum Grade of S).

AHN 672  AG-ACNP (DR) Residency II 3 cr
In this mentored and supervised experience, students will work with the primary faculty advisor to implement a scholarly project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.
Pre-requisite: AHN 671 Minimum Grade of C.

AHN 673  AG-ACNP(DR) Residency III 3 cr
Final course in residency series as student continues to implement and evaluate project plan. Provides the student the opportunity to fully express all DNP competencies. The student, guided by the core faculty advisor, completes a quality improvement, evidence-based system's change project.
Pre-requisite: (AHN 671 Minimum Grade of C and AHN 672 Minimum Grade of C).

AHN 680  Family NP (DR) PP&D 3 cr
This course assists the DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, and a plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

AHN 681  Family NP (DR) Residency I 3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. In this course, students will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the student will work with the primary faculty advisor to develop a project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.
Pre-requisite: (AHN 680 Minimum Grade of S and NU 608 Minimum Grade of C).

AHN 682  FNP (DR) Residency II 3 cr
In this mentored and supervised experience, students will work with the primary faculty advisor to implement a scholarly project to advance system's change in their selected practice area. The student will have access to and authority for expanded scope of practice to master all DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.
Pre-requisite: AHN 681 Minimum Grade of C.
AHN 683  FNP (DR) Residency III  3 cr
Final course in residency series as student continues to implement and evaluate project plan. Provides the student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes a quality improvement, evidence-based system's change project.
Pre-requisite: AHN 682 Minimum Grade of C.

AHN 692  AHN DNP Project Progression  3 cr
Students will register for this course to complete residency course work under supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

AHN 693  Adult-Geron Primary NP PP&D  3 cr
This course assists the Adult-Geron Primary Care Nurse Practitioner student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Adult-Geron Primary Care Nurse Practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

AHN 694  Adult-Gero Primary Cr NP Res I  3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Adult-Geron Primary Care Nurse Practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Adult-Geron Primary Care Nurse Practitioner student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the Adult-Geron Primary Care Nurse Practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.
Pre-requisite: AHN 693 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

AHN 695  Adlt-Gero Primary Cr NP Res II  3 cr
Provides Adult-Geron Primary Care Nurse Practitioner students the opportunity to fully express all DNP competencies. The Adult-Geron Primary Care Nurse Practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.
Pre-requisite: AHN 694 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

AHN 696  Adlt-Gero Prim Care NP Res III  3 cr
Final course in residency series as Adult-Geron Primary Care Nurse Practitioner student continues to implement and evaluate project plan. Provides Adult-Geron Primary Care Nurse Practitioner student the opportunity to fully express all DNP competencies. The Adult-Geron Primary Care Nurse Practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.
Pre-requisite: AHN 695 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

Aerospace Engineering (AE)

AE 361  Fundamentals of Aerodynamics  3 cr
Conservation laws, potential flow, airfoil and wing analysis. Boundary layer theory and pressure gradients on plates and airfoils. Introduction to turbulent and vortex-dominated flows. Pre-requisite: (EG 360 Minimum Grade of C and MA 227 Minimum Grade of C and PH 202 Minimum Grade of C).

AE 468  Principles of Aircraft Design  3 cr
Introduction to aircraft design, including an understanding of the various components leading to a good conceptual design. Introduction to parameters in aerospace analysis and how they may impact a design. Application of design concepts to an RFP (request for proposal) for design competition. Pre-requisite: (ME 328 Minimum Grade of C and EG 360 Minimum Grade of C). ME 328 can be taken concurrently with this course.

AE 470  Aircraft Structural Analysis  3 cr
Pre-requisite: EG 284 Minimum Grade of C and EG 315 Minimum Grade of C and ME 328 Minimum Grade of C. ME 328 can be taken concurrently with this course.

African-American Studies

(AF) (AFR)
AFR 101  Intro to African Amer Studies  3 cr
An interdisciplinary investigation of the origins, experiences, conditions, accomplishments and contributions of people of African ancestry in the United States.

Air Force Studies (AS) (AS)

AS 101L  Foundation of USAF I Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 101

AS 102L  Heritage and Values II Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 102

AS 201L  Team/Leadership Fund I Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 201

AS 202L  Team/Leadership Fund II Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 202

AS 301L  Lead People/Effect Comm I Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 301

AS 302L  Lead People/Eff Comm II Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 302

AS 401L  Sec/Lead/Comm Prep 1 Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 401

AS 402L  Sec/Lead/Comm Prep II Lab  0 cr
Provides an introduction to the military profession, including applications in leadership, drill and ceremony, customs and courtesies and community service.
Co-requisite: AS 402

AS 101  Foundations of USAF I  1 cr
AS 101 is a survey course designed to introduce students to the United States Air Force and encourage participation in Air Force Reserve Officer Training Corps. Featured topics include: overview of ROTC, special programs offered through ROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership and leadership related issues, Air Force Core Values, Air Force officer opportunities, and an introduction to communication studies. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
Co-requisite: AS 101

AS 102  Heritage and Values II  1 cr
AS 102 is a survey course designed to introduce students to the United States Air Force and encourage participation in Air Force Reserve Officer Training Corps. Featured topics include: overview of ROTC, special programs offered through ROTC, mission and organization of the Air Force, brief history of the Air Force, introduction to leadership and leadership related issues, Air Force Core Values, Air Force officer opportunities, and an introduction to communication studies. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.
Co-requisite: AS 102

AS 201  Team/Leadership Fund I  1 cr
AS 201 is designed to provide a fundamental understanding of both leadership and team building. Students will apply leadership perspectives when completing team building activities and discussing things like conflict management. Students should demonstrate basic verbal and written communication skills. Cadets will apply these lessons at Field Training, which follows AS 201 and AS 202.
Co-requisite: AS 201

AS 202  Team/leadership Fund II  1 cr
AS 202 is designed to provide a fundamental understanding of both leadership and team building. Students will apply leadership perspectives when completing team building activities and discussing things like conflict management. Students should demonstrate basic verbal and written communication skills. Cadets will apply these lessons at Field Training, which follows AS 201 and AS 202.
Co-requisite: AS 202

southalabama.edu/bulletin  2021-22 GRADUATE/UNDERGRADUATE BULLETIN
AS 301  Lead People/Effect Comm I  3 cr
AS 301 is a study of leadership, management fundamentals, professional knowledge, Air Force personnel and evaluation systems, leadership ethics, and communication skills required of an Air Force junior officer. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles of this course. Co-requisite: AS 301L

AS 302  Leading People/Eff Comm II  3 cr
AS 302 is designed to build on the leadership fundamentals taught in AS 200. Cadets will have the opportunity to utilize their skills as they begin more of a leadership role in the detachment. The course continues into advanced skills and ethics training that will prepare them for becoming an officer and supervisor. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer type activities, giving student the opportunity to apply leadership and management principles of the course. Co-requisite: AS 301L

AS 401  Sec/Lead/Comm Prep I  3 cr
AS 401 examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, 'officership', military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills. Co-requisite: AS 401L

AS 402  Sec/Lead/Comm Prep II  3 cr
Course examines the national security process, regional studies, advanced leadership ethics, and Air Force doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism. Within this structure, continued emphasis is given to refining communication skills.
Co-requisite: AS 402L

AHP 101  Freshman Sem in Allied Health  2 cr
A course for first-time students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. Taught in small groups, the course provides an introduction to the nature of higher education with special emphasis on health-related disciplines. Appropriate reading and writing assignments will be required.

AHP 390  Special Topics  1 TO 9 cr
The purpose of this course for the undergraduate student is to develop an improved understanding of culture, to recognize any cultural practices that affect health care, and to incorporate this understanding into the provision of care. Culture will be examined through writing, cultural experiences, and through collaboration.

AHP 510  IPE Autism Spectrum Disorders  1 cr
This foundational course is designed to prepare graduate students in OT, PT, SLP, MD and ED to provide high-quality services to individuals with autism spectrum disorder and other developmental disabilities. The emphasis will be on interprofessional education using team-based instruction to support effective interprofessional practice in both educational and health care settings. ADDITIONAL RESTRICTION: Students can only be enrolled following successful application and admission. Contact the course instructor for information on application.

AHP 590  Special Topics  1 TO 9 cr
Selected topics in Health Sciences. Requires special permission.

Anthropology (AN) (AN)

AN 121L  Biological Anthropology Lab  1 cr
The lab section of this course is designed to provide a more in-depth understanding of biological anthropology through a variety of exercises and hands-on learning opportunities. Topics covered parallel those in lecture (AN 121) and include evolutionary theory, living primates, primate origins, human evolution, and modern human variation. Co-requisite: AN 121

AN 100  Intro to Cultural Anthropology  3 cr
Introduces culture as a set of integrated behaviors and meanings learned in a social environment. Explores the diversity of human cultural practices in terms of kinship, gender, religion, subsistence, and politics. Language is emphasized as the means by which culture is transmitted from one generation to the next.
AN 101  Intro Archaeology-Bio Anthro 3 cr
The place of people in nature; the origin, development, and differentiation of people as biological organisms; archaeological evidence of early human cultures; basic concepts and principles for understanding human cultures. Introduces students to the topics of evolution, genetics, and primates and integrates cultural aspects associated with early human development. The fundamental orientation and methods of archaeology are introduced and an overview of world prehistory presented.

AN 121  Biological Anthropology 3 cr
This course covers the topics of human evolution and modern human variation, focusing on humanity's biological roots and modern appearance. To understand our present physical and social condition, we must understand our evolutionary past. This course discusses our place within the mammalian evolutionary lineage, evolutionary theory, population genetics, primate behavior, human evolution, and modern human variation.

AN 190  Special Topics - 3 cr
Different topics of anthropological importance will be studied as announced. This course may be taken twice for credit when content varies, but not for more than six credits.

AN 200  Language and Culture 3 cr
Brief introduction to descriptive and structural linguistics, language universals, classification and processes of change in language, language and thought, social cultural factors as expressed in language, origin of language, child language and non-verbal communication.

AN 250  Forensic Anthropology 3 cr
This course will introduce students to the field of forensic anthropology. Specifically, it will survey the basic methods employed by forensic anthropologists to recover and analyze human skeletal remains, including the construction of a biological profile and the analysis of skeletal trauma.

AN 290  Special Topics - 1 TO 3 cr
Different topics of anthropological importance will be studied as announced. This course may be taken twice for credit when content varies, but not for more than 6 credits.

AN 300  Thinking Anthropologically 1 cr
This one-credit hour course is designed to expose anthropology majors to important applied concepts in our field, with a particular emphasis on scientific literacy and professional development. Through short lectures, guided activities, facilitated discussions, and student presentations, this course will help our majors identify and engage in practical skills to enhance their success as students as well as in their chosen post-graduation career paths.

AN 305  Arch Method and Theory 3 cr
The theoretical basis of archaeology, and the various methods used to discover and interpret the human past from material evidence.

AN 313  New World Archaeology 3 cr
The evolution of Native American cultures, from the first arrival of humans across the Bering Straits land bridge to the European settlement of the New World.

AN 314  North American Archaeology 3 cr
This course explores over 10,000 years of North American archaeological record, primarily investigating the unwritten histories of Native American people through archaeological remains including architecture, art, foodways, and the tools of everyday life.

AN 315  May, Aztec, & Inca 3 cr
This course explores the human cultures of Mesoamerica and the Andes region of South America through archaeological remains including architecture, art, foodways, and the tools of everyday life.

AN 335  Field Work in Archaeology 4 cr
Archaeological field and laboratory techniques include excavation, site survey, artifact processing and analysis. Fee.

AN 340  Native American Cultures-W 3 cr
An ethnographic and ethnohistorical survey of native cultures of North America, including historical and modern groups, with an emphasis on Indians of the Southeast.

Pre-requisites:
- AN 100 Minimum Grade of C and AN 101 Minimum Grade of D.
- AN 121 Minimum Grade of D.
- AN 101 Minimum Grade of D.
- AN 100 Minimum Grade of D.
- AN 121 Minimum Grade of D.
AN 342  Applied Anthropology  3 cr
Issues surrounding theory and method of applied anthropology. Presentation and analysis of case studies concerning problems in areas such as development, both domestic and in foreign settings, community health, homelessness, drug and alcohol abuse, and others. Prerequisites: AN 100 or permission of instructor. Pre-requisite: AN 100 Minimum Grade of D.

AN 347  Latin Amer Cultures-Societies  3 cr
A survey of Latin American society and culture from the pre-contract period to the present. Pre-Columbian antecedents, colonial use of land and labor, patterns of race, class and ethnicity, and problems of development are examined. Prerequisite: AN 100 or permission of instructor. Pre-requisite: AN 100 Minimum Grade of D.

AN 355  Gender and Anthropology  3 cr
This course provides an introduction to anthropological themes and debates in gender theory, including an ethnographic survey of women and men in a variety of cultures. Prerequisites: AN 100 or permission of instructor. Pre-requisite: AN 100 Minimum Grade of D.

AN 357  Political Anthropology  3 cr
Authority, power, and conflict are examined cross-culturally and in evolutionary perspective. Particular emphasis is placed on the origins of stratification and the state. Pre-requisite: AN 100 Minimum Grade of D.

AN 358  Economic Anthropology  3 cr
An evolutionary survey of production and exchange in diverse societies. Considers the applicability of western economic theory to nonmarket economies, as well as their transformation by global capitalism. Pre-requisite: AN 100 Minimum Grade of D.

AN 365  Human Osteology  3 cr
This hands-on course focuses on the identification of the bones of the human skeleton and its application to specialties within biological anthropology, including bioarchaeology and forensic anthropology. Topics to be covered include human skeletal and dental anatomy, skeletal growth and development, skeletal pathology and anomalies, and the biological profile. Pre-requisite: AN 210 Minimum Grade of B or AN 250 Minimum Grade of B.

AN 370  Human Origins and Evolution  3 cr
This lecture, discussion, and lab-based seminar will examine the fossil, genetic, and archaeological evidence for human evolution - from the origins of primates to anatomically modern humans - with particular attention given to our hominin ancestors. Students will learn about the nature and timing of these developments, current theoretical models used to explain such changes, and the implications of these evolutionary trends for understanding modern human adaptations. Important fossil sites and associated material culture will also be used to provide insight into hominin biocultural behavior. Students must take AN 210/L (formerly AN 210/L) as a prerequisite for this course, or receive permission of the instructor. Pre-requisite: AN 210 Minimum Grade of C and AN 210L Minimum Grade of C or AN 121 Minimum Grade of C and AN 121L Minimum Grade of C.

AN 390  Special Topics  1 TO 3 cr
Different topics of anthropological importance will be studied as announced. This course may be taken twice for credit when content varies, but not for more than 6 credits. Pre-requisite: AN 100 Minimum Grade of D or AN 101 Minimum Grade of D.

AN 394  Directed Studies -  1 TO 3 cr
Supervised readings or projects. No more than a total of six hours may be taken for credit. Requires prior approval of instructor. Pre-requisite: AN 100 Minimum Grade of D or AN 101 Minimum Grade of D.

AN 435  Museum Methods in Archaeology  3 cr
Archaeology as practiced in museums, including the registration and curation of archaeological collections; artifact conservation; public interpretation of the past; and exhibit design, composition, construction, and evaluation. Pre-requisite: AN 100 Minimum Grade of D or AN 101 Minimum Grade of D.

AN 440  Adv Archaeological Field Meth  4 cr
This course involves participant instruction in archaeological field and laboratory techniques, including advanced excavation and survey methods, soils analysis, site mapping with electronic instruments, sampling strategy, and site interpretation. Requires permission of instructor.

AN 442  Cultural Resource Management  3 cr
This course examines the interaction between archaeologists, architectural historians, historic preservationists, state and federal governments, and the public with regard to cultural resources. The focus of the course is identification, evaluation, and mitigation of cultural resources. Related topics discussed include public perceptions of the past, ethics, and being a professional in historical preservation.

MUA 500  Graduate Recital  1 cr
Graduate recital. To be taken in conjunction with a 500-level applied music course.

MUA 501  Piano  1 cr
Private study at the graduate level.

MUA 502  Piano  2 cr
Private study at the graduate level.

MUA 503  Piano  3 cr
Private study at the graduate level.

MUA 507  Applied Collaborative Piano  1 cr
The Director for Collaborative Keyboard studies will meet with the student enrolled in Applied Collaborative Piano to assign literature, which will be studied during the semester. For MUA 507, the student meets with the instructor 30 minutes each week to study vocal music and at least 1 collaborative assignment with strings, winds or brass. The goal of the course is to learn standard repertoire for piano with voice and various instruments.

MUA 508  Applied Collaborative Piano  2 cr
The Director for Collaborative Keyboard studies will meet with the student enrolled in Applied Collaborative Piano to assign literature, which will be studied during the semester. For MUA 508, the student meets with the instructor 60 minutes each week to study vocal music and collaborates with at least 2 different instrument types (string, woodwinds, brass). The goal of the course is to learn standard repertoire for piano with voice and various instruments.

MUA 509  Applied Collaborative Piano  3 cr
The Director for Collaborative Keyboard studies will meet with the student enrolled in Applied Collaborative Piano to assign literature, which will be studied during the semester. For MUA 509, the student meets with the instructor 60 minutes each week to study vocal music and collaborates with 3 different instrument types (string, woodwinds, brass). The goal of the course is to learn standard repertoire for piano with voice and various instruments.

MUA 511  Organ  1 cr
Private study at the graduate level.

MUA 512  Organ  2 cr
Private study at the graduate level.

MUA 513  Organ  3 cr
Private study at the graduate level.

MUA 521  Voice  1 cr
Private study at the graduate level.

MUA 522  Voice  2 cr
Private study at the graduate level.

MUA 523  Voice  3 cr
Private study at the graduate level.

MUA 531  Violin  1 cr
Private study at the graduate level.

MUA 532  Violin  2 cr
Private study at the graduate level.

MUA 533  Violin  3 cr
Private study at the graduate level.

MUA 541  Viola  1 cr
Private study at the graduate level.

MUA 542  Viola  2 cr
Private study at the graduate level.

MUA 543  Viola  3 cr
Private study at the graduate level.

MUA 551  Violoncello  1 cr
Private study at the graduate level.

MUA 552  Violoncello  2 cr
Private study at the graduate level.
COURSES

MUA 553  Violoncello
Private study at the graduate level.

MUA 561  String Bass
Private study at the graduate level.

MUA 562  String Bass
Private study at the graduate level.

MUA 563  String Bass
Private study at the graduate level.

MUA 561  String Bass
Private study at the graduate level.

MUA 562  String Bass

**MUB 587 Tuba**  
Private study at the graduate level.  
2 cr

**MUB 588 Tuba**  
Private study at the graduate level.  
3 cr

### Argument (ARG) (ARG)

**ARG 120 Critical Thinking**  
This course will examine complex types of reasoning, including statistical judgment, decision making, and causal and analogical thinking. Emphasis will be placed on the analysis of concrete examples of reasoning in various fields. Students will learn how to evaluate arguments, fallacies, common errors, and biases in reasoning and decision making. Identical with PHL 120. Credit cannot be received for both ARG 120 and PHL 120. Fulfills the General Education requirement.  
3 cr

**ARG 210 Argumentation**  
Examine the role of argumentation in a democratic society and aims to develop critical thinking and reasoned advocacy. Course makes functional a knowledge of tests of evidence and the modes of logical reasoning. Students participate in various forms of argumentation and debating. Identical with ARG 210. Students cannot receive credit for both ARG 210 and CA 210. Fee.  
3 cr

**ARG 222 Rhetoric, Culture and Society**  
A study of sentential and predicate logics and related topics. Identical with 321. Credit cannot be received for both ARG 321 and PHL 321.  
3 cr

**ARG 223 Argumentation**  
Examines the role of argumentation in a democratic society and aims to develop critical thinking and reasoned advocacy. Course makes functional a knowledge of tests of evidence and the modes of logical reasoning. Students participate in various forms of argumentation and debating. Identical with ARG 210. Students cannot receive credit for both ARG 210 and CA 210. Fee.  
3 cr

**ARG 224 Rhetoric, Culture and Society**  
A study of sentential and predicate logics and related topics. Identical with 321. Credit cannot be received for both ARG 321 and PHL 321.  
3 cr

**ARG 371 Approaches to English Grammar**  
A course designed primarily to help education majors translate between the languages of conventional grammar and the syntactical grammar relevant to the teaching of English at Precollege levels. Consideration will also be given to the rationales basic to the formation of different grammars and to methods of presenting grammatical material in a classroom situation. Non-education majors interested in a sophisticated approach to the study of grammar might also benefit from this course. Identical with EH 371. Credit cannot be received for both ARG 371 and EH 371. Pre-requisite: EH 101 Minimum Grade of C and EH 102 Minimum Grade of C.  
3 cr

**ARG 390 Special Topics**  
Different figures, periods, or topics of significance in Argument will be studied as announced. May be repeated, when content varies, for a total of six hours. Requires Sophomore, Junior or Senior standing.  
3 cr

**ARG 402 Rhetoric: Ancient and Modern**  
Readings in rhetorical theory, ancient and modern, are applied in specific writing assignments with encourage students to adopt a point of view and address a specific audience. Identical to EH 402. If credit for ARG 402 is received, then credit cannot be received for EH 402. Pre-requisite: EH 101 Minimum Grade of C and EH 102 Minimum Grade of C.  
3 cr

**ARG 481 Studies in Rhetoric**  
Seminar in specific topics dealing with writing, rhetoric, or language studies. May be repeated once for credit when course content varies. Identical with EH 481. Credit cannot be received for both ARG 481 and EH 481 when it is on the same specific topic. Junior standing required. Pre-requisite: EH 101 Minimum Grade of C and EH 102 Minimum Grade of C.  
3 cr

**ARG 490 Special Topics**  
An investigation of issues and concepts in Argument for advanced undergraduate students. May be repeated, when content varies, for a total of six hours. Prerequisites: Junior or Senior standing.  
3 cr

**ARG 492 Seminar**  
3 cr

**ARG 494 Directed Studies**  
Directed research in Argument under the guidance of a member of the department. Credit according to the magnitude of the individual project. May be repeated, if content varies, for a total of six hours. Prerequisites: Junior or Senior standing and approval of directing professor and department chair.  
1 TO 3 cr

### Art Education (AED) (AED)

**AED 301 Visual Arts for Young Children**  
Exploration of knowledge and skills in the arts appropriate for young children. Art techniques and media are explored.  
3 cr
AED 440  Arts for Learning  3 cr
Using the arts to promote physical, social, emotional, and
cognitive development.
Co-requisite: AED 441
Pre-requisite: SED 340 Minimum Grade of C and SED 341
Minimum Grade of C.

AED 441  Art in the N-12 Program  3 cr
Art and the intellectual, creative, and emotional growth of
adolescents and youth. The study of appropriate techniques
and materials for teaching studio art and crafts, art history,
appreciation and aesthetics, and participation in humanities
programs at the secondary level. Laboratory practice
in the secondary school. Restricted to N-12 art majors.
Prerequisites: Completion of two-thirds of teaching field.
Co-requisite: AED 440
Pre-requisite: SED 340 Minimum Grade of C and SED 341
Minimum Grade of C.

AED 494  Dir St -  1 TO 3 cr
No more than two directed study courses can be counted
toward the Bachelor's degree and Class B Certificate.
Prerequisite: Permission of department chair.

AED 501  Trn-Prac Tch Art Elem Sc  3 cr
Orients the student toward the artistic interests and creative
abilities of children in the elementary school, and developing
attitudes of respect for individuality and creativity. Included
are laboratory experiences with art materials and research
into appropriate techniques of teaching art

AED 502  Trn-Prac Tch Art Sec Sch  3 cr
Current trends and practices in curriculum, instruction,
selection of materials, and derivation of procedures for
guiding learning in art in the secondary school.

AED 540  Art in the N-12 Program  3 cr
Art and the intellectual, creative, and emotional growth
of children. The role of art in the instructional program,
examination of objectives in an art program, and the study
of appropriate techniques and materials for teaching art and
and crafts at the elementary level. Restricted to N-12 art majors.
Prerequisite: SED 555 Minimum Grade of B and SED 559
Minimum Grade of B and EPY 525 Minimum Grade of B.

AED 560  Grad Research Seminar  3 cr
Research in problems confronting American education.
Selected topics are explored by students which provide the
basis for seminar discussions. A seminar paper is presented
by each student. This course also includes a field-based
practicum. Prerequisite: Permission of department chair.

AED 594  Dir St - Research  1 TO 3 cr
Students explore through directed study problems and
issues of special interest or significance in Art Education. No
more than 3 hours of any departmental 594 courses can be
applied toward a degree program. Prerequisite: Permission
of department chair.

AED 595  Internship  1 TO 6 cr
The internship is a supervised learning experience in a work
setting similar to that in which the educator will eventually
be employed. The internship provides the students with
an opportunity to apply the theories and concepts learned
during the graduate program of study.
Pre-requisite: (PRAXIS-Art Cont Knowledge 158 or
PRAXIS-Art Cont Knowledge 158 )

Art History (ARH) (ARH)

ARH 100  Survey of Art  3 cr
A survey of major periods of artistic development from
prehistoric times to the present. Note: this course cannot be
counted toward fulfilling degree requirements for majors in
Studio Art, Art, or Art History. Fee. Core course

ARH 103  Art History I  3 cr
An examination of the history of the Western tradition of art
from cave painting through the Middle Ages including but
not limited to Ancient Egypt, Ancient Greece, Ancient Rome,
and Romanesque, and Gothic Europe. Students will be
introduced to the descriptive and critical analysis of works
of art and architecture as well as their cultural, economic,
religious, and historical context.

ARH 123  Art History II  3 cr
An examination of the history of the Western tradition of art
from the late Middle Ages to the 20th century including but
not limited to the periods of the Renaissance, the Baroque,
Neo-Classicism, Romanticism, Impression, Cubism, and
Pop Art. Students will be introduced to the descriptive and
critical analysis of works of art and architecture as well as
their cultural, economic, religious, and historical context.

ARH 203  Survey of Non-Western Art  3 cr
Survey of the visual arts from five broad geographic
areas of the world outside of Europe: Asia, Middle East,
Africa, Oceania (the islands of the Pacific Ocean), and the
Americas (North, Central, and South). Fee.

ARH 245  History of Graphic Design  3 cr
A survey of graphic design from the ancient Sumerians to
the present day.
Pre-requisite: ARH 123 Minimum Grade of D.
ARH 248  History of Photography  3 cr
A comprehensive study of the medium of photography. The course traces chronologically and thematically the evolution of an independent art form. The focus of the course is the growth of this contribution to the visual arts, through the inseparable aspects of science and art. Fee.
Pre-requisite: ARH 123 Minimum Grade of D.

ARH 250  African Art  3 cr
This course is designed as a basic orientation to the arts of Africa and the interpretation of experience as witnessed in various African visual art forms. The course will focus on the major civilization and/or nations south of the Sahara Desert and their stylistic developments. Emphasis will be placed on the aesthetic approach of African artists and the influence of their art on western culture. Fee.

ARH 290  Special Topics -  3 cr
Different subjects or themes in art or architectural history as announced. This course may be repeated twice when content varies, for a maximum of nine credit hours. Fee.

ARH 304  Ancient Grk Art and Architect  3 cr
Architecture, sculpture, and painting in Ancient Greece and the expansion and influence of Greek culture in the Ancient World. Identical to CLA 304. Credit cannot be received for both ARH 304 and CLA 304. Fee.
Pre-requisite: (ARH 103 Minimum Grade of D or CLA 103 Minimum Grade of D) or CLA 110 Minimum Grade of D.

ARH 306  Roman Art  3 cr
Architecture, sculpture, and painting in Ancient Rome and its empire. Identical to CLA 306. Credit cannot be received for both ARH 306 and CLA 306. Fee.
Pre-requisite: (ARH 103 Minimum Grade of D or CLA 103 Minimum Grade of D) or CLA 110 Minimum Grade of D.

ARH 312  Medieval Art and Architecture  3 cr
This course is a survey of the art and architecture of the Medieval world from the legalization of Christianity in AD 313 to the end of the Gothic Period. Fee.
Pre-requisite: (ARH 103 Minimum Grade of D or CLA 103 Minimum Grade of D).

ARH 322  Northern Renaissance Art  3 cr
Art of Flanders, Germany, and France in the 14th, 15th, and 16th centuries. Fee.
Pre-requisite: ARH 123 Minimum Grade of D. ARH 123 can be taken concurrently with this course.

ARH 324  Italian Early Renaissance  3 cr
Art of 14th and 15th century Italy. Fee
Pre-requisite: ARH 123 Minimum Grade of D. ARH 123 can be taken concurrently with this course.

ARH 326  16th Century Italian Art  3 cr
Art of the Italian High Renaissance and Mannerist Periods. Fee.
Pre-requisite: ARH 123 Minimum Grade of D. ARH 123 can be taken concurrently with this course.

ARH 330  Baroque Art of Southern Europe  3 cr
A study of painting, sculpture, and architecture in Italy and Spain during the 17th and early 18th centuries. Fee.
Pre-requisite: ARH 123 Minimum Grade of D. ARH 123 can be taken concurrently with this course.

ARH 332  Baroque Art and Architecture  3 cr
This course is a survey of the art and architecture of Seventeenth Century Europe. Fee.
Pre-requisite: ARH 123 Minimum Grade of D.

ARH 335  18th Century Art and Arch  3 cr
Survey of the art and architecture of the Eighteenth Century. Fee.
Pre-requisite: ARH 123 Minimum Grade of D.

ARH 340  Early Modern Art  3 cr
A study of art developments in the 19th and early 20th centuries. Fee.
Pre-requisite: ARH 123 Minimum Grade of D.

ARH 343  African-American Art  3 cr
Investigation of the art of African-Americans and the historical and social contexts in which the works were produced. Major periods of concentration include slavery, post-slavery, and the 20th century. Fee.

ARH 344  Contemporary Art  3 cr
A study of art developments since 1960. Fee.

ARH 345  American Arts 1600 - 1940  3 cr
American painting, graphics and sculpture from the Colonial period to 1940. Fee.
Pre-requisite: ARH 123 Minimum Grade of D.

ARH 346  Amer Architecture 1600-1940 -W  3 cr
American architecture from the colonial period to 1940. Fee.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and ARH 123 Minimum Grade of D.

ARH 348  Native American Art  3 cr
This class will address key issues in Native American Art including symbolism and spirituality, the role of patronage and museum practices, and the politics of art criticism.

ARH 360  Traineeship in Museum Work  3 cr
This course is evaluated experience in museum work at an accredited institution of art. It may be repeated once if the experience differs. Prerequisites: Fifteen hours of Art History with a grade of C or above and permission of the course director.

ARH 362  Internship Architect Preservatn  3 cr
Evaluated experience in architectural preservation at the Mobile Historic Development Commission. Cannot be used to fulfill requirements for the Art History major or minor. The course may not be repeated.
Pre-requisite: ARH 304 Minimum Grade of D or ARH 346 Minimum Grade of D or ARH 406 Minimum Grade of D or ARH 415 Minimum Grade of D. ARH 304 and ARH 346 and ARH 406 and ARH 415 can be taken concurrently with this course.
ARH 370  Philosophy of Art 3 cr
Acquaints students with main issues in aesthetics. Includes such issues as the nature and function of art and the criteria of aesthetic judgment. Identical with PHL 370. Credit cannot be received for both ARH 370 and PHL 370.

ARH 390  Special Topics - 3 cr
Different subjects or themes in art or architectural history as announced. This course may be repeated twice when content varies, for a maximum of nine credit hours. Fee.

ARH 415  Gothic Architecture 3 cr
A study of art, architecture and sculpture during the Gothic Age, with special emphasis on France, Germany, England, Italy, and Scandinavia. Fee. Pre-requisite: ARH 103 Minimum Grade of D. ARH 103 can be taken concurrently with this course.

ARH 434  Baroque Art Flanders-Holland 3 cr
A study of the painting of the major artists of Baroque Flanders and Holland; the work of Rubens, Hals, Rembrandt, Vemeer, and others will be studied. Fee. Pre-requisite: ARH 123 Minimum Grade of D. ARH 123 can be taken concurrently with this course.

ARH 480  Women in Art-W 3 cr
A study of women throughout art history as both the subject and the creator of art. Prerequisite: Nine hours of Art History above the 200 level. Fee. Pre-requisite: (EH 101 Minimum Grade of D or EH 102 Minimum Grade of D).

ARH 492  Seminar - W - 3 cr
This seminar will treat variable subjects. This course may be repeated twice when content varies, for a maximum of nine credit hours. Fee. Pre-requisite: (ARH 103 Minimum Grade of D or CLA 103 Minimum Grade of D) and ARH 123 Minimum Grade of D and (ARH 344 Minimum Grade of D or ARH 244 Minimum Grade of D) and (EH 102 Minimum Grade of D or EH 105 Minimum Grade of C).

ARH 493  Methodology of Art History-W 3 cr
An investigation of methodologies used by art historians in their examination of artistic production. Prerequisite: 9 hours of ARH courses above the 200 level.

ARH 494  Directed Studies 3 cr
Research in a selected topic in art or architectural history under the direction of a faculty member, resulting in a scholarly paper. Prerequisites: Nine hours in Art History numbered 300 or higher and permission of the instructor. Fee. This course may be repeated twice for a total of nine credit hours.

ARH 498  Art History Senior Thesis 3 cr
Art History B.F.A. students will identify and carry out independent scholarly research on an art history topic over two semesters with the guidance of a faculty committee. At the end of the second semester, the project will be concluded with submission of the polished thesis and a thesis defense presented through a formal session given to the Visual Arts faculty. This course is to be taken as two sequential, three-credit units. Pre-requisite: ARH 493 Minimum Grade of C. ARH 493 can be taken concurrently with this course.

ARH 499  Honors Senior Thesis - H (W) 3 cr
Honors students will identify and carry out independent scholarly research on an art history topic over two semesters with the guidance of a faculty mentor. At the end of the first semester, the project will be concluded with a formal oral presentation to the Visual Arts Faculty. At the end of the second semester, the students will submit the senior thesis. The work from both semesters will be graded by a three-member faculty committee, chaired by the mentor. This course is to be taken as two sequential, three-credit course units. Pre-requisite: HON 301 Minimum Grade of D.

ARH 560  Graduate Museum Internship 3 cr
This course is evaluated experience in museum work at an accredited institution of art. It may be repeated once if the experience differs. Prerequisites: ARH 103 or ARH 123 as relevant and Instructor Permission. Pre-requisite: ARH 103 Minimum Grade of C or ARH 123 Minimum Grade of C.

ARH 590  Special Topics - 3 cr
Different subjects or themes in art or architectural history as announced. This course may be repeated twice when content varies, for a maximum of nine credit hours. Fee. Pre-requisite: ARS 103 Minimum Grade of D and ARS 123 Minimum Grade of D. ARS 103 and ARS 123 can be taken concurrently with this course.

Art Studio (ARS) (ARS)

ARS 101  Art Appreciation 3 cr
A broad introduction to the nature, vocabulary, and media of the visual arts of drawing, painting, prints, the camera arts, graphic design, sculpture, crafts, and architecture.

ARS 121  Perceptual Drawing I 3 cr
An introductory course with emphasis on the development of drawing skills to realistically represent natural and man-made forms using dry drawing media.

ARS 122  Perceptual Drawing II 3 cr
A continuation of ARS 121 using wet and mixed drawing media. Pre-requisite: ARS 121 Minimum Grade of D.
ARS 123  Two-Dimensional Design  3 cr
The study and application of art elements and principles, and principles of perception, for the purpose of increasing the student's skill in communicating visually with paints and other two-dimensional media.

ARS 124  Three-Dimensional Design  3 cr
A study and application of art principles to three-dimensional problems.

ARS 155  Introduction to Print Media  3 cr
This course will provide students with an introductory education in the materials, methods, and history of the varied printmaking techniques. Students will gain a basic knowledge of the print processes and issues through the develop of a body of original work.

ARS 200  Intro to Animation  3 cr
This course introduces the student to the basic concepts of animation. Emphasis will be on the processes involved in creation of animation stressing teamwork, storyboarding, hand drawing, clay animation, motion, and balance. Digital camera, scanning and computer editing are critical skills that make the foundation for this class. Study of the history of animation and terminology will be included in this curriculum. Prerequisite: ARS 121. Fee. Pre-requisite: ARS 121 Minimum Grade of C.

ARS 201  Two Dimensional Animation I  3 cr
This course will offer skill development in the use of software to develop storyboards and 2-dimensional animation including creating, importing and sequencing media elements to create interactive motion graphics. Emphasis will be on conceptualization, creativity, and visual aesthetics. This course takes the students through various aspects of animation using 2 dimensional software. Developing concepts, storyboarding and production of several 2 dimensional animations will be accomplished. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of D and ARS 120 Minimum Grade of D.

ARS 202  Three Dimensional Animation I  3 cr
This course focuses on storytelling techniques through animation and the principles of animation. It covers the fundamentals of scene navigation, modeling, cameras, and lightning. Students will be introduced to 3D technology and how it is used to film and video game production. Pre-requisite: ARS 200 Minimum Grade of D and ARS 201 Minimum Grade of D.

ARS 204  Experimental Animation  3 cr
This course offers a framework in which students will explore and develop aesthetically progressive concepts and professional practices in their personal animation art-making. The students will develop a unique artistic voice in the creation of visually based animation using experimentation, exploration, traditional and non-traditional mediums. Pre-requisite: ARS 200 Minimum Grade of C and ARS 122 Minimum Grade of C and ARS 123 Minimum Grade of C.

ARS 211  Glass Art, Science, History  3 cr
A survey of glass objects from 5,000 years ago, leads to a focus on the contemporary and international Studio Glass Movement in art. Methodologies of glass making and the work of artists utilizing the medium will be explored. The physical properties of glass including coloration and transition range (heating and cooling) will be discussed and demonstrated with hands-on instruction. Fee.

ARS 212  Intro to Glass Blowing  3 cr
The manipulation, construction, and experimentation with glass as a sculptural and craft medium. Emphasis will be on glass blowing. Other investigations may include surface design, sandblasting, painting, and enameling on glass. 3 hours minimum of additional lab time beyond class time are required per week. Fee.

ARS 222  Figure Drawing I  3 cr
A study of the human figure using various drawing (dry) media. Fee. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of D.

ARS 225  Conceptual Drawing I  3 cr
An introduction to the developmental process of drawing as an art form using various subject matter and drawing media. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of D.

ARS 231  Painting I  3 cr
An introduction to the techniques and concepts of oil painting using various subject matter. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of D.

ARS 232  Painting II  3 cr
A continuation of ARS 231 with an emphasis on color, composition and technical facility in oil paint. Pre-requisite: ARS 231 Minimum Grade of D.

ARS 241  Intro to Ceramics  3 cr
Introduction to basic hand building and wheel techniques of working with clay. Included will be basic design considerations for traditional pottery forms as well as simple sculptural forms. There will be exposure to techniques for glazing and basic firing.

ARS 250  Lithography  3 cr
An introduction to lithography. Technical skills related to processing and printing an edition will be studied. The course will consist of studio practice, lectures, quizzes, and critiques. Pre-requisite: ARS 121 Minimum Grade of D and ARS 123 Minimum Grade of D.
ARS 251  Intaglio/Etching  3 cr
An introduction to Intaglio printing techniques also known as etching. Technical skills related to drawing, processing, and printing the metal plates will be studied. The class will consist of studio problems in plate making and printing along with lectures, quizzes, and critiques. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of D. ARS 122 and ARS 123 can be taken concurrently with this course.

ARS 252  Woodcut/Relief  3 cr
A study of relief printmaking. Techniques may include and are not limited to relief, linoleum cut, and wood engraving. The course will consist of studio practice, lectures, quizzes, and critiques. Emphasis will be given to the skills involved in the use of hand tools to cut the image and skills used in printing and editioning the block. Pre-requisite: ARS 121 Minimum Grade of D and ARS 123 Minimum Grade of D.

ARS 253  Silkscreen/Serigraphy  3 cr
An introduction to silkscreen printing as a fine art form. The class will explore various techniques used in waterbased screen printing, from simple stencils of hand drawn and cut paper designs to advanced photo processes. The course will consist of studio practice, lectures, quizzes, and critiques. Technical methods involved in color use, processing, and printing will be studied. Pre-requisite: ARS 121 Minimum Grade of D and ARS 123 Minimum Grade of C.

ARS 255  Beginning Printmaking  3 cr
This course will provide students with a fundamental education in the materials, methods, and history of the varied printmaking techniques. Students will gain a basic knowledge of the print processes and issues through the development of a body of original work. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of C and ARS 121 Minimum Grade of D. ARS 122 can be taken concurrently with this course.

ARS 261  Sculpture I  3 cr
A basic course with additive sculpture materials dealing with problems of mass, volume, and form. Pre-requisite: ARS 124 Minimum Grade of D.

ARS 262  Sculpture II  3 cr
An introduction to basic metal fabrication, including cutting, brazing, and welding both ferrous and non-ferrous materials. Pre-requisite: ARS 261 Minimum Grade of D. ARS 261 can be taken concurrently with this course.

ARS 271  Introduction to Graphic Design  3 cr
An introduction to skills and techniques used in graphic design, problems in visual priorities, and use of selected materials. Restricted to Majors. Fee. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of D.

ARS 272  Typography  3 cr
This class will examine typography as a visual communication tool. Course must be completed or in progress to participate in the Sophomore Review. Restricted to majors. Fee. Pre-requisite: ARS 271 Minimum Grade of C and ARS 273 Minimum Grade of C. ARS 273 can be taken concurrently with this course.

ARS 273  Graphic Design Foundations  3 cr
An introduction to skills and design principles used in graphic design, problems in visual priorities, and use of selected materials. Course must be completed or in progress to participate in the Sophomore Review. Restricted to Majors. Fee. Pre-requisite: ARS 122 Minimum Grade of D and ARS 123 Minimum Grade of D.

ARS 281  Intro to Photography  3 cr
An introduction to the technical and aesthetic aspects of photography. Investigation of picture-making problems and control of photographic media. Involves the use of color transparency materials and an introduction to black and white processing enlarging. Students must have 35 mm single lens reflex cameras capable of being operated in the manual exposure mode. Fee.

ARS 290  Special Topics -  3 TO 6 cr
A lower level studio, lecture, or seminar course treating a special medium, subject, or theme, as announced. This course may be repeated when the topic varies for a maximum of 6 credit hours.

ARS 301  2D Animation II  3 cr
This course will continue to develop skills in the use of traditional mediums as well as digital software to create storyboards and 2-dimensional animation including creating, importing and sequencing media elements. Emphasis will be on conceptualization, creativity, and visual aesthetics. This course takes the students through various aspects of animation using 2 dimensional software. Developing concepts, storyboarding and the production of several dimensional animations will be accomplished. Pre-requisite: ARS 201 Minimum Grade of C.

ARS 302  3D Animation II  3 cr
This course focuses on storytelling techniques through animation and the principles of animation. It will reinforce the fundamentals of scene navigation, modeling, cameras, and lighting. Students will become proficient in the use of 3D technology and how it is used for film and video game production. Pre-requisite: ARS 202 Minimum Grade of C.
ARS 304 Digital Modeling 3 cr
This course introduces the concepts and techniques used in the creation of three dimensional form in a digital space. Emphasis will be on the practical use and creation of three dimensional models for animation and texturing. The course will also explore how formal choices impact meaning, and discuss contemporary artists who incorporate digital modeling into their work.
Pre-requisite: ARS 122 Minimum Grade of C and ARS 124 Minimum Grade of C and ARS 200 Minimum Grade of C.

ARS 311 Kiln Formed Glass 3 cr
The exploration of glass formed through a variety of kiln working methods including fusing, slumping, pate de verre, and casting. Fee.

ARS 312 Intermediate Glass Blowing 3 TO 6 cr
A continuation of ARS 212 focusing on refinement of form and investigation of complex techniques in order to develop proficiency in glass blowing as a means to service individual creativity. The use of glass color is explored. A minimum of 3 additional hours of lab time outside of class time are required weekly. Fee.
Pre-requisite: ARS 212 Minimum Grade of D and ARS 124 Minimum Grade of D. ARS 124 can be taken concurrently with this course.

ARS 322 Figure Drawing II 3 cr
Further study of the human figure using various drawing (wet and dry) media.
Pre-requisite: ARS 222 Minimum Grade of D.

ARS 325 Conceptual Drawing II 3 cr
A continuation of ARS 225 with emphasis on concept driven work. Fee.
Pre-requisite: ARS 225 Minimum Grade of D.

ARS 331 Painting III 3 TO 12 cr
A continuation of ARS 231 and 232 with emphasis on conceptual exploration in oil and/or water media paint. May be repeated for a maximum of 12 hours.
Pre-requisite: ARS 231 Minimum Grade of D and ARS 232 Minimum Grade of D. ARS 231 and ARS 232 can be taken concurrently with this course.

ARS 341 Intermediate Ceramics 3 TO 9 cr
A continuation of ARS 241 with emphasis on hand building or wheel techniques. May be repeated for a total of 9 semester hours credit.
Pre-requisite: ARS 122 Minimum Grade of D and ARS 124 Minimum Grade of D and ARS 241 Minimum Grade of D. ARS 122 and ARS 124 and ARS 241 can be taken concurrently with this course.

ARS 351 Intermediate Printmaking 3 TO 12 cr
Further work in printmaking. Students may work in one or more of the following print media: Intaglio, lithography, relief, screen printing. Students must have taken the 200 level of the appropriate print media to move to intermediate level of that same media. The course may be repeated for a maximum of 9 semester hours.
Pre-requisite: ARS 250 Minimum Grade of D or ARS 251 Minimum Grade of D or ARS 252 Minimum Grade of D or ARS 253 Minimum Grade of D.

ARS 352 Relief/Woodcut 3 cr
Building on the relief techniques covered in ARS 255 Beginning Printmaking, this course will provide students with a deeper education in the materials, methods, and history of Relief/Woodcut printing. Students will gain knowledge of the print processes and issues through the development of a body of original work.
Pre-requisite: ARS 155 Minimum Grade of C or ARS 255 Minimum Grade of C.

ARS 353 Intaglio/Etching 3 cr
Building on the intaglio techniques covered in ARS 255 Beginning Printmaking, this course will provide students with an education in the materials, methods, and history of Intaglio/Etching. Students will gain knowledge of the print processes and issues through the development of a body of original art work.
Pre-requisite: ARS 155 Minimum Grade of C or ARS 255 Minimum Grade of C.

ARS 354 Screenprint/Serigraphy 3 cr
Building on the Screenprint/Serigraphy techniques covered in ARS 255 Beginning Printmaking, this course is an introductory course in water-based screen printing, designed to present the basic techniques and concepts of the medium as a fine art form.
Pre-requisite: ARS 155 Minimum Grade of C or ARS 255 Minimum Grade of C.

ARS 355 Lithography 3 cr
Building on the lithography techniques covered in ARS 255 Beginning Printmaking, this course will provide students with an intermediate education in the materials, methods, and history of lithography. Students will gain a knowledge of the print processes and issues through the development of a body of original art work.
Pre-requisite: ARS 155 Minimum Grade of C or ARS 255 Minimum Grade of C.

ARS 361 Sculpture III 3 TO 6 cr
An introduction to direct carving processes with wood and stone. This course may be repeated for a total of 6 semester hours credit.
Pre-requisite: ARS 262 Minimum Grade of D. ARS 262 can be taken concurrently with this course.
ARS 362  Sculpture IV  3 TO 6 cr
Advanced mold making techniques. This course may be repeated for a total of 6 semester hours credit.
Pre-requisite: ARS 361 Minimum Grade of D. ARS 361 can be taken concurrently with this course.

ARS 373  Graphic Design Identity Systems  3 cr
An intermediate course developing design skills used in the production of printed materials for visual communications with an emphasis on logos, letterheads, brochures and posters. Fee.
Pre-requisite: ARS 272 Minimum Grade of C and ARS 273 Minimum Grade of C.

ARS 374  Publication Design  3 cr
An intermediate course developing design skills used in the production of printed materials for visual communications with an emphasis on newsletters, magazines, and newspaper graphics. Fee.
Pre-requisite: ARS 272 Minimum Grade of C and ARS 273 Minimum Grade of C.

ARS 375  Digital Graphic Design  3 cr
An advanced level course utilizing computers to produce graphic design work for printed and digital media. Fee.
Pre-requisite: ARS 373 Minimum Grade of C and ARS 374 Minimum Grade of C.

ARS 376  Illustration  3 cr
Conceptual approaches, materials and techniques used to solve problems in illustration, emphasizing developing rendering skills. Fee.
Pre-requisite: (ARS 222 Minimum Grade of C or ARS 225 Minimum Grade of C) or (ARS 373 Minimum Grade of C or ARS 374 Minimum Grade of C).

ARS 381  Intermediate Photography I  3 cr
This course is designed to allow you to begin to communicate your own vision and artistic voice. This course is intended to take your technical skills to the next level, by reading, writing and thinking about photography. Pre-requisite: ARS 281 Minimum Grade of D.

ARS 382  Intermediate Photography II  3 cr
The three main objectives of this course is to further your knowledge of the fine art photography, learn how to conceptualize ideas through the medium of photography, and to treat photography primarily as a creative medium for discussing personal, political, and social concerns. Since photography is tied to many technical processes, these concerns will also be acknowledged in this class.
Pre-requisite: ARS 281 Minimum Grade of C and ARS 381 Minimum Grade of C.

ARS 387  Digital Silver Photography  3 cr
This studio course examines the intersecting theories and practices of photography with digital cameras and computer imaging.
Pre-requisite: ARS 382 Minimum Grade of D.

ARS 390  Special Topics  3 cr
An upper level studio, lecture, or seminar course treating a special medium, subject, or theme, as announced.

ARS 396  Professional Practices - W  3 cr
This course prepares students for employment, graduate school, or a professional career in the visual arts. Restricted to majors. Fee.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

ARS 400  Topics in Animation  3 cr
ARS 404  Studies in Animation  3 cr
Independent work in an approved Animation topic under the direction of a studio faculty member. This course may be repeated for a maximum of 6 credit hours. Fee.
Pre-requisite: ARS 201 Minimum Grade of D and ARS 301 Minimum Grade of D.

ARS 408  Pre-Thesis in Animation - W  3 cr
This course focuses on the creation of pre-production materials, concept art, storyboards, animatics, as well as research design documents and supplements, to be used in ARS 409 Senior Thesis in Animation course.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (ARS 301 Minimum Grade of C or ARS 302 Minimum Grade of C).

ARS 409  Senior Thesis in Animation  3 TO 6 cr
An Independent project of creative work in the area of Animation with the guidance of one to three faculty advisors. The student is required to work at least 9 hours a week in the studio. The thesis must be publicly exhibited. This course should be taken twice in consecutive semesters for a total of 6 credit hours.
Pre-requisite: ARS 404 Minimum Grade of C.

ARS 410  Topics in Glass  3 cr
An upper level Glass course treating a special subject or theme as announced. This course may be repeated when the topic varies for a maximum of 6 credit hours. Fee.

ARS 411  Advanced Kiln Formed Glass  3 cr
Advanced kiln forming requires investigation into conceptual and technical problems in glass. The student becomes increasingly self-directed through further exploration of fusing, slumping, of casting. The development of firing schedules is emphasized. Fee.
Pre-requisite: ARS 311 Minimum Grade of D and ARS 123 Minimum Grade of D. ARS 123 can be taken concurrently with this course.

</tbody>
</table>
ARS 451  Advanced Printmaking  3 TO 6 cr
A continuation of ARS 351 with emphasis on each student's developing and refining an individual approach to creative work. For students with a Primary Concentration in Printmaking, this course is preparation for Thesis. Fee. Pre-requisite: ARS 351 Minimum Grade of D. ARS 351 can be taken concurrently with this course.

ARS 454  Studies in Printmaking  3 cr
Independent work in an approved Printmaking topic under the direction of a studio faculty member. This course may be repeated for a maximum of 6 credit hours. Fee.

ARS 458  Pre-Thesis in Printmaking  3 cr
Independent creative production and preliminary work in an approved Printmaking topic in preparation for the capstone course. Pre-requisite: ARS 451 Minimum Grade of C.

ARS 459  Senior Thesis in Printmaking  6 cr
An Independent project of creative work in the area of Printmaking with the guidance of one to three faculty advisors. The student is required to work at least 18 hours a week in the studio. The thesis must be publicly exhibited. This course may be repeated once for credit. Fee.

ARS 460  Topics in Sculpture  3 cr
An upper level Sculpture course treating a special subject or theme as announced. This course may be repeated when the topic varies for a maximum of 6 credit hours. Fee.

ARS 461  Sculpture V  3 TO 6 cr
Experimental work with synthetic materials. This course may be repeated for a total of 6 semester hours credit. Requires permission of instructor. Pre-requisite: ARS 362 Minimum Grade of D. ARS 362 can be taken concurrently with this course.

ARS 464  Studies in Sculpture  3 cr
Independent work in an approved Sculpture topic under the direction of a studio faculty member. This course may be repeated for a maximum of 6 credit hours. Fee.

ARS 468  Pre-Thesis in Sculpture  3 cr
This course focuses on the exploration and production of sculpture in materials such as metal, resin, clay, wood and concept to be taken prior to ARS 469 Senior Thesis in Sculpture. This course may be repeated for a maximum of 6 credit hours. Fee. $200.00. Pre-requisite: ARS 362 Minimum Grade of C.

ARS 469  Senior Thesis in Sculpture  6 cr
An independent project of creative work in the area of Sculpture with the guidance of one to three faculty advisors. The student is required to work at least 18 hours a week in the studio. The thesis must be publicly exhibited. This course may be repeated once for credit.

ARS 470  Topics in Graphic Design  3 cr
An upper level Graphic Design course treating a special subject or theme as announced. This course may be repeated when the topic varies for a maximum of 6 credit hours. Fee.

ARS 472  Senior Graphic Design  3 cr
An advanced workshop that addresses issues of visual communication using graphic design as a problem-solving tool. Fee. Pre-requisite: ARS 373 Minimum Grade of C and ARS 374 Minimum Grade of C.

ARS 473  Web Design  3 cr
An introduction to interactive applications. This course provides instruction in innovative, artistic design and development of visual communication skills related to interactive applications. Pre-requisite: ARS 373 Minimum Grade of C.

ARS 474  Studies in Graphic Design  3 cr
Independent work in an approved Graphic Design topic under the direction of a studio faculty member. This course may be repeated for a maximum of 6 credit hours. Fee.

ARS 479  Design Business Practices-W  3 cr
A study of the business principles of Graphic Design. Projects encourage both collaborative and independent study. Students explore design as a commercial art and develop the skills to coordinate projects through all phases of a professional, business relationship. Fee. Pre-requisite: ARS 373 Minimum Grade of C and ARS 374 Minimum Grade of C and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

ARS 480  Topics in Photography  3 cr
An upper level Photography course treating a special subject or theme as announced. This course may be repeated when the topic varies for a maximum of 6 credit hours. Fee.

ARS 481  Advanced Photography  3 cr
This course will strive to help further develop each student's artistic strength in their use of the photographic medium. Each student will be required to write a statement explaining the body of work that they will create and what particular processes they might be interested in exploring. Pre-requisite: ARS 281 Minimum Grade of C and ARS 381 Minimum Grade of C and ARS 382 Minimum Grade of C.

ARS 483  Color Photography  3 cr
This is an introduction to color photography. The goals are to become familiar with all aspects of color photography including film selection, processing, printing, theory, and criticism. Pre-requisite: ARS 281 Minimum Grade of D and ARS 381 Minimum Grade of D and ARS 382 Minimum Grade of D.
ARS 484  Studies in Photography  3 cr
Independent work in an approved Photography topic under
the direction of a studio faculty member. This course may be
repeated for a maximum of 6 credit hours. Fee.

ARS 485  Alternative Photo Processes  3 cr
This is an advanced studio art course designed for students
with a background in photography (primarily black and
white) who want to expand their image making vocabulary
through the use of early photographic techniques.
Pre-requisite: ARS 481 Minimum Grade of D.

ARS 486  Pre-Thesis in Photography  3 cr
This course is designed for students to communicate their
own artistic vision by creating one large body of work.
Students will be required to write a statement explaining the
body of work that they wish to create and what particular
processes they might be interested in exploring. This course
is designed to prepare students for senior thesis and to help
individuals think independently as artists, to formulate ideas
based on aspects of their work, interests, and passions.
Pre-requisite: ARS 481 Minimum Grade of C.

ARS 487  Photo Bookmaking  3 cr
This class will focus on the design and construction of artist
books. We will explore structure and form and how they
support and influence the content of a book.
Pre-requisite: ARS 481 Minimum Grade of D.

ARS 488  Graphic Design Thesis  3 cr
A self-directed creative project in the area of graphic design
with the guidance of a faculty member. Evaluation of the
project is by faculty committee. Fee.
Pre-requisite: ARS 472 Minimum Grade of C and ARS 479
Minimum Grade of C.

ARS 489  Senior Thesis in Photography  6 cr
An independent project of creative work in the area of
Photography with the guidance of one to three faculty
advisors. The student is required to work at least 18 hours
a week in the studio. The thesis must be publicly exhibited.
This course may be repeated once for credit.

ARS 490  Special Topics  1 TO 12 cr
An advanced studio, lecture, or seminar course treating a
special medium, subject, or theme, as announced. This
course may be repeated for a maximum of twelve (12)
credit hours. Requires junior standing and permission of the
instructor.

ARS 494  Directed Studies  3 TO 6 cr
Independent work in an approved studio medium or topic
under the direction of a studio faculty member. May be
repeated for a maximum of 6 credits.

ARS 496  Professional Studies Internship  3 cr
Students intern in a specialized area of interest. Written
report required.

ARS 497  Senior Thesis in Glass  6 cr
An independent project of creative work in the area of the
Glass Concentration, with the guidance of one to three
faculty advisors. The student is required to work at least
18 hours a week in the studio. The thesis must be publicly
exhibited. Fee.

ARS 498  Senior Thesis  6 cr
An independent project of creative work in the area of
the Primary Concentration or one or more Secondary
Concentrations, with the guidance of one to three faculty
advisors. The student is required to work at least 18 hours
a week in the studio. The thesis must be publicly exhibited.
This course may be repeated once for credit.

ARS 499  Honors Senior Thesis - H  3 cr
Honors student, the first semester, will identify and carry out
independent scholarly research on a topic with the guidance
of a faculty mentor. The second semester, students will
produce a body of work that incorporates and exemplifies
the ideas explored in the research paper. The project will
be concluded with a formal presentation to the Visual Arts
faculty. The Honors Project will be graded by a three-
member faculty committee, chaired by the mentor. This
course is to be taken as two, sequential, three-credit course
units.
Pre-requisite: HON 301 Minimum Grade of D.

ARS 500  Graduate Animation  3 cr
Intensive course structured as an exploration of the practice
and production of animation. May be repeated for a total of
36 credit hours.

ARS 504  Digital Modeling  3 cr
This course introduces the concepts and techniques used
in the creation of three dimensional form in a digital space.
Emphasis will be on the practical use and creation of three
dimensional models for animation and texting. The course
will also explore how formal choices impact meaning,
and discuss contemporary artists who incorporate digital
modeling into their work. Fee.

ARS 505  Graduate Glass  3 cr
Intensive investigation of visual, expressive or technical
problems in glass. May be repeated for a total of 18
credit hours. Pre-requisite: bachelor's degree in art or art
education. Fee.
Pre-requisite: ARS 411 Minimum Grade of C and ARS 412
Minimum Grade of C.

ARS 520  Graduate Drawing  3 TO 9 cr
Intensive course in drawing as both a set of skills and as
a creative medium of expression. May be repeated for a
total of 36 credit hours. Pre-requisites: complete either
appropriate pre-requisites or bachelor's degree in art or art
education. Fee.
Pre-requisite: ARS 422 Minimum Grade of C or ARS 425
Minimum Grade of C. ARS 422 and ARS 425 can be taken
concurrently with this course.
ARS 526  Graduate Color Theory  3 cr
A studio course continuing a study of the nature, theory and application of color in an aesthetic context. 
Pre-requisite: ARS 326 Minimum Grade of C.

ARS 530  Graduate Painting  3 TO 9 cr
Intensive course in painting with traditional or contemporary media, subjects and concepts. May be repeated for a total of 36 credit hours. Pre-requisites: complete either appropriate pre-requisites or bachelor's degree in art or art education. Fee  
Pre-requisite: ARS 431 Minimum Grade of C. ARS 431 can be taken concurrently with this course.

ARS 540  Graduate Ceramics  3 TO 9 cr
A study of clay as a creative medium of expression. Problems of form, volume, space, texture, decoration, and function will be investigated in their relation to selected ceramics processes and building techniques. May be repeated for a total of 36 semester hours. Pre-requisites: complete either appropriate pre-requisites or bachelor's degree in art or art education. Fee.  
Pre-requisite: ARS 441 Minimum Grade of C. ARS 441 can be taken concurrently with this course.

ARS 550  Graduate Printmaking  3 TO 9 cr
Intensive investigation of visual, expressive or technical problems in one or more printmaking media. This course may be repeated for a total of 36 hours credit. Pre-requisites: complete either appropriate pre-requisites or bachelor's degree in art or art education. Fee.  
Pre-requisite: ARS 451 Minimum Grade of C. ARS 451 can be taken concurrently with this course.

ARS 551  Photomechanical Technologies  3 cr
This course will provide students with an education in the materials, methods, history, contemporary technologies of photomechanical processes. Students will gain a knowledge of photographic print processes and issues through the development of a body of original work. Through critiques students will be expected to develop a familiarity with techniques and materials. Concurrent enrollment in ARS 591. Lab fee.

ARS 552  Artist Book Seminar  3 cr
This course will provide students with an education in the materials, methods, and contemporary strategies for artist books. Students will gain knowledge of several artist book strategies and forms through the development of a body of original work. Through critiques students will be expected to develop a familiarity with techniques and materials. Concurrent enrollment in ARS 591. Lab fee.

ARS 560  Graduate Sculpture  3 TO 9 cr
Intensive investigation of problem of mass, volume, form, and space using one or more sculptural media. This course may be repeated for a total of 36 hours credit. Pre-requisites: complete either appropriate pre-requisites or bachelor's degree in art or art education. Fee.  
Pre-requisite: ARS 461 Minimum Grade of C. ARS 461 can be taken concurrently with this course.

ARS 570  Graduate Graphic Design  3 cr
An intensive workshop that investigates advanced issues of visual communication using graphic design as both a problem-solving tool and as a medium for creative expression and communication. Emphasis on trending technology and/or professional practice. May be repeated for a total of 36 credit hours.  
Pre-requisite: ARS 488 Minimum Grade of B.

ARS 571  Advanced Typography and Layout  3 TO 6 cr
Intensive workshop that investigates and explores advanced typography and layout and/or format techniques both in digital and analog forms. Issues of visual communication using graphic design as both a problem-solving tool and a medium for creative expression and communication will also be investigated and explored. Emphasis on trending technology, research methods, and professional practice. May be repeated for a total of 6 credits hours.  
Pre-requisite: ARS 488 Minimum Grade of B.

ARS 572  Divergent Thinking Research  3 TO 6 cr
Introduction to the fundamental and varied methodologies of research, theories of design and human behavior, and discipline-related history in order to work with a variety of design products and users. Emphasis will be placed on application of research findings to the creative process, design, and visual solutions. May be repeated for a total of 6 credit hours.

Pre-requisite: ARS 488 Minimum Grade of B.

ARS 576  Build Your Social Media Brand  3 TO 6 cr
An intensive workshop that investigates advanced uses and techniques for growing an audience through social media and online content marketing using visual communication, graphic design, and copy writing techniques. Emphasis on trending technology and/or professional practice as a medium for creative expression and communication. This graduate course focuses on growing an audience online with an emphasis on personal branding, social media branding and marketing, and content marketing on your website and social media channels. May be repeated for a total of 6 credit hours.

Pre-requisite: ARS 488 Minimum Grade of B.

ARS 580  Graduate Photography  3 cr
Emphasizing theory, concept, and critical thinking, while expanding knowledge of the photographic medium. May be repeated for a total of 18 credit hours. Prerequisite: ARS 387 Minimum Grade of D or ARS 481 Minimum Grade of D or bachelor's degree in art or education. Fee.  
Pre-requisite: ARS 387 Minimum Grade of C or ARS 481 Minimum Grade of C.

ARS 590  Special Topics -  3 TO 9 cr
A graduate course treating a special medium, subject, or theme, as announced. This course may be repeated twice when the content varies, for a maximum of 9 credit hours.
### Audiology (AUD) (AUD)

<tr>
<td><strong>AUD 613</strong></td>
<td>Psychoacoustics</td>
<td>3 cr</td>
<td>Study of the principles, procedures and research involved in the field of psychoacoustics and of the relationships between the physical dimensions of auditory stimuli and the resultant perceptual experience as well as the relationships among psychoacoustic testing and both auditory physiology and the audiologic evaluation process. Participation in laboratory assignments will be required.</td>
</tr>
<tr>
<td><strong>AUD 614</strong></td>
<td>Instrumentation and Acoustics</td>
<td>3 cr</td>
<td>Study of basic electricity, acoustics and measurement of sound properties, wave analysis, transducers, measuring and calibration systems, speech processing systems, and system interaction and integration.</td>
</tr>
<tr>
<td><strong>AUD 616</strong></td>
<td>Resrch Design Hearing Sci</td>
<td>3 cr</td>
<td>Research designs utilized in the hearing sciences; elements of research proposals and studies; how to critique a research study; how to conduct a literature review; APA format; students will be required to write precis of research articles and write a research proposal. Elements of modern statistics including sets and functions, probability theory, hypothesis testing, analysis of variance models, correlation, and regression.</td>
</tr>
<tr>
<td><strong>AUD 620</strong></td>
<td>Medical Audiology</td>
<td>1 TO 3 cr</td>
<td>This course will address acquired and congenital diseases and disorders of the outer, middle, and inner ear and the central auditory nervous system occurring across the lifespan; imaging techniques; non-audiologic medical and surgical interventions for these conditions; and cerumen management techniques; and appropriate methods for monitoring of patients prescribed potentially ototoxic medications.</td>
</tr>
<tr>
<td><strong>AUD 621</strong></td>
<td>Professional Issues</td>
<td>3 cr</td>
<td>This course will address a variety of professional issues such as organizations, societies, and their histories; codes of ethics; scopes of practice; credentialing and licensure; the development of the AUD; guidelines and position statements generated by ASHA and AAA; standards and best practices; methods and models of service delivery; and audiology practice management.</td>
</tr>
<tr>
<td><strong>AUD 623</strong></td>
<td>Pharma &amp; Ototox Monitoring</td>
<td>3 cr</td>
<td>This course will provide the basic science background necessary to understand the effects of medications on the auditory and balance systems. This course will also address drug treatment strategies for hearing loss and balance disorders. Topics will include mechanisms of drug actions, side effects, how age and disease affect these mechanisms, and specific effects of certain drugs on the hearing and balance system. This course will additionally address appropriate methods for identification and monitoring of patients prescribed potentially ototoxic medications.</td>
</tr>
<tr>
<td><strong>AUD 630</strong></td>
<td>Electroac Char of Amp Systems</td>
<td>3 cr</td>
<td>This course will address styles and types of earmolds, hearing aids, and assistive listening devices; components common to all amplification systems as well as optional features (such as directional microphones, volume controls, telecoils, etc.) and their electroacoustic properties and functioning; use of ANSI standards; physical, acoustic and electroacoustic modifications of earmolds and amplification systems.</td>
</tr>
</tbody>
</table>
AUD 631  Sel, Fit & Verif of Amp Sys  3 cr
This course will address the principles of selection, fitting, and verification of amplification systems, including hearing aids and assistive listening devices; subjective and objective audiologic assessments used to determine need for, select, and fit appropriate amplification systems for patients of all ages; and techniques used to select and fit amplification systems. The course will also address subjective and objective verification procedures, specifically addressing the importance of including Real-Ear Measures and subjective self-assessment measures in the amplification process.

AUD 632  Hearing Aid Lab  1 cr
This course will address the principles of verification and validation; tools used to verify appropriate fitting of amplification systems (such as real-ear probe-mic equipment) and techniques used to validate fitting (such as software packages, and subjective and objective audiologic measures); cochlear implant remapping.

AUD 633  Advanced Sensory Aids  3 cr
This course will address advanced technologies for individuals with hearing-impairment such as cochlear and brainstem implants, vibrotactile aids, and implantable devices, as well as the selection and fitting of these technologies.

AUD 640  Basic Audiologic Assessment  3 cr
This course will address the principles of cross-check, the test battery approach, differential diagnosis, relevant test equipment, instruments, and transducers, administration and interpretation of the pure-tone testing, clinical masking, case history, otoscopy, and tuning-fork tests, speech audiometry; tests for pseudo-hypoacusis, ototoxicity, site-of-lesion testing and historical assessments; and informal assessment procedures.

AUD 641  Immit & Otoacous Emission Meas  3 cr
This course will address administration and interpretation of acoustic immittance and otoacoustic emission measures across the lifespan. Topics will address standard and multi-frequency tympanometry, acoustic reflex testing, and eustachian tube function testing; spontaneous, transient and distortion-product OAE measurement; and the influence of intrinsic and extrinsic variables, including cochlear and retro-cochlear pathology, on outcomes and differential diagnosis.

AUD 642  Pediatric Audiology  3 cr
This course will address issues associated with providing audiologic services to pediatric and developmentally delayed populations. Issues will include gestational development, test administration and interpretation; genetic transmission of hearing loss, risk factors for hearing loss; principles of screening and the development and construction of a screening program; universal newborn hearing screening and early hearing detection and intervention programs.

AUD 643  Audiology and Aging  3 cr
This course will address the issues associated with providing audiologic services to older adults. Issues will include effects of aging on anatomy, physiology, and function, and test administration and interpretation issues specific to older adults.

AUD 645  Evoked Potential Measures  3 cr
This course will address instrumentation (transducers and electrode types); application and interpretation of evoked potential (EP) measures including ENOG, ECoG, ABR, middle and late potentials, across the lifespan; sedation protocols; assessment protocols associated with different EP measures and the populations to which they are applied; population norms; intrinsic and extrinsic variables affecting EP results; differential diagnosis of auditory neuropathy; troubleshooting.

AUD 647  Adult Audio Rehabilitation  3 cr
This course will address the implications of hearing loss in adulthood including the educational, vocational, social and legislative concerns of adults with hearing loss; assessment and intervention techniques used to maximize communication skills, including communication strategy training, speechreading, and group therapy approaches.

AUD 648  Counseling Hear Imp-Families  3 cr
This course will address various theories, principles and techniques associated with the social and psychological aspects of disability as well as issues specific to and techniques used when counseling patients with hearing loss and their families.

AUD 649  Ped Habil & Educ Audiology  3 cr
This course will address the speech, language, and communication of children with hearing impairment. Manual and oral modes of communication will be discussed, including American Sign Language, Signing Essential English I and II, Cued Speech, Total Communication, and Auditory-Verbal Therapy. Other issues to be addressed will include the development, management, and utilization of hearing and middle ear system screening programs, classroom acoustics, selection and fitting of classroom-based amplification, and federal law associated with children with special needs. Taught Spring Semester.

AUD 651  Assess-Treatmnt Cent Aud Proc  3 cr
This course will address the development, assessment, and interpretation of an auditory processing test battery across the lifespan, as well as intervention approaches.

AUD 653  Industrial-Forensic Audiology  3 cr
This course will address federal noise standards, effects of noise exposure on the auditory system, sound measurement and instrumentation, development and implementation of a hearing conservation program, hearing protection devices and forensic audiology.
AUD 654  Tinnitus and Hyperacusis  3 cr  
This course will address assessment and intervention approaches used in the management of tinnitus and hyperacusis.

AUD 655  Spch-Lang Path for Audiologist  3 cr  
This interprofessional education (IPE) course will address the foundational knowledge and skills necessary for audiologists to work together with speech-language pathologists in interprofessional collaborative teams. Specifically, this course will address the scope of practice in audiology, speech-language screening, speech-language report literacy and special topics.

AUD 656  Vestibular Assessment  4 cr  
This course will include a discussion of the peripheral and central anatomy and physiology of the balance system and the test measures used to assess the function of this complex system. Topics will include case history and screening measures, as well as test protocols and analysis of results on electronystagmography/video nystagmography, rotational testing, posturography, and vestibular evoked myogenic potentials. Taught Spring Semester.

AUD 657  Management of Vestibular Disor  2 cr  
This course will focus on peripheral and central disorders of the vestibular system and the interpretation of results on diagnostic tests in disordered patients. Pharmacological and surgical treatments of dizziness will be discussed, as well as rehabilitative techniques to manage the vestibular pathology.

AUD 658  Advanced Neurophys Measures  3 cr  
This course will address advanced electrophysiological techniques, including ENOG, ALR, ERPs (i.e. P300, etc), and neuroimaging techniques (fMRI and PET) with an emphasis on auditory and cognitive processing, across the lifespan; source localization techniques; instrumentation; stimulus and acquisition parameters; measurement procedures; analysis and interpretation.

AUD 661  Developmnt-Managemnt Aud Prac  3 cr  
This course will address issues associated with audiology practice management including techniques involved in developing a mission statement and a business plan; working with an accountant; determining type, location, and name of practice; regulation, licensure, and hiring a legal advisor; equipment and service delivery decisions; establishing accounts with suppliers, paying bills and budgeting; third-party reimbursement, Medicaid, and Medicare; hiring and supervision; demographics and marketing; use of outcome data; and professional writing.

AUD 674  Special Projects in Audiology  3 cr  
Student will be required to develop a variety of projects during their academic training, some of which will be further developed and completed during this course.

AUD 675  Special Topics in Audiology  1 cr  
Student will identify cases or service delivery issues of clinical or professional interest and present these cases or issues to fellow students, clinical supervisors, and faculty via a chat room in a grand rounds format.

AUD 680  Clinical Methods in Audiology  1 TO 3 cr  
Students will become familiar with and conduct basic audioligic procedures with non-clinical populations by completing various lab assignments. Students will also observe clinical activities in the USA Speech & Hearing Center.

AUD 681  Clinical Practicum I  1 TO 3 cr  
Discussion of instrumentation, procedures, and approaches to assessment and intervention in audiology.  
Co-requisite: AUD 681L

AUD 682  Clinical Practicum II  1 TO 3 cr  
Discussion of instrumentation, procedures, and approaches to assessment and intervention in audiology.  
Co-requisite: AUD 682L

AUD 683  Clinical Practicum III  1 TO 3 cr  
Discussion of instrumentation, procedures, and approaches to assessment and intervention in audiology.  
Co-requisite: AUD 683L

AUD 684  Clin Externship in Audiology  1 TO 12 cr  
Off-campus opportunity to obtain clinical experience in a full-time setting. In addition, student may be required to identify cases or service delivery issues of clinical or professional interest and present these cases or issues to fellow students, clinical supervisors, and faculty via an online forum in a grand rounds format.

AUD 699  Thesis  1 TO 3 cr  
Under the advice and guidance of a faculty member, students will identify and complete a research project relevant to the field of Audiology. Requires approval of the Department Chair.

Biochemistry - MD (BCH)

BCH 400  Biochemistry Externship  1 TO 4 cr  
To be determined.

BCH 410  Research in Biochem & Mol Biol  1 TO 4 cr  
: To carry out research under the supervision of a sponsoring faculty member. The student will help design experiments, learn and apply established techniques, record and evaluate data and make a final report both written and oral that describes the overall experimental results. The faculty member will assist the student in the project. This rotation is highly recommended for the student considering a career in academic medicine. Research areas include the biochemistry and molecular biology of cancer, lung diseases, and RNA viruses.
BCH 526  Biochemistry Lit Reports  1 cr
Students and faculty participate in a supervised reading of current literature and meet once a week to interact in a discussion of the selected article. The goal of this course is to maintain the student's level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature. Student presentation is required to receive credit.

BCH 527  Dir Studies Biochemistry  1 TO 6 cr
Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project. This course should be taken by students who have completed their laboratory rotations, but have not yet submitted a research proposal.

BCH 590  Sp Top -  1 TO 3 cr
This course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

BCH 622  Molecular Biology  3 cr
The focus of this course is on cellular processes involving DNA repair, replication and translation. Current concepts regarding the organization and structure of chromosomes, genes and the regulation of gene expression will be discussed. Eukaryotic molecular biology is emphasized, however some eukaryotic and prokaryotic processes are compared and contrasted. This course stresses the methods and experimental design used to delineate and understand cellular information transfer and molecular phenomena.

BCH 626  Biochemistry Research Seminar  1 cr
Students and faculty present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

BCH 799  Research-Dissertation  1 TO 6 cr
Independent research by the student under the sponsorship of the graduate faculty. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Biology (BLY) (BLY)

BLY 101L  Life Science I Laboratory  1 cr
Laboratory exercises associated with BLY 101. Together, BLY 101 and BLY 101L count as one laboratory science course, partially fulfilling general education requirements. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L).
Pre-requisite: BLY 101 Minimum Grade of D. BLY 101 can be taken concurrently with this course.

BLY 102L  Life Science II Lab  1 cr
Laboratory exercises associated with BLY 102. Together, BLY 102 and 102L count as one laboratory science course, partially fulfilling general education requirements. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L).
Fee.
Pre-requisite: BLY 101 Minimum Grade of D and BLY 102 Minimum Grade of D. BLY 101 and BLY 102 can be taken concurrently with this course.

BLY 121L  General Biology I Lab  1 cr
Laboratory exercises associated with BLY 121. Together, BLY 121 and BLY 121L count as one laboratory science course, partially fulfilling general education requirements. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L). Fee.
Co-requisite: BLY 121
Pre-requisite: (SAT Mathematics 540 or ACT Math 22 or CH 100 Minimum Grade of D or CH 131 Minimum Grade of D or BLY 101 Minimum Grade of C or MA 112 Minimum Grade of D). CH 131 and MA 112 can be taken concurrently with this course.

BLY 122L  General Biology II Laboratory  1 cr
Laboratory exercises associated with BLY 122. Together, BLY 122 and 122L count as one laboratory science course, partially fulfilling general education requirements. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/ minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L). Fee.
Co-requisite: BLY 122
Pre-requisite: BLY 121 Minimum Grade of D.

BLY 134L  Ocean Science Lab  1 cr
Lab experiences associated with BLY 134.
Pre-requisite: BLY 134 Minimum Grade of D. BLY 134 can be taken concurrently with this course.
BLY 101 Life Science I 3 cr
The first of a two-semester sequence designed for the non-major. The basic principles of biological phenomena are emphasized by examples relating to the human. Cell structure and function, energy and organ systems are studied. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L).

BLY 102 Life Science II 3 cr
A continuation of BLY 101. Organ systems, cell reproduction, plant and animal development, heredity, evolution, and ecology area studied. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L). Pre-requisite: BLY 101 Minimum Grade of D. BLY 101 can be taken concurrently with this course.

BLY 121 General Biology I 3 cr
A study of general biological principles, including the chemical basis of life; cellular biology, including cell structure and metabolism, genetics, microevolution; and a survey of simple organisms, including bacteria, protists and fungi. Core Course. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L). Co-requisite: BLY 121L Pre-requisite: ACT Math 22 or SAT Mathematics 540 or MATH SECTION SCORE 565 or CH 100 Minimum Grade of D or CH 131 Minimum Grade of D or MA 112 Minimum Grade of D. BLY 121 can be taken concurrently with this course.

BLY 122 General Biology II 3 cr
A study of plants, major invertebrate phyla, vertebrate morphology, plant and animal physiology, animal behavior, macroevolution and ecology. Core course. Credit will not be allowed for both the non-major sequence (BLY 101, BLY 101L and BLY 102 BLY 102L) and the major/minor sequence (BLY 121, BLY 121L and BLY 122, BLY 122L). Co-requisite: BLY 122L Pre-requisite: BLY 121 Minimum Grade of D.

BLY 134 Ocean Science 3 cr
An introduction to physical, chemical, and biological oceanography.

BLY 205 Intro Environmental Sci 3 cr
Environmental science, including the fundamentals required to understand how ecosystems work, how environmental modifications affect ecosystems and living things, and how living things affect their environment. Topics to be emphasized include the effects of pollution, habitat modification and other environmental changes, on ecosystems, plants, wildlife, man, outdoor recreation and the future. Public health and medical effects will also be considered. Many topics covered are of special significance to this region: wetlands, the effects of dredging and filling, artificial lake construction, development, agricultural and forestry practices on ecosystems, plants and animals. Requires college biology, or permission of instructor. Pre-requisite: BLY 101 Minimum Grade of C or BLY 121 Minimum Grade of C. BLY 121 can be taken concurrently with this course.

BLY 207 Biology of Aging 3 cr
A descriptive review of processes of aging. Emphasis is placed on studying structural and functional changes that could occur with increase in chronological age. Usually taught in the fall, spring and summer terms. Pre-requisite: BLY 101 Minimum Grade of D.

BLY 213 Microbiology 3 cr
A survey of bacteria, fungi, protozoa and viruses with emphasis on host-microbe interactions, immune responses, and control mechanisms. Pre-requisite: BLY 101 Minimum Grade of D or BLY 121 Minimum Grade of D.

BLY 214 Lab Studies Microbiology 1 cr
A series of laboratory experiments designed to provide practical experiments in basic microbial techniques. Pre-requisite: (BLY 213 Minimum Grade of D or BMD 210 Minimum Grade of D). BLY 213 can be taken concurrently with this course.

BLY 301 Cell Biology 3 cr
A course designed to integrate cell structure and function: the study of the ultrastructure, organization, physiology, genetics, and other functions of the cell. Core course. Pre-requisite: (BLY 121 Minimum Grade of C and BLY 122 Minimum Grade of C and CH 131 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

BLY 302 Genetics 3 cr
An introduction to both classical and modern genetic concepts and theory, with an emphasis on problem-solving. Topics covered include Mendelian genetics, molecular genetics, and evolutionary genetics. Core course. Pre-requisite: BLY 121 Minimum Grade of C and BLY 122 Minimum Grade of C and CH 131 Minimum Grade of D and BLY 121L Minimum Grade of C and BLY 122L Minimum Grade of C.
BLY 303  Ecology and Evolution  3 cr
Introduction to the fundamental concepts of ecology and evolution, with emphasis on their status as interrelated, central organizing principles of biology. Major topics will include community structure, biotic and abiotic interactions, mechanisms of evolution, adaption, and phylogenetics. Theoretical and practical issues will be addressed. Core course.
Pre-requisite: BLY 121 Minimum Grade of C and BLY 122 Minimum Grade of C and CH 131 Minimum Grade of D.

BLY 304  Exp. Designs in Biology  3 cr
Experimental designs in Biology is intended to provide students with basic skills of experimental design and statistical methodology needed in modern biological research. Additionally, students will learn basic statistical software (e.g., Minitab, Ecosim, Resampling Procedures). The use of statistical software will be fully integrated with lecture material to provide a 'holistic' learning experience. Having completed this course, students will have gained a basic foundation in quantitative procedures for analyzing and interpreting biological data. This course requires each student to have a lap-top computer and a copy of Minitab Student v 14, which is provided with the required text.
Pre-requisite: BLY 121 Minimum Grade of C and BLY 122 Minimum Grade of C and MA 112 Minimum Grade of C.

BLY 310  Economic Botany  3 cr
This course includes the study of plants in their form and structure by connecting them to their use by humans. Topics include plant anatomy and nomenclature; history of plant use; origins of economically important plants; use of flowers, fruits, stems and leaves for food and other purposes.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 314  Molecular Microbiology - W  4 cr
Study of procaryotic and eucaryotic microorganisms and their relationship to their environment. Molecular, genetic and biochemical aspects of each will be emphasized.
Pre-requisite: EH 102 Minimum Grade of C and CH 131 Minimum Grade of C and BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 321  Genetics of Development  3 cr
An in-depth laboratory experience to determine the genetic regulation involved in organ development using the C. elegans model system. The research experience gained in this laboratory class is designed to generate novel results to ultimately be shared with the larger scientific community. Emphasis will be place on mastering experimental design and data analysis. Students will work together in laboratory groups to carry out experiments, to discuss progress and conclusions, and review the primary literature relating to the project.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 332  Biology of Algae  4 cr
A survey of non-vascular plants: algae, fungi, liverworts, and mosses, with emphasis on morphology and taxonomy.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 333  Biomedical Ethics - W  3 cr
Ethical analyses of problems and issues in the biomedical and health-related fields. Topics may include genetic research and technology, abortion, health care, experimentation, and death and dying.
Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C.

BLY 342  Experimental Cell Biology-W  2 cr
Laboratory experience with instrumentation and techniques utilized in modern cell biology research including organellar isolation, enzyme assay, protein analysis, and microscope techniques. Students develop and conduct group projects.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 350  Human Physiology  3 cr
The function and regulation of the organ systems of the body and physiological integration of the systems to maintain homeostasis. Course content will include neural and hormonal homeostatic control mechanisms, and study of the musculoskeletal, circulatory, respiratory, digestive, urinary, immune, reproductive, and endocrine systems.
Pre-requisite: (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C or CH 115 Minimum Grade of C or CH 131 Minimum Grade of C and CH 131L Minimum Grade of C and (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and BLY 121L Minimum Grade of C and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and BLY 122L Minimum Grade of C.

BLY 352  Biol Terrestrial Vets - W  4 cr
Evolution, characteristics, classification, life history, ecology, and behavior of amphibians, reptiles, birds, and mammals. Laboratory and field work emphasize local species.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 354  General Entomology  4 cr
Classification and habits of insects, including collection, preservation, and identification of those occurring in south Alabama.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.
BLY 360  Invertebrate Zoology  4 cr
Detailed study of the invertebrate phyla, taxonomy, ecology and phylogenetic relationship. Terrestrial, fresh-water, and marine forms are studied.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 363  Vertebrate Embryology  4 cr
Avian and amphibian histogenesis and organogenesis from fertilization to time of histological maturity.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 367  Marine Biology  4 cr
A general survey of marine plants, invertebrates and vertebrates, the communities they form and the physical and chemical factors that influence them. Field trips include marsh, seagrass, and dune habitats. Sampling from research vessels and laboratory exercises will serve to introduce students to the diversity of marine habitats and organisms. Organisms will be identified using dichotomous keys. Participation in overnight field trips is a part of this course. Snorkeling gear is required.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C) and (CH 115 Minimum Grade of D or CH 131 Minimum Grade of D) and (CH 116 Minimum Grade of D or CH 132 Minimum Grade of D).

BLY 368  Dolphins and Whales  2 cr
Classification, anatomy, and ecology of cetaceans and manatees. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 369  Blgy/Conserv Marine Turtles  2 cr
Introductory course providing an overview of the biology and conservation of marine turtles. The course will culminate with a multi-day field trip to sea turtle nesting beaches and foraging grounds in the southeastern U.S. Class also will visit sea turtle research and rehabilitation facilities.
Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Special fees apply and will be posted on the website: www.disl.org
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 370  Marine Aquaculture  2 cr
Techniques and issues involved with the commercial culture of marine organisms including nutrition, reproductive biology, production, water quality, processing, marketing, and economics. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 371  Shark and Ray Biology  2 cr
This course will provide an introduction to the biology of sharks and rays, with special emphasis on regional shark fauna and field techniques. Lectures will be supplemented with discussions of papers from the primary literature to familiarize students with current research; in addition, longline and gillnet sampling will provide students with first hand knowledge of field techniques and local shark identification. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) or (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).
BLY 372  Coastal Birds of Alabama  2 cr
An introductory-level, field-based course covering identification, population dynamics and behavior of coastal avian fauna. Field trips will be taken to local coastal ecosystems and island rookeries. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 411  Developmental Biology  3 cr
A study of the principles that regulate the development of a complex, multicellular from a single cell with a focus on the underlying molecular mechanism and genetic regulation. Topics to be covered will include fertilization, differentiation, cell fate determination, pattern formation, organogenesis and regeneration. Particular emphasis will be placed on the experimental approaches, both historical and contemporary, that led to our current understanding of the development of multicellular organisms.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 414  Expt Bacterial Genomics - W  4 cr
An integrated lab-lecture course utilizing real-world research experiences to explore the molecular genetics and genomics of bacteria. Students will be directly involved in the design, execution, analysis, and presentation of research projects determining the function of genes from completed microbial genomes. A basic foundation in microbiology and genetics is required for this course.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C and BLY 314 Minimum Grade of C and EH 101 Minimum Grade of C and EH 102 Minimum Grade of C.

BLY 425  Chemical Ecology - W  3 cr
This class focuses on chemically mediated interactions between, among, and within organisms in both the aquatic and terrestrial environments. The topics covered include: chemoreception, chemical defense, chemical attraction, and the impact of chemical ecology on humans. This course includes a writing component. Students will gain experience in critical analysis, research development, grant writing, and computer-based presentation.
Pre-requisite: (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 426  Freshwater Ecology  3 cr
This course examines four aspects of freshwater ecology; physical and chemical properties of water, biotic communities, links among freshwater systems, and human influence on freshwater ecosystems. Students will be required to submit a collection of local freshwater invertebrates.
Pre-requisite: (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 430  Marine Botany  4 cr
A general survey of marine algae and vascular and non-vascular plants associated with the marine environment. Distribution, identification, structure, ecology, and reproduction will be considered. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Pre-requisite: (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 431  Plant Physiology - W  4 cr
An integrative study of higher plant functions. This course includes a study of water relations, plant biochemistry, plant development, and plant-environmental interactions.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C and CH 132 Minimum Grade of D.

BLY 432  Morphology Vascular Plants  4 cr
Morphological features and possible relationships of psilophytes, club mosses, horsetails, ferns, and seed plants. Illustrated whenever feasible with local plants.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 433  Evolution of Vascular Plants  4 cr
A survey of the systematics, taxonomy, and structure of the major groups of vascular plants. Fossil plants (paleobotany) will also be covered where relevant. Many labs are outdoors and focus on plant structure and identification utilizing the rich local flora.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.
BLY 434  Plant Physiological Ecology  3 cr
Plant Physiological Ecology is an investigation into the relatively "new" scientific field of physiological ecology (i.e., the study of how plants function in their environment) and is designed to meet the needs of students majoring in biology, ecology and/or various disciplines in plant biology. This course explores plant biology, plant-animal interactions, as well as, principles of ecology and evolution. Category B.
Pre-requisite: BLY 121 Minimum Grade of C and BLY 122 Minimum Grade of C and BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C and BLY 431 Minimum Grade of C.

BLY 435  Biology of Fungi  4 cr
Identification and morphology of fungi with some emphasis on their relation to human affairs. Collection required.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 436  Animal Physiology - W  4 cr
This class will take a comparative approach to animal physiology. Comparisons of structural and functional relationships in the body systems of invertebrates and vertebrates, including humans, will be made. A basic foundation in chemistry and cell biology is required for this course. This course incorporates writing and computer components. Students will gain experience in critical analysis, research development and analysis, word processing, computer based statistical and graphical analysis, and in computer based presentation programs. Fee.
Pre-requisite: (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 440  Biochemistry I  3 cr
Study of the fundamental biochemical concepts; emphasis is placed on protein, carbohydrate, and lipid structure as related to their functional behavior; enzymes kinetics and mechanisms of action; thermodynamic relationships in biochemical systems. Offered only in Fall term. Cross-listed with CH 440.
Pre-requisite: CH 202 Minimum Grade of D and BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 441  Biochemistry II  3 cr
Study of the reaction and regulations of intermediary metabolism; the biochemistry of genetics systems to include regulatory mechanisms and protein synthesis. Offered only in Spring term. Cross-listed with CH 441.
Pre-requisite: BLY 440 Minimum Grade of D or CH 440 Minimum Grade of D.

BLY 443  Lab Studies Biochemistry  2 cr
Course familiarizes the student with basic laboratory techniques commonly employed in biochemical research. Offered only in Spring term. Cross-listed with CH 443. Fee. Pre-requisite: (BLY 440 Minimum Grade of D or CH 440 Minimum Grade of D) and (BLY 441 Minimum Grade of D or CH 441 Minimum Grade of D). BLY 441 and CH 441 can be taken concurrently with this course.

BLY 445  Computational Genetics-W  3 cr
An ever growing body of online genetic datasets and publicly available software makes basic informatic analysis of genetic systems no longer restricted to programmers. Utilizing the principle online resources employed by researchers today, this course will provide advanced undergraduates with a solid foundation in computational biology as well as the competency to independently evaluate emerging resources in the future. Students enrolled in this course will gain real world experience in the application of informatic techniques through participating in an actual collaborative research analysis and through directly contributing to a peer-reviewed manuscript reporting their results. Requires permission of instructor.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 450  Animal Behavior  4 cr
Course examines animal behavior from a biological and empirical viewpoint, with an emphasis on behavioral adaptations of animals to their environment. Orientation, migration, rhythms, communication, territoriality, social and courtship behaviors will be considered within the context of ecology and evolution.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 451  Marine Vertebrate Zoology  4 cr
A study of marine vertebrates, with emphasis on fishes; their systematics, zoogeography, and ecology. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Pre-requisite: (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 452  Marine Mammals  4 cr
This is a marine field course designed to engage students in the collection, identification, and preservation of parasites of marine vertebrates and invertebrates. Each student will be required to submit a collection of parasites taken from beach, barrier island, estuarine, and pelagic (10-200km) offshore localities.
Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.
BLY 455 Ornithology  4 cr
Principles of classification, structure, distribution, migration, natural history and adaptations of birds within an ecological context. Field & laboratory identification of birds by habitat, size, form, color, and sound. Some field activities may occur at times other than regularly scheduled laboratory hours. Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C and BLY 121 Minimum Grade of C and BLY 121L Minimum Grade of C and BLY 122 Minimum Grade of C and BLY 122L Minimum Grade of C.

BLY 459 General Parasitology  4 cr
Ecology and evolution of parasites and a survey of all major parasitic groups. Pre-requisite: (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 466 Introduction to Neurobiology  3 cr
Neuroanatomy and neurophysiology of marine invertebrates and vertebrates. Topics include resting and action potentials, synaptic transmission, neurotransmitters, sensory transduction, muscle innervation, sensorimotor transformations, and the neurophysiological basis of behavior. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term. Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 470 Herpetology  4 cr
A field course that emphasizes the ecology, evolution, natural history, characteristics, structure, function, geographic distribution, behavior, and systematics of amphibians and reptiles. Course includes structured writing assignments and focuses on good writing skills and forms. Laboratory and field work emphasize identification of specimens by name, habitat, and characteristics. Some field activities will occur at times other than the scheduled laboratory hours. Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 471 Marine Invertebrate Zoology  4 cr
A study of the natural history, systematics, and morphology of marine invertebrates. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term. Pre-requisite: (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 472 Marine Behavioral Ecology  4 cr
The ecological and evolutionary significance of animal behaviors in the marine environment. Exercises will include analysis of data collected from laboratory and field experiments. Statistics recommended. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term. Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 474 Intro to Oceanography  4 cr
A general introduction to the oceans, with emphasis on chemical, physical, and geological processes and their relation to biological systems. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term. Pre-requisite: (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 475 Marine Ecology  4 cr
The relationship of marine organisms to their environment. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term. Pre-requisite: (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).
BLY 478 Coastal Wetlands Ecology 4 cr
This course will focus on near shore wetland areas and emphasize biogeochemical processes, productivty, biodiversity and ecosystem function, as well as address the issues that threaten and protect these valuable resources. Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 483 Field Marine Science 1 TO 4 cr
Course consists of a 10-day field exercise in the tropical southeastern Gulf of Mexico (Florida Keys) and the temperate north Atlantic. Sites alternate annually. Faculty members with diverse interest accompany the students, participate in pre-trip readings and discussion sessions and evaluate the product developed by each student. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term. Requires Senior or Graduate standing in a major related to Marine Sciences and permission of instructor. Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 484 Conservation Biology 3 cr
The study of preserving biodiversity and sustaining ecosystems using a multidisciplinary approach. Primary emphasis will focus on the development of strategies for preservation and management using scientific principles and theory. Pre-requisite: (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 485 Evolutionary Biology 3 cr
The study of mechanisms and historical patterns of evolutionary change in biological systems ranging from genes to phylogeny. Pre-requisite: (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

BLY 490 Special Topics 1 TO 4 cr
Small interested groups of students will study specialized topics not generally listed in the course offerings. Faculty and visiting professors will offer courses in their areas of specialization. This course may be taken more than once if the topic changes for a total of eight hours. Requires permission of the department. Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 494 Directed Studies 1 TO 4 cr
Course is designed to enable the capable student to pursue independent research under the direction of a member of the faculty. Six hours of credit can be used to satisfy the 37 credit hours for the Biology major. Requires permission of the department chair. Pre-requisite: BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C.

BLY 499 Honors Research in Biology-H 1 TO 6 cr
Experience in planning, conducting, and reporting a research project under the direction of the faculty. Requires overall GPA 3.0, Biology GPA 3.5, and permission of the faculty. Fee. Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (CH 115 Minimum Grade of D or CH 131 Minimum Grade of D) and (CH 116 Minimum Grade of D or CH 132 Minimum Grade of D).

BLY 510 Prof in Science 3 cr
The overall goal for this course to convey expectations and important "survival skills" required to succeed in the competitive world of science. Emphasis is placed on grant writing, publications, tenure and promotion, collegiality, productivity creativity, building a CV, alternative paths, and achieving balance between the professional and private life.

BLY 511 Developmental Biology 3 cr
A study of the principles that regulate the development of a complex, multicellular organism from a single cell with a focus on the underlying molecular mechanism and genetic regulation. Topics to be covered will include fertilization, differentiation, cell fate determination, pattern formation, organogenesis, and regeneration. Particular emphasis will be placed on the experimental approaches, both historical and contemporary, that led to our current understanding of the development of multicellular organisms. Pre-requisite: (BLY 302 Minimum Grade of D or BLY 311 Minimum Grade of D) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and BLY 363 Minimum Grade of D.

BLY 514 Expt Bact Genomics 4 cr
An integrated lab-lecture course utilizing real-world research experience to explore the molecular genetics and genomics of bacteria. Students will be directly involved in the design, execution, analysis, and presentation of group research projects determining the function of genes from completed microbial genomes. A basic foundation in microbiology and genetics is required for this course.

BLY 515 Ecotoxicology 4 cr
The impact of chemicals as toxic agents on ecosystems. Students will understand types, sources, and effects of environmental toxicants, methods of testing and interpretation, and regulation of environmental toxicants. This material will be presented in the context of ecosystem health rather than human health. This is a core course for MS degree students in the Environmental Toxicology program. Pre-requisite: (BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C) and (CH 201 Minimum Grade of C and CH 202 Minimum Grade of C) and (CH 540 Minimum Grade of B and CH 541 Minimum Grade of B).
BLY 520  Biometry  4 cr
The application of statistical methodology, both univariate and multivariate techniques, to the solution of biological problems. This course is not designed as a substitute for instruction in statistics, but rather to complement previous course work. The laboratory will involve the use of PC computers to perform procedures on biological data and subsequent interpretation of the results. Prerequisites can be waived at the discretion of the instructor.
Pre-requisite: (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (ST 175 Minimum Grade of D or ST 210 Minimum Grade of D or ST 540 Minimum Grade of C).

BLY 525  Chemical Ecology  3 cr
Chemical Ecology focuses on chemically mediated interactions within organisms in both aquatic and terrestrial environments. The topics covered include: chemoreception, chemical defense, chemical attraction, and the impact of chemical ecology on humans. Students will gain experience in critical analysis, research development, grant writing, and computer-based presentation. Requires permission of instructor.
Pre-requisite: (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C) and (CH 201 Minimum Grade of C or CH 222 Minimum Grade of C).

BLY 526  Freshwater Ecology  3 cr
Course examines four aspects of freshwater ecology: physical and chemical properties of water, biotic communities, links among freshwater systems, and human influences on freshwater ecosystems. Students will be required to submit a collection of local freshwater invertebrates. Prerequisite: Ecology (equivalent to BLY 303). This prerequisite may be waived at the discretion of the instructor. Dual listed with BLY 426.
Pre-requisite: BLY 303 Minimum Grade of C.

BLY 530  Marine Microbial Ecology  3 cr
A general survey of the types of microorganisms found in the marine environment. Emphasis will be on the interaction of microorganisms with each other and with their environment. In particular, the role of microorganisms in the carbon cycling and biogeochemical processes will be stressed. Readings from current literature will expose students to the latest techniques and research.

BLY 533  Topics in Parasitology  3 cr
Theoretical aspects of parasite ecology, evolution, and physiology, with emphasis on current literature.

BLY 534  Plant Physiological Ecology  3 cr
This course is an investigation into how plants function in their environment and is designed to meet the needs of students majoring in biology, ecology and/or various disciplines in plant biology. This course explores plant biology, plant-animal interactions, as well as, principles of ecology and evolution.
Pre-requisite: BLY 121 Minimum Grade of C and BLY 122 Minimum Grade of C and BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C and BLY 303 Minimum Grade of C and BLY 431 Minimum Grade of C.

BLY 535  Biology of Fungi  4 cr
Identification and morphology of fungi with some emphasis on their relation to human affairs. Collection required. Credit for both BLY 535 and 435 is not allowed.

BLY 536  Advanced Animal Physiology  3 cr
This class explores animal physiology, aiming to understand how animals work, from individual cells to whole organisms. We will take a comparative approach to understand the fundamental ways in which animals deal with the common challenges. A basic foundation in chemistry, molecular biology, cell biology, and evolutionary biology is required for this course. Students will complete a capstone independent literature review on a topic of their choice in the field of animal physiology.

BLY 540  Biochemistry I  3 cr
Study of the fundamental biochemical concepts; emphasis is placed on protein, carbohydrate, and lipid structure as related to their functional behavior; enzymes kinetics and mechanisms of action; thermodynamic relationships in biochemical systems. Offered only in Fall term. Cross-listed with CH 540.
Pre-requisite: (CH 201 Minimum Grade of D or CH 222 Minimum Grade of D) and (CH 202 Minimum Grade of D or CH 223 Minimum Grade of D).

BLY 541  Biochemistry II  3 cr
Study of the reaction and regulations of intermediary metabolism; the biochemistry of genetics systems to include regulatory mechanisms and protein synthesis. Offered only in Spring term. Cross-listed with CH 541.
Pre-requisite: BLY 540 Minimum Grade of B. BLY 540 can be taken concurrently with this course.

BLY 543  Lab Studies Biochemistry  2 cr
Course familiarizes the student with basic laboratory techniques commonly employed in biochemical research. Offered only in Spring term. Cross-listed with CH 543. Fee.
Pre-requisite: BLY 440 Minimum Grade of D or BLY 441 Minimum Grade of D or BLY 540 Minimum Grade of B or BLY 541 Minimum Grade of B.
BLY 544 Molecular Biology 3 cr
BLY 544 is a graduate course that covers the basic mechanisms by which organisms utilize, maintain and duplicate their genetic information. Topics to be covered include: organization of genes, the mechanisms and regulation of transcription, RNA processing and translation, the packaging of DNA as chromatin and its impact on gene expression, DNA replication, recombination and repair, and genomics and proteomics.

BLY 545 Bioinformatics of Genetics 1 cr
The sequencing of whole genomes and the analysis of genetic information continues fundamentally change biological and medical research. Recent advances in high-throughput sequencing have generated massive amounts of largely untapped genetic information. Utilizing the principal online resources employed by researchers today, this course will provide graduate students with a solid bioinformatic foundation to analyze current sequencing data sets, as well as the competency to independently evaluate emerging computational resources in the future.
Pre-requisite: BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C.

BLY 550 Animal Behavior 4 cr
This course will examine animal behavior from a biological and empirical viewpoint, with an emphasis on behavioral adaptations of animals to their environment. Orientation, migration, rhythms, communication, territoriality, social and courtship behaviors will be considered within the context of ecology and evolution. Credit for both BLY 450 and BLY 550 is not allowed.

BLY 551 Marine Vertebrate Zoology 4 cr
A study of marine vertebrates with emphasis on fishes; their systematics, zoogeography, and ecology. Students will have an opportunity to assemble a collection of vertebrate species. Course offered only through Marine Environmental Sciences Consortium. Credit for both BLY 551 and BLY 451 is not allowed.

BLY 554 Advanced Entomology 4 cr
Course emphasizes form, function, classification, behavior, taxonomy and evolution of insects. In addition, the student is required to make an insect collection of adult and immature insects.

BLY 566 Introduction to Neurobiology 4 cr
Neuroanatomy and neurophysiology of marine invertebrates and vertebrates. Topics include resting and action potentials, synaptic transmission, neurotransmitters, sensory transduction, muscle innervation, sensorimotor transformations, and the neurophysiological basis of behavior. Credit for BLY 566 and 466 is not allowed.
Pre-requisite: ( BLY 121 Minimum Grade of C and BLY 121L Minimum Grade of C) or BLY 141 Minimum Grade of C) and ( BLY 122 Minimum Grade of C and (BLY 122L Minimum Grade of C) or BLY 142 Minimum Grade of C).

BLY 570 Herpetology 4 cr
A field course that emphasizes the ecology, evolution, natural history, characteristics, structure, function, geographic distribution, behavior, and systematics of amphibians and reptiles. Course includes structured writing assignments and focuses on good writing skills and forms. Laboratory and field work emphasize identification of specimens by name, habitat, and characteristics. Some field activities will occur at times other than the scheduled laboratory hours. Oral classroom presentations required. Credit for BLY 470 and BLY 570 is not allowed.

BLY 571 Marine Invertebrate Zoology 4 cr
A study of the natural history, systematics and morphology of marine invertebrates. Credit for both BLY 571 and BLY 471 is not allowed.

BLY 572 Marine Behavioral Ecology 4 cr
The ecological and evolutionary significance of animal behaviors in the marine environment. Exercises will include analysis of data collected from laboratory and field experiments. Statistics recommended. Credit for BLY 572 and BLY 472 is not allowed.
Pre-requisite: (BLY 122 Minimum Grade of C and BLY 122L Minimum Grade of C) or BLY 142 Minimum Grade of C.

BLY 573 Oceanol Gulf of Mexico 3 cr
A descriptive study of the oceanology of the Gulf of Mexico, and adjacent waters, including coastal zone, continental shelf, and deep ocean.

BLY 575 Marine Ecology 4 cr
Their relationship of marine organisms to their environment. Credit for both BLY 575 and BLY 475 is not allowed.

BLY 583 Field Marine Science I 1 TO 4 cr
The Field Marine Science course will consist of an 8 - 12 day field exercise in representative coastal sites. The field exercise is conducted in the term break prior to the term of registration for the course. Faculty members with diverse interests will accompany the students, participate in pre-trip discussions and evaluate the product developed by each student. The course is designed to familiarize students with habitats and research conditions different from those they experience on the Northern Gulf Coast. Field trip locations are selected on the basis of faculty and student interest, economics, and availability of logistical support. Students pay their room and board costs for the field exercise. The course is primarily for graduate students, but advanced undergraduates may enroll with consent of instructor. Both BLY 483/583 and 488/588 may be taken for credit when each is taught in a different environment.

BLY 585 Evolutionary Biology 3 cr
The study of mechanisms and historical patterns of evolutionary change in biological systems ranging from genes to phylogeny.
BLY 589  Marine Plankton  3 cr
The course familiarizes the student with the taxonomic breadth of phytoplankton, bacterioplankton and zooplankton in estuaries, coastal seas and open oceans. Though the focus is on taxonomic familiarization, basic biology of all major taxa, represented in the plankton will be covered. Students will learn fundamental, as well as "cutting-edge", field, lab, and statistical techniques.

BLY 590  Special Topics -  1 TO 4 cr
Small, interested groups of students will study specialized topics not generally listed in the course offerings. Faculty and visiting professors will offer courses in their areas of specialization. This course may be taken more than once if the topic changes for a total of eight hours. Requires permission of the department.

BLY 592  Seminar  1 cr
Recent research in areas of special academic interest to students and faculty.

BLY 594  Directed Studies -  1 TO 4 cr
Independent research under the direction of a member of the graduate faculty. A maximum of six credits may be used to meet degree requirements. Permission of instructor required.

BLY 599  Thesis  1 TO 4 cr
Requires approval of research prospectus by student’s graduate committee.

Biomedical Engineering (BME) (BMD)

BME 467  Intro to Biomedical Eng  3 cr
Survey of topics and current issues in the field of biomedical engineering. Topics include biomechanics, biomedical instrumentation, biomaterials engineering, biomedical imaging, cellular mechanics, tissue engineering, biomedical design and ethics. A portion of the course is devoted to basic biology concepts and principles. Students will review literature and discuss technical and technological developments relevant to biomedical engineering. Pre-requisite: ME 328 Minimum Grade of C. ME 328 can be taken concurrently with this course.

BME 567  Principles of Biomedical Eng  3 cr
Survey of topics and current issues in the field of biomedical engineering. Topics may include biomechanics, biomedical instrumentation, biomaterials engineering, biomedical imaging, cellular mechanics, tissue engineering, biomedical design and ethics. A portion of the course is devoted to basic biology concepts and principles. Students will review literature and discuss technical and technological developments relevant to biomedical engineering. Pre-requisite: MA 507 Minimum Grade of C. MA 507 can be taken concurrently with this course.

Biomedical Sciences (BMD) (BMD)

BMD 210L  Microbiology in Healthcare Lab  1 cr
Laboratory experience includes introduction to fundamental microbial techniques, including differential staining, biochemical identification techniques, and antimicrobial susceptibility testing. Patient case studies will be used to supplement learning experience. Pre-requisite: (BLY 101 Minimum Grade of C or BLY 121 Minimum Grade of C or CH 101 Minimum Grade of C or CH 131 Minimum Grade of C).

BMD 212L  Intro to Food Science Lab  1 cr
Laboratory experience includes an introduction to digestion, absorption, transportation, and utilization of nutrients. Lab exercises are completed in which students prepare foods and observe the chemical and physical properties that affect the product. Co-requisite: BMD 212

BMD 110  Introduction to A & P I  4 cr
An introduction to the structure and function of the human body with an emphasis on anatomy. This course surveys anatomical terminology, basic chemistry, cell structure/function, tissues, skin skeleton, joints, muscles, and central nervous system. Pre-requisite: BMD 110 Minimum Grade of C.

BMD 111  Introduction to A & P II  4 cr
Continuation of BMD 110. Topics include, peripheral/autonomic nervous system, endocrinology, cardiovascular system, blood, respiration, digestion, metabolism/nutrition, urinary system, and reproduction. Pre-requisite: BMD 110 Minimum Grade of C.

BMD 200  Career Planning  1 cr
Clinical Observations (Medicine, Dentistry, Optometry and Veterinary Medicine). This course gives the student clinical exposure to various health-care services. It is designed to help students make informed decisions when selecting a career in the health professions. A written report on the clinical experience or scenario dealing with "medical ethics" is required. May be repeated for a maximum of six hours' credit. Permission of the Director of Health Pre-Professional Program is required. Pre-requisite: CH 131 Minimum Grade of D and BLY 121 Minimum Grade of D.

BMD 201  Seminars in Biomedical Science  1 cr
This course introduces students to contemporary biomedical research and career possibilities in the biomedical sciences. Students will use the resources of the Biomedical Library to perform a literature search.
BMD 210  Microbiology in Healthcare  3 cr
This course introduces concepts of human host-infectious microbe interactions that result in disease. Microorganisms examined include viruses, parasites, fungi, mycobacteria, and bacteria. Included topics are genetics, taxonomy, microbial metabolism, virulence factors, host defense/microbe evasion mechanisms, epidemiology, antimicrobial chemotherapy/resistance, merging/reemerging infectious diseases, and diagnostic criteria. Emphasis will be placed on the microbial infections of different body systems.
Pre-requisite: BLY 101 Minimum Grade of C or BLY 121 Minimum Grade of C or CH 101 Minimum Grade of C or CH 131 Minimum Grade of C.

BMD 212  Introduction to Food Science  3 cr
This course is an introduction to digestion, absorption, transportation, and utilization of nutrients. It will discuss the integration of basic chemical, physical, microbiological and nutritional properties and components of food and their relationship to a healthy lifestyle. Lab exercises are completed in which students prepare foods and observe the chemical and physical properties that affect the product.

BMD 251  Human Anatomy & Physiology I  4 cr
This is the first of a two-course sequence that covers basic human anatomy and physiology, including the study of the structure and function of various body systems. Included is a study of basic principles of organism homeostasis, biochemical makeup, a study of cells and tissue, cellular metabolism, joints, the integumentary, and skeletal systems, muscular and nervous systems, and the senses. Laboratory experiences are provided through demonstration and interactive (virtual) laboratories.
Pre-requisite: BLY 101 Minimum Grade of C or BLY 121 Minimum Grade of C or CH 100 Minimum Grade of C or CH 131 Minimum Grade of C.

BMD 252  Human Anatomy & Physiology II  4 cr
A continuation of BMD 251. Topics include nervous, cardiovascular, lymphatic, immune, respiratory, digestive, and urinary systems. Additional topics may include blood, metabolism, immunology and reproduction. Laboratory experience is provided through demonstration and interactive (virtual) laboratories.
Pre-requisite: BMD 251 Minimum Grade of C.

BMD 290  Sp Top - H -  1 TO 3 cr
Topics of current health interest.

BMD 311  Human Anatomy  3 cr
A course in human gross and microscopic anatomy in a systematic approach, with an emphasis on structure-function relationships at the cell, tissue and organ level. The topics include anatomy of integumentary, musculoskeletal, nervous, cardio-vascular, lymphatic, respiratory, digestive, urinary and reproductive systems. This course is lecture-based with no lab component.
Pre-requisite: BLY 121 Minimum Grade of D.

BMD 321  Biochemistry I-Molecular Biol  3 cr
The course covers different aspects of molecular biology including protein structure and function, carbohydrate, lipids, DNA replication, transcription and translation and applications to medical problems (i.e., forensic medicine, diagnosis of genetic diseases, etc).
Pre-requisite: CH 201 Minimum Grade of D.

BMD 322  Biochemistry II-Metabolism  3 cr
The course discusses the chemical basis of metabolism including the conversion of nutrients from digestion to either molecules of biological relevance or to energy. Genetic diseases affecting these pathways are described and discussed.
Pre-requisite: (BMD 321 Minimum Grade of C or BLY 440 Minimum Grade of C or CH 440 Minimum Grade of C) and CH 201 Minimum Grade of D.

BMD 323  Biochemistry Laboratory  2 cr
This laboratory is designed to provide hands-on experience on several biochemical techniques including cell fractionation, chromatography, DNA isolation, electrophoresis, determination of enzyme activity, etc.
Co-requisite: BMD 322
Pre-requisite: BMD 321 Minimum Grade of C.

BMD 334  Human Physiology I  3 cr
The objectives of this course are to study human physiology with emphasis on cellular physiology (cell structure, metabolism, and transport) and the endocrine and nervous systems and skeletal muscle. This course is the first of a 2 course sequence.
Pre-requisite: BLY 121 Minimum Grade of C and CH 131 Minimum Grade of C and CH 132 Minimum Grade of C.

BMD 335  Human Physiology II  3 cr
Study of human physiology with emphasis on the basic principles of organ system physiology. The course emphasizes muscle, cardiovascular, renal, respiratory, digestive, and reproductive physiology and an introduction to immunology. This is the second course in a 2 course sequence.
Pre-requisite: BMD 334 Minimum Grade of C.

BMD 336  Physiology Lab - W  2 cr
This laboratory is designed to provide students with hands-on laboratory experience in physiology, with emphasis on the musculoskeletal, cardiovascular, respiratory and nervous systems. Limited to BMD majors unless by special permission. Special fee.
Co-requisite: BMD 335
Pre-requisite: (BMD 334 Minimum Grade of C and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) ).
BMD 350  Human Genetics and Genomics  3 cr
The course is designed to introduce students to the fundamental concepts of molecular genetics and genomics. The concepts that will be covered in this course include nucleic acid structure and function, mechanisms of replication, transcription, translation, gene expression and regulation. In addition, the course aims to familiarize students with modes of analysis used in comparative genomic research.
Pre-requisite: BMD 321 or BLY 301 or BLY 440.

BMD 351  Global Health  3 cr
This course introduces students to the basic principles of global public health that are used to improve population health at all levels. Students will get an overview of the determinants of health and how health status is measured. Students will also review the burden of disease, who is most affected by different disease burdens, risk factors, and key measures to address the burden of disease in cost-effective, doable, sustainable, and fair ways. Special attention will be paid throughout the course to health systems issues. The course will cover key concepts and frameworks but be practical in orientation. The course will be global in coverage but with a focus on low- and middle-income countries, the health of the poor and health disparities. Particular attention will be paid throughout the course to the linkages between health and development.

BMD 390  Sp Top -  1 TO 3 cr
Topics of current health interest.

BMD 401  Immunology  3 cr
This course presents the basic concepts of immunochemistry, immunobiology and host immune responses to disease. Antigens, antibodies, cells and structures of the immune system will be discussed as well as their roles in the processes of immunity, allergies, transplantation, and diseases.
Pre-requisite: BMD 321 Minimum Grade of C. BMD 321 can be taken concurrently with this course.

BMD 402  Medical Microbiology  4 cr
This course presents the concepts of pathogenicity and virulence as they relate to disease causing bacteria, mycobacteria, fungi, protozoans, and viruses. Mechanisms of pathogenicity, host interactions, epidemiology and diagnosis will be emphasized. General concepts of microbial physiology, taxonomy, genetics, host immune response, and antimicrobial therapy are also presented. The laboratory portion of the course will provide hands-on experience in the handling and identification of each microbe class. Special fee.
Pre-requisite: (BMD 321 Minimum Grade of C or BLY 440 Minimum Grade of C or CH 440 Minimum Grade of C). BMD 321 can be taken concurrently with this course.

BMD 403  Molecular Basis of Cancer  3 cr
This course will focus on the biological and molecular features of oncogenesis and clinical cancer, with specific attention given to the molecular events underlying carcinogenesis, metastasis, and angiogenesis. Recent therapeutic advances and their implications for the field will be explored through reading of current scientific literature. Case study learning is integrated into the course to help students understand the societal implications of cancer.
Pre-requisite: BMD 321 Minimum Grade of C or BLY 301 Minimum Grade of C or BLY 302 Minimum Grade of C.

BMD 410  Pathophysiology  3 cr
A systematic study of disease processes involving relationships between pathophysiological changes and clinical manifestations.
Pre-requisite: BMD 321 Minimum Grade of C.

BMD 420  Pharmacology  3 cr
An introduction to pharmacological concepts and effects and uses of major drug classes. Drug design, pharmacodynamics (receptors, mechanisms, dose-response) and pharmacokinetics (time action) are discussed in general (principles), and in particular, for selected classes of drugs.
Pre-requisite: (BMD 321 Minimum Grade of C or BLY 440 Minimum Grade of C or CH 440 Minimum Grade of C).

BMD 430  Neurosciences  4 cr
A study of neuroscience which integrates neurochemistry, neuroanatomy, and neurophysiology, emphasizing cellular neurobiology, neural systems, and the neurobiology of behavior. Course includes laboratory experience.
Pre-requisite: BMD 311 Minimum Grade of C and BMD 334 Minimum Grade of C.

BMD 450  Introduction to Research  2 cr
Fundamental principles of research will be presented and applied. Students will examine and evaluate a selection of contemporary research and learn many of the responsibilities of professional researchers, particularly in academic settings. Oral classroom presentations are required.
Pre-requisite: BMD 311 Minimum Grade of C and BMD 321 Minimum Grade of C and BMD 335 Minimum Grade of C and BMD 334 Minimum Grade of C and BMD 336 Minimum Grade of C.

BMD 490  Special Topics  1 TO 3 cr
Topics of current health interest.

BMD 493  Ethical Issues in Health - W  3 cr
This course will provide an open forum for discussion of current controversial issues in biomedical sciences. The topics will include research integrity, discussions on the impact of medical advances in society as well as issues of historical relevance.
Pre-requisite: BLY 121 Minimum Grade of C and EH 102 Minimum Grade of C.
BMD 494  Directed Research Studies  1 TO 3 cr
The student will perform a biomedical research project under the direction of a faculty mentor. This will include literature searches and presenting the project in a written format. Instructor Permission Required.
Pre-requisite: BMD 321 Minimum Grade of C.

BMD 499  Honors Research Thesis - W - H  1 TO 6 cr
Literature survey and laboratory research experience under the direction of the faculty. Instructor permission required.
Pre-requisite: BMD 311 Minimum Grade of C and BMD 322 Minimum Grade of C and BMD 323 Minimum Grade of C and BMD 335 Minimum Grade of C and BMD 336 Minimum Grade of C.

BMD 501  Immunology  3 cr
This course presents the basic concepts of immunochemistry, immunobiology, and host immune responses to disease, antigens, antibodies, cells and structures of the immune system will be discussed as well as their roles in the process of immunity, allergies, transplantation and diseases. A term paper is required.

BMD 502  Medical Microbiology  5 cr
The course presents the concept of pathogenicity and virulence as they relate to disease causing bacteria, viruses, and fungi. Mechanisms of pathogenicity, interrelationships, and interactions that occur between the host, the parasite and their environments will be emphasized in molecular terms. General concepts of microbial physiology, genetics, and antimicrobial therapy are also presented. The laboratory portion of the course will provide hands-on experience in the handling and identification of bacteria. A term paper is required.

BUS 101  Prof Experience I  1 cr
An introduction to career success tools including: personality and career interest inventories, steps to succeed basic resume preparation, business ethics, personal branding, university and community involvement and other career preparation activities. This course is designed for students in their first and second semester within the MCOB.
Pre-requisite: EH 101 Minimum Grade of C or EH 102 Minimum Grade of C. EH 101 and EH 102 can be taken concurrently with this course.

BUS 150  Intro to Business and Mgt  3 cr
A survey of the field of business, including profit-seeking firms, not-for-profit organizations, and new businesses created by entrepreneurs. Emphasis on the business environment, organization and management, current economic and international issues, and career opportunities. Societal and ethical issues are also examined. Open to University of South Alabama freshmen only.
Pre-requisite: EH 101 Minimum Grade of C or EH 102 Minimum Grade of C. EH 101 and EH 102 can be taken concurrently with this course.

BUS 201  Professional Experience II  1 cr
Continued introduction to Career success tools including: resume building activities, cover letter and references development, career for a day shadowing, speed branding, dress for success, networking, career fair tools for success, university and community involvement and other career preparation activities. Prerequisite: C or better in BUS 101, Sophomore standing.
Pre-requisite: BUS 101 Minimum Grade of C.

BUS 245  Business Analytics I  3 cr
An introduction to data analytics in business that includes analysis to make data driven business decisions. This course utilizes statistical applications in business problems solving using descriptive statistics, probability theory, sampling distributions, methods of estimation, and tests of hypotheses. The course introduces students to basic predictive business modeling, and the communication of analytical results.
Pre-requisite: University test - Math 75 or MyMathTest 080 or ACT Math 23 or MA 112 Minimum Grade of D or MA 113 Minimum Grade of D or MA 115 Minimum Grade of D or MA 120 Minimum Grade of D or MA 121 Minimum Grade of D or MA 125 Minimum Grade of D or MA 126 Minimum Grade of D or MA 131 Minimum Grade of D or MA 132 Minimum Grade of D or MA 171 Minimum Grade of D or MA 287 Minimum Grade of D.
BUS 255  Business Analytics II  3 cr
A second course in quantitative data analytics in business decision making utilizing methods of analysis including statistical inference, predictive, modeling, forecasting, correlation and regression analysis. It further develops fundamental knowledge and skills for making data driven business decisions including the use of computer applications for problem solving. This course relies heavily on project based learning to provide students with experience of solving data based business problems.  
Pre-requisite: (BUS 245 Minimum Grade of C or BMS 245 Minimum Grade of D or BMS 250 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D) and (University test - Math 75 or (MA 112 Minimum Grade of D or MA 171 Minimum Grade of D) or (MA 113 Minimum Grade of D or MA 172 Minimum Grade of D) or (MA 115 Minimum Grade of D or MA 121 Minimum Grade of D) or (MA 120 Minimum Grade of D or MA 287 Minimum Grade of D) or (MA 125 Minimum Grade of D or MA 132 Minimum Grade of D) or (MA 126 Minimum Grade of D or MA 233 Minimum Grade of D)).

BUS 265  Legal Environ of Business I  3 cr
A study of the global legal environment in which contemporary American business functions, including a review of legal thought and ethical considerations and the foundations and impacts of governmental regulation in areas such as labor and employment, environmental concerns, consumer protection, and antitrust. Contemporary issues, domestic and international concepts and institutions, and social forces that shape the legal environment are emphasized. Requires sophomore standing

BUS 301  Professional Experience III  1 cr
Career success tools including: personal professional strategic plan development, mock interviewing, dining etiquette, personal and professional mentoring, job search, application, and acceptance, job search ethics, creating a career plan, university and community involvement and other career preparation activities. Prerequisite: C or better in BUS 201, Junior standing.  
Pre-requisite: BUS 201 Minimum Grade of C.

BUS 302  Professional Preparation  3 cr
Career success tools including personal professional strategic plan development, interviewing, personal and professional mentoring, job search, application, creating a career plan, university and community involvement, and other career preparation activities. Prerequisite: Junior transfer standing. Business students only.

BUS 305  Advanced Business Analytics  3 cr
A course in quantitative data analytics in business decision making utilizing methods of analysis including linear programming, network optimization, binary integer programming, nonlinear optimization, decision analysis, and deep learning. It further develops fundamental knowledge and skills for making data driven business decisions including the use of computer applications for problem solving. This course relies heavily on project based learning to provide students with the experience of solving data based business problems.  
Pre-requisite: BUS 255 Minimum Grade of C and CIS 250 Minimum Grade of D.

BUS 440  Bus in Reg and Emerg Markets-W  3 cr
A comprehensive analysis of the issues in starting and maintaining business in emerging and developing markets, building on data and research skills acquired in foundational international business courses.  
Pre-requisite: MKT 310 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of D) and (ECO 330 Minimum Grade of D or ECO 363 Minimum Grade of D or FIN 332 Minimum Grade of D or MGT 334 Minimum Grade of D or MGT 336 Minimum Grade of D).

BUS 490  Special Topics  3 cr
Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair.

BUS 496  MCOB Honors Sr Project I - H  3 cr
Applied business project and paper prepared under the direction of a project advisor plus two other persons selected by the advisor in consultation with the student. The student must have developed a proposal for the project and paper in consultation with the advisor and received permission from the committee to proceed. In addition, the student must be entering his or her senior year and be a major in the Mitchell College of Business. The project proposal must be formulated no later than the end of the first semester of the student's senior year and the project must be completed by the student's graduation date. The student must have maintained his or her standing in the university honors program to be eligible to enroll in this course in his or her last full semester in school. The course may be counted in one of two ways: 1) as an additional course not counting towards the business degree, or 2) in special cases, as a major or business elective, to be decided by the committee.  
Pre-requisite: (HON 399 Minimum Grade of D or HON 301 Minimum Grade of D) and BUS 305 Minimum Grade of D and (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D) and (MGT 310 Minimum Grade of D or MGT 322 Minimum Grade of D or MGT 422 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D) and (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D).
BUS 497  MCOB Honors Sr Project II - H  3 cr
Applied business project and paper prepared under the direction of a project advisor plus two other persons selected by the advisor in consultation with the student. The student must have developed a proposal for the project and paper in consultation with the advisor and received permission from the committee to proceed. In addition, the student must be entering his or her senior year and be a major in the Mitchell College of Business. The project proposal must be formulated no later than the end of the first semester of the student's senior year and the project must be completed by the student's graduation date. The student must have maintained his or her standing in the university honors program to be eligible to enroll in this course. The student will formally enroll in the course in his or her last full semester in school. The course may be counted in one or two ways: 1) as an additional course not counting towards the business degree, or 2) in special cases, as a major or business elective, to be decided by the committee. Requires completion of the business core with the exception of MGT 485. Pre-requisite: BUS 496 Minimum Grade of C.

BUS 498  Mitchell Scholars Sr Project  3 cr
Applied business project and presentation prepared under the direction of the instructor in consultation with the student. This course will have irregular meetings scheduled by the instructor and will have both a classroom component and a project component. The student must have maintained his/her standing in the Mitchell Scholars program and be a senior to be eligible to enroll in this course. This class will be counted in one of three ways: 1) as a business elective, 2) as an additional course not counting towards the business degree; or 3) in special cases, as a major or business elective, to be decided by the major department's faculty. Requires completion of the business core with the exception of MGT 485 and approval of Associate Dean. Pre-requisite: Mitchell Scholars 10 and BUS 305 Minimum Grade of D and FIN 315 Minimum Grade of D and MGT 300 Minimum Grade of D and MGT 305 Minimum Grade of D and MGT 310 Minimum Grade of D and MGT 325 Minimum Grade of D and MKT 320 Minimum Grade of D.

BUS 555  Study Abroad  3 TO 6 cr
Examines issues in business administration in an international setting at the graduate level. Specific topics selected from the fields of accounting, economics, finance, information systems, management or marketing depending on the instructor's area of expertise. Part or all of the course will be conducted outside the United States. Prerequisite: Permission to enroll in a relevant Mitchell College of Business study abroad program.

BUS 600  Fund of Research  3 cr
This course provides students with the tools and perspective necessary to succeed in the DBA program. Readings are drawn from several sources and provide participants with a better understanding of the way to approach their work.

BUS 602  Applied Stat and Reg  3 cr
This course provides an examination of statistical concepts used for business research. Topics include: fundamentals of probability, sampling, statistical estimation, test of hypotheses, analysis of variance, chi-square analysis and regression analysis. Emphasis is placed on the use of statistical techniques for business research applications.

BUS 604  Multivariate Analysis  3 cr
The course is designed to broaden and enrich a student's knowledge and understanding of statistical methodology as it pertains to the study of multivariate techniques used in behavioral research.

BUS 606  Research Design and Methods  3 cr
This course focuses on the general concepts related to conducting academic research and the various research methods commonly used in business research, including quantitative and qualitative analysis.

BUS 608  Adv Stats & App Res  6 cr
An examination of advanced statistical concepts used for business research. This course is designed to broaden and enrich students' knowledge and understanding of statistical methodology as it pertains to advanced techniques used in behavioral research. In addition, this course provides applied research opportunities to assist in advancing the student's research requirements necessary for degree completion.

BUS 610  Struct Equation Modeling  3 cr
This course provides students with a functional understanding of path analysis theory and procedures of structural equation modeling. Students will learn to specify, estimate, and evaluate models using software packages designed for this purpose.

BUS 699  Res and Teaching Concepts  1 cr
Presentations and discussions related to teaching and research concepts.

Career Planning (CP) (CP)

CP 101  Freshman Sem-Continuing Educ  2 cr
A course for first-time students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. This course provides an introduction to the nature of higher education and a general orientation to the functions and resources of the University. Extensive reading and writing assignments relevant to the student's first year experience are required.

CP 250  Career Planning and Develop  3 cr
Principles, methods, and practice in career planning and development with emphasis on career information, self-analysis, exploration of careers, career opportunities, guidelines for goal achievement.
**CP 450 The Job Campaign 3 cr**
Practical approach to career development designed to help students develop strategies for obtaining suitable employment and making career choices. Emphasis is on the principles, methods, and practice in achieving career goals through the study of careers, preparing resumes, writing letters of application, practicing job interview techniques, and identifying prospective employers.

**CBN 400 Cell Biol & Neuro Externship 4 cr**
To be determined.

**CBN 405 Research Assistantship 1 TO 4 cr**
Teaching assistantships are available in the following areas: head and neck; thorax and abdomen; pelvis and perineum; or extremities.

**CBN 406 Teach Asst-Histology 1 TO 4 cr**
Participants will assist the faculty in teaching histology laboratories either pertaining to tissues (4 weeks) or organ systems (4 weeks, or 8 weeks for both). The student will be mentored by one of the listed faculty who will assume responsibility for the final evaluation of the student.

**CBN 407 Teach Assistantship - Anatomy 1 TO 4 cr**
Teaching assistantships are available in the following areas: head and neck; thorax and abdomen; pelvis and perineum or extremities.

**CBN 517 Dir St - Cell Bio Neuroscience 1 TO 6 cr**
Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project. This course should be taken by students who have completed their laboratory rotations, but have not yet submitted a research proposal.

**CBN 590 Sp Top - 1 TO 3 cr**
This course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussion (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

**CBN 610 Molecular-Cellular Neuroscience 2 cr**
A course which requires students to read and evaluate critically the contemporary literature dealing with the cellular and molecular mechanisms of neural function.

**CBN 614 Gene Expr- Reg- Repair- Ther 2 cr**
This course requires students to read, present, and evaluate critically the modern literature on gene expression and regulation, repair and therapy.

**CBN 616 Cell Biol-Neurosci Resrch Sem 1 cr**
Students and faculty present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

**CHE 190 Special Topics - 1 TO 5 cr**
Topics of current Chemical Engineering interest. Requires permission of department chair. Fee.

**CHE 203 Material & Energy Balances 4 cr**
Application of multicomponent material and energy balances to chemical processes involving phase changes and chemical reactions. Minimum grade of 'C' is required and only 2 attempts are permitted. Fee Pre-requisite: CH 132 Minimum Grade of C and CH 132L Minimum Grade of C and MA 126 Minimum Grade of C and (EH 101 Minimum Grade of C or EH 105 Minimum Grade of C or ACT English 27 or SAT Critical Reading 610 or READING TEST SCORE 33 or University - EH101 Exempt P ).
CHE 290  Special Topics -  1 TO 5 cr  
Topics of current chemical engineering interest. Requires consent of department chair. Fee.

CHE 311  CHE Separations I  3 cr  
Applications of material balances and equilibrium relations to equilibrium stage design. Design of single stages and cascades for absorption, stripping, distillation, liquid-liquid extraction, and bioseparations. Fee.  
Co-requisite: CHE 331  
Pre-requisite: CHE 203 Minimum Grade of C.

CHE 321  Transport Phenomena I  3 cr  
Fundamentals of momentum transfer with applications in fluid flow through pipes and process equipment. Fee.  
Pre-requisite: MA 238 Minimum Grade of C and CHE 203 Minimum Grade of C and PH 201 Minimum Grade of C.

CHE 322  Transport Phenomena II  3 cr  
Fundamentals of conductive, convective, and radiative modes of heat transfer with applications in the design of heat exchangers. Fee.  
Pre-requisite: CHE 321 Minimum Grade of C.

CHE 331  CHE Thermodynamics I  3 cr  
This course introduces the fundamentals of thermophysical property estimation and modeling of non-ideal pure and multicomponent fluid systems, including an introduction to multicomponent vapor/liquid equilibria. Fee.  
Co-requisite: CHE 351  
Pre-requisite: CH 201 Minimum Grade of C and CHE 203 Minimum Grade of C and MA 238 Minimum Grade of C and CH 201L Minimum Grade of C and PH 201 Minimum Grade of C.

CHE 332  CHE Thermodynamics II  3 cr  
This class is an advanced thermodynamics course that uses a molecular level viewpoint to introduce students to applications of thermodynamics principles to complex chemical engineering problems including multicomponent, non-ideal fluid phase equilibria (VLE, VLLE, SLE), and chemical reaction equilibria. The concepts of chemical potential, fugacity, partial molar and excess properties as well as complex activity coefficient models are introduced to solve these problems. Fee.  
Co-requisite: CHE 352  
Pre-requisite: CHE 331 Minimum Grade of C.

CHE 342  Engineering Communication - W  3 cr  
Formal and informal reports, oral presentations, and visual aids. Fee.  
Co-requisite: CHE 352  
Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C.

CHE 351  Modeling Lab  1 cr  
Computational tools and numerical methods for solving chemical engineering problems. Fee.  
Co-requisite: CHE 311, CHE 331

CHE 352  Measurement Lab  1 cr  
Laboratory practices for measurement of reaction and phase change parameters. Statistical tools for assessing experimental data. Fee.  
Co-requisite: CHE 332, CHE 372  
Pre-requisite: CHE 351 Minimum Grade of C.

CHE 372  Chemical Reactor Design  3 cr  
Fundamentals of systems involving chemical reactions, including batch and flow systems. Design of thermal and catalytic systems with single and multiple reactions. Analysis of kinetic data and mechanisms. Fee.  
Co-requisite: CHE 322, CHE 332  
Pre-requisite: CHE 331 Minimum Grade of C.

CHE 390  Special Topics -  1 TO 5 cr  
Topics of current chemical engineering interest. Requires consent of department chair. Fee.

CHE 421  CHE Separations II  3 cr  
Fundamentals of mass transfer. Mass, energy, and momentum transfer analogies. Design of mass transfer equipment. Fee.  
Pre-requisite: CHE 311 Minimum Grade of C and CHE 322 Minimum Grade of C.

CHE 441  Chem Engr Ops Lab I - W  2 cr  
Laboratory Studies of the unit operations of chemical engineering with emphasis on momentum and heat transfer. Fee.  
Pre-requisite: CHE 322 Minimum Grade of C and CHE 342 Minimum Grade of C and CHE 351 Minimum Grade of C and CHE 352 Minimum Grade of C.

CHE 442  Chem Engr Ops Lab II - W  2 cr  
Laboratory studies of the unit operations of chemical engineering with emphasis on stage-wise and differential contactors. Fee.  
Pre-requisite: CHE 441 Minimum Grade of C and CHE 311 Minimum Grade of C and CHE 421 Minimum Grade of C.  
CHE 441 can be taken concurrently with this course.

CHE 451  Process Models  3 cr  
Mathematical modeling, simulation, and dynamics of chemical process systems for design and analysis. Fee.  
Pre-requisite: CHE 322 Minimum Grade of C.

CHE 452  Process Dynamics and Control  3 cr  
Pre-requisite: CHE 372 Minimum Grade of C.

</tbody>
</table>
CHE 590  Special Topics -  3 cr  
Topics of current chemical engineering interest. Requires consent of the department chair or departmental approval. Fee.

CHE 592  Directed Independent Study  1 TO 6 cr  
Directed study, under the guidance of a faculty advisor, of a topic from the field of chemical engineering, not offered in a regularly scheduled course. A written report is required. Requires consent of the department chair and overall minimum GPA of 2.5 for admission or departmental approval. Fee.

CHE 594  Project in Chem Engineering  3 cr  
Approved investigation of original problems under direction of a faculty member. Requires approved prospectus. Fee.

CHE 599  Thesis  1 TO 6 cr  
May be taken more than once. Only 6 hours may be applied for credit toward a degree. Requires approved prospectus. Fee.

Chemistry (CH) (CH)

CH 101L  Survey Inorg-Org Chem Lab  1 cr  
Laboratory exercises associated with CH 101. CH 101 must be taken concurrently or as a prerequisite. Together, CH 101 and CH 101L count as one laboratory science course, partially fulfilling general education requirements. Fee. Core Course. 
Pre-requisite: CH 101

CH 103L  Chemistry-Its Role Society Lab  1 cr  
Laboratory exercises associated with CH 103. CH 103 must be taken concurrently or as a prerequisite. Together, CH 103 and CH 103L count as one laboratory science course, partially fulfilling general education requirements. Fee. Core course. 
Pre-requisite: CH 103

CH 131L  General Chemistry I Lab  1 cr  
Laboratory exercises associated with CH 131. CH 131 and CH 131L must be taken concurrently. Together, CH 131 and CH 131L count as one laboratory science course, partially fulfilling general education requirements. Fee. Core course. 
Pre-requisite: CH 100 Minimum Grade of D or CH 110 Minimum Grade of D or ACT Math 24 or SAT Mathematics 550 or MATH SECTION SCORE 580 or MA 112 Minimum Grade of C or MA 113 Minimum Grade of C or MA 172 Minimum Grade of C or MA 115 Minimum Grade of C or MA 121 Minimum Grade of C or MA 120 Minimum Grade of C or MA 287 Minimum Grade of C or MA 125 Minimum Grade of C or MA 132 Minimum Grade of C or MA 126 Minimum Grade of C or MA 233 Minimum Grade of C or MyMathTest 080 or University test - Math 85.

CH 132L  General Chemistry II Lab  1 cr  
Laboratory exercises associated with CH 132. CH 132 must be taken concurrently or as a prerequisite. Together, CH 132 and CH 132L count as one laboratory science course, partially fulfilling general education requirements. Fee. Core course. 
Pre-requisite: CH 131 Minimum Grade of D and CH 131L Minimum Grade of D.

CH 201L  Organic Chemistry I Lab  1 cr  
Laboratory exercises associated with CH 201. (Offered Fall and Spring Semesters.) The laboratory introduces basic organic laboratory practices such as the collection of physical properties data, separation and purification techniques, synthesis, and spectroscopic methods. CH 201 must be taken concurrently or as a prerequisite. Fee. 
Pre-requisite: CH 201

CH 202L  Organic Chemistry II Lab  1 cr  
Laboratory exercises associated with CH 202. The laboratory continues with the basic organic laboratory practices with additional synthetic methods. (Offered Fall and Spring Semesters.) CH 202 must be taken concurrently or as a prerequisite. Fee. 
Pre-requisite: CH 202

CH 265L  Introductory Analysis Lab  1 cr  
Laboratory exercises associated with CH 265. (Offered Fall and Spring Semesters.) CH 265 must be taken concurrently or as a prerequisite. Fee. 
Pre-requisite: CH 265

CH 300L  Phys Chem for Life Sci Lab-W  1 cr  
Laboratory exercises associated with CH 300. (Offered Fall Semester.) CH 300 must be taken concurrently or as a prerequisite. Fee. 
Pre-requisite: CH 300

Together, CH 103 and CH 103L count as one laboratory science course, partially fulfilling general education requirements. (Offered Fall and Spring Semesters) Core course. Co-requisite: CH 103L</td>
<td></td>
</tr>
</tbody>
</table>
CH 131  General Chemistry I  3 cr
Three lecture hours and one recitation hour per week for one semester. First of a two-semester sequence for majors, minors, and others seeking quantitative treatment. Topics include the nuclear model, stoichiometry, chemical reactions, gas laws, thermochemistry, atomic structure, and molecular bonding. Together, CH 131 and CH 131L count as one laboratory science course partially fulfilling general education requirements. (Offered Fall and Spring Semesters.) Core Course.
Pre-requisite: CH 100 Minimum Grade of D or CH 110 Minimum Grade of D or ACT Math 24 or SAT Mathematics 560 or MATH SECTION SCORE 580 or MA 112 Minimum Grade of C or MA 113 Minimum Grade of C or MA 172 Minimum Grade of C or MA 115 Minimum Grade of C or MA 121 Minimum Grade of C or MA 120 Minimum Grade of C or MA 287 Minimum Grade of C or MA 125 Minimum Grade of C or MA 132 Minimum Grade of C or MA 126 Minimum Grade of C or MA 233 Minimum Grade of C or MyMathTest 080 or University test - Math 85 .

CH 132  General Chemistry II  3 cr
Continuation of CH 131. Topics include solutions, colligative properties, chemical kinetics, equilibrium, acids and bases, pH, buffers, titrations, thermodynamics, and electrochemistry. Additional topics may include nuclear chemistry, organic and biochemistry, chemistry of inorganic compounds, transition metal complexes, and industrial chemistry. Both the lecture and laboratory experiences of CH 131 (General Chemistry I) are prerequisites. CH 132L must be taken concurrently. Together, CH 132 and CH 132L count as one laboratory science course, partially fulfilling general education requirements. (Offered Fall and Spring Semesters.) Core Course.
Pre-requisite: CH 115 Minimum Grade of D or (CH 110 Minimum Grade of D and CH 131 Minimum Grade of C and CH 132 Minimum Grade of D).

CH 150  Intro to Computer Chemistry  2 cr
This course will introduce the student to direct application and use of computer activity for applications in chemistry; acquisition of data from instrumentation, data analysis, presentation of experimental data, and chemical structure and modeling programs. Fee.
Pre-requisite: (CH 115 Minimum Grade of D or (CH 131 Minimum Grade of D and CH 131L Minimum Grade of D) or (CH 141 Minimum Grade of D and CH 141L Minimum Grade of D) ) and ( (MA 113 Minimum Grade of D or MA 172 Minimum Grade of D) or (MA 115 Minimum Grade of D or MA 121 Minimum Grade of D) or (MA 126 Minimum Grade of D or MA 126 Minimum Grade of D) or (MA 233 Minimum Grade of D ) . CH 141 and CH 141L can be taken concurrently with this course.

CH 201  Organic Chemistry I  3 cr
Fundamentals of structure and chemical behavior of organic molecules including nomenclature, properties, structure, stereochemistry, spectroscopy (both infrared and nuclear magnetic resonance), reactions, synthesis, and mechanisms of alkanes, alkenes, alkylic halides, and alcohols. (Offered Fall and Spring Semesters.) CH 201L must be taken concurrently.
Co-requisite: CH 201L
Pre-requisite: (CH 116 Minimum Grade of D or (CH 132 Minimum Grade of D and CH 132L Minimum Grade of D) or (CH 141 Minimum Grade of D and CH 141L Minimum Grade of D).

CH 202  Organic Chemistry II  3 cr
Continuation of study of structure and chemical behavior of organic molecules including aromatic compounds, ketones and aldehydes amines, carboxylic acids and their derivatives, carbohydrates, amino acids, peptides and proteins, nucleic acids, amines, ethers and epoxides, and conjugated dienes. (Offered Fall and Spring Semesters.) CH 202L must be taken concurrently. Fee.
Co-requisite: CH 202L
Pre-requisite: (CH 201 Minimum Grade of D and CH 201L Minimum Grade of D) or CH 222 Minimum Grade of D.

CH 265  Introductory Analysis  3 cr
A detailed study of the fundamental theories and principles of chemistry with emphasis on their application to quantitative analysis. Because proficiency of the material covered in CH 132 is vital for success in this course, students are strongly advised to take the two courses as close together as schedules permit. (Offered Fall and Spring Semesters.)
Co-requisite: CH 265L
Pre-requisite: (CH 132 Minimum Grade of C and CH 132L Minimum Grade of C) or (CH 116 Minimum Grade of C).

CH 300  Physical Chem for Life Sci  3 cr
Designed to introduce the concepts of physical chemistry to students interested in the biochemical and biological aspects of chemistry. Topics are presented from viewpoint of their applications to biochemical problems; thermodynamics/biochemical energetics, properties of solutions, biological redox reactions, chemical/enzyme kinetics. (Offered Fall Semester.) CH 300L must be taken concurrently.
Co-requisite: CH 300L
Pre-requisite: ( (CH 265 Minimum Grade of D and CH 265L Minimum Grade of D) or CH 266 Minimum Grade of D ) and (MA 126 Minimum Grade of D or MA 223 Minimum Grade of D) and (PH 202 Minimum Grade of D or PH 217 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).
CH 301  Physical Chemistry I  3 cr  
Gas Laws, First and Second Law of Thermodynamics, 
Phase Equilibrium, Chemical Equilibrium, Physical 
 Chemistry of Solutions, Electrochemistry, Transport 
 Properties, and Chemical Kinetics. (Offered Fall Semester). 
Co-requisite: CH 301L 
Pre-requisite: ( (EH 102 Minimum Grade of C or EH 105 
 Minimum Grade of C) and (CH 265 Minimum Grade of D 
 and CH 265L Minimum Grade of D) or CH 266 Minimum 
 Grade of D) and (MA 126 Minimum Grade of D or MA 233 
 Minimum Grade of D) and (PH 202 Minimum Grade of D or 
 PH 217 Minimum Grade of D) or (MA 227 Minimum Grade 
 of D or MA 234 Minimum Grade of D) and (PH 115 Minimum 
 Grade of D or PH 113 Minimum Grade of D). PH 202 and 
 MA 227 and MA 234 can be taken concurrently with this 
course.

CH 302  Physical Chemistry II  3 cr 
Quantum Theory and Applications to Atoms and Molecules, 
Spectroscopy, and Statistical Thermodynamics. (Offered 
Spring Semester.) Required for chemistry majors. 
Co-requisite: CH 302L 
Pre-requisite: ( (CH 265 Minimum Grade of D and CH 265L 
 Minimum Grade of D) or CH 266 Minimum Grade of D ) and 
(EH 102 Minimum Grade of C or EH 105 Minimum Grade of 
C) and (MA 126 Minimum Grade of D or MA 233 Minimum 
Grade of D) and (PH 202 Minimum Grade of D or PH 217 
Minimum Grade of D) or (MA 227 Minimum Grade of D or 
MA 234 Minimum Grade of D) and (PH 115 Minimum Grade 
of D or PH 113 Minimum Grade of D). PH 202 and MA 227 
and MA 234 can be taken concurrently with this course.

CH 394  Directed Studies -  1 TO 4 cr 
Student works in a research laboratory under faculty 
guidance. May be repeated; sum of all directed studies 
cannot exceed eight (8) credits. Requires Junior standing or 
permission of Department Chair.

CH 401  Interm Inorganic Chemistry  3 cr  
Atomic and molecular structure and bonding emphasizing 
the use of symmetry, group theory, and molecular orbitals; 
NMR spectrometry; coordination chemistry; organometallic 
chemistry and homogeneous catalysis. (Offered Spring 
Semester). 
Co-requisite: CH 401L 
Pre-requisite: ( (CH 301 Minimum Grade of D and CH 301L 
Minimum Grade of D) or CH 302 Minimum Grade of D and 
CH 302L Minimum Grade of D) or CH 333 Minimum Grade 
of D.

CH 403  Bioinorganic Chemistry  3 cr  
Survey of bioorganic chemistry appropriate for upper-
level undergraduate and beginning graduate students. 
The approach will be molecular and chemical in nature 
with a focus on the study of the non-carbon elements, 
especially the transition metals, as related to biological 
activity. (Offered Fall Semester). Recommended: CH 301, 
CH 302, or CH 440. Fee. 
Pre-requisite: CH 202 Minimum Grade of D or CH 223 
Minimum Grade of D.

CH 404  Environmental Chemistry  3 cr  
Introduces the cycling of elements in the earth as 
groundwork for understanding the chemical reactions and 
fate of chemical species introduced as contaminants to the 
environment. The chemistry of natural and anthropogenic 
contaminants in the atmosphere, the hydrosphere, the 
lithosphere and the transport and transformation of chemical 
species in the environment are discussed. CH 414L must be 
taken concurrently. (Offered in Fall Semester.) 
Co-requisite: CH 414L 
Pre-requisite: (CH 201 Minimum Grade of D or CH 222 
Minimum Grade of D) and (CH 265 Minimum Grade of D or 
CH 266 Minimum Grade of D).

CH 440  Biochemistry I  3 cr  
Study of fundamental biochemical concepts; emphasis is 
placed on protein, carbohydrate, and lipid structures as 
related to their functional behavior; enzyme kinetics and 
mechanisms of action; thermodynamic relationships in 
biochemical systems. (Offered Fall Semester). Cross-listed 
with BLY 440. 
Pre-requisite: (CH 202 Minimum Grade of D or CH 223 
Minimum Grade of D).

CH 441  Biochemistry II  3 cr  
Study of the reaction and regulations of intermediary 
metabolism; the biochemistry of genetic systems to include 
regulatory mechanisms and protein synthesis. (Offered 
Spring Semester). Cross-listed with BLY 441. 
Pre-requisite: CH 440 Minimum Grade of D or BLY 440 
Minimum Grade of D.

CH 443  Lab Studies in Biochemistry  2 cr  
Course familiarizes the student with the basic laboratory 
techniques commonly employed in biochemical research. 
(Offered Spring Semester). Cross-listed with BLY 443. Fee. 
Pre-requisite: CH 440 Minimum Grade of D or BLY 440 
Minimum Grade of D.

CH 465  Instrumental Analysis  3 cr  
Modern analytical instruments, their operating principles, 
and their applications. (Offered Fall Semester). 
Co-requisite: CH 465L 
Pre-requisite: ( (CH 265 Minimum Grade of D and CH 265L 
Minimum Grade of D) or CH 266 Minimum Grade of D ) and 
(CH 300 Minimum Grade of D and CH 300L Minimum 
Grade of D) or (CH 302 Minimum Grade of D and CH 302L 
Minimum Grade of D) or (CH 333 Minimum Grade of D) or 
(CH 301 Minimum Grade of D and CH 301L Minimum 
Grade of D) or CH 332 Minimum Grade of D).
CH 470  Computational Chemistry  4 cr
Designed to provide an introduction to some of the techniques used in molecular modeling and computational chemistry, and to illustrate how these techniques can be used to study physical, chemical and biological phenomena. Topics: quantum mechanical methods, empirical force fields, molecular mechanics and dynamics, Monte Carlo, continuum electrostatics, and free energy perturbation methods. (Offered Spring Semester). Permission of instructor. Fee.
Pre-requisite: (CH 202 Minimum Grade of D or CH 223 Minimum Grade of D) or (CH 141 Minimum Grade of D and CH 141L Minimum Grade of D) ) and CH 202 Minimum Grade of D.

CH 490  Sp Top -  1 TO 4 cr
Study of a significant topic in Chemistry. May be repeated for a maximum of four credits when the content varies. Requires Senior standing.

CH 492  Seminar I  1 cr
Information retrieval from scientific references, journals, and on-line databases directed toward computer-based preparation of a student seminar having as the capstone experience a formal seminar for Department Faculty and students. (Offered Fall and Spring Semesters). Fee. Requires Senior standing or permission of Department Chair. Fee.

CH 493  Seminar II  1 cr
Continuation of CH 492. Taken the next semester registered after successful completion of CH 492 unless special permission granted by the Department Chair. Presentation of a formal seminar for Department Faculty and students. (Offered Fall and Spring Semesters). Fee. Requires Permission of Department Chair.
Pre-requisite: CH 492 Minimum Grade of D.

CH 494  Directed Studies  1 TO 4 cr
Student works in a research laboratory under faculty guidance. May be repeated; sum of all directed studies cannot exceed eight (8) credits. Requires Senior standing or permission of Department Chair. Fee.

CH 499  Sr Honors Chemistry Project-H  3 cr
Student research under faculty direction; written report and oral presentation of research work to faculty and students. This course may be repeated once for a maximum of six credits. Requires permission of department chair. Fee.

CH 514  Environmental Chemistry  3 cr
Introduces the cycling of elements in the earth as groundwork for understanding the chemical reactions and fate of chemical species introduced as contaminants to the environment. The chemistry of natural and anthropogenic contaminants in the atmosphere, the hydrosphere, the lithosphere and the transport and transformation of chemical species in the environment are discussed. CH 514L must be taken concurrently. (Offered in Fall Semester.)
Co-requisite: CH 514L
Pre-requisite: (CH 202 Minimum Grade of D or CH 223 Minimum Grade of D).

CH 515  Environmental Toxicology  4 cr
Introduction to the scientific and technical principles of toxicological processes in the context of the ecosystem. Students will understand both the types of major environmental toxicants and how to properly evaluate their toxicity and factors that influence toxicity. Students will recognize and coherently formulate risk assessment and by using the tools and techniques acquired, develop and communicate proposals for remedy.
Pre-requisite: (BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C) and (CH 201 Minimum Grade of C and CH 202 Minimum Grade of C) and (CH 540 Minimum Grade of B and CH 541 Minimum Grade of B).

CH 521  Marine Nat Product Chemistry  3 cr
Chemical-physical analysis and synthesis of alkaloids, antibiotics, algae and bacterial metabolites, plant pigments, steroids, and terpenes found in the marine environment. (Offered as required.) Requires Graduate status. Fee.
Pre-requisite: (CH 202 Minimum Grade of D or CH 223 Minimum Grade of D).

CH 530  Biochem of Marine Organism  3 cr
Study of biochemical regulatory processes associated with energy production, vision, defense mechanisms and other physiological activities within vertebrate and invertebrate species of the marine environment. (Offered as required.) Requires Graduate status. Fee.

CH 540  Biochemistry I  3 cr
Study of fundamental biochemical concepts; emphasis is placed on protein, carbohydrate, and lipid structures as related to their functional behavior, enzyme kinetics and mechanisms of action; thermodynamic relationships in biochemical systems. (Offered Fall Semester.) Requires Graduate status. Cross-listed with BLY 540.
Pre-requisite: (CH 202 Minimum Grade of D or CH 223 Minimum Grade of D).

CH 541  Biochemistry II  3 cr
Study of the reactions and regulations of intermediary metabolism; the biochemistry of genetic systems to include regulatory mechanisms and protein synthesis. (Offered Spring Semester.) Requires Graduate status. Cross-listed with BLY 541.
Pre-requisite: CH 540 Minimum Grade of B or BLY 540 Minimum Grade of B.

CH 543  Lab Studies in Biochemistry  2 cr
Course familiarizes the student with the basic laboratory techniques commonly employed in biochemical research. (Offered Spring Semester.) Requires Graduate status. Cross-listed with BLY 543. Fee.
Pre-requisite: CH 441 Minimum Grade of D or CH 540 Minimum Grade of B or CH 541 Minimum Grade of B. CH 441 and CH 541 can be taken concurrently with this course.

CH 550  Readings in Marine Chemistry  3 cr
Readings of primary literature on topics of special interest in the area of marine chemistry and biochemistry. Offered as required. Requires Graduate status. Fee.
CH 565 Instrumental Analysis  3 cr  
Modern analytical instruments, their operating principles, and their applications. (Offered Fall Semester). Requires Graduate status.  
Pre-requisite: ( (CH 265 Minimum Grade of D and CH 265L Minimum Grade of D) or CH 266 Minimum Grade of D ) and (CH 300 Minimum Grade of D and CH 300L Minimum Grade of D) or ( (CH 302 Minimum Grade of D and CH 302L Minimum Grade of D) or CH 333 Minimum Grade of D) or (CH 301 Minimum Grade of D and CH 301L Minimum Grade of D) or CH 332 Minimum Grade of D).

CH 570 Computational Chemistry  4 cr  
Designed to provide an introduction to some of the techniques used in molecular modeling and computational chemistry, and to illustrate how these techniques can be used to study physical, chemical, and biological phenomena. Topics: quantum mechanical methods, empirical force fields, molecular mechanics and dynamics, Monte Carlo, continuum electrostatics, and free energy perturbation methods. (Offered as required.) Requires Graduate status. Fee.  
Pre-requisite: (CH 116 Minimum Grade of C or CH 132 Minimum Grade of C or CH 141 Minimum Grade of C) and (CH 202 Minimum Grade of C or CH 223 Minimum Grade of C).

CH 590 Special Topics  1 TO 4 cr  
Study of a significant topic in chemistry. May be repeated for a maximum of four credits when the content varies. Requires Graduate status.

CH 592 Seminar  1 cr  
The use of scientific references and journals retrieval. Library assignment may be directed toward preparation of student seminars which are scheduled concurrently. (Offered as required). Requires Graduate status. Fee.

CH 594 Directed Studies  1 TO 4 cr  
Literature survey and research under senior staff guidance. May be repeated but not to exceed four credits. Fee.

Civil Engineering (CE) (CE)

CE 102 Intro to Civil Engineering  2 cr  
Introduction to Civil Engineering as a profession and the issues facing today's Civil Engineers. This course also includes a brief introduction of civil engineering sub-disciplines, freehand sketching techniques, Computer Aided Design (CAD) drawings, and spreadsheet application to civil engineering problems.  
Pre-requisite: MA 113 Minimum Grade of D or MA 125 Minimum Grade of D.

CE 204 Surveying Fundamentals  2 cr  
Applications of fundamental surveying techniques. Students will be introduced to the applications of Global Positioning Systems (GPS) and Geographical Information Systems (GIS) in Civil Engineering.  
Co-requisite: CE 205  
Pre-requisite: MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or MA 125 Minimum Grade of C and CE 102 Minimum Grade of C. MA 125 can be taken concurrently with this course.

CE 205 Surveying Fundamentals Lab  1 cr  
Students will collect field data and using state-of-the-art surveying and GPS equipment. Collected data will be used in Geographical Information Systems (GIS) software.  
Co-requisite: CE 204  
Pre-requisite: MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or MA 125 Minimum Grade of C and CE 102 Minimum Grade of C. MA 125 can be taken concurrently with this course.

CE 314 CE Materials  3 cr  
Study of Engineering Properties of Materials used in civil engineering including steel, concrete, asphalt, and timber.  
Co-requisite: CE 315  
Pre-requisite: EG 315 Minimum Grade of D.

CE 315 CE Materials Lab  1 cr  
Study of experimental techniques used to evaluate engineering properties of materials. These techniques will be used to test materials used in civil engineering according to ASTM standards.  
Co-requisite: CE 314  
Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C and EG 315 Minimum Grade of D.

CE 340 Soil Mechanics  3 cr  
Co-requisite: CE 341  
Pre-requisite: EG 315 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D).

CE 341 Geotechnical Laboratory-W  1 cr  
Soil identification and classification: experimental measurement of soil properties and technical reporting.  
Co-requisite: CE 340  
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and CE 340 Minimum Grade of D. CE 340 can be taken concurrently with this course.

CE 352 Intro to Transportation  3 cr  
Principles of transportation engineering with emphasis on highways and traffic.  
Pre-requisite: CE 204 Minimum Grade of C and CE 205 Minimum Grade of C and ST 315 Minimum Grade of C.
CE 353 Transp-Geometric Design  3 cr
Basic principles and techniques of highway design, including route layout, alignment, intersection design, and materials/earthwork estimation. Use of computer tools to generate and analyze highway designs.
Pre-requisite: CE 352 Minimum Grade of D.

CE 360 Water Resources Engineering I  2 cr
The application of fluid mechanics and other science and engineering disciplines in the development of structures, projects, and systems involving water resources. Introductions to open-channel flow, closed-conduit flow, hydraulic structures, hydraulic machinery, and groundwater flow. Fee.
Co-requisite: CE 367
Pre-requisite: EG 360 Minimum Grade of D.

CE 367 Hydraulics Laboratory - W  1 cr
Laboratory and field measurement of fluid and flow properties; hydraulic laboratory practice and model stimulation techniques.
Co-requisite: CE 360
Pre-requisite: EG 360 Minimum Grade of D or CE 365 Minimum Grade of D.

CE 370 Intro to Enviro Eng  3 cr
Introduction to the fundamentals of water quality characterization, water pollution hazardous waste management, water and wastewater treatment, solid waste management, waste minimization and control.
Co-requisite: CE 374
Pre-requisite: CH 132 Minimum Grade of C and MA 238 Minimum Grade of D.

CE 374 Intro to Enviromental Eng Lab  1 cr
Introduction to specific physical, chemical, and microbiological methods of analysis common to environmental engineering; including laboratory and field measurement of water quality characteristics and interpretation of results.
Co-requisite: CE 370
Pre-requisite: CH 132 Minimum Grade of C and MA 238 Minimum Grade of D.

CE 384 Structural Analysis  3 cr
Analysis of statically determinate structures such as trusses, beams, and frames including the calculation of deflections. Introduction to analysis of indeterminate structures.
Co-requisite: CE 385
Pre-requisite: EG 315 Minimum Grade of D.

CE 385 Structural Analysis Lab  1 cr
Modeling and analysis of determinate and indeterminate structures. Use of state-of-the-art structural analysis software.
Co-requisite: CE 384
Pre-requisite: EG 315 Minimum Grade of D.

CE 410 Construction Engineering  3 cr
An introduction to the construction industry and the role of civil engineering in construction. Construction engineering methods including preparation of cost estimates, critical path scheduling and resource allocation. Instructor permission. Fee.

CE 412 Mgmt & Sustainability of C.I.  3 cr
Management and sustainability of Civil infrastructure is designed to present an overview of infrastructure engineering and management systems and to use project management, decision support tools, and life cycle costing tools in connection with infrastructure planning and assessment. Students will be presented with the understanding that achieving sustainability requires the consideration to meeting present and future human needs and respecting "triple bottom line: economic, social, and environmental goals. The course also provides a review of several important design and management tools to support sustainable development and communities.

CE 431 Civil Engineering Design I  2 cr
Introduction to the practice of civil engineering and the engineering design process. In depth consideration of ethical issues in engineering practice. Participation in engineering design teams for project planning, proposal development, and completion of a feasibility study. Written and oral presentations of results. Senior Capstone Course. Fee.
Co-requisite: CE 440, CE 460, CE 470, CE 480
Pre-requisite: CE 352 Minimum Grade of D or CE 353 Minimum Grade of D or CE 443 Minimum Grade of D or CE 485 Minimum Grade of D. CE 352 and CE 443 and CE 485 can be taken concurrently with this course.

CE 432 Civil Engineering Design II  4 cr
A multidisciplinary development of a project involving analysis and design in Civil Engineering. Implementation of design concepts and methodologies from conception to final design. Completion of a comprehensive design project including cost estimates, oral and written presentation of results. A senior capstone course. Fee.
Pre-requisite: CE 431 Minimum Grade of D.

CE 440 Intro to Geotech Eng  3 cr
An Introduction to Geotechnical Engineering designed to provide tools to analyze geomechanical and geohydraulic problems associated with the design of foundations, retaining structures, slopes and other geotechnically related designs.
Pre-requisite: CE 340 Minimum Grade of D and CE 341 Minimum Grade of D. CE 340 can be taken concurrently with this course.

CE 442 Foundation Engineering  3 cr
Principles of foundation analysis, design and construction in engineering practice.
Pre-requisite: CE 440 Minimum Grade of D.
CE 452 Transportation Geometric Design  3 cr
This course will provide students with an understanding of the basic principles and techniques of highway design. This will include laying out potential routes, design of the alignment and intersections, and evaluation of earthwork requirements. The student should be able to understand and apply these principles to highway design problems. The student should also be able to use existing computer tools to generate and analyze designs. Upon completion, students should be prepared to work in the field of highway design. Fee.
Pre-requisite: CE 352 Minimum Grade of D.

CE 460 Water Resources Engineering II  3 cr
The application of hydrologic and hydraulic principles for hydrologic analysis, frequency analysis, flood routing, hydrologic simulation, urban hydrology, floodplain hydraulics, and coastal engineering.
Pre-requisite: CE 360 Minimum Grade of D and CE 367 Minimum Grade of D.

CE 466 Coastal and Harbor Eng  3 cr
An introduction to the principles of coastal hydraulic and sedimentary processes and the design of coastal and harbor works such as ship channels, marinas, jetties, breakwaters, groins, seawalls and beach nourishment projects.
Pre-requisite: CE 460 Minimum Grade of D. CE 460 can be taken concurrently with this course.

CE 470 Water-Wastewater Trtmnt Design  3 cr
Development of the principles of design for components of water supply and wastewater treatment facilities, including drinking water distribution and wastewater collection systems.
Co-requisite: CE 471
Pre-requisite: CE 360 Minimum Grade of D and CE 370 Minimum Grade of D and CE 374 Minimum Grade of D.

CE 471 Water-Wastewater Design Lab  1 cr
Application of design principles and criteria to analyze, design, and evaluate water and wastewater treatment facility components, including water distribution and wastewater collection systems.
Co-requisite: CE 470
Pre-requisite: CE 360 Minimum Grade of D and CE 370 Minimum Grade of D and CE 374 Minimum Grade of D.

CE 474 Industrial Waste Treatment  3 cr
Topics in Industrial Waste Treatment unit processes and their design, including those addressing wastewater treatment, air pollution control, solid waste, and hazardous management.
Pre-requisite: CE 470 Minimum Grade of D.

CE 480 Design of Steel Structures  3 cr
Design of Steel Trusses, Girders, Building Frames, and other Steel Structures.
Co-requisite: CE 481
Pre-requisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D.

CE 481 Steel Design Lab  1 cr
Application of structural steel design methods to specific cases.
Co-requisite: CE 480
Pre-requisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D.

CE 482 Timber Design  3 cr
This course will cover the design of timber structures. Design loads, structural behavior, properties and grades of wood will be covered. Design of beams, columns, diaphragms, shearwalls, structural glued laminated timber, and structural connections. Instructor Approval Required
Pre-requisite: CE 384 Minimum Grade of D and CE 385 Minimum Grade of D.

CE 485 Reinforced Concrete Design  3 cr
Co-requisite: CE 486
Pre-requisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D.

CE 486 Reinforced Concrete Design Lab  1 cr
Integrated reinforced concrete design problems similar to those found in practice will be presented. Students will solve similar problems in class during the lab period.
Co-requisite: CE 485
Pre-requisite: CE 384 Minimum Grade of D and CE 314 Minimum Grade of D and CE 315 Minimum Grade of D.

CE 490 Special Topics  1 TO 4 cr
Topics of current civil engineering interest.

CE 494 Directed Studies  1 TO 4 cr
Directed study, under the guidance of a faculty advisor, of a topic from the field of civil engineering not offered in a regularly scheduled course. Requires department chair permission.

CE 499 Honors Senior Project  1 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of Civil Engineering study, that will lead to a formal presentation at the Annual Honors Student Colloquium. The senior project will be judged and graded by three faculty, chaired by the honors mentor. This course is required for Honors recognition. A minimum of 4 credit hours is required, but a student may enroll for a maximum of 6 credit hours over two semesters. Prerequisites: Completion of the most advanced required course in the subdiscipline of the project (CE 440, CE 366, CE 470, or CE 384) and completion of an approved project prospectus.
Pre-requisite: CE 352 Minimum Grade of C or CE 366 Minimum Grade of D or CE 384 Minimum Grade of C or CE 443 Minimum Grade of C or CE 470 Minimum Grade of C.
CE 503  Intro to Coastal Engineering  3 cr  
This graduate course provides students with an introduction to the coastal design environment. The goal of this course is to orient civil engineers, or students from related degree programs, to fundamental coastal engineering concepts. These concepts are important as they make the practice of civil engineering unique due to the complex tide, wave, and sediment characteristics found along the coast. These coastal systems are dynamic, ecologically sensitive, critical to the nation’s economy, and are highly vulnerable to storms and the impacts of climate change.

CE 510  Construction Engineering  3 cr  
An introduction to the construction industry and the role of civil engineering in construction. Construction engineering methods including preparation of cost estimates, critical path scheduling and resource allocation. Instructor permission required.

CE 512  Mgmt & Sustainability of Infr  3 cr  
This course is designed to present an overview of infrastructure systems and how to manage and maintain these systems. Project management, decision support tools, and life cycle costing tools will be presented, in connection with infrastructure planning and assessment. Infrastructure sustainability will also be addressed, particularly considering the “triple bottom line” of economic, social, and environmental goals. The course also provides a review of several important design and management tools to support sustainable development and communities. A course project is required.

CE 540  Advanced Soil Mechanics  3 cr  

CE 542  Foundation Engineering  3 cr  
This course is to provide advanced knowledge of selected geotechnical principals for analysis, design and construction of a variety of foundations systems. This course is dually listed with an equivalent 400 level course (CE 442). Fee. Pre-requisite: CE 440 Minimum Grade of C.

CE 547  Groundwater  3 cr  
Principals of fluid flow through porous media, well hydraulics. Ground water contamination, including principals that govern fate, transport, and remediation. Fee. Pre-requisite: CE 340 Minimum Grade of C and CE 470 Minimum Grade of C.

CE 551  Traffic Engineering  3 cr  
This course will focus on traffic flow parameters and their influence on roadway traffic conditions, with emphasis on traffic data collection, traffic safety analysis, roadway markings, traffic signs, traffic signal timing and signal capacity analysis, and traffic management systems. Pre-requisite: CE 352 Minimum Grade of C.

CE 552  Transportation Geometric Design  3 cr  
This course will provide students with an understanding of the basic principles and techniques of highway design. This will include laying out potential routes, design of the alignment and intersections, and evaluation of earthwork requirements. The student should be able to understand and apply these principles to highway design problems. The student should also be able to use existing computer tools to generate and analyze designs. Upon completion, students should be prepared to work in the field of highway design. This course is dually listed with an equivalent 400 level course (DE 452). Fee. Pre-requisite: CE 352 Minimum Grade of C.

CE 553  Transportation Systems Eval  3 cr  
This course will focus on concepts and principles of transportation economic analysis, transportation costs and benefits, user and nonuser consequences, methods of evaluation of plans and projects, environmental impact assessments, and transportation programming and management. Requires Instructor Permission.

CE 560  Coastal Hydrodynamics  3 cr  
Theory and analysis of advanced coastal and estuarine hydrodynamics. Potential topics to be covered include: wave mechanics; tidal dynamics; coastal and estuarine circulation; and transport and mixing in coastal waters. Pre-requisite: CE 501 Minimum Grade of C.

CE 563  Hydrodynamic Modeling  3 cr  
Theory and application of numerical models to coastal hydrodynamics. Potential topics to be covered include: overview of numerical simulation techniques; wave transformation processes; engineering wave models; principles of circulation; and advanced circulation models. Pre-requisite: CE 501 Minimum Grade of C.

CE 566  Coastal and Harbor Engineering  3 cr  
Advanced principles of coastal hydraulic and sedimentary processes and the design of coastal and harbor works such as ship channels, marina, jetties, breakwaters, groins, seawalls, and beach nourishment projects. This course is dually listed with an equivalent 400 level course (CE 466). Fee. Pre-requisite: CE 460 Minimum Grade of C and CE 501 Minimum Grade of C.

CE 571  Biological Wastewater Treatment  3 cr  
Theory, analysis and design criteria of biological treatment systems for municipal and industrial wastewaters, including suspended and attached growth processes in both the aerobic and anaerobic environments. Pre-requisite: CE 470 Minimum Grade of C.
CE 572 Physical Wastewater Treatment 3 cr
Advanced theory and applications in physical and chemical wastewater treatment. Topics covered include mass balance; reactor design, modeling, and analysis; filtration; mixing and flocculation; flotation; dissolved oxygen transfer optimization; chemical treatment of nutrient loads; disinfection; and residuals management.
Pre-requisite: CE 470 Minimum Grade of C.

CE 574 Industrial Waste Treatment 3 cr
Topics in Industrial Waste Treatment unit processes and their design, including those addressing waste water treatment, air pollution, solid waste, and hazardous waste management. This course is dually listed with an equivalent 400 level course (CE 474). Credit for both CE 474 and CE 574 is not permitted. Fee.
Pre-requisite: CE 470 Minimum Grade of C.

CE 579 Fundamentals Environmental Eng 3 cr
Fundamentals of water quality characterization, water pollution, hazardous waste management, water and wastewater treatment, solid waste management, and waste minimization and control. This course includes a comprehensive project in addition to the lecture class. Note: This course is a core course for MS degree students in the Environmental Toxicology Program and not intended for Engineering Majors. Instructor Permission. (This course is dual listed with CE 370.) Fee.
Pre-requisite: (CH 116 Minimum Grade of C or CH 132 Minimum Grade of C).

CE 580 Steel Design 3 cr
Design of steel trusses, girders, building frames, and other steel structures. This course is dually listed with an equivalent 400 level course (CE 480). Fee.
Co-requisite: CE 581
Pre-requisite: CE 384 Minimum Grade of C or CE 385 Minimum Grade of C.

CE 581 Steel Design Lab 1 cr
Application of structural steel design methods to specific cases. This course is dually listed with an equivalent 400 level course (CE 481). Fee.
Co-requisite: CE 580
Pre-requisite: CE 384 Minimum Grade of C and CE 385 Minimum Grade of C.

CE 582 Timber Design 3 cr
This course will cover the design of timber structures. Design loads, structural behavior, properties and grades of wood will be covered. Design of beams, columns, diaphragms, shearwalls, structural glued laminated timber, and structural connections. This course is dually listed with an equivalent 400 level course (CE 482). Instructor Approval Required.

CE 583 Advanced Steel Design 3 cr
This course covers the design of built-up members, composite beams, columns and floors. Design of advanced bolted and welded connections will also be covered. Students will use state-of-the-art software to model and design complex steel structures.
Pre-requisite: CE 480 Minimum Grade of C or CE 481 Minimum Grade of C.

CE 584 Advanced Structural Analysis 3 cr
Students will be introduced to the analysis of indeterminate structures using classical and matrix methods. Students will also be introduced to advanced structural modeling techniques using state-of-the-art software. Fee.
Pre-requisite: CE 384 Minimum Grade of C and CE 385 Minimum Grade of C.

CE 585 Concrete Design 3 cr
Fundamentals of reinforced concrete analysis and design. Design of beams, one-way slabs, short columns, and single footings. Calculations of cracking and deflection of beams. This course is dually listed with an equivalent 400 level course (CE 485). Fee.
Co-requisite: CE 586
Pre-requisite: CE 384 Minimum Grade of C or CE 385 Minimum Grade of C.

CE 586 Concrete Design Lab 1 cr
Integrated reinforced concrete design problems similar to those found in practice will be presented. Students will solve similar problems in class during the lab period. This course is dually listed with an equivalent 400 level course (CE 486). Fee.
Co-requisite: CE 585
Pre-requisite: CE 384 Minimum Grade of C and CE 385 Minimum Grade of C.

CE 587 Advanced Concrete Design 3 cr
Students will be introduced to the analysis and design of reinforced concrete footings, retaining walls, two-way floor systems, long columns, beams subjected to torsion and deep beams. Fee.
Pre-requisite: CE 485 Minimum Grade of C and CE 486 Minimum Grade of C.

CE 588 Prestressed Concrete Design 3 cr
Students will be introduced to the concepts of prestressing, loss of prestress, design of prestressed beams, columns and slabs. Fee.
Pre-requisite: CE 485 Minimum Grade of C and CE 486 Minimum Grade of C.

CE 589 Special Topics - 1 TO 4 cr
Topics of current civil engineering interest.

CE 592 Directed Independent Study - 1 TO 3 cr
Directed study, under the guidance of a faculty advisor, of a topic from the field of Civil Engineering not offered in a regularly scheduled course. Requires Instructor Permission. Fee.
CE 594  Projects in Civil Engineering        1 TO 3 cr
May be repeated for credit. Requires approved proposal and consent of director of engineering graduate studies. Fee.

CE 599  Thesis                                 1 TO 6 cr
Thesis research. May be taken more than once. Requires approved prospectus. Fee.

Classics (CLA) (CLA)

CLA 103  Art History I                        3 cr
A survey of art and architecture of Europe and the Near East from the prehistoric to the end of the Gothic era. Identical with ARH 103. Credit cannot be received for both CLA 103 and ARH 103. Fee. Core Course.

CLA 105  Encounter with the Humanities       3 cr
Introduction to the various disciplines within the humanities with emphasis on the role each plays in a liberal arts education. Identical with AIS 105. Credit cannot be received for both CLA 105 and AIS 105. Core Course.

CLA 110  Intro Anc Greek Roman Culture       3 cr
A survey of the history, literature, philosophy, religion, art architecture, sociology, and political institutions of the Greek and Roman world with readings in translation from major Greek and Latin authors.

CLA 240  Western Philosophy: Classical       3 cr
Survey of classical Greek philosophy. The philosophers surveyed may include Presocratic philosophers, Socrates, Plato, Aristotle, and Hellenistic philosophers. Fulfills the General Education Requirement. Identical with PHL 240. Credit cannot be received for both CLA 240 and PHL 240. Pre-requisite: CA 101 Minimum Grade of D.

CLA 290  Sp Top -                             3 cr
Different figures, periods or topics of significance in Classics will be studied as announced. May be repeated, when content varies, for a total of six hours.

CLA 304  Ancient Greek Art Architecture      3 cr
Architecture, sculpture, and painting in Ancient Greece and the expansion and influence of Greek culture in the Ancient World.
Pre-requisite: ARH 103 Minimum Grade of C or CLA 110 Minimum Grade of C.

CLA 306  Roman Art                             3 cr
Roman Art: Architecture, sculpture, and painting in Ancient Rome and its empire. Fee.
Pre-requisite: (ARH 103 Minimum Grade of C or CLA 103 Minimum Grade of C) or CLA 110 Minimum Grade of C.

CLA 310  Classical Mythology                  3 cr
Through the disciplines of English and Philosophy, this course will provide an introduction to myths and to the literature that recounts the myths and to the literature that recounts the myths, legends, and folktales of ancient Greece and Rome. This course will also look at how different writers treat the material and why their treatments vary. Cross-listed with PHL 310, REL 310, and EH 310.
Pre-requisite: (ACT English 27 or SAT Critical Reading 610 or University - EH101 Exempt P or EH 101 Minimum Grade of C or EH 110 Minimum Grade of D or EH 190 Minimum Grade of D or USA 010 Minimum Grade of S) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CLA 311  Classical Political Thought         3 cr
The course examines the central themes of classical Western political philosophy through the reading and discussing of the primary works of such thinkers as Plato, Aristotle, Augustine, and Aquinas. (Cross-listed as PHL 311 and PSC 311).

CLA 390  Sp Top -                             3 cr
Different figures, periods or topics of significance in Classics will be studied as announced. May be repeated, when content varies, for a total of six hours.

CLA 402  Rhetoric: Ancient and Modern         3 cr
Readings in rhetorical theory, ancient and modern, are applied in specific writing assignments which encourage students to adopt a point of view and address a specific audience.
Pre-requisite: EH 101 Minimum Grade of C and EH 102 Minimum Grade of C.

CLA 454  Ancient Greek Culture                3 cr
Through the disciplines of History and Philosophy, ancient Greek culture, including its history, literature, philosophy, art and architecture will be examined.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CLA 455  Ancient Roman Culture                3 cr
Through the disciplines of History and Philosophy, ancient Roman culture, including its history, literature, philosophy, art and architecture will be examined.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CLA 492  Seminar -                            3 cr
An in-depth investigation of figures, periods or topics in Classics for advanced undergraduates. May be repeated, when content varies, for a total of six hours.
Clinical Counseling Psy (CCP) (CCP)

CCP 742  Advanced Psych Assessment  3 cr
This course will offer an in-depth understanding of the assessment of complex cases, which includes both mental illness and physical disorders, as well as the impact of complex social issues, such as culture, ethnicity, and economic issues. The course covers topics pertaining to adults and children. The emphasis will be on the integration of nomothetic and empirical perspectives with idiosyncratic approaches in an evidence-based assessment model. Topics covered will be assessing special populations (e.g., severely mentally ill, trauma, forensic, parents), therapeutic assessment, person-centered report writing, providing feedback, theoretical and scientific issues in assessment, and current controversies. Pre-requisite: CCP 706 Minimum Grade of B. CCP 706 can be taken concurrently with this course.

CCP 745  Teaching of Psychology  3 cr
This course will offer an in-depth understanding of the teaching of psychology at the post secondary level.

CCP 746  Group and Systems Theory  3 cr
This course will survey group and systems theories and the interventions that have been derived from this perspective. The dynamics of group processes will be delineated. Pre-requisite: CCP 706 Minimum Grade of B.

CCP 747  Prevention Treat Public Health  3 cr
This course will survey the basic theory and techniques underlying the study of public health problems. Research related to the prevention and treatment of several specific public health problems (e.g. suicide, HIV/AIDS, youth violence) will be covered in depth.

CCP 748  Consult Psych Program Develop  3 cr
This course provides an overview of approaches to psychological consulting and program development in individual, small group and large organization contexts. Specific aspects of psychological consulting in mental health, business, and educational settings will be reviewed.

CCP 750  Applied Psychophys Biofeedback  3 cr
This course will survey theory, research, and applications of psychophysiology and biofeedback in the prevention and treatment of illness and the enhancement and maintenance of health. Pre-requisite: CCP 706 Minimum Grade of B.

CCP 752  Clinical Neuropsychology  3 cr
This course will offer an in-depth understanding of the different theories of brain function in humans. Assessment methods for detecting abnormal functioning and the localization of functioning by behavioral methods will also be examined. The possible etiologies of abnormal functioning as well as their treatment will be reviewed. Pre-requisite: CCP 706 Minimum Grade of B and CCP 742 Minimum Grade of B.

CCP 756  Practicum Therapy  1 TO 3 cr
Supervised experience with child and/or adult populations; includes case conference and seminars. This course may include supervised placement in an applied setting. Pre-requisite: CCP 706 Minimum Grade of B or PSY 506 Minimum Grade of B. CCP 706 and PSY 506 can be taken concurrently with this course.

CCP 758  Psychology Resilience & Trauma  3 cr
This course will offer an in-depth understanding of resilience, as it manifests across the lifespan in response to various types of traumas (natural vs. manmade; community-wide versus family- or individually-specific). Prevention and reduction of psychological impact related to trauma and the development, enhancement, and maintenance of resilience in the face of adversity will be emphasized. Pre-requisite: CCP 706 Minimum Grade of B. CCP 706 can be taken concurrently with this course.

CCP 759  Group and Systems Theory  3 cr
This course will survey group and systems theories and the interventions that have been derived from this perspective. The dynamics of group processes will be delineated. Pre-requisite: CCP 706 Minimum Grade of B.

CCP 763  Prevention Treat Public Health  3 cr
This course will survey the basic theory and techniques underlying the study of public health problems. Research related to the prevention and treatment of several specific public health problems (e.g. suicide, HIV/AIDS, youth violence) will be covered in depth.

CLA 494  Directed Studies  1 TO 3 cr
Directed research in Classics under the guidance of a member of the department. Credit according to the magnitude of the individual project. May be repeated, if content varies, for a total of three hours. Prerequisites: Junior or senior standing and approval of directing professor and department chair.

CLA 499  Honors Thesis -W  3 TO 6 cr
Extended research paper prepared under the direction of thesis advisor plus two-person committee selected by advisor in consultation with student. Prerequisites: The student must have developed a proposal for the thesis in consultation with the advisor, and received permission for the work from the committee. In addition, the student must be a senior major or minor, have completed the common core, and have at least 3.3 GPA in the Classics concentration of the Philosophy major. Credit for this course is only given as an addition to the hours required for the major. Pre-requisite: (PHL 120 and PHL 240 and PHL 245 and PHL 321 and PHL 461 and PHL 310 ) or (REL 310 or CLA 310 ). PHL 240 can be taken concurrently with this course.

CLA 594  Directed Studies  3 cr
Directed research in philosophy under the guidance of a member of the department. May be repeated, if content varies, for a total of six hours. Prerequisite: Graduate Student in Department conferring a Graduate Degree (hence not open to Philosophy majors in any Concentration in Philosophy.)

CLA 599  Directed Research  3 cr
Directed research in Classics under the guidance of a member of the department. May be repeated, if content varies, for a total of three hours. Prerequisites: Graduate Student in Department conferring a Graduate Degree (hence not open to Philosophy majors in any Concentration in Philosophy.)

CLA 599  Directed Research  3 cr
Directed research in Classics under the guidance of a member of the department. May be repeated, if content varies, for a total of three hours. Prerequisites: Graduate Student in Department conferring a Graduate Degree (hence not open to Philosophy majors in any Concentration in Philosophy.)

CLA 699  Directed Research  3 cr
Directed research in Classics under the guidance of a member of the department. May be repeated, if content varies, for a total of three hours. Prerequisites: Graduate Student in Department conferring a Graduate Degree (hence not open to Philosophy majors in any Concentration in Philosophy.)

</tr>
</thead>
<tbody>
<tr>
<td>CCP 766</td>
<td>Clinical Supervision</td>
<td>3 cr</td>
<td>This course provides an overview of the various theoretical approaches to supervision of professional psychological services, particularly psychotherapy services. In addition, relevant research findings in the area of supervision are reviewed. Students also have the opportunity to receive feedback on audio/video tapes of their supervision sessions with a junior graduate student clinician. Pre-requisite: CCP 706 Minimum Grade of B and CCP 756 Minimum Grade of S.</td>
</tr>
<tr>
<td>CCP 772</td>
<td>Child Family Psychopath Interv</td>
<td>3 cr</td>
<td>This course provides an overview of current theory and research findings relevant to psychological disorders typically occurring in childhood and adolescence. In addition, evidence-based interventions for various childhood disorders are reviewed. A focus will be upon an ecological and developmental view of childhood psychopathology that integrates family, community, and societal forces in a comprehensive view of such disorders. Pre-requisite: CCP 706 Minimum Grade of B.</td>
</tr>
<tr>
<td>CCP 777</td>
<td>Seminar on Suicide</td>
<td>3 cr</td>
<td>This graduate seminar will examine the topic of suicide and self-harm in depth. Theoretical and empirical perspectives from sociology, psychology, and genetics/neuroscience will be considered. Additionally, we will examine suicide as both a clinical phenomenon and a public health issue. Accordingly, cultural, political, and policy issues related to suicide will be explored alongside risk factors, mental health, and individual patient-level factors. This course will utilize focused readings, group discussions, and writing assignments to achieve the course objectives.</td>
</tr>
<tr>
<td>CCP 780</td>
<td>Applied Health Psychology</td>
<td>3 cr</td>
<td>This course will survey theory, research, and applications of health psychology in the prevention and treatment of illness and the enhancement and maintenance of health. Pre-requisite: CCP 706 Minimum Grade of B. CCP 706 can be taken concurrently with this course.</td>
</tr>
<tr>
<td>CCP 782</td>
<td>Advanced Practicum</td>
<td>1 TO 3 cr</td>
<td>Supervised experience with child and/or adult populations in a variety of settings; includes case conferences and advanced psychological assessment and interventions and supervision of lower level graduate students. Pre-requisite: CCP 756 Minimum Grade of B.</td>
</tr>
<tr>
<td>CCP 790</td>
<td>Special Topics-</td>
<td>0 TO 3 cr</td>
<td>Selected topics in psychology and may be repeated or credit when course varies.</td>
</tr>

College Of Arts/Sciences (CAS) (CAS)

CAS 100 First Yr Exp - 2 cr
A course for first-year students majoring in the College of Arts & Sciences that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. Taught in small groups, the course provides an introduction to the nature of higher education and a general orientation to the functions and resources of the University.

CAS 190 Special Topics - 1 TO 3 cr
This variable content course deals with selected topics from any of the disciplines in the College of Arts and Sciences. Topics will focus on current and relevant issues and may contain a service-learning component. The course may be repeated for credit when the topic varies for a maximum of six credit hours.

Comm Mental Health Nurs (CMN) (CMN)

CMN 350 Psy-Mental Health Nsg 2 cr
Analysis of theories, concepts, evidence, issues and trends from contemporary nursing science and related disciplines in promoting the health of individuals and families experiencing psychiatric-mental health concerns. The emphasis is on the use of the nursing process and other systematic approaches to plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with individuals and families experiencing psychiatric-mental health concerns in a variety of acute and community settings.
Co-requisite: CMN 351
Pre-requisite: (NU 311 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C).

CMN 351 Psy-Mental Health Nsg Clin 2 cr
The purpose of this course is to provide students the opportunity to analyze theories, concepts, research, and issues and trends in psychiatric-mental health nursing. The focus of the course is on internal and external factors affecting the mental health of children, adolescents, adults, elderly, and families. The emphasis is on the role of the professional nurse in health promotion and maintenance, illness care, and rehabilitation of children, adolescents, adults, elderly, and families experiencing psychiatric-mental health concerns.
Co-requisite: CMN 350
Pre-requisite: (NU 311 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C).
CMN 420 Community Health Nursing 3 cr
The purpose of this course is to provide students an opportunity to explore community health nursing concepts and principles from a population health care perspective. The changing needs of an increasingly culturally diverse population within the social context of the community systems are examined along with the environmental, economical, political, and legal constraints to the health of systems.
Co-requisite: CMN 421
Pre-requisite: AHN 447 Minimum Grade of C and AHN 448 Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and (MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C). AHN 447 and AHN 448 can be taken concurrently with this course.

CMN 421 Community Health Nurs Clinical 1 cr
The purpose of this course is to provide students the opportunity to complete a clinical project integrating community health nursing concepts and principles from an aggregate health care perspective. The changing needs of an increasingly culturally diverse population within the social context of the community are examined. Course content includes environmental, economical, political, and legal constraints to the health of aggregates.
Co-requisite: CMN 420
Pre-requisite: AHN 447 Minimum Grade of C and AHN 448 Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and (MCN 352 Minimum Grade of C and MCN 353 Minimum Grade of C and MCN 354 Minimum Grade of C and MCN 355 Minimum Grade of C. AHN 447 and AHN 448 can be taken concurrently with this course.

CMN 548 Introduction to PMHNP 3 cr
The purpose of this first didactic course is to prepare the Advanced Family Psychiatric/Mental Health Nurse Practitioner students to assess, diagnose, and manage selected health care needs of adults and children. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.
Co-requisite: CMN 551
Pre-requisite: NU 545 Minimum Grade of C and NU 518 Minimum Grade of C. NU 545 and NU 518 can be taken concurrently with this course.

CMN 550 PMHNP Clinical Progression 1 TO 4 cr
The purpose of this progression course is to provide opportunities for Psychiatric/Mental Health Nurse Practitioner students to apply concepts from Advanced Psychiatric/Mental Health Nursing I in primary and acute care mental health settings with adults and families experiencing psychiatric/mental health concerns. The emphasis is on mental health nursing across the lifespan.

CMN 551 HPDP & Issues for the PMHNP 2 cr
This didactic course prepares the Family Psychiatric/Mental Health Nurse Practitioner student to identify and implement appropriate and culturally sensitive health promotion and disease prevention strategies across the lifespan of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary, and tertiary levels.
Co-requisite: CMN 548

CMN 552 PMHNP I 3 cr
This didactic course prepares the Advanced Family Psychiatric-Mental Health Nurse Practitioner student to assess, diagnose, and manage selected health care needs of culturally diverse populations across the life span. The focus is on advanced practice nursing with individuals and families in a variety of health care settings. Emphasis is placed on wellness and the pathophysiology and epidemiology underlying acute and chronic psychiatric/mental health problems.
Co-requisite: CMN 553
Pre-requisite: CMN 548 Minimum Grade of C and NU 578 Minimum Grade of C. NU 578 can be taken concurrently with this course.

CMN 553 PMHNP Practicum I 3 cr
The purpose of this practicum course is to provide opportunities for Advanced Family Psychiatric-Mental Health Nurse Practitioner students to apply concepts in primary and acute care settings with adults and families experiencing psychiatric/mental health concerns. The emphasis is on mental health nursing across the lifespan.
Co-requisite: CMN 552
Pre-requisite: NU 578 Minimum Grade of C.

CMN 554 PMHNP II 3 cr
The purpose of this course is to provide the Advanced Family Psychiatric-Mental Health Nurse Practitioner student an in-depth study of psychiatric/mental health care management of adults and their families within the framework of advanced nursing. The focus is on selected acute and chronic complex psychiatric/mental health care problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.
Co-requisite: CMN 555
Pre-requisite: CMN 552 Minimum Grade of C.

CMN 555 PMHNP Practicum II 3 cr
The purpose of this course is to provide opportunity for the Advanced Family Psychiatric-Mental Health Nurse Practitioner student to practice within advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of adults with psychiatric/mental health concerns. Emphasis is on collaboration with other health care providers in a culturally diverse environment.
Co-requisite: CMN 554
CMN 556 PMHNP Practicum III 4 cr
The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Advanced Family Psychiatric-Mental Health Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.
Co-requisite: CMN 557
Pre-requisite: CMN 554 Minimum Grade of C and NU 610 Minimum Grade of C or NU 607 Minimum Grade of C or NU 608 Minimum Grade of C or NU 613 Minimum Grade of C. NU 610 and NU 607 and NU 608 and NU 613 can be taken concurrently with this course.

CMN 557 PMHNP III 3 cr
The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in Advanced Family Psychiatric-Mental Health Nurse Practitioner health care. Emphasis is on critical analysis and management of issues by the Psychiatric-Mental Health Nurse Practitioner in an interdisciplinary health care delivery system.
Co-requisite: CMN 556
Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.

CMN 566 Family NP Clin Progression 1 TO 9 cr
The purpose of this practicum course is to provide opportunities for the Family Nurse Practitioner to apply concepts from previous courses and CMN 572, 574, or 577 in select clinical settings. Focus is on individuals and families in primary care settings. The emphasis is on diagnostic reasoning and decision-making/critical-thinking.

CMN 568 Intro to Family NP 3 cr
The purpose of this first didactic course is to prepare Advanced Family Nurse Practitioner students to assess, diagnose, and manage selected health care needs of adults and children. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.
Co-requisite: CMN 571
Pre-requisite: NU 545 Minimum Grade of C and NU 518 Minimum Grade of C. NU 545 and NU 518 can be taken concurrently with this course.

CMN 571 HPDP in Family NP 2 cr
The purpose of this didactic course is to prepare the Advanced Family Nurse Practitioner student to identify and implement appropriate and culturally competent health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary, and tertiary levels of prevention. Prevention, early diagnosis, prompt treatment, and in-depth patient education with dysmetabolic syndrome and diabetes will be emphasized. Effective strategies for life-style behavior change will also be evaluated.
Co-requisite: CMN 568

CMN 572 Family NP I 3 cr
This didactic course prepares the Advanced Family Nurse Practitioner student to assess, diagnose, and manage selected health care needs of culturally diverse populations across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on wellness and the pathophysiology and epidemiology underlying acute and chronic health problems.
Co-requisite: CMN 573
Pre-requisite: CMN 568 Minimum Grade of C and NU 578 Minimum Grade of C. NU 578 can be taken concurrently with this course.

CMN 573 Family NP Pract I 3 cr
This practicum course provides opportunities for the Advanced Family Nurse Practitioner to apply concepts in select clinical settings. Focus is on individuals and families in primary care settings. The emphasis is on culturally competent delivery of health care, diagnostic reasoning and decision making/critical thinking.
Co-requisite: CMN 572
Pre-requisite: NU 578 Minimum Grade of C.

CMN 574 Family NP II 3 cr
This course provides an in-depth study of the health care management of children, adults, and families within the framework of advanced nursing. Emphasis is on the interaction among health care providers in a culturally diverse environment. The focus is on selected acute and chronic complex health problems of children, adults, and families in primary health care settings.
Co-requisite: CMN 575
Pre-requisite: CMN 572 Minimum Grade of C.

CMN 575 Family NP Prac II 3 cr
This practicum course provides an opportunity for the Advanced Family Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of children, adults, and families. Emphasis is on collaboration with other health care providers in a culturally diverse environment.
Co-requisite: CMN 574
CMN 576 Family NP Pract III
The purpose of this practicum course is to provide opportunities for the Family Nurse Practitioner student to apply concepts from CMN 577 and previously required courses in select clinical settings. Focus is on individuals and families in primary care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking. Co-requisite: CMN 577
Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C. NU 607 and NU 608 can be taken concurrently with this course.

CMN 577 Family NP III
The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in health care. Emphasis is on critical analysis and management of these issues by the Advanced Family Nurse Practitioner student in an interdisciplinary health care system.
Co-requisite: CMN 576
Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.

CMN 604 PMHNP PP&D
This course assists the Family Psych Mental Health Nurse Practitioner student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Family Psych Mental Health Nurse Practitioner student's selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination. Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C). NU 611 can be taken concurrently with this course.

CMN 617 PMHNP Residency I
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Family Psych Nurse Practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Nurse Practitioner DNP student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Nurse Practitioner student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.
Pre-requisite: CMN 604 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

CMN 618 PMHNP Residency II
Provides students the opportunity to fully express all DNP competencies. The student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project. Pre-requisite: CMN 617 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

CMN 619 PMHNP Residency III
Final course in residency series as student continues to implement and evaluate project plan. Provides student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project. Pre-requisite: CMN 618 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

CMN 643 Public Health Admin PP&D
This course assists the public health nursing administration DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the public health students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination. Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

CMN 644 Public Health Residency I
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The public health nursing administration student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the public health nursing administration DNP student will work with the primary faculty advisor to complete projects and advance their selected practice area. The public health nursing administration student will have access to and authority for expanded scope of practice to master the DNP competences. Residency sites will depend upon the public health nursing administration student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required.
Pre-requisite: CMN 643 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.
CMN 645  Public Health Residency II  3 TO 6 cr
Provides public health nursing administration students the opportunity to fully express all DNP competencies. The public health nursing administration student continues to implement and evaluate project plan. Provides public health nursing administration student the opportunity to fully express all DNP competencies. The public health nursing administration student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.
Pre-requisite: CMN 644 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

CMN 646  Public Health Residency III  3 TO 6 cr
Final course in residency series, the public health nursing administration student continues to implement and evaluate project plan. Provides public health nursing administration student the opportunity to fully express all DNP competencies. The public health nursing administration student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.
Pre-requisite: CMN 645 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

CMN 680  Family NP PP&D  3 cr
This course assists the family nurse practitioner student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the family nurse practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

CMN 681  Family NP Residency I  3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The family nurse practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the family nurse practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the family nurse practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. A total of 180 clinical hours of direct practice/management is required.
Pre-requisite: CMN 680 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

CMN 682  Family NP Residency II  3 cr
Provides family nurse practitioner students the opportunity to fully express all DNP competencies. The family nurse practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project.
Pre-requisite: CMN 681 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

CMN 683  Family NP Residency III  3 cr
Final course in residency series, the family nurse practitioner student continues to implement and evaluate project plan. This course provides the family nurse practitioner student the opportunity to fully express all DNP competencies. The family nurse practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project.
Pre-requisite: CMN 682 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

CMN 692  CMN DNP Project Progression  3 cr
Students will register for this course to complete residency course work under supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

Communication (CA) (CA)

CA 100  Intro to Communication  3 cr
Course examines various approaches people take to communicating. Focuses on developing an awareness of how and why we communicate and why we do not always communicate effectively. Includes consideration of variables related to interpersonal, group, public, and mass-communication contexts. Fee.

CA 101  Intro to Media  3 cr
Course examines the functioning of communication media in contemporary society including the political, economic and social environment. The structure and functions of newspapers, magazines, film, recording, radio, television, advertising and public relations industries are examined. The impact of the media on individuals and institutions is explored. Fee.

CA 110  Public Speaking  3 cr
A beginning study of the principles of speech communication as they relate to speaker-audience communication. The student is provided an opportunity to develop the art of audience and subject analysis, research, critical thinking, organization, language, and delivery of speeches. This course includes a video component. Fee.

</tbody>
</table>
CA 260  Digital Writing and Production  3 cr
This course considers the nature of the digital environment as it relates to communication. Topics include writing in the online environment, effective use of images and multimedia, and basic web design. Computer fee.

CA 270  Sports Journalism  3 cr
This is a traditional lecture and writing course that will provide students with an overview of sports journalism and hone writing, reporting and editing skills. Students will learn how to write a game story, advance/follow-up story, sports column and feature story during the semester. As in the journalism industry, students will adhere to strict deadlines. Computer Fee.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CA 271  Strategic Publication Design  3 cr
Course focuses on the approaches of visual communication to strategically reach target audiences and meet an organization's mission brand and communication specific goals. This involves the use of modern industry software tools to apply the concepts and techniques of basic design principles, color, typography, layout and graphics in the planning and development of publications and design pieces. Computer Fee.
Pre-requisite: CA 224 Minimum Grade of D.

CA 275  Decision Making - Small Groups  3 cr
Theory and practice in leading and participating in small group decision making. Special focus on group problem solving and the management of conflict in small group decision-making meetings. Fee.

CA 281  Editing and Layout  3 cr
Principles and practices of selection and preparation of written and pictorial materials for newspapers, magazines, and related media. Layout and design, production planning, and related topics. Computer fee.
Pre-requisite: CA 220 Minimum Grade of C.

CA 283  Chinese Film  3 cr
This course will introduce students to major topics in Chinese history, covering both ancient periods, such as the Three Kingdoms period, and twentieth-century events such as the war with Japan and the Cultural Revolution. Post-Tiananmen Chinese society will also be stressed. Students will explore these themes through Chinese film and literature, and will thus become familiar with major directors, including Zhang Yimou and Jia Zhangke and writers such as Yu Hua.

CA 288  History of the Mass Media  3 cr
The role of journalism in American society from the Revolution to the present. This course is equivalent on HY 288. Fee.

CA 290  Special Topics -  1 TO 3 cr
A variable-topics course treating communication concepts and topics relevant to the disciplines. May be repeated once when course content changes for a total of six credit hours. Fee.

CA 300  Fnds of Comm Research  3 cr
Introduction to research foundations in the field of communication. Includes historical, critical, descriptive, and experimental methods. Computer fee.

CA 301  Skepticism in Media-Philosophy  3 cr
This course examines some of the most fundamental questions about human knowledge, belief and rationality and compares the treatment of such issues in philosophical discussions and contemporary media, especially film. Identical with PHL 301. Credit cannot be received for both CA 301 and PHL 301.
Pre-requisite: EH 102 Minimum Grade of D or EH 103 Minimum Grade of D.

CA 310  Persuasion  3 cr
Basic theories and techniques of persuasion and their application to typical communication situations and problems in today's society. Fee.

CA 315  Gender and Communication  3 cr
Examines communication between genders by exploring theoretical perspectives used of gender development, gender socialization, interactions and stereotypes. Includes discussions involving the lesbian, gay, bisexual, transgender and LGBTQ community.

CA 320  Film and TV Scriptwriting-W  3 cr
Students will learn basic dramatic structure, especially as it pertains to film and television. Student will become proficient in the screenplay format through the use of professional scriptwriting software. Students will leave the class with a short-film script which will be ready for production. Fee.
Pre-requisite: EH 101 Minimum Grade of C and CA 220 and PHL 301. Identical with PHL 301. Credit cannot be received for both CA 320 and PHL 301.

CA 321  Media Planning  3 cr
Students develop an understanding of planning traditional and digital media as a part of an integrated brand communication strategy. The course concentrates specifically on how media work together strategically to shape consumers' brand experiences across media platforms. Fee.
Pre-requisite: CA 220 Minimum Grade of C and CA 224 Minimum Grade of C.

CA 322  Creative Strategy - W  3 cr
Creative Strategy focuses on the theoretical foundations of creative strategic thinking in advertising and visual communication. The course concentrates on writing effective copy for traditional and digital media as part of a strategic brand communication campaign. Computer Fee.
Pre-requisite: CA 224 Minimum Grade of D.
CA 323  Sports PR  3 cr
Study of the role of public relations in sports, particularly as it relates to strategic communication. Discussion topics include the sports organization - media relationship, organizational media (traditional and digital), the legal and ethical dimensions of sport, and crisis communication. Fee. Pre-requisite: CA 224 Minimum Grade of D.

CA 324  Strategic Writing - W  3 cr
Strategic Writing focuses on understanding writing styles and formats of different communication media for maximum message impact. This involves crafting written messages for specific target audiences, selecting appropriate media and the adaptation of writing style and tone. Emphasis is placed on strategic, concise and effective writing. Computer Fee. Pre-requisite: CA 220 Minimum Grade of C and CA 224 Minimum Grade of D.

CA 325  Applied Comm Workshop  3 cr
A workshop stressing practical applications of the principles and theories of communication disciplines to those settings and problems in the world of work that are of special interest to the students enrolled. Fee.

CA 326  P.R. & Non-Profit Fundraising  3 cr
Public Relations and Non-Profit Fundraising provides an understanding of how organizations use public relations to build mutually beneficial relationships between organizations and their public to achieve their philanthropy goals through effective fundraising. Pre-requisite: CA 224 Minimum Grade of D.

CA 327  International Media  3 cr
This course examines the international media systems and the rights and responsibilities of journalists in covering issues in the new and developing social media landscape. In this course, we will explore both the theoretical foundations and practical implications of the international media systems.

CA 330  Intercultural Communication-W  3 cr
CA 330 is the study of the theory and practice of intercultural communication. This course's goal is to focus on global dialogues within critical organizational incidents. This course has three objectives: to explain the culture-based situational conflict model; to integrate theory and practice in the discussion of organizational conflict; and to provide an excellent opportunity for writing within the organizational communication content areas.

CA 340  Video Field Production  3 cr
The focus of this course is on production techniques, processes and skills. Analysis of television production as a communication process, program formats, production equipment and facilities, production and unit management and the role of the director. Fee. Pre-requisite: CA 101 Minimum Grade of D.

CA 341  Intermediate TV Studio Prod  3 cr
This course will give students practical grounding in the concepts and technology associated with the production of studio-based news and information programs. Technology Fee. Pre-requisite: CA 241 Minimum Grade of D.

CA 343  Film History  3 cr
An examination of the development of motion pictures from 1893 to the present. Films representing major periods, movements, and styles will be examined. Fee.

CA 344  Film and TV Genres  3 cr
A study of the formation and evolution of film and television genres. Selected genres will be studied in terms of their structure and cultural history. Fee.

CA 350  Broadcast News  3 cr
Course includes both writing in the broadcast media and exploring broadcast news operations. Assignments include writing broadcast news stories and evaluating broadcast news operations. Lectures cover the characteristics of broadcast news, news styles, news policy, and ethics and responsibility in broadcast news. Fee. Co-requisite: CA 353. Pre-requisite: CA 220 Minimum Grade of C.

CA 353  Broadcast News Editing  3 cr
This course focuses on the post-production for television news. Students will edit footage they shot for CA 350, learning to weave together b-roll, interview, natural sound, and voice-over to create a compelling narrative. Co-requisite: CA 353. Pre-requisite: CA 220 Minimum Grade of C. CA 220 can be taken concurrently with this course.

CA 354  Media and Politics  3 cr
Examining the role and influence of mass media in politics, exploring how and why the media contribute to and shape democracy. Pre-requisite: (PSC 130 Minimum Grade of C or CA 100 Minimum Grade of C or CA 101 Minimum Grade of C).

CA 356  Digital Cinema Management  3 cr
A survey of the legal, budgeting, revenue stream and distribution issues associated with film and television production. Topics include preproduction and production management, script breakdown, scheduling, and above and below the line talent. Computer Fee.

CA 357  Basic Film Production  3 cr
This course will teach the basics of planning, scripting, shooting and editing short films in the 16mm format. Technology Fee. Pre-requisite: CA 240 Minimum Grade of D and CA 340 Minimum Grade of D.
CA 358  Digit Comp, Animation & Graph  3 cr
This course will introduce the basics of digital special-effects, two-dimensional computer animation and two- and three-dimensional video graphics. Technology Fee. Pre-requisite: CA 240 Minimum Grade of D and CA 340 Minimum Grade of D.

CA 360  Comm and the Internet  3 cr
Intensive study and application of rhetorical and communication theories to understanding problems that arise as the Internet and the World Wide Web begin to render fixed media-based communication obsolete. Implications for advertising, journalism, organizational record keeping and management, interpersonal communication, training, entertainment, etc. Computer fee.

CA 366  Visual Info Electron Com Media  3 cr
Rhetorical issues in the design of Internet and World Wide Web materials. Focus on how motion, color, and other visual elements compete for audience attention; how rhetorical theory, learning theory, and communication theory inform the myriad decisions involved in visual presentation. This course will address these rhetorical issues from the creator's and user's viewpoint. Computer fee.

CA 370  Interm Reporting-Writing-W  3 cr
Study of intermediate skills needed for reporting, evaluating, and writing news stories, with particular attention given to the reporting of public affairs issues. Vanguard practicum. Fee. Pre-requisite: (CA 220 Minimum Grade of C and EH 102 Minimum Grade of C).

CA 371  Branding & Visual Messages  3 cr
The focus of this course examines the understanding of how to build, measure and manage a brand from visual conception. Emphasis is on the visual aspects of brand management from the creative power of visual branding through research and visual strategy development and theories. Advanced areas of digital and/or print media are used in creative development and execution of persuasive and effective messages. Computer Fee. Pre-requisite: CA 271 Minimum Grade of D.

CA 382  Photojournalism  3 cr
The study of basic photography and the principles of still photography journalism, with particular emphasis on camera use, photo processing, visual aesthetics, and journalistic story-telling. Computer fee.

CA 383  Digital Photography  3 cr
Through this course students will develop a general understanding of the ability of photographic images to communicate concepts, ideas and emotion through creative photography. It will be a hands-on course, in which students will use digital cameras to produce photographs that achieve the desired message. Computer Fee.

CA 384  Account Management  3 cr
Students learn the account service function in an advertising agency. They develop an understanding of the account manager's role by focusing on the inter-relationships between the account manager, creative, media planners, and other agency specialists. Requires Junior or Senior standing. Computer fee. Pre-requisite: CA 224 Minimum Grade of D.

CA 387  Magazine & Feature Writing-W  3 cr
A writing and reporting course focusing on advanced skills, including alternative structures for news stories. Designed to give students a broad overview of the magazine industry and its current trends with emphasis on newspaper and magazine feature writing. Fee. Pre-requisite: (CA 220 Minimum Grade of C and EH 102 Minimum Grade of C).

CA 390  Special Topics -  1 TO 3 cr
An advanced variable-topic course treating communication concepts and topics relevant to the discipline. May be repeated twice for up to six hours credit. Fee.

CA 394  Dir St -  1 TO 3 cr
Directed individual study of literature in an area of need and interest to the student. May be repeated for a maximum of six hours credit. Fee.

CA 410  Advanced Persuasion  3 cr
An advanced examination of an application of persuasive techniques in communication situations and contexts (e.g. field, laboratory, interpersonal, small group, nonverbal, mass communication). Fee.

CA 411  Relational Communication  3 cr
An examination of issues, theories, research and skills that apply to managing and nurturing close relationships. Emphasis is given to applying course concepts to promote relational growth and manage interpersonal conflict through interaction in relationships. Fee.

CA 422  Rhetorical Theory  3 cr
A broad survey of the Western rhetorical tradition designed to give students a working knowledge of rhetoric and its historical and contemporary influence on communicative events and perspectives. Fee.
CA 424  Rhetorical Criticism - W  3 cr
This course is designed to introduce students to the process of rhetorical analysis. Through criticism of communication artifacts, students learn to identify key elements of the rhetorical process and to develop critical thinking, writing, and viewing skills. The course prepares students to interpret, understand, analyze, and critique communication in diverse contexts including speeches, advertisements, interpersonal conversations, films, and works of art to name a few. Culminating experience for communication studies students. Fee.
Pre-requisite: (ACT English 27 or SAT Critical Reading 610 or University - EH101 Exempt P or (EH 101 Minimum Grade of C or EH 110 Minimum Grade of D or EH 190 Minimum Grade of D or USA 010 Minimum Grade of S) ) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CA 425  Issues in Rhetoric  3 cr
Close examination of a single contemporary rhetorical phenomenon. Topics will rotate based upon disciplinary relevance and student needs. May be repeated once for credit when content varies for a maximum of six credits.

CA 430  Adv Organizational Communicatin  3 cr
Study and application of organizational and communication theory of assessment of organizational and communication needs. Critical analysis of intervention programs and strategies. Fee.
Pre-requisite: CA 230 Minimum Grade of D.

CA 435  Comm Training-Dev Programs - W  3 cr
Review and analysis of communication training and development programs designed to solve communication problems in groups and organizations. Students will develop and present a training or development program. Computer fee.

CA 440  Adv Video Field Production  3 cr
Theory and practice of television production. Concentrates on exploring and understanding the concepts and technology involved in advanced video production for a variety of applications including commercial, corporate, and community outlets. Culminating experience for digital cinema & television students. Fee.
Pre-requisite: CA 340 Minimum Grade of D.

CA 441  Adv TV Studio Production  3 cr
Advanced theory and practice of television production. Concentrates on exploring the advanced uses of television in varied contexts, including corporate, community, and broadcasting applications. Fee
Pre-requisite: CA 341 Minimum Grade of D.

CA 445  Ethics-Social Respons Comm  3 cr
Study of social responsibility and ethics in communication. Acquaints student with ethical standards and expectations society has for communicators. Capstone Course. Requires Junior or Senior standing. Fee.

CA 449  Mass Media Social Effects  3 cr
Examination of the interaction between mass communication and American society. Current research literature in the field will be analyzed and methods of improving the system will be discussed. Fee.
Pre-requisite: CA 101 Minimum Grade of D.

CA 450  Adv Broadcast News  3 cr
This is an advanced course in broadcast news reporting and production. Students will have hands-on practice in a newsroom situation. Fee.
Pre-requisite: CA 350 Minimum Grade of C.

CA 452  The News Documentary  3 cr
This course gives students experience in producing short documentaries for the media. Students will produce their own documentary with the intent of entering the finished product in student competitions. Culminating experience for broadcast journalism students. Fee.
Pre-requisite: CA 450 Minimum Grade of C.

CA 453  Campaign and Election Comm  3 cr
Provides students with a broad overview of political communication from both historical and contemporary perspectives so students may understand how the subject has evolved over time to become a unique field of theoretical and research interest. Special attention is paid to campaigns and elections, agenda-setting research, and media power. The major focus is on the United States. Fee.
Pre-requisite: CA 100 Minimum Grade of C or CA 101 Minimum Grade of C or PSC 130 Minimum Grade of C.

CA 454  Newscast Practicum  3 cr
This course is designed to give upper level Broadcast Journalism students hands-on experience creating a weekly television news program. Students will gain additional experience in news production and TV news programming. Students will report, produce and announce the news on the Jag-TV station.
Pre-requisite: CA 350 Minimum Grade of D and CA 450 Minimum Grade of C. CA 450 can be taken concurrently with this course.

CA 455  Law of Communication  3 cr
Study of the broad application of principles of law to American Communication, including study of free speech, freedom of information, mass media law and regulation including libel, copyright, and right of privacy. Fee.

CA 456  Social Media and Politics  3 cr
An examination of how and why digital information technologies are used by citizens, activists, journalists, and politicians to shape and influence individual's political participation and engagement and public policy and society. Pre-requisite: (PSC 130 or CA 100 or CA 101 ).
CA 460  Comm. Technology Systems  3 cr
An examination of the new communication technology systems with an emphasis on how they reconfigure patterns of communication organizations, production, storage, and dissemination. The role of communication technology systems today and tomorrow, and implications for organizational, local, national, and international contexts will be studied. Computer fee.

CA 470  Digital Media & Analytics  3 cr
Digital media play a key role in campaigns and the daily work of marketing, advertising and public relations professionals. This course will integrate the growing research in the area with the digital media practices in these industries. It will focus on the three underpinnings of a successful digital media strategy: Listening, engagement, and analytics.
Pre-requisite: EH 102 Minimum Grade of C or EH 105

CA 471  Prof & Creative Portfolio  3 cr
This course focuses on how to conceptualize and develop a professional and creative portfolio by creating a campaign spanning digital mass communication. Students examine the advertising creative industry from the perspectives of the media designer, freelancer, and entrepreneur while centering on the tools, techniques, principles, methods, strategies and practical skills needed to build an inspired portfolio. Computer Fee.
Pre-requisite: CA 224 Minimum Grade of C and CA 300 Minimum Grade of C and CA 321 Minimum Grade of C.

CA 472  Enterprise Reporting  3 cr
Advanced study of news reporting and presentation techniques including investigative reporting. Students concentrating in print will produce a professional-quality print project. Culminating experience for print journalism students who take this course. Computer fee.
Pre-requisite: CA 370 Minimum Grade of D. CA 370 can be taken concurrently with this course.

CA 474  Consumer Sales Promotion  3 cr
This course explores the role, function, planning and implementation of sales promotion in the brand communication process. Topics include contests, coupons, price discounts, sampling, and sweepstakes as well as the legal regulation of sales promotions. Computer Fee.
Pre-requisite: CA 224 Minimum Grade of D.

CA 475  Comm-Group Processes  3 cr
The nature of small group processes. Leadership, communication, and decision making in small groups. Fee.

CA 481  Opinion Writing - W  3 cr
An examination of the editorial and other opinion and persuasive communications used by the print and electronic media. Computer fee.
Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C and CA 220 Minimum Grade of C.

CA 482  Multi-Media Story Telling  3 cr
This course will teach the basics of creating a professional-quality journalism story for the Web using multimedia techniques. We also explore how multimedia and interactivity are changing the communication experience for communication practitioners as well as for their audiences. Culminating experience for print journalism students who take this course. Technology Fee.
Pre-requisite: CA 260 Minimum Grade of D and CA 350 Minimum Grade of D and CA 382 Minimum Grade of D. CA 260 and CA 350 and CA 382 can be taken concurrently with this course.

CA 485  Cases in Strategic Comm  3 cr
Students study how strategic communication campaigns in the advertising and public relations fields have developed opportunities, strengthen relationships and solved problems through research, planning, communication, and evaluation. Using the case study approach, cases focus on strategic management, planning, decision-making and policy formation of the integration of strategies and tactics. Fee.
Pre-requisite: CA 300 Minimum Grade of D and CA 324 Minimum Grade of D. CA 300 and CA 324 can be taken concurrently with this course.

CA 486  Strategic Campaigns  3 cr
Students apply strategies and techniques in executing a professional strategic communication campaign for a corporate, nonprofit, association and/or government client. This involves research, audience analysis, objectives, tactics, planning, messaging, media strategies, communication, creative development, budgeting and evaluation. Fee.
Pre-requisite: CA 321 Minimum Grade of D and CA 271 Minimum Grade of D and CA 485 Minimum Grade of D.

CA 487  Tideline Agency  3 cr
This course allows students to execute strategic communication plans and creative materials for multimedia advertising and public relations campaigns for select clients in an agency setting. Students will learn and apply basic concepts involved in a working ad agency startup. Requires a minimum overall GPA of 3.0 and instructor permission. Technology fee.

CA 488  Screenwriting for Television-W  3 cr
Craft talks and guided workshops on how to create a television series and write the pilot episode. Same as EH 488.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CA 490  Special Topics  1 TO 3 cr
An advanced variable-topic course treating communication concepts and topics relevant to the discipline. May be repeated twice for up to six hours credit. Fee.
CA 492 Seminar - 1 TO 3 cr
An investigation of advanced topics and concepts of communication. Topics will rotate based upon disciplinary relevance and student need. May be repeated once for credit when content varies for a maximum of six credit hours. Fee.

CA 494 Directed Studies 1 TO 3 cr
Investigation of questions of special interest in communication. May be repeated to a maximum of six semester hours, provided no repetition of subject matter occurs. Students are required to file a description of their goals and objectives for their study. This description is to be specific so that it can serve in place of a syllabus for this course. Fee.

CA 496 Prof Studies - Internship 1 TO 3 cr
On-the-job experience in a selected communication area related to potential career selection. Supervision by communication advisor and off-campus agency required. The Internship Program may be repeated for up to six credits. Requires prior approval of internship coordinator and student's advisor. Internship candidates must have at least a 2.5 overall GPA and at least a 2.75 major GPA. Fee.

CA 499 Senior Honors Project - H 3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of Communication study, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to six credit hours. Fee.

CA 501 Qualitative Research Methods 3 cr
An in-depth study of a variety of qualitative research methodologies and their use in communication research, along with study of the use and practical applications of mixed-method and triangulation research methods.

CA 502 Communication Theory 3 cr
A survey of the theoretical perspectives that guide the study of communication. Competing and complementary epistemological frameworks will be compared. Fee.

CA 503 Quantitative Research Methods 3 cr
An investigation of research used in the study of communication; in-depth study of a variety of quantitative methodologies used in basic and applied communication research settings; study of statistical applications and practical interpretations.

CA 510 Persuasion in Professional Com 3 cr
Advanced analysis and development of persuasive messages and argumentative strategies. Ethical responsibilities of the message sender will also be addressed. Fee.

CA 511 Theor Found in Interper Comm 3 cr
Review of the interpersonal communication research literature with respect to the process of mutual adaptation and negotiation. The social and psychological processes constraining and organizing interpersonal communication will be studied. Topics include verbal and nonverbal codes, message production and interpretation, conversation management, relationship definition, and interpersonal communication competence. Fee.

CA 522 Rhetorical Strategy Prof Comm 3 cr
A broad survey of the Western rhetorical tradition designed to give students a working knowledge of rhetoric and its historical and contemporary influence on communicative events and perspectives. Fee.

CA 524 Rhetorical Criticism 3 cr
This course is designed to introduce students to the process of rhetorical analysis. Through criticism of communication artifacts, students learn to identify key elements of the rhetorical process and to develop critical thinking, writing, and viewing skills. This course prepares students to interpret, understand, analyze, and critique communication in diverse contexts including speeches, advertisements, interpersonal conversations, films, and works of art to name a few. Fee.

CA 525 Issues in Rhetoric 3 cr
Close examination of a single contemporary rhetorical phenomenon. Topics will rotate based upon disciplinary relevance and student needs. May be repeated once for credit when content varies for a maximum of six credits. Fee.

CA 530 Analysis of Comm in Orgs. 3 cr
Analysis of interpersonal, dyadic, group, and organization-wide communication events that occur in organizational settings. Attention will be directed to the network of messages that occur in organizations and the organizational change that occurs when a message system is disrupted or changed. Organizational communication research methodologies will be introduced. Fee.

CA 535 Comm. Training & Develop Prog. 3 cr
Review and analysis of communication training and development programs designed to solve communication problems in groups and organizations. Students will develop and present a training or development program. Fee.

CA 542 Moving Image Structure 3 cr
An analysis of moving-image form and process makers who supervise, produce, and/or evaluate electronic and/or film media for organizations. Theories of narrative and of moving-image syntax provide principles for structuring media content and managing the production process. Fee.

CA 545 Communication Ethics 3 cr
Advanced analysis and interaction between organizations and the social institutions of American society. Study of the literature and communication ethics and social responsibility. Fee.
CA 549  Media Effects  3 cr
A study of the role of corporate and public communication in the American social structure, including mass media extensions and impact upon institutions. Consideration of historical, legal, social, and economic issues. Fee.

CA 555  Corp. and Public Comm. Law  3 cr
A survey of the law as it deals with public communication. The course provides a working knowledge of First Amendment theory, copyright, trademark, advertising, contracts, access and administrative laws as they relate to the public relations environment. Fee.

CA 560  Social Media Management  3 cr
This course explores the roles, scopes, functions and impact of social media in communication, society, and business. Social media have caused a paradigm shift in the communication landscape. This course will teach students how to critically examine the dynamics of social media in different areas of global communication. We will investigate theoretical and research phenomena of social media management.

CA 561  Teaching & Professionalism  3 cr
This course will explore the practice of teaching and learning. In this course, the primary goal is to help students to make the transition from student to future colleague, thus there will also be a heavy emphasis on professionalism in the communication studies discipline.

CA 570  Audience Dynamics  3 cr
CA 570 explores how audience dynamics (attitudes, feelings, beliefs, experiences, values, needs, and behavior) influence message development in public relations and advertising campaigns. Fee.

CA 575  Investigation of Group Comm.  3 cr
An in-depth analysis of group communication theories. Topics to be covered include decision making, conflict, conformity, leadership, and observation methods. Fee.

CA 576  Historical Perspectives of SC  3 cr
An in-depth study of the field of strategic communication focusing specifically on the cultural history of advertising and public relations, as well as the contemporary issues, problems, and challenges facing these industries.

CA 585  Reputation Management  3 cr
CA 585 is designed to provide graduate students with a working knowledge of public relations crisis management. Course material focuses on actions to take and actions to avoid in handling a crisis situation from a public relations perspective, and how to work with management, employees, affected publics and the media. Fee.

CA 587  Tideline Student Agency  3 cr
This course allows graduate students to create and execute advertising and public relations strategies in an agency setting for select clients. Graduate students will have a supervisory role on assigned projects.

CA 590  Sp Top in Comm - 1 TO 3 cr
A detailed examination of selected topics in communication theory. Topic announced prior to registration. Course may be repeated once when subject matter varies. Fee.

CA 592  Seminar in Comm Theory  1 TO 3 cr
Departmental seminar investigating a selected field of communication theory through in-depth evaluation of its accompanying body of literature. Topic announced prior to registration. Course may be repeated once when subject matter varies. Fee.
Pre-requisite: CA 500. CA 500 can be taken concurrently with this course.

CA 594  Dir St in Communication - 1 TO 3 cr
Independent research in field, laboratory, or library under the direction of a member of the graduate faculty.

CA 596  Professional Studies - Intern  1 TO 3 cr
This course offers on-the-job experience related to student's course work in the Master of Arts in Communication program. Before enrolling in CA 596 students will consult with the Communication Department Graduate Coordinator regarding internship opportunities and eligibility.

CA 599  Thesis  1 TO 3 cr
Students work independently to plan, research, and write results of an original research project. Students must have completed 24 hours of course work before enrolling in this course. Six credit hours of this course is required to complete the MA Thesis Option Degree in Communication. However, no more than 3 credit hours may be taken in any one semester without the expressed permission of the graduate faculty.

Communication Scs Disord (CSD) (CSD)

CSD 600  Doctoral Colloquium  1 cr
This seminar is designed to provide a forum for presentation and discussion of faculty and doctoral student research projects. Topics may also include: teaching and learning styles and grant writing. Must be repeated until candidacy is achieved.

CSD 650  Research Methods in CSD  3 cr
Current methods and strategies used in research of communication processes.

CSD 651  Speech and Hearing Sci & Inst  3 cr
Advanced review of the process of speech production, acoustic phonetics, coarticulation, and speech perception with emphasis on laboratory research methods.

CSD 662  Studies in Speech Science  3 cr
Basic and advanced principles of the acoustics and physiology of speech production.
CSD 663  Studies in Hearing Science  3 cr
Advanced study of psychological and physiological acoustics.

CSD 664  Studies in Language Science  3 cr
Intensive study of the theoretical foundations underlying syntax, semantics, pragmatics, phonology, psycholinguistics, neurolinguistics, sociolinguistics, and applied pragmatics.

CSD 665  Studies in Commun Neuroscience  3 cr
Advanced study of neurosciences as they relate to processes and pathologies of human communication, including functional neuroanatomy and clinical neurology. Interdisciplinary research paradigms will also be discussed.

CSD 672  Laboratory in Speech Science  1 cr
Laboratory experiences in speech science.

CSD 673  Laboratory in Hearing Science  1 cr
Laboratory experiences in hearing science.

CSD 674  Laboratory in Language Science  1 cr
Laboratory experiences in language science.

CSD 675  Lab in Communic Neuroscience  1 cr
Laboratory experiences in communication neuroscience.

CSD 682  Seminar in Speech Science  3 cr
Intensive review of current research in speech production. May include normal and disordered processes. Topics may include acoustic phonetics, physiological phonetics, prosody, production and perception, fluency and voice. May be repeated.

CSD 683  Seminar in Hearing Science  3 cr
Intensive literature review of current research and research in hearing and hearing disorders. Topics may include cochlear mechanics, complex signal processing, electrophysiological measures, development of hearing, hearing in the elderly, and hearing in other species. May be repeated.

CSD 684  Seminar in Language Science  3 cr
Intensive literature review of current methods, problems, and strategies in language research. Topics may include normal language acquisition, language-learning disorders, clinical aphasiology, and neurolinguistics. May be repeated.

CSD 694  Directed Study -  1 TO 3 cr
Independent study under the direction of a graduate faculty member. May be repeated. Requires special permission.

CSD 695  Directed Research  1 TO 3 cr
Research under the direction of a graduate faculty member. May be repeated. Requires special permission.

CSD 696  Profess Pract - Administration  2 cr
Supervised professional experiences in administration under the guidance of faculty mentors. May be repeated.

CSD 697  Profess Pract-Clin Supervision  2 cr
Supervised professional experiences in clinical teaching under the guidance of faculty mentors. May be repeated.

CSD 698  Profess Practicum - Teaching  1 TO 5 cr
Supervised professional experiences in academic teaching under the guidance of faculty mentors. May be repeated.

CSD 799  Dissertation Research  1 TO 9 cr
Independent research under the direction of a graduate faculty member. May be repeated. Requires special permission.

**Computer Science (CSC) (CSC)**

CSC 108  Introduction to Programming  2 cr
Problem-solving and pre-programming skills developed using hands-on activities in preparation for the introductory programming course.
Pre-requisite: MA 112 Minimum Grade of C or ACT Math 22 or MyMathTest 070.

CSC 120  Prob Solv and Prog Concepts  4 cr
An introduction to the design of algorithms and their implementation in a high-level programming language. Topics include: problem solving strategies, programming concepts, programming environment, control structures, methods, arrays, searching, sorting, object-oriented programming, and file input/output.
Pre-requisite: (MA 113 Minimum Grade of C or MA 172 Minimum Grade of C) or (MA 115 Minimum Grade of C or MA 121 Minimum Grade of C) or (MA 125 Minimum Grade of C or MA 132 Minimum Grade of C) or ACT Math 27 or MyMathTest 090.

CSC 121  Prob Solv and Prog Concepts II  4 cr
Continuation of CSC 120. Topics include: object-oriented programming concepts, abstract data types, graphical user interfaces and event-driven programming, exception handling, text and binary file I/O, and an overview of dynamic data structures.
Pre-requisite: CSC 120 Minimum Grade of C or CIS 120 Minimum Grade of C.

CSC 190  CSC Special Topics -  1 cr
Selected topics in computer science. Prerequisite: Permission of the CSC coordinator.

CSC 228  Digital Logic Computer Arch  3 cr
Topics include: Boolean algebra, minimization techniques, combinatorial and sequential circuit analysis, memory organization, microprocessor concepts, and CPU architecture.
Pre-requisite: CSC 120 Minimum Grade of C.
CSC 231  Intro Data Structures Algs  4 cr
The course will cover techniques to organize and access collections of data, definition, implementation, and use of Classes and Abstract Data Types(ADT). Topics include: stacks, queues, heaps, search trees, recursion, algorithmic complexity, advance searching and sorting algorithms, and graphs and their application to problems.
Pre-requisite: CSC 120 Minimum Grade of C or CIS 210 Minimum Grade of C.

CSC 311  Networking and Communications  3 cr
An introduction to computer networks. Topics include: data transmission, network architectures, file compression algorithms, communication devices and protocols, network routing and flow algorithms.
Pre-requisite: CSC 231 Minimum Grade of C or CSC 230 Minimum Grade of C. CSC 230 can be taken concurrently with this course.

CSC 320  Computer Org-Architect  3 cr
An introduction to computer organization using a top down approach from system component to the register level, internal representation of data, general assembly and linking concepts, addressing modes, and introduction to a specific processor, its architecture and operating system.
Pre-requisite: CSC 228 Minimum Grade of C and CSC 230 Minimum Grade of C or CSC 231 Minimum Grade of C.

CSC 322  Operating Systems  3 cr
This course covers the development of operating systems that control computing systems. Topics include: file systems, process management, scheduling, memory management (real and virtual), security, and concurrency. Case studies of operating systems are examined.
Pre-requisite: CSC 231 Minimum Grade of C.

CSC 324  Database Concepts  3 cr
Introduction to database design and implementation. Aspects of data modeling, database design theory, storage, indexing, and database application development. Entity-relationship model, relational data model, schema refinement, normal forms, file organizations, index structures, and embedded SQL application development.
Pre-requisite: CSC 231 Minimum Grade of C.

CSC 331  Software Engineering Prin - W  3 cr
Models, techniques, and tools used in project management. Topics include: software development process, task scheduling, estimation and progress measurement. Coordination of development teams. Standards, testing plans, configuration management, metrics and use of CASE tools, system delivery and maintenance strategies.
Pre-requisite: (CSC 231 Minimum Grade of C or CSC 230 Minimum Grade of C or CIS 230 Minimum Grade of C) and CA 275 Minimum Grade of C. CA 275 can be taken concurrently with this course.

CSC 332  Adv Data Structures and Algs  3 cr
Techniques for the design and analysis of efficient algorithms, emphasizing methods useful in practice. Topics covered include: mathematical foundations; all five asymptotic notations; analytic, empirical, and qualitative evaluation techniques; sorting algorithms; balanced trees (2-3-4 trees and red-black trees); dynamic programming; and NP-completeness.
Pre-requisite: CSC 231 and MA 267.

CSC 333  Prog Language Theory  3 cr
Formal examination of programming languages. Formal Language concepts including syntax and basic grammars are studied. Language features such as data types and structures, control structures, and data flow are examined. The run-time environment and the process of interpretation/compilation are covered. Interpreter and compilation techniques are introduced.
Pre-requisite: CSC 331 Minimum Grade of C.

CSC 399  Conc and Distributed Comp  3 cr
This course focuses on security issues in concurrent and distributed systems. Security features in the current advent of cloud computing are vital. Example topics include secure multi-threading, agent-based security, security policy composition, secure compartmentalization and more.
Pre-requisite: CSC 311 Minimum Grade of C and CSC 322 Minimum Grade of C.

CSC 404  Web Tech & Knowledge Modeling  3 cr
The students will learn knowledge service design based on Web technologies and will develop a knowledge service project during the course. The course will highlight the features of different Web Services Technologies and introduce various Scripting Languages, provide an up-to-date survey of developments in Web Services Technologies, and Knowledge Modeling.
Pre-requisite: (CSC 320 Minimum Grade of C or CSC 331 Minimum Grade of C).

CSC 410  Compiler Design-Construction  3 cr
Lexical analysis, syntactic analysis, intermediate code generation, object code generation, optimization, memory use, generators for scanners and parsers.
Pre-requisite: CSC 332 Minimum Grade of C and CSC 333 Minimum Grade of C and CSC 320 Minimum Grade of C or EE 264 Minimum Grade of C.

CSC 411  Comm - Network Analysis  3 cr
Data communications and computer networks. An in-depth treatment of network architectures and protocols for both WANS and LANS. Topics include: network routing and flow algorithms, internet working, and distributed systems.
Pre-requisite: CSC 311 Minimum Grade of C and (CSC 322 Minimum Grade of C or CIS 322 Minimum Grade of C).
CSC 412  Real-Time Software Systems  3 cr
Design and implementation of software for real-time computer systems. Survey of typical real-time systems; techniques for code-conversion, error checking, and transmission monitoring.
Pre-requisite: CSC 311 Minimum Grade of C and CSC 322 Minimum Grade of C and CSC 332 Minimum Grade of C. CSC 322 can be taken concurrently with this course.

CSC 413  Computer Graphics  3 cr
An in-depth study of hardware and software techniques used in computer graphics. Study of display and entry devices, including refresh, storage, and raster scan topics. Software techniques will include display files, windowing, clipping, two and three-dimensional transformations, and hidden-surface removal.
Pre-requisite: (CSC 231 Minimum Grade of C) and (MA 237 Minimum Grade of C or MA 227 Minimum Grade of C).

CSC 414  Modeling and Simulation  3 cr
Analytic and simulation models developed using deterministic and stochastic techniques. Topics include: event-driven simulations, queuing theory, Markov processes, and dynamical systems. "Real World" project required.
Pre-requisite: (CSC 230 Minimum Grade of C or CIS 230 Minimum Grade of C) and (MA 126 Minimum Grade of C or MA 233 Minimum Grade of C) and (ST 310 Minimum Grade of C or ST 275 Minimum Grade of C) or ST 315 Minimum Grade of C or ST 320 Minimum Grade of C.

CSC 415  Numerical Analysis  3 cr
Mathematical preliminaries, solving linear systems numerical solution of ordinary and partial differential equations.
Pre-requisite: (CSC 230 Minimum Grade of C or CIS 230 Minimum Grade of C) and (MA 126 Minimum Grade of C or MA 233 Minimum Grade of C) and (ST 310 Minimum Grade of C or MA 233 Minimum Grade of C).

CSC 416  AI Theory and Programming  3 cr
Introduction to basic concepts, implementation techniques, and philosophies of artificial intelligence and intelligent systems. Introduction to expert systems, fuzzy logic systems, neural networks, and techniques for artificial intelligence programming. The fundamentals of an AI programming language (LISP or PROLOG) will be presented. The language will then be used to solve problems in typical AI applications.
Pre-requisite: CSC 332 Minimum Grade of C or CSC 230 Minimum Grade of C or CIS 230 Minimum Grade of C.

CSC 417  Computer Game Development  3 cr
Introduction to computer game development, including a variety of related topics. The course will be driven by research/technical paper discussions, student presentations and projects. The direction of the course will be guided to some extent by student interest.
Pre-requisite: CSC 331 Minimum Grade of C or EE 368 Minimum Grade of C.

CSC 418  Adv Game & Simulation Dev  3 cr
This course will cover advance topics related to the development of game and simulation software. Topics include game physics, collision techniques, game mechanics, level design, artificial intelligence, and security. Students will design and implement a game or simulation program that includes elements of artificial intelligence.
Pre-requisite: CSC 417 Minimum Grade of C.

CSC 426  Data Mining  3 cr
This course provides an in-depth study of data mining. Course content includes data preparation, feature selection, pattern mining, classification, clustering, and sequence mining. New research areas in data mining will also be discussed.
Pre-requisite: CSC 332 Minimum Grade of C.

CSC 428  Introduction to Bioinformatics  3 cr
Students in this course will study algorithms pertaining to bioinformatics (e.g. sequence alignment, biological database search, and phylogeny reconstruction); gain hands-on experience using bioinformatics tools; and understand the interaction of computer science and modern biology within the context of data-driven knowledge discovery.
Pre-requisite: CSC 230 Minimum Grade of C.

CSC 433  Adv AI Theory and Programming  3 cr
A study of advanced AI theory and implementation. Topics include neural networks, probability learning, and a variety of related topics. A programming language (LISP or R) will be utilized to solve complex industry problems associated with AI applications.
Pre-requisite: CSC 416 Minimum Grade of C.

CSC 434  Form Lang - Automata Theory  3 cr
Mathematical preliminaries, languages, context-free grammars, parsing, normal forms, finite automata, regular languages, pushdown automata, Turing machines.
Pre-requisite: (CSC 333 Minimum Grade of C or CSC 340 Minimum Grade of C).

CSC 440  Secure Software Engineering  3 cr
The objective of this course is to enhance the security of software by introducing sound security principles that should be incorporated into the software development process. Students will learn a risk management framework and best practices for software security including code reviews, architectural risk analysis, penetration testing, risk-based security test, abuse cases, security requirements, and security operations. Students will also learn common flaws that lead to exploitation and be able to identify and mitigate such errors in practice. Out of class labs and exercises reinforce concepts presented in class.
Pre-requisite: CSC 331 Minimum Grade of C and CSC 320 Minimum Grade of C or EE 264 Minimum Grade of C. CSC 320 can be taken concurrently with this course.
CSC 450  Surreptitious Software  3 cr
Students in this course will learn about algorithms for software protection and learn how to use tools for program transformation. Specific topics include obfuscation, watermarking, tamperproofing, birthmarking, and hardware protection. Programming projects will be required in several different languages and course activities will involve preparing student-led lectures, working on programming projects, and writing reports.
Pre-requisite: CSC 440 Minimum Grade of C.

CSC 457  Data Warehousing  3 cr
This course focuses on the design, development and usage of data warehouses. Course content includes dimensional modeling, ETL processes, physical design, and analytical processing. New research areas related to data warehousing technology will also be discussed.
Pre-requisite: CIS 324 Minimum Grade of C or CSC 324 Minimum Grade of C.

CSC 460  Security of HW Implementations  3 cr
The objective of this course is for the student to build upon logic and architectural principles as applied to hardware designs. The key theme of the course is the security impacts of hardware design implementations.
Pre-requisite: (CSC 320 Minimum Grade of C or EE 264 Minimum Grade of C).

CSC 485  Cyber-Physical Security  3 cr
This course focuses on the Security of Cyber-Physical Systems (CPS) and Internet of Things (IoT) that go beyond topics commonly considered in Computer and Network Security. This course aims to prepare participants for the cutting edge research undergoing in both areas. The successful participation in this course will require reading number of research papers, presenting learned material, active participation in in-class discussions, and successful accomplishment of a small research project.
Pre-requisite: CSC 311 Minimum Grade of C and CSC 322 Minimum Grade of C.

CSC 490  Special Topics  3 cr
Advanced selected topics in computer science. Prerequisite: Permission of the CSC Coordinator.

CSC 510  Compiler Design-Construction  3 cr
Lexical analysis, syntactic analysis, intermediate code generation, object code generation, memory use, generators for scanners and parsers.

CSC 511  Comm-Network Analysis  3 cr
Data communications and computer networks. An in-depth treatment of network architectures and protocols for both WANs and LANs. Topics include: network routing and flow algorithms, internet working, and distributed systems.

CSC 512  Real-Time Software Systems  3 cr
Design and implementation of software for real-time computer systems. Survey of typical real time systems; techniques for code conversion, error checking, and transmission monitoring.
Pre-requisite: Computer Science Graduate 030

CSC 513  Computer Graphics  3 cr
An in-depth study of hardware and software techniques used in computer graphics. Study of display and entry devices, including refresh, storage, and raster scan topics. Software techniques will include display files, windowing, clipping, two and three-dimensional transformation, and hidden-surface removal.

CSC 514  Modeling and Simulation  3 cr
Analytic and simulation models developed using deterministic and stochastic techniques. Topics include: event-driven simulations, queueing theory, Markov processes, and dynamical systems. "Real World" project required.

CSC 515  Numerical Analysis  3 cr
Mathematical preliminaries, solving linear systems, numerical solution of ordinary and partial differential equations.

CSC 516  AI Theory and Programming  3 cr
Introduction to basic concepts, implementation techniques, and philosophies of artificial intelligence and intelligent systems. Introduction to expert systems, fuzzy logic systems, neural networks, and techniques for artificial intelligence programming. The fundamentals of an AI programming language (LISP or PROLOG) will be presented. The language will then be used to solve problems in typical AI applications. Prerequisite: Graduate Professional Component Standing.

CSC 517  Computer Game Development  3 cr
Introduction to computer game development, including a variety of related topics. The course will be driven by research/technical paper discussions, student presentations, and projects. The direction of the course will be guided to some extent by student interest.

CSC 520  Computer Architecture  3 cr
Instruction set design, pipelining, instruction-level parallelism, memory hierarchy design, and multiprocessors.

CSC 522  Performance Eval of Algorithms  3 cr
Mathematical foundations; analytic, empirical, and qualitative evaluation techniques; dynamic programming, greedy algorithms, graph algorithms; and selected advanced topics.

CSC 524  Computer Language Design  3 cr
A study of programming language design and specification, including the compiling process, parsing, BNF grammars, and models of semantics. Differences between interpreters, assemblers, and compilers will be studied.
CSC 525 Complexity Theory 3 cr
Mathematical preliminaries, languages, finite automata, Turing machines, decidability, recursive function theory, complexity, tractability and NP-complete problems.

CSC 526 Data Mining 3 cr
This course provides an in-depth study of data mining. Course content includes data preparation, feature selection, pattern mining, classification, clustering, and sequence mining. New research areas in data mining will also be discussed. Laboratory assignments will provide students with opportunities to interact with and develop data mining technologies.

CSC 527 Software Engineering Princ 3 cr
Advanced concepts of software engineering will be discussed. Program testing techniques including: structured design and walk throughs, proving program correctness and verifiability, and system coding standardization and integration will be covered in depth. Software team formulation and management techniques will be discussed.

CSC 528 Introduction to Bioinformatics 3 cr
Bioinformatics is a highly interdisciplinary course between computer science and biology. It focuses on the analysis of proteins, genes, and genomes using computing technologies such as computer algorithms and computer databases. Students in this course will learn algorithms and databases pertaining to bioinformatics (e.g., sequence alignment, suffix tree and its biological/biomedical applications, genome alignment, biological/biomedical database search, and phylogeny reconstruction); gain knowledge and hands-on experience of bioinformatics tools; understand the interaction between computer science (in particular, semantic technologies) and modern biology within the context of data-driven knowledge discovery.

CSC 532 Distributed Systems 3 cr
This course will further enhance the students understanding of the details of how an operating system functions. It will focus on the advanced concepts associated with distributed systems. The student will learn the underlying concepts of such systems and the algorithms needed to provide the required synchronization and communication.

CSC 533 Art Intel-Heuristic Prog 3 cr
Methods of heuristic programming, the production of intelligent algorithms, and simulation of human cognitive processes will be studied. AI languages, such as LISP and PROLOG, will be discussed. Attention placed on the relationship between man-made machines (robots) and biological organisms with natural intelligence. Expert Systems and neural network research will be studied.

CSC 550 Surreptitious Software 3 cr
Students in this course will learn about Algorithms for software protection and learn how to use tools for program transformation. Specific topics include obfuscation, watermarking, tamperproofing, birthmarking and hardware protection. Programming projects will be required in several different languages and course activities will involve preparing student-led lectures, working on programming projects, and writing reports.

CSC 557 Data Warehousing 3 cr
This course focuses on the design, development and usage of data warehouses. Course content includes dimensional modeling, ETL processes, physical design, and analytical processing. New research areas related to data warehousing technology will also be discussed.

CSC 560 Security of HW Implementations 3 cr
The objective of this course is for the student to build upon logic and architectural principles as applies to hardware designs. The key theme of the course is the security impacts of hardware design implementations.

CSC 580 Data Security 3 cr
The objective of this course is to introduce the inherent strengths and limitations of cryptography in data security applications, focusing on the basic principles of message privacy, key negotiation, and key management. The course covers various aspects of symmetric and asymmetric ciphers and provides a broad coverage of the core areas for engineering cryptographic systems. Students will be expected to implement and analyze simple cryptographic schemes and read supporting articles and papers for presentation. Prerequisite: CIS Graduate Professional Component.

CSC 582 Network Security 3 cr
The objective of this course is to provide students with the knowledge and skills to begin supporting network security within an organization. Students will gain an understanding of fundamental network security concepts and mechanisms, be able to identify security threats and vulnerabilities, and help respond to and recover from security incidents. The course will provide an understanding of how to design and build secure network algorithms and environments while gaining an in-depth knowledge of protocol security, intrusion detection, and principles of cyber defense.

CSC 585 Cyber-Physical Security 3 cr
This course focuses on the Security of Cyber-Physical Systems (CPS) and Internet of Things (IoT) that go beyond topics commonly considered in Computer and Network Security. This course aims to prepare participants for the cutting edge research undergoing in both areas. The successful participation in this course will require reading number of research papers, presenting learned material, active participation in in-class discussions, and successful accomplishment of a small research project.
CSC 590  CSC Sp Top - 3 cr
Advanced selected topics in computer science. Prerequisite: Permission of the CSC coordinator.

CSC 595  CS Project Proposal Develop 1 TO 3 cr
Development of the project proposal for the Computer Science specialization master's project. Prerequisite: Graduate Professional Component and Permission of the Director of Graduate Studies.
Pre-requisite: CIS 518 Minimum Grade of S.

CSC 598  Computer Science Project 1 TO 3 cr
This course may be repeated for a maximum of six (6) credits. A CIS project committee will provide direction during the project. Prerequisites: Approval of project proposal by student's project committee and permission of the Director of CIS Graduate Studies.
Pre-requisite: CSC 595 Minimum Grade of B.

CSC 612  Cybersecurity 3 cr
This course focuses on developing expertise and preparation for independent research in Cybersecurity through an in-depth review of the Cybersecurity literature. The student will be conversant in broad issues and trends in Cybersecurity as defined by skill sets and occupations.

CSC 626  Advanced Big Data 3 cr
This course focuses on developing expertise and preparation for independent research in big data through an in--depth review of the big data and data science literature. The student will be conversant in broad issues and trends in big data as defined by current tools and technologies.

**Computer Info Sciences (CIS)**

(CIS)

CIS 150L  Intro to Comp Applications Lab 0 cr
Laboratory course for CIS 150, Introduction to Computer Applications.

CIS 250L  Adv Comp Applications Lab 0 cr
Laboratory course for CIS 250, Advanced Computer Applications.
Pre-requisite: CIS Proficiency Exam P or CIS 150 Minimum Grade of C.

CIS 010  Computer Proficiency Exam 0 cr
The purpose of this course is to administer the Computer Proficiency Exam (CPE) for enrolled students. The CPE consists of multiple choice and performance-based questions for general computer, internet, WWW, e-mail, and office application concepts. Performance-based questions require a series of actions in a simulated environment to demonstrate specific skills being assessed. No outside materials or assistance from the applications' Help files are allowed.

CIS 101  Freshman Seminar CIS 2 cr
A course for first-time students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life for a major in the School of CIS. Taught in small groups, the course provides an introduction to the nature of higher education and a general orientation to the functions and resources of the University and the School of CIS. Extensive reading and writing assignments relevant to the student's first year experience are required.

CIS 110  Intro to Comp-Info Sciences 3 cr
An introduction to information technology using a programming language to study applications in text searching, in real-time 3-D animation, and in sound production. A discussion of the social, ethical, economic, and philosophical implications of computing.

CIS 115  Beginning Programming 4 cr
A first course in programming using a visual, event-driven programming language. Coverage includes algorithmic problem solving, fundamentals of programming, procedures, decisions, repetition, and arrays.
Pre-requisite: MyMathTest 080 or ACT Math 23 or (MA 112 Minimum Grade of C or MA 171 Minimum Grade of C) or MA 267 Minimum Grade of C or (MA 125 Minimum Grade of C or MA 132 Minimum Grade of C).

CIS 150  Intro to Computer Applications 3 cr
This course is designed to provide a broad based introduction to the use of computers and productivity software technologies. Topics to be covered include: use of a current Operating System and basic file management; the fundamentals of word processing, spreadsheet and graphics-based presentation software; and basic image management related to documents and reports. Other topics covered include information assurance and computing safety as related to PC/Internet usage.

CIS 155  Educational & Social Computing 3 cr
This course provides a hands-on approach that focuses on the use of current and emerging computing technologies. Topics include: Use of the University adopted Learning Management System (LMS), Google Apps, Google Docs, safe computing practices, and current trends in social networking.

CIS 190  Special Topics- 1 TO 3 cr
Selected topics in computer and information sciences. Requires permission of Specialization Coordinator.

CIS 210  Intro to C++ Programming 3 cr
Introduction and fundamentals of C++ programming, input-output operations, variables, data types, arithmetic expressions, control statements, looping, functions, arrays, pointers, strings, structures, and abstract data types.
Pre-requisite: MA 125 Minimum Grade of C. MA 125 can be taken concurrently with this course.
CIS 211  Advanced C++ Programming  1 cr
Advanced concepts in C++ programming, constructors, destructors, classes and operation overloading.
Pre-requisite: (CIS 121 Minimum Grade of C or CIS 210 Minimum Grade of C).

CIS 227  Numerical Computation I  3 cr
Floating point numbers, representation, and errors; software tools for scientific computing; elementary problems in scientific computing.
Pre-requisite: MA 126 Minimum Grade of C or MA 233 Minimum Grade of C.

CIS 235  Programming Language Seminar  3 cr
Fundamentals of syntax and style for a relevant, or current programming language. Includes application development in that language. Recommended: Knowledge of a programming language.

CIS 250  Advanced Comp Applications  3 cr
This course is designed to provide continuing, advanced coverage of productivity software technologies. Topics to be covered in depth include: fundamental and advanced features of spreadsheet and database management software. Other topics covered include information assurance and computing safety as related to PC/Internet usage.
Pre-requisite: CIS 150 Minimum Grade of C or CIS Proficiency Exam P or CIS 010 Minimum Grade of S.

CIS 300  Information Tech in Society  1 cr
A discussion of personal, local, national, and global impact of information technology on ethical, legal, and social issues. Requires Junior standing in the School of Computing.

CIS 321  Data Comm and Networking  3 cr
An introduction to data communications, computer networking and network operating systems. Topics include: basic concepts of data transmission, network architectures, communications devices, and communication protocols.
Pre-requisite: ISC 245 Minimum Grade of C or ITE 271 Minimum Grade of C or CIS 120 Minimum Grade of C or CSC 120 Minimum Grade of C.

CIS 324  Database Design-Dev-Mgt  3 cr
Analysis, design, and development of desktop database systems. Coverage of normalization concepts, DBMS models, E-R/Semantic modeling, and query processing.
Pre-requisite: ( (MA 112 Minimum Grade of C or MA 171 Minimum Grade of C) or (MA 120 Minimum Grade of C or MA 287 Minimum Grade of C) or MA 267 Minimum Grade of C) or (MA 125 Minimum Grade of C or MA 132 Minimum Grade of C) or ACT Math 23 ) or MyMathTest 080 and (ISC 245 Minimum Grade of C or ITE 271 Minimum Grade of C) or (CSC 121 Minimum Grade of N or CIS 121 Minimum Grade of C).

CIS 401  Accelerated Programming  3 cr
This course presents programming concepts in an accelerated manner. Coverage includes ADT’s, Classes and Class Libraries, and simple data structures such as linked lists, stacks, queues. Laboratory assignments will be done in a high level, object-oriented language. This course does not count toward a graduate degree in CIS. Requires prior programming experience and permission of Coordinator.

CIS 402  Accelerated OS-Comp Arch  3 cr
This course presents computer architecture and operating systems concepts in an accelerated manner. Coverage includes machine and assembly languages, functioning of a simple processor, machine level data flow, microprogramming, I/O, interrupts and processing drivers, memory management, dynamic process scheduling, and multi-tasking. This course does not count toward a graduate degree in CIS. Requires prior programming experience desired and permission of Coordinator.

CIS 403  Accelerated Data-File Structs  3 cr
This course applies advanced programming concepts and techniques to data structures such as linear and linked list trees, records, files, and database. Sequential and random access file processing methods; searching and sorting methods. Laboratory assignments will be done in a high-level, object-oriented language. This course does not count toward a graduate degree in CIS.
Pre-requisite: CIS 121 Minimum Grade of B or CIS 123 Minimum Grade of B or CIS 142 Minimum Grade of B or CIS 401 Minimum Grade of B or CIS 501 Minimum Grade of B.

CIS 439  Windows Programming  3 cr
This course continues and expands the study of programming begun in either ITE 285 or CIS 121. Concepts previously learned are extended to application programming in the windows (GUI) environments. Students will make use of the OLE, DDE, API features of windows in programming projects. Students will write and use their own DLL’s in producing user interfaces and applications projects.
Pre-requisite: CIS 230 Minimum Grade of C or CIS 263 Minimum Grade of C or ITE 285 Minimum Grade of C or ITE 451 Minimum Grade of C or Computer Science Graduate 030.

CIS 490  CIS Sp Top -  3 cr
Advanced selected topics in computer and information sciences. Requires permission of the specialization coordinator.
Pre-requisite: Computer Sci Prof Component 30

CIS 494  Directed Studies  1 TO 3 cr
May be taken for a maximum of six credits, only three of which may be applied to the CIS major or minor. Requires permission of the specialization coordinator.
CIS 496  CIS Internship  0 TO 3 cr
CIS internship program is designed to give advanced students practical experience in the computer industry. Students will work on sponsored projects with faculty advisors. Credit may apply to degree with approval of the dean. Requires GPA 2.75 or higher and permission of the Dean.

CIS 497  Senior Capstone Experience-W  3 cr
A comprehensive team project will be completed and documented. Writing assignments will reinforce the importance of life-long learning, leadership skills, and the ethical issues of computing as well as appropriate resume and job application cover letter creation. Oral and written reports will be required. This course is to be taken the final semester of the student's degree program. Requires application for graduation filed the semester before registering for the course. Completion of the following courses according to major: Computer Science-CSC 333 and CSC 340; Information Systems-ISC 360; Information Technology-ITE 370.
Co-requisite: CIS 498
Pre-requisite: (EH 372 Minimum Grade of C or EH 373 Minimum Grade of C) and (CSC 333 Minimum Grade of C and CSC 340 Minimum Grade of C) or ISC 360 Minimum Grade of C or ITE 370 Minimum Grade of C.

CIS 498  CIS Senior Seminar  0 cr
A series of mini-seminars designed to prepare graduating seniors for transition to professional careers in computing or graduate study and to assess student learning outcomes in the curriculum. Mini-seminars would include, but would not be limited to: resume development, interviewing tips and techniques, career planning, professionalism and ethics in the workplace, and advanced graduate study and professional development. Each student will be required to complete one or more senior exit exams and a senior exit survey. Prerequisite: Computer Science: CSC 331; Information Systems: ISC 360; Information Technology: ITE 370.
Co-requisite: CIS 497
Pre-requisite: CIS 497 Minimum Grade of C and (CSC 331 Minimum Grade of C or ISC 360 Minimum Grade of C or ITE 370 Minimum Grade of C). CIS 497 can be taken concurrently with this course.

CIS 499  CIS Senior Honors Project - H  3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of computing, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior honors project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours. Requires completion of an approved project prospectus and permission of the appropriate Coordinator.
Pre-requisite: Computer Sci Prof Component 30

CIS 518  CIS Research Methodologies  3 cr
A review of computer and information science literature and research topics. Techniques for defining research goals will be described. Students will be expected to identify a research area and conduct a complete review of the literature.

CIS 530  Information Assurance/IT Audit  3 cr
This course covers the understanding and managing of risks and threats to information and information systems. This includes protecting and defending information and information systems by ensuring through authorization and other means concepts such as accessibility, secrecy, reliability, and authentication.

CIS 535  Digital Forensic Analysis  3 cr
This course provides students with advanced tools, techniques, and methodologies for accumulating, securing, analyzing, managing, and reporting evidence related to a forensics examination. The professional communication and presentation of the results of forensic investigations will be emphasized.

CIS 538  OS Concepts and Security  3 cr
This course examines the concepts of operating systems such as memory and virtual memory management, as well as processor, process, device, and file management. Topics include the management and organization of network operating systems and operating system security and ethics. Students will manage, configure, and secure operating systems such as Windows, Unix, and Linux in laboratory environments.

CIS 539  Windows Programming  3 cr
The practice and principles of developing interactive desktop computer applications. Aspects to be covered will include graphical user interface; use of sophisticated widget, container, and utility libraries; event-driven programming; two-dimensional graphics; in-memory database; and deployment.

CIS 540  Network Security Management  3 cr
This course examines network and web security issues including: risks and threats, system access points, hardware and software defense methods, and organizational security policies. The course will cover the analysis of systems for vulnerabilities, the implementation of security procedures, the monitoring of systems for security breaches, and the recovery or restoration of breached systems.

CIS 590  CIS Sp Top -  3 cr
Advanced selected topics in computer and information sciences. Requires permission of the CSC Coordinator

CIS 594  Directed Studies -  1 TO 3 cr
May be taken for a maximum of three credits to count toward the degree. Requires permission of the Director of Graduate Studies.
CIS 595  CIS Research Development  1 TO 3 cr
Development of the research proposal for master's thesis.
Graduate Professional Component. Requires permission of
the Director of Graduate Studies.
Pre-requisite: CIS 518 Minimum Grade of S.

CIS 596  CIS Graduate Internship  0 TO 3 cr
CIS graduate internship program is designed to give
graduate students practical experience in the computer
industry. Students will work on sponsored projects with
faculty advisors. Up to three hours may be counted toward
the degree. Requires permission of the Director of Graduate
Studies.

CIS 597  CIS Graduate Seminar  0 TO 1 cr
This course prepares graduate assistants in the School
of CIS to provide support and assistance to faculty for
instruction in School of CIS classes. Topical coverage
includes but is not limited to: graduate assistant
expectations and responsibilities, protection of student
educational information (FERPA), practical skills in assisting
in computing instruction, graduate assistant best practices,
and tips from faculty and experienced graduate assistants.
This course does not count towards a graduate degree in
CIS. Requires permission of the Director of CIS Graduate
Studies.

CIS 598  CIS Project  1 TO 3 cr
Approved investigation of original problems under direction
of a faculty member. This course may be repeated for
a maximum of three hours of credit towards the degree.
Requires permission of the Director of Graduate Studies.

CIS 599  CIS Thesis  1 TO 9 cr
This course may be repeated for a maximum of six credits.
a thesis committee will provide direction during the thesis.
Requires approval of the thesis project by graduate faculty
and the Director of Graduate Studies.
Pre-requisite: CIS 595 Minimum Grade of B.

CIS 694  Directed Study -  3 cr
This course focuses on the development of the doctoral
prospectus leading to the defense of a dissertation.

CIS 799  Dissertation  1 TO 9 cr
This course focuses on the development of the dissertation.

Counselor Education (CED)  
(CED)

CED 560  Diagnosis/Treatment Planning  3 cr
The Diagnostic and Statistical Manual of Mental Disorders
(DSM) is used to develop a basic understanding of mental
disorders. Students learn to utilize the DSM classification
system to identify counseling techniques and develop
counseling plans.

CED 561  Marriage and Family Counseling  3 cr
The theories, principles, and techniques of counseling
couples and families are examined. Other topics include
ethical and multicultural issues, assessment, and current
research in marriage and family counseling.

CED 562  Addictions Counseling  3 cr
This course provides an overview of research and theory
in regards to the etiology, assessment, diagnosis and
treatment of addictive disorders, e.g. alcoholism, drug
addiction, gambling, etc. The course will review theoretical
and evidence-based models of counseling for addictive
disorders as well as considerations for treating addictive
disorders among various special populations and with
culturally diverse clients.

CED 563  Divorce Mediation  3 cr
This course will introduce students to the techniques of
divorce mediation. Legal, ethical and psychological issues in
the divorce mediation process will be examined with special
emphasis on the neutral role of the mediator explored.

CED 564  Gerontological Counseling  3 cr
Emphasis is on a basic knowledge of the theories, principles
and techniques of counseling elderly individuals, couples
and their families. Includes such topics as assessment,
ethical and cultural issues, model programs, and current
research in gerontological counseling.

CED 565  Found of Prof School Couns  3 cr
Provides an overview of the history, philosophical
foundations, and professional duty of professional school
counseling. Review of historical and contextual forces that
shaped the evolution of professional school counselors'
roles and functions within schools. Special emphasis will be
placed on current trends and best practices as identified by
ASCA and current literature.

CED 566  Multicultural Counseling  3 cr
Includes a study of historical and current theories and issues
in multicultural counseling, provides an understanding
of societal trends and changes, and demonstrates
strategies/techniques for cross-cultural counseling
techniques through class exercises, case studies, and
demonstrations. Reflective experiences are used to allow for
the development of cultural self-knowledge.

CED 567  Couples Counseling  3 cr
This course will provide an overview of various theoretical
approaches and related research findings for couples
counseling. The course will also provide an overview of
current theory and research in human sexuality, including
sexual development, sexual well-being/wellness, sexual
orientation and sexual dysfunction and disorders. The
course will apply particular focus to sexuality issues as they
are an aspect of individual and couples counseling work.
CED 568  Comm Mental Health Counseling  3 cr
This course examines community mental health counseling and includes a survey of its organizational, fiscal, and legal dimensions; of community needs assessment, program delivery, advocacy, funding, and intervention; of the principles of consultation, education and outreach; of client and community characteristics; and of the various practice settings and roles.

CED 569  Child Counseling  3 cr
This course provides an overview of current theoretical perspective and evidence-based intervention paradigms regarding psychological, behavioral, cultural and social context/environmental problems commonly occurring during childhood and adolescence. A focus will be upon knowledge of basic counseling skills for use with children and adolescents as well as learning to conceptualize childhood problems at various levels of social ecology: individual, cultural, academic, familial, community and societal.

CED 571  Foundations of CMHC  3 cr
This course is an introduction to the historical and philosophical foundation of Clinical Mental Health Counseling as well as overview of contemporary clinical practice issues within this counseling specialty.

CED 572  Princ and Theories of Couns  3 cr
Includes a study of various theories, principles, and techniques in counseling. Opportunity is provided for the implementation of counseling techniques through the study of case studies and transcripts.

CED 573  Ed Occup Info Sys - Mats - Res  3 cr
The study of educational, vocational, psychological, and individual resources needed to make employment decisions. Emphasis is on the collection and evaluation of information, procedures and strategies for researching employment opportunities, and the management of information services.

CED 574  Group Couns Theory and Process  3 cr
Includes both the theory and practice of group counseling, counseling with clients of diverse backgrounds, and selecting group work suitable to multicultural needs. Emphasis is on the developmental level and background of clients with which the counselor expects to work.

CED 575  Intro to Community Rehab  3 cr
Introduces the student to a broad field of community rehabilitation. Included is the history, philosophy, present activities and future trends in rehabilitation. A multidisciplinary approach to the study of the "whole person" is emphasized and direct contact with community social service agencies is an integral part of the course.

CED 576  Supv Practicum in Couns  3 cr
This course requires the student to demonstrate the appropriate use of a variety of counseling skills and techniques. Audio and video tapes of individual counseling sessions are critiqued in class by the instructor. Requires special permission of the instructor.
Pre-requisite: (CED 571 Minimum Grade of B or CED 565 Minimum Grade of B) and CED 586 Minimum Grade of B and CED 572 Minimum Grade of B and CED 574 Minimum Grade of B and CED 566 Minimum Grade of B and CED 584 Minimum Grade of B.

CED 578  Supv Pract-Group Counseling  3 cr
Supervised practice is provided in group counseling and other group work experience appropriate for a counselor. Practicum experience is offered in the setting in which the student plans to work.

CED 579  Soc and Psych Asp of Disabil  3 cr
The theory, research, and practices in related disciplines which contribute to an understanding of human disability. Field work and case study serve as integrating activities.

CED 580  Student Personnel Services  3 cr
Included is a survey of historical developments and current practices in student personnel services in post-high school educational institutions. The organization, administration, and functions of the various services are stressed.

CED 581  Rehab Case Management  3 cr
This course provides for critical analysis of representative rehabilitation case studies. Case records are used as a basis for developing an understanding of the clients with handicaps and their problems, the rehabilitation case work process, diagnosis, eligibility requirements, and the provision of services.

CED 582  Data-Driven School Counseling  3 cr
Provides an overview of how school counselors can access, interpret, and use achievement data, demographic data, school process data, and perception data to inform school counseling programmatic decisions. Assessment of systemic data, using data to guide program development, formative and summative evaluation methods, and strategies for dissemination of data are reviewed.

CED 583  Indiv and Group Testing Lab  3 cr
Supervised experience in the selection, administration, and scoring of educational and psychological tests, and the interpretation and reporting of test results.
Pre-requisite: EPY 555 Minimum Grade of B.

CED 584  Sem Ethical and Legal Issues  3 cr
Ethical standards of the profession and current legal issues will be examined in the context of case studies and current literature. Critical analysis by each student of legal and ethical issues faced by counselors and psychometrists will be stressed.
CED 585  Medical Aspects of Rehab  3 cr
Common symptomology, treatment, and medical management techniques of rehabilitation and physical medicine are emphasized. Other topics include assessment of client’s functional limitations, interpretation of medical information, and planning for the client’s rehabilitation.

CED 586  Counseling Skills and Process  3 cr
Emphasis is placed on the counseling procedures involved in developing and maintaining the therapeutic relationship. Students are required to model the basic skills of counseling using videotaped incidents and observations for feedback on skill development.

CED 588  Career Devel, Assess, & Interv  3 cr
Emphasis is placed on a basic knowledge of the theories, principles, and techniques of career counseling used for a wide range of ages. Other topics include model career development programs, assessment, placement and age diversity, individual characteristics, placement and current research.

CED 590  Special Topics -  3 cr
Guided supervision in the completion of learning tasks in counselor education such as program design and revision study of a significant topic, theory, model and supervision of selected learning activities to acquire specific counseling and testing skills.

CED 591  Advocacy, Collab. & Consult.  3 cr
This course will provide an overview of advocacy, collaboration and consultation models and essential skills for professional school counselors and clinical mental health counselors. The role that each of these skills play in the professional identity of the school and mental health counselor and strategies for using these skills to promote systemic change and equitable social systems will be examined.

CED 592  Crisis & Trauma Counseling  3 cr
Students will gain knowledge of research-informed theoretical models of etiology and development of problems such as suicidality and other forms of mental health crisis, as well as grief, trauma, and disaster-related mental health symptoms. Students will also gain knowledge of evidence-based models of counseling and intervention in these areas such as comprehensive risk assessment strategies, psychological first aid and systems of mental health crisis management.

CED 594  Dir St and Research  1 TO 3 cr
Students explore through directed study problems and issues of special interest or significance in Counselor Education. Not more than three semester hours of any departmental 594 courses can be accepted toward a degree program.

CED 595  Internship - School Counseling  1 TO 9 cr
The internship is a supervised learning experience in a work setting similar to that in which a school counselor eventually will be employed. The internship provides the student with an opportunity to apply the theories and concepts learned during the graduate program. Not more than 12 hours may be taken. Prerequisite: Special permission of the instructor and a grade of B or above in CED 586 and CED 576. Pre-requisite: (PRAXIS- Prof School Counselor 156 ) and CED 576 Minimum Grade of B and CED 586 Minimum Grade of B and CED 584 Minimum Grade of B.

CED 596  Internship-School Psychometry  1 TO 9 cr
The internship is a supervised learning experience in a work setting similar to that in which a school psychometrist eventually will be employed. The internship provides the student with an opportunity to apply the theories and concepts learned during the graduate program. Not more than 12 hours may be taken. Requires special permission of the instructor.
Pre-requisite: EPY 556 Minimum Grade of B and CED 584 Minimum Grade of B and EPY 558 Minimum Grade of B and CED 583 Minimum Grade of B.

CED 597  Internship in CMHC  1 TO 9 cr
The internship is a supervised learning experience in a work setting similar to that in which a community counselor eventually will be employed. The internship provides the student with an opportunity to apply the theories and concepts learned during the graduate program. Not more than 12 hours may be taken. Requires special permission of the instructor.
Pre-requisite: CED 576 Minimum Grade of B and CED 584 Minimum Grade of B and CED 586 Minimum Grade of B.

CED 598  Internship-Rehab Counseling  1 TO 9 cr
The internship is a supervised learning experience in a work setting similar to that in which a rehabilitation counselor eventually will be employed. The internship provides the student with an opportunity to apply the theories and concepts learned during the graduate program. Not more than 12 hours may be taken. Requires special permission of the instructor.
Pre-requisite: CED 576 Minimum Grade of B and CED 584 Minimum Grade of B and CED 586 Minimum Grade of B.

CED 599  Thesis  1 TO 9 cr
A student selects a project, study or investigation which is related to an area of specialization in Counselor Education. The project forms a basis for the thesis. A thesis committee will provide direction during the writing of the thesis.

CED 672  Adv Couns Theory and Practice  3 cr
An advanced study of counseling theories and strategies as they apply to practical situations and special populations. Pre-requisite: CED 572 Minimum Grade of B.
CED 674  Adv Theory and Pract Grp Couns  3 cr
This course provides the student with advanced skills and knowledge designed to facilitate working with groups. The course emphasizes group theory, research, and participation in group dynamics.
Pre-requisite: CED 574 Minimum Grade of B.

CED 676  Advanced Practicum-Counseling  3 cr
Supervised field experience in appropriate settings. Required weekly seminar. Requires special permission of the instructor.

CED 678  Negotiation Training  3 cr
This course focuses on the development of negotiation, conflict resolution, and communication skills needed to be effective in resolving a variety of training-related problems. Students will have an opportunity to research and practice in the negotiation process by applying communication and conflict resolution techniques in simulated and real situations.

CED 690  Sp Top -  3 cr
Guided supervision in the completion of learning tasks in counselor education such as program design and revision, study of a significant topic, theory, model, and supervision of selected learning activities to acquire specific counseling and testing skills.

CED 694  Dir St and Research  1 TO 3 cr
Students explore through directed study problems and issues of special interest or significance in Counselor Education. Not more than three semester hours of any departmental 694 courses can be accepted toward a degree program.

CED 699  Research Project  3 cr
A supervised field project, or investigation in the Counselor Specialist Program, serving as the culminating experience in the program. Applying concepts and skills learned during the sixth-year program, the student will conduct an investigation and prepare a field project report in standard form.
Pre-requisite: CED 576 Minimum Grade of B.

Criminal Justice (CJ) (CJ)

CJ 105  Intro to Criminal Justice  3 cr
An overview of crime in the U.S. and the three major criminal justice agencies: law enforcement, courts, and corrections. CJ majors must pass with a grade of "C" or better.

CJ 210  Policing and Society  3 cr
An overview of the police functions in U.S. society, including law enforcement, maintenance of order, and public service-and of police responsibilities, including organizational and managerial aspects of policing in our democracy.
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

CJ 215  Correctional Policies and Proc  3 cr
An overview of the policies and procedures of U.S. correctional systems, and the methods of treatment of offenders.
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

CJ 223  Intro to Forensic Science  3 cr
Survey of scientific crime detection methods; crime scene search, identification and preservation of evidence; uses of the laboratory for criminal investigation.

CJ 310  Research Methods-W  3 cr
This course examines research methodologies in the social sciences, covering the tools and techniques for designing and conducting research, including collecting and analyzing data, and presenting findings. (Cross-listed as PSC 310).
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CJ 321  Public and Private Security  3 cr
An overview of security in modern society, including public and private security, covering the role and administration of security and security personnel.
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C).

CJ 330  Judicial Process  3 cr
The study of U.S. judicial process at both the federal and state court levels. (Cross-listed as PSC 330)
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C).

CJ 331  Constitutional Law  3 cr
The study of the principles of constitutional powers and liberties examined through an analysis of decisions and opinions by the U.S. Supreme Court. (Cross-listed as PSC 331 and PHL 331)
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C.

CJ 332  Criminal Law  3 cr
An overview of what constitutes crime and of the body of law governing the punishment of crime. (Cross-listed as PSC 332)
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C.

CJ 336  The Law and Legal Theory  3 cr
Explores issues and problems in the area of law, including the nature and rule of law, the aims and roles of legal systems, morality and law, obligations to obey the law, and systematic injustices related to race, ethnicity, and gender. (Cross-listed as PSC 336 and PHL 336)
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C).

</table>

This course applies classical and modern management and organization theories to broad range of institutions, actors, and agencies, including police, courts and corrections, as well as drug traffickers, sexual offender treatment centers, and homeland security agencies. (Cross-listed as PSC 430)
CJ 472 Comparative CJ Systems  
An examination of differences and similarities in criminal justice systems globally, including criminal law, crime rates, crime control and law enforcement.  
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or IS 100 Minimum Grade of C.

CJ 473 International Law  
The course covers major issues, cases and topics in public and private international law. Course coverage includes individuals and corporations, diplomatic relations, jurisdiction, human rights, economic relations, treaties, environmental law, and more.  
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C).

CJ 488 Armed Conflict  
The study of armed conflict from an interdisciplinary perspective incorporating criminology, political science, security studies, conflict and peace studies, and international law.  
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or IS 100 Minimum Grade of C or PSC 270 Minimum Grade of D).

CJ 490 Special Topics-  
Study of a significant topic, problem, or issue in criminal justice. May be repeated up to two times when the content varies. Only 6 credit hours may be applied to the criminal justice major.  
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

CJ 491 Seminar on Terrorism  
Study of a terrorism from a sociopolitical perspective with an emphasis on causes, policy, tactics and operational characteristics and counter-terrorism operations. Cross-listed with PSC 491 and IS 491.  
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C.

CJ 492 Capstone Seminar CJ-W  
The Capstone course brings together key components form across the criminal justice curriculum. As part of the course, students will write a research paper, present their research, and take a comprehensive exam. CJ majors must earn a grade of C or better for graduation.  
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C) and (PSC 130 Minimum Grade of D) and (CJ 210 Minimum Grade of D or CJ 320 Minimum Grade of D) and (CJ 215 Minimum Grade of D or CJ 340 Minimum Grade of D) and (CJ 310 Minimum Grade of D or PSC 310 Minimum Grade of D) and (CJ 330 Minimum Grade of D or PSC 330 Minimum Grade of D) and (CJ 360 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

CJ 493 Study Abroad -  
Examines the principles of the United States Constitution and roles of Congress, the President, and the courts, the mass media, interest groups, and more in our U.S. political system. PSC majors and minors must pass with a grade of 'C' or better.  
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

CJ 494 Directed Studies -  
Students will pursue directed research or readings on an approved topic in criminal justice.  
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C).

CJ 496 Internship  
An opportunity to gain experiential learning through a supervised internship offered by a variety of criminal related agencies.  
Pre-requisite: (CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C).

CJ 499 Honors Thesis W  
The research and writing of a major paper in the field of criminal justice. Registration is open to criminal justice majors in the Honors College or those pursuing Department Honors.  
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

Cross Registration-SHC (CROS) (CROS)

Drama (DRA) (DRA)

DRA 100 Theatre Practicum: Performance  
Practical experience in acting. May be repeated three times for a maximum of four credit hours. Prerequisite: Permission of department chair. Fulfills the Fine Arts and Humanities requirement in general education.  
1 cr

DRA 101 Theatre Practicum: Tech  
Practical experience in backstage work. May be repeated three times for a maximum of four credit hours. Prerequisite: Permission of department chair. Fulfills the Fine Arts and Humanities requirement in general education.  
1 cr
DRA 102  Theatre Practicum: Leadership  1 cr  Practical experience in theatre areas other than acting or technical production. May be repeated three times for a maximum of four credit hours. Prerequisite: Permission of department chair. Fulfills the Fine Arts and Humanities requirement in general education.

DRA 103  Theatre Symposium  .5 cr  A symposium required for all full-time Theatre majors meeting weekly to share and discuss theatre activities. Four hours required for majors for graduation with adjustments made for transfer students. Prerequisites: Must be Theatre Major

DRA 104  Fundamentals of Dance I  3 cr  Beginning level instruction in dance, including theory and terminology, with a primary focus on classical ballet. Designed to prepare the student dancer for performance.

DRA 105  Fundamentals of Dance II  3 cr  Beginning-level instruction in Dance, with a primary focus on jazz and modern. Through the study of technique, theory, and terminology, students will be introduced to the form from the viewpoint of audience member, performer, and choreographer.

DRA 106  Theatre Cornerstone  1 cr  An introductory course designed to familiarize incoming majors to the basics of professional theatre, the expectations for the upcoming 4-year degree, and the processes of the USA Department of Theatre and Dance.

DRA 110  Introduction to Theatre  3 cr  A basic survey of theatre practice. Fulfills the Fine Arts and Humanities requirement in general education.

DRA 111  Introduction to Dance  3 cr  A basic survey of dance as an art form. Through readings, lectures, viewing of live and filmed dance, and basic studio work, students will gain a better appreciation of the historical development and forms of the art.

DRA 115  Acting for Non-Majors  3 cr  An interactive course designed to introduce the non-major to the art and discipline of acting as both performer and observer. Through a sequence of exercises and practice, the student will be introduced to the actor’s mode of thinking, creating, and working. Fulfills the Fine Arts and Humanities requirement in General Education.

DRA 116  Opera & Musical Theatre Wkshop  .5 TO 1 cr  A performing ensemble dedicated to training students in the fundamentals of stage craft, performance, and production through experience with music for the stage. Standards of opera, operetta, and American musical theatre are explored in scene exercises and fully staged productions on and off campus. Enrollment is open to all students through audition or permission of the instructor. Course is cross-listed with MUO 116. Credit cannot be received for both MUO 116 and DRA 116. May be repeated four times for a maximum of two credit hours. Fulfills the Fine Arts and Humanities requirement in General Education.

DRA 120  Acting I  3 cr  A workshop-lecture course introducing a basic process for acting on the stage in the style of modern realism. Restriction: Must be a Drama major or minor or a dance minor. This course fulfills the Fine Arts and Humanities requirement in General Education.

DRA 125  Fundamentals of Acting  3 cr  An introductory class in acting for the stage, aimed at those with little or no previous experience. Students will be introduced to a basic acting vocabulary, begin to develop skills in necessary script analysis, observe acting through live and recorded performances, and gain practical experience in acting through exercise, rehearsal and performance.

DRA 130  Stagecraft  3 cr  A lecture-laboratory course in the fundamentals of stagecraft. This course fulfills the Fine Arts and Humanities requirement in General Education.

DRA 131  Fundamentals of Stage Lighting  3 cr  A lecture-laboratory course in the fundamentals of stage lighting. Prerequisite: This course fulfills the Fine Arts and Humanities requirement in General Education. Pre-requisite: DRA 133 Minimum Grade of C. DRA 133 can be taken concurrently with this course.

DRA 132  Costume Fundamentals  3 cr  A lecture-laboratory course in the fundamentals of costuming for the stage, including basic sewing skills as they apply to theatrical costumes. This course fulfills the Fine Arts and Humanities requirement in General Education.

DRA 133  Computer Graphics Theatre  1 cr  The fundamentals of computer drafting and graphic design for the stage.

DRA 135  Fund of Technical Theatre I  3 cr  A basic survey of fundamentals of scenery and lights for the theatre. This course prepares students for the Essential Skills in Entertainment Technician exams as proctored by the United States Institute of Theatre.

| **DRA 150  Text Analysis** | 3 cr |
| Reading and analyzing play scripts as blueprints for dramatic actions, sights, sounds, characters, and productions. This course fulfills the Fine Arts and Humanities requirement in General Education. |

| **DRA 204  Dance Techniques I** | 3 cr |
| A review and expansion of technique, vocabulary, and history of ballet, jazz, and theatrical dance. Pre-requisite: DRA 104 Minimum Grade of D or DRA 105 Minimum Grade of D. |

| **DRA 205  Dance Techniques II** | 3 cr |
| An exploration of modern dance techniques, vocabulary, and history with ballet as their basis. Pre-requisite: DRA 204 Minimum Grade of D. |

| **DRA 210  Makeup** | 1 cr |
| A study of the materials and techniques of theatrical makeup. |

| **DRA 220  Stage Movement** | 3 cr |
| Through exercises and scene study, student-actors explore movement for the stage. This course fulfills the Fine Arts and Humanities requirement in General Education. Pre-requisite: DRA 121 Minimum Grade of C. |

| **DRA 221  Voice for Actors** | 3 cr |
| A workshop-lecture course in speaking voice and articulation for performance. This course fulfills the Fine Arts and Humanities requirement in General Education. Pre-requisite: DRA 121 Minimum Grade of C. |

| **DRA 230  Drawing & Drafting for Theatre** | 2 cr |
| Drawing and Drafting for the Theatre-An introductory course designed to develop basic skills in freehand drawing and mechanical drafting for theatre and the entertainment industry. |

| **DRA 233  Rendering for the Theatre** | 1 cr |
| This course focuses on the major painting mediums, styles, of illustration, and techniques utilized in the visual presentations of costume, scene and lighting design for the theatre. The student will develop artistic skills and techniques through studio work in drawing and painting projects for the theatre. One (1) hour (second of three one (1) hour courses designed to develop Theatre Design & Technology students portfolio skills). |

| **DRA 235  Fund of Theatrical Design** | 3 cr |
| A basic survey of theatrical design practices including the fundamental elements of line, shape, texture, composition, and color utilized for visual communication. Pre-requisite: DRA 135 Minimum Grade of C and DRA 136 Minimum Grade of C. |

| **DRA 250  Theatre Management** | 3 cr |
| A basic course in the principles of accounting, purchasing, box office management, house management, and promotion. This course fulfills the Fine Arts and Humanities requirement in General Education. |

| **DRA 261  Creative Dramatics** | 3 cr |
| A practical course concerned with improvisational acting with children. Of special interest to students in Education and Leisure Services. |

| **DRA 290  Special Topics -** | 1 TO 3 cr |
| Theatre and drama topics not covered in regular curriculum. May be repeated when subject varies for a total of 9 hours. |

| **DRA 300  Adv Wksp Rehearsal and Perform** | 1 cr |
| Advanced practical experience in acting. May be repeated for a maximum of 4 hours. Prerequisites: Junior status and Permission of Instructor. |

| **DRA 301  Adv Wksp Technical Production** | 1 cr |
| Advanced practical experience in backstage work. May be repeated for a total of 4 hours. Prerequisites: Junior status and permission of Instructor. |

| **DRA 302  Adv Wksp Spec Activities** | 1 cr |
| Advanced practical experience in theatre areas other than acting or technical production. May be repeated three times for a total of four hours. Prerequisites: Junior status and permission of department chair. |

| **DRA 310  Playwriting** | 3 cr |
| Studies in character, plot development, and the one-act play form. Prerequisite: Permission of Instructor. |

| **DRA 315  History of Musical Theatre** | 3 cr |
| A comprehensive overview of the origins and evolution of American Music Theatre to present time. The course also includes both general and specific information toward appropriate performance choices. Cross-listed with MUL 315. Credit cannot be received for both DRA 315 and MUL 315. Pre-requisite: EH 101 Minimum Grade of C and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). |

<p>| <strong>DRA 322  Adv. Voice and Movement</strong> | 3 cr |
| An in-depth continuation of voice and movement training for the actor, with a focus on extending range and expressivity in the voice and body. Emphasis will be placed on understanding and transforming the actor's vocal and physical instrument. DRA 120, 220, and 221, or permission of department chair. Pre-requisite: DRA 120 Minimum Grade of C and DRA 220 Minimum Grade of C and DRA 221 Minimum Grade of C. |</p>

</tbody>
</table>
DRA 490 Special Topics 1 TO 3 cr
Various topics of special interest to Theatre majors.
Restrictions. Limited to undergraduate status. Prerequisite: Permission of department chair. May be repeated once for a maximum of six credit hours when topic varies.

DRA 494 Directed Studies - 1 TO 3 cr
Independent study under faculty supervision, involving research readings, or artistic projects. Restrictions: Limited to undergraduate status. Prerequisites: Permission of department chair. May be repeated seven times for a maximum of eight credit hours.

DRA 496 Theatre Internship 6 cr
Practical experience in stock, repertory, or touring theatre.

Earth Sciences (ES) (ES)

ES 301 Writing for the Earth Sci -W 3 cr
This course is designed to introduce students to basic scientific writing skills. Participants will review the general principles of clear writing and will apply these principles to writing for a specific audience. Particular emphasis will be placed on conveying the significance of research, outlining the aims, and discussing the results for scientific papers. Pre-requisite: EH 101 Minimum Grade of C or EH 102 Minimum Grade of C.

ES 492 Honors Earth Sciences Sem - H 3 TO 4 cr
Multidisciplinary (Geography, Geology, Meteorology) topics not covered in current Department of Earth Sciences courses. Topic announced prior to registration. Prerequisites: acceptance into the University Honors Program, the Earth Sciences Departmental Honors Program, or by permission of the Chair of Earth Sciences. (Completion of this course is required for the Earth Sciences Departmental Honors students)

ES 497 Senior Thesis Prospectus - H 2 cr
With the guidance and advice of a Senior Thesis Committee, students will identify a suitable research project in Earth Sciences (Geography, Geology, Meteorology) and develop a thesis prospectus to conduct this research during their senior year. The Senior Thesis prospectus will be evaluated by the committee which must pass it before thesis research can formally begin. Prerequisites: establishment of a senior thesis committee; acceptance into the Departmental Honors Program.

ES 499 Senior Honors Thesis - H - W 3 cr
With the guidance and advice of a Senior Thesis Committee, students will carry out an in-depth research project in Earth Sciences (Geography, Geology, Meteorology) according to an accepted Thesis Prospectus during their senior year. This course will be repeated for up to six (6) credits. Prerequisites: Geography, Geology, Meteorology major, senior status; acceptance into the Departmental or University Honors Program. Pre-requisite: ES 497 Minimum Grade of C or HON 301 Minimum Grade of C and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

Economics (ECO) (ECO)

ECO 215 Prin of Microeconomics 3 cr
Functions of the price system in a market economy; role of households and business firms in mobilizing resources to meet human needs. The functional and personal distribution and use of income. Relevant problems are discussed.

ECO 216 Prin of Macroeconomics 3 cr
Economics as a science; its nature and functions. Analysis of the American economy from the macroeconomic viewpoint, stressing full employment, monetary and fiscal policy, national income accounting, and their application to current problems and issues.

ECO 300 Introduction to Economics 3 cr
Intensive study of micro-and macroeconomic principles with emphasis on application to current economic issues and problems of interest to public school teachers and students.

ECO 315 Intermediate Microeconomics 3 cr
Operation of the price system, with special reference to a market economy and to related public policies and business issues; analysis of the distribution of income; theories of consumer behavior, the firm, resource allocation, and product distribution. Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 316 Intermediate Macroeconomics 3 cr
The nature and control of forces in a developed economy which determine levels of employment, income and use of resources, and rate and direction of economic growth. Pre-requisite: ECO 214 Minimum Grade of D or ECO 216 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 318 Prin of Managerial Economics 3 cr
Study of economic principles and methods in analyzing problems faced by management of a business or other type of organization; application of economic concepts to finding solutions of such problems that advance the best interest of such organizations. Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.
ECO 322  Economics of Industrial Org  3 cr
An analysis of the effect of modern industrial structure on competitive behavior and performance, in the light of contemporary price theory and the theory of workable competition; a critical evaluation of the legislative content, judicial interpretation, and economic effects of antitrust laws, current problems and proposed remedies.
Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 323  Public Finance  3 cr
The nature, purposes, and economic effects of various types of taxes in a federal government. Problems of tax administration, budgeting, and expenditure of tax revenues. Review of current problems.
Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 330  Current Global Economic Issues  3 cr
Application of the standard economic theory to markets to analyze major issues confronting U.S. consumers and businesses in the global economy. Topics include comparative advantage, commercial policy and protectionism, currency markets and foreign exchange rates, economic integration and free trade areas, international trade accounting, and financial aspects of international trade.
Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 340  Money and Banking  3 cr
Analysis of monetary, credit, and banking institutions in the American economy, emphasizing commercial banks, the Federal Reserve System, and the Treasury. Credit for both ECO 340 and FIN 343 is not allowed.
Pre-requisite: FIN 315 Minimum Grade of D.

ECO 343  Labor Economics  3 cr
United States population analyzed by age, sex, and other characteristics; study of the labor force and its composition; unemployment and underemployment. Education as an investment in productive resources. Economics of leisure, health, housing, recreation, and other areas of human-resource development.
Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 355  Sport & Entertainment Econ  3 cr
The analysis of the economics of decision making and trends in sports and entertainment media. This class will cover cases where economic analysis has caused in behavior, as well as cases where various groups appear to behaving irrationally. Prerequisites: ECO 215 or ECO 300 for non-business and non-economic major.
Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 363  International Economics  3 cr
Modern international trade theory; the balance of payments and the adjustments processes; the evolution of international economic institutions; critical analysis of current international economic policies - trade, monetary, and regional economics organizations.
Pre-requisite: ECO 214 Minimum Grade of D or (ECO 212 Minimum Grade of D or ECO 215 Minimum Grade of D) or ECO 216 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 371  Economic Development  3 cr
Economic development theory with stress on the roles of technology, management, international financing, technical assistance organizations, and international private investment. Factors that control and influence the developmental and growth process either positively or negatively. Prerequisites: ECO 215 or ECO 300 for non-business and non-economics majors.
Pre-requisite: ECO 215 Minimum Grade of C or ECO 300 Minimum Grade of C.

ECO 372  Economics of Urban Development  3 cr
This course addresses contemporary issues of urban and metropolitan areas. The course focuses on understanding the main economic forces leading to the existence of cities and regional agglomeration. Students will also use neoclassical economic theory to critically analyze economic efficiency and the spatial structure of markets. The course includes a wide range of topics such as urban growth, business clusters, poverty, crime, urban transportation, positive and negative externalities in urban areas, land use theory, housing, and the role of local governments.
Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.

ECO 383  Economic History of the US  3 cr
The evolution of the modern United States economic system. The parts played by exploitation of natural resources, investment from abroad, financial institutions, and technology in arriving at the present economic situation. Critical analysis of development just before, during, and after World War II, and of current economic problems.
Pre-requisite: (ECO 215 Minimum Grade of D or ECO 212 Minimum Grade of D) and (ECO 214 Minimum Grade of D or ECO 211 Minimum Grade of D or ECO 216 Minimum Grade of D) or ECO 300 Minimum Grade of D.

ECO 390  Environmental Economics  3 cr
This course introduces students to the economic and environmental implications of natural resource management. The course covers conceptual and methodological topics, including sustainability, which will be applied to contemporary issues i.e. depletion of renewable resources, land and water scarcity, and climate change. Specific topics include the economics of energy, fisheries, forestry, food and pollution.
Pre-requisite: ECO 215 Minimum Grade of D or ECO 300 Minimum Grade of D.
ECO 451 Mathematical Economics 3 cr
Application of business and economics concepts using economic models and equilibrium, matrix algebra, differentiation, comparative static analysis, optimization problems, and other selected techniques.
Pre-requisite: MA 120 Minimum Grade of D and ECO 215 Minimum Grade of D and ECO 216 Minimum Grade of D or ECO 300 Minimum Grade of D. MA 120 can be taken concurrently with this course.

ECO 453 Intro to Econometrics 3 cr
Study of regression analysis and its application to business, economics, and other social-science problems; emphasis on model building, research writing, and econometric forecasting. Students are required to write a term paper on econometric applications under direct supervision of the instructor.
Pre-requisite: (BUS 245 Minimum Grade of D or ST 210 Minimum Grade of D) and (ECO 215 Minimum Grade of D or ECO 216 Minimum Grade of D).

ECO 490 Special Topics 3 cr
Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration.
Prerequisite: Approval of Department Chair.

ECO 491 History of Economic Thought -W 3 cr
Economic ideas from the Greeks to present with intensive study of the classical, neoclassical, and contemporary schools of economic thought.
Pre-requisite: (ECO 215 Minimum Grade of D or ECO 212 Minimum Grade of D) or ECO 216 Minimum Grade of D.

ECO 494 Dir St in Economics 3 cr
Reading and research on selected economic topics under guidance of the departmental faculty. Junior and senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following the evaluation of a written proposal.

ECO 496 Economics Internship 3 cr
The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair. Prerequisites: Junior or Senior standing, declared major in economics, overall GPA of at least 2.0, and Internship Agreement signed by the Department Chair.

ECO 498 Economics Internship II 3 cr
The internship experience is designed to give students practical experience in their field of study. Students complete directed learning experiences under the supervision of the Department Chair. Prerequisites: Junior or Senior Standing, declared major in economics, overall GPA of at least 2.5 and internship agreement signed by the Department Chair.
Prerequisite: ECO 496 Minimum Grade of P.

ECO 506 Economic Theory 3 cr
An introduction to economic theory, including the basic theory of the market (supply and demand); elasticity; introduction to market structure; trade theory; international trade and balance of payments; national income accounting; money and the banking system; macroeconomic theories, and macroeconomic stabilization policy.

ECO 535 Forecasting Business Dynamics 3 cr
Application of business and economic concepts using business cycle models, international trade theories, dynamics of stock market, unemployment, tax policies, monetary policy regulation, and forecasting of important business indicators.

ECO 590 Sp Top - 3 cr
Designed to provide graduate students an opportunity to study selected topics. (A student may count no more than three hours of Special Topics in the MBA degree program.) Prerequisite: Approval of Department Chair.

ECO 594 Independent Study in Economics 3 cr
Readings and research on selected topics. Conferences and formal research report required. Approval of Department Chair.

Edu-K-6 And 6-12 Teacher (EDU) (EDU)

EDU 430L K-6 Internship Lab 3 TO 9 cr
Observation and supervised teaching in elementary or early childhood settings with the opportunity for study and discussion of problems and issues encountered.

EDU 100 Role of the Teacher 2 cr
This course provides a broad overview of education, schools, and teaching as well as an orientation to the K-6 Teacher Education Program.

EDU 290 Special Topics 1 TO 3 cr
Guided study of selected educational tasks (e.g. curriculum revision, classroom materials development, models of learning and teaching) and teaching problems and practices for improving student achievement. Not more than six hours may be earned in Special Topics courses.

EDU 300 Classroom Management 1 1 TO 3 cr
An introductory course in classroom management with emphasis upon effective instructional practices that inhibit student behaviors incompatible with learning. The focus is upon PEPE and how it provides the framework for effective teaching practices through the use of rules and procedures. Co-requisite: EDU 430
Pre-requisite: (EDU 311 Minimum Grade of C and EDU 332 Minimum Grade of C and EDU 335 Minimum Grade of C and EDU 337 Minimum Grade of C and EDU 345 Minimum Grade of C).
EDU 301  Arts in the Elementary School  
Knowledge and skills appropriate to the elementary school art program. Techniques in media for teaching art in the various grades.

EDU 302  Classroom Management 2  
An introductory course in classroom management with emphasis upon effective instructional practices that inhibit student behaviors incompatible with learning. The focus is upon PEPE and how it provides the framework for effective teaching practices through the use of rules and procedures. Co-requisite: EDU 311, EDU 335, EDU 337, EDU 345, EDU 362

EDU 303  Field Experience SPE  
An in-field opportunity for early field-based practicum in a variety of placements. Pre-requisite: EDU 330 Minimum Grade of C.

EDU 311  Partnerships in SPE  
Emphasis is on the special problems found in the home, community, and school of the exceptional child, the teacher, the family, and community resource agencies. Ways for the teacher to form teamships to work collaboratively with all human resources involved in the child's life are explored and ethical and moral standards examined. Co-requisite: EDU 332, EDU 335, EDU 337, EDU 345 Pre-requisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C.

EDU 312  Intell and Physical Disabilit  
A study of the intellectual and physical disability which usually require substantial curriculum adaptations or ecological accommodation. Historical perspectives, etiology, definitions, classification, treatment, social aspects and interdisciplinary team work will be explored. Co-requisite: EDU 313, EDU 331, EDU 336, EDU 362 Pre-requisite: EDU 330 Minimum Grade of C.

EDU 313  Learning & Behav Disorders  
An examination of the definitions, characteristics, and prevalence of children with learning and/or behavioral disabilities. Emphasis is placed on the causes of problems in motor, perceptual, social, academic, affective and behavioral development. Students will be introduced to current service delivery models and the programming options for individuals with learning and behavioral disabilities. Co-requisite: EDU 312, EDU 331, EDU 336, EDU 362 Pre-requisite: EDU 330 Minimum Grade of C.

EDU 321  Field Experience in SpeEd Sett  
A series of in-field opportunities in Special Education. A variety of appropriate placements will be employed depending on each student's interest and needs. May be repeated for credit. Co-requisite: EDU 400

EDU 322  Field Experience in SpeEd Sett  
A series of in-field opportunities in Special Education. A variety of appropriate placements will be employed depending on each student's interest and needs. Students are placed in settings related to the student's major areas of study and co-requisites in progress. May be repeated for credit. Co-requisite: EDU 354

EDU 330  Foundations Read Instruct - W  
A course to orient the study to fundamentals in the teaching of reading and provides practice in basic skills. This course has a required field experience.

EDU 331  Teaching Reading  
A course focusing on methodology, materials, and techniques for developing systematic instruction and diagnosis appropriate for early childhood and elementary children. This course has a required field experience. Co-requisite: EDU 312, EDU 313, EDU 336, EDU 362 Pre-requisite: EDU 330 Minimum Grade of C.

EDU 332  Teaching Language Arts  
A course presenting methods of promoting meaningful language and literacy skills in early childhood and elementary school programs. This course has a required field experience. Co-requisite: EDU 311, EDU 335, EDU 337, EDU 345 Pre-requisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C.

EDU 335  Teaching Mathematics - W  
A course which deals with effective methods of teaching mathematics to elementary school students. Emphasis will be on developing an understanding of numbers, teaching basic operations, and using teaching aids and materials to meet the various needs of elementary age children. This course has a required field experience. Co-requisite: EDU 311, EDU 332, EDU 337, EDU 345 Pre-requisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 313 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and (PRAXIS-Mathematics Subtest 157 or PRAXIS-Mathematics Subtest 157 ) and (PRAXIS-Social Studies Subtest 154 ) and (PRAXIS-Science Subtest 158 ) .
EDU 336 Teaching Social Studies 3 cr
A course using problem solving and independent investigation as means as teaching the relationship of humans to their environment. Objectives, content and procedures are discussed. This course has a required field experience.
Co-requisite: EDU 312, EDU 313, EDU 331, EDU 362
Pre-requisite: EDU 330 Minimum Grade of C.

EDU 337 Teaching Science 3 cr
A course using discovery, inquiry and problem-solving approaches as a means of teaching science. Relationships of science to entire early childhood and elementary curriculum is discussed. This course has a required field experience.
Co-requisite: EDU 311, EDU 332, EDU 335, EDU 345
Pre-requisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 345 Minimum Grade of C and EDU 362 Minimum Grade of C.

EDU 340 Fundamentals of Teaching - W 3 cr
This course provides an introduction to effective instructional practices in the secondary classroom. The focus is on planning for instruction and classroom management. This course has both required class meetings and field experiences.
Pre-requisite: EDM 310 Minimum Grade of C and EDU 400 Minimum Grade of C and EPY 351 Minimum Grade of C.

EDU 341 Middle Level Education - W 3 cr
Philosophy, concepts, and issues of middle level education including the developmental stage of young adolescence, appropriate and responsive curricular, and meeting the physical, emotional, psychosocial, and cognitive needs of diverse learners.
Co-requisite: EDU 342, EDU 363, EDU 451
Pre-requisite: EDU 340 Minimum Grade of C and EDU 453 Minimum Grade of C or EDU 454 Minimum Grade of C or EDU 456 Minimum Grade of C or EDU 457 Minimum Grade of C. EDU 453 and EDU 454 and EDU 456 and EDU 457 can be taken concurrently with this course.

EDU 342 Secondary Field Experience 1 TO 3 cr
Supervised practice in teaching curriculum areas in middle and high school classroom settings during the semester in which block courses are taken.
Co-requisite: EDU 341, EDU 363, EDU 451
Pre-requisite: EDU 340 Minimum Grade of C and EDU 453 Minimum Grade of C or EDU 454 Minimum Grade of C or EDU 456 Minimum Grade of C or EDU 457 Minimum Grade of C. EDU 453 and EDU 454 and EDU 456 and EDU 457 can be taken concurrently with this course.

EDU 345 Field Experience 1 TO 3 cr
Supervised practice in teaching curriculum areas in the elementary or early childhood classroom setting during the semester in which sequence courses are taken.
Co-requisite: EDU 311, EDU 332, EDU 335, EDU 337
Pre-requisite: EDU 303 Minimum Grade of C and EDU 312 Minimum Grade of C and EDU 331 Minimum Grade of C and EDU 336 Minimum Grade of C and EDU 362 Minimum Grade of C.

EDU 346 K-6 Education 3 cr
This course will introduce the roles of the teacher in working with children in the elementary grades.

EDU 348 P-3 Education 3 cr
This course will introduce the roles of the teacher in working with children during the early childhood years (preschool through 3rd grade)

EDU 352 Literature for Adolescents 3 cr
This course will introduce the roles of the teacher in working with children from pre-kindergarten through the primary grades. History, management, and parent education techniques are presented.

EDU 354 Serving Studnts Severe Disabil 3 cr
Curriculum and methods for individuals who exhibit significant challenges in the areas of cognitive, motor, self care, communicative, and/or social behaviors. Emphasis is on physical management, class/individual scheduling, adapted aids and equipment, task analysis, and functional life skills.

EDU 362 Behavior Mgmt of Except Child 3 cr
Presentation of the principles and applications of behavioral modification, data collection procedures, and single-subject research designs as related to exceptional children and youth in special education environments.
Co-requisite: EDU 312, EDU 313, EDU 331, EDU 336

EDU 363 Tchg Adptive Cur Thru Beh/Clsrm 3 cr
An examination of regular and special education K-12 curricula, materials, and procedures. Specific emphasis will be placed on the selection modification, and adaptation of curricula, materials, and procedures to meet the needs of individuals with learning and behavioral disabilities.
Pre-requisite: EDU 340 Minimum Grade of C.

EDU 372 Behav Mgt Exceptional Child 3 cr
Presentation of the principles and applications of behavior analysis, data collection procedures, and single subject research designs as related to exceptional children and youth.

EDU 373 Teaching Reading to Stu Disab 3 cr
Introduces the student to the curriculum, teaching the methodologies and instructional activities and materials associated with effective and appropriate developmental and functional reading instruction for students with disabilities.

</tbody>
</table>
EDU 468 Internship - Science 3 TO 9 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the 6-12 program. Students will be placed with a person holding a Masters degree and a valid teaching certificate in the appropriate field.
Pre-requisite: EDU 341 Minimum Grade of C and EDU 456 Minimum Grade of B and (PRAXIS-Gen Sci Cont Knowledge 152 or PRAXIS-Gen Science Cont Knowl 152 or PRAXIS-Chem Cont Knowledge 150 or PRAXIS-Chemistry Cont Knowl 150 or PRAXIS-Physics Cont Knowledge 138 or PRAXIS-Biology Cont Knowledge 150 ).

EDU 469 Internship - Math 3 TO 9 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the 6-12 program. Students will be placed with a person holding a Masters degree and a valid teaching certificate in the appropriate field.
Pre-requisite: (EDU 341 Minimum Grade of C and EDU 454 Minimum Grade of B and PRAXIS-Math Cont Knowledge 160 ).

EDU 490 Special Topics 3 cr
Guided study of selected educational tasks (e.g. curriculum revision, classroom materials development, models of learning and teaching) and teaching problems and practices for improving student achievement. Not more than six hours may be earned in Special Topics courses.

EDU 494 Directed Research Studies 1 TO 3 cr
No more than six hours can be accepted for a Bachelor's Degree and Class B Certificate.

EDU 495 K-6 Internship SPE 3 TO 9 cr
Observation and supervised K-6 classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.
Co-requisite: EDU 430
Pre-requisite: (EDU 302 Minimum Grade of C and EDU 311 Minimum Grade of C and EDU 335 Minimum Grade of C and EDU 337 Minimum Grade of C and EDU 345 Minimum Grade of C and EDU 362 Minimum Grade of C) and (PRAXIS-Read/Lang Arts Subtest 157 and PRAXIS-Mathematics Subtest 157 and PRAXIS-Social Studies Subtest 154 and PRAXIS-Science Subtest 158 and PRAXIS-Teaching Reading CB 159 ).

EDU 496 Internship 6-12 9 cr
Observation and supervised classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.
Pre-requisite: EDU 372 Minimum Grade of C and EDU 363 Minimum Grade of C.

EDU 497 P-3 Internship 3 TO 9 cr
Observation and supervised classroom teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.
Pre-requisite: EDU 432 Minimum Grade of C and EDU 433 Minimum Grade of C.

EDU 498 P-3 Internship 1 TO 3 cr
Observation and supervised teaching experience providing the opportunity to synthesize all previous instruction. This culminating activity provides opportunity for study and discussion of problems and issues encountered in the practicum situation.
Pre-requisite: EDU 348 Minimum Grade of C and EDU 398 Minimum Grade of C.

EDU 499 Senior Honors Project - H 3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of elementary/early childhood study, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to six hours. Prerequisite: Participant in honors program and junior level status.

EDU 500 Capstone Portfolio 0 cr
The capstone portfolio is a 0 credit course for graduate students whose programs require a capstone portfolio as all or part of their comprehensive exam. Students will enroll in this course for their final semester. The portfolio will be developed under the guidance of the student's academic advisor and other departmental faculty, and will demonstrate mastery of content knowledge, professional dispositions and skills.

EDU 567 Multicultural Exp in Schools 3 cr
In an increasingly diverse society, teachers must be able to work with students with form a variety of backgrounds, some quite different from teachers' own cultural backgrounds. This course responds to the growing need for better training for teachers in how to work with a diverse population, increase academic achievement, and prepare students from a global workplace.

EDU 640 Instructional Development 3 cr
Preparation of a modular program of instruction which incorporates all elements of the instructional-design process.

EDU 650 Instructional Techniques 3 cr

EDU 692 Research Proj Seminar 3 cr
Survey of both current and classic research in education. Students will identify a research problem of significance in their area of specialization and develop a strategy or research design to solve this problem.
Pre-requisite: IDE 510 Minimum Grade of B.
Educational Foundations (EDF) (EDF)

EDF 207 Law and Politics in Educ 3 cr
Examines the legal and political considerations that affect education in America. Emphasis will be placed on the practical applications of these legal and political considerations to the operation of schools.

EDF 211 Clinical and Lab Experience 0 cr
Provides relevant clinical and laboratory experiences directly related to the several academic disciplines that constitute the social foundations of education. Must be taken with EDF 315. Requires a special fee.
Co-requisite: EDF 315

EDF 290 Sp Top - 1 TO 3 cr
Varies in content in one disciplinary area of educational foundations (e.g., history of education or anthropology of education) or in an interdisciplinary area (e.g., multicultural education). May be repeated for credit when course content varies.

EDF 300 Gender & International Devel-W 3 cr
This course introduces concepts in gender, international development and global education through an examination and critique gender issues in developing nations and international efforts to address these concerns from the 1970's to the present with particular emphasis on the context of women. Includes formal and nonformal education of women, cultural differences (reproduction, marriage, male/female hierarchies) affecting life opportunities, rural vs. urban issues, politics, social class influences, international movements, and organizations and efforts to empower girls and women to advance their lives within the context of gendered social roles. Analysis of issues through various lenses including the Gender Equality Continuum. Students will interact directly with individuals in the field via videoconferencing and other modes of electronic communication. Assessment will center on a guided project and experience specific to individual student interests.
Pre-requisite: EH 102 Minimum Grade of C.

EDF 310 International Develop & Educ-W 3 cr
A study of international development and education in global and gender contexts that includes an examination of policy, structure, sociological issues (gender, religion, social class), and formal, adult and nonformal education. Major agency providers in the field and employment opportunities in the public and private sectors will be reviewed. Students will interact with individuals in the field through videoconferencing, face-to-face dialogues and other electronic interactions. Assessment will center on a guided project and experience specific to individual student interests. This course helps prepare students for a summer study abroad service learning experience in a developing country.
Pre-requisite: EH 102 Minimum Grade of C.

EDF 315 Education in Diverse Society 3 cr
Focused on the effects of diversity on teaching and learning this course is a study of the social context of schooling from historical, philosophical, sociological, political, and comparative perspectives.

EDF 320 Compar & Intl. Gender & Fam 3 cr
The content will focus on comparative and international gender and family issues regarding non-formal adult health education and services. The student will do readings in this content area and compare human rights related to gender and family roles, woman's health issues and family planning services across the nations, how these relate to life opportunities for women and men. Programs providing related services and education will be analyzed. Students will dialogue with individual working in the field to gain a deeper understanding of contemporary real-world endeavors. Assessment will center on a guided project and experience specific to individual student interests and includes a service learning component at a local agency or an agency serving a developing country.

EDF 325 Global Gender Perpec in Ed 3 cr
An examination of gender and race, class, religion, language and ethnicity in formal and nonformal education in US and global contexts that develops cultural competencies and prepares students with an interest in international development/education careers. Students will interact directly with professionals in the field from various cultural backgrounds via videoconferencing and other modes of electronic communication. Assessment will center on weekly applications of course topics to real world situations and guided project or service learning specific to individual student interests.
EDF 330  Amer Ed Comp Global Framework  3 cr  
An overview of education in its three aspects: formal, non-formal and informal. It will include the history, philosophy, sociology, policy and structure of the American education in comparison with other countries' systems. A regional approach will include northern Africa, the Indian Sub-continent, Asia, pacific Islands and Australia, Central America and the Caribbean, South America, Canada and Europe. Assessment will center on weekly applications of course topics to real world situations and a guided project or service learning experience specific to individual student interests.

EDF 335  Intern. Devel & Global Ed  3 cr  
A study of current problems and issues in non-formal, informal and all levels of formal education. Includes poverty, inequality and human rights and related structures, policies and programs. Includes poverty, inequality and human rights and related structures, policies and programs. Major issue areas include health, gender, rural development, agriculture, civil society, economics, sustainability, politics and reform. Content may vary according to currently important issues. Assessment will center on weekly applications of course topics to real world situations and a guided project or service learning experience specific to individual student interests.

EDF 490  Special Topics  1 TO 3 cr  
Varies in content in one disciplinary area of educational foundations (e.g., history of education or anthropology of education) or in an interdisciplinary area (e.g., multicultural education). May be repeated for credit when course content varies.

EDF 494  Directed Studies  1 TO 3 cr  
Directed study. Prerequisite: Permission of Department. (No more than two directed studies can be counted toward the Bachelor's Degree and Class B Certificate.)

EDF 501  Cult Found of Education  3 cr  
A presentation and investigation of basic concepts, issues, and principles of American education within a social scientific framework; particular emphasis is on multicultural concerns and strategies.

EDF 515  Multicultural Education  3 cr  
In a multicultural society, teachers must be able to work with students from a variety of backgrounds—some quite differently from the teachers' own. Four cultural factors are the focus of this course: social class, race, gender, and ethnicity. Teachers sensitive to these factors can prepare students to survive and function in the dominant culture without sacrificing pride in the students' own cultures.

EDF 590  Sp Top -  1 TO 3 cr  
Course may vary in content or may be supervised study in one disciplinary area of educational foundations (e.g., history of education or anthropology of education) or in an interdisciplinary area (e.g., multicultural education). May be repeated for credit when course content varies.

EDF 594  Dir St and Research  1 TO 3 cr  
Students explore problems and issues of special interest or significance in educational foundations. Not more than three semester hours of any departmental 594 courses can be accepted toward a degree program.

EDF 610  History of American Educ  3 cr  
Designed to give the student an historical perspective on important issues in American education. Among these issues are the influence of class, race, gender, ethnicity, and exceptionality on educational attainment; the control of public education; the debate over public schools versus private schools; the status and work of teachers; and the role of education in social change. The student will relate the past to the present in analyzing these issues.

EDF 615  Sem in Ed Policy Studies  3 cr  
This course offers advanced graduate students the opportunity to examine educational policy and policy-making from sociocultural, political, historical, philosophical, and comparative and international perspectives. After analyzing a common core of issues, students will investigate a topic of their choice using research skills from the educational foundations disciplines.

EDF 620  Compar-Internat Educ  3 cr  
Comparative and International Education will examine different world cultures and nations and their educational systems. The course will explore the various outcomes of education (achievement, status, employment, living conditions) and will examine the world crisis in education. In all, a study of education from a world-wide perspective will help illuminate the educational purposes, programs, and achievements of schools in the United States.

EDF 690  Sp Top -  1 TO 3 cr  
Course may vary in content or may be supervised study in one disciplinary area of educational foundations (e.g., history of education or anthropology of education) or in an interdisciplinary area (e.g., multicultural education). May be repeated for credit when course content varies.

EDF 694  Dir St and Research  1 TO 3 cr  
Exploration of problems and issues of special interest or significance for advanced students. No more than three semester hours of any departmental 694 courses can be accepted toward a degree.

Educational Leadership (EDL) (EDL)
EDL 595A  Internship A  1 cr
The internship is a supervised learning experience in several work settings which simulates the reality of Education Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.
Co-requisite: EDL 513

EDL 595B  Internship B  1 cr
The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.
Co-requisite: EDL 517

EDL 595C  Internship C  1 cr
The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.
Co-requisite: EDL 525

EDL 595D  Internship D  1 cr
The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.
Co-requisite: EDL 550

EDL 595E  Internship E  1 cr
The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.
Co-requisite: EDL 557

EDL 595F  Internship F - Related Topics  1 cr
The internship is a supervised learning experience in several work settings which simulates the reality of Educational Leadership work situations. The internship provides an opportunity to apply the theories and concepts learned during the student's graduate program. Students are expected to complete no less than 50 hours for each semester hour earned.

EDL 699A  Research Project  1 TO 3 cr
A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.
Pre-requisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B.

EDL 699B  Research Project  1 TO 3 cr
A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.
Pre-requisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B.

EDL 699C  Research Project  1 TO 3 cr
A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.
Pre-requisite: IDE 692 Minimum Grade of B.

EDL 798A  Research Project  1 TO 3 cr
A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.
Pre-requisite: IDE 792 Minimum Grade of B.

EDL 798B  Research Project  1 TO 3 cr
A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.
Pre-requisite: IDE 792 Minimum Grade of B.

EDL 798C  Research Project  1 TO 3 cr
A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program.
Pre-requisite: IDE 792 Minimum Grade of B.

EDL 410  Leadership Development  1 cr
This course is for undergraduates who are, or aspire to be, leaders. Faculty from throughout the University will direct weekly class sessions. Requires permission of the Dean of Students.

EDL 501  Theories Instructnl Leadership  3 cr
The need for instructional leaders to understand and be able to operate within the larger context of community effect on opportunities for all students is addressed. Cooperation among schools, the district, parents, and the larger community as essential to the success of instructional leaders and students and ethical practices are emphasized.
EDL 502  Data-Driven Instrucnl Leadrship  3 cr
This course stresses the engagement of the school community in developing and maintaining a shared vision; planning effectively; using critical thinking and problem-solving techniques; collecting, analyzing, and interpreting data; allocation of resources; and evaluation of results for the purpose of continuous school improvement.

EDL 503  Supervision & Prof Development  3 cr
This course addresses how the instructional leader recruits, selects, organizes, evaluates, and mentors faculty and staff to accomplish school and system goals.

EDL 504  Ethical & Legal Dimens Sch Ldr  3 cr
Students completing this course will demonstrate understanding of the legal system of schools. Students will be able to relate constitutional, federal, state, and local requirements as they concern students, employees, teachers, and instructional program administration. The student will demonstrate an understanding of the concepts of honesty, integrity, and fairness.

EDL 505  Bus Mgmt of Lrng Organizations  3 cr
This course explores leadership skills related to group dynamics, problem identification, accountability, diversity, economic levels, and their relationship to financing schools. Internal and external public relations and political factors which impact the funding of school will also be presented.

EDL 506  Teaching and Learning Leaders  3 cr
Student will acquire the knowledge to ensure that decisions about curricular, instructional strategies, assessment and professional development are based on sound research, best practices, and other contextual information needed to align the curricula with student needs.

EDL 510  Theories of Adlt Tchg & Lrng  3 cr
This course is an introduction to the pedagogy of teaching adult learners. Topics will include basic instructional design, strategies to meet needs of adult learners, higher order questioning, student assessment, and mechanisms for providing feedback to students. The class will model effective teaching and assessment practices. Participants will be expected to demonstrate effective teaching in a summative class presentation.

EDL 512  Community Development  3 cr
Provides the field of community development, including basic terminology, concepts, methods and literature. Purposes are to present conceptual foundations of community development, provide some experiences in practical application, and lay foundations for further study and practice in the field.

EDL 513  Instr Lead and Curr Dev  3 cr
Students in this course will learn to participate in the process of instructional improvement, adaptation to the needs of children and local communities, and instructional leadership within schools. The course will include staff development, instructional evaluation and assessment, school effectiveness concepts, government requirements, cultural diversity, curriculum development, problem solving, small group leadership, conflict management, empowerment, professional ethics, and other interpersonal skills applied to instructional development situations.
Co-requisite: EDL 595A

EDL 517  Education Law  3 cr
Students completing this course will demonstrate understanding of the legal system of schools. Students will be able to relate constitutional, federal, state, and local requirements as they concern students, employees, teachers, and instructional program administration. Students will understand statutory rights of certified and non-certified personnel in Alabama, including due process, tenure, transfer, suspension, and termination, and will be able to investigate legal matters affecting the administration of schools.
Co-requisite: EDL 595B

EDL 525  School Finance  3 cr
This course explores leadership skills related to group dynamics, problem identification, accountability, diversity, economic levels, and their relationship to financing schools. Internal and external public relations and political factors which impact the funding of school will also be discussed. Fiscal management, including the Alabama Local School Accounting and Reporting system, will be analyzed.
Co-requisite: EDL 595C

EDL 530  School Dist Leadership  3 cr
This course describes the unique forces that shape the role and functions of the school superintendent. The management of conflict is explored as well as the management of all aspects of this school system. The concept of the administrative team is also explored and examined.

EDL 545  Secondary School Leadership  3 cr
Provides understandings and skills in the leadership and management of secondary schools. Emphases are placed upon the administrator’s role in staff and student personnel administration, program development, and building operations.

EDL 546  Elem School Leadership  3 cr
Provides an understanding of the organizational and various other characteristics of a good elementary school with emphasis on leadership.

<td>Sem Prog Curriculum Dev</td>
<td>3 cr</td>
<td>Designed to assess and improve the student's level of competency in program development skills, instructional strategies, systems analysis, and change innovation.</td>
</tr>
</tbody>
</table>
EDL 631  Sem Ed Management Skills  3 cr
Designed to assess and improve the student's knowledge of decision-making styles, problem-solving processes, leadership skills, implementation of organizational change, and physical environments which promote productivity. Additionally, when appropriate to the candidate's expected leadership position, current knowledge of law, finance, plant management, and professional negotiations will be stressed.

EDL 689  Quantitative/Action Research  3 cr
Basic principles of quantitative and action research for decision making and problem solving in the educational environment.

EDL 690  Sp Top -  1 TO 3 cr
May be a content-varying course or may be guided supervision in the identification and completion of educational tasks as well as supervision in the organization and application of selected learning activities to acquire and enhance leadership skills. May be repeated for credit when course content varies.

EDL 694  Dir St and Research  1 TO 3 cr
Students explore problems and issues of special interest or significance to advanced students. Not more than three semester hours of any department 694 courses can be accepted toward a degree.

EDL 695  Mentoring Leadership  3 cr
This course is a learning experience in mentoring relationships. The course provides an opportunity to apply the theories and concepts learned during the student's advanced graduate studies. The student will learn mentoring skills and serve as a mentor for students interested in educational administration or new to the field of administration.

EDL 699  Research Project  1 TO 3 cr
A supervised field project, study, or investigation in Educational Leadership. The student will conduct an investigation and apply concepts and skills learned during the sixth-year program. Pre-requisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B.

EDL 701  Adv Organizational Theory  3 cr
An in-depth exploration of organizing in educational settings. Organizational theories and models are examined, as is their application to educational settings, particularly when challenges or changes are introduced.

EDL 702  School Finance  3 cr
General study of finance at local, state, and federal basis. Include principles of taxation, the concepts of equity and adequacy, acceptable practices in securing and administering school funds, and acceptable accounting and business procedures. Explores the unique characteristics of the Alabama Tax structure, its history, and impact on the funding of education.

EDL 703  Adv School Leadership  3 cr
This course explores research-based practices of effective leadership in P-12 education settings. The role of mission and vision in the leadership of an organization, decision-making models, and leadership styles will be explored.

EDL 720  Global Education  3 cr
This course focuses on similarities and differences in the ways various countries educate their citizens from early childhood to adult learners.

EDL 732  Ethics and Law for Ed Leaders  3 cr
An examination of ethical and legal issues present in educational settings, including primary, secondary, and postsecondary education.

EDL 799  Research/Dissertation  1 TO 12 cr
Directed dissertation research in the field of educational leadership. Faculty advisor approval required.

Educational Media (EDM) (EDM)

EDM 595A  Internship A  1 cr
The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed. Pre-requisite: EDM 581 Minimum Grade of B.

EDM 595B  Internship B  1 cr
The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed. Pre-requisite: EDM 580 Minimum Grade of B.

EDM 595C  Internship C  1 cr
The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed. Pre-requisite: EDM 583 Minimum Grade of B.

EDM 310  Microcomputing Systems  3 cr
Basic understanding of current and emerging technologies for instructional purposes. Requires a special fee.

EDM 312  Ed Tech -  3 cr
Application of current educational technology in various instructional environments. Laboratory experience is given with selected software programs. May be repeated when technological application changes.

EDM 385  Methods Instr Comm  3 cr
Application of current concepts in communication and instructional system design to elementary and secondary teaching. Operation of basic mediaware and overview of literature related to media use are stressed.
EDM 430  Workshop in Educ Media   1 TO 9 cr
In-depth study of operational experience in current trends and techniques in educational media research.

EDM 482  Prep Instr Materials     3 cr
Basic elements in the planning preparation, and evaluation of teacher-produced instructional materials.

EDM 490  Sp Top -                  3 cr
Investigation of contemporary topics of interest in Educational Media. Requires permission of the department.

EDM 494  Dir St -                  1 TO 3 cr
Directed study in Educational Media. No more than two directed studies can count toward the Bachelor's degree. Required departmental approval.

EDM 510  Microcomputing Systems in Ed  3 cr
Application of current and emerging technologies that support and enhance instruction and can be used to improve student achievement.

EDM 520  Research in Ed Tech        3 cr
Introduction to history and theories of computer use in education.

EDM 530  Workshop in Ed Media       1 TO 9 cr
In-depth study and operational experience in current trends and techniques in educational media research.

EDM 533  Curriculum Media for Children  3 cr
This course explores media used for learning and enjoyment with children in preschool through grade eight. Other topics include: the professional roles and responsibilities of a collection developer, the influence of child development and curriculum on collection development, an overview of the marketplace, strategies to encourage teachers to use media center materials in teaching, and related research.

EDM 540  Curr Media for Children & Yth  3 cr
EDM 552  Curr Media for Young Adults  3 cr
This course initiates or extends a student's knowledge of how to identify, select, and use library media resources for students in grades 6 through 12. Other topics include: the role of a library media specialist in establishing and maintaining a collection of resources; steps that can be taken to encourage students and teachers to use the collection; related research; and ways professionals can keep abreast of the latest knowledge, practices, and resources.

EDM 581  Media Center Management     3 cr
This course covers the procedures and routines for effective media center management, including acquiring, organizing, cataloging, maintaining, and inventorying a relevant collection. Other topics include: selecting resources to support the total curriculum and budget, responding to the needs of a school's demographic population, assisting students and teachers in the application of information skills, and applying the fundamentals of library design to achieve an effective environment for learning and leisure use.

EDM 582  Prod of Curriculum Media    3 cr
Provides instruction in the elements of planning, preparation and evaluation of professional circular materials for group and individual instruction. Pre-requisite: EDM 510 Minimum Grade of B or EDM 520 Minimum Grade of B.

EDM 583  Library Media Programs      3 cr
This course covers the professional responsibilities for planning, implementing, and evaluating a library media program that serves a school program. Emphasis is placed on curriculum, leadership, environment, teaching and learning styles, a planning model, collaboration, staff development, program administration and evaluation activities, and ways in which research can be used to help shape an effective program.

EDM 584  Educational Technology Design    1 TO 3 cr
Design and evaluation of information technology hardware, software, and networked information resources that support classroom pedagogy, educational administrative services, and student learning. Pre-requisite: EDM 520 Minimum Grade of B and ISD 581 Minimum Grade of B.

EDM 585  Admin Educ Media Center      3 cr
General practices and procedures for establishing, organizing and operating the media center. Students submit plans for hypothetical or actual situations.

EDM 590  Sp Top -                    0 TO 3 cr
Sp Top - presents topics of contemporary interest in the area of Educational Media.

EDM 591  Trends and Issues in Ed Tech  3 cr
Students will investigate current research as well as discuss emerging trends and developmental issues in the fields of educational media and instructional technology and their use as a pedagogical tool in P-12 schools. Pre-requisite: EDM 510 Minimum Grade of B or ISD 581 Minimum Grade of B.

EDM 594  Dir St and Research -        1 TO 3 cr
Students explore problems and issues of special interest or significance in Educational Media. Not more than three semester hours may be accepted toward degree programs.
EDM 595  Internship - 1 TO 9 cr
The internship is a supervised learning experience in a work setting similar to that in which a media specialist eventually will be employed. Departmental approval is required.

EDM 599  Thesis 1 TO 9 cr
A student selects a project, study or investigation related to the area of specialization in Educational Media. The project forms a basis for the thesis. A thesis committee provides direction during the investigation and during the writing of the thesis.

EDM 610  Adv Prod Curric Media 3 cr
The planning, design and preparation of photographic and audio instructional materials will form the basis of comprehensive, sophisticated, software systems.

EDM 685  Administering Ed Media Center 3 cr
Practices and procedures for administering the educational media center.

EDM 689  Info Storage and Retrieval 3 cr
Examination and application of computer systems to school library media centers.

EDM 690  Sp Top - 3 cr
Presents topics of contemporary interest in the area of Educational Media.

EDM 696  Adv Ref and Selection Resource 3 cr
Bibliographic organization and reference use of professional resources in education, including governmental documents, publications of educational associations, professional journals and indices, research reports and computerized bibliographies.

EDM 698  Advanced Cataloging 3 cr
Modern trends in cataloging with emphasis on standards for cataloging and educational media.

EDM 699  Research Project 3 cr
Provides an opportunity to synthesize and apply the various program components in a selected instructional setting. May be repeated for a total of 6 semester hours.

EDM 935  The Adolescent in School 3 cr
Assists future educators to understand adolescent development and behavior of students in the middle and high schools. Issues and problems include the school's role in the social, emotional, and intellectual development of middle and secondary school students from diverse multicultural backgrounds; student-teacher and peer relationships; and the academic and vocational planning process.

EPY 315  Human Growth & Development 3 cr
A study of the physical, mental, social and emotional development of young people from conception to late adolescence.

EPY 355  Eval of Teaching-Learning 3 cr
The application of formative and summative evaluative concepts in building and interpreting tests in the educational setting.

EPY 455  Eval of Teaching-Learning - W 3 cr
The application of formative and summative evaluative concepts in building and interpreting tests in the educational setting.

EPY 490  Sp Top - 3 cr
Study of a significant topic, theory, model or problem in behavioral studies. May be repeated once for credit when content varies.

EPY 494  Directed Study 1 TO 3 cr
Directed individual study and research. Consent of department chair is required. (No more than two directed studies can be counted toward the Bachelor's degree and Class B Certificate).

EPY 502  Psy Prin Learning 3 cr
Psychology of learning as it pertains to education. Emphasis is on both the practical application of learning principles in educational and training classroom situations and theories of learning.

EPY 521  Human Dev and Behavior 3 cr
A study of the crucial developmental principles of human development and behavior focusing on: developmental tasks over the life span; growth patterns of the diverse subcultures emphasizing attitudes, values, and learning styles; family, school, and community impact on people of all ages living and growing in a multicultural society.

EPY 525  Assessment & Research in Educ 3 cr
This course is offered as part of the Alternative Masters Degree in Education. Upon completion of the course, students will be able to construct, evaluate, administer, and interpret classroom and school-related assessment. In addition, students will be prepared to be effective consumers of research reports, writings, and results in professional literature in their field.
EPY 555  Tests-Measurement and Eval  3 cr
Understanding and interpreting the meaning of test scores. Technical qualities desired in a test. Techniques for obtaining information about clients and/or students. Using this information in counseling, consulting, and teaching. Cultural bias in tests. Problems of testing and obtaining information about clients and/or students with diverse backgrounds.

EPY 556  Ed Testing - Wechsler Scales  3 cr
Includes basic theories of intelligence, basic concepts and principles of intelligence testing, extensive practice in administering, scoring and interpreting the Wechsler Adult Intelligence Scale, the Wechsler Intelligence Scale for Children and the Wechsler Preschool and Primary Scales of Intelligence in a wide variety of educational settings.
Pre-requisite: EPY 555 Minimum Grade of B.

EPY 557  Ind Intel Test -Stanford-Binet  3 cr
Includes basic theories of intelligence, basic concepts and principles of intelligence testing, extensive practice in administering, scoring and interpreting the Stanford-Binet Scale in a variety of educational settings. Competencies in consulting with professional personnel and with parents will be emphasized.
Pre-requisite: EPY 555 Minimum Grade of B.

EPY 558  Ed Testing - Kaufman Scales  3 cr
The Kaufman Assessment Battery for Children and the Kaufman Adolescent and Adult Scale are the basic instruments used for extensive practice in administering, scoring, and interpretation of intelligence. The various theories of intelligence, especially those of Horn and Cattel, Luria, Sperry and Neisser are emphasized.
Pre-requisite: EPY 555 Minimum Grade of B.

EPY 590  Sp Top -  3 cr
Guided supervision in the completion of learning tasks in educational psychology such as program design and revision, study of a significant topic, theory, model, and supervision of selected learning activities to acquire specific counseling and testing skills.

EPY 594  Dir St and Research  1 TO 3 cr
Students explore through directed study of problems and issues of special interest or significance in Educational Psychology. Not more than three semester hours of any departmental 594 courses can be accepted toward a degree program.

EPY 602  Advanced Theories of Learning  3 cr
A study of the major psychological theories, models, research and principles that apply to the teaching and learning process. Special attention will be given to cognitivist approaches.
Pre-requisite: EPY 502 Minimum Grade of B.

EPY 610  Indiv Diff Among Learners  3 cr
Examination of individual and developmental differences as related to learning, performance and behavior. Intelligence attitudes, cognitive and learning styles, anxiety, prior knowledge, and locus of control are among the topics discussed. Models and methods for using learner characteristics in instructional design, teaching practices, and research are considered.

Electrical Engineering (EE) (EE)

EE 220  Circuit Analysis I  3 cr
Resistive networks with independent and dependent sources: Ohm's law; Kirchhoff's law; nodal and loop analysis; network theorems; energy storage elements (capacitors and inductors); operational amplifiers; steady state AC analysis; and introduction to PSpice. Fee.
Pre-requisite: MA 125 Minimum Grade of C and PH 201 Minimum Grade of C.

EE 223  Network Analysis  3 cr
Transient analysis of RLC circuits; Three-phase systems; power-factor correction in three-phase power systems; magnetically coupled networks; Operational amplifiers; network frequency response functions and resonance; Fourier series.
Pre-requisite: EE 220 Minimum Grade of C and PH 202 Minimum Grade of C and MA 227 Minimum Grade of C and MA 238 Minimum Grade of C and MA 227 and MA 238 can be taken concurrently with this course.

EE 227  Circuits and Devices Lab  1 cr
Pre-requisite: EE 223 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of D). EE 223 and EH 102 can be taken concurrently with this course.

EE 263  Digital Logic Design  3 cr
Number systems, introduction to basic logic circuits, analysis and design of combinational and sequential logic circuits, HDL based logic circuit simulation and design. Fee.
Pre-requisite: CIS 210 Minimum Grade of C.

EE 264  Microprocessor Sys-Interfacing  3 cr
Small computer organization, assembly and machine level programming, microprocessor architectures and instruction sets, microprocessor and microcontroller system design, and microprocessor based peripheral interfacing.
Pre-requisite: EE 263 Minimum Grade of C or CSC 228 Minimum Grade of C.
EE 268 Digital Logic Design Lab  
1 cr  
A series of digital logic circuit experiments and simulations using TTL/CMOS integrated circuits designed to reinforce the material presented in EE 263. Design projects include standard SSI and MSI digital circuit based simulation and experiments. Fee.  
Pre-requisite: EE 263 Minimum Grade of C or CSC 228 Minimum Grade of C.

EE 302 Computer Methods in EE - CpE  
1 cr  
Introduction to the use of computer softwares such as MATHCAD/ MATLAB and PSPICE/ ELECTRONIC WORKBENCH for the analysis of engineering related problems and the solution of electric/ electronic circuits.  
Pre-requisite: EE 223 Minimum Grade of C and EE 263 Minimum Grade of C.

EE 321 Signals, Systems & Transforms  
3 cr  
Modeling of analog and discrete-time signals and systems, time domain analysis, Fourier series, continuous and discrete time Fourier transforms and applications, sampling, z-transform, state variables, analysis of signals and systems and basic filter design, filter implementation using MatLab. Fee.  
Pre-requisite: EE 223 Minimum Grade of D and MA 238 Minimum Grade of C.

EE 322 Prob, Rand Sigs & Stat Anlys  
3 cr  
Discrete and continuous probability distributions; random variables; Bernoulli trials; hypothesis testing; confidence intervals; Anova multiple comparisons; Bayes' theorem; estimation; sampling; random processes and random signals in linear systems. Probability applications in computer and electrical engineering. Fee.  
Pre-requisite: EE 223 Minimum Grade of D and MA 238 Minimum Grade of C.

EE 328 Feedback Control Systems  
3 cr  
Pre-requisite: EE 321 Minimum Grade of D.

EE 331 Physical Electronics  
3 cr  
Introduction to quantum concepts; particles in one dimensional potential well; tunneling. Silicon band structure, electrons and holes. Drift and diffusion current density; band bending; Einstein diffusion coefficient; recombination/generation. The pn junction; step and linear junctions; depletion layer. I-V characteristics of a pn junction and steady-state carrier concentrations at junctions. Bipolar junction transistor fundamentals; pnp and npn types; common emitter configuration, biasing and gain. Fee.  
Pre-requisite: MA 238 Minimum Grade of C and PH 202 Minimum Grade of C and CH 131 Minimum Grade of C.

EE 334 Digital Electronics  
3 cr  
Review of semiconductor diodes and diode circuits; Introduction to digital electronics; Review of BJTs, operating characteristics and DC analysis; TTL logic gates; Field effect devices, operating characteristics and DC analysis; NMOS, PMOS, CMOS devices and logic circuits, transmission gates; Design considerations.  
Pre-requisite: EE 331 Minimum Grade of D.

EE 354 Electromagnetics I  
3 cr  
Basic concepts of electrostatics, electric potential theory, electric fields and currents, fields of moving charge, Poisson's and Laplace's equations, magnetostatics, metallic conductors and dielectric materials, electric-scalar and magnetic-vector potentials and boundary conditions, general time varying fields and Maxwell's equations.  
Pre-requisite: MA 237 Minimum Grade of D and MA 238 Minimum Grade of C and PH 202 Minimum Grade of C.

EE 355 Electromagnetics II  
3 cr  
Lumped versus distributed circuit components, capacitance, inductance and mutual inductance, uniform plane waves, power flow and skin effect, reflection, transmission and propagation of uniform plane waves through different media, wave polarization, transmission lines, waveguides, optical fiber, electromagnetic radiation and antennas, the Radar equation.  
Pre-requisite: EE 354 Minimum Grade of D.

EE 356 Electromagnetics Laboratory  
1 cr  
Computer-aided and experimental field mapping; shielding techniques; field measurement of elementary radiating structures and waveguide circuits; terminal characteristics of klystrons and space wave propagation losses. Fee.  
Pre-requisite: EE 355 Minimum Grade of C. EE 355 can be taken concurrently with this course.

EE 368 Microprocessor Sys Interf Lab  
1 cr  
This Laboratory is designed to reinforce the material covered in EE 264 and to provide practical hands-on experience with microprocessor software, hardware and interfacing. Topics include integration of microprocessor software, hardware and peripheral devices; assembly level programming and hardware interfaces for control and instrumentation.  
Pre-requisite: EE 268 Minimum Grade of D and EE 264 Minimum Grade of D. EE 264 can be taken concurrently with this course.

EE 377 Computer Methods in EE - CpE  
1 cr  
Introduction to the use of computer softwares such as MATHCAD/ MATLAB and PSPICE/ ELECTRONIC WORKBENCH for the analysis of engineering related problems and the solution of electric/ electronic circuits.  
Pre-requisite: EE 223 Minimum Grade of C and EE 263 Minimum Grade of C.

EE 382 Prob, Rand Sigs & Stat Anlys  
3 cr  
Discrete and continuous probability distributions; random variables; Bernoulli trials; hypothesis testing; confidence intervals; Anova multiple comparisons; Bayes' theorem; estimation; sampling; random processes and random signals in linear systems. Probability applications in computer and electrical engineering. Fee.  
Pre-requisite: EE 223 Minimum Grade of D and MA 238 Minimum Grade of C.

EE 388 Feedback Control Systems  
3 cr  
Pre-requisite: EE 321 Minimum Grade of D.

EE 391 Physical Electronics  
3 cr  
Introduction to quantum concepts; particles in one dimensional potential well; tunneling. Silicon band structure, electrons and holes. Drift and diffusion current density; band bending; Einstein diffusion coefficient; recombination/generation. The pn junction; step and linear junctions; depletion layer. I-V characteristics of a pn junction and steady-state carrier concentrations at junctions. Bipolar junction transistor fundamentals; pnp and npn types; common emitter configuration, biasing and gain. Fee.  
Pre-requisite: MA 238 Minimum Grade of C and PH 202 Minimum Grade of C and CH 131 Minimum Grade of C.
EE 372  Introduction to Communications  3 cr
Introduction to communication systems; analog, digital, deterministic and stochastic messages; modulation; redundancy coding. Signal energy and power; correlation; orthogonal signal set and Fourier series. Fourier transforms; signal transmission through linear systems; ideal and practical filters; signal distortion; Parseval's theorem; essential band-width and energy and power spectral density. Amplitude modulation: DSB, SSB, AM, QAM and VSB; phase and frequency modulation and the basic design of a FM transmitter. Sampling theorem; pulse code modulation and differential pulse code modulation. Pre-requisite: EE 322 Minimum Grade of D and EE 321 Minimum Grade of D. EE 322 can be taken concurrently with this course.

EE 381  Electromech Energy Conversion  3 cr
Introduction to the principles of electromechanical energy conversion. Energy balance, force, and torque of electromagnetic systems; magnetic circuits and ferromagnetic losses; transformers and their connections three-phase induction motors; synchronous generators and motors; non-salient machines. Parallel operation of synchronous generators. Dynamics of electric machines. Fee. Pre-requisite: EE 354 Minimum Grade of D. EE 354 can be taken concurrently with this course.

EE 385  Energy Conversion Lab  1 cr
Laboratory experiments based on: Faraday's Law and magnetic coupling; magnetic circuits; transformers (single and three phase) their connections and tests. Three phase induction motors-tests and performance characteristics; synchronous generators and motors. Machine data acquisition methods and processing using a computer. Fee. Pre-requisite: EE 381 Minimum Grade of D. EE 381 can be taken concurrently with this course.

EE 401  Intro Elec and CpE Design - W  1 cr
Specification of design criteria. Written and oral presentations of design proposals. Coverage of professional and contemporary issues and students are required to become members of the IEEE or ACM and attend two technical meetings of IEEE/ACM. Fee. Pre-requisite: CA 110 Minimum Grade of D and EE 321 Minimum Grade of D and EE 324 Minimum Grade of D and EE 368 Minimum Grade of D. EE 324 and EE 368 can be taken concurrently with this course.

EE 404  Electrical and Computer Eng-W  3 cr
Implementation of design project from the field of Electrical or Computer Engineering in the broadest sense and under the guidance of a project director from the electrical and computer engineering faculty. Written and oral presentations of project proposals, interim and final reports. Students are required to be current members of the IEEE/ACM and attend two technical meetings. Fee. Pre-requisite: EE 328 Minimum Grade of D and EE 334 Minimum Grade of D and EE 368 Minimum Grade of D and EE 401 Minimum Grade of D.

EE 422  Adv Feedback Control Systems  3 cr
Sensors, encoders and DC motors in control systems. The performance and design of feedback control systems. System bandwidth; Nichol's Chart and the stability of control systems with time delays. State variable analysis and design. This course is dually listed with an equivalent graduate level course (EE522) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Pre-requisite: EE 328 Minimum Grade of D.

EE 423  Modern Control Theory  3 cr
Simulation and modeling; introduction to linear systems theory; concepts of controllability and observability; specifications; structures and limitations; review of classical design methods; state feedback design methods; multivariable control; robust stability and sampled data implementation. Introduction to the use of MATLAB for design. This course is dually listed with an equivalent graduate-level course (EE 523) and requires a minimum G.P.A of 2.75 or the instructor's permission for admission. Pre-requisite: EE 328 Minimum Grade of D.

EE 424  Nonlinear Control Systems  3 cr
State space description; methods of linearization; isoclines; stability of nonlinear systems; Lyapunov's direct method; harmonic linearization; describing functions; dual input describing functions; Popov's method; circle criterion and computer aided analysis. This graduate-level course is dually listed with an equivalent course (EE524) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Pre-requisite: EE 328 Minimum Grade of D.

EE 427  Digital Control Systems  3 cr
State space and transfer function description of discrete-time systems; solution of discrete state equation; discrete-time model of analog plants; frequency domain analysis; design of discrete state-feedback regulators; observers and tracking systems. This course is dually listed with an equivalent graduate-level course (EE 527) and requires a minimum G.P.A. of 2.75 or the instructor's permission for admission. Pre-requisite: EE 328 Minimum Grade of D.

EE 430  Power Semiconductor Dev  3 cr
Characteristics of power devices; physics of transport phenomena; breakdown voltage; power rectifiers; bipolar transistors; power MOSFET; insulated-gate bipolar transistor and MOS-gated thyristors. Pre-requisite: EE 331 Minimum Grade of D.

EE 431  Analog Electronics  3 cr
Small signal model of diodes, applications, advanced op-amp applications, principle of operation of FETs, small signal model of FET and basic FET amplifiers, small signal model of BJT and basic BJT amplifiers, differential and multistage amplifiers, Miller's Theorem, Nyquist stability criterion and frequency response, internal circuit of typical op-amp. Pre-requisite: EE 334 Minimum Grade of D.
EE 432 Microelectronic Devices 3 cr
Introduction to semiconductor material properties; semiconductor diodes; structure and operation; diode circuit applications; bipolar transistor; structure and operation; junction field effect transistors (JFETS); metal oxide field effect transistors (MOSFETs) fabrication technology and construction of semiconductor devices; biasing and stability of amplifiers. This course is dually listed with an equivalent graduate-level course (EE 532) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee. Pre-requisite: EE 334 Minimum Grade of D.

EE 437 Electronics Lab 1 cr
Computer analysis and measurement of the characteristics and parameters of power supplies; operational amplifiers; voltage and power amplifiers; oscillators and active filters. Pre-requisite: (EE 334 Minimum Grade of D and EE 431 Minimum Grade of D). EE 431 can be taken concurrently with this course.

EE 438 Virtual Instrumentation 3 cr
Transducers; measurement techniques; measurement errors; digital signal processing; noise sources and reduction; introduction to LabVIEW software, data acquisition and processing using computer-controlled data acquisition hardware. Pre-requisite: EE 334 Minimum Grade of D.

EE 439 VLSI Technology-Fabrication 3 cr
Introduction to semiconductor devices; crystal growth and wafer preparation; chemical and physical vapor deposition; oxidation; diffusion; ion implantation; lithography; etching metallization, process integration of CMOS and bipolar technologies; diagnostic techniques and measurements; packaging; yield and reliability. This course is dually listed with an equivalent graduate-level course (EE 539) and requires a minimum G.P.A. of 2.75 or the instructor's permission for admission. Pre-requisite: EE 331 Minimum Grade of D.

EE 440 HDL Logic Synthesis 3 cr
Introduction to the syntax and elements of the basic VHDL language such as entities and architectures; creating combinational, synchronous logic and state machines using both structural and behavioral VHDL; using hierarchy in large designs; synthesizing and implementing designs. This course is dually listed with an equivalent graduate-level course (EE 540) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Credit for both EE 440 and EE 443 not allowed toward a degree. Fee. Pre-requisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D.

EE 441 Computer Networks 3 cr
Introduction to design and analysis of computer networks. Polling networks and ring networks. This course is dually listed with an equivalent graduate-level course (EE 541) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Pre-requisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D.

EE 443 HDL Logic Simulation 3 cr
Introduction to the syntax and elements of the basic Verilog language such as modules and ports; hierarchical modeling; gate-level modeling; dataflow modeling; switch-level modeling; tasks and functions; timing and delays; user-defined primitives; synthesizing and implementing designs. Emphasis is on the simulation and test-bench aspects. This course is dually listed with an equivalent graduate-level course (EE 543) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Credit for both EE 440 and EE 443 not allowed toward a degree. Fee. Pre-requisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D.

EE 444 Wireless Networks 3 cr
Introduction to modern wireless networks/systems, the cellular concept, frequency reuse, interference and system capacity improvement, trunking and grade of service, multiple access techniques, wireless/wireline interworking, and advanced networks (i.e. ad hoc networks). This course is dually listed with an equivalent graduate-level course (EE 544) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee. Pre-requisite: EE 441 Minimum Grade of D.

EE 445 Smart Grid 3 cr
Introduction to smart grid concepts, phasor measurement units, applications of PMUs in protection and fault recovery, communication over power lines, smart metering, smart grid standards, and cyber security. Co-requisite: EE 483 Pre-requisite: EE 264 Minimum Grade of D and EE 381 Minimum Grade of D.

EE 446 Embedded System Design Lab 1 cr
Design projects utilizing 16-bit and 32-bit microprocessor hardware and software; interfaces to memory and peripheral devices. Prior credit for or concurrent registration in EE447. Pre-requisite: EE 457 Minimum Grade of D. EE 457 can be taken concurrently with this course.

EE 447 Programmable Logic Devices Lab 1 cr
Digital design projects utilizing simulation and synthesis CAD tools and targeting programmable logic devices. Pre-requisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D.
EE 449 Control and Communications Lab  1 cr
Computer-aided modeling, design and performance analysis in time and frequency domain of analog and digital communication end-to-end systems, and automatic control systems.
Pre-requisite: EE 328 Minimum Grade of D and EE 372 Minimum Grade of D. EE 372 can be taken concurrently with this course.

EE 450 Fundamentals of Fourier Optics  3 cr
Two-dimensional Fourier analysis; linear systems; sampling theory; scalar diffraction theory. Fourier transform imaging properties of lenses; frequency analyses of diffraction-limited coherent and incoherent imaging systems; aberrations and resolution analysis; Vander Lught filters and frequency domain analysis and synthesis; SAR and pattern recognition applications.
Pre-requisite: EE 331 Minimum Grade of D and EE 355 Minimum Grade of D.

EE 452 Microwave Engineering  3 cr
Generation and transmission of high frequency electromagnetic energy; magnetrons, klystrons, masers, parametric amplifiers, traveling wave tubes and solid-state devices; waveguides and resonators. This course is dually listed with an equivalent graduate level course (EE 552) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee.
Pre-requisite: EE 355 Minimum Grade of D.

EE 453 Antenna Theory and Design  3 cr
Radiation fundamentals; linear antennas; loop antennas; aperture antennas; reflector antennas; antenna impedance and measurements; computer-aided design of antenna systems. This course is dually listed with an equivalent graduate-level course (EE 553).
Pre-requisite: EE 355 Minimum Grade of D.

EE 454 Digital Computer Architecture  3 cr
Computer organization; instruction set design; ALU design; control unit design; I/O and interrupt designs; memory organization; DMA; microprogramming; introduction to multiprocessors; performance analysis. This course is dually listed with an equivalent graduate-level course (EE 554) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee.
Pre-requisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D.

EE 455 Optoelectronics  3 cr
Wave propagation in free-space and in wave guides; optical resonators; interaction of radiation and atomic systems; laser oscillation; solid-state lasers. He-Ne and Argon lasers, integrated optics including integration of emitters and detectors; optical interconnects; spatial light modulators; optoelectronic materials and devices; and applications of optoelectronics. This course is dually listed with an equivalent graduate-level course (EE 555) and requires a minimum GPA of 2.75 or the instructor's permission of admission. Fee.
Pre-requisite: EE 355 Minimum Grade of D.

EE 456 Fiber Optic Communication Sys  3 cr
Review of optical principles, dielectric waveguides, signal propagation, degradations and attenuation of fibers. Fiber interconnection devices, active and passive components, optical transmitters and receivers, power budget, fiber optic communication systems. This course is dually listed with an equivalent graduate-level course (EE 556).
Pre-requisite: EE 355 Minimum Grade of D.

EE 457 Embedded System Design  3 cr
Architecture and software of 16-bit and 32-bit microprocessor hardware and software; interface design to memory and peripheral devices; multiprocessing. This course is dually listed with an equivalent graduate level course (EE 557) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee.
Pre-requisite: EE 264 Minimum Grade of D and EE 368 Minimum Grade of D.

EE 458 Radar Systems  3 cr
Introduction to radar signal processing. Continuous wave and pulsed radars. Clutter and radio wave propagation. Moving target indicator, target surveillance and tracking radar systems. Side-looking, synthetic aperture, interferometric and other airborne radars. This course is dually listed with an equivalent graduate level course (EE 558) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee.
Pre-requisite: EE 355 Minimum Grade of D.

EE 465 Digital Signal Processing  3 cr
Review of discrete Fourier and Z-transforms; review of analog filter design; design of IIR and FIR digital filters. Fast Fourier transform (FFT) and applications; Hardware implementation and quantization effects. Advanced digital filter structures and design. DSP algorithm design and implementation. Analysis of finite word length effects of DSP applications. Extensive use of MatLab for analysis and design.
Pre-requisite: (EE 321 Minimum Grade of C and EE 322 Minimum Grade of D). EE 322 can be taken concurrently with this course.

EE 468 Programmable Logic Controllers  3 cr
Hardware and software principles of PLC devices, ladder logic, hardware components of PLC systems and controller configuration, basic PLC operation, program construction and manipulation, advanced operation and networking. Fee.
Pre-requisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D.
EE 469  Signal Integrity  3 cr
Design techniques for high-speed digital interfaces and circuit boards; signal integrity including crosstalk and ground bounce; electromagnetic aspects of high-speed digital design; frequency-domain analysis of power-system integrity; state-of-the-art buses and standards. This course is dually listed with an equivalent graduate-level course (EE 569) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee. Pre-requisite: EE 264 Minimum Grade of D and EE 268 Minimum Grade of D and EE 334 Minimum Grade of D.

EE 470  Synth Active-Passive Networks  3 cr
Reliability of network functions (high-pass, band-pass, low-pass, band reject and equalizing filters); approximation techniques; sensitivity analysis; passive and active synthesis; positive and negative feedback and biquads. Computer techniques for the realization of standard filter forms (Butterworth, Chebyshev, Bessel, Sallen and Key, and other forms). Pre-requisite: EE 321 Minimum Grade of D.

EE 471  Wireless Communication  3 cr
Introduction to wireless communications propagation in mobile radio channels, large, small scale fading and multipath; diversity and diversity combining techniques and modulation techniques. This course is dually listed with an equivalent graduate level course (EE 571) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee. Pre-requisite: EE 372 Minimum Grade of D.

EE 473  Advanced Communication Systems  3 cr
Digital line coding; pulse shaping; partial response signalng; scrambling; M-ary communication; digital carrier systems and digital multiplexing. Probability; random variables; quantization error in PCM; random processes; white noise and the behavior of analog systems in the presence of noise. Information theory; compact codes and error correcting codes. This course is dually listed with an equivalent graduate level course (EE 573) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee. Pre-requisite: EE 372 Minimum Grade of D.

EE 481  Electrical Machines  3 cr
DC machines-motors and generators. Single-phase motors; unbalanced two-phase motors; servo-motors; commutator motors; stepper motors; synchros; shaded pole motors; reluctance and hysteresis motors and brushless DC motors. Dynamic circuit analysis of rotating machines. Pre-requisite: EE 381 Minimum Grade of D.

EE 482  Switch Mode Power Conversion  3 cr
Design and analysis of switch mode power converters; design of magnetic components; stability considerations; input filter interactions; performance measurements and evaluations. This course is dually listed with an equivalent graduate-level course (EE 582) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Pre-requisite: EE 334 Minimum Grade of D and EE 381 Minimum Grade of D.

EE 483  Power Systems I  3 cr
Principles of power system analysis. Synchronous machines, transformers and loads; transmission line parameters and analysis. Impedance/admittance matrix representation of power systems. Power flow analysis. Symmetrical fault studies and protective devices. Fee. Pre-requisite: EE 381 Minimum Grade of D and EE 385 Minimum Grade of D. EE 385 can be taken concurrently with this course.

EE 484  Power Systems II  3 cr
Symmetrical components and sequence networks; computer studies of transmission lines; fault studies using a computer; state estimation of power system and power system stability. Economic analysis. Fee. Pre-requisite: EE 483 Minimum Grade of D.

EE 485  Power Distrib and Utilization  3 cr
Principles and characteristics of generating stations; transformers; conversion equipment; primary and secondary distribution systems; short-circuit calculations; selection of protective devices; system grounding and over current protection; voltage control; power factor control and correction; load and cost estimating. Pre-requisite: EE 483 Minimum Grade of D.

EE 486  Power Electronics  3 cr
Power semiconductor diodes and thyristors; commutation techniques; rectification circuits - uncontrolled and controlled; AC voltage controllers; DC chopper; pulse-width modulated inverters and resonant pulse inverters. This course is dually listed with an equivalent graduate level course (EE 586) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Fee. Pre-requisite: EE 334 Minimum Grade of D and EE 381 Minimum Grade of D.

EE 487  Switch Mode Power Conversion  3 cr
Design and analysis of switch mode power converters; design of magnetic components; stability considerations; input filter interactions; performance measurements and evaluation. This course is dually listed with an equivalent graduate level course and requires a minimum GPA of 2.75 for admission. Pre-requisite: EE 334 Minimum Grade of D and EE 381 Minimum Grade of D.
EE 488  Illumination Engineering  3 cr
Photometric units and definitions; light sources and luminaires; interior lighting and artificial illumination design techniques; daylight lighting; exterior lighting design and the theory of color. Optics and control of lighting. Prerequisite: Instructor's permission.

EE 489  Renewable Energy  3 cr
Introduction to renewable energy sources. Fuel cells: classification, configuration and operation. Hydrogen: production, purification and storage. Photovoltaic cells: solar cells and operational characteristics. Wind turbines: operational characteristics. Energy from water sources: hydroelectric, wave and tidal energy. This course is dually listed with an equivalent graduate course and requires a minimum GPA 2.75 or the instructor's permission for admission. Pre-requisite: EE 381 Minimum Grade of D.

EE 490  Special Topics  1 TO 3 cr
Topics of current electrical and computer engineering interest. This course requires permission of the department chair and a minimum GPA of 2.75 for admission. Prerequisites: PCS and Instructor's permission.

EE 494  Directed Studies  1 TO 3 cr
Directed study under the guidance of a faculty advisor, of a topic from the field of electrical and/or computer engineering, not offered in a regularly scheduled course. This course requires permission of the Department Chair and a minimum GPA of 2.75 for admission. Pre-requisite: PCS. Fee.

EE 499  Honors Senior Project - H  1 TO 6 cr
Under the advice and guidance of a faculty mentor, honors student will identify and carry out a research project, relevant to the field of Electrical and Computer Engineering which will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty members of the honors mentor. Students are required to become members of IEEE/ACM and attend two technical meetings. This course is required for Honors admission. A minimum of 4 credit hours is required, but students may enroll for a maximum of 6 credit hours over two semesters. Prerequisites: Instructor's permission. Pre-requisite: EE 401 Minimum Grade of C or HON 301 Minimum Grade of C.

EE 522  Adv Feedback Control Systems  3 cr
Sensors; encoders and D.C. motors in control systems. The performance and design of feedback control systems. System bandwidth; Nichol's Chart and the stability of control systems with time delays. State variable analysis and design. Use of MatLab for analysis and design. This course is dually listed with an equivalent 400-level Electrical/Computer Engineering course.

EE 523  Modern Control Theory  3 cr
Simulation and modeling; introduction to linear system theory; concepts of controllability and observability; specifications, structures and limitations; review of classical design methods; state feedback design methods; multivariable control; robust stability and sampled data implementation. Introduction to the use of MATLAB for design. This course is dually listed with an equivalent 400-level course (EE 423).

EE 524  Nonlinear Control Systems  3 cr
State space description; methods of linearization; isoclines; stability of nonlinear systems; Lyapunov's direct method; harmonic linearization; describing functions; dual input describing functions; Popov's method; circle criterion, computer aided analysis. This course is dually listed with an equivalent 400-level course (EE 424). Pre-requisite: EE 523.

EE 525  Optimal Control Systems  3 cr
Static optimization; method of Lagrange multipliers; adaptive controllers; dynamic optimization; calculus of variations; the principle of optimality and dynamic programming; Pontryagin's maximum principle; quadratic optimal control. Pre-requisite: EE 523.

EE 526  Introduction to Robotics  3 cr
Basic mathematics of robotic systems; coordinate transformations: forward and inverse kinematics; velocity kinematics; path planning and trajectory generation; numerical methods; mobile robots. Fee.

EE 527  Digital Control Systems  3 cr
State space and transfer function description of discrete time systems; solution of the discrete state equation; discrete-time model of analog plants; frequency domain analysis; designing of discrete state-feedback regulators; observers and tracking systems. This course is dually listed with an equivalent 400-level course (EE 427).

EE 528  Advanced System Theory  3 cr
Review of linear spaces and operators; state variable description of time varying and time invariant linear systems. Controllability and observability of linear dynamical systems; state feedback and state estimators; stability of linear systems; arbitrary pole assignment for multivariable case. Prerequisite: Instructor's permission.

EE 530  Nanotechnology  3 cr
Nanotechnology fundamentals and principles; quantum wires and dots; single electron effects and coulomb blockade; nanomagnets and spintronics; spin based electronics (magnetic memories, magnetic field sensors); nanofabrication; nanoelectronics (QCO); organic electronics (carbon fullerenes and nanotubes, polymers); advanced characterization techniques; applications especially those related to nanotechnology; MEMS and microsystems (sensors); QWIP technology and its associative nanoscience; photonic crystal; advances in nanostructured materials. Requires instructor's permission.
EE 531  Advanced Electronic Devices  3 cr
Semiconductor electronics; semiconductor diode circuit analysis; bipolar and field effect transistors; analog-to-digital and digital-to-analog circuits and active filters. This course is dually listed with an equivalent 400-level course (EE 431). Prerequisite: Instructor's permission

EE 532  Microelectronic Devices  3 cr
Introduction to semiconductor material properties; semiconductor diodes: structure and operation; diode circuit applications; semiconductor heterojunctions; metal-semiconductor junctions; bipolar transistor: structure and operation; junction field effect transistors (JFETs); metal oxide field effect transistors (MOSFETs); metal semiconductor field effect transistors (MESFETs); fabrication technology and construction of semiconductor devices; photodetectors; light-emitting diodes; laser diodes; solar cells; image sensors; spice based microelectronic circuit design. This course is dually listed with equivalent 400-level course (EE 432).

EE 534  VLSI Design Systems  3 cr
Review of fabrication of microelectronic devices; introduction to MOS technology; basic physical and electrical properties of field effect transistors; CMOS fabrication; layout of CMOS integrated circuits; MOSFETs; concepts of VLSI chip design; physical design of CMOS integrated circuits.

EE 535  Electronic Materials Prop-Appl  3 cr
Schroedinger's equation, potential wells and barriers; crystallographic geometry; Kronig-Penny model; energy bands in crystalline solids; density of states - Fermi statistics; intrinsic and extrinsic semiconductors; conductivity and Hall effects; interfaces; magnetic materials; superconducting materials; optical materials. Prerequisite: Instructor's permission.

EE 536  Intro to Superconductivity  3 cr
Microscopic theory of superconductivity; BCS theory; superconduction tunneling phenomena; superconducting device; superconducting materials; High-Tc superconductors. Prerequisite: Instructor's permission.

EE 537  Adv Plasma Process Elect Mat  3 cr
Analysis, design and application of DC, RF and microwave plasma in microelectronic material processing; sputtering; etching; deposition; surface modification; diagnostic and characterization techniques. Prerequisite: Instructor's permission.

EE 538  Magnetic Recording Media  3 cr
Magnetostatic fields; magnetization processes; demagnetizing factors; magnetic circuits; hard disk / tape media; inductive and MR heads; magnetic data storage systems. Prerequisite: Instructor's permission.

EE 539  VLSI Technology - Fabrication  3 cr
Introduction to semiconductor devices; crystal growth and wafer preparation; chemical and physical vapor deposition; oxidation; diffusion; ion implantation; lithography; etching; metallization; process integration of CMOS and bipolar technologies; diagnostic techniques and measurements; packaging; yield and reliability. This course is dually listed with an equivalent 400-level course (EE 439).

EE 540  HDL Logic Synthesis  3 cr
Introduction to the syntax and elements of the basic VHDL language such as entities and architectures; creating combinational, synchronous logic and state machines using both structural and behavioral VHDL; using hierarchy in large designs; synthesizing and implementing designs. This course is dually listed with an equivalent undergraduate-level course (EE 440) and requires a minimum GPA of 2.75 or the instructor's permission for admission. Credit for both EE 540 and EE 543 not allowed toward a degree.

EE 541  Computer Networks  3 cr
Introduction to design and analysis of computer networks. Polling networks and ring networks. Networking applications. This course is dually listed with an equivalent 400-level EE course.

EE 542  Adv Top Digital Design - HDLs  3 cr
Current topics of interest in digital design. State-of-the-art software tools used in digital design. Advanced topics in HDLs.

EE 543  HDL Logic Simulation  3 cr
Introduction to the syntax and elements of the basic Verilog language such as modules and ports; hierarchical modeling; gate-level modeling; dataflow modeling; behavioral modeling; switch-level modeling; tasks and functions; timing and delays; user-defined primitives; synthesizing and implementing designs. Emphasis is on the simulation and test-bench aspects. This course is dually listed with an equivalent undergraduate-level course (EE 443) and requires a minimum GPA of 2.75 or the instructor's permission. Credit for both EE 540 and EE 543 not allowed toward a degree.

EE 544  Wireless Networks  3 cr
Introduction to modern wireless networks/systems, the cellular concept, frequency reuse, interference and system capacity improvement, trunking and grade of service, multiple access techniques, wireless/wireline interworking, and ad hoc networks. This course is dually listed with an equivalent 400-level course (EE 444) and requires a minimum GPA of 2.75. Pre-requisite: EE 541.
EE 545 Optical Network 3 cr

EE 546 Neural Networks 3 cr

EE 548 Computer-Network Security 3 cr
Cryptography; Symmetric and asymmetric encryption; authentication and identification schemes; MACs and Digital Signatures; applications of security.

EE 552 Microwave Engineering 3 cr
Generation and transmission of high frequency electromagnetic energy-magnetrons, klystrons, maser, parametric amplifiers, traveling wave tubes and solid-state devices. This course is dually listed with an equivalent 400-level course (EE 452). Prerequisite: Instructor's permission.

EE 553 Antenna Theory and Design 3 cr
Radiation fundamentals; linear antennas; loop antennas; aperture antennas; reflector antennas; antenna impedance and measurements; computer-aided design of antenna systems. This course is dually listed with an undergraduate level course (EE 453).

EE 554 Digital Computer Architecture 3 cr
Computer organization; instruction set design; ALU design; control unit design; I/O and interrupt designs; memory organization; DMA; microprogramming; introduction to multiprocessors; performance analysis. This course is dually listed with an undergraduate level course (EE 454).

EE 555 Optoelectronics 3 cr
Wave propagation in free-space and in wave guides; optical resonators, interaction of radiation and atomic systems; laser oscillation; solid-state lasers. He-Ne and Argon ion lasers, integrated optics including integration of emitters and detectors; optical interconnects; spatial light modulators; optoelectronic materials and devices; applications of optoelectronics. This course is dually listed with a 400-level course (EE 455).

EE 556 Fiber Optic Communication Sys 3 cr
Review of optical principles, dielectric waveguides, signal propagation, degradations and attenuation of fibers. Fiber interconnection devices, active and passive components, optical transmitters and receivers, power budget, fiber optic communication systems. This course is dually listed with an equivalent undergraduate-level course (EE 456). Fee.

EE 557 Adv. Embedded System Design 3 cr
Architecture and software of 16-bit and 32-bit microprocessor hardware and software; interface design to memory and peripheral devices; multiprocessing. This course is dually listed with an undergraduate level course (EE 457).

EE 558 Radar Analysis 3 cr
Introduction to radar signal processing. Continuous wave and pulsed radars. Clutter and radio wave propagation. Moving target indicator, target surveillance and tracking radar systems. Side-looking, synthetic aperture, interferometric and other airborne radars. This course is dually listed with an equivalent 400-level (EE458).

EE 559 Optical Info Process-Holograph 3 cr
Parallel optical information processing in Fourier transform systems; nonlinear optical image processing in a linear optical processing; optical image equidensity and pseudocolor using techniques; wave-front reconstruction; on-axis and off-axis holography, effects of film MTF and nonlinearities; holographic memory, display and nondestructive testing; and optical computing. Prerequisite: Instructor's permission.

EE 560 Adv Computer Architecture 3 cr
Overview of software/hardware architectures of selected RISC/CISC microprocessors, advanced pipelining and instruction level parallelism, superscalar techniques, memory hierarchy design, cache coherency, introduction to multiprocessor systems and interconnection networks. Pre-requisite: EE 554 Minimum Grade of C.

EE 565 Adv Digital Signal Processing 3 cr
Review of discrete Fourier and z-transforms; review of analog filter design; canonical digital filter forms; design of IIR and FIR digital filters. Fast Fourier Transforms (FET) and their applications; hardware implementation and quantization effects. Advanced digital filter structures and design. DSP algorithm design and implementation. Analysis of finite word length effects of DSP applications. Extensive use of MatLab for analysis and design. This course is dually listed with an equivalent 400-level EE course (EE465).

EE 566 Digital Image Processing 3 cr
Review of digital image fundamentals; different image transforms; image enhancement techniques; image restoration methods; detection of discontinuities and thresholding.

EE 567 Biomedical Imaging 3 cr
Introduction to biomedical imaging, projection radiography, computer aided tomography, single photon emission computed tomography (SPECT), positron emission tomography (PET), magnetic resonance imaging (MRI and fMRI), ultrasound imaging, optical imaging techniques including confocal microscopy and optical coherence tomography (OCT). Fee. Pre-requisite: EE 566 Minimum Grade of D.
EE 568  Pattern Recognition  3 cr
Introduction to pattern recognition, statistical, syntactic and neural pattern recognition; Decision procedures; Parameter estimation and supervised learning; Non-parametric techniques; Feature extraction and nonlinear mapping; Fuzzy systems in pattern recognition; Methods of testing

EE 569  Signal Integrity  3 cr
Design techniques for high-speed digital interfaces and circuit boards; signal integrity including crosstalk and ground bounce; electromagnetic aspects of high-speed digital design; frequency-domain analysis of power-system integrity; state-of-the-art buses and standards. This course is dually listed with an equivalent undergraduate-level course (EE 469).

EE 571  Wireless Communications  3 cr
The cellular concept and system design fundamentals, propagation in mobile radio channels, large scale fading; small-scale fading and multi-path statistical distributions, distributions, diversity and combining techniques. This course is dually listed with an equivalent undergraduate level course (EE 471) and requires instructor's permission for admission. Fee. Pre-requisite: EE 322 Minimum Grade of D and EE 372 Minimum Grade of D.

EE 573  Advanced Communication Systems  3 cr
Digital line coding; pulse shaping; partial response signaling; scrambling; M-ary communication; digital carrier systems and digital multiplexing. Probability; random processes; white noise and the behavior of analog systems in the presence of noise. Information theory; compact codes and error correcting codes. This course is dually listed with an equivalent 400-level course (EE 473).

EE 574  Digital Communications  3 cr
Analysis and design of digital communication systems based on probability theory; signal space representation and optimum detection principles; Digital modulation techniques and their performance in additive white Gaussian noise. Pre-requisite: EE 573.

EE 575  Stochastic Processes  3 cr
Introduction to estimation theory. Markov chains - finite, countable, continuous time, optimal stopping; Martingales; renewal processes, reversible Markov chains, Brownian motion and stochastic integration.

EE 576  Optical Communications  3 cr
Light sources, detectors, fiber components and optical systems for fiber communication; free-space inter-satellite optical networks for high-speed global communication; coding problems in optical fiber data transmission; three-dimensional optical data storage for database processing; propagation losses and fiber amplifiers; and optical free-space interconnections in future computers. Prerequisite: Instructor's permission.

EE 577  Information Theory  3 cr
Self-information; entropy; mutual information and channel capacity; encoding; error detecting and correcting codes. Sampling theorem. Discrete and continuous channels. Band-limited channels.

EE 578  Error Correction Codes  3 cr
This course is designed to introduce the students to error correcting codes, their construction and properties, encoding and decoding.

EE 579  Wireless Sensor Networks  3 cr
Introduction to Wireless Sensor Networks; Network deployment; Network Topologies; Localization; Tracking: Time synchronization techniques; Wireless characteristics; Energy considerations; MAC layer protocol and sleep scheduling; Routing; Sleep-based topology control; Latest development in the field. Fee. Pre-requisite: EE 544 Minimum Grade of D.

EE 582  Switch-Mode Power Conversion  3 cr
Design and analysis of switch mode power converters-design of magnetic components; stability considerations; input filter interactions; performance, measurements and evaluation. This course is dually listed with an equivalent 400-level course (EE 482). Prerequisite: Instructor's permission.

EE 585  Advanced Power Systems  3 cr
Special topics that are not covered in traditional power systems courses, such as: Optimization techniques, computer methods, unified fault (short circuit) analysis, protection and control of power systems. Prerequisite: Instructor's permission.

EE 586  Power Electronics  3 cr
Power semiconductor diodes and thyristors; commutation techniques; rectification circuits - uncontrolled and controlled; AC voltage controllers; DC chopper; pulse-width modulated inverters and resonant pulse inverters. This course is dually listed with an equivalent undergraduate level course (EE 486).

EE 588  Power Semiconductor Drives  3 cr
Rectifier control of DC motors; chopper control of DC drives; closed-loop control of DC drives; induction motor speed control and multiquadrant control; control of induction motors by AC controllers and frequency-controlled drives; slip power control of induction motors; synchronous motor drives - brushless DC and AC motor drives. Prerequisites: Instructor's permission.

EE 589  Renewable Energy  3 cr
EE 590  Special Topics -  1 TO 3 cr  
Topics of current electrical engineering interest. Prerequisite: Instructor's permission.

EE 592  Directed Independent Study  1 TO 3 cr  
Directed study, under the guidance of a faculty advisor, of a topic from the field of Electrical and Computer Engineering not offered in a regularly scheduled course. Prerequisite: Instructor's permission.

EE 594  Project in Electrical Engr  1 TO 3 cr  
An investigation of an original problem in electrical engineering under the guidance of the student's major professor. Prerequisites: Approval of the project prospectus by the student's advisory committee, and consent of the Director of Engineering Graduate Studies.

EE 599  Thesis  1 TO 6 cr  
An investigation of an original problem in electrical and/or computer engineering under the guidance of the student's major professor. Prerequisite: Approval of the thesis prospectus by the student's Advisory Committee and the Graduate School and consent of the Director of Engineering Graduate Studies.

Elem-Early Childhood (EEC) (EEC)

EEC 430L  Student Teaching - EEC  0 cr  

EEC 290  Special Topics -  3 cr  
Guided study of selected educational tasks (e.g. curriculum revision, classroom materials development, models of learning and teaching) and teaching problems and practices for improving student achievement. Not more than 6 hours may be earned in Special Topics courses.

EEC 300  Creating Envir for Lrng/Play  3 cr  
A study of environments that promote learning through play in early childhood. Emphasis on materials, activities, equipment, and effective strategies that support and encourage young children's play, learning and creativity.

EEC 332  Teaching Language Arts  3 cr  
A course presenting methods of promoting meaningful language and literacy skills in early childhood and elementary school programs. This course has a required field experience. Co-requisite: EEC 346, RED 330, RED 333

EEC 334  Lit for the Young Child  3 cr  
A course survey dealing with methods of writing literary materials with children in preschool through the primary grades. It is designed to assist those who wish to become widely acquainted with books and related materials for today's young children.

EEC 335  Teaching Mathematics - W  3 cr  
A course which deals with effective methods of teaching mathematics to elementary school students. Emphasis will be on developing an understanding of numbers, teaching basic operations, and using teaching aids and materials to meet the various needs of elementary age children. This course has a required field experience. Co-requisite: EEC 336, EEC 337, RED 331 Pre-requisite: ( (MA 181 Minimum Grade of D or MA 201 Minimum Grade of D) or (MA 202 Minimum Grade of D or MA 281 Minimum Grade of D) ) and EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and EEC 332 Minimum Grade of C.

EEC 336  Teaching Social Studies  3 cr  
A course using problem solving and independent investigation as means of teaching the relationship of humans to their environment. Objectives, content and procedures are discussed. This course has a required field experience. Co-requisite: EEC 335, EEC 337, EEC 345, RED 331 Pre-requisite: EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and RED 333 Minimum Grade of C and EEC 332 Minimum Grade of C.

EEC 337  Teaching Science  3 cr  
A course using discovery, inquiry and problem-solving approaches as a means of teaching science. Relationships of science to entire early childhood and elementary curriculum is discussed. This course has a required field experience. Co-requisite: EEC 335, EEC 336, EEC 345, RED 331 Pre-requisite: EEC 346 Minimum Grade of C and RED 330 Minimum Grade of C and RED 333 Minimum Grade of C and EEC 332 Minimum Grade of C.

EEC 338  Curr App Music-Movement in EC  3 cr  
Focus on planning, preparing, and guiding experiences for young children in musical play, movement, and creative dramatics to develop the whole child through cooperative activities that promote language and literacy learning across the curriculum.

</table>
**EEC 610** Diag and Prescriptive Teaching 3 cr
Designed to assist teachers and school leaders in understanding the skills and techniques necessary for diagnosing and prescribing instruction for learners in different types of teaching-learning settings.

**EEC 622** Seminar in Curr-Inst Problems 3 cr
Critical study of curriculum and instructional problems in the elementary school. Research reviews and program design problems are emphasized.

**EEC 635** Seminar in Mathematics Ed 3 cr
A study of current topics related to teaching mathematics in early childhood and elementary years.

**EEC 690** Sp Top - 3 cr
Guided supervision in the identification and completion of educational tasks, such as curriculum revision, course and/or program design, self-study for accreditation visitation, student achievement evaluation. No more than 6 hours can be applied toward a graduate degree. Prerequisite: Permission of department chair.

**EEC 694** Dir St and Research - 1 TO 3 cr
Students explore through directed study problems and issues of special interest or significance in early childhood or elementary education. No more than 3 hours of any departmental 694 courses can be applied toward a degree program. Prerequisite: Permission of department chair.

**EMS 100** Cardiopulmonary Resuscitation 1 cr
Cardiopulmonary Resuscitation (CPR) emphasizes the scope and magnitude of cardiovascular disease causes of sudden death, and the effects of prudent heart living as a tool to reduce risk factors associated with cardiovascular disease. The skills component identifies and measures competence in one-person CPR, two person adult CPR, infant and child CPR, and management of airway obstruction. Course completion cards are issued by the American Heart Association.

**EMS 104** First Aid/CPR 1 cr
This American Heart Association course includes the basics of First Aid and Cardiopulmonary Resuscitation (CPR) for Adults, Children and Infants. Course content includes instruction on recognition and management of medical and trauma emergencies including environmental emergencies. The skills component includes competence in one-person adult, infant and child CPR, and management of airway obstruction as well as skills associated with trauma and medical emergencies. Course completion cards are issued by the American Heart Association.

**EMS 110** Emergency Medical Responder 3 cr
A skills approach in helping the student to intervene in any medical or traumatic emergency situation before emergency personnel arrive. Emphasis is placed on care of the airway, CPR, control of bleeding, splinting and bandaging, and overall management. Clinical rotations include emergency department and ambulance. American Heart Association Healthcare Provider CPR certification will be awarded. Successful completion of this course permits the student to sit for the National Registry exam for Emergency Medical Responder. Upon successful completion of the National Registry exam the student may apply for a license with the Alabama Department of Public Health as an Emergency Medical Responder.

**EMS 112** EMT Emergency Care 6 cr
Includes all required modules of the 2009 National EMS Educational Standard Curriculum. Topics include pathophysiology, patient assessment, airway management, hemorrhage control, management of fractures, care of individuals with special needs, emergency childbirth, care of infants and children, medical emergencies, environmental emergencies, transportation of the sick and injured, operations and radio communications. Prerequisite: AHA BLS for Health Care Providers. Co-requisite: EMS 113, EMS 115

**EMS 113** EMT Skills Lab 1 cr
Emergency Medical Technician Skills practicum. Designed to allow EMT students extensive practice of required psychomotor skills. Co-requisite: EMS 112, EMS 115
EMS 115  EMT Clinical Internship  1 cr
Pre-hospital care and transportation of the sick and injured using principles of basic life support, correlated with emergency department experience. Time distributed between emergency department and ambulance.
Co-requisite: EMS 112, EMS 113

EMS 140  Advanced EMT  6 cr
This course includes theoretical concepts and competencies outlined in the National EMS Education Standards for Advanced EMT's. Major topical areas include EMS operations, airway management, assessment and management of the medical and trauma patient, pharmacology for the A-EMT, public health and life span development, among others.
Co-requisite: EMS 141, EMS 143
Pre-requisite: EMS 112 Minimum Grade of B and EMS 113 Minimum Grade of S and EMS 115 Minimum Grade of S and EMS 210 Minimum Grade of B. EMS 210 can be taken concurrently with this course.

EMS 141  Advanced EMT Skills Lab  1 cr
This course is designed to integrate previously learned theory on advanced pre-hospital assessment, treatment and documentation of the medical and traumatic emergency patient. The course includes psychomotor skills and competencies outlined in the DOT's National EMS Education Standards for Advanced EMTs.
Pre-requisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S). EMS 210 and EMS 200 and EMS 140 and EMS 143 and EMT 371 can be taken concurrently with this course.

EMS 143  Advanced EMT Internship  2 cr
Supervised clinical and field experiences emphasizing patient care in the hospital and out-of-hospital environments. Time distributed between hospital emergency departments, fire rescue departments, and ambulance services, among others.
Pre-requisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S). EMS 210 and EMS 200 and EMS 140 and EMS 143 and EMT 371 can be taken concurrently with this course.

EMS 200  Human Systems/Pathophysiology  3 cr
An overview of the human body systems and disease processes. Emphasis is placed on the functions of human systems and subsystems relative to pathophysiology. Includes concepts of pathophysiology included in the National Standard Curriculum for the Paramedic and the requirements set forth by the Alabama Department of Public Health.

EMS 210  Medical Terminology  3 cr
Medical vocabulary including prefixes, suffixes and their etymological derivation. Proper pronunciation stressed as well as logic, grammar, and spelling. Course includes an overview of human anatomy and physiology.

EMS 212  Paramedic Foundations  3 cr
This course introduces issues related to the practice of pre-hospital advanced life support as a career, with a focus on issues common to all health care professions. Content areas include: paramedic roles and responsibilities, well-being of the paramedic, illness and injury prevention, medical-legal-ethical issues, therapeutic communication, pharmacology and advance airway management. Upon course completion, student will have met the objectives as outlined in the National Standard Curriculum for the Paramedic.
Pre-requisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 141 Minimum Grade of S or EMT 361 Minimum Grade of S) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) or (BMD 114 Minimum Grade of C or BLY 151 Minimum Grade of C or CLS 114 Minimum Grade of C) and (BMD 115 Minimum Grade of C or BLY 152 Minimum Grade of C or CLS 115 Minimum Grade of C) and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of S or EMT 465 Minimum Grade of S). EMS 214 and EMS 216 and EMS 217 can be taken concurrently with this course.

EMS 214  Introduction to EMS Cardiology  3 cr
Rhythm interpretation in Lead II EKG. Rapid recognition, defibrillation and/or therapeutic management of potentially lethal rhythms and myocardial infarction. Objectives include twelve lead placement and basic rhythm recognition.
Pre-requisite: (EMS 210 Minimum Grade of B or EMT 210 Minimum Grade of B) and (EMS 140 Minimum Grade of B or EMT 321 Minimum Grade of B) and (EMS 141 Minimum Grade of S or EMT 361 Minimum Grade of S) and (EMS 143 Minimum Grade of S or EMT 371 Minimum Grade of S) and (EMS 200 Minimum Grade of B or EMT 310 Minimum Grade of B) or (BMD 114 Minimum Grade of C or BLY 151 Minimum Grade of C or CLS 114 Minimum Grade of C) and (BMD 115 Minimum Grade of C or BLY 152 Minimum Grade of C or CLS 115 Minimum Grade of C) ) and EMS 212 Minimum Grade of C and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) or (EMS 217 Minimum Grade of S or EMT 465 Minimum Grade of S). EMS 216 and EMS 217 can be taken concurrently with this course.
EMS 216  Patient Assess/Mgt & EMS Oper  3 cr
Includes history taking, physical examination, clinical
decision making, communications, documentation,
assessment-based management of medical and trauma
patients, ambulance operations, incident command rescue,
Hazardst and crime scene awareness.
Pre-requisite: (EMS 210 Minimum Grade of B or EMT 210
Minimum Grade of B) and (EMS 140 Minimum Grade of B
or EMT 321 Minimum Grade of B) and (EMS 141 Minimum
Grade of S or EMT 361 Minimum Grade of S) and (EMS
143 Minimum Grade of S or EMT 371 Minimum Grade of S)
and (EMS 200 Minimum Grade of B or EMT 310 Minimum
Grade of B) or (BMD 114 Minimum Grade of C or BLY 151
Minimum Grade of C or CLS 114 Minimum Grade of C) and
(BMD 115 Minimum Grade of C or BLY 152 Minimum Grade
of C or CLS 115 Minimum Grade of C) and EMS 212
Minimum Grade of B and (EMS 214 Minimum Grade of B
or EMT 340 Minimum Grade of B) and (EMS 217 Minimum
Grade of S or EMT 465 Minimum Grade of S). EMS 212 and
EMS 214 and EMS 216 can be taken concurrently with this
course.

EMS 217  Paramedic Clinical I  3 cr
Supervised clinical experiences emphasizing patient care in
the hospital and outpatient clinical settings as outlined in the
National Standard Curriculum for the Paramedic.
Pre-requisite: (EMS 210 Minimum Grade of B or EMT 210
Minimum Grade of B) and (EMS 140 Minimum Grade of B
or EMT 321 Minimum Grade of B) and (EMS 141 Minimum
Grade of S or EMT 361 Minimum Grade of S) and (EMS
143 Minimum Grade of S or EMT 371 Minimum Grade of S)
and (EMS 200 Minimum Grade of B or EMT 310 Minimum
Grade of B) or (BMD 114 Minimum Grade of B or BLY 151
Minimum Grade of B or CLS 114 Minimum Grade of B) and
(BMD 115 Minimum Grade of B or BLY 152 Minimum Grade
of B or CLS 115 Minimum Grade of B) and EMS 212
Minimum Grade of B and (EMS 214 Minimum Grade of B
or EMT 340 Minimum Grade of B) and (EMS 217 Minimum
Grade of S or EMT 465 Minimum Grade of S). EMS 212 and
EMS 214 and EMS 216 can be taken concurrently with this
course.

EMS 240  EMS Resp. Special Populations  3 cr
This course relates pathophysiology and assessment
findings to the formation of field impressions and treatment
plans specific to special populations. Subject matter
will include gynecology, obstetrics, abuse and assault,
necatology, pediatrics, special needs and the geriatric
community. Upon course completion, students will have
met the objectives for special populations as outlined in the
National Standard Curriculum for the Paramedic.
Pre-requisite: EMS 212 Minimum Grade of B and (EMS
214 Minimum Grade of B or EMT 340 Minimum Grade of B)
and (EMS 216 Minimum Grade of B or EMT 350 Minimum
Grade of B) and (EMS 217 Minimum Grade of S or EMT 465
Minimum Grade of S) and (EMS 242 Minimum Grade of B
or EMT 355 Minimum Grade of S) and (EMS 244 Minimum
Grade of B or EMT 425 Minimum Grade of B) and (EMS 245
Minimum Grade of S or EMT 455 Minimum Grade of S) and
(EMS 247 Minimum Grade of S or EMT 466 Minimum Grade
of S). EMS 242 and EMS 244 and EMS 245 and EMS 247
can be taken concurrently with this course.

EMS 242  Paramedic Emergency Care I  3 cr
Includes pathophysiology, assessment and management
of patients suffering from pulmonary and cardiovascular
diseases. Additional modules may be added in accordance
to standards and guidelines in the National Standard
Curriculum for the Paramedic and the American Heart
Association. Student will receive an ACLS provider
certification upon successful completion.
Pre-requisite: EMS 212 Minimum Grade of B and (EMS
214 Minimum Grade of B or EMT 340 Minimum Grade of B)
and (EMS 216 Minimum Grade of B or EMT 350 Minimum
Grade of B) and (EMS 217 Minimum Grade of S or EMT 465
Minimum Grade of S) and (EMS 240 Minimum Grade of B
or EMT 375 Minimum Grade of B) and (EMS 242 Minimum
Grade of B or EMT 355 Minimum Grade of S) and (EMS 244 Minimum
Grade of B or EMT 425 Minimum Grade of B) and (EMS 245
Minimum Grade of S or EMT 455 Minimum Grade of S) and
(EMS 247 Minimum Grade of S or EMT 466 Minimum Grade
of S). EMS 240 and EMS 242 and EMS 244 and EMS 245 and EMS 247
can be taken concurrently with this course.

EMS 244  Paramedic Emergency Care II  3 cr
Includes pathophysiology, assessment and management of
patients suffering from medical emergencies not included
in EMS 240 and EMS 242 in accordance to the National
Standard Curriculum for the Paramedic.
Pre-requisite: EMS 212 Minimum Grade of B and (EMS
214 Minimum Grade of B or EMT 340 Minimum Grade of B)
and (EMS 216 Minimum Grade of B or EMT 350 Minimum
Grade of B) and (EMS 217 Minimum Grade of S or EMT 465
Minimum Grade of S) and (EMS 240 Minimum Grade of B
or EMT 375 Minimum Grade of B) and (EMS 242 Minimum
Grade of B or EMT 355 Minimum Grade of B) and (EMS 244 Minimum
Grade of B or EMT 425 Minimum Grade of B) and (EMS 245
Minimum Grade of S or EMT 455 Minimum Grade of S) and
(EMS 247 Minimum Grade of S or EMT 466 Minimum Grade
of S). EMS 240 and EMS 242 and EMS 244 and EMS 245 and EMS 247
can be taken concurrently with this course.
**EMS 245  Paramedic Skills Lab**  1 cr
Advanced out-of-hospital practicum. Designed to integrate all previously learned theory, management concepts and behavioral objectives as outlined in the National Standard Curriculum for the Paramedic.
Pre-requisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of B or EMT 465 Minimum Grade of B) and (EMS 240 Minimum Grade of S or EMT 455 Minimum Grade of B) and (EMS 244 Minimum Grade of B or EMT 425 Minimum Grade of B). EMS 240 and EMS 242 and EMS 244 can be taken concurrently with this course.

**EMS 247  Paramedic Clinical II**  2 cr
Supervised clinical experiences emphasizing patient care in the hospital and outpatient clinical settings as outlined in the National Standard Curriculum for the Paramedic.
Pre-requisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of B or EMT 465 Minimum Grade of B) and (EMS 240 Minimum Grade of S or EMT 455 Minimum Grade of B) and (EMS 244 Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 247 Minimum Grade of S or EMT 466 Minimum Grade of B) and (EMS 297 Minimum Grade of S or EMT 495 Minimum Grade of S). EMS 297 and EMT 495 can be taken concurrently with this course.

**EMS 248  Adult/ Pediatric CPR**  1 TO 3 cr
Designed to provide life support for cardiac and respiratory arrest, including CPR for pediatric and adult cardiac arrest. Credit will not be given for both courses.
Pre-requisite: EMS 212 Minimum Grade of B and (EMS 214 Minimum Grade of B or EMT 340 Minimum Grade of B) and (EMS 216 Minimum Grade of B or EMT 350 Minimum Grade of B) and (EMS 217 Minimum Grade of B or EMT 465 Minimum Grade of B) and (EMS 240 Minimum Grade of S or EMT 455 Minimum Grade of B) and (EMS 244 Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 247 Minimum Grade of S or EMT 466 Minimum Grade of B) and (EMS 297 Minimum Grade of S or EMT 495 Minimum Grade of S). EMS 297 and EMT 495 can be taken concurrently with this course.

**EMS 249  Pediatric Advanced Life Support (PALS)**  1 TO 3 cr
This course provides providers with the knowledge and skills to manage pediatric patients who are in cardiac arrest and those whose acuity level’s require an advanced out-of-hospital life support service emphasizing patient care and team leadership skills as outlined in the National Standard Curriculum for the Paramedic.
Pre-requisite: (EMS 240 Minimum Grade of B or EMT 375 Minimum Grade of B) and (EMS 242 Minimum Grade of B or EMT 355 Minimum Grade of B) and (EMS 244 Minimum Grade of B or EMT 425 Minimum Grade of B) and (EMS 245 Minimum Grade of B or EMT 455 Minimum Grade of B) and (EMS 247 Minimum Grade of S or EMT 466 Minimum Grade of B) and (EMS 297 Minimum Grade of S or EMT 495 Minimum Grade of B). EMS 297 and EMT 495 can be taken concurrently with this course.

**EMS 250  Advanced Cardiac Life Support (ACLS)**  2 cr
Course based on American Heart Association's Emergency Cardiovascular Care program. Includes assessment and management of pediatric cardiovascular and respiratory emergencies. Upon successful completion, the student will receive ACLS provider certification. Recommended for health care providers and health care provider students.

**EMS 251  Advanced Cardiac Life Support (ACLS)**  3 cr
This course provides students with an introduction to Emergency Medical Services (EMS) Systems. Theoretical concepts and issues will be discussed and examined in order to provide students with a conceptual basis for understanding and analyzing EMS systems and organizations. Particular emphasis will be placed on system components, system integration and the roles and responsibilities of management and leadership in EMS organizations.

**EMS 252  EMS Administration**  3 cr
This course provides a general overview of management and administration functions required of EMS managers today including planning, directing, budgeting, staffing and evaluation. Particular emphasis will be placed on issues relating to human resources, EMS operations, and organizational planning.
EMS 320  EMS Law and Legal Issues-W  3 cr
This course will provide a general overview of the origins of law in the United States with particular emphasis on health laws and regulations affecting pre-hospital providers. Topics include issues relating to malpractice, litigation, consent and refusal of medical treatment, advanced directives, patient confidentiality, and expert witness preparation, among others.

EMS 325  Instructional Methods in EMS  3 cr
This course presents theoretical and practical foundations necessary for entry level EMS instructors and coordinators. Topics include instructor roles and responsibilities, learning theory, lesson plan development, test writing and validation, and program evaluation. Additional emphasis will be placed on instructional techniques for the adult learner.

EMS 340  Disaster Mgt & Event Planning  3 cr
Considerations of the theoretical and practical foundations necessary to manage incidents involving multiple casualties and multiple agencies as well as the planning and management of other large scale events. Topics include disaster planning, incident command, WMD, response issues, and scene control, among others.

EMS 350  Critical Care Paramedic  3 cr
This course provides paramedics with advanced skills and knowledge in critical care medicine. Students successfully completing this course and its subsequent internship (EMS 375) will be eligible to sit for national certification as a Critical Care Paramedic.

EMS 375  Crit Care Paramedic Internship  3 cr
An advanced clinical internship course for licensed paramedics who have successfully completed EMS 350. Internship is conducted in an approved critical care setting or facility. Successful completion of this course allows the student to sit for national certification examination as a Critical Care Paramedic.

EMS 401  Seminar in HP  3 cr
This course is designed to provide students with an overview of different health professions and their scope of practice and also to provide information about health administration.

EMS 410  Concepts of Prof Paramedic  6 cr
This bridge course is designed for licensed (or nationally certified) paramedics who are admitted to the Department's Paramedic to BS in EMS Track. This course provides critical updates and information related to paramedic practice and enhances the student's overall patient assessment and critical thinking skills. Focus of the course is on selected theories and concepts integrated throughout the curriculum. Additional emphasis will be on the professional roles of paramedics. Prerequisite: Paramedic to BSEMS Track.

EMS 440  Health Insurance/Managed Care  3 cr
This course provides an overview of the basic concepts and principles in the health insurance and managed care environments. Particular emphasis will be placed on issues relating to the costs, quality and access to emergency medical services. Topics include Medicare and Medicaid reimbursement, Managed Care contracting and EMS Quality Management, among others.

EMS 445  EMS Research - W  3 cr
An introduction to basic research methods and basic statistical procedures used in Emergency Medical Services research. Students will use this information in order to assist them with reading, interpreting and evaluating articles in the pre-hospital healthcare literature.

EMS 460  Issues and Trends in EMS  3 cr
Explores issues and trends at the federal, state and local levels facing EMS leaders and EMS organizations. Particular emphasis is on new and proposed programs, policies and practices which affect pre-hospital healthcare providers.

EMS 475  EMS Internship  3 cr
Structured field experience providing the student to work in an EMS administration, management or educational environment; observation of leadership processes within an EMS organization; application of EMS leadership theory and techniques.

EMS 494  Directed Studies  1 TO 3 cr
Student completes an individual project in a specific EMS area under the guidance and supervision of an EMS faculty member.

EMS 495  EMS Comp/Review Exam  1 cr
The comprehensive examination is the capstone of the Emergency Medical Services degree program. A written examination based on the program objectives of the EMS degree program will be administered as a final evaluation of the student's progress.

Emergency Med Training (EMT) (EMT)

EMT 255  Hazardous Environment Managmnt  3 cr
Theory behind management of hazardous environment emergencies with some application of theory in a practical setting. Instruction on chemical and physical nature of hazardous materials relative to control of emergency situations involving chemical spills.

EMT 315  EMS Pharmacology I  3 cr
Introduction to pharmacology for the EMS professional. Includes drug classification, dosage calculations, routes and methods of administration, and IV access.
### Courses

**EMT 335 Essentials of Paramedicine** 3 cr  
Preparatory course for ALS EMS students. Includes airway management, EMS Systems, therapeutic communications, responsibilities, injury prevention, and legal issues.

**EMT 345 EMS Pharmacology II** 3 cr  
Advanced course with emphasis on specific drugs within classifications, drug names, actions, indications, contraindications, side effects, precautions, dosages, clinical applications and listings of prescriptions and over-the-counter medications.

**EMT 365 Advanced Trauma Management** 3 cr  
Includes trauma systems, mechanism of injury, management of hemorrhage, shock, burns, soft tissue, head and facial, spinal, thoracic, abdominal and musculoskeletal trauma.

**EMT 440 EMS Op and Sp Considerations** 3 cr  
Includes special circumstances regarding geriatric patient, abuse and assault, patients with special challenges, acute interventions for the chronic care patient, ambulance operations, incident command, rescue, hazmat, and crime scene awareness.

**EG 101 Intro to Engineering & Design** 2 cr  
A course for first time engineering students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. Introduction to engineering fundamentals through reading, homework assignments, laboratory investigations, guest lecturers and group discussions on the engineering profession.  
Pre-requisite: (MA 113 Minimum Grade of D or MA 172 Minimum Grade of D) or (MA 125 Minimum Grade of C or MA 132 Minimum Grade of D). MA 113 and MA 125 can be taken concurrently with this course.

**EG 201 Intro to Engr & Prob Solving** 0 cr  
A course for first-time transfer students that helps maximize the student's potential to achieve academic success and to address the transition from community college to four-year college. Introduction to engineering fundamentals and problem solving techniques through reading, homework assignments, laboratory investigations, guest lecturers and group discussions on the engineering profession.  
Pre-requisite: MA 126 Minimum Grade of C.

**EG 220 Electrical Circuits** 3 cr  
Pre-requisite: MA 126 Minimum Grade of C and PH 202 Minimum Grade of C.

**EG 231 Intro to Ethics and Economics** 3 cr  
Introduction to ethics and the use of codes of ethics in developing an ethical profession. Application of engineering economic principles to engineering problems.  
Pre-requisite: MA 126 Minimum Grade of C.

**EG 270 Engineering Thermodynamics** 3 cr  
First and second law of thermodynamics with applications.  
Pre-requisite: (MA 126 Minimum Grade of C and PH 201 Minimum Grade of C).

**EG 283 Statics** 3 cr  
Use of vector algebra to analyze two and three dimensional forces, moments, and couples. Use of free body diagrams to analyze rigid bodies, beams, trusses, and frames in equilibrium. Calculation of the area and mass moments of inertia, and friction forces.  
Pre-requisite: (MA 126 Minimum Grade of C and PH 201 Minimum Grade of C).

**EG 284 Dynamics** 3 cr  
Kinematics and kinetics of particles and rigid bodies. Work/energy and momentum methods.  
Pre-requisite: EG 283 Minimum Grade of C and MA 126 Minimum Grade of C.

**EG 290 Sp Top -** 1 TO 5 cr  
Subjects of special interest in engineering. Requires permission of instructor.

**EG 315 Mechanics of Materials** 3 cr  
Pre-requisite: EG 283 Minimum Grade of C and (MA 227 Minimum Grade of C and PH 201 Minimum Grade of C).
EG 360  Fluid Mechanics  3 cr
Study of the properties of fluids including fluid statics, kinematics; integral and differential equations of mass, momentum and energy conservation principles; dimensional analysis; flow in ducts; boundary layer flows; and compressible flow. Pre-requisite: MA 238 Minimum Grade of D and EG 284 Minimum Grade of C.

EG 390  Special Topics-  1 TO 3 cr
This course covers topics of current interest in Engineering.

EG 450  Intro to Systems Engineering  3 cr
This course will explore the history of systems engineering, the problems that contributed to the need for systems thinking, and the systems engineering lifecycle as defined by ISO/IEC/IEEE 15288 Systems and Software Engineering -- System Life Cycle Processes. This course will include a significant reading list and a systems engineering exercise that will run for the duration of the course.

EG 490  Special Topics  1 TO 3 cr
This course covers topics of current interest in Engineering.

EG 494  DIS In Engineering  1 TO 3 cr
Directed study, under the guidance of a faculty advisor of a topic from the field of Engineering not offered in a regularly scheduled course.

EG 590  Sp Top -  1 TO 3 cr
Subjects of special interest in engineering for engineering graduate students. Requires permission of instructor.

EG 620  Biomedical Engineering I  4 cr
Fundamental concepts of medical instrumentation, biomedical imaging and biological systems modeling as used in biomedical engineering. Course is cross-listed with IDL 620. Fee.

EG 621  Biomedical Engineering II  4 cr
Fundamental concepts of transport phenomena, cellular and tissue mechanics, and materials as used in biomedical engineering. Course is cross-listed with IDL 621. Fee.

English (EH) (EH)

EH 101  English Composition I  3 cr
Prepares students for diverse types of college writing. Covers the writing process, general criteria used to evaluate writing, collaborative writing, and rhetoric, especially audience analysis. Some sections require an ACT Reading score of 19 or higher or an SAT Critical Reading score of 26 or higher. Grading is "A", "B", "C", and "U". Core Course. Pre-requisite: ACT English 19 or READING TEST SCORE 26 or SAT Critical Reading 450 or (ESL 015 Minimum Grade of C or IELTS Reading 5.5 or IBT TOEFL Reading 20) and (IBT TOEFL Writing 20 or IELTS Writing 5.5 or ESL 016 Minimum Grade of C).

EH 102  English Composition II  3 cr
EH 102 prepares students for college writing by focusing on argumentation, research, and the critical thinking required to argue effectively. Students must earn a C or higher in EH 102 to fulfill the University writing requirement for composition. Core course. Pre-requisite: ACT English 27 or SAT Critical Reading 610 or READING TEST SCORE 33 or EH 101 Minimum Grade of C or EH 010 Minimum Grade of S or University - EH101 Exempt P.

EH 105  Honors Composition - H  3 cr
This course emphasizes the types of writing that students will do in college and reflects goals of the Honors Program with advanced work in critical thinking and research. Prerequisite: students must have been accepted in the Honors Program. Pre-requisite: ACT English 27 or SAT Critical Reading 610 or READING TEST SCORE 33 or EH 101 Minimum Grade of C or EH 110 Minimum Grade of D or EH 190 Minimum Grade of D or EH 010 Minimum Grade of S or University - EH101 Exempt P.

EH 200  Intro to Creative Writing  3 cr
This course will introduce students to writing creatively in four major genres: poetry, fiction, nonfiction, and drama. Fundamentals of craft to be studied will include plot and character in fiction; sound and image in poetry; dialogue in drama; and form and research in creative nonfiction. Analysis of literary models, critiques of students' work, and craft discussions will aid students in creating a final portfolio. Pre-requisite: EH 102 Minimum Grade of C or EH 101 Minimum Grade of C or EH 105 Minimum Grade of C. EH 102 and EH 101 and EH 105 can be taken concurrently with this course.

EH 207  Literature and Gender  3 cr
A variable-topics course to study gender issues in literary texts. Can only be taken for a maximum of 3 credits. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 215  Brit Lit before 1785  3 cr
This course introduces students to the cultural heritage of the British Isles by studying representatives literary works from the Middle Ages through the 18th Century. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course.

EH 216  Brit Lit after 1785  3 cr
This course introduces the student to the cultural heritage of the British Isles by studying representatives literary works from the 19th Century to the present. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course.

southalabama.edu/bulletin  2021-22 GRADUATE/UNDERGRADUATE BULLETIN
EH 225 Am Lit before 1865 3 cr
This course traces the development of American literature from its beginning through 1865 by studying the works of representative writers. Core course.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course.

EH 226 Am Lit after 1865 3 cr
This course traces the development of American literature from 1865 to the present by studying the works of representative writers. Core Course.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course.

EH 235 World Lit before 1650 3 cr
A survey of literature from the Ancient World, the Middle Ages, and the Renaissance, featuring selections in translation. Core course.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course.

EH 236 World Lit after 1650 3 cr
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course.

EH 290 Sp Top 3 cr
A variable-content course treating selected topics in literature and language. May be repeated once for a total of 6 credits when topic varies.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 300 Intro to Literary Study 3 cr
This course offers an introduction to the study of literature with special emphasis on critical writing. Required for 400-level literature classes.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 310 Classical Mythology 3 cr
Through the disciplines of English and Philosophy, this course will provide an introduction to myths and to the literature that recounts the myths, legends, and folktales of ancient Greece and Rome. Not only will this course offer a survey of Greek and Roman myth, but it will also look at how different writers treat the material and why their treatments vary. Cross-listed with PHL 310 and REL 310. Credit cannot be received for both EH 310 and either PHL 310 or REL 310.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 314 Medieval Literature 3 cr
This course will introduce students to major texts of medieval literature, including narrative poetry, drama, prose, and lyric poetry.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 315 Chaucer 3 cr
This course will introduce students to Chaucer's major works in the original language; no prior knowledge of Middle English is required.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 321 Renaissance Literature 3 cr
Non-dramatic literature of the English Renaissance through 1600.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 322 Shakespeare - Com and Romance 3 cr
Study of Shakespeare's comedies and romances.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 323 Shakespeare Tragedies and Hist 3 cr
Study of Shakespeare's tragedies and histories.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 324 17th Century Literature 3 cr
Non-dramatic literature 1600-1660.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 331 American Novel to 1900 3 cr
American novel from its beginning to 1900.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 332 American Nonfiction Prose 3 cr
Major American nonfiction prose.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 334 American Poetry to 1900 3 cr
American poetry from its beginning to 1900.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 340 Restoration Early 18th Lit 3 cr
Literature of the period, including such authors as Behn, Dryden, Finch, Defoe, Pope, Montagu, Swift, and Fielding.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 342 Later 18th Century Lit - W 3 cr
Literature of the period, including such authors as Gray, Boswell, Johnson, Sheridan, Radcliffe, Wollstonecraft, Blake, and Austen.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

<td>Approaches to Eng Grammar - W</td>
<td>3 cr</td>
<td>A course designed primarily to help education majors translate between the languages of conventional grammar and the syntactical grammar relevant to the teaching of English at pre-college levels. Consideration will also be given to the rationales basic to the formation of different grammars and to methods of presenting grammatical material in a classroom situation. Non-education majors interested in a sophisticated approach to the study of grammar might also benefit from this course. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).</td>
<td></td>
</tr>
</tbody>
</table>
EH 372  Technical Writing - W  3 cr
The purpose of this course is to train students in the kinds of written reports required of practicing professionals, aiming to improve mastery of the whole process of report writing from conceptual stage through editing stage.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 373  Writing in Professions - W  3 cr
Practice in the kinds of writing done in such professions as speech pathology and audiology, nursing, teaching, criminal justice, and business. Assignments, which emphasize persuasive writing, may include position papers, correspondence, and reports.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 374  English Bible - Old Testament  3 cr
King James Version of the Bible studied with respect to literary forms, philosophical concepts, and problems of translation.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 375  Engl Bible Apocrypha New Test  3 cr
King James Version of the Bible studied with respect to literary forms, philosophical concepts, and problems of translation.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 379  Horror  3 cr
A study of the history and themes of horror from the early 19th century to the present, including representative texts, films, and scholarship.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 380  Science Fiction  3 cr
Study of the history and themes of science fiction literature and film from the end of the nineteenth century to the present.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 391  Fiction Writing  3 cr
Intensive practice in the short story with contemporary readings. Constructive, critical discussions are conducted on each composition. Emphasis is on the creation of compelling short fiction.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and EH 200 Minimum Grade of C.

EH 393  Creative Nonfiction Writing  3 cr
Intensive study of and practice in writing creative nonfiction - nonfiction that stresses personal voice and the use of literary elements. Concentrates on genres of creative nonfiction (personal or narrative essay, travel and nature writing, cultural criticism, memoir) with an emphasis on producing high-quality writing.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and EH 200 Minimum Grade of C.

EH 395  Poetry Writing  3 cr
Intensive study in different modes and forms in contemporary poetry such as fixed, open, and spoken word. Readings in contemporary poetry will serve as models for students' creation of new poems. Workshops a primary component of the class.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 401  Teaching Composition-W  3 cr
Study of theories of composition and their applications for teaching writing at the secondary school level.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 402  Rhetoric-Ancient and Modern-W  3 cr
Readings in rhetorical theory, ancient and modern, are applied in specific writing assignments which encourage students to adopt a point of view and address a specific audience.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 403  Art of the Essay - W  3 cr
Advanced expository writing. Discussion of British and American essays by such writers as Bacon, Addison, Swift, Arnold, Emerson, Chesterton, Lewis Thomas, and Didion, with applications in written assignments. Student writings are discussed in class or in conference.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

EH 404  Grant Proposal Writing  3 cr
Extensive preparation in the discourse and generic conventions of grant proposals written by practicing professionals, aiming to promote mastery of the whole process of grant writing from conceptual stage through editing stage.
Pre-requisite: (EH 101 Minimum Grade of C and EH 102 Minimum Grade of C) or EH 105 Minimum Grade of C.

EH 405  Editing and Document Design  3 cr
Covers general editing principles, levels and types of editing, and technical editing terms, along with theories and aesthetic principles of document design and production. The course offers extensive, hand-on experience in both areas.
Pre-requisite: (EH 101 Minimum Grade of C and EH 102 Minimum Grade of C) or EH 105 Minimum Grade of C.

</tr>
</tbody>
</table>
EH 480  Gender and Lit  3 cr
A variable content course in specific topics dealing with
gender and literature. May be repeated once for credit
when course content varies for up to six credit hours. Junior
standing.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 481  Comp and Rhetoric - W  3 cr
A variable content course in specific topics concerned with
writing, rhetoric, or language studies. May be repeated once
for credit when course content varies for up to six credit
hours. Junior standing.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 482  Am Literature  3 cr
A variable content course in specific topics from American
literature. May be repeated once for credit when course
content varies for up to six credit hours. Junior standing.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 483  Advanced Fiction Writing  3 cr
Innovative study in various forms of friction for students with
experience in the techniques of friction writing. Discussion
include cultural and critical context as well as foundational
models.
Pre-requisite: EH 102 Minimum Grade of C or EH 105
Minimum Grade of C and EH 200 Minimum Grade of C and
EH 395 Minimum Grade of C.

EH 485  Advanced Poetry Writing  3 cr
Advanced poetry writing course that explores different styles
of contemporary American poetry such as political poetry,
eco-poetry, ekphrastic poetry and more. Students will create
at least ten new poems and submit them for workshop.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C and EH 200 Minimum Grade of C and
EH 395 Minimum Grade of C).

EH 487  Screenwriting for Film  3 cr
Craft talks and guided workshops on how to create a
feature-length screenplay.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C) and EH 200 Minimum Grade of C.

EH 488  Screenwriting for Television-W  3 cr
Craft talks and guided workshops on how to create a
television series and write the pilot episode.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 490  Special Topics  1 TO 3 cr
Selected topics in writing in literary studies. May be
repeated for a total of 9 credits when course content varies.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 492  Seminar -  3 cr
Specific topics in literature. Can be taken twice for a total of
6 credits when topics vary.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 494  Directed Studies  1 TO 3 cr
Directed individual study. Requires permission of the
directing professor and department chair. Course can be
repeated for a total of 8 credits.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 496  Professional Studies - Intern  1 TO 2 cr
On-the-job experience related to the student's classroom
work in the field of English. A maximum of two hours of
credit may be earned in internships. Students consult
with the English department chair regarding internship
opportunities and eligibility. English majors and minors who
are juniors or seniors may enroll. Pre-requisites: Permission
of English department chair and the supervising professor,
completion of EH 101 and EH 102 (or EH 105), 3.0 GPA,
and junior or senior standing.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 497  Adv Creative Nonfiction Writ.  3 cr
Advanced study and practice of writing creative nonfiction.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 499  Senior Honors Project-H  3 TO 6 cr
With the guidance of a faculty mentor, Honors Students
will identify and carry out an independent scholarly project
in English. The outcome of the project will include a
formal presentation and defense before the faculty and
a written senior thesis. The Honors Senior Project will be
evaluated and graded by three members of the faculty
and chaired by the project faculty mentor. The student
must complete a total of six hours of Honors Senior work,
be accepted to the University Honors Program or the
Department Honors Program, and have an approved project
prospectus. University Honors Program participants must
have completed HON 301.
Pre-requisite: HON 301 Minimum Grade of D and (EH 102
Minimum Grade of C or EH 105 Minimum Grade of C).

EH 500  Directed Studies  1 TO 2 cr
Directed individual study. Requires permission of the
directing professor and department chair. Course can be
repeated for a total of 2 credits.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105
Minimum Grade of C).

EH 501  Introduction to Crit Theory  3 cr
Required of all M.A. students in the Literature Concentration
in their first year of work. Surveys current literary theory from
structuralism to the present. The purpose is to introduce
the conceptual lexicons and reading strategies of advanced
literary analysis. Topics treated include structuralism,
deconstruction, psychanalysis, hermeneutics, Marxism,
feminism, and reception theory.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be
taken concurrently with this course.

<td>Restor-Early 18th Century Lit</td>
<td>3 cr</td>
<td>A study of literature in the period, including such authors as Dryden, Rochester, Behn, Congreve, Defoe, Pope, Swift, and Gay. Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.</td>
</tr>
<tr>
<td>EH 526</td>
<td>The 18th Century Novel</td>
<td>3 cr</td>
<td>A study of prose fiction narratives from the Restoration and eighteenth century by such authors as Behn, Defoe, Richardson, Fielding, Smollett, Stern, and Burney, with emphasis on the establishment of the novel as a respected genre. Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.</td>
</tr>
<tr>
<td>EH 527</td>
<td>The Age of Sensibility</td>
<td>3 cr</td>
<td>A study of several late eighteenth-century literary figures, such as Sterne, Johnson, Boswell, Goldsmith, Sheridan, Wollstonecraft, Radcliffe, and Blake. Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.</td>
</tr>
<tr>
<td>EH 532</td>
<td>Early Romantics</td>
<td>3 cr</td>
<td>A study of early Romantic poetry and prose, with emphasis on the poetry of William Wordsworth and S.T. Coleridge. Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.</td>
</tr>
<tr>
<td>EH 534</td>
<td>Late Romantics</td>
<td>3 cr</td>
<td>A study of late romantic poetry and prose, with emphasis on the poetry of Lord Byron, Percy Shelley, and John Keats. Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.</td>
</tr>
<tr>
<td>EH 536</td>
<td>Victorian and Edwardian Poetry</td>
<td>3 cr</td>
<td>A study of poetry of the Victorian and Edwardian periods.</td>
</tr>
<tr>
<td>EH 538</td>
<td>Victorian and Edwardian Prose</td>
<td>3 cr</td>
<td>A study of novels and short fiction of the Victorian and Edwardian periods. Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.</td>
</tr>
<tr>
<td>EH 543</td>
<td>American Romanticism</td>
<td>3 cr</td>
<td>A study of writers of the American Romantic Movement, such as Irving, Emerson, Thoreau, Douglass, Whitman, and Dickinson, focusing primarily on nonfiction prose and poetry. Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.</td>
</tr>
</tbody>
</table>
EH 544  Antebellum American Fiction  3 cr
Examines the emergence and development of American fiction before the Civil War, focusing on the tale and the novel, and including such figures as Cooper, Hawthorne, Poe, Melville, and Stowe.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 545  American Realism  3 cr
A study of writers of the American Realist Movement, such as Twain, James, Crane, Dreiser, Chopin, Cheitnutt, and Jewett.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 547  Southern Renaissance  3 cr
A study of several representative figures from twentieth century Southern literature, such as Faulkner, Warren, Tate, Ransom, O'Connor, McCullers, Dickey, Hurston, Wright, and Percy.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 562  20th Century Poetic Revolution  3 cr
A study of the key figures in the shaping of modern poetry - Yeats, Eliot, Pound, Stevens, and Frost.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 570  Studies in Medieval Literature  3 cr
Theme-based study of Medieval texts; possible topics include late medieval chivalry, medieval sexualities, Arthurian tradition.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 571  Modern British Fiction  3 cr
Examination of selected works of such authors as Conrad, D.H. Lawrence, Woolf, Forster, Joyce, Greene, and Lessing.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 572  Modern American Fiction  3 cr
Examination of selected works of such authors as Anderson, Dickey, Faulkner, Fitzgerald, and Hemingway.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 573  Contemporary Fiction  3 cr
Examines significant trends in contemporary literary fiction.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 574  Folklore and Ways of Listening  3 cr
This course focuses on the collection of folklore and expressive culture, providing a contemporary glimpse at collective memory. Students learn ethnographic fieldwork methods, oral history interviewing techniques, transcription, and the evaluation of oral evidence.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 577  Studies in Genre -  3 cr
Seminar in specific topics from various genres. May be repeated once for credit when content varies.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 583  Grad Fiction Writing Wksp I  3 cr
Special individual instruction in fiction writing. This course requires special permission.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 584  Grad Fiction Writing Wksp II  3 cr
Special individual instruction in fiction writing. This course requires special permission.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 585  Grad Poetry Writing Wksp I  3 cr
Special individual instruction in poetry writing. This course requires special permission.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 586  Grad Poetry Writing Wksp II  3 cr
Special individual instruction in poetry writing. This course requires special permission.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 589  Creative Nonfiction Writing  3 cr
Intensive study of and practice in writing creative nonfiction that stresses personal voice and the use of literary elements. Focus on the personal or narrative essay, travel and nature writing, and cultural criticism.

EH 590  Special Topics -  3 cr
A graduate seminar designed to allow close study of selected literary topics or figures. May be repeated twice for credit when the subject offerings are from different literary areas.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 591  Topics in Creative Writing  3 cr
Selected topics in creative writing. May be repeated for a total of 6 credits when the course content varies.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 592  Seminar -  3 cr
A specific subject in American or British literature to be assigned prior to each semester. May be taken once for credit when the subject offerings are from different literary areas.
Pre-requisite: EH 502 Minimum Grade of C.
EH 594  Dir St  -  1 TO 8 cr
Directed individual study on a topic not covered by an existing course. Prerequisite: Prior permission of the directing professor and the department chair. May be taken for a total of 8 credits.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 596  Professional Studies--Intern  1 OR 2 cr
On-the-job experience related to the student's classroom work in the field of English. A maximum of two hours of credit may be earned in internships. Students consult with the English Department Graduate Coordinator regarding internship opportunities and eligibility. Prerequisites: Permission from the Graduate Coordinator and the English Department Chair.

EH 598  Literature Capstone  3 cr
The literature Capstone is a directed study class required for students completing the Literature Concentration in their last semester of coursework. Working with a mentor, students create a research portfolio and give a departmental presentation.
Pre-requisite: EH 502 Minimum Grade of B. EH 502 can be taken concurrently with this course.

EH 599  Thesis -  0 TO 6 cr
One to six credits per semester with a maximum of six hours of credit. Pre-requisite: Admitted to the Graduate Program.

ELT 325  Survey of ESL  3 cr
A comprehensive survey of current research, methodology and materials in the field of English as a Second Language and historical, philosophical, political, legal, social and educational issues that have contributed to policy regarding public school services for language minority students.

ELT 330  Methods and Materials for ESL  3 cr
Techniques of teaching English as a second language will be introduced and applications explored. Acquaints students with methodology and materials, with instruction on the preparation of audio and visual teaching aids, lesson plans and the use of educational technology, behavioral objectives, state ESOL objectives and teaching strategies for English learners in the ESL or mainstream classroom. ELT 525 is a recommended pre-requisite or co-requisite course, but is not a requirement.

ELT 345  Cross-Cultural Understanding  3 cr
Investigates the roles of language and culture in education. Addresses the social processes involved in second language acquisition, including developmental influences, influences of home language and culture, culture variation, home vs. school cultural differences and working parents/family of ELL students.

ELT 358  Cross-Cultural Understanding  3 cr
This course provides knowledge of linguistics including English syntax, semantics, pragmatics, morphology, phonemics and phonology as applied to teaching English Language Learners. Students will review theories in first and second language acquisition. Students will apply linguistic theory, issues in sociolinguistics, psycholinguistics and neurolinguistics to teach English to ELLs, with emphasis on pronunciation, intonation and structural analysis of English and contrastive analysis of English and non-English linguistic systems.

ELT 525  Found Tchg Eng as Sec Lang  3 cr
A comprehensive survey of current research, methodology and materials in the field of English as a Second Language and historical, philosophical, legal, social, and educational issues that have contributed to policy regarding public school services for language minority populations.

ELT 530  Methods and Materials Tch ESL  3 cr
Techniques of teaching English as a second language will be introduced and applications explored. Acquaints students with methodology and materials, with instruction on the preparation of audio and visual teaching aids, lesson plans, and the use of educational technology, behavioral objectives, state ESOL objectives, and teaching strategies for the ELL student in the ESL or mainstream classroom. Course restricted to majors in ESOL education.

ELT 545  Cross-Cultural Understand Tchr -  3 cr
Investigates the roles of language and culture in education. Addresses the social processes involved in the second language acquisition, including developmental influences, influences of home language and culture, cultural variation, home vs. school cultural differences, and working with parents/family of ELL students.

ELT 553  LA Assess Eval of ELL Students  3 cr
Selection, administration, and interpretation of measurement instruments. Includes entry and placement procedures, language proficiency/achievement testing, linguistic and cultural aspects of intelligence testing, multiple intelligence assessment. ELL student assessment in the mainstream classroom, and application of testing to instruction. Course restricted to majors in ESOL education.

ELT 558  Applied Ling for Teach of ELL  3 cr
This course provides knowledge of linguistics including English syntax, semantics, pragmatics, morphology, phonemics, and phonology as applied to teaching English Language Learners. Students will review theories in first and second language acquisition. Students will apply linguistics theory, issues in sociolinguistics, psycholinguistics, and neurolinguistics, to teach English to ELLs with emphasis on pronunciation, intonation, and structural analysis of English and contrastive analysis of English and non-English linguistic systems. Course restricted to majors in ESOL education.
ELT 590 Spec Top- 1 TO 3 cr
Current topics of special concern to ESOL Educators. A different topic will be covered each time the course is offered. Not more than six semester hours may be applied toward a degree program.

ELT 594 Directed Study and Research 1 TO 3 cr
Students pursue a research project under the direction of a graduate faculty member. The course requires special permission from the program director, to make sure that the study is in line with the curriculum that the student is pursuing. Prerequisite: Approval of research prospectus by the graduate committee.

ELT 595 ESOL Internship 3 OR 6 cr
Three hundred hours of supervised on-the-job experience in teaching English to speakers of other languages (ESOL) in P-12 settings. Interns are engaged in the full scope of teaching activities including planning, delivering lessons, evaluating students, and conducting managerial tasks related to teaching English as a Second Language. Teaching experience will be accompanied by scheduled observations and discussions to analyze and evaluate each student's internship experience. Course restricted to majors in ESOL education.
Pre-requisite: ELT 525 Minimum Grade of C and ELT 530 Minimum Grade of B and ELT 545 Minimum Grade of C and ELT 553 Minimum Grade of C and ELT 558 Minimum Grade of C.

Environmental Toxicology (EXT) (EXT)

EXT 515 Environmental Toxicology 4 cr
Introduction to the scientific and technical principles of toxicological processes in the context of the ecosystem. Students will understand both the types of major environmental toxicants and how to properly evaluate their toxicity and factors that influence toxicity. Students will recognize and coherently formulate risk assessment and by using the tools and techniques acquired, develop and communicate proposals for remedy.
Pre-requisite: (BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C) and (CH 201 Minimum Grade of C and CH 202 Minimum Grade of C) and (CH 540 Minimum Grade of C and B and CH 541 Minimum Grade of B).

EXT 594 Directed Studies 1 TO 6 cr
Students pursue a research project under the direction of a graduate faculty member. The course requires special permission from the program director, to make sure that the study is in line with the curriculum that the student is pursuing.

EXT 599 Research Thesis 1 TO 6 cr
Research project directed by a member of the graduate faculty. Prerequisite: Approval of research prospectus by the graduate committee.

Finance (FIN) (FIN)

FIN 300 Personal Finance 3 cr
General principles and techniques of finance as applied to personal business transactions and the management of personal funds. Finance majors may not count this course as a finance elective.

FIN 305 Introduction to Finance 3 cr
A survey course covering corporate financial management. Basic concepts such as interest rates, time value of money, cost of capital, and risk are discussed and applied to stock, bond, and long-term investment valuation. Guidelines are developed for corporate financial decision-making in such areas as working capital management and capital structure policy, with emphasis on short-term financial management and financial planning. The impact of ethical considerations and global financial markets are discussed. This course if for non-business and non-economics majors only.
Pre-requisite: (ACC 212 Minimum Grade of D or BMS 212 Minimum Grade of D) and (ECO 212 Minimum Grade of D or ECO 215 Minimum Grade of D) and (BUS 245 Minimum Grade of D or BMS 245 Minimum Grade of D or BMS 250 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D).

FIN 315 Business Finance 3 cr
A survey course covering corporate financial management. Basic concepts such as interest rates, time value of money, cost of capital, and risk are discussed and applied to stock, bond, and long-term investment valuation. Guidelines are developed for corporate, financial decision making in the areas of capital structure policy, dividend policy, long-term financing, corporate control, and working capital management. The impact of ethical considerations and global financial markets are discussed.
Pre-requisite: (ACC 212 Minimum Grade of D or BMS 212 Minimum Grade of D) and (ECO 212 Minimum Grade of D or ECO 215 Minimum Grade of D) and (BUS 245 Minimum Grade of D or BMS 245 Minimum Grade of D or BMS 250 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D).

FIN 332 Multinational Finance 3 cr
Analysis of financial management of multinational firms. Introduces the environment of international capital and foreign exchange markets and examines the effects of international business environment on risk, capital budgeting, working capital management, and capital structure decisions of the firm.
Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.
FIN 343 Money Mkt and Fin Instit 3 cr
An examination of the major financial institutions operating in our economy, and the environment in which they operate. In light of the changing environment of the financial institutions area, the changing roles of the various financial markets, major legislation, and the regulatory agencies are also studied in this course. Credit for both FIN 343 and ECO 340 is not allowed.
Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D. FIN 315 and FIN 341 can be taken concurrently with this course.

FIN 344 Real Estate 3 cr
Introduction to the tools used to make intelligent decisions regarding real estate as a wealth-building asset. Topics include legal rights, valuation, financial analysis, contracts, and brokerage with practical applications. Emphasis is given to local supply and demand conditions and property location and their impact on typical consumer decisions.

FIN 345 Principles of Insurance 3 cr
Examines risks facing the individual and business organizations and applications of public and private insurance to reduce or eliminate such risks. This is a survey course involving all classes of insurance.

FIN 346 Alabama Real Estate Law & Reg 1 cr
Course required for students planning to take the Alabama Real Estate License Examination. Topics include current Alabama Real Estate License Law, Administrative Rules and regulations, Consumer Guides, State Court Cases and relevant readings in Real Estate Risk Management. Requires Consent of Instructor.
Pre-requisite: FIN 344 Minimum Grade of D or MKT 345 Minimum Grade of D. FIN 344 can be taken concurrently with this course.

FIN 350 Fin Stmt Analysis & Corp Strat 3 cr
In-depth coverage of the principles and practices of effective analysis of the financial statements of firms for the purpose of understanding (1) the economic and financial characteristics and current conditions of the firm, (2) particular strategies the firm may select with which to compete, and (3) the accounting principles and procedures underlying the financial statements. The course integrates concepts from accounting, economics, finance and management.
Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.

FIN 370 Short-Term Financial Managemnt 3 cr
In-depth coverage of liquidity, management of working capital, corporate cash management, short term investment, financing and forecasting.
Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.

FIN 410 Intermediate Bus Finance 3 cr
In-depth coverage of financial planning and management. including cost of capital, capital budgeting, valuation and other topics.
Pre-requisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (BUS 255 Minimum Grade of D or ST 275 Minimum Grade of D or BMS 250 Minimum Grade of D or BMS 255 Minimum Grade of D).

FIN 411 Advanced Business Finance - W 3 cr
Actual and simulated cases in finance from business and industry; includes businesses of all sizes.
Pre-requisite: FIN 350 Minimum Grade of D and FIN 410 Minimum Grade of D or FIN 441 Minimum Grade of D.

FIN 420 Investments 3 cr
Survey of the characteristics of investment alternatives and the investment environment, including market operations and regulations, sources and uses of information, and an introduction to capital market theory.
Pre-requisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and (BUS 245 Minimum Grade of D or ST 175 Minimum Grade of D or ST 210 Minimum Grade of D or BMS 245 Minimum Grade of D or BMS 250 Minimum Grade of D).

FIN 421 Sec Analy-Portfolio Mgt 3 cr
The development of the theory and practice of security analysis and portfolio management. Security analysis involves the fundamental determination of security values through economic, industry, and firm analysis. Portfolio management addresses asset selection and allocation for the construction and maintenance of portfolios that meet specific investment objectives in a risk-return context.
Pre-requisite: FIN 420 Minimum Grade of D or FIN 441 Minimum Grade of D.

FIN 425 Student Managed Invest Fund I 3 cr
This is the first in a sequence of two courses whereby students manage a real portfolio of securities. The selected students research the prospective investments, generate reports, and make decisions to buy or sell the securities. Administrative responsibilities are assigned and analyst teams are formed. Students accepted into this course must enroll in FIN 426 (Student Managed Investment Fund II) the following term unless otherwise disqualified. Requires Department Chair permission.
Pre-requisite: FIN 420 Minimum Grade of D or FIN 441 Minimum Grade of D.

FIN 426 Student Managed Invest Fund II 3 cr
This is the second in a sequence of two courses whereby students manage a real portfolio of securities. The selected students research the prospective investments, generate reports, and make decisions to buy or sell the securities. Administrative responsibilities are assigned and analyst teams are formed. Students build on and add depth to skills and knowledge acquired in FIN 425. Requires Department Chair permission.
Pre-requisite: FIN 425 Minimum Grade of D.
FIN 430  Derivative Securities  3 cr
Covers principles of Options and Futures contracts and their economic functions. Options: basic strategies; combinations and spreads; pricing; and the various types of contracts. Futures: fundamentals of the market; contract specifications and their uses. Program trading and portfolio insurance. Pre-requisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D or BMS 341 Minimum Grade of D).

FIN 444  Real Estate Valuation - W  3 cr
Emphasis is given to the valuation process and the analysis that leads to valid estimates of value. The cost, sales comparison, and income approaches to value are examined and illustrated within the Uniform Standards of Professional Appraisal Practice requirements. Preparation of typical valuation reports is covered. Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D and FIN 444 Minimum Grade of D or MKT 345 Minimum Grade of D and EH 101 Minimum Grade of C and EH 102 Minimum Grade of C.

FIN 445  Life and Disability Insurance  3 cr
Principles and practices of insurance used for family and income protection against premature death and disability; retirement and pension plans including group insurance and social security. Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.

FIN 446  Real Estate Finance & Invest  3 cr
Analysis of income property debt and equity instruments, financing documents, financial analysis and risk scenarios of different property types, and relevant local, state, and federal laws and court cases. Pre-requisite: FIN 344 Minimum Grade of D or MKT 345 Minimum Grade of D and FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.

FIN 448  Real Estate Law  3 cr
A detailed examination of the contracts, documents, and instruments used in a transaction on one or more of the real property rights, and relevant local, state, and federal laws and court cases. Pre-requisite: FIN 344 Minimum Grade of D or MKT 345 Minimum Grade of D.

FIN 470  Depository Institution Mgt I  3 cr
Analysis of depository institution management processes focusing on management of capital, assets, and liabilities with emphasis on the regulatory environment in which depository institutions operate. Pre-requisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D).

FIN 471  Depository Institutions Mgt II  3 cr
In-depth analysis of consumer, real estate, commercial, and agricultural lending areas of depository institution. Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.

FIN 490  Special Topics  3 cr
Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration. Prerequisite: Approval of Department Chair. Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.

FIN 492  Seminar - Finance  3 cr
Oral reports on readings of various aspects of business finance. Pre-requisite: FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D.

FIN 494  Directed Studies  3 cr
Primarily designed to give superior students an opportunity to study selected topics of particular interest. Grades are awarded on a satisfactory/unsatisfactory basis. Prerequisites: a cumulative GPA 2.5 and approval of Department Chair. Pre-requisite: (FIN 315 Minimum Grade of D or FIN 341 Minimum Grade of D) and FIN 343 Minimum Grade of D and FIN 410 Minimum Grade of D and FIN 420 Minimum Grade of D and (FIN 420 Minimum Grade of D or FIN 441 Minimum Grade of D).

FIN 496  Finance Internship  3 cr
The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of the Department Chair. Prerequisites: Junior or Senior standing, declared major in finance, overall GPA of at least 2.0, Internship Agreement signed by the Department Chair, FIN 315 Minimum grade of D. Pre-requisite: FIN 315 Minimum Grade of D.

FIN 497  Finance Internship II  3 cr
The internship program is designed to give students practical experience in their field of study. Students complete directed learning experiences under the supervision of the Department Chair. Prerequisites: Junior or Senior standing, declared major in Finance, overall GPA of at least 2.5 and internship agreement signed by Department Chair. Pre-requisite: FIN 496 Minimum Grade of P.

FIN 508  Introduction to Corp Finance  3 cr
Coverage of fundamental finance concepts and techniques. Major topics include time value of money, risk, asset valuation including fixed income securities and stock, financial markets, term structure of interest rates, risk management (derivatives), and multinational financial management issues. Cases will be used as appropriate.

FIN 590  Sp Top -  3 cr
Designed to provide graduate students an opportunity to study selected topics. (A student may count no more than 3 hours of Special Topics in the M.B.A. degree program). Prerequisites: Approval of Department Chair Pre-requisite: MBA Prerequisites P.
FIN 594 Independent Study in Finance 3 cr
Reading and research on selected topics. Conference and formal research report required. Prerequisites: Approval of Department Chair.
Pre-requisite: MBA Prerequisites P

Foreign Lang Less Taught (LGS) (LGS)

LGS 101 Introductory Japanese I 3 cr
The first of a two-semester sequence in Introductory Japanese. The goal of the course is to introduce students to Japanese as it is spoken today. Emphasis on developing speaking and listening skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. LGS 101 is a NASILP course. Fee. Core Course.

LGS 102 Introductory Japanese II 3 cr
Pre-requisite: LGS 101 Minimum Grade of C.

LGS 106 Introductory Arabic I 3 cr
The first of a two-semester sequence in Introductory Arabic. Its purpose is to introduce students to Arabic as it is spoken today. Emphasis on developing speaking and listening skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Study requires extensive use of audio-tapes. LGS 106 is a NASILP course. Fee. Core Course.

LGS 107 Introductory Arabic II 3 cr
A continuation of Arabic I. Fee. Core Course.
Pre-requisite: LGS 106 Minimum Grade of C.

LGS 110 Intro American Sign Language I 3 cr
The first of a two-semester sequence in introductory American Sign Language (ASL). The goal of the two-semester course is to introduce students to ASL as it is used today. Emphasis is on developing skills in signing through intensive drills, exposure to basic ASL structural patterns and functional vocabulary. LGS 110 is a LTLs course. Fee.

LGS 111 Intro American Sign Lang II 3 cr
The second of a two-semester sequence in introductory ASL. The goal of the two-semester course is to introduce students to ASL as it is used today. Emphasis is on developing skills in signing through intensive drills, exposure to basic ASL structural patterns and functional vocabulary. LGS 111 is a LTLs course. Fee.
Pre-requisite: LGS 110 Minimum Grade of C.

LGS 131 Introductory Hindi I 3 cr
LGS 131 is the FIRST of a two semester sequence of Introductory Hindi. The course develops speaking and listening skills, as well as reading and writing skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.

LGS 141 Introductory Greek I 3 cr
The first of a two-semester sequence in Introductory Modern Greek. The goal of the course is to introduce students to Greek as it is spoken today. Emphasis on developing speaking and listening skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. LGS 141 is a NASILP course. Fee. Core Course.

LGS 142 Introductory Greek II 3 cr
A continuation of Introductory Greek I. Fee. Core Course.
Pre-requisite: LGS 141 Minimum Grade of C.

LGS 161 Introductory Italian I 3 cr
The first of a two-semester sequence in introductory Italian. Its purpose is to introduce students to Italian as it is spoken today. Emphasis on developing speaking and listening skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Study requires extensive use of audio-tapes. LGS 161 is a NASILP course. Fee. Core course.

LGS 162 Introductory Italian II 3 cr
LGS 162 is the second of a two semester sequence of Introductory Italian I. As a continuation of Introductory Italian I, the course continues to develop speaking and listening skills, as well as reading and writing skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.
Pre-requisite: LGS 161 Minimum Grade of C.

LGS 171 Introductory Korean I 3 cr
LGS 171 is the first of a two semester sequence of Introductory Korean. The course develops speaking and listening skills, as well as reading and writing skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.

LGS 172 Introductory Korean II 3 cr
The second of a two-semester sequence in introductory Korean. The goal of the two-semester course is to introduce students to Korean as it is spoken today. Emphasis is on building upon skills learned in LGS 171 and developing speaking and listening skills through intensive drills, exposure to basic structural patterns and functional vocabulary. LGS 172 is an LTLs course. Fee. Core Course.
Pre-requisite: LGS 171 Minimum Grade of C.

LGS 181 Introductory Portuguese I 3 cr
LGS 181, Introductory Portuguese I (3 credit hours). The first of a two-semester sequence in introductory Portuguese. Its purpose is to introduce students to Portuguese as it is spoken today. Emphasis on developing speaking and listening skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Study requires extensive use of audio-tapes. LGS 181 is a NASILP course. Fee. Core Course.
LGS 182      Introductory Portuguese II   3 cr
LGS 182 is the second of a two semester sequence of Introductory Portuguese. As a continuation of Introductory Portuguese I the course continues to develop speaking and listening skills, as well as reading and writing skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.
Pre-requisite: LGS 181 Minimum Grade of C.

LGS 190      Special Topics -   3 cr
Topics to be determined by student need and interest. Course may be repeated when content varies for a maximum of six hours. LGS 190 is a NASILP course. Enrollment by special permission. Fee.

LGS 201      Intermediate Japanese I   3 cr
The first of a two-semester sequence. A continuation of the training necessary to build fluency in understanding and speaking Japanese. LGS 201 is a NASILP course. Fee. Core Course.
Pre-requisite: (LGS 102 Minimum Grade of C or LGS 103 Minimum Grade of D).

LGS 202      Intermediate Japanese II   3 cr
A continuation of LGS 201. Fee. Core Course.
Pre-requisite: LGS 201 Minimum Grade of C.

LGS 206      Intermediate Arabic I   3 cr
The first of two-semester sequence in Intermediate Arabic. This is a continuation of Introductory Arabic II. It continues to develop speaking and listening skills as well as reading and writing skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Study requires extensive use of audio -tapes. Fee. Core course.
Pre-requisite: (LGS 107 Minimum Grade of C or LGS 108 Minimum Grade of D).

LGS 207      Intermediate Arabic II   3 cr
A continuation of Intermediate Arabic I. Fee. Core Course.
Pre-requisite: LGS 206 Minimum Grade of C.

LGS 210      Intermediate ASL I   3 cr
The first of a two-semester sequence in Intermediate ASL. This is a continuation of Introductory ASL II. It continues to develop signing and interpreting skills through intensive drills, exposure to the basic ASL structure patterns and functional vocabulary. LGS 210 is a LTLs course. Fee. Core Course.
Pre-requisite: LGS 111 Minimum Grade of C.

LGS 211      Intermediate ASL II   3 cr
A continuation of Intermediate ASL I. LGS 211 is a LTLs course. Fee. Core Course
Pre-requisite: LGS 210 Minimum Grade of C.

LGS 241      Intermediate Greek I   3 cr
The first of a two-semester sequence in Intermediate Modern Greek. A continuation of Introductory Greek II. It continues to develop speaking and listening skills, as well as reading and writing skills, through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.
Pre-requisite: (LGS 142 Minimum Grade of C or LGS 143 Minimum Grade of D).

LGS 242      Intermediate Greek II   3 cr
A continuation of Intermediate Greek I. Fee. Core Course.
Pre-requisite: LGS 241 Minimum Grade of C.

LGS 261      Intermediate Italian I   3 cr
The first of a two semester sequence of Intermediate Italian. As a continuation of Introductory Italian II, the course continues to develop speaking and listening skills as well as reading and writing skills, through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.
Pre-requisite: LGS 162 Minimum Grade of C.

LGS 262      Intermediate Italian II   3 cr
LGS 262 is the second of a two semester sequence of Intermediate Italian. As a continuation of Introductory Italian II, the course continues to develop speaking and listening skills as well as reading and writing skills, through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.
Pre-requisite: LGS 261 Minimum Grade of C.

LGS 271      Intermediate Korean I   3 cr
The first of a two-semester sequence. A continuation of the training necessary to build proficiency in understanding and speaking Korean. Fee. Core Course.
Pre-requisite: LGS 172 Minimum Grade of C.

LGS 272      Intermediate Korean II   3 cr
Pre-requisite: LGS 271 Minimum Grade of C.

LGS 281      Intermediate Portuguese I   3 cr
LGS 281 is the first of a two semester sequence of Intermediate Portuguese. As a continuation of Introductory Portuguese II the course continues to develop speaking and listening skills, as well as reading and writing skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.
Pre-requisite: LGS 182 Minimum Grade of C.

LGS 282      Intermediate Portuguese II   3 cr
LGS 282 is the second of a two semester sequence of Intermediate Portuguese. As a continuation of Intermediate Portuguese I the course continues to develop speaking and listening skills, as well as reading and writing skills through intensive drills, exposure to basic structural patterns, and functional vocabulary. Fee. Core Course.
Pre-requisite: LGS 281 Minimum Grade of C.
LGS 290  Special Topics -  3 cr
Topics to be determined by student need and interest.
Course may be repeated when content varies for a maximum of six hours. LGS 290 is a NASILP course.
Enrollment by special permission. Fee.
Pre-requisite: LGS 111 Minimum Grade of C.

LGS 390  Sp Top -  3 cr
Topics to be determined by student need and interest.
Course may be repeated when content varies for a maximum of twelve hours. LGS 390 is a NASILP course.
Prerequisite: Completion of two-year sequence in a NASILP approved language or equivalent. Fee.

Foreign Languages And Lit (LG) (LG)

LG 024  Foreign Lang Proficiency Test  0 cr
Elementary level proficiency test administered to Arts and Sciences students who wish to demonstrate proficiency in a foreign language other than French, German, or Spanish.

LG 101  Introductory Latin I  3 cr
Introductory Latin I is the first half of a two-course sequence in Classical Latin. The goal of the courses is to achieve basic proficiency in understanding and reading Latin and to acquire a basic knowledge of Roman customs, history and culture.

LG 102  Introductory Latin II  3 cr
Introductory Latin II is the second half of a two-course sequence in Classical Latin. The goal of the courses is to achieve basic proficiency in understanding and reading Latin and to acquire a basic knowledge of Roman customs, history and culture.
Pre-requisite: LG 101 Minimum Grade of D.

LG 110  World Languages  3 cr
The general aim of this introductory-level course is to ground students in a basic understanding of the social, political, economic and cultural realities of language around the globe, including the importance of mastering one or more languages other than one's native tongue. Students taking the course will profit from an understanding of language value in the global marketplace and will gain new insight into their own native language through a brief examination of the structures of several of the world's major languages. The course may feature guest presenters and will also discuss techniques of language acquisition.

LG 111  Introductory French I  3 cr
The first of a two-semester sequence in introductory French. The goal of the two-semester sequence is to achieve a basic proficiency in understanding, speaking, reading, and writing French, and to acquire basic knowledge of French-speaking cultures. Fee. Core Course.

LG 112  Introductory French II  3 cr
The second semester of the introductory course. Fee. Core Course.
Pre-requisite: LG 111 Minimum Grade of D.

LG 121  Introductory Chinese I  3 cr
First half of the first-year sequence in Modern Standard Mandarin Chinese. Develops speaking, listening, reading and writing equally. Builds a solid foundation in pronunciation, syntax & vocabulary. Students will be able to hold simple conversations at the end.

LG 122  Introductory Chinese II  3 cr
Second half of the first-year sequence in Modern Standard Mandarin Chinese. Develops speaking, listening, listening, reading and writing equally. Builds a solid foundation in pronunciation, syntax & vocabulary. Students will be able to hold simple conversations at the end.
Pre-requisite: LG 121 Minimum Grade of D.

LG 131  Introductory Spanish I  3 cr
The first of a two-semester sequence in introductory Spanish. The goal of the two-semester course is to achieve a basic proficiency in communication in Spanish through the development of listening, speaking, reading, and writing skills. Fee. Core Course.

LG 132  Introductory Spanish II  3 cr
The second semester of the introductory course. Fee. Core course.
Pre-requisite: LG 131 Minimum Grade of D.

LG 141  Intro Classical Greek I  3 cr
Introductory Classical Greek I is the first half of a two-course sequence in Classical Greek. The goal of the courses is to achieve basic proficiency in understanding and reading Greek and to acquire a basic knowledge of ancient Greek customs, history, and culture.

LG 142  Intro Classical Greek II  3 cr
Introductory Classical Greek II is the second half of a two-course sequence in Classical Greek.
Pre-requisite: LG 141 Minimum Grade of C.

LG 151  Introductory German I  3 cr
The first of a two-semester sequence in introductory German. The goal of the two-semester course is to achieve a basic proficiency in understanding, speaking, reading, and writing German, and to acquire basic knowledge of German-speaking cultures. Fee. Core Course.

LG 152  Introductory German II  3 cr
The second semester of the introductory course. Fee. Core Course.
Pre-requisite: LG 151 Minimum Grade of D.
LG 153  Accelerated Intro German  6 cr
A one-semester intensive first-year course for highly motivated students. This course covers the material taught in LG 151 and LG 152 and satisfies the Arts and Sciences Foreign Language requirement. By permission of instructor. Fee. Core Course.

LG 171  Introductory Russian I  3 cr
The first of a two-semester sequence in Introductory Russian. The goal of the two-semester course is to achieve a basic proficiency in understanding, speaking, reading, and writing Russian. Fee. Core Course.

LG 172  Introductory Russian II  3 cr
The second semester of the introductory course. Fee. Core course.
Pre-requisite: LG 171 Minimum Grade of D.

LG 173  Accelerated Intro Russian  6 cr
A one-semester intensive first-year course for highly motivated students with prior instruction in a foreign language (either high school or college level) with a B average or better. This course covers material taught in LG 171 and 172 and satisfies the Arts and Sciences foreign language requirement. By permission of the instructor. Usually taught in the Spring semester. Fees.

LG 190  Sp Top -  1 TO 3 cr
Topics to be determined by student need and interest. Course may be repeated when content varies for a total of 12 credit hours.

LG 193  Study Abroad  1 TO 6 cr
This course is an introductory language and culture course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

LG 201  Intermediate Latin I  3 cr
The first of a two-semester sequence in intermediate Latin. The course is a continuation of the study necessary to achieve fluency in reading, understanding, and translating Classical Latin. A comprehensive review of grammar is accompanied with the presentation of material beyond the scope of Introductory Latin I and II. All texts for reading and translation are presented in the original classical texts, unabridged and complete. Emphasis on the development of the periods of classical Roman literature as well as pertinent events in Roman history and culture. Pre-requisite: LG 102 Minimum Grade of C.

LG 202  Intermediate Latin II  3 cr
The second of a two-semester sequence in intermediate Latin.
Pre-requisite: LG 201 Minimum Grade of C.

LG 205  Modern Lit in Translation  3 cr
A varying-content course designed to introduce the student to selected major works of one language other than English. Works from English-speaking countries may occasionally be used for the purpose of cross-cultural comparison. The student may choose from a number of specific topics that will be designated prior to each semester. All readings and discussions are in English. May be repeated for credit when course content varies. Foreign Language majors wishing to have one or several of these courses count toward their major must seek prior approval from their advisor.
Pre-requisite: (EH 102 Minimum Grade of B or EH 105 Minimum Grade of B).

LG 211  Intermediate French I  3 cr
The first of a two-semester sequence in intermediate French. A continuation of the training necessary to achieve fluency in understanding, speaking, reading and writing French. A comprehensive grammar review is complemented by elaboration of grammatical topics and lexical development beyond the scope of Introductory French I and II. Readings of literary and cultural texts treating French-speaking areas of the world. Emphasis on fluency in conversation and cultural fluency through class discussion of both written and recorded texts from the Francophone world. Fee. Core Course.
Pre-requisite: (LG 112 Minimum Grade of C or LG 113 Minimum Grade of C).

LG 212  Intermediate French II  3 cr
The second semester of the intermediate sequence. Fee. Core Course.
Pre-requisite: LG 211 Minimum Grade of C.

LG 213  Accelerated Inter French - H  4 cr
A one-semester intensive intermediate course for students who have successfully completed LG 113 (Accelerated Introductory French-Honors), or the equivalent. This course covers material taught in LG 211 and 212. Usually taught in the Spring semester. By permission of instructor. Fee.
Pre-requisite: LG 112 Minimum Grade of C or LG 113 Minimum Grade of C.

LG 221  Intermediate Chinese I  3 cr
First half of the second-year sequence in Modern Standard Mandarin Chinese. Furthers communicative competence in all aspects of language learning: listening, speaking, reading and writing. Students will be able to write essays at the end.
Pre-requisite: LG 122 Minimum Grade of D.

LG 222  Intermediate Chinese II  3 cr
Second half of the second-year sequence in Modern Standard Mandarin Chinese. Furthers communicative competence in all aspects of language learning: listening, speaking, reading and writing. Students will be able to write essays at the end.
Pre-requisite: LG 221 Minimum Grade of D.
LG 231 Intermediate Spanish I 3 cr
The first of a two-semester sequence in intermediate Spanish. A continuation of the training necessary to achieve fluency. Grammar review, class discussions, extensive oral and written work, short readings in literature and culture are included. Fee. Core Course.
Pre-requisite: (LG 132 Minimum Grade of C or LG 133 Minimum Grade of C or LG 134 Minimum Grade of C).

LG 232 Intermediate Spanish II 3 cr
The second semester of the intermediate sequence. Fee. Core Course.
Pre-requisite: LG 231 Minimum Grade of C.

LG 234 Inter Spanish Accel -H 6 cr
A one-semester intensive intermediate course for students who have successfully completed LG 134 (Accelerated Introductory Spanish), or the equivalent. This course covers the material taught in LG 231 and 232. Core Course. By permission of the instructor. Fee.
Pre-requisite: (LG 132 Minimum Grade of C or LG 133 Minimum Grade of C or LG 134 Minimum Grade of C).

LG 241 Interm Classical Greek I 3 cr
The first of a two-semester sequence in intermediate Classical Greek. The course is a continuation of the study necessary to achieve fluency in reading, understanding and translating Classical Greek. A comprehensive review of grammar is accompanied with the presentation of material beyond the scope of Introductory Classical Greek I and II. All texts for reading and translation are presented in the original classical texts, unabridged and complete. Emphasis on the development of the periods of classical Greek literature as well as pertinent events in Greek history and culture.
Pre-requisite: LG 142 Minimum Grade of C.

LG 242 Interm Classical Greek II 3 cr
The second of a two-semester sequence in intermediate Classical Greek.
Pre-requisite: LG 241 Minimum Grade of C.

LG 251 Intermediate German I 3 cr
The first of a two-semester sequence in Intermediate German. A continuation of the training necessary to achieve fluency in understanding, speaking, reading, and writing German. Reading of literary, cultural, and historical texts. Class discussions, reports in German, both oral and written, are required. Fee. Core Course.
Pre-requisite: (LG 152 Minimum Grade of C or LG 153 Minimum Grade of C).

LG 252 Intermediate German II 3 cr
The second semester of the intermediate sequence. Fee. Core Course.
Pre-requisite: LG 251 Minimum Grade of C.

LG 271 Intermediate Russian I 3 cr
The first of a two-semester sequence in intermediate Russian. A continuation of the training necessary to achieve fluency and understanding in speaking, reading, and writing Russian. Reading of literary and cultural texts. Increased practice in Russian conversation. Fee. Core Course.
Pre-requisite: (LG 172 Minimum Grade of C or LG 173 Minimum Grade of C).

LG 272 Intermediate Russian II 3 cr
The second semester of intermediate Russian. Fee. Core Course.
Pre-requisite: LG 271 Minimum Grade of C.

LG 273 Intensive Second Year Russian 4 cr
A one-semester intensive Second Year course for students who have successfully completed the LG 171 and 172 sequence or LG 173 (Intensive First Year Russian). This course covers material taught in LG 271 and 272. By permission of instructor. Fee.
Pre-requisite: LG 171 Minimum Grade of C and LG 172 Minimum Grade of C or LG 173 Minimum Grade of C.

LG 278 Chinese HY in Film and Lit 3 cr
This course will introduce students to major topics in Chinese history, covering both ancient periods such as the Three Kingdoms period, and twentieth-century events such as the war with Japan and the Cultural Revolution. Post-Tiananmen Chinese society will also be stressed. Students will explore these themes through Chinese film and literature, and will thus become familiar with major directors, including Zhang Yimou and Jia Zhangke, and writers such as Yu Hua.

LG 290 Sp Top - 1 TO 3 cr
Topics to be determined by student need and interest. Course may be repeated when content varies for a total of 12 hours.

LG 293 Study Abroad 1 TO 6 cr
This course is an introductory language and culture course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

LG 305 Studies in Gender and Writing 3 cr
A varying-content course that provides an in-depth study of gender-related questions in a literary and cross-cultural context. Unless otherwise indicated, all readings and discussions are in English. May be repeated for credit for a total of nine hours when course content varies. Foreign Language majors wishing to have one or several of these courses count toward their major must seek prior approval from their advisor.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).
LG 311 Survey French Lit Culture I 3 cr
The first part of a two-semester course that deals with the major periods of French culture. Readings of representative works from the Middle Ages through the Eighteenth Century. In French.
Pre-requisite: (LG 212 Minimum Grade of C or LG 213 Minimum Grade of C).

LG 312 Survey French Lit Culture II 3 cr
The second part of a two-semester course that deals with the major periods of French culture. Readings of representative works from the Nineteenth and Twentieth Centuries. In French.
Pre-requisite: (LG 212 Minimum Grade of C or LG 213 Minimum Grade of C).

LG 314 Advanced French Conversation 1 cr
Intensive conversation with practice using various levels of the spoken language from slang to formal speech. Emphasis on the sounds and idioms of French. The course meets one hour per week with the instructor and one hour per week for a lab session, often with a native speaker. The content of this course will vary over four consecutive semesters. This course may be repeated for a maximum of four credits.
Pre-requisite: LG 212 Minimum Grade of C or LG 213 Minimum Grade of C.

LG 326 Adv French Grammar-Conversatn 3 cr
Comprehensive review of French grammar coupled with weekly practice in conversation using various levels of the spoken language from slang to formal speech. Emphasis on vocabulary acquisition and mastering the more complex features of French grammar.
Pre-requisite: (LG 212 Minimum Grade of C or LG 213 Minimum Grade of C).

LG 327 Adv French Comp-Conversatn - W 3 cr
Intensive course in writing French coupled with oral presentations and activities designed to enhance the student's command of the language.
Pre-requisite: LG 212 Minimum Grade of C or LG 213 Minimum Grade of C.

LG 333 Spanish Conversatn-Comp 3 cr
Extensive oral and written work through a variety of activities to review and reinforce acquired language skills, emphasizing vocabulary acquisition and fluency in the language.
Pre-requisite: (LG 232 Minimum Grade of C or LG 234 Minimum Grade of C).

LG 334 Adv Spanish Grammar-Comp - W 3 cr
Extensive study of major aspects of Spanish grammar with emphasis on increasing proficiency in the four language skills. Special emphasis is placed on descriptive and narrative writing.
Pre-requisite: LG 232 Minimum Grade of C or LG 234 Minimum Grade of C.

LG 335 Commercial-Technical Spanish 3 cr
Advanced course in written and spoken business and technical Spanish. Emphasis on writing proficiency in various aspects of business, government, technical and general commercial writing. Development of related speaking skills for commerce. Note: This course cannot be counted toward fulfilling degree requirements for B.A. concentration in Spanish.
Pre-requisite: LG 333 Minimum Grade of C or LG 334 Minimum Grade of C.

LG 336 Intro Textual Analys Hisp Lit 3 cr
Introductory course to literary analysis, literary and critical terminology, and genres as they appear in short works from both Spain and Latin America.
Pre-requisite: LG 232 Minimum Grade of D or LG 234 Minimum Grade of D.

LG 337 Spanish for Medical Prof 3 cr
LG 337 is designed for the advanced language student interested in further developing his/her linguistic proficiency in Spanish while acquiring terminology useful to the health care professional. In addition, the course affords the student an opportunity to gain insight into the health care needs of the non-English speaking Hispanic population in the U.S., as well as to begin understanding in general terms its diverse cultural milieu. The course is highly interactive and is conducted in its entirely in the target language. Note: This course cannot be counted toward fulfilling degree requirements for B.A. concentration in Spanish.
Pre-requisite: LG 333 Minimum Grade of B and LG 334 Minimum Grade of B.

LG 338 Spanish for Legal Professions 3 cr
Spanish for Legal Professionals introduces students to legal Spanish language as well as topics about the nature and functioning of law in the Spanish-speaking world and, in this country, the impact of the US legal system on the US-Hispanic population.
Pre-requisite: LG 232 Minimum Grade of B or LG 333 Minimum Grade of C or LG 334 Minimum Grade of C or LG 335 Minimum Grade of C or LG 336 Minimum Grade of C.

LG 348 19th C Cntl Phl-Lit Theory 3 cr
An examination of selected themes and issues in 19th Century Continental Philosophy and Literary Theory. Topics may include Idealism, Romanticism, Existentialism, Marxism, Freudianism. Identical with PHL 348 and EH 348. Credit cannot be received for both LG 348 and either PHL 348 or EH 348. (For LG credit, students will be required to do some coursework in their language of concentration.)

LG 349 20th C Cntl Phl-Lit Theory 3 cr
An examination of selected themes and issues in 20th Century Continental Philosophy and Literary Theory. Topics may include Phenomenology, Existentialism, Hermeneutics, Structuralism, and Post-Structuralism. Identical with PHL 349 and EH 349. Credit cannot be received for both LG 349 and either PHL 349 or EH 349. (For LG credit, students will be required to do some coursework in their language of concentration.)
LG 351 Mythen, Marchen and Musik 3 cr
In this course we will critically examine some of the myths and legends that form the foundation of some of Germanic civilization's most powerful cultural artifacts. By examining artistic interpretations and reinterpretations of these myths, we will come to a deeper understanding of the foundational role they play in German culture. Among the myths, legends and fairy tales we will consider are that of the hero Siegfried, the Faust myth, and the legend of Kaspar Hauser. Further, through a dialectic examination of how these myths are presented in text and music, students in this course will come to a deeper understanding of the importance of music to the totality of German culture. Composers whose work will be considered include Mozart, Beethoven, Mendelssohn and Wagner. This course will be conducted in German. Pre-requisite: LG 252 Minimum Grade of C.

LG 352 Crisis, Change, Transformation 3 cr
This course explores how literature reflects various crises in the German-speaking world-cultural, linguistic, social, and political. Various literary forms, including short stories, novellas, and poems form the Middle Ages through the 21st century, will allow us to explore the source of the crisis as well as the proposed solutions, tracing these themes over the centuries. We will look at these crucial turning points, focusing on some key questions: What defines a crisis? Who (individual, family, group, nation) experiences it? How are these parties impacted? How do cultural or social or political norm shift? What kind of change, adjustment, or transformation is suggested in our text(s)? How does the crisis and/or its resolution later evolve? This course will be conducted in German. Pre-requisite: LG 252.

LG 361 German Lit thru Classicism 3 cr
Origin and development of German Civilization (literature, thought, the arts, and society in a historical context) during the period of unification and industrialization, including Romanticism, Realism, Naturalism, and early Modernism. Extensive reading, class discussion, and oral and written reports in the language are required. Pre-requisite: LG 252 Minimum Grade of C or LG 253 Minimum Grade of C.

LG 362 German Cult-Lit 19th Century 3 cr
Development of German civilization (literature, thought, the arts, and society in a historical context) during the period of unification and industrialization, including Romanticism, Realism, Naturalism, and early Modernism. Extensive readings, class discussions, and oral and written reports in the language are required. Pre-requisite: (LG 252 Minimum Grade of C or LG 253 Minimum Grade of C).

LG 363 Modern-Contemp German Cult-Lit 3 cr
Development of German civilization (literature, thought, the arts, and society in a historical context) from the early twentieth century through the present. Extensive readings, class discussions, and oral and written reports in the language are required. Pre-requisite: (LG 252 Minimum Grade of C or LG 253 Minimum Grade of C).

LG 364 Highlights German Cult-Lit 3 cr
A capstone course highlighting masterpieces of German literature and culture from a particular genre (e.g., the Novelle); a particular period or movement (e.g., Romanticism); an author or group of authors (e.g., Brecht); or a particular thematic focus. Extensive readings, class discussions, and oral and written reports in the language are required. Pre-requisite: LG 361 Minimum Grade of C or LG 362 Minimum Grade of C or LG 363 Minimum Grade of C.

LG 366 Adv German Grammar 3 cr
Designed for the student who wishes to teach or do advanced work. Comprehensive study of formal grammar and structured practice in oral and written expression. Pre-requisite: (LG 252 Minimum Grade of C or LG 253 Minimum Grade of C).

LG 367 Advanced German Conversation 3 cr
Intensive conversation with practice in using various levels of the spoken language from slang to formal speech. Emphasis on the sounds and idioms of German. Students will gain familiarity with German cultural history, as well as contemporary political and popular culture. This course may be repeated for a maximum of six credits. Pre-requisite: (LG 251 Minimum Grade of C or LG 252 Minimum Grade of C). LG 251 and LG 252 can be taken concurrently with this course.

LG 368 Adv German Composition - W 3 cr
Intensive course in writing German. Emphasis is on writing as a process, the communicative purposes of writing, and the development of critical reflection. Analysis of authentic texts and extensive practice in various genres of written German, including description, narrative, report, critical review, and interpretation. Pre-requisite: (LG 252 Minimum Grade of C or LG 253 Minimum Grade of C).

LG 372 Golden Age of Russian Lit - W 3 cr
A survey course designed to familiarize the student with the essential works of 19th century Russian literature. Students read and discuss works by Pushkin, Lermontov, Gogol, Dostoevsky, Turgenev, Tolstoy, and Chekhov. In English, Russian majors are required to read excerpts of works in Russian and to complete a course project in Russian. Pre-requisite: LG 272 Minimum Grade of C.
LG 373  Intensive Third Year Russian  4 cr
A one-semester intensive Third Year course for students who have successfully completed the LG 271 and 272 sequence or LG 273 (Intensive Second Year Russian). This course is usually taught during the spring following LG 273, abroad during the summer or in the Fall following a semester abroad and acts as a bridge course. This course is meant to fill in any gaps in knowledge of Russian grammar before continuing to Advanced Grammar and Composition courses. Special attention is paid to nuances in Russian culture. By permission of instructor.
Pre-requisite: LG 271 Minimum Grade of C and LG 272 Minimum Grade of C or LG 273 Minimum Grade of C.

LG 374  Adv Russian Grammar  3 cr
A course designed to give students active control of the more complex features of Russian grammar. Structured practice in oral and written expression.
Pre-requisite: LG 272 Minimum Grade of C.

LG 375  Adv Russian Conversation  2 cr
Intensive conversation practice in using the various levels of modern spoken Russian. The course meets two hours per week. The content of this course will vary over eight consecutive semesters. This course may be repeated for a maximum of eight credits.
Pre-requisite: LG 272 Minimum Grade of D.

LG 376  Adv Russian Composition - W  3 cr
This course provides extensive practice in writing Russian. Students read, discuss, and write about texts which reflect the controversial and topical issues of the day.
Pre-requisite: LG 272 Minimum Grade of C.

LG 380  Russian Poetry  3 cr
Designed to enhance the student's overall command of spoken Russian through the study of Russia's rich poetic tradition. Russian poems and songs provide the basic materials for this course. Lectures, materials, and discussions in Russian.
Pre-requisite: LG 272 Minimum Grade of C.

LG 381  Russian Prose in Context  3 cr
A course designed to enhance the student's ability to read, translate, and discuss Russian texts. Students read works from both 19th and 20th century fiction, which they analyze both thematically and stylistically. Class work and assignments are geared towards increasing the student's vocabulary and understanding of Russian stylistics. All texts, lectures, and discussions in Russian.
Pre-requisite: LG 272 Minimum Grade of C.

LG 384  Japanese Film  3 cr
This course will introduce students to major themes in recent Japanese history, including samurai culture and other issues pertaining to social class, Westernization, the postwar family, sixties radicalism, and recent popular culture. Students will explore these themes through Japanese film and literature, and will thus become familiar with major directors, including Akira Kurosawa, Yasujiro Ozu and Juzo Itami, and novelists such as Junichiro Tanizaki and Yukio Mishima.

LG 390  Special Topics -  1 TO 6 cr
Topics to be determined by student need and interest. Course may be repeated for a total of 12 hours.
Pre-requisite: (LG 212 Minimum Grade of C or LG 213 Minimum Grade of C) or (LG 232 Minimum Grade of C or LG 234 Minimum Grade of C) or (LG 252 Minimum Grade of C or LG 253 Minimum Grade of C) or LG 272 Minimum Grade of C. LG 212 and LG 213 and LG 232 and LG 234 and LG 252 and LG 253 and LG 272 can be taken concurrently with this course.

LG 393  Study Abroad  1 TO 6 cr
This course is an advanced language and culture course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

LG 394  Dir St PreStudy Abrd -  1 cr
Working under the direction of their faculty advisor, language majors will prepare for their required study abroad experience through an examination of selected country-specific readings as well as cross-cultural orientation materials. Prerequisite: completion of intermediate sequence in student's concentration or equivalent.
Pre-requisite: (LG 212 Minimum Grade of B or LG 213 Minimum Grade of B) or (LG 232 Minimum Grade of B or LG 252 Minimum Grade of B or LG 253 Minimum Grade of B) or (LG 212 Minimum Grade of B or LG 213 Minimum Grade of B) or (LG 232 Minimum Grade of B or LG 234 Minimum Grade of B) or LG 271 Minimum Grade of B.

LG 400  Applied Linguistics  3 cr
LG 400 is one of the required core classes for the Applied Linguistics minor. The course introduces linguistics concepts to the students and gives them the foundation needed for the higher level classes required as part of the minor. Required core course. Pre-requisite: LG/LGS 200-level sequence with a C or better and sophomore standing.
Pre-requisite: LG 200 Minimum Grade of C or LGS 200 Minimum Grade of C. LG 200 and LGS 200 can be taken concurrently with this course.

LG 412  Readings Francophone Lit  3 cr
Study of the literature of the Francophone world, including West and North Africa, the Caribbean, and Quebec, in their cultural and historical context.
Pre-requisite: (LG 311 Minimum Grade of C or LG 323 Minimum Grade of C) or (LG 312 Minimum Grade of C or LG 325 Minimum Grade of C).
LG 415  Readings in the French Novel  3 cr
Study of the development of the novel in French from the romantic period through the contemporary novel.
Pre-requisite: (LG 311 Minimum Grade of C or LG 323 Minimum Grade of C) or (LG 312 Minimum Grade of C or LG 325 Minimum Grade of C).

LG 416  Identites Francaises  3 cr
Study of how different minority groups have been represented and have represented themselves in Nineteenth and Twentieth Century French and Francophone literature, essays, and film.
Pre-requisite: (LG 311 Minimum Grade of C or LG 323 Minimum Grade of C) or (LG 312 Minimum Grade of C or LG 325 Minimum Grade of C).

LG 431  Hispanic Civilizations  3 cr
In-depth study of various aspects of Hispanic civilization and its contribution to world culture; emphasis upon geographical, historical, social, political and artistic forces. Extensive class discussion, oral and written reports in the language are required.
Pre-requisite: LG 333 Minimum Grade of C or LG 334 Minimum Grade of C or LG 336 Minimum Grade of C.

LG 432  Rdgs in Spanish Literature  3 cr
Representative readings reflecting major literary movements and cultural events in Spain. Extensive class discussion, oral and written reports are required.
Pre-requisite: LG 333 Minimum Grade of C or LG 334 Minimum Grade of C or LG 336 Minimum Grade of C.

LG 433  Rdgs in Latin Amer Literature  3 cr
Representative readings reflecting major literary movements and cultural events in Latin America. Extensive class discussions, oral and written reports are required.
Pre-requisite: LG 333 Minimum Grade of C or LG 334 Minimum Grade of C or LG 336 Minimum Grade of C.

LG 451  The Aesthetic Lens  3 cr
In this course we will examine the tectonic shifts in German culture and history from the founding of the Weimar Republic to the present through the lens of lyric poetry and film. For each major period—the Weimar Republic: National Socialism and Second World War; the postwar period; the rise and fall of the Berlin Wall; Reunification—we will study the major poetic voices and two films both on their own aesthetic merits and relative to the historical contexts within which they were produced. We will also analyze the relationship between these works of art and the historical context in which they were produced. This class will be conducted in German.
Pre-requisite: LG 366 Minimum Grade of C and LG 367 Minimum Grade of C and LG 368 Minimum Grade of C.

LG 452  Love, Friendship and Family  3 cr
Representative readings addressing the concepts of love, friendship and family in German literature over a range of historical periods.
Pre-requisite: LG 366 Minimum Grade of C or LG 367 Minimum Grade of C or LG 368 Minimum Grade of C.

LG 480  Senior Seminar - W  3 cr
This course is designed to broaden and enhance the study-abroad experience and to serve as a capstone to the foreign-language major. Building on the study-abroad experience, students will (1) contextualize their experience through readings, (2) continue their experience by maintaining consistent contact with the target culture, and (3) communicate their experience and their enhanced understanding of topics such as culture shock, culture stereotypes, cultural metaphors, and cross cultural comparisons of behavior and mind-set. Classes will consist of lectures, discussions of readings, and a major research paper and public presentation of their research. Capstone Course. Prerequisite: completion of the Study Abroad requirement.
Pre-requisite: EH 102 Minimum Grade of C and IS 391 Minimum Grade of S.

LG 490  Special Topics -  1 TO 6 cr
Topics to be determined by student need and interest. Course may be repeated when content varies. A subtitle identifying the topic will be entered on the student's record.

LG 492  Seminar -  1 TO 3 cr
A course designed for advanced students to pursue a special topic in depth through readings, critical discussions, and delivery of a seminar paper. This course may be repeated for a maximum of 6 credits. Prerequisite: Normally limited to juniors and seniors.

LG 493  Study Abroad  1 TO 6 cr
This course is an advanced language and culture course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

LG 494  Directed Studies-  1 TO 3 cr
Directed study under the supervision of a member of the foreign language faculty. This course may be repeated for a maximum of 6 credits. Requires permission of department chair.

LG 496  Internship - Foreign Languages  1 TO 9 cr
Supervised professional work with mandatory reading list and written report. This course may be repeated for a maximum of nine credits. Prerequisites: Permission of the Department Chair is required.

LG 499  Honors Senior Project - H  3 TO 6 cr
Under the advice and guidance of a faculty mentor Honors Students will identify and carry out a research project, relevant to the field of foreign language study, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor.

LG 511  Intro Span for Health Profes  3 cr
LG 511 trains healthcare professionals to effectively serve Spanish-speaking patients. Learners will acquire a sustained novice mid/novice high level of proficiency in understanding, speaking, reading, and writing Spanish for the medical field.
LG 512  Inter Span for Health Profss  3 cr
LG 512 expands learners' Spanish language skills through a range of assignments related to healthcare and Spanish-speaking populations.
Pre-requisite: LG 511 Minimum Grade of C.

LG 513  Adv Span for Health Profss  3 cr
LG 513 will develop learners' Spanish language skills and cultural competency through readings and discussions on topics related to healthcare delivery for Hispanic populations. Students will also acquire an advanced medical terminology in Spanish.
Pre-requisite: LG 512 Minimum Grade of C.

LG 514  Pract Span for Health Profss  3 cr
This practicum is the capstone for the Certificate in Spanish for Healthcare Professionals. Students will complete 45 hour clinical practicum at a USA-approved healthcare facility within the US or abroad.
Pre-requisite: LG 513 Minimum Grade of C. LG 513 can be taken concurrently with this course.

LG 590  Sp Top -  1 TO 3 cr
Topics to be determined by student need and interest. Content will vary. A subtitle identifying the topic will be entered on the student's record.

LG 592  Seminar -  1 TO 3 cr
A course designed for graduate students to pursue a special topic in-depth with readings, critical discussion and delivery of a seminar paper.

LG 594  Directed Studies-  1 OR 3 cr
Directed study under the supervision of a member of the Foreign Languages and Literatures faculty having Graduate Faculty status. This course may be repeated for a maximum of 15 credits. Prerequisite: Permission of department chair.

GS 492  Gender Studies Seminar -  3 cr
Advanced study of selected topics in Gender Studies. May be repeated for credit when content varies for a total of six hours.

GS 494  Directed Studies  1 TO 3 cr
Directed research under the guidance of a Gender Studies faculty member. Requires permission of instructor. Student is restricted to taking a maximum of six hours of Directed Studies.
Pre-requisite: GS 101 Minimum Grade of D.

GS 496  Internship -  3 TO 6 cr
Practical learning through occupational or community work with an approved agency dealing with gender-related issues. Readings and final report supervised by gender studies faculty. Special Permission required.
Pre-requisite: GS 101 Minimum Grade of D.

Geographic Info Techn (GIT) (GIT)

GIT 420  Computer Apps in Earth Science  4 cr
An introduction to basic Python programming, with examples and exercises pertinent to Earth Science and GIS applications.
Pre-requisite: MA 112 Minimum Grade of D or MA 110 Minimum Grade of C.

GIT 442  Remote Sensing II  4 cr
Analysis of remotely sensed digital data for detection and mapping of Earth resources. Minimum grade of "B" needed in course prerequisite. Fee.
Pre-requisite: (GEO 332 Minimum Grade of B or GY 332 Minimum Grade of B).

GIT 460  Intro to GIT  4 cr
Fundamentals of Geographic Information Systems technology, including software functionality (ArcGIS), data processing, cartography and spatial analysis. Fee.
Pre-requisite: CIS Proficiency Exam P

GIT 461  GIT Applications I-Environment  4 cr
Application of Geographic Information Systems to the studies of the natural environment. Fee.
Pre-requisite: (GIT 460 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C).

GIT 462  GIT Apps II-Business/Soc Sci  4 cr
Application of Geographic Information Systems to Business and the Social Sciences. Prerequisite: GIS 460, with a grade of "C" or better, or permission of instructor. Fee.
Pre-requisite: (GIT 460 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C).
GIT 490  Special Topics  2 TO 4 cr  
Geographic Information Technology topics not covered in current GIT courses. May be repeated when content varies for a maximum of 8 credit hours.  
Pre-requisite: GIT 460 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C.

GIT 494  Directed Studies  2 TO 4 cr  
Geographic Information Technology topics not covered in current GIT courses. May be repeated when content varies for a maximum of 8 credit hours.  
Pre-requisite: GIT 460 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C.

GIT 496  Internship in GIT  1 TO 4 cr  
On-the-job learning through occupational or professional work with an approved firm or agency. Open to geography majors only. No more than 4 hours of internship credit is allowed.  
Pre-requisite: GIT 460 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C.

GIT 520  Computer Apps in Earth Science  4 cr  
An introduction to basic Python programming, with examples and exercises pertinent to Earth Sciences and GIS applications.  
Pre-requisite: MA 112 Minimum Grade of D or MA 110 Minimum Grade of D.

GIT 542  Remote Sensing II  4 cr  
Analysis of remotely sensed digital data for detection and mapping of Earth resources. Minimum grade of "B" needed in course prerequisite. Special project required. Fee.  
Pre-requisite: (GEO 332 Minimum Grade of B or GY 332 Minimum Grade of B).

GIT 560  Intro to GIT  4 cr  
Fundamentals of Geographic Information Systems technology, including software functionality (ArcGIS), data processing, cartography and spatial analysis. Credit for GIT 460 and GIT 560 not allowed. Special project required. Fee.  
Pre-requisite: CIS 150 Minimum Grade of B or CIS Proficiency Exam P.

GIT 561  GIT Apps I-Environment - C  4 cr  
Application of Geographic Information Systems to the studies of the natural environment. Credit for GIT 461 and GIT 561 not allowed. Special project required. Fee.  
Pre-requisite: (GIT 460 Minimum Grade of C or GIT 560 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C or GEO 560 Minimum Grade of C).

GIT 562  GIT Apps II-Business/Soc Sci  4 cr  
Application of Geographic Information Systems to business and the social science. Credit for GIT 462 and GIT 562 not allowed. Special project required. Fee.  
Pre-requisite: (GIT 460 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C or GIT 560 Minimum Grade of C or GEO 560 Minimum Grade of C).

GIT 590  Special Topics -  2 TO 4 cr  
Geographic Information Technology topics not covered in current GIT courses. May be repeated when content varies for a maximum of 8 credit hours.  
Pre-requisite: GIT 460 Minimum Grade of C or GIT 560 Minimum Grade of C or GEO 460 Minimum Grade of C or GY 460 Minimum Grade of C or GEO 560 Minimum Grade of C.

GIT 594  Directed Studies  1 TO 4 cr  
Graduate level independent study under the direction of a member of the graduate faculty. May be used to learn new techniques or to explore research questions of special interests.

Geography (GEO) (GEO)

GEO 101L  Environmental Geography Lab  1 cr  
Laboratory exercises associated with GEO 101. GEO 101 must be taken concurrently. Together, GEO 101 and GEO 101L count as one laboratory science course, partially fulfilling general education requirements. Fee.  
Co-requisite: GEO 101

GEO 102L  Changing Earth Lab  1 cr  
Laboratory exercises associated with GEO 102. GEO 102 must be taken concurrently. Together, GEO 102 and GEO 102L count as one laboratory science course, partially fulfilling general education requirements. Fee.  
Co-requisite: GEO 102

GEO 101  Environmental Geography  3 cr  
Introduces students to the natural science branch of geography. Emphasizes Earth-Sun relationships, weather and climate. Core Course.  
Co-requisite: GEO 101L

GEO 102  Changing Earth  3 cr  
Introduces students to the natural science branch of geography. Emphasizes spatial patterns and processes related to natural landscape regions and landforms. Core Course.  
Co-requisite: GEO 102L

GEO 114  Intro to Human Geography  3 cr  
This course introduces students to the social sciences branch of geography. Emphasis is placed on the location, spatial arrangement, and spatial interaction of the human environment which includes: population, culture, geopolitics, economic activity, and settlements. Core Course.

GEO 115  World Regional Geography  3 cr  
A survey of the major regions of the world, excluding North America, and the interrelationship of environmental, cultural, economic, and political factors that characterize each. Core Course.
GEO 201 Geography Orientation 1 cr
This 1-credit hour course will cover topics that are important to geography students, such as: which geography courses to choose, the major sub-disciplines of geography, and career choices available for geography majors. You will meet the Geography faculty as they give brief overviews of the courses they teach and their research interests. Field trips, which will generally take place during the class time, are included in the course and will showcase examples of the research interests of faculty members. Core Course.

GEO 310 Environmental Earth Science 3 cr
A spatial perspective on major global environmental problems. Topics include population pressure; loss of biodiversity; ozone depletion; global warming; water, energy, and mineral resources, food supplies, waste disposal, geologic hazards, and political/economic forces (identical to GEO 310).
Pre-requisite: (GEO 101 Minimum Grade of D or GEO 102 Minimum Grade of D) or GEO 114 Minimum Grade of D or GEO 102 Minimum Grade of D.

GEO 312 World Economic Geog 3 cr
Emphasis is placed on the location, spatial distribution, and spatial interaction of economic activities within a global context. Topics covered include population, natural resources, primary, secondary and tertiary activities, development and international trade and aid. Students will write technical reports using word processing and spreadsheet software.
Pre-requisite: GEO 114 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of D).

GEO 313 Geography of U.S. and Canada 3 cr
An analysis of the environmental, historical, cultural, and economic factors that create the spatial patterns, development processes and distinctiveness of Canada and the United States.

GEO 314 Geography of Europe 3 cr
An analysis of the environmental, historical, social and economic factors that create the diversity of countries and their unique spatial characteristics on the subcontinent of Europe.

GEO 315 Geography of Latin America 3 cr
A systematic survey of Latin America landscapes. Attention is directed to natural resources, human activities and regional differentiation.
Pre-requisite: GEO 101 Minimum Grade of D or GEO 102 Minimum Grade of D or GEO 114 Minimum Grade of D or GEO 115 Minimum Grade of D.

GEO 317 Mountain Geography 3 cr
This course studies the mountainous regions of the world from a regional geography perspective. Course topics will include both physical and cultural aspects: their origins, historic attitudes towards mountains, the sacred mountains, their physical features, population and human occupation, climates, biota, and current threats to mountain environments. We will study the role of human activity in affecting mountain environments as well as the effect of mountains on people.
Pre-requisite: EH 102 Minimum Grade of C.

GEO 320 Alabama Geography 3 cr
Spatial study of physical and human features in Alabama. Includes geomorphology, climate, vegetation, agriculture, development, population, and environmental issues within the state.
Pre-requisite: (GEO 101 Minimum Grade of D or GEO 102 Minimum Grade of D or GEO 114 Minimum Grade of D or GEO 115 Minimum Grade of D) and (EH 102 Minimum Grade of D or EH 105 Minimum Grade of D).

GEO 321 Nat’l Parks Conservation 3 cr
An analysis of the motives and processes for establishing national parks and nature reserves, the primary conservation and preservation issues they have and the influences of ecology, politics, and culture on their planning and management. U.S. national parks are emphasized.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (GEO 101 Minimum Grade of D or GEO 102 Minimum Grade of D or GEO 114 Minimum Grade of D or GEO 115 Minimum Grade of D).

GEO 331 Computer Graphs and Maps 4 cr
Introductory review of the application of computers to the production of graphs and thematic maps for geographical analysis. Core course. Meets computer proficiency requirement for Geography majors. Fee.

GEO 332 Remote Sensing I 4 cr
Interpretation of maps, air photos and satellite images (identical to GE 332). Fee. Core course.

GEO 365 Urban Geography and Planning 3 cr
Concentrates upon the evolution and function of the urban spatial system, and upon the internal spatial structure of an urban area’s residential, commercial, and industrial land use. This course also introduces basic concepts and strategies of urban and regional planning with a focus on the domestic realm.
Pre-requisite: GEO 114 Minimum Grade of D or GEO 115 Minimum Grade of D.

GEO 370 International Tourism 3 cr
The study of the components of the Tourism industry, their spatial distribution, the environmental and cultural effects of Tourism, and the requisites and techniques for planning tourism development.
Pre-requisite: (GEO 101 Minimum Grade of D or GEO 102 Minimum Grade of D or GEO 114 Minimum Grade of D or GEO 115 Minimum Grade of D).
GEO 405  Natural Hazards and Disasters  3 cr
An overview of natural hazards and disasters from a scientific perspective that focuses on the occurrence and impact of environmental hazards, such as volcanoes, earthquakes, tsunamis, floods, mass movements, and coastal hazards. Mitigation techniques used to make the human environment more resilient against natural hazards are also covered. In addition, the viewpoint of hazard and emergency managers toward natural disasters will be studied.
Pre-requisite: GEO 102 Minimum Grade of C or (GY 101 Minimum Grade of C or GY 111 Minimum Grade of C).

GEO 410  Biogeography  3 cr
Analysis of spatial patterns of life on earth. Biogeography emphasizes the influence of the physical environment, paleogeography, and past and possible future climate change on the biomes and biogeographic realms.
Pre-requisite: GEO 101 Minimum Grade of D.

GEO 411  Soils  3 cr
A review of soil formation, processes and properties (identical to GY 411).
Pre-requisite: GEO 102 Minimum Grade of D.

GEO 412  Physiograph Regions N Amer-W  3 cr
The study of the major and minor natural regions of the North American continent, from Alaska to the Mexican border, including the Caribbean area. The course will focus on the different physically defined regions of North America, studying the homogenous variables that make each region distinct, including the topography, vegetation, soils, surface features, and past climates.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and ((GEO 102 Minimum Grade of C and GEO 102L Minimum Grade of C) or (GY 101 Minimum Grade of C or (GY 111 Minimum Grade of C and GY 111L Minimum Grade of C))).

GEO 417  Health and Place  3 cr
This course illustrates how geographic concepts help us better understand health and well-being, through the exploration of theories, methodologies, and contributions of medical geography to the social and health sciences. Using spatial tools, such as mapping and Geographic Information Systems, this course will examine the geographical patterns of health and disease. This course encourages students to examine the theoretical and technological tools geography brings to topics related to health and provides them with a foundation for studying geographic differences in health and health services.
Pre-requisite: EH 102 Minimum Grade of C.

GEO 435  Research Methods Geography  3 cr
This course serves as an introduction to geography as a research discipline. Emphasis is placed on geographic problem solving, data collection, data analysis, and reporting. Micro computer oriented statistical and mapping packages will be used to analyze geographic data.
Prerequisites: Junior standing. Core course. Fee.
Pre-requisite: ST 210 Minimum Grade of D. ST 210 can be taken concurrently with this course.

GEO 440  Coastal Zone Management  2 cr
A review of ecological features and of management policies for coastal communities with a description of relevant federal and state programs. Taught only at Dauphin Island Sea Lab.

GEO 441  Coastal Climatology  2 cr
Study of the controlling factors and features of the world's climates, with particular attention to coastal areas, and application and interpretation of climate data. Taught only at Dauphin Island Sea Lab.

GEO 443  Climatology-W  3 cr
Analysis of global climate as aggregate weather. Component elements, factors controlling distribution, resulting area patterns, and climatic classification are studied (identical to MET 443). Fee
Pre-requisite: MET 140 Minimum Grade of C or GEO 101 Minimum Grade of C.

GEO 475  Field Work in Geography  1 TO 6 cr
Students will travel to pre-determined location to perform field work for a project that was pre-determined by the professor and student. Once in the field, students will gather data and learn about the landscape(s).
Pre-requisite: EH 102 Minimum Grade of D.

GEO 485  Seminar in Geographic Thought  3 cr
This course serves as the capstone course for geography majors in which students integrate their knowledge of human and physical geography, as well as the geographic techniques, to investigate real-world problems with a spatial component. Students gain experience in working in small groups and in written and oral presentation of project results. Students will also lead discussions on key or pertinent research articles in geography. Taught Spring only.
Pre-requisite: GEO 435 and GEO 331 and GEO 332.

GEO 490  Special Topics  2 TO 4 cr
Geographic topics not covered in current geography courses. May be repeated when content varies for a maximum of 8 credit hours.

GEO 492  Seminar -  1 TO 3 cr
Departmental seminar investigating a selected field of geography. May be repeated when content varies for a maximum of 3 credit hours.

GEO 494  Directed Studies  1 TO 4 cr
Independent research under the direction of a member of the geography faculty. No more than 8 hours of Directed Studies is allowed.
GEO 496  Internship in Geography  1 TO 4 cr
On-the-job learning through occupational or professional work with an approved firm or agency. Open to geography majors only. No more than 4 hours of Internship credit is allowed.

GEO 590  Sp Top -  1 TO 6 cr
An in-depth course for advanced students in geography. Topics and titles will be selected to examine the subject matter in an area of current interest to students and in an area of particular faculty expertise. Includes specialized topics not currently listed in the Bulletin course offerings.

GEO 594  Grad Dir Study in Geography-  1 TO 4 cr
Independent research in Geography at the graduate level. May be used to learn new techniques or explore research questions of special interest under the direction of a member of the Geography graduate faculty.

Geology (GY) (GY)

GY 111L  Physical Geology Lab  1 cr
Laboratory course for Physical Geology. Fee.
Co-requisite: GY 111

GY 112L  Earth History Lab  1 cr
Laboratory course for Earth History.
Co-requisite: GY 112
Pre-requisite: GY 111 Minimum Grade of D and GY 111L Minimum Grade of D.

GY 111  Physical Geology  3 cr
Materials that make up the Earth as well as the properties and geological processes that operate in the Earth. Special topics include plate tectonics, mineral chemistry, the rock cycle, sedimentary processes, metamorphism and geological map reading. Core course.
Co-requisite: GY 111L

GY 112  Earth History  3 cr
The origin and history of the earth as seen in the rocks and their contained life record. Core Course.
Co-requisite: GY 112L

GY 113  Honors Geoscience Field - H  3 cr
A two-week field course emphasizing the recognition and understanding of geologic processes in the field environment. The course is based in the Taos Ski Valley, New Mexico, with field trips ranging across northern New Mexico and southern Colorado during the interim session.
Pre-requisite: ( (GY 101 Minimum Grade of D or (GY 111 Minimum Grade of D and GY 111L Minimum Grade of S) ) and ( (GY 103 Minimum Grade of D or (GY 112 Minimum Grade of D and GY 112L Minimum Grade of S) )

GY 301  Geomorphology  3 cr
Principles of landform development as it relates to specific processes (fluvial erosion, glacial erosion, etc.), construction of topographic base maps with Alidade/Total Station, GPS navigation and surveying, and rock/mineral resource evaluation. Fee.
Pre-requisite: (GY 101 Minimum Grade of D or GY 111 Minimum Grade of D).

GY 302  Crystallography and Mineralogy  4 cr
Introduction to elementary crystallography, crystal chemistry, and atomic structure of minerals, as well as the identification, characterization and use of common rock-forming minerals and important ore minerals. Fee.
Pre-requisite: (GY 101 Minimum Grade of D or (GY 111 Minimum Grade of D and GY 111L Minimum Grade of D) ) and (GY 103 Minimum Grade of D or (GY 112 Minimum Grade of D and GY 112L Minimum Grade of D) ) and (CH 131 Minimum Grade of D or CH 115 Minimum Grade of D). CH 131 can be taken concurrently with this course.

GY 303  Igneous & Meta Petrology  4 cr
The study of the formation and classification of igneous and metamorphic rocks. Fee.
Pre-requisite: (GY 101 Minimum Grade of D or GY 111 Minimum Grade of D) and (GY 232 Minimum Grade of D or GY 302 Minimum Grade of D or GY 342 Minimum Grade of D).

GY 304  Stratigraphy - W  3 cr
The development of the stratigraphic column; correlation and field procedures. Fee.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (GY 103 Minimum Grade of D or GY 112 Minimum Grade of D). EH 102 can be taken concurrently with this course.

GY 305  Geophysics  4 cr
Application of classical physics to the study of the Earth and the solution of problems in Earth sciences, including analysis of seismic refraction and reflection surveys, earthquakes, gravity and magnetic fields, and electrical geophysical surveys. Fee.
Pre-requisite: GY 111 Minimum Grade of D and GY 301 Minimum Grade of D.

GY 306  Sedimentology-W  3 cr
Study the principles pertaining to the description and classification of sedimentary rocks, with emphasis on sedimentary processes and depositional environments.
Pre-requisite: GY 111 Minimum Grade of D and GY 111L Minimum Grade of D and GY 112 Minimum Grade of D and EH 102 Minimum Grade of D or EH 105 Minimum Grade of D.

<tbody>
<tr>
<td>GY 310</td>
<td>Environmental Earth Science</td>
<td>3 cr</td>
<td>A spatial perspective on major global environmental problems. Topics include population pressure, loss of biodiversity, ozone depletion, global warming, water, energy and mineral resources, food supplies, waste disposal, geological hazards and political/economic forces (identical to GEO 310). Pre-requisite: GY 111 Minimum Grade of D or GEO 101 Minimum Grade of D or GEO 102 Minimum Grade of D.</td>
</tr>
<tr>
<td>GY 332</td>
<td>Remote Sensing I</td>
<td>4 cr</td>
<td>Interpretation of maps, air photos and satellite images (identical to GEO 332). Fee. Pre-requisite: GEO 102 Minimum Grade of C and GEO 102L Minimum Grade of C and GY 301 Minimum Grade of C. GEO 102 and GEO 102L can be taken concurrently with this course.</td>
</tr>
<tr>
<td>GY 401</td>
<td>Paleontology</td>
<td>3 cr</td>
<td>Major invertebrate fossil groups, their identification, and their geologic distribution. Fee. Pre-requisite: (GY 103 Minimum Grade of D or (GY 112 Minimum Grade of D and GY 112L Minimum Grade of D)).</td>
</tr>
<tr>
<td>GY 403</td>
<td>Structural Geology</td>
<td>4 cr</td>
<td>Study of the deformation of the internal Earth and the structures that result. Fee. Pre-requisite: (GY 101 Minimum Grade of D or GY 111 Minimum Grade of D and GY 301 Minimum Grade of D or GY 325 Minimum Grade of D) and (PH 112 Minimum Grade of D or PH 114 Minimum Grade of D or PH 201 Minimum Grade of D or PH 216 Minimum Grade of D).</td>
</tr>
<tr>
<td>GY 411</td>
<td>Soils</td>
<td>3 cr</td>
<td>A review of soil formation, processes and properties (identical to GEO 411). Pre-requisite: (GEO 102 Minimum Grade of D and GEO 102L Minimum Grade of D and GEO 301 Minimum Grade of D).</td>
</tr>
<tr>
<td>GY 413</td>
<td>Coastal Geomorphology</td>
<td>2 cr</td>
<td>An introduction to coastal sediment processes and their applied coastal geomorphology with emphasis on waves, tides, sediments, and their interactions including the impacts of anthropogenic influences. Taught only at Dauphin Island Sea Lab.</td>
</tr>
<tr>
<td>GY 420</td>
<td>Geostatistics</td>
<td>3 cr</td>
<td>Applied bivariate and multivariate statistics to problems in Geography, Geology, and Meteorology; parametric and non-parametric procedures in correlation, regression, analysis of variance, etc. Time series analysis, trend surface analysis, kriging and analysis of spatial (map) data. Identical to GEO 420. Fee. Pre-requisite: (GY 111 Minimum Grade of C and GY 112 Minimum Grade of C and MA 112 Minimum Grade of C or ST 210 Minimum Grade of C).</td>
</tr>
<tr>
<td>GY 421</td>
<td>Applied Environ Geology - W</td>
<td>3 cr</td>
<td>A geological applications course designed to familiarize students with techniques used by environmental and engineering geologists in their studies of land use, land development and assessment of geological hazards. Material is illustrated with case studies from the Mobile area. Fee. Pre-requisite: (GY 101 Minimum Grade of D or GY 111 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C)).</td>
</tr>
<tr>
<td>GY 422</td>
<td>Sedimentary Geology</td>
<td>3 cr</td>
<td>A course examining sedimentation with emphasis on environments of deposition, sea-level and other controls on sedimentation in the rock record, and petroleum exploration. Credit for both GY 422 and GY 522 will not be allowed. Fee. Pre-requisite: (GY 101 Minimum Grade of D or GY 111 Minimum Grade of D and (GY 103 Minimum Grade of D or GY 112 Minimum Grade of D)).</td>
</tr>
<tr>
<td>GY 425</td>
<td>Hydrology</td>
<td>4 cr</td>
<td>Principles of sources, occurrences, and movement of groundwater. Surface and subsurface investigations of groundwater and elementary groundwater hydrology and chemistry. Credit for both GY 425 and GY 525 will not be allowed. Fee.</td>
</tr>
<tr>
<td>GY 426</td>
<td>Contaminant Hydrogeology</td>
<td>3 cr</td>
<td>Flow systems, mass transport in the vadose and saturated zones; advection and dispersion; transformation, retardation and attenuation of solutes; low temperature geochemical processes and kinetics of chemical reactions; contaminant modeling using finite difference-finite element methods. Credit for both GY 426 and GY 526 will not be allowed. Fee. Pre-requisite: (GY 425 Minimum Grade of D or GY 475 Minimum Grade of D).</td>
</tr>
<tr>
<td>GY 433</td>
<td>X-Ray Analytical Methods</td>
<td>4 cr</td>
<td>Theory and use of x-ray diffraction systems as applied to crystallography, mineralogy, chemistry, and metallurgy. Fee. Pre-requisite: GY 302 Minimum Grade of D.</td>
</tr>
<tr>
<td>GY 446</td>
<td>Marine Geology</td>
<td>4 cr</td>
<td>A study of the geology of the ocean basins, with special emphasis on the continental shelves, their sediments, and sedimentary processes at work there. Pre-requisite: (GY 101 Minimum Grade of D or GY 111 Minimum Grade of D and (GY 103 Minimum Grade of D or GY 112 Minimum Grade of D)).</td>
</tr>
</tbody>
</table>
GY 450 Thin-Section Techniques 1 cr
A laboratory based course illustrating techniques employed by geologists to prepare thin-sections from geological materials. Students will produce thin-sections and write up reports detailing the petrography of the samples examined. Fee.
Pre-requisite: (GY 232 Minimum Grade of D or GY 302 Minimum Grade of D or GY 342 Minimum Grade of D) and (GY 233 Minimum Grade of D or GY 303 Minimum Grade of D or GY 343 Minimum Grade of D) and (GY 344 Minimum Grade of D or GY 402 Minimum Grade of D). GY 402 can be taken concurrently with this course.

GY 480 Field Geology 6 cr
A six-week, summer field course on the methods of geologic surveying, the nature and construction of geologic maps and cross-sections, measurements of stratigraphic sections and preparation of geologic reports. This course serves as a capstone class for geology majors.
Pre-requisite: (GY 303 Minimum Grade of D and GY 403 Minimum Grade of D and GY 402 Minimum Grade of D and HS 170 Minimum Grade of P).

GY 490 Special Topics 1 TO 4 cr
Geological topics not covered in current geology courses. Prerequisite: Junior or Senior standing.

GY 492 Seminar - 1 TO 3 cr
Departmental seminar investigating a selected field of geology (topic announced prior to registration). May be repeated when content varies for a maximum of 3 credits.

GY 494 Directed Studies 1 TO 4 cr
Independent research in the field or laboratory under the direction of a member of the Geology faculty. Students must have an acceptable project approved before registering for this course. Prerequisite: Permission of the Chair, Junior or Senior standing. No more than 8 hours of directed study is allowed.

GY 496 Internship in Geology 1 TO 3 cr
On-the-job training through occupational or professional work through an approved geological organization. Only open to geology majors. Prerequisite: Permission of chair; Junior or Senior standing. No more than 3 hours of internship is allowed.

GY 520 Geostatistics 4 cr
Applied bivariate and multivariate statistics to problems in Geography, Geology, and Meteorology; parametric and non-parametric procedures in correlation, regression, analysis of variance, etc. Time series analysis, trend surface analysis, kriging and analysis of spatial (map) data. Identical to GEO/GY 420. Credit for both GY 420 and GY 520 will not be allowed.
Pre-requisite: (ST 175 Minimum Grade of B or ST 210 Minimum Grade of B) or (MA 125 Minimum Grade of C or MA 132 Minimum Grade of C).

GY 531 Optical Mineralogy-Crystallogr 4 cr
Theory and use of the petrographic microscope in the recognition and identification of crystallographic and optical properties in non-opaque minerals. Graduate credit will require an additional project specified by the instructor. Fee.
Pre-requisite: (GY 232 Minimum Grade of D or GY 302 Minimum Grade of D or GY 342 Minimum Grade of D). GY 425 Minimum Grade of C).

GY 533 X-Ray Analytical Methods 4 cr
Theory and use of x-ray diffraction systems as applied to crystallography, mineralogy, chemistry, and metallurgy. Pre-requisite: (GY 231 Minimum Grade of D or GY 314 Minimum Grade of D).

GY 544 Sedimentary Geology 3 cr
A study examining sedimentation with emphasis on environments of deposition, sea-level and other controls on sedimentation in the rock record, and petroleum exploration. Credit for both GY 444 and GY 544 will not be allowed.
Pre-requisite: (GY 232 Minimum Grade of D or GY 342 Minimum Grade of D).

GY 557 Hydrology 4 cr
Principles of sources, occurrences, and movement of ground water. Surface and sub-surface investigations of ground water and elementary ground water hydrology and chemistry.
Pre-requisite: (GY 232 Minimum Grade of D or GY 342 Minimum Grade of D).

GY 558 Contaminant Hydrogeology 4 cr
Flow systems, mass transport in the vadose and saturated zones; advection and dispersion; transformation, retardation and attenuation of solutes; low temperature geochemical processes and kinetics of chemical reactions; contaminant modeling using finite difference-finite element methods.
Credit for both GY 426 and GY 576 will not be allowed.
Pre-requisite: GY 425 Minimum Grade of D or GY 475 Minimum Grade of D or GY 475 Minimum Grade of D or GY 575 Minimum Grade of D.

GY 590 Sp Top - 1 TO 6 cr
An in-depth course for advanced students in geology. Topics and titles will be selected to examine the subject matter in an area of current interest to students and in an area of particular faculty expertise. To include specializing topics not currently listed in Bulletin course offerings.

GY 592 Seminar - 1 TO 6 cr
Students and faculty meet weekly in an interactive discussion of current literature in geological sciences. The focus will be on 'state of the art' theories and methodologies as they occur in the primary literature. Student presentation is required to receive credit.

GY 594 Directed Research 1 TO 6 cr
Independent research under the direction of a member of the graduate faculty. May be used to learn new techniques or to explore research questions of special interest. A maximum of 6 hours may be earned for this course.
Gerontology (GRN) (GRN)

GRN 272 Gender and Aging 3 cr
This course examines the dynamics of gender and aging within society from an interdisciplinary perspective. Students will be introduced to controversies in gender over the life course. These include, but are not limited to, definitions and cultural boundaries, gender in childhood, gender and relationships, gender in education and the workplace, gender and sexuality, as well as gender in late life.

GRN 290 Special Topics - 3 cr
This designation is used for interdisciplinary courses on aging on a variety of subjects. This course does not replace any course in a single discipline. May be repeated as long as the topic changes, to maximum of six semester hours.

GRN 435 Health Disparities Life Span 3 cr
This course examines differences in health status across the life span. The course will focus heavily on racial/ethnic and socioeconomic disparities in health applying a social determinants' of health framework. Issues that will be considered include how income, education, neighborhood conditions, access to health care, and other community factors shape opportunities to be healthy. The course is cross-listed as SY 435 and GRN 435 and has been approved as an elective for the Undergraduate Certificate in Gerontology and the interdisciplinary minor in Gerontology. Pre-requisite: SY 109 Minimum Grade of D.

GRN 490 Special Topics 3 cr
This course is designated for upper division students and graduate students, particularly those pursuing studies for the Certificate of Gerontology. The course content focuses on interdisciplinary treatments on various topics on aging. This course does not replace any course in a single discipline. (Examples of special topics: Trends and Issues in Gerontology; Leadership and Advocacy in Gerontology; Housing and Lifestyle Changes over the Life Course). May be repeated as long as the topic changes, to maximum of six semester hours. Pre-requisite: SY 372 Minimum Grade of D.

GRN 494 Directed Studies 1 TO 3 cr
Under the guidance of a faculty member, the student will pursue directed research on readings of an approved topic in Gerontology. May be repeated as long as the topic changes, to a maximum of six semester hours. Requires permission of Director of Gerontology. Pre-requisite: SY 372 Minimum Grade of D.

GRN 496 Internship - Gerontology 3 OR 6 cr
This course is to provide a practicum experience in gerontology in a setting selected by the student and approved by the Program Director. The course emphasis is on the experiential learning process and outcomes. The undergraduate student will apply theoretical concepts in specific areas of interest related to aging and intergenerational relations. Interns will meet as a group three times during the semester for orientation, professional development, and evaluation activities. The 3-hour internship requires 100 contact hours; the 6-hour internship requires 200 hours. Permission of Director of Gerontology is required. Fee. Pre-requisite: SY 372 Minimum Grade of C.

GRN 535 Health Disparities Life Span 3 cr
The main purpose of this seminar is to provide students with an understanding of how social factors contribute to racial/ethnic, socioeconomic and gender disparities in health and health care. We will examine how dyadic relationships such as interpersonal forms of discrimination, marriage, and social ties may contribute to health disparities. We will also examine the ways in which neighborhood and community context, as well as inequalities in socioeconomic status materially shape health and access to health care services. The course is cross-listed as GRN 435/535 and SY 435/535 and has been approved as an elective for the Undergraduate/Graduate Certificate in Gerontology and the interdisciplinary minor in Gerontology.

GRN 594 Dir St in Gerontology - 1 TO 3 cr
Under the guidance of a faculty member, the student will pursue directed research or readings of an approved topic in Gerontology. May be repeated as long as the topic changes, to maximum of six credit hours. Requires permission of the Director of Gerontology.

GRN 596 Internship - Gerontology 3 OR 6 cr
This course is to provide a practicum experience in gerontology in a setting selected by the student and approved by the Program Director. The course emphasis is on the experiential learning process and outcomes. The graduate student will apply theoretical concepts to leadership roles, conducting research and influencing social and health care policies related to aging and intergenerational relationships. Interns will meet as a group three times during the semester for orientation, professional development, and evaluation activities. The 3-hour internship requires 100 contact hours; the 6-hour internship requires 200 hours. Permission of Director of Gerontology is required. Fee. Pre-requisite: SY 523 Minimum Grade of B.
GRN 597  GRN Teaching Apprenticeship 1 TO 3 cr
Directed Studies/Apprenticeship that focuses on teaching Gerontology. The student will work directly with a member of the Gerontology graduate faculty to learn pedagogy, innovation in teaching, and course content that will equip the student for future teaching assignments. Many PhD programs offer both Teaching Assistantships and Research Assistantships. Gerontology students need to show evidence that they have had some teaching-related experience to compete strongly for the TA position. This course is also appropriate for students who anticipate careers in teaching within the field of Gerontology (aging or intergenerational studies). Arrangements must be made prior to registration. Permission of the Program Director is required.
Pre-requisite: SY 372 Minimum Grade of C.

Grad Interdiscipl Studies
(GIS) (GIS)

GIS 501  Responsible Conduct of Research  1 cr
This course is designed to expose future professionals to a variety of topics concerning Responsible Conduct in Research including issues concerning Research Integrity as well as standards and policies affecting research and life in Academia. The weekly sessions include lectures, open discussions, and analyses of case studies.

GIS 502  Technology Commercialization 0 TO 3 cr
This course will teach the National Science Foundation I-Corps curriculum of Lean Launch and Business Model canvas. It delivers best practices for innovative, team-based entrepreneurship in a semester-long format that provides real-world, hands-on learning experiences in how to successfully transfer knowledge into products and processes that benefit society. Significant time will be devoted outside the classroom to testing hypotheses on each part of the team’s business hypothesis and potential customers and partners. Typically, graduates of this curriculum increase their chance of winning a grant from 17% to 60%, a greater than three-fold increase in the odds of success.

GIS 799  Dissertation 1 TO 3 cr
An investigation of an original problem related to Chemical and Biomolecular Engineering conducted under the guidance of the student’s Ph.D. research advisor. Requires approval of the student’s research advisor.

HI 300  Health Info Clinical Environment 3 cr
This course provides an overview of concepts, terms, organization, and processes associated with patient care and clinical environments as they pertain to health informatics. The entire process of how a person accesses, moves within, and exits the system both as in inpatient and outpatient to obtain care. Students will observe and report on a variety of clinical settings and healthcare specializations throughout the semester. This course is designed for students with no prior clinical experience.

HI 410  Health Informatics 3 cr
This course provides an overview of the concepts, terms, tools, and architectures associated with health informatics as applied to healthcare delivery. Topics include: electronic record systems, computerized physician order entry, health system standards, terminologies, workflow modeling, security and privacy of clinical data, clinical reporting, and the impact of information technology use on the quality and efficiency of health care delivery and outcomes.

HI 450  Health Data Secur/Compliance 3 cr
This course involves a thorough examination of the security and privacy requirements of the Health Insurance Portability and Accountability Act (HIPAA) and the implementation of these requirements in the clinical environment. Students will learn how to address security issues from system development all the way through post-implementation, how to evaluate systems for vulnerabilities, and how to identify protected health information and covered entities.
Pre-requisite: ISC 300 Minimum Grade of C or HI 300 Minimum Grade of C and (ISC 410 Minimum Grade of C or HI 410 Minimum Grade of C).

HI 455  Hlth Data Mgt & Decision Supp 3 cr
This course focuses on the design and management of electronic medical record systems and clinical decision support systems. Course content related to electronic medical record systems includes architectural components, technical design issues, and management; and, content related to clinical decision support systems includes decision support roles, extracting useful information from data, and legal and regulatory restrictions. Laboratory assignments will provide students with opportunities to interact with these systems. Prerequisites: HI 300 or ISC 300 and HI 410 or ISC 410.
Pre-requisite: ISC 300 Minimum Grade of C or HI 300 Minimum Grade of C and ISC 410 Minimum Grade of C or HI 410 Minimum Grade of C.

Health Informatics (HI) (HI)
HSC 343B  Clinical Pharmacology  3 cr
The purpose of the course is to provide students with the opportunity to acquire information related to clinical application of drug therapy and concepts relating to the mechanisms of drug actions, interactions and adverse reactions, including the immunologic-idsosyncratic-allergic responses. Emphasis is placed on current evidence related to pharmacokinetics, dosage, methods of administration, and adverse effects of major classifications of drugs to inform nursing care. Restricted to students enrolled in RN to BSN programs.

HSC 343  Clinical Pharmacology  3 cr
This course provides an overview of the concepts, terms, tools, and architectures associated with consumer health informatics. It explores the design, use and impact of technologies that aim to engage consumers to participate in their health and healthcare. Topics include: patient engagement, persuasive system design, gamification, behavior change theory, patient portals, wearables, IoT and mHealth (mobile health).
Pre-requisite: (HI 300 Minimum Grade of C and HI 410 Minimum Grade of C).

HSC 350  Health Data Secur/Compliance  3 cr
This course involves a thorough examination of the security and privacy requirements of the Health Insurance Portability and Accountability Act (HIPAA) and the implementation of these requirements in the clinical environment. Students will learn how to address security issues from system development all the way through post-implementation, how to evaluate systems for vulnerabilities, and how to identify protected health information and covered entities.

HSC 390  Special Topics  1 TO 9 cr
Selected topics in Health Sciences. Requires special permission. Variable title and 1 to 9 variable credit hours.

HSC 571  Managing Healthcare Personnel  3 cr
The purpose of this course is to analyze frameworks for managing health care personnel. The course focuses on exploration and application of human resource management. Emphasis within the course is placed on leadership, communication, relationship management, diversity, legal and ethical principles, and workforce planning and maintenance.

HSC 580  OUD/SUD Prevention/Screening  2 cr
This course serves as a one of three courses in the Addictions Subspecialty nursing program. The purpose of this didactic course is preparation of OUD/SUD Screening in integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional age-populations. This course is available to students from any health-related discipline, to fully embody the spirit of integrated, interprofessional care.
HSC 581  OUD/SUD Assessment/Treatment  2 cr
This course serves as a one of three courses in the Addictions Subspecialty nursing program. The purpose of this didactic course is preparation of OUD/SUD Assessment and Treatment in integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional age-populations. This course is available to students from any health-related discipline, to fully embody the spirit of integrated, interprofessional care.
Pre-requisite: (HSC 580 Minimum Grade of C).

HSC 582  OUD/SUD Recovery/Sys Practice  2 cr
This course serves as a one of three courses in the Addictions Subspecialty nursing program. The purpose of this didactic course is preparation of OUD/SUD recovery in integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional age-populations. This course is available to students from any health-related discipline, to fully embody the spirit of integrated, interprofessional care.
Pre-requisite: (HSC 580 Minimum Grade of C and HSC 581 Minimum Grade of C).

HSC 585  Study Abroad - South Korea  0 TO 3 cr
The purpose of this course for the undergraduate/graduate student is to develop an improved understanding of culture, to recognize any cultural practices that affect health care and other professions, and to incorporate this understanding into the provision of care.

HSC 590  Special Topics  1 TO 6 cr
Study of topics significant to the health professions. Content varies and may be repeated.

HSC 595  Evidence Based Lipid Practice  2 cr
This course serves as a foundational course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate CVD epidemiology, cardiometabolic risk, and evidence based lipid practice in those with selected health care needs across the lifespan.

HSC 596  Adv Vascular Biology  2 cr
This course serves as a foundational course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate lipoprotein metabolism and vascular biology in those with selected health care needs across the lifespan.

HSC 597  Adv Pharm Complex Dyslipidemia  2 cr
This course serves as a foundational course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate advanced pharmacologic options in treating those with selected health care needs across the lifespan.

HSC 598  Diag/Mgt C-plex Dyslipidemia  2 cr
This course serves as a final course in the Clinical Lipidology Subspecialty program. The purpose of this didactic course is to prepare the Clinical Lipid Specialist student to evaluate and manage complex dyslipidemia in those with selected health care needs across the lifespan.

HSC 601  Intro to Intiprofessional Ed  1 cr
The purpose of this course is to introduce nursing students and occupational therapy students to the concepts of interprofessional education. Students will gain an understanding of their own role in healthcare as well as the scope of the role of another health profession. Students will learn how to function in an interprofessional team and carry this knowledge, skills, and value into their future practice, ultimately providing interprofessional patient care as part of a collaborative team that is focused on improving patient outcomes. Interprofessional teams are composed of members from different health professions who have specialized knowledge, skills, and abilities with the goal of providing patient-centered care in a collaborative manner. The team establishes a common goal and using their individual expertise, and works in concert to achieve patient-centered care. In this model, joint decision making is valued and each team member is empowered. Students will be introduced to core competencies in interprofessional care and utilize Fennel's Four Phase Model for understanding and treating multiple chronic conditions for adults, elders, and returning veterans.
Co-requisite: AHN 581, AHN 588

HSC 602  Team Building  1 cr
This online course will allow students to examine the specific impact of cultural, ethical, and religious factors on ethical health-care decision-making and focuses on the relationships among the professions, joint relationships with patients, the quality of cross-professional exchanges, and interprofessional considerations in health care delivery and in formulating public health policies, programs, and services. The focus of the course is derived from the approach utilized in the Core Competencies for Interprofessional Collaborative Practice (2011). Structured content introduces the topic and will allow teams of students to practice problem solving and ethical decision-making within an interprofessional team.
Co-requisite: AHN 591, AHN 592
Pre-requisite: HSC 601 Minimum Grade of C.

HSC 603  Assmnt Vulnerable Populations  1 cr
This online interdisciplinary course will implement evidence based and collaborative models to assess the needs of vulnerable populations who have multiple physical needs such as those evidenced by adults, elders, and returning veterans with multiple chronic illnesses and/or acute injury. The student will synthesize, critique, and apply evidence to improve patient care outcomes. In this mentored and supervised experience, the student will work in groups with the faculty to complete an assessment of need in these populations.
Co-requisite: AHN 595, AHN 596
Pre-requisite: HSC 602 Minimum Grade of C.
HSC 690  Special Topics-  1 TO 9 cr
Study of health professional topics at the doctoral level. Credit hours will vary based on student need and depth of course subject matter. Content will vary and may be repeated up to 9 credits. Requires special permission.

Health And Safety (HS) (HS)

HS 170  First Aid  1 cr
The scope, needs, and limitations of first aid with laboratory training in the techniques and methods of injury care. Opportunity for American Red Cross or American Heart Association first aid and CPR certification.

HS 262  Personal Health  3 cr
Current health issues as related to the individual with emphasis on sociological, psychological, and economic factors.

HS 263  Nutrition  3 cr
The study of human nutrition and nutrients in food and of their ingestion, digestion, absorption, transport, metabolism, interaction, and storage. Emphasis is placed on energy balance, weight control, nutrition across the life span, food safety, food insecurity, and the links between food, nutrition and health.

HS 340  Health in the Sec Classroom  3 cr
A study of instructional practice and application in the secondary health classroom. Pre-requisite: Admission to teacher candidacy required. Co-requisite: HS 430

HS 351  Safety Education  3 cr
Traffic safety and safety at home, work, school, and play. Organization of safety education programs in the school and community. Methods and materials for teaching safety.

HS 352  Traffic Safety Education  3 cr
A survey of the highway transportation system and traffic problems designed to give the driver education teacher an opportunity to develop an understanding of the scope and background of the various agencies and systems involved in the management of vehicular traffic at the national, state, and local level.

HS 353  Driver Education I  3 cr
History, principles, problems and the inventory of skills in driver education.

HS 361  School Comm Health-Impl Curric  3 cr
Contemporary school health and public health issues. Epidemiological concepts and methods. Governmental and volunteer health agencies. Curriculum development based on epidemiological data. Incorporates reading into the curriculum.

HS 362  Drug Education  3 cr
A survey of substance abuse issues. Attention is given to specific drug classifications, use and abuse patterns, prevention, treatment, and future implications.

HS 363  Sports Nutrition - W  3 cr
Basic nutritional principles are covered. Includes assessment of individual and/or group diets. The course is designed to optimize sport performance and/or body composition. Pre-requisite: HS 263 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

HS 365  HPE Curr/Methods-Elem Teachers  3 cr
The development and implementation of appropriate health and physical education curriculum for elementary teachers. Content knowledge and the application of methodological and assessment strategies are adapted for appropriate learning environments.

HS 429  School Lab Experiences-Health  0 TO 3 cr
Professional laboratory observation and participation in health settings at local public schools. Prerequisite: Admission to teacher candidacy. Co-requisite: HS 460

HS 430  School Lab Exp- Health II  0 cr
Professional Laboratory observation and participation in classroom health settings at a local public schools. Requires Admission to Teacher Candidacy. Co-requisite: HS 340

HS 451  Driver Education II  3 cr
Methods and techniques, teaching aids, teaching resources and materials, and program and curriculum construction. Practical experience in teaching students to drive.

HS 452  Simulation in Driver Education  3 cr
Simulation as an audio-visual instructional method and designed to complement and supplement other instructional techniques used in the driver education program to prepare individuals to function safely and effectively in today's traffic.

HS 453  Range-Lab Prog in Driver Ed  3 cr
An examination of the aims, objectives, and role of laboratory programs in driver education. Directed laboratory experiences will be provided.

HS 460  Methods in Health Ed - W  3 cr
Topic selection and teaching unit preparation. Presentation and classroom practice of teaching methodologies. Practical mini-teaching experiences in local schools. Field experiences required. HE (6-12) and PE (P-12) majors only. Prerequisite: Admission to teacher candidacy. Co-requisite: HS 429. Co-requisite: HS 429

This course will introduce students to major themes in recent Japanese history, including samurai culture and other issues pertaining to social class, Westernization, the postwar family, sixties radicalism, and recent popular culture. Students will explore these themes through Japanese film and literature, and will thus become familiar with major directors, including Akira Kurosawa, Yasujiro Ozu and Juzo Itami, and novelists such as Junichiro Tanizaki and Yukio Mishima.

HY 390 Special Topics - 3 cr
Special topics and their development, illustrating historical methodology. May be repeated twice for credit when content varies for a maximum of nine hours.

HY 401 Coll in History- 3 cr
A course which discusses various issues in history. May be repeated when content varies for a total of six hours. Prerequisite: Junior or Senior standing.

HY 405 War and Soc 20th Century 3 cr
A seminar which studies major themes in the interaction of warfare and society in the 20th century.

HY 415 Studies in Military History 3 cr
This course will deal with different topics in Military History. May be repeated for twice for credit when content varies for a maximum of nine hours. Prerequisite: Junior or Senior standing. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

HY 429 Studies Latin Amer History-W 3 cr
A seminar devoted to the exploration of a specific topic in Latin American history. May be repeated twice when content varies for a maximum of nine hours. Prerequisite: Junior or Senior standing. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

HY 431 Studies in U.S. History 3 cr
This course will deal with different topics in U.S. History. May be repeated twice for credit when content varies for a maximum of nine hours. Prerequisite: Junior or Senior standing.

HY 432 Colonial America 3 cr
Colonial period to the revolution.
| HY 433 | The American Revolution | 3 cr | This course emphasizes changes occurring in American society ca.1750-1800. |
| HY 434 | The Early Republic - W | 3 cr | The early Republic from 1789 to 1840. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). |
| HY 435 | Civil War and Reconstruction | 3 cr | The United States from 1840-1877. |
| HY 436 | Modern US I 1877-1945 | 3 cr | History of urban industrialization, war, peace, prosperity, and depression. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course. |
| HY 437 | Modern US II Since 1945 - W | 3 cr | History of US in global perspective. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course. |
| HY 441 | Research Seminar-U.S. History | 3 cr | Research in topics in U.S. History. Limited to 15 students. Prerequisites: History major, Junior or Senior standing, permission from the Department Chair. |
| HY 442 | Research Seminar European Hy | 3 cr | Research in topics in European History. Limited to 15 students. Prerequisites: History major, Junior or Senior standing, permission from the Department Chair. |
| HY 443 | Research Seminar-World HY | 3 cr | Research topics in Asian, African or Latin American History, or in the History of Islamic Civilization. Prerequisites: History major, Junior or Senior standing, permission from the Department Chair. |
| HY 450 | States, Nations, Nationalism-W | 3 cr | Examines the rise of nationalism in modern Europe. This course is a "W" course. Students cannot receive credit for both this course and HY 451. |
| HY 454 | The British Empire | 3 cr | This course examines the rise, fall, and legacy of the British Empire. |
| HY 455 | History of Travel and Tourism | 3 cr | This course examines the history of British and American travel and tourism from the eighteenth century to the present. |
| HY 457 | Studies in European History - | 3 cr | This course will deal with different topics in European history. May be repeated twice for credit when content varies for a maximum of nine hours. Prerequisite: Junior or Senior standing. |
| HY 458 | Sex,Celibacy Christian West | 3 cr | This course examines the history of attitudes towards sexuality, marriage and celibacy in the Western World. It focuses on the question of how Christianity has shaped sexual norms and gender relations from ancient times to the present. |
| HY 461 | Studies in Asian History - | 3 cr | This course will deal with different topics in Asian history. May be repeated twice for credit when content varies for a maximum of nine hours. Prerequisite: Junior or Senior standing. |
| HY 465 | Studies in HY of Islamic Civ - | 3 cr | This course will cover specific topics in the history of Islamic civilization. May be repeated for credit when content varies. Prerequisite: Junior or Senior status. Cross-listed with REL 465. Credit cannot be received for both HY 465 and REL 465. |
| HY 471 | Atlantic World - W | 3 cr | Examines the interactions among Europeans, Native American, and Africans in the Americas. This course is a "W" course. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). EH 102 and EH 105 can be taken concurrently with this course. |
| HY 475 | The History of Mobile | 3 cr | The history of Mobile from its founding to its tercentenary. |

Of particular concern will be the degree to which the development of economic, social and political institutions in the South, especially the institution of slavery, increasingly isolated the region from the rest of the country. |
| HY 478 | The New South | 3 cr | History of the South from Reconstruction to the 1920's. |
| HY 497 | The Modern South | 3 cr | Social, economic, political, intellectual, and cultural history of U.S. South from the 1930's to the present. |
| HY 482 | Southern Autobiography | 3 cr | Southern identity as revealed in 20th century autobiography and fiction. Students cannot receive credit for both this course and HY 480. |
| HY 485 | American Feminist Movements | 3 cr | HY 485 examines the history of American feminist movements from the colonial period through the present. Students cannot receive credit for both this course and HY 390, American Feminist Movements. |
HY 488 American West - W 3 cr
This course examines manifest destiny, imperialism, "the frontier", and the place of Native Americans in the history of the American West. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

HY 494 Directed Studies - 1 TO 3 cr
Directed Individual Study. Requires approval of department chair.

HY 496 Public History 3 cr
This course will introduce students to the field of public history as an academic field and a possible career. Students cannot receive credit for both this course and HY 495.

HY 498 Internship in History 3 TO 6 cr
Directed individual field research at the undergraduate level. Occupational and professional experiences under faculty direction in a defined field of interest, primarily for but not limited to archival, museum, library, or other public history projects. Written reports required. Special permission of departmental chair required. Maximum hours 6.

HY 499 Senior Honors Paper - H 1 TO 6 cr
The researching and writing of a major historical paper. Requires permission of department chair.

HY 501 Colloquium of History 3 cr
A course which discusses various issues in history. May be repeated when content varies. Students cannot receive credit for both this course and HY 401.

HY 505 Warfare and Society 20th Cent 3 cr
A seminar which studies major themes in the interaction of warfare and society in the 20th century. Students cannot receive credit for both this course and HY 405.

HY 515 Studies in Military History - 3 cr
This course will deal with different topics in military history. May be repeated for credit when content varies. Students cannot receive credit for both this course and HY 415.

HY 529 Studies in Latin Am. History - 3 cr
A seminar devoted to the exploration of a specific topic in Latin American History. May be repeated for credit when content varies. Students cannot receive credit for both this course and HY 429.

HY 530 American Historiography 3 cr
Examination of major American historians; study of techniques, styles, ideas, interpretations, and critical evaluations.

HY 531 Studies in U.S. History - 3 cr
A seminar devoted to different topics in U.S. History. May be repeated for credit when content varies. Students cannot receive credit for both this course and HY 431.

HY 532 Colonial America 3 cr
Colonial period to the Revolution.

HY 533 American Revolution 3 cr
This course emphasizes changes occurring in American society ca. 1750-1800.

HY 534 The Early Republic 3 cr
The early Republic from 1789-1849. Students cannot receive credit for both this course and HY 434.

HY 535 Civil War and Reconstruction 3 cr
The United States from 1840-1877. Students cannot receive credit for both this course and HY 435.

HY 536 Modern U.S. I 1877-1945 3 cr
History of urban industrialization, war, peace, prosperity, and depression. Students cannot receive credit for both this course and HY 436.

HY 537 Modern U.S. II Since 1945 3 cr
History of U.S. in a global perspective. Students cannot receive credit for both this course and HY 437.

HY 538 20th Century U.S. History 3 cr
This course emphasizes interpretations of twentieth-century United States history.

HY 540 Modern European Historiography 3 cr
A study of the development of European historical literature and its theoretical and methodological bases.

HY 541 Major European Thinkers 3 cr
Seminar devoted to the writings of leading European thinkers of the last five hundred years, including such figures as Luther, Rousseau, Darwin, Marx, Freud and de Beauvoir.

HY 542 World Historiography 3 cr
Study of the development of World historical literature and its theoretical and methodological bases.

HY 546 Research in Soviet Soc History 3 cr
A study of the relationship between political and social developments in Soviet Russia from 1917 to 1941.

HY 550 States, Nations, Nationalism 3 cr
Examines the rise of nationalism in modern Europe. Students cannot receive credit for both this course and HY 451 or HY 450.

HY 551 Medieval Europe 3 cr
Seminar that explores the history of Western Europe between 950 and 1500, with emphasis on changes in government, economy, society, religion, thought, war and diplomacy.

HY 552 Renaissance Europe 3 cr
Seminar that explores intellectual and cultural developments in Western Europe between 1350 and 1600.
HY 553 Religious Reform in Europe 3 cr
Seminar that considers religious reform movements within the Catholic Church before the beginning of Protestantism, the development of the major Protestant tendencies, and the continuing development of reform within the Catholic Church after the Protestant break.

HY 554 The British Empire 3 cr
The history and legacy of the British Empire from the 17th century to the present.

HY 555 History of Travel and Tourism 3 cr
The history of Travel and Tourism: The British and American Experience from the Eighteenth Century to the present.

HY 556 Body, Medicine, Society Europe 3 cr
This course examines the social and cultural history of medicine, health, healing, and the human body in Western Europe from 1500 to 1900.

HY 557 Studies in European History - 3 cr
A seminar devoted to different topics in European History. May be repeated for credit when the content varies. Students cannot receive credit for both this course and HY 457.

HY 558 Sex, Celibacy Christian West 3 cr
This course examines the history of attitudes towards sexuality, marriage, and celibacy in the Western world. It focuses on the question of how Christianity has shaped sexual norms and gender relations from ancient times to the present.

HY 559 Modern European History 3 cr
Problems in historical interpretation and method from 1740 to present. May be repeated when topic varies.

HY 561 Studies in Asian History - 3 cr
A seminar devoted to different topics in Asian History. May be repeated for credit when the content varies. Students cannot receive credit for both this course and HY 461.

HY 564 Classical/Medieval Islamic His 3 cr
Seminar that examines the Classical and Medieval history of Islamic civilization from the sixth to the thirteenth centuries, with a focus on the political and cultural changes experienced by the Muslim world in this period.

HY 565 Studies in Islamic Civil. - 3 cr
A seminar devoted to different topics in the history of Islamic Civilization. May be repeated for credit when the content varies. Students cannot receive credit for both this course and HY 465.

HY 570 American Biography 3 cr
A study of American biography, autobiography, and methodology.

HY 571 Atlantic World 3 cr
This course examines the interactions among Europeans, Native Americans, and Africans in the Americas. Students cannot receive credit for both this course and HY 471.

HY 573 19th Century American West 3 cr
Seminar that explores the history of the American West in the nineteenth century, focusing on Manifest Destiny, imperialism, Mormonism, the environment, and the place of Native Americans in U.S. society.

HY 575 History of Mobile 3 cr
The History of Mobile from its founding to its Tercentenary. Students cannot receive credit for both this course and HY 475.

HY 577 The Old South 3 cr
This course examines the settlement and evolution of the American South for settlement of Jamestown to the Civil War. Of particular concern will the degree to which the development of economic, social and political institutions in the South, especially the institution of slavery, increasingly isolated the region from the rest of the country.

HY 578 The New South 3 cr
History of the South from Reconstruction to the 1920's.

HY 579 The Modern South 3 cr
Social, economic, political, intellectual, and cultural history of the U. S. South from 1920-1990.

HY 580 Research in Southern History 3 cr
History of the southern United States, from the colonial era to the present. Students will write a research paper involving interpretation of primary documents.

HY 581 Research in American History 3 cr
This is a variable content seminar course. Students will write a research paper involving interpretation of primary sources.

HY 582 Southern Autobiography 3 cr
Southern identity as revealed in 20th century autobiography and fiction. Students cannot receive credit for both this course and HY 480 or HY 482.

HY 585 American Feminist Movement 3 cr
This course examines the history of American feminist movements from the colonial period through the present. Students cannot receive credit for both this course and HY 390 (History of American Feminist Movements) or HY 485.

HY 586 Research in European History 3 cr
This is a variable content seminar course. Students will write a research paper involving interpretation of primary sources.

HY 590 Special Topics - 3 cr
A colloquium of selected subjects and readings to be arranged by the department. Limited to fifteen students. May be repeated seven times for credit when content varies for a total of 24 semester hours.

HY 592 The Teaching of History 3 cr
The class is conceived as part seminar and part practicum. It is an introduction to the problems and principles of the teaching of history in secondary and higher education settings. It will combine instructor lecture, class presentations, and class discussions of assigned readings.
HY 593  Exam and Thesis Introduction  1 cr
This course seeks to provide M.A. students with a practical introduction to the research techniques and bibliographic knowledge that will facilitate the timely completion of a master's level program. Required of all incoming History M.A. students.

HY 594  Directed Studies  1 TO 3 cr
Directed individual study. May only be used in unusual cases to build on regular graduate course work. A maximum of nine credit hours of HY 594 may count toward degree requirements. Pre-requisites: Special permission of instructor required.

HY 595  Archival Practice  3 cr
Introduces graduate students to archival theory and practice.

HY 596  Public History  3 cr
This course will introduce students to the field of public history as an academic field and a possible career. Students cannot receive credit for both this course and HY 495 or HY 496.

HY 597  Pro Studies-Dir Field Research  3 cr
Directed individual field research. Occupational and professional experiences under faculty direction in a defined field of interest, including but not limited to archival, museum, library, or other public history projects. Written reports required. Special permission of departmental chair required.

HY 598  Comp and Thesis Preparation  0 cr
This zero credit hour course will provide continuous enrollment while engaged in comprehensive exam preparation or for thesis preparation beyond thesis hours.

HY 599  Thesis  1 TO 3 cr
Six hours required of student in the thesis track. May not be taken for credit toward a degree by students in the non-thesis track. Pre-requisites: Completion of nine hours of graduate level history, including one 500-level course in the field relevant to the thesis. Special permission of the department chair.

HON 201  Professional Skills Research-H  1 cr
This course helps Research Scholars in Honors to establish their research careers by identifying and securing research opportunities, by advancing their thesis projects, by honing their presentation skills, and by exploring and applying to national and international scholarship opportunities. Reading, writing and project assignments relevant to the students’ research and scholarship interests are required.

HON 290  Special Topics Honors  1 TO 3 cr
Topics for USA Honors Students of an interdisciplinary or multidisciplinary nature. May be repeated when topic varies. Prerequisite: USA Honors Program

HON 301  Intro Senior Honors Project  1 cr
This course is designed to introduce juniors in the USA Honors Program to scholarly research and creative activities in diverse disciplines. The primary graded assignment of the course is the guided development of an approved Prospectus for the Senior Honors Project.

HON 390  Special Topics Honors  1 TO 3 cr
Advanced topics for USA Honors students of an interdisciplinary or multidisciplinary nature. May be repeated when topic varies. Prerequisite: USA Honors Program

HON 499  Honors Senior Thesis  3 cr
In this course, students undertake the process of creating knowledge and/or culture. With the guidance of their honors mentor, students in HON 499 become experts in their research, creative, or interdisciplinary project through the process of researching, writing, and disseminating their senior thesis research. This course is designed for students with projects outside of their departmental major. Approval of instructor if prerequisites are not met. Pre-requisite: HON 301 Minimum Grade of B and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C). HON 301 can be taken concurrently with this course.

Hospitality/Tourism Mgmt (HTM) (HTM)

HTM 200  Intro to Hosp & Tour Ind  3 cr
This course provides students with a comprehensive introduction to the many entities that make up the hospitality industry, such as hotels, restaurants, clubs, cruise lines, and casino hotels. Students will learn about hospitality careers, the importance of service, and how hotels and restaurants are organized, as well as an overview of today's hot issues, including ethical challenges and management concerns.

Students learn how to position, manage, and leverage a successful food service operation - commercial and non-commercial - in a variety of venues. Using a menu-driven approach, the course examines a variety of management tools, best practices, and techniques.
Pre-requisite: HTM 200 Minimum Grade of D.

HTM 212  Food Sanitation and Safety  3 cr
In this course students are introduced to food safety principles and applications, the Hazard Analysis Critical Control Point System (HACCP), microbiology of food safety, infection control, and safety and environmental issues related to the foodservice and hospitality industry. Students completing the course are eligible to take the ServSafe exam offered by the National Restaurant Association.

HTM 220  Mtgs., Inc., Conv., Events  3 cr
This course will introduce students to multiple component events management, including planning, marketing, ticketing, budgeting, operations, and evaluation. Students will engage in instruction, observation, and analysis in order to apply knowledge and theory to a specific event. The course will be delivered in a blended format.
Pre-requisite: HTM 200 Minimum Grade of D.

HTM 310  Global Leadership for HTM  3 cr
This course examines principles of visionary global leadership in the hospitality industry by exploring leadership concepts, theories and fundamentals. Students begin to define their leadership paradigms, and identify leadership strategies that ameliorate personal and professional success.
Pre-requisite: HTM 200 Minimum Grade of D.

HTM 312  Hospitality Service Culture  3 cr
This course explores the dimensions of successful service environments, comprised of various factors, including the values, beliefs, norms, rituals and practices, within hospitality organization. In this course, students will learn the value a customer-centric approach brings to an organization through the creation of a positive consumer experience. The course focuses on hospitality service culture and methods for implementation, management and improvements within the service delivery process by making customer care part of the organization’s mission, vision, values and goals to garner a competitive advantage in the marketplace.

HTM 315  Hospitality/Tourism Marketing  3 cr
This course is designed to provide a broad overview of essential marketing, promotion, and sales principles currently applied in the tourism and hospitality industries. It provides an introduction to marketing theories, principles, and concepts, and an exploration of the role of marketing within a globalized hospitality organization. Students will identify marketing strategies, differentiate services marketing, explain the role of customer expectation, analyze market segments, evaluate target marketing, and demonstrate the ability to effectively communicate using audio visual materials. The focus is on achieving a competitive advantage in a global market. Students will also examine the trends, issues and problems influencing tourism and hospitality marketing in a dynamic intercultural environment.
Pre-requisite: HTM 200 Minimum Grade of D.

HTM 320  Destination Mgmt. & Marketing  3 cr
The purpose of this course is to equip students with an understanding of the principles of destination management and marketing. Techniques for soliciting a variety of markets, planning presentations, and assessing economic impact of bookings, along with the role of convention bureaus as a catalyst to regional economic development will be important components of this course. The internal operations of a destination marketing organization, including stakeholder care, financial management, human resources management, and governance will also be explored.
Pre-requisite: HTM 200 Minimum Grade of D.

HTM 330  Cruise Operations Management  3 cr
The course provides an introduction to the cruise market and the reasons for its significant growth. The principles, practices, and philosophies of cruising, along with cruise line employee roles and responsibilities are examined. Strategies for management and marketing are explored.

HTM 350  Hospitality HR Management  3 cr
This course is an introduction to hospitality management, including an overview of management in the hospitality industry and professional opportunities. The concepts and practices of hospitality management are examined and discussed. The scope and forms of hospitality organizations (e.g. food and lodging, resorts, tourism enterprises, conventions, events, attractions, etc.) are reviewed, as well as local and global trends within these organizations.
Pre-requisite: HTM 200 Minimum Grade of D.

HTM 396  HTM Career Planning  3 cr
This course teaches students to perform a good-fit analysis by aligning career and employer choices with self-assessment, determine competencies gaps, and develop a strategic professional development plan. Three credit hours. Offered in web-enhanced and web-blended formats.
Pre-requisite: HTM 200 Minimum Grade of D.
HTM 397 Study Abroad - Culinary 3 cr
This course is designed to engage students in active learning related to international culture, cuisine, and culinary practice in settings outside the United States. Through participation in the course, students will explore the culture of the host country, cuisine as it is related to the culture, and common food preparation and service practices. Activities include readings, lectures, discussions, reflective journaling, tours, observations, and active engagement in food preparation and service.

HTM 398 Study Abroad - Intl Hosp Mgt 3 cr
This course is designed to engage students in active learning related to international hospitality management in settings outside the United States. Through participation in the course, students will explore the culture, management practices, and service standards in the host country related to the hospitality industry. Activities include readings, lectures, discussions, reflective journaling, tours, and observations.

HTM 400 Legal Issues in HTM 3 cr
This course will provide a comprehensive study of the legal aspects of the hospitality industry with an emphasis on compliance and prevention of liabilities. The course is not intended to replace the legal services of an attorney, but rather provide an overview of common legal issues in the field of hospitality and tourism management. Activities include readings, lectures, discussions, reflective journaling, tours, and observations.

HTM 410 Sustainable and Eco-Tourism 4 cr
Examine the interaction of ecotourism with social, natural and cultural environments as well as the impacts of ecotourism on the environment and global societies. Prerequisites: HTM 200 Minimum Grade of D. HTM 200 can be taken concurrently with this course.

HTM 435 Quality Service Management - W 3 cr
This course is designed to prepare students to understand, challenge, and refine the principles of guest-services management in an organization. Theories and concepts of service will be explored with emphasis on identifying customer preferences and a systematic process for organizations to design service delivery systems and implement a successful quality service environment that consistently meets and exceeds customer expectations. This course is a designated writing intensive course (W) and all major writing assignments must be satisfactorily completed in order to receive credit for the course. Prerequisite: EH 102 or EH 105, or placement; HTM 200 Introduction to Hospitality and Tourism Management. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and HTM 200 Minimum Grade of D.

HTM 440 Lodging Management 3 cr
This course is an exploration of issues facing the hotel and lodging industry. The goal of the course is to prepare students for the hospitality industry with a specific focus on the hotel industry. It will introduce students to multiple components of lodging management, including: sales and marketing; front office, housekeeping, maintenance and accounting departments; food and beverage operations for full-and limited-service hotels; safety and securing; careers in the lodging industry. Students will engage in instruction, observation, and analysis in order to apply knowledge and theory to specific hospitality lodging situations. The course will be delivered in a blended format or online format. Pre-requisite: HTM 200 Minimum Grade of D.

HTM 445 HTM Financial Reporting 3 cr
This course is designed to provide hospitality and tourism students with a solid foundation of accounting concepts and methods of financial analysis that is required to be successful in the hospitality industry. The course provides students with a fundamental understanding of using numbers to operate various departments and analyze management reports and financial statements. Prerequisite: HTM 200 Minimum Grade of D.

HTM 450 Non-Traditional Lodging 3 cr
This course will provide students with an in-depth study into the unique world of "non-traditional" lodging, the condominium resort and vacation ownership industry and other forms of non-traditional lodging. The course focuses on the hospitality aspects of the condominium resort, vacation ownership industry, and recreation and park lodging, and specifically on how non-traditional lodging operations differ from traditional lodging operations such as hotels, motels, and resorts. Pre-requisite: HTM 200 Minimum Grade of D.

HTM 490 Special Topics 1 TO 4 cr
This course is designed as an educational tool for college students to develop a theoretical understanding of the concept of servant leadership as it applies to the hospitality and tourism management industry, and to acquire and apply fundamental hospitality and tourism workplace competencies through "real-world" experiential learning activities that include "earning the right to lead" through engagement and visible leadership. Students will complete online learning modules related to theory and practice while also engaging in experiential learning activities in a hospitality organization.

HTM 494 Directed Studies 1 TO 4 cr
Directed study on a topic of special interest or significance in the field of hospitality and tourism management. Course requirements can be met through research, reading, writing, or lab activities, as approved by the department chair and supervising instructor. May be taken for 1-4 credit hours. May be repeated, if content varies, for up to six hours of credit. Prerequisites: Junior or Senior standing and approval of department chair and supervising instructor.
HTM 496  Internship I Capstone Exp - W  3 cr
This pre-internship course examines the impact of business environments on personal and career effectiveness in the Hospitality field. Topics include effective business communication, ethical decision making, and leadership development.
Co-requisite: HTM 498
Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C and HTM 200 Minimum Grade of D. HTM 200 can be taken concurrently with this course.

HTM 498  Internship II  3 cr
This Internship II course provides students an opportunity to receive supervised, relevant, and practical experience in work that is related to the objectives of the Hospitality and Tourism Management (HTM) program.
Co-requisite: HTM 496
Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C and HTM 200 Minimum Grade of D.

Information Systems (ISC) (ISC)

ISC 190  IS Special Topics  1 cr
Selected topics in information systems. Prerequisite: Permission of the ISC coordinator.

ISC 245  Info Systems in Organizations  3 cr
An overview of information systems topics from an organizational and managerial perspective. Topics include current information technology and systems, such as the Internet and its organizational impacts; the emergence of global economy and digital firms; and the ethical and social impacts of information systems, such as privacy, intellectual property rights, and liability. Issues and strategies regarding information systems planning, systems development, decision making, and using IT for competitive advantage are discussed. Throughout the course, students will investigate the strategic uses of information technology in current industry-specific situations.

ISC 272  Systems Architecture  3 cr
This course introduces students to Information Technology hardware and systems software concepts. Topics include: computer hardware, operating systems, system software, hardware and software integration, operating procedures, system performance, security/safety, and compatibility. Student labs and hands-on activities will include: Windows, Unix, and Linux systems, system utilities and software tools. Credit cannot be received for both ITE 272 and ISC 272.
Pre-requisite: CIS 115 Minimum Grade of C.

ISC 285  Intermediate Programming  3 cr
A second course in visual, event-driven programming that builds on CIS 115. Topics include functions and procedures, arrays, LINQ, structures, text files, structured exception handling, additional controls and objects, and object-oriented programming. Programming projects are required. Credit cannot be received for both ISC 285 and ITE 285.
Pre-requisite: CIS 115 Minimum Grade of C.

ISC 300  Health Informatics Clin Env  3 cr
This course provides an overview of concepts, terms, organization, and processes associated with patient care and clinical environments as they pertain to health informatics. The entire process of how a person accesses, moves within, and exits the system both as an inpatient and outpatient to obtain care. Students will observe and report on a variety of clinical settings and healthcare specializations throughout the semester. This course is designed for students with no prior clinical experience.

ISC 305  Info Systems-Technology  3 cr
The analysis, design, and implementation of information systems. Analysis of the functional areas of business and integration of computer tools to satisfy information requirements. Current development in business computer systems, including surveys of current systems and the Internet. Computer classrooms are utilized to provide students with "hands on" experience.
Pre-requisite: CIS 250 Minimum Grade of C.

ISC 353  Info Sys Appl Development  3 cr
This course provides an accelerated approach to programming in a high-level, object-oriented language, especially for information systems. Coverage includes algorithmic problem solving, fundamentals of programming, procedures, decisions, repetition, arrays, files, exception handling, and object-oriented programming. The format for this course is lecture/lab. The instructor will demonstrate in class, and students will learn by doing homework problems and programming assignments. This course does not count towards a graduate degree in CIS. Some prior programming experience is desired and permission of Coordinator.
Prerequisites: Math placement score of 65 or higher.
Pre-requisite: University test - Math 65 or DS 090 Minimum Grade of C or (MA 112 Minimum Grade of C or MA 171 Minimum Grade of C).

ISC 360  Info Sys Analysis and Design-W  3 cr
A thorough examination of the analysis and design of computer information systems from the systems analysts view. The course will use an established software development methodology. At each step in the software development life cycle, both the methodologies used and the documentation required will be examined.
Pre-requisite: ISC 245 Minimum Grade of C and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).
ISC 361 Database for Info Systems 3 cr
The course builds on relational database and programming concepts by exploring the analysis, design, and implementation of more complex database systems. Topics include advanced data modeling, advanced query design, and application development in a database programming environment. Credit cannot be received for both ITE 370 and ISC361.
Pre-requisites: CIS 324 Minimum Grade of C and (ISC 285 Minimum Grade of C or ITE 285 Minimum Grade of C).

ISC 362 IS Object-Oriented Analy-Des 3 cr
This course provides an introduction to an object-oriented analysis and design (OOAD) methodology as well as the tools and techniques for supplementing this methodology. The course will also cover the use of notational metalanguages such as Unified Modeling Language (UML) and OOAD computer-assisted software engineering (CASE) tools.
Pre-requisite: ISC 245 Minimum Grade of C.

ISC 410 Health Informatics 3 cr
This course provides an overview of the concepts, terms, tools, and architectures associated with health informatics as applied to healthcare delivery. Topics include: electronic record systems, computerized physician order entry, health system standards, terminologies, workflow modeling, security and privacy of clinical data, clinical reporting, and the impact of information technology use on the quality and efficiency of health care delivery and outcomes.

ISC 450 Health Sys Analysis and Design 3 cr
This course provides an overview of the concepts, terms, tools, and architectures associated with health informatics as applied to healthcare delivery. Topics include: electronic record systems, computerized physician order entry, health system standards, terminologies, workflow modeling, security and privacy of clinical data, clinical reporting, and the impact of information technology use on the quality and efficiency of health care delivery and outcomes.
Pre-requisite: ISC 410 Minimum Grade of C.

ISC 455 Health Data Mgt Decision 3 cr
This course focuses on the design and management of electronic medical record systems and clinical decision support systems. Course content related to electronic medical record systems includes architectural components, technical design issues, and management; and, content related to clinical decision support systems includes decision support roles, extracting useful information from data, and legal and regulatory restrictions. Laboratory assignments will provide students with opportunities to interact with these systems.
Pre-requisite: ISC 410 Minimum Grade of C.

ISC 459 IS Appl Design-Implementation 3 cr
Analysis and design of information systems to support multiple locations via Intranet/Internet access. Additional and supporting topics, such as corporate privacy and security are also covered.
Pre-requisite: CIS 324 Minimum Grade of C.

ISC 462 IS Strategy and Policy 3 cr
This course provides the top management, strategic perspective for aligning competitive strategy with information systems. Issues include the development and implementation of policies and plans to achieve organizational goals, including security policy.
Pre-requisite: CIS 324 Minimum Grade of C.

ISC 463 IS Database Admin and Security 3 cr
An examination of the issues and activities associated with the administrator function for databases. This course will cover installation, implementation, user management, backup, and security.
Pre-requisite: CIS 324 Minimum Grade of C.

ISC 464 IS Security and Risk Mgmt 3 cr
This course provides an introduction to the fundamental principles and topics of information systems security and risk management at the organizational level. This course views information security as a management issue that incorporates technical and management solutions. Topics include risk management, security policy, disaster planning, security law and ethics, and security education, training and awareness.
Pre-requisite: (MGT 300 Minimum Grade of C or BMS 322 Minimum Grade of C or MGT 322 Minimum Grade of C) and (CIS 321 Minimum Grade of C or CIS 221 Minimum Grade of C).

ISC 467 Enterprise Information Systems 3 cr
This course provides an introduction to enterprise information systems and to business process modeling. Key concepts and techniques for identifying, designing, and documenting business processes will be presented.
The way information technology can be used to manage, transform business processes is discussed. Successful organizational change strategies will be reviewed.
Pre-requisite: (MGT 300 Minimum Grade of C or BMS 322 Minimum Grade of C or MGT 322 Minimum Grade of C) and CIS 324 Minimum Grade of C.

ISC 472 Advanced Data Management 3 cr
This course provides an introduction to the concepts and technologies of big data. Key concepts and techniques allow organizations to analyze structured and unstructured data/information collected from transaction processing systems, data warehouses, and distributed systems. The ultimate purpose of descriptive, predictive, and prescriptive analytics is to support high quality decision support for executives and managers. Concepts of data mining, data storage, non-relational platforms, and considerations for new and emerging technologies are described in detail.
Pre-requisite: (CIS 324 Minimum Grade of C or CSC 324 Minimum Grade of C) and (ISC 285 Minimum Grade of C or ITE 285 Minimum Grade of C or CSC 231 Minimum Grade of C).
ISC 475  Info Systems Proj Management  3 cr
This course examines the principles and techniques of project management from an information systems perspective. Major topics covered include project context, project selection, and project planning. Students work in collaborative teams and are instructed in the use of a project software tool. Credit cannot be received for both ITE 475 and ISC 475. Pre-requisite: CIS 324 Minimum Grade of C.

ISC 490  Special Topics  3 cr
Advanced selected topics in information systems. Prerequisite: Permission of the ISC Coordinator.

ISC 510  Health Informatics  3 cr
This course provides an overview of the concepts, terms, tools, and architectures associated with health informatics as applied to healthcare delivery. Selected research topics are introduced and independently studied. Topics include: electronic record systems, computerized physician order entry, health system standards, terminologies, workflow modeling, security and privacy of clinical data, clinical reporting, and the impact of information technology use on the quality and efficiency of health care delivery and outcomes. Prerequisite: Permission of the Director of CI Graduate Studies.

ISC 545  Management Information Systems  3 cr
This course provides an overview of information systems from an organizational, managerial, and technical perspective. The topics covered will focus on the strategic role of information systems and information technology in business processes, change and knowledge management, group and individual decision-making, and electronic commerce. Specific topics include current hardware, infrastructure and connectivity technologies, software and systems development methodologies. Internet-based applications, management challenges and opportunities created by information systems and global connectivity such as privacy, data and systems security and control, intellectual property, ethical and social consequences of information technology, and the impact of digital integration on an organization's competitiveness, products, services, procedures, and management structures. Prerequisite: Permission of the Director of CIS Graduate Studies.

ISC 551  Human-Comp Interface Design  3 cr
The course covers principles, guidelines, and methods in human computer interface design. Students complete a project involving the development, evaluation, and demonstration of a user interface. The interface is designed around a user and task analysis performed on a given problem. Students plan and conduct a usability study of a working prototype and report on results and recommendations. Prerequisite: Graduate Professional Component.

ISC 553  IS Web Site Management  3 cr
This course addresses the design, development, and management of a web server. Topics include the selection, installation, and configuration of an operating system and web server software, web server security and monitoring, and website maintenance. Prerequisites: Graduate Professional Component.

ISC 555  Health Data Mgt/Decision Supp  3 cr
This course focuses on the design and management of electronic medical record systems and clinical decision support systems. Course content related to electronic medical record systems includes architectural components, technical design issues, and management; and, content related to clinical decision support systems includes decision support roles, extracting useful information from data, and legal and regulatory restrictions. Laboratory assignments will provide students with opportunities to interact with these systems.

ISC 559  IS App Design-Implementation  3 cr
Analysis and design of information systems infrastructures to support multiple locations, intranet/internet access, corporate privacy, and security. Capacity analysis and planning, installation, performance monitoring, and problem solving strategies. Prerequisites: Graduate Professional Component.

ISC 560  Info Systems Analysis-Design  3 cr
This course will include an introduction to the systems development life cycle as well as a survey of analysis and design techniques. Detail topics will include information systems planning and project identification and selection, requirements collection and structuring, process modeling, data modeling, design of interface and data management, system implementation and operation, system maintenance, and change management implications of systems. Globalization issues in systems will also be discussed. Students will use current methods and tools such as rapid application development, prototyping, and visual development. Prerequisite: Graduate Professional Component.
ISC 561  IS Database Management          3 cr
An introduction to database management systems. The data environment, basic technical concepts and systems resources, database concepts, including use and management of databases. Classical and current DBMS models will be presented. Laboratory project activity will involve definition, creation, and development of a database. Prerequisites: Graduate Professional Component.

ISC 562  IS Policy and Strategy          3 cr
This course provides the top management, strategic perspective for aligning competitive strategy, core competencies, and information systems. Issues include the development and implementation of policies and plans to achieve organizational goals, including defining systems that support the operational, administrative, and strategic needs of the organization, its business units, and individual employees. Prerequisites: Graduate Professional Component.

ISC 563  IS Database Administration     3 cr
This course will examine the issues and activities associated with the administrator function for organizational databases. Topics include storage and indexing, query evaluation, physical database design, crash recovery, and security. Prerequisite: CIS Graduate Professional Component.

ISC 565  IS Project-Change Management    3 cr
A study of the concepts and techniques of project management from an information systems perspective. The course provides an overview of project lifecycle activities, and a focus on managerial, behavioral, and process issues that surround the dynamic context of systems development. The issue of managing the change brought about by the introduction or modification of information systems in organizations will be discussed. Students will be instructed in the use of software tools for project management. Prerequisites: Graduate Professional Component.

ISC 567  IS Function Integration        3 cr
The tactical/operational responsibilities and roles of the CIO. Governance considerations that link the IS-business organizations. Current/emerging issues in creating and coordinating the key activities necessary to manage the day-to-day operations of the IS function. Coordinating skills and organizational IS infrastructure. Pre-requisite: ISC 561 Minimum Grade of B.

ISC 568  IS Enterprise Integration      3 cr
Information systems role in transforming organizations and industries. An integrated view of the organization from an external and internal perspective. IS' internal role in integrating the enterprise through a cohesive set of business processes and functional applications to meet business needs. Enterprise resource planning and enterprise functionality. Collaborative systems. Consideration of external relations with suppliers, outsourcers, and customers. Prerequisite: Graduate Professional Component. Pre-requisite: ISC 567 Minimum Grade of B and Computer Science Graduate 030 .

ISC 572  Advanced Data Management        3 cr
The focus here is on the management of data and the technologies which specifically targets mass data storage with a view to online and after-the-fact examination of data to acquire new insights. The major topics include: data warehouse planning, data warehouse models, and supporting software, date mining concepts and tools, creation of data mining models for the tools and matching the tool to the task. Prerequisite: Graduate Professional Component.

ISC 590  IS Sp Top -                    3 cr
Advanced selected topics in information systems. Prerequisite: Permission of ISC coordinator.

ISC 595  IS Project Proposal Develop     1 TO 3 cr
Development of the project proposal for the Information Systems specialization master's project. Prerequisites: CIS 518, Graduate Professional Component, Permission of Director of CIS Graduate Studies. Pre-requisite: CIS 518 Minimum Grade of S.

ISC 598  Information Systems Project     1 TO 3 cr
This course may be repeated for a maximum of six (6) credits. A CIS project committee will provide direction during the project. Prerequisite: Approval of project proposal by the student's project committee, and permission by Director of CIS Graduate Studies. Pre-requisite: ISC 595 Minimum Grade of B.

ISC 629  Comp Ecosystems                 3 cr
This course focuses on developing expertise and preparation for independent research in computing ecosystems through an in-depth review of the computing literature. The course will explore concepts and issues associated with large scale parallel data processing, virtualized storage, application, and infrastructure architectures and the attendant security, privacy and legal issues.

ISC 673  Digital Investigations          3 cr
This course focuses on developing expertise and preparation for independent research in Digital Forensics Investigations through an in-depth review of the Digital Forensics literature. The student will be conversant in broad issues and trends in Digital Forensics as defined by skill sets and occupations.

ISC 675  Information Systems             3 cr
This course focuses on developing expertise and preparation for independent research in information systems through an in-depth review of the information systems literature. The course will explore the current major streams of theory, research, and methodologies in information systems.

ITE 384 Network Infrastructure Systems 3 cr
This course focuses upon the concepts of network hardware systems that provide interconnection of communication devices. Topics include: network architectures and technologies, concepts such as routing, addressing, and network protocols (TCP/IP and others). Students will be required to setup, configure, and manage wired and wireless network equipment such as switches, routers, access points, and gateways.
Pre-requisite: CIS 321 Minimum Grade of C and (ISC 272 Minimum Grade of C or ITE 272 Minimum Grade of C).

ITE 453 Web Site Management 3 cr
This course addresses the design, establishment and implementation of a World Wide Web site. Issues addressed are: definition of the site, establishment of a physical site, choice of a Web server, determination of software requirements, implementation details, security, management, and monitoring of the site.
Pre-requisite: CIS 321 Minimum Grade of C and (ISC 272 Minimum Grade of C or ITE 272 Minimum Grade of C).

ITE 473 Digital Forensic Analysis 3 cr
This course introduces students to acceptable methodologies of securing, collecting, analyzing and reporting data of a computer forensics investigation. Topics include: Ethics, introduction to computer investigations, evidence control, forensics tools, data acquisition, data recovery, data analysis and presenting the results. Students will be required to perform several forensics analyses in a controlled lab environment.
Pre-requisite: ITE 372 Minimum Grade of C and ITE 373 Minimum Grade of C.

ITE 474 Human Computer Interface 3 cr
Students will study the concepts of human-computer interaction and interface design. Topics include: detailed human-computer interface concepts, modern graphical user interface models, and interface usability testing. Students will use rapid-prototyping tools to develop and test a typical user interface. Credit cannot be received for bothITE 474 and ISC 474.
Pre-requisite: (ISC 285 Minimum Grade of C or ITE 285 Minimum Grade of C).

ITE 475 IT Project Management 3 cr
This course examines the principles and techniques of project management from an information technology perspective. Major topics include project context, project selection, and project planning. Students work in collaborative teams and are instructed in the use of a project software tool. Credit cannot be received for both ITE 475 and ISC 475.
Pre-requisite: CIS 324 Minimum Grade of C.

ITE 476 Network Security Management 3 cr
This course examines network and web security issues including: risks and threats, system access points, hardware and software defense methods, and organizational security policies. Labs will require students to analyze systems for potential threats, implement security procedures, monitor systems for security breaches, and institute recovery or repairs.
Pre-requisite: ITE 382 Minimum Grade of C and ITE 384 Minimum Grade of C.

ITE 480 Needs Assess-Tech Eval - W 3 cr
This course presents methodologies for assessing technological needs in support of organizational information requirements. Students learn the next logical step is a formal means of evaluating a given technology. Major topics of the course are specifying organizational needs, identifying potential technologies, evaluating potential benefits, assessing the organization's ability to utilize the technology. Students will examine planning for technological change and strategic implementation of the change.
Pre-requisite: EH 102 Minimum Grade of C and ITE 271 Minimum Grade of C and ITE 285 Minimum Grade of C.

ITE 482 Adv Web Development 3 cr
This is an advanced course in web programming and development. This course provides a hands-on approach using high-level development tools to learning advanced web programming concepts including server-side and database processing. Students will implement usability and security features into the development of modern web applications.
Pre-requisite: CIS 324 Minimum Grade of C and ITE 375 Minimum Grade of C.

ITE 484 Advanced Network Management 3 cr
This course explores advanced network management issues including: developing/designing network implementation strategies, managing users and data, providing operational support and help-desk, developing network use policies, developing network recovery procedures. Labs will require that students manage an operational network that provides typical network services and experience the day-to-day problems that network administrators encounter.
Pre-requisite: ITE 382 Minimum Grade of C and ITE 384 Minimum Grade of C.

ITE 485 ITE Senior Demo Project 3 cr
A senior capstone individual project course working from problem requirements and specifications to produce a solution. This requires exploration of suitable information technologies to produce a solution that improves the problem situation. Students will analyze, plan, and report on the project and implement a prototype. Prerequisites: ITE 370 Minimum Grade of C, ITE 480 Minimum Grade of C, and permission of the ITE coordinator.
Pre-requisite: ITE 370 Minimum Grade of C and ITE 480 Minimum Grade of C.
ITE 490  Special Topics  3 cr  
Advanced selected topics in information technology.  
Prerequisite: Permission of the ITE coordinator.  
Pre-requisite: Computer Sci Prof Component 30 or Computer Science Graduate 030

**Instructional Sys Design (ISD) (ISD)**

ISD 301  Trends & Issues in IDPI-W  3 cr  
This is an introductory course that provides an overview of current trends, technology and issues in instructional design and performance improvement.  
Pre-requisite: EH 101 Minimum Grade of C and EH 102 Minimum Grade of C.

ISD 310  Instructional Design  3 cr  
Instructional Design is a project-based course that includes step-by-step strategies to create instruction using the design models, instructional strategies, and technology applications. Students will explore the processes of analysis, design, development, implementation, and evaluation in order to apply real-world training solutions to actual instructional problems.

ISD 320  Training Interventions  3 cr  
This course will provide students with experience in designing and developing facilitator-lead training interventions focused on improving performance in various contexts. Students will interact with a client in a professional manner and create a professional training session incorporating motivational strategies, instructional delivery methods, and appropriate assessment measures from initial contact needs assessment to final session evaluations.

ISD 340  Analysis, Assessment & Eval  3 cr  
Students will learn how to make assessments of human attitudes, knowledge, and performance, analyze empirical data, and evaluate training and human performance programs.

ISD 350  Emerg Learning Technologies  3 cr  
This course provides students with the skills and knowledge necessary to develop technology-based modules using different delivery methods for application in non-instructional and instructional training solutions.  
Pre-requisite: ISD 310 Minimum Grade of C.

ISD 360  Communication Skills in Org  3 cr  
This course is designed to utilize theory and practice of communication in the processes of analysis, design, development, implementation and evaluation of instruction. Communication skills will be developed and applied in a practical setting.

ISD 370  Distance and Mobile Learning  3 cr  
This course will identify and utilize innovative technologies related to distance and mobile learning in various job sectors and learning environments.  
Pre-requisite: ISD 310 Minimum Grade of C.

ISD 400  Portfolio Development  1 cr  
Students will create an online portfolio to showcase projects, assignments, and collaborations related to instructional design and performance improvement.  
Pre-requisite: ISD 310 Minimum Grade of C.

ISD 410  Org/Coordination Training  3 cr  
This course is designed to develop knowledge and competencies in the coordination of large-scale, comprehensive training programs.  
Pre-requisite: ISD 320 Minimum Grade of C and ISD 340 Minimum Grade of C.

ISD 420  Cultural Factors in IDD & HPI  3 cr  
This course will focus on the interaction of multicultural aspects of learning and teaching. Students will enhance their cognitive and affective awareness and understanding, as well as their personal acceptance of differences associated with the learning/teaching process. The ultimate goal is to prepare multiculturally competent designers of instruction for a global society.

ISD 430  Psych of Learning in Organ-W  3 cr  
The course covers major theoretical perspectives in organizational psychology based on empirical research and case studies. Students will explore learning theory, group dynamics, and change in different types of learning organizations.

ISD 440  Human Develop. Interventions  3 cr  
Students will learn and apply various human development theories and interpersonal skills related to the effective design of training interventions to improve learning and performance. A special area of emphasis will focus on students’ own development experiences.

ISD 450  Human Performance Tech  3 cr  
This course includes conducting various types of analysis in order to solve human performance problems by design on non-instructional interventions.  
Pre-requisite: ISD 340 Minimum Grade of C.

ISD 480  Learn Train & Perf Project  3 cr  
Students will complete a supervised field project on a topic related to instructional design and/or performance improvement.

ISD 490  Special Topics  3 cr  
This course will allow faculty to work with students to explore current topics related to instructional design and performance improvement. Scholarly articles and current trends will be the basis for the designated learning outcome and end product.  
Pre-requisite: ISD 310 Minimum Grade of C and ISD 350 Minimum Grade of C.
ISD 495  Internship  3 cr
The internship is a supervised learning experience in an actual or similar setting in which instructional design or performance improvement related professionals are employed.
Pre-requisite: EH 102 Minimum Grade of C.

ISD 581  Digital Media Tools  3 cr
This course helps students learn to use computers to design instruction.

ISD 582  Evaluation of Digital Media  3 cr
An advanced course in the development, use and evaluation of multimedia instruction.

ISD 583  Interactive Video  3 cr
This course involves digital editing and includes basic instruction in shooting, lighting and composing video sequences.

ISD 584  Animation  3 cr
An introductory course that provides students with an opportunity to acquire the skills necessary to develop animated interactive modules for use in instruction.

ISD 585  Integr Tech in Teaching  3 cr
The purpose of this course is to enable students with some technology background in computers to focus the use of a variety of technologies onto a specific content area of instruction. Students will demonstrate cognitive competency of curriculum integration, instructional design, and production techniques. Specific attention will be given to videodisc technology, AV and computer technology.

ISD 590  Sp Top -  3 cr
Topics of contemporary interest in the area of Educational Media will be presented, discussed and investigated.

ISD 594  Dir St and Research  1 TO 3 cr
Students explore problems and issues of special interest or significance in Instructional Design and Development. Not more than three semester hours may be accepted toward degree programs

ISD 595  Internship - Masters  1 TO 6 cr
The internship is a supervised learning experience in an actual or similar setting to that in which instructional designers or media administrators are employed

ISD 598  Research and Dev Project  1 TO 6 cr
A supervised field project, study or investigation on a topic related to Instructional Design and Development. Students will conduct an investigation which applies skills learned during the Instructional Design and Development Masters program.

ISD 599  Thesis  1 TO 3 cr
A student selects a project, study or investigation related to the area of specialization in Instructional Design and Development. The project forms a basis for the thesis. A thesis committee provides direction during the investigation and during the writing of the thesis.

ISD 600  Learning Tools  1 cr
This one-credit-hour course is designed to introduce students to some of the basic media tools that will help them with their coursework and in the work place. The course will typically be a series of two-hour class periods scheduled at somewhat regular intervals.

ISD 601  Sem Instruct Design-Dev  3 cr
Discussion and investigation of particular topics related to Instructional Design and Development.

ISD 602  Writing For Instruction  3 cr
Course serves as an overview and review of essential written communication skills needed by instructional design professionals.

ISD 610  Trends and Issues in IDD  3 cr
Discussion and investigation of history, current trends, and issues in instructional design and their implications for education and training.

ISD 611  Macro Lvl Trning & Perform Sys  3 cr
Course provides an overview of concepts and current issues related to the design and development of training and performance systems at the macro-level. Rather than focusing on specific, small-scale instructional or non-instructional interventions, students in this course will study learning and performance from a broad organizational perspective.
Pre-requisite: ISD 621 Minimum Grade of B and ISD 641 Minimum Grade of B.

ISD 612  Alt Instructional Models  3 cr
A comprehensive course detailing conventional and alternative instructional-design models. It is intended for advanced IDD students to further develop their skills and knowledge about ID models and to formulate their own epistemological beliefs as to how ID should occur.
Pre-requisite: ISD 622 Minimum Grade of B.

ISD 613  Instructional Strategies  3 cr
In this course, students explore the use of an assortment of instructional strategies to meet diverse learning needs.

ISD 614  Human Cognition for IDD  3 cr
A survey course of the cognitive science literature that is especially relevant for instructional designers and human performance technologists. The course covers major theoretical perspectives in cognitive science and has students read original empirical research. The goal is to enable IDD students to utilize the cognitive science literature in their careers.
Pre-requisite: EPY 502 Minimum Grade of B.

ISD 620  Research in Instr Tech  3 cr
Students collaborate with a graduate faculty member who is conducting research in the area of instructional design and development. May be repeated for credit.
ISD 621  Instructional Design  3 cr
Introductory course that focuses on a recognized model of instructional design. Includes emphasis on instructional analysis, instructional objectives, performance assessment, instructional strategies and sequences, and formative evaluation.

ISD 622  Adv Instructional Design  3 cr
Application of advanced instructional design models and procedures for needs assessment, instructional development, and evaluation in various instructional and learning environments using current learning tools. Pre-requisite: ISD 621 Minimum Grade of B.

ISD 623  Adv Research Methodology  3 cr
A comprehensive course detailing advanced research methods and research. This course is specifically geared toward advanced IDD students who wish to develop the skills to properly design, propose, carry out, and critique scholarly research. The course covers the specifics of advanced research design and methods through a thorough analysis of empirical research. The goal is to equip IDD students with the research design skills to become successful scholars and researchers in their field. Pre-requisite: IDE 510 Minimum Grade of B or IDE 620 Minimum Grade of B.

ISD 640  Needs Assessment  3 cr
The course focus is on conceptualization of needs analysis related to instructional and performance improvement issues in selected settings. Students collaboratively apply a needs assessment model to determine needs, causes, and solutions and report findings and recommendations.

ISD 641  Performance Systems Tech  3 cr
This course provides students with practical methods of analyzing and solving human performance problems. Emphasis is placed on development of both non-instructional and instructional interventions.

ISD 642  Project Coordination  3 cr
This course will develop knowledge and competencies in the coordination of large instructional projects. It is designed to enhance skills in the basic functions of instructional project coordination: planning, organizing, controlling, and directing.

ISD 650  Computer-Based Training  3 cr
A course for persons interested in the use of the computer to present instructional materials to students. Current learning theory as it pertains to authoring will be discussed.

ISD 651  Learning Theory and Technology  3 cr
This course will present techniques for the integration of instructional design theory and practice into the newer delivery systems including those using video and digitized media.

ISD 652  Technology-Based Instruction  3 cr
This course is a continuation of ISD 651. It concentrates on the additional skills and software necessary to develop and produce an original interactive instructional product.

ISD 653  Developing Online Instruction  3 cr
Developing online instruction using course management tools, multi-media technologies, and instructional design principles. Pre-requisite: ISD 621 Minimum Grade of B.

ISD 655  Print and Screen Courseware  3 cr
Designing, producing and applying print and screen courseware. An analysis of graphic and instructional design principles and technologies, alternatives to conventional prose, learned capabilities, readability, formulate, and resource constraint analysis. Students design, develop, and apply print and screen courseware in instructional modules.

ISD 656  Training Interventions  3 cr
Practical experience in designing and implementing facilitator-led training in various large-scale organizations.

ISD 657  Teaching in Higher Education  3 cr
Theory and practice of pedagogy in higher education. Principles of the analysis, design, development, implementation, and evaluation of instruction will be addressed and then applied in a practical setting with a mentor instructor.

ISD 660  Emerging Technologies  3 cr
Course introduces students to emerging technological breakthroughs in education and training settings especially emphasizing the effects of future technologies.

ISD 662  Impact Emerging Technologies  3 cr
This course examines the impact of new digital technologies in education and training and prepares educators to use digital approaches in their institution.

ISD 694  Dir St and Research -  3 cr
Students explore problems and issues of special interest or significance in Instructional Design. Not more than three semester hours may be accepted toward degree program.

ISD 695  Internship - Doctoral  1 TO 6 cr
The internship is a supervised learning experience in an actual or similar setting to that which instructional designers or media administrators are employed.

Interdepartmental Educ (IDE) (IDE)

IDE 010  Reading Exam  0 cr
IDE 010 is a one hour reading exam that tests students' current proficiency in communication skills. Failure to complete the exam as scheduled, with a passing score, will require the students to re-register for IDE 010.
IDE 101  Freshman Seminar in Education  2 cr
Assists freshman with maximizing the student's potential to achieve success and to respond responsibly to the individual and interpersonal challenges presented by college life. Emphasis will be placed on study skills, time management, and writing skills. The course also provides information on the functions and resources of the University that support student academic success. Special emphasis is placed on orienting the student to the special roles and responsibilities of being an educator in today's society.

IDE 400  Positive Classroom Mgt  3 cr
Emphasis is placed on ways to create a class and school environment that encourages responsible student behavior. William Glasser's concept of Reality Therapy as a process for successful teacher-student involvement is examined.

IDE 510  Educ Research and Evaluation  3 cr
Course will examine research and evaluation methodology, its application to questions in education, and the application of research findings to problems in education. The students will read and evaluate research in education.

IDE 525  Fnds Teach Eng Sec Lang  3 cr
A comprehensive survey of current research, methodology and materials in the field of English as a Second Language.

IDE 540  Found of Career Education  3 cr
The underlying philosophies behind the career education movement and various approaches to career education are discussed. Ways to increase the career options available to individuals and to facilitate more rational and valid career planning and preparation, are explored through the career education phases: career awareness, career exploration, and career preparation.

IDE 590  Sp Top  -  1 TO 3 cr
Current topics of special concern to educators. Not more than 6 hours may be earned in Special Topics courses.

IDE 594  Dir St and Research  1 TO 3 cr
Exploration of problems and issues of special interest or significance in education. Not more than 3 hours can be accepted for a degree.

IDE 597  Student Teaching  -  3 TO 6 cr
Observation and supervised teaching in selected schools with opportunity for study and discussion of problems and issues encountered. Prerequisite: Permission of advisor.

IDE 615  Assess & Eval for Leaders  3 cr
This course will focus on the assessment and evaluation skills needed by educational leaders. The course will provide students with the knowledge and skills to carry out, and utilize effectively, the evaluations of programs, organizations, personnel, and students. The course will also cover how to create, interpret, and evaluate the reliability and validity of assessments.

IDE 620  Quantitative Methods I  3 cr
Basic quantitative methods for decision making in the educational environment. Computer application of basic descriptive and inferential statistics. Pre-requisite: IDE 510 Minimum Grade of B or KIN 505 Minimum Grade of B.

IDE 621  Quantitative Methods II  3 cr
Basic research designs, with appropriate statistical analysis. The course will consider strategies needed for, but not limited to, the following: N-of-One research surveys and needs assessments; expost-facto designs, and true experimental designs. Pre-requisite: IDE 620 Minimum Grade of B.

IDE 630  Quantitative Methods III  3 cr
An extensive examination of the nature and character of experimental design in educational research. Includes the development of appropriate analytical techniques. Pre-requisite: IDE 620 Minimum Grade of B and IDE 621 Minimum Grade of B.

IDE 631  Intro Qual/Mixed Methods Res  3 cr
Introduces students to the major kinds of qualitative research and mixed methods research. Attention is given to underlying philosophies, methods of data collection, theoretical perspectives, research design, sampling, data analysis and interpretation, validity types and strategies, and writing research reports. Pre-requisite: IDE 510 Minimum Grade of B or IDE 692 Minimum Grade of B.

IDE 635  Adv Measurement and Eval  3 cr
Nature and function of measurement in instructional design and development environments. Approaches to reducing test error, including establishing validity and reliability estimates. Item analysis and discrimination. Test development for norm-based and criterion-referenced tests. Knowledge of descriptive statistics required. Pre-requisite: IDE 620 Minimum Grade of B.

IDE 640  Instructional Development  3 cr
Preparation of a modular program of instruction which incorporates all elements of the instructional-design process.

IDE 645  Adv Human Perform Improvement  3 cr
This course provides students with knowledge and skills related to human performance improvement in relation to instructional design profession. It provides an overview of foundational theories of industrial-organizational psychology, organizational behavior, and organizational development and change in relation to instructional design and performance improvement practices.

IDE 650  Instructional Techniques  3 cr
This course assists teachers in becoming more professional in instructional skills through the use of micro-teaching techniques and analysis of research in teaching.
IDE 660 Program Research and Eval 3 cr
Course strives to increase the effectiveness of instructional personnel in their use of research and evaluative techniques in instructional environments. Three major areas of focus are: the conceptualization of research and evaluative models appropriate for the population; the application of basic assessment concepts to the teaching-learning environment; and the analysis of basic applied research in evaluation.
Pre-requisite: IDE 510 Minimum Grade of B. IDE 510 can be taken concurrently with this course.

IDE 665 Inter Techniques Instr Envrnmts 3 cr
This course concentrates on developing three major areas: the examination of psychological underpinning of various communicative models and concepts; the practicing of interactional skills, such as active listening, congruent sending, and conflict resolution; the building of a communication model for the student's instructional environment.

IDE 685 Ed Simulation and Games 3 cr
Teaches the role and function of simulation and games as effective instructional and learning devices.

IDE 690 Special Topics - 1 TO 3 cr
Current topics of special concern to educators. Not more than 6 semester hours may be earned in Special Topics courses.

IDE 692 Research Project Seminar 3 cr
Survey of both current and classic research in education. Students will identify a research problem of significance in their area of specialization and develop a strategy or research design to solve this problem.
Pre-requisite: IDE 510 Minimum Grade of B.

IDE 694 Dir St and Research 1 TO 3 cr
Exploration of problems and issues of special interest or significance in education. Not more than 3 semester hours can be accepted for a degree.

IDE 696 Internship-Masters/Doctoral- 0 cr
The internship is a supervised learning experience in an actual or similar setting to that in which instructional designers or medial administrators are employed. Prerequisite: Approval of internship coordinator.

IDE 700 AU-USA Doctoral Program 1 cr
Provides an opportunity for advanced graduate students and professors to pursue cooperatively selected concepts and theoretical formulations. May be repeated as necessary.

IDE 710 Research Seminar I 1 TO 6 cr
This course provides an introduction to doctoral study in IDD. Topics include graduate student socialization, nature of scholarship and scholarly writing, epistemology, sociology of knowledge, and systems theory as a meta-theory. Admission to doctoral program is required. 3 credit hours.

IDE 711 Research Seminar II 1 cr
This course is designed to help doctoral students think about their dissertation research, understand the process of reviewing the literature, and organizing and writing a dissertation-level research proposal. Prerequisite: Approval of student's dissertation advisor. 1 credit hour per semester for 3 semesters.
Pre-requisite: IDE 710 Minimum Grade of S.

IDE 790 Sp Top - 1 TO 3 cr
Current topics of special concern to educators. Not more than 6 semester hours may be earned in Special Topics courses.

IDE 792 Research Proj Seminar 3 cr
Survey of both current and classic research in education. Students will identify a research problem of significance in their area of specialization and develop a strategy or research design to solve this problem.
Pre-requisite: IDE 510 Minimum Grade of B.

IDE 794 Dir St and Research 1 TO 3 cr
Exploration of problems and issues of special interest or significance in education. Not more than 3 hours can be accepted for a degree.

IDE 799 Research-Dissertation 1 TO 9 cr
Independent research by the student under the sponsorship of the graduate faculty. Students are required to achieve doctoral candidacy before enrolling in the course. Requires faculty advisor approval.

Interdepartmental Stds (IDL) (IDL)

IDL 560 Cancer Biology 3 cr
This course provides a comprehensive coverage of molecular and cellular aspects of carcinogenesis as well as clinical issues related to human cancer. This course will specifically cover areas of histology, pathology, epidemiology, genetics, viruses, oncogenes and tumor suppressor genes. Additionally, topics to be covered include cellular and molecular basis of chemotherapy, pharmacology of anticancer drugs, molecular and cellular basis of radiotherapy, and biological therapy of cancer and clinical trial design.

IDL 566 Topics in Cancer Biology 1 cr
Students and faculty participate in a supervised reading of current literature and meet once a week to interact in a discussion of the selected article. The goal of this course is to maintain the student's level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature.
IDL 567  Dir Studies in Cancer Biology  1 TO 6 cr  
Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project.

IDL 571  Mouse Models Biomed Research  3 cr  
This course utilizes the primary scientific literature to provide students with in-depth knowledge regarding the development and utilization of mouse models in biomedical research. Students are required to actively participate in class discussions, present scientific papers, and develop a research project that utilizes mouse models.

IDL 576  Interdisciplinary Lit Reports  1 cr  
Students and faculty participate in a supervised reading of the current literature and meet periodically (usually once a week) to interact in a discussion of the selected article or topic. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature.

IDL 577  Intro to Research Methods  3 cr  
Theoretical and practical training in basic skills utilized in basic medical science research laboratories. For students entering the first year interdisciplinary curriculum. Discussion of regulatory issues in biomedical research will be interwoven with hands-on laboratory exercises. Offered concurrently with IDL 580.

IDL 580  Fund Basic Medical Sciences I  8 cr  
First of a two-semester sequence designed for students in the first year interdisciplinary curriculum. In-depth exploration of the fundamentals of biochemistry, cell biology, and molecular biology prerequisite to advanced study of basic medical sciences. Didactic lectures will be complemented with discussions of the literature.

IDL 581  Fund Basic Medical Sciences II  8 cr  
Second of a two-semester sequence designed for students in the first year interdisciplinary curriculum. Detailed exploration of the fundamentals of microbiology and immunology, developmental biology, integrative systems physiology, and mechanisms of drug action prerequisite to advanced study of basic medical sciences. Didactic lectures will be complemented with discussions of the literature. Pre-requisite: IDL 580 Minimum Grade of C.

IDL 590  Sp Top -  1 TO 3 cr  
In-depth tutorial exposure to interdisciplinary topics in Basic Medical Sciences.

IDL 594  Interdisciplinary Dir Studies  1 TO 6 cr  
Directed research study under the direction of a member of the graduate faculty. This course should be taken by students who have not yet identified a major professor in Basic Medical Sciences.

IDL 595  Distinguished Scientist Sem  0 cr  
A seminar course in which outside speakers are brought in to discuss their research. Students will attend the seminar and have an opportunity to meet informally with the speaker. Attendance will be required, and the material will be testable during each student's qualifying exam.

IDL 620  Biomedical Engineering I  4 cr  
Fundamental concepts of medical instrumentation, biomedical imaging and biological systems modeling as used in biomedical engineering. Course is cross-listed with EG 620.

IDL 621  Biomedical Engineering II  4 cr  
Fundamental concepts of transport phenomena, cellular and tissue mechanics, and materials as used in biomedical engineering. Course is cross-listed with EG 621.

IDL 630  Lung Biology  4 cr  
This course introduces an advanced level of lung physiology. An understanding of fundamental lung development, anatomy, and cell and organ physiology is emphasized. The course consists of lectures and written assignments and essay exams. Reading assignments are from the primary literature. Pre-requisite: IDL 580 Minimum Grade of C and IDL 581 Minimum Grade of C.

IDL 631  Lung Pathobiology  4 cr  
This course introduces an advanced level of lung physiology. An understanding of fundamental lung development, anatomy, and cell and organ physiology is emphasized. The course consists of lectures and written assignments and essay exams. Reading assignments are from the primary literature. Pre-requisite: IDL 630 Minimum Grade of C.

IDL 635  Advanced Signal Transduction  4 cr  
This course builds on signal transduction topics discussed in the Fundamentals course (IDL 580, 581). The mechanisms of more generalized signaling pathways (e.g., G-protein coupled pathways) to specific signaling pathways (e.g., TGF/BMP family) will be discussed. Signal transduction pathways will be examined using classic literature references, from the molecular details of pathway components to the effects on the organ-system. The course consists of lectures, student presentations, and essay/problem solving examinations. Pre-requisite: IDL 580 Minimum Grade of C and IDL 581 Minimum Grade of C.
IDL 640  Stat Exp Design in Biomed Res  2 cr
This course covers statistical analysis, logic and hypothesis-driven experimental design in biomedical research, utilizing a combination of lectures, weekly practical data sets or written assignments, and student presentation.

IDL 641  Effective Scientific Writing  1 cr
This course provides strategies to improve communication skills via construction of logical scientific arguments and effective writing. Course format will include lecture/discussion, in class practical exercises, and writing assignments. In addition, participants will be introduced to the Turnitin software, reference databases, and other electronic resources useful in preparation of proposals and manuscripts.
Pre-requisite: IDL 580 Minimum Grade of C and IDL 581 Minimum Grade of C.

IDL 645  Res Prog Smth Musc/Vasc Blgy  1 cr
Students meet on alternate weeks for 2 hr with faculty and other research professionals to discuss on-going research projects in the field of smooth muscle and vascular biology. Signal transduction pathways, pathophysiological mechanisms in vascular disorders associated with smooth muscle, and other topics of interest will be discussed. Emphasis will be on up-to-date research results from laboratories as well as newly published literature findings. Students will be expected to present the results of their own laboratory research at least once a year to the group.

IDL 650  Topics in Lung Biology  1 cr
In-depth exposure to selected topics in lung biology or pathobiology. Course may be repeated for credit when course content varies.
Pre-requisite: IDL 630 Minimum Grade of B and IDL 631 Minimum Grade of B.

IDL 656  Research Sem Lung Biology  1 cr
Students and faculty present a research topic for discussion before members of the Center for Lung Biology. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

IDL 667  Cancer Biology Research Sem  1 cr
Students and faculty present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

IDL 676  Literature Report Lung Biology  1 cr
Students and faculty participate in a supervised reading of the current literature and meet once a week to discuss the selected article or topic and its relation to ongoing research. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature of lung biology.

IDL 799  Research-Dissertation  1 TO 6 cr
Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Prerequisite: Approved formal research proposal

Interdisciplinary Progs (IDS) (IDS)

IDS 290  Special Topics  1 TO 3 cr
A study of selected topics of an interdisciplinary nature. May be repeated for credit when content varies. Requires permission of instructor.

IDS 490  Special Topics  1 TO 3 cr
Advanced study of selected topics of an interdisciplinary nature. May be repeated for credit when content varies. Requires permission of instructor.

IDS 590  Sp Top  1 TO 9 cr
Specialized topics not generally listed in the course offerings. Requires consent of Graduate Director.

Interdisciplinary Stdts (IST) (IST)

IST 100  Freshman Seminar  2 cr
A course for first-time students that assists with maximizing the student's potential to achieve academic success and to adjust responsibly to the individual and interpersonal challenges presented by college life. The course provides an introduction to the nature of higher education and a general orientation to the functions and resources of the University. Extensive reading and writing assignments relevant to the student's first year experience are required.

IST 101  Foundations of Inter Studies  3 cr
This course will assist students with clarifying educational goals, understanding effective learning methods, and becoming acquainted with university resources, diversity, and culture. It introduces students to basic theories and principles of education and development, with emphasis on liberal education. The focus is to develop written and oral skills to enhance students' critical thinking and problem solving abilities. Assists students in defining competencies needed for success in academic study, professional leadership, and career opportunities. Students will develop a working knowledge of Sakai, Skype and WebEx.

IST 125  Professional Conduct  3 cr
Introduces students to primary sources in ethical theory and includes readings and discussions of theories of human nature. Provides a basis for understanding one's rationale for personal moral decisions and offers a foundation for an approach to the ethics of business.
IST 200  Clinical Observation  1 cr
Clinical Observations (Medicine, Dentistry, Optometry, and Veterinary Medicine). This course gives the student clinical exposure to various health-care services. It is designed to help students make informed decisions when selecting a career in the health professions. A written report on the clinical experience or a scenario dealing with medical ethics is required. May be repeated for a maximum of six hours credit. Prereq: Permission of Chair of Preprofessional Advisory Committee.

IST 201  Seasons of Life  3 cr
An interdisciplinary media-assisted course in which students study human development from the biosocial, cognitive, and psychosocial perspectives with special emphasis on the adult years. Through readings, audio, written exercises, and class discussions, students explore the theories and research findings of life span development which enable them to reflect on their own lives as well as the lives of others.

IST 210  Introduction to Disability  3 cr
This course will provide students from any discipline the opportunity to develop the knowledge and skills needed to effectively work with people with disabilities in a variety of settings. Disability is examined as a type of diversity. Topics include: the history and sociological context of disability; the impact of disability on the individual and family; advocacy and civil rights; current trends in services and supports for children and adults with disabilities; and respectful language and interaction. Students will actively engage in readings, discussions, and writing on disability issues. Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C.

IST 250  Career Planning and Develop  3 cr
Principles, methods, and practice in career planning and development with an emphasis on career information, self-analysis, exploration of careers, career opportunities, and guidelines for goal achievement.

IST 290  Special Topics -  1 TO 3 cr
A variable topics course treating special themes. May be repeated for credit when course content varies.

IST 300  Global Orientn-Ed Abroad  1 cr
Study Abroad applicants will prepare for their study abroad experience through an examination of selected country-specific reading as well as cross-cultural orientation materials. Travel safety, University of South Alabama policies and procedures for study abroad, and advice for cultural adjustment will be covered during the course. IST 300 satisfies the requirements of LG 394.

IST 302  Interdis and Critical Thinking  3 cr
Provides students an introduction to the field of interdisciplinary studies and an opportunity to critically reflect on the experience of self, education, and career and the relationship among these three phenomena.

IST 305  Issues in Human Services  3 cr
An interdisciplinary course for students who plan to work in the helping professions (counseling, social work, nursing etc.). Guest speakers from various disciplines present information about their fields. Discussion topics include: similarities and differences in the helping professions, the helping relationship, empathic communication, multicultural and legal issues, and stress and burnout management.

IST 310  Global Leadership  3 cr
This course helps prepare students to assume global leadership roles in their careers and the community at large. Students explore leadership theories and principles as well as investigate leadership qualities among historical and contemporary individuals. In addition, students confront present-day global issues and argue viewpoints orally, as well as through persuasive and technical papers. Students are expected to complete an interdisciplinary project based on global issues.
Pre-requisite: (ACT English 27 or SAT Critical Reading 610 or University - EH101 Exempt P or EH 101 Minimum Grade of C or EH 110 Minimum Grade of C or EH 190 Minimum Grade of C or USA 010 Minimum Grade of S) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

IST 315  Women’s Issues in Wrkpl-Comm  3 cr
This course will examine contemporary issues faced by women in the workplace and the community from an interdisciplinary perspective. Some of the topics to be covered are gender communication issues, developing a leadership plan, playing the game, power talk, conflict management from a woman’s point of view, international development, and women, sexuality and labor.

IST 320  Cultural Competency  3 cr
An interdisciplinary exploration of issues related to interactions between diverse groups in teams, communities, and organizations. Reviews research from a variety of disciplines, introduces the history and law of equal opportunity in the U.S., and examines the costs and benefits of diversity. Topics include prejudice, stereotyping, affirmative action, barriers to mobility, discrimination, marginalization, mentoring, cooperative teamwork, and international issues.

IST 330  Analytical & Info Lit.-W  3 cr
This course examines principles of qualitative and quantitative research methods and their application to interdisciplinary studies in the social sciences. Emphasis is on the development of functional literacy for information expressed quantitatively and thoughtful integration of such information into academic and practical research. Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C.

IST 350  Adv Verbal & Written Comm - W  3 cr
This course builds on the foundation laid in freshman composition, stressing critical thinking, analysis, and research. It aims to prepare students oral presentations, research and writing papers.

**IST 401 Adults in Society**
Adults in Society is a media-assisted course that uses print material, videos, written assignments, and class discussions to explore issues which relate to adult development. Using an interdisciplinary approach, students will examine the relationship of adults to their families, work and communities.

**IST 420 Comm. Dev and Leadership**
Prepares the conceptual foundations of community development and leadership, including basic concepts, methods, and literature. Students will study theories of leadership, community development and human capital, investigate public relationships, examine community decision-making and responsible civic action. The course lays foundations for further study and practice in the field. Students will experience the interdisciplinary approaches to community development, leadership, politics, civic responsibility and teamwork.

**IST 425 Workplace Learning & Dev**
This project-based course explores workplace learning and development. It will introduce students to interdisciplinary learning and motivational theories necessary to prepare them to be effective in today's changing workplace, and provide them with the skills to problem-solve, lead and work as part of a team.

**IST 430 Senior Research Thesis - W**
An in-depth research project in the student's concentration. Provides an opportunity for the student to design a comprehensive research project, analyze and synthesize research data, and develop expertise in a particular subject. Pre-requisite: (IST 350 Minimum Grade of D and IST 495 Minimum Grade of D).

**IST 450 The Job Campaign**
Practical approach to career development designed to help students develop strategies for obtaining suitable employment and making career choices. Emphasis is on the principles, methods, and practice in achieving career goals through the study of careers, preparing resumes, writing letters of application, practicing job interview techniques, and identifying prospective employers.

**IST 490 Special Topics -**
A variable topics course treating special themes. May be repeated for credit when course content varies.

**IST 494 Directed Studies**
Directed Study of a topic consistent with the student's individualized program under the supervision of a member of the university faculty.

**IST 495 Prof Leadership & Teamwork**
Students will examine their skills, abilities, personality, attitudes, values, interests, and behaviors within the context of current scholarship on leadership to increase awareness of their leadership competencies.

**IST 498 Internship I-Capstone Exp-W**
This internship course provides the student an opportunity to have an internship filed experience and to reflect on and critically evaluate that internship experience, particularly as it relates to the interdisciplinary course of study. Students will prepare reports, write papers, make presentations, and engage in group discussion that critically considers their internship experience. Pre-requisite: (IST 350 Minimum Grade of D and IST 495 Minimum Grade of D).

**IST 499 Honors Senior Thesis - H-W**
A substantial research project reflecting a commitment to genuine scholarship in the student's field of study. Provides an opportunity for the student to design a comprehensive research project, analyze and synthesize research data, and develop expertise in a particular subject. Fulfills the senior project requirement for the honors program.

**IST 500 Global Orientn-Ed Abroad-Grad**
This is a pre-departure academic and orientation process course for all graduate students who plan on studying abroad in terms following their participating in this course. This course will facilitate the application, academic advising, pre-departure advising, and activities related to getting students ready for participation in their actual program abroad.

**IS 100 Global Issues**
This course introduces students to the basic structural components of the global system, including the nation-state system and the world economy, and explores the major schools of thought in such areas as security, economic prosperity and development, international law, gender and environmental studies. The course helps students understand the complex and interlinked issues facing global society, and current problems, and view the U.S. within a broader global context.

**IS 193 Study Abroad**
This course is an introductory International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

**IS 200 People-Nations -**
Variable content course focusing on particular nation or region of the world. Course offers a multi-disciplinary introduction to the people, society and politics. May be repeated for credit when content varies up to a total of 6 hours.

**IS 210 Global Engagement Orientation**
This course introduces students to international global issues, allows students to identify opportunities for active engagement in these issues, and provides the framework for successful completion of the Global Engagement Certificate.
IS 290 Special Topics - 3 cr
Study of selected topics within a particular Area Studies Concentration. May be repeated for credit when content varies.
Pre-requisite: IS 100 Minimum Grade of D.

IS 293 Study Abroad 1 TO 6 cr
This course is an introductory International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

IS 363 Crime and Politics in LatinAm 3 cr
An examination of the violent crime epidemic affecting many parts of Latin America, with specific focus on the themes of democratic transition, political economy, and foreign relations with the United States. Same as PSC 363 and CJ 363.
Pre-requisite: (PSC 130 or CJ 105 or IS 100 ).

IS 371 Studies in Russia 3 TO 6 cr
This course will cover specific topics in the history, politics, and culture of modern Russian civilization. May be repeated for credit when content varies.

IS 372 Studies in E. Europe & C. Asia 3 TO 6 cr
This course will cover specific topics in the history, politics, and culture of modern Eastern European and Central Asian civilizations. May be repeated for credit when content varies.

IS 390 Sp Top- 1 TO 3 cr
Advanced study of selected topics within a particular concentration. May be repeated for credit when content varies.

IS 391 Study Abroad - 0 TO 18 cr
Study of selected topics within a particular Area Studies Concentration. May be repeated.

IS 393 Study Abroad 1 TO 6 cr
This course is an advanced International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

IS 410 Global Engagement Capstone 1 cr
Global Engagement Capstone is required for students completing the Global Engagement Certificate (GEC), and is a one hour course designed to help students reflect on the 16 hours of coursework and nine hours of globally engaged activities they have completed. Students will create a portfolio during the course, which will be presented to students and affiliated faculty at its conclusion.
Pre-requisite: IS 210 Minimum Grade of P.

IS 473 International Law 3 cr
This course covers major issues, cases and topics in public and private international law. Course coverage includes individuals and corporations, diplomatic relations, jurisdiction, human rights, economic relations, treaties, environmental law, and more.
Pre-requisite: (IS 100 Minimum Grade of C or PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C).

IS 489 Leadership and World Leaders 3 cr
An overview of the definitions, characteristics, and typologies of leadership, with a focus on lives and legacies of global influential political leaders over the past century.
Pre-requisite: PSC 130 Minimum Grade of D or PSC 250 Minimum Grade of D or IS 100 Minimum Grade of D.

IS 490 Special Topics 3 cr
Advanced study of selected topics within a particular Area Studies Concentration. May be repeated for credit when content varies.
Pre-requisite: IS 100 Minimum Grade of D.

IS 491 Seminar on Terrorism 3 cr
Study of a terrorism from a sociopolitical perspective with an emphasis on causes, policy, tactics and operational characteristics and counter-terrorism operations. Cross-listed with CJ 491 and PSC 491.
Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C.

IS 492 Seminar - 3 cr
Advanced study of selected topics in international studies from a comparative perspective. May be repeated for credit when content varies.
Pre-requisite: IS 100 Minimum Grade of D.

IS 493 Study Abroad 1 TO 6 cr
This course is an advanced International Studies course taught as part of a faculty-led study abroad program. Topics and credit hours vary based on availability.

IS 494 Directed Studies 1 TO 3 cr
Directed research in the field of international studies. May be repeated or credit up to a total of 9 hours. Prerequisite: permission of IS Director

IS 495 Senior Seminar - W 3 cr
The course seeks to provide an interdisciplinary and cross-regional overview of the fields and research opportunities within international studies.
Pre-requisite: EH 102 Minimum Grade of C.

IS 496 Prof St Internship - 3 TO 9 cr
Practical learning experiences through occupational or professional work with an approved international organization, governmental agency, or international business Prerequisite: Permission of IS Director
IS 499  Senior Honors Thesis     3 cr
The course covers major theoretical perspectives in organizational psychology based on empirical research and case studies. Students will explore learning theory, group dynamics, and change in different types of learning organizations. Pre-requisite: (EH 102 Minimum Grade of D or EH 105 Minimum Grade of D).

IS 591  Study Abroad     0 TO 12 cr
Graduate level international exchange programs for University of South Alabama students.

Jewish & Holocaust Stdts (JHS) (JHS)

JHS 101  Intro to Jewish Studies     3 cr
This course is a requirement for all Jewish & Holocaust Studies minors and will introduce students to methods, questions, and concerns within these fields. Students will be provided with an overview of Jewish history as well as how Jewish history first came to be an historical field of inquiry. Students will also be given an overview of the Holocaust, other genocides, and genocidal violence. Students will then be introduced to various approaches in Jewish and Holocaust Studies. This course will help students formulate ideas for research topics related to the class and will show them how and why a Jewish & Holocaust Studies minor may be able to help them in future endeavors.

JHS 390  Special Topics - 3 TO 9 cr
Special topics and their development, illustration appropriate methodologies in Jewish studies. May be repeated twice for credit when content varies for a maximum of nine hours.

JHS 494  Directed Studies     1 TO 3 cr
Directed Individual Study. Requires approval of department chair.

Kinesiology (KIN) (KIN)

KIN 100  Concepts of Health and Fitness    3 cr
An introductory course designed to show students to contributions of physical activity, nutrition, weight control, stress control, environmental conditions, and injury prevention to preventive health. Students learn how to evaluate themselves, their physical and nutritional needs and how to design individual programs for healthy living.

KIN 166  Movement-Rhythms and Dev Act     3 cr
Movement exploration experiences, developmental games, rhythmic and dance activities are explained, developed and practiced. Clinical or field experience required.

KIN 201  Orientation to Kinesiology      3 cr
An overview of the field of Health, Physical Education, and Exercise Science. An introduction to the Department of KHS followed by survey of philosophical and historical aspects, and professional preparations standards of the specific fields.

KIN 231  ARC Lifeguard Training     3 cr
Prepares the student for American Red Cross Lifeguard, CPR for the professional rescuer, and first aid certification. Emphasis is placed on emergency action plans, lifeguarding techniques and all forms of victim rescue. Prerequisites: Strong swimmers ONLY.

KIN 278  Sport and Human Behavior     3 cr
A study of the psychological and sociological aspects of sport and the relationship to human behavior.

KIN 282  Intro to Athletic Training 3 cr
Survey of the basic techniques and practices of athletics training. Study includes prevention, recognition, care, and treatment of athletic injuries. Development of basic athletic training skills in the use of preventive and protective techniques of adhesive tape applications.

KIN 351  Sports Skills     3 cr
The development of skills and the understanding of fundamentals and strategies in selected individual, dual, and team sports. Field experiences required. Proof of background check, fingerprinting and liability insurance is required. PE (P-12) majors only. Instructor permission is required.

KIN 370  Basic Motor Learning     3 cr
Study of the psychological, experimental, and social aspects of learning in the psychomotor domain.

KIN 372  Coaching Gymnastics     3 cr
History, theory, and fundamentals of coaching and officiating gymnastics.

KIN 373  Coaching Volleyball     3 cr
History, theory, and fundamentals of coaching and officiating volleyball.

KIN 374  Coaching Soccer     3 cr
History, theory, and fundamentals of coaching and officiating soccer.

KIN 375  Coaching Football     3 cr
History, theory, and fundamentals of coaching and officiating football.

KIN 376  Coaching Basketball     3 cr
History, theory, and fundamentals of coaching and officiating basketball.

KIN 377  Coaching Baseball     3 cr
History, theory, and fundamentals of coaching and officiating baseball.

<tr>
<td>KIN 477</td>
<td>Water Safety Instructor</td>
<td>3 cr</td>
<td>Trains prospective candidates for American Red Cross Water Safety Instructor certification. Candidates will learn how to teach all levels of swimming and basic diving to students of all ages. How to organize classes, use lesson plans and practice teaching skills. Pre-requisite: Proficient swimmer in all seven strokes. See Instructor for specific skill requirements.</td>
</tr>
<tr>
<td>KIN 478</td>
<td>Coaching Theory</td>
<td>3 cr</td>
<td>Introduction to profession of coaching. Topics include: physical, mental and organizational preparation, teaching strategies (individual and team aspects), legal liability, officiating, and national guidelines.</td>
</tr>
<tr>
<td>KIN 479</td>
<td>Fit Assess-Exercise Prescript</td>
<td>3 cr</td>
<td>Through didactic study and laboratory participation, the student will develop to knowledge base and clinical skills to assess physical fitness and plan exercise prescriptions for apparently healthy individuals. Pre-requisite: KIN 476 Minimum Grade of D or PE 476 Minimum Grade of D.</td>
</tr>
</tbody>
</table>
KIN 480  Therapeutic Exercise  3 cr  
Theory, current research, principles, application and techniques of rehabilitation used to treat injuries to athletes and the physically active across the life span are studied. Psychological and physical parameters of rehabilitation and exercise conditioning are presented.

KIN 482  Advanced Athletic Training  3 cr  
Advanced and contemporary topics, issues, and applications in athletic training. Admission to candidacy required. 
Pre-requisite: KIN 380 Minimum Grade of D.

KIN 484  Apps in Sports Conditioning  3 cr  
Through didactic study and physical activity participation, the student will develop the knowledge base and skills in fundamental and advanced exercise theory and techniques in sport and fitness conditioning with application to program design and periodization of training.  
Pre-requisite: KIN 474 Minimum Grade of D or PE 474 Minimum Grade of D.

KIN 486  Advanced Exercise Physiology  3 cr  
Detailed analysis of the underlying principles of the physiological and biochemical responses of the human body to exercise and adaptations to exercise training.  
Pre-requisite: PE 476 Minimum Grade of C or KIN 476 Minimum Grade of D.

KIN 490  Special Topics  3 cr  
A varying content course treating different aspects of health, kinesiology, and sport. May be repeated for credit when courses content varies.

KIN 494  Directed Studies  1 TO 3 cr  
Directed research and/or project. No more than two directed studies can be counted towards the bachelor's degree, HKS advisor approval required.

KIN 495  Internship  1 TO 12 cr  
Observation and supervised practicum experiences in a professional setting. May be repeated for credit not to exceed 12 hours. HKS advisor approval required.

KIN 499  Senior Honors Thesis-H  3 TO 6 cr  
Experiences in planning, conducting, and reporting a research project relevant to the fields of Health, Kinesiology, and Sport. The project, mentored by HKS faculty, is required for Honors recognition and may be repeated for up to six credit hours. Prerequisites: Participant in Honors Program and approval of Department and Project Chairs required.

KIN 500  Admin of Hlth & Phys Ed & Sprt  3 cr  
A study of the principles, techniques, and methods used in management and supervision of health and physical education and sport in schools and colleges.

KIN 503  Evaluation of Teach and Learn  3 cr  
Measurement and evaluation of student progress and teaching effectiveness in the psychomotor domain.

KIN 505  Research Methods - HKS  3 cr  
This course provides opportunities for critical interdisciplinary evaluation of current research trends and controversies, research methodology and evaluation with emphasis on the elements of the research process, and the examination of landmark research studies in the fields of Health, Kinesiology, and Sport.

KIN 506  Physical Education Curriculum  3 cr  
An overview of the physical education curriculum, its foundations, critical issues, and modern trends. It explores curriculum content areas of scheduling administration, teaching methods, and various standards and procedures for evaluation.

KIN 516  Exercise Physiology  3 cr  
Advanced study of the theories, current research, and under-lying principles of the physiological responses and adaptations of the human body to exercise and training.

KIN 521  Motor Learning  3 cr  
Theories and applications of the foundations of learning motor skills and presented.

KIN 530  Seminar in Health and Phys Ed  3 cr  
Professional growth through in-depth experiences in the presentation of problems and formal papers, with emphasis on guided discussions and research criticism.

KIN 540  Cardiovas Resps Adapt Excerc  3 cr  
Concentrated study of cardiovascular and respiratory systems including their structure, regulation, and integration with emphasis on physiological responses and adaptations to exercise and training, optimization of performance, overtraining and environmental influences, and aerobic exercise program design.

KIN 550  Perceptual-Motor Dev Children  3 cr  
Designed to give the classroom teacher, special educator and physical educator a background in perceptual-motor development and training in infants and children.

KIN 560  Biochemical and Molecular Exer  3 cr  
This graduate level course is designed to provide study of the oxidative and non-oxidative pathways which provide energy during acute exercise within skeletal muscle. Emphasis will be placed on how these biochemical pathways utilize major fuel molecules (fat, carbohydrate, protein) to produce energy for work; how these pathways adapt to exercise training; and how the pathways are affected by exercise intensity, duration, and feeding state. The course will also include topics regarding lactate formation and utilization, whole-body metabolism, lipolysis within adipose cells, and blood glucose maintenance. Further, an overview of molecular biology concepts of gene transcription and protein synthesis in relation to exercise adaptation will be integrated into the course.

LTE 647  Instructional Coaching  3 cr
A purpose of this course is to prepare professional educators through teaching, research, and service to become committed to life-long learning and to facilitate the process of building better communities. Students will demonstrate best educational practices and professional dispositions and will learn how to create a positive, motivational learning environment in schools while recognizing, appreciating, and including diverse learners and perspectives. Additionally, students are expected to demonstrate satisfactory skills in curriculum leadership; to engage in action research related to schools; to engage in literacy coaching; to address current family, community, regional, and national issues related to scholastic achievement, and to use tenets of instructional leadership to guide teachers and other professionals toward improving student achievement.

LTE 699  Research Project  1 TO 3 cr
The Research Project, as the culminating experience in the Instructional Specialist Program, provides the candidate an opportunity to synthesize and apply program components and a timely topic in the field.
Pre-requisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B.

Management (MGT) (MGT)

MGT 300  Management Theory and Practice  3 cr
Theories of organizational structures, practices, and behavior, and the effective management of organizations. Emphasis on developing patterns and strategies of organizational management in a dynamic environment as affected by the interaction of material and human resources using the technique of applied social and management sciences.

MGT 305  Organizational Comm - W  3 cr
A study of written and oral communication of organizations. Emphasis is given to communication theory, including organization flows and barriers to organizational communication. The preparation of neutral, negative, and persuasive written messages as well as formal written reports is covered in depth. In addition, oral presentations and employment interviews are discussed.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

MGT 306  Organizational Comm Non Bus  3 cr
A study of written and oral communication in organizations. Emphasis is given to communication theory, including organization flows and barriers to organizational communication. The preparation of neutral, negative, and persuasive written messages as well as formal written reports is covered in depth. In addition, oral presentations and employment interviews are discussed. For non-business majors.
Pre-requisite: EH 102 Minimum Grade of C or EH 105 Minimum Grade of C.

MGT 311  Legal Environ of Bus II  3 cr
An advanced treatment of the law of agency, commercial transactions, business organizations, property, negotiable instruments, secured transactions, professional liability, debtor-creditor relations, including applicable sections of Uniform Commercial Code.
Pre-requisite: BUS 265 Minimum Grade of D or (MGT 310 Minimum Grade of D or BMS 422 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D).

MGT 325  Operations Management  3 cr
Addresses concepts, problems, and managerial approaches applicable to the management of manufacturing and service operations. The course will examine the strategic and tactical considerations that are involved in creating a systematic framework that supports the creation of competitive advantages through effective operations and the production of high quality products. Topics covered include the role of operations in the overall organization, operations strategy development and implementation, product design and process selection, location and capacity planning, facilities layout, quality management, inventory management, production planning, scheduling and control, and project management. An important component of the overall course is the incorporation of computer applications for problem solving and decision making in operations.
Pre-requisite: (MGT 300 Minimum Grade of D or BMS 322 Minimum Grade of D or MGT 322 Minimum Grade of D) and (BUS 255 Minimum Grade of D or BMS 250 Minimum Grade of D or BMS 255 Minimum Grade of D or BMS 300 Minimum Grade of D or ST 275 Minimum Grade of D).

MGT 333  International Mgt  3 cr
This course exposes students to the challenges that confront the managers of organizations & individuals in global settings. Special focus is on dealing with and benefitting from the diversity that exists across international cultures, markets, economics, governments, and organizations.
Pre-requisite: MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D.

MGT 340  Organizational Behavior - W  3 cr
A study of human and group behavior in the workplace and within society. The focus is on individual characteristics and processes such as personality, perception, and motivation; interpersonal processes such as group behavior, leadership, communication, and decision making; and organizational processes such as culture, structure, power, and change. Requires Junior Standing.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (MGT 300 Minimum Grade of D or BMS 322 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D).
MGT 341 Organizational Behavior 3 cr
This course provides a basic survey of the field of Organizational Behavior. Our objective is to cover important topics such as job attitudes, work motivation, group dynamics, leadership and organizational culture. For non-business majors.
Pre-requisite: (MGT 300 Minimum Grade of D or MGT 305 Minimum Grade of D or MGT 306 Minimum Grade of D).

MGT 345 Creativity and Innovation 3 cr
This course provides a broad framework for understanding the nature of entrepreneurship in multiple organizational settings. The course introduces students to the innovation and idea generation process and helps students determine the most desirable educational path for them to achieve their career goals. Sophomore standing.

MGT 347 Franchising 3 cr
This course is designed for students who are interested in learning about the opportunities and threats that abound in the modern world of franchising. Students will study existing franchising from both a historical and theoretical context. The logic of this course is that franchising is one of the development models that minimize risk for the "small business" focused student. Some franchising oriented people may want to start a franchise and grow it rapidly. This option is often a first step into business ownership for inexperienced owners. We discuss the applicability, opportunities, challenges, and implementation of the franchising model for expanding existing businesses. The format consists of case study and lecture discussion sequenced with extensive background readings, occasional guest lecturers, and a term case-based project culminating in a transactional plan.

MGT 351 Human Resource Management 3 cr
Principles, policies, and practices used to develop a sound human resource management program in the business organization. Among the topics included are job analysis, employment, organization development, employee development and evaluation, wage and salary administration and labor relations.
Pre-requisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D).

MGT 355 Leg & Fin Aspects of Entrepren 3 cr
This course provides an overview of the legal and financial issues most frequently encountered by entrepreneurs and others involved in start-ups and small closely held, or family businesses. The course covers various aspects of financing and entrepreneurial venture. Major topics attracting seed and growth capital from sources such as venture capital, investment banking, government, and commercial banks; creating, protecting and leveraging intellectual property. Among the issues discussed are valuing a company, going public, selling out, acquisitions, bankruptcy, different legal forms or organizations, partnerships, and taxes.

MGT 356 Strategic Issues in Family Bus 3 cr
This course examines a new discipline that has developed in the last ten years and focuses on the unique aspects of family businesses. Organizational behavior, law, finance, operations, and basic small business concepts are being integrated into this course. Students will have an opportunity to consult with and develop transition plans for a family firm in a live field project.

MGT 357 Leadership 3 cr
This course includes a review of traditional as well as current thinking in Leadership theory. Students will complete several self-assessment exercises designed to assess one's leadership style and ability as a leader. A series of successful leaders will be studied in-depth. Prerequisite: Junior or senior standing.

MGT 390 Total Quality Management 3 cr
Total Quality Management (TQM) is a management philosophy which emphasizes customer focus, continuous improvement, and employee involvement throughout the organization. This course is an introductory course which examines these components and their integration into a comprehensive quality management system.
Pre-requisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D or BMS 384 Minimum Grade of D).

MGT 430 Operations Research 3 cr
Reviews selected operations research concepts: nonlinear optimization methods, linear programming; dynamic programming; model building; and simulation methods. The student is expected to understand the concepts of operations research and to be able to use computer procedure to solve problems.
Pre-requisite: MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D or BMS 384 Minimum Grade of D.

MGT 441 Service Operations 3 cr
This course will provide students the opportunity to learn about service operations management, including service strategies and operations considerations and imperatives for service enterprises and how service systems are structured and operated. Students will also learn about various tools and techniques for managing service operations such as how to forecast service demand, determine capacity requirements, schedule activities, coordinate operations, plan and schedule service activities, and evaluate system performance.
Pre-requisite: (MGT 325 Minimum Grade of D or BMS 384 Minimum Grade of D or MGT 396 Minimum Grade of D).
MGT 450 Organizational Staffing  3 cr
A detailed study of the function of employee staffing in a modern work organization. Emphasis on job analysis, criterion development, development and use of employment tests, validation of selection techniques, and statistical methods for making fair employment decisions. Course work includes a comprehensive staffing project.
Pre-requisite: MGT 351 Minimum Grade of D and (BUS 245 Minimum Grade of D or ST 175 Minimum Grade of D or BMS 245 Minimum Grade of D or BMS 250 Minimum Grade of D or ST 210 Minimum Grade of D).

MGT 451 Employee Training -Development  3 cr
An applied course which details the training and development function. Content areas of job analysis, training needs analysis, training program development and implementation, and program evaluation will be incorporated in a comprehensive training and development project.
Pre-requisite: MGT 340 Minimum Grade of D and MGT 351 Minimum Grade of D.

MGT 452 Employment Law  3 cr
Analysis of significant workplace torts and laws regulating the employment relationship including: Title VII, FMLA, AOA, ADEA, FLSA, OSHA and related state laws. Emphasis on federal legislation and developing case law.
Pre-requisite: MGT 351 Minimum Grade of D and (BUS 265 Minimum Grade of D or MGT 310 Minimum Grade of D or MGT 332 Minimum Grade of D or MGT 422 Minimum Grade of D or BMS 422 Minimum Grade of D).

MGT 454 Compensation Administration  3 cr
A study of the fundamentals of compensation administration in organizations. Topics include job analysis, KSA determination, job evaluation, wage structure development, incentive pay systems, legal aspects of compensation and new developments in compensation. Comprehensive course project required.
Pre-requisite: MGT 351 Minimum Grade of D.

MGT 455 Labor - Management Relations  3 cr
An examination of the organizing, negotiation, and contract administration phases of union-management relations. Case analyses, federal legislation and case law in labor relations, significant current issues, and a collective bargaining simulation are featured.
Pre-requisite: MGT 351 Minimum Grade of D.

MGT 460 Organiz Development and Change  3 cr
Provides insight into the theory and practice of organization change and development. It bridges the gap between theory and practice and emphasizes the process of improving both organizations and individuals. Topics covered encompass understanding organizations and how they change, intervention strategies and methods for improving organizations, quality of work-life approaches and strategic considerations in system-wide change.
Pre-requisite: MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D.

MGT 462 Negotiatn/Disp Resolutn in Bus  3 cr
This course provides theoretical background and practical applications in business negotiation, conflict management, and alternative dispute resolution. Areas covered include positional and interest-based bargaining, business and employment arbitration, organizational conflict management strategies, mediation, and effective communications for negotiators and ADR participants.
Pre-requisite: (MGT 300 Minimum Grade of D or BMS 322 Minimum Grade of D or MGT 322 Minimum Grade of D).

MGT 465 New Venture Creation  3 cr
How new businesses are organized and planned. Objectives are 1) understanding the knowledge, skills and abilities required of entrepreneurs, 2) creating and developing opportunities for new ventures, and 3) planning resources to convert those opportunities into businesses. Students work in teams to develop a business plan for a new venture they have chosen.
Pre-requisite: MGT 345 Minimum Grade of C or MGT 355 Minimum Grade of C.

MGT 470 High Performance Organizations  3 cr
Course examines the role of organization culture, leadership, employee involvement, work teams, and human resource practices in developing and sustaining high performance organizations that practice the principles of total quality management. Senior Standing.
Pre-requisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D or BMS 322 Minimum Grade of D).

MGT 475 Strategic HRM  3 cr
This is a capstone course in human resource management that reviews essential human resource management topics to prepare students for the SHRM Assurance of Learning Exam. Topics covered include strategic HR, ethics, recruiting and selection, employee and organizational development, performance management, employment law, compensation administration, workplace safety, employee relations, labor relations, and general management topics including motivation, individual differences, organizational culture, and leadership. In addition, the course covers state of the art issues in human resource management, which are new and not well developed in existing texts.
Pre-requisite: MGT 351 Minimum Grade of D and (MGT 340 Minimum Grade of D or MGT 320 Minimum Grade of D).

MGT 483 Social Entrepreneurship  3 cr
The course provides a broad theoretical perspective and practical framework for understanding social entrepreneurs and the social ventures they create ranging from local social organizations to large international social ventures leading global change. The course introduces students to the possibilities of social entrepreneurship and an introduction to the entire social venture creation process and life cycle. This course is a service-learning based and all students will participate in term-based community-based projects with local non-profit organizations. Extensive work outside of the normal classroom hours is required for this course.
MGT 485  Bus Policy in Global Eco - W  3 cr
The culmination course in business and management education. Interdisciplinary and global in nature, the course uses the case method to develop a top management perspective in which all business disciplines are integrated into the organization's effective total functioning.
Prerequisites: Juniors who have completed all core courses, have petitioned for graduation and are beginning the final semester.
Co-requisite: MGT 486
Pre-requisite: (BUS 305 Minimum Grade of D or MGT 350 Minimum Grade of D or MGT 395 Minimum Grade of D or ECO 453 Minimum Grade of D) and (FIN 315 Minimum Grade of D or BMS 341 Minimum Grade of D or FIN 414 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 324 Minimum Grade of D) and (MGT 310 Minimum Grade of D or BUS 265 Minimum Grade of D or BUS 322 Minimum Grade of D) and (MGT 422 Minimum Grade of D or BMS 422 Minimum Grade of D) and (MGT 325 Minimum Grade of D or MGT 396 Minimum Grade of D or BMS 384 Minimum Grade of D) and (MGT 306 Minimum Grade of D or MGT 371 Minimum Grade of D) and (MKT 340 Minimum Grade of D) and (MKT 371 Minimum Grade of D).

MGT 486 Undergraduate Comp Exam  0 cr
Comprehensive exam
Co-requisite: MGT 485

MGT 490 Special Topics  3 cr
Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration.
Prerequisite: Approval of Department Chair.

MGT 492 Management Analysis & Consult  3 cr
Designed to help students bridge the gap between management theory and the realities involved in the practice of management. Topics include: (1) development of the human, social, and political skills of the student as an individual, (2) business ethics, (3) global management issues, and (4) current trends in society that affect business and management. Assignments include a project with a local organization to identify critical management issues, analyze alternatives, and present specific recommended solutions to company managers. Senior standing.
Pre-requisite: (MGT 300 Minimum Grade of D or MGT 322 Minimum Grade of D or MGT 324 Minimum Grade of D) and (MGT 305 Minimum Grade of D or MGT 326 Minimum Grade of D) and (MGT 327 Minimum Grade of D or MGT 340 Minimum Grade of D) and (MGT 351 Minimum Grade of D).

MGT 494 Dir St in Management  3 cr
Primarily designed to give superior students an opportunity to study some phase of management of particular interest. Conferences, a bibliography, and a formal research report are required. Junior or senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following the evaluation of a written proposal.

MGT 496 Management Internship  3 cr
The internship program is designed to give students practical experience in their field of study. Students complete directed learning experiences under the supervision of Department Chair. No more than three hours of internship credit may be counted toward a degree in the Mitchell College of Business. Prerequisites: Junior or Senior standing, declared major in management, overall GPA of at least 2.5, and Internship Agreement signed by department Chair.

MGT 498 Management Internship II  3 cr
The internship program is designed to give students practical experience in their field of study. Students complete directed learning experiences under the supervision of a Department Chair. Requirements: Junior or senior standing, declared major in marketing, overall GPA of at least 2.5, and Internship Agreement signed by the Department Chair.
Pre-requisite: MGT 496 Minimum Grade of P.

MGT 521 Data Analy for Bus Decisions  3 cr
An examination of basic statistical concepts used in business analysis. Topics include fundamental probability, sampling, statistical estimation, test of hypothesis, analysis of variance, and regression analysis. Emphasis is placed on the use of statistical techniques for business decision making.

MGT 522 Supply Chain & Operations Mgmt  3 cr
An integrative approach to the processes, operations, and information required to produce and transform resources into value-added outputs that maximize customer satisfaction. Particular emphasis is placed on strategic supply chain management, operations strategy, value chain analysis, demand management, process mapping, quality assurance, customer fulfillment strategies, order fulfillment processes, relationship and information management in supply networks, measuring operational performance, and analytical tools for managing operations and supply systems.

MGT 532 Legal & Ethical Environ of Bus  3 cr
Legal and Ethical Environment of Business is designed to develop an in-depth analytical understanding of selected legal/ethical issues and trends and their impact on management and other business functions. Students will analyze the legal and ethical implications of issues including products liability, professional regulations, corporate responsibility, workplace discrimination and harassment, privacy, workplace safety, restraints on trade, land use regulation, international law, and alternative dispute resolution.

MGT 590 Sp Top -  3 cr
Designed to provide graduate students an opportunity to study selected topics. Approval of Department Chair. A student may count no more than three hours if Special Topics in the MBA degree program.
Pre-requisite: MBA Prerequisites P
MGT 594 Independent Study - Management 3 cr
Readings and research on selected topics. Conferences and formal research report required. Prerequisites: Approval of Department Chair.

MGT 599 MBA Comprehensive Exam 0 cr
A corequisite course with MGT 580 with no credit hours which includes a graduate comprehensive business exam.

MGT 601 Sem in Org Behavior 3 cr
This seminar provides an introduction to established theories and emerging trends in the field of organizational behavior. The course explores the thoughts, emotions, and behaviors of individuals within the context of work, teams, organizations, and society. The emphasis is on organizational theory and development.

MGT 603 Seminar in Org Theory & Change 3 cr
This is a foundational overview seminar. The purposes of the seminar are to 1) provide an in-depth understanding of the dominant theoretical approaches used in organizational theory, 2) give a historical overview of the theories of organization change, and 3) develop student skills in evaluating, extending, and communicating ideas about organizational theory and/or change as it relates to the student's research.

MGT 605 Leadership 3 cr
This course includes a review of traditional as well as current thinking in leadership theory with a special emphasis on emotional and social intelligence and organizational citizenship behavior.

MGT 607 Strategic Management 3 cr
The course is designed to develop a thorough understanding of the primary frameworks of competitive strategy and corporate strategy. Topics covered in the course include: industry and competitive analysis, resource-based view of the firm, value chain analysis, competitive strategies, business models, scope of the firm, strategic alliances, and offensive and defensive strategies.

MGT 609 Sem. Sp. Topics 3 cr
This course will cover two broad areas. The first is a reprise and extension of Structural Equation Modeling (SEM). The second is an introduction to Game Theory (GT) and applications thereof.

MGT 799 Dissertation Research 1 TO 6 cr
Independent Scholarship working with committee.

**Marine Sciences (MAS) (MAS)**

MAS 134L Ocean Science Laboratory 1 cr
Laboratory experiences associated with BLY 134. Co-requisite: MAS 134

MAS 134 Ocean Science 3 cr
An introduction to physical, chemical, geological and biological oceanography. Equivalent to BLY 134. Co-requisite: MAS 134L

MAS 331 Marine Science I 3 cr
This course will present the basic principles of geological and physical oceanography. Marine science is an interdisciplinary science field in which geology, physics, chemistry and biology interact in complex ways that are fundamental to the oceanic environment. This course will examine the characteristics of oceanic and coastal geomorphology and the associated marine sediments as well as the circulation of water masses that reside in these different regions of the world's oceans. Geological oceanography topics that will be covered include: Structure and evolution of ocean basins, types and properties of marine sediments, sediment transport processes and characterizing coastal regions. Physical oceanography topics that will be covered include: basic physical laws, properties of the water and the ocean, air-sea interactions, general circulation and coastal processes.

MAS 332 Marine Science II 3 cr
Oceanography ("ocean"= the marine environment, and "graphy"= the study of) is literally the study of the marine environment. In practice, oceanography is an interdisciplinary science at the intersection of geology, chemistry, physics and biology. Marine Science II focuses on fundamental concepts in chemical and biological oceanography. The study of chemical oceanography will encompass dissolved components, stratification, chemical tracers, marine pollution, ocean acidification and global warming. This will lead to an introduction to biological oceanography, which will include organismal biology, marine adaptation and fisheries. In-class lectures will provide the students with the foundation to understand the principles discussed and will be supplemented with discussion of the modern ways in which these disciplines are pursued.

MAS 367 Marine Biology 4 cr
The relationship of marine organisms to their environment. (Usually taught in the summer semester.) Equivalent to BLY 367. Requires permission of Department Chair. Pre-requisite: ( (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) ) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C) and (CH 115 Minimum Grade of D or CH 131 Minimum Grade of D) and (CH 116 Minimum Grade of D or CH 132 Minimum Grade of D).
MAS 371 Shark and Ray Biology 2 cr
This course will provide an introduction to biology of sharks and rays, with special emphasis on regional shark fauna and field techniques. Topics to be covered include chondrichthyan origin, systematics, sensory biology, trophic ecology, reproductive biology, life history, ecology, fisheries and conservation. Lectures will be supplemented with discussions of papers from the primary literature to familiarize students with current research. In addition, longline, trawl and gillnet sampling will provide students with firsthand knowledge of field techniques and local shark identification. Equivalent to BLY 371. Requires permission of Department Chair.
Pre-requisite: ( (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C) )

MAS 430 Marine Botany 4 cr
A general survey of marine algae and vascular and non-vascular plants associated with the marine environment. Distribution, identification, structure, ecology, and reproduction will be considered. Course offered only through Marine Environmental Science Consortium, (usually taught in the summer semester). Equivalent to BLY 430. Requires permission of Department Chair.
Pre-requisite: ( (BLY 121 Minimum Grade of D or BLY 141 Minimum Grade of D) and (BLY 122 Minimum Grade of D or BLY 142 Minimum Grade of D) and (CH 116 Minimum Grade of D or CH 132 Minimum Grade of D) )

MAS 451 Marine Vertebrate Zoology 4 cr
A study of marine vertebrates, with emphasis on fishes; their systematics, zoogeography, and ecology, (usually taught in the summer semester). Equivalent to BLY 451. Requires permission of Department Chair.
Pre-requisite: ( (BLY 121 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C) )

MAS 471 Marine Invertebrate Zoology 4 cr
A study of natural history, systematics, and morphology or marine invertebrates, (usually taught in the summer semester). Equivalent to BLY 471. Requires permission of Department Chair.
Pre-requisite: ( (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C) )

MAS 474 Intro to Oceanography 4 cr
A general introduction to the oceans, with emphasis on chemical, physical, and geological processes and their relation to biological systems. Course offered only through Marine Environmental Science Consortium (DISL). Offered during the summer term.
Pre-requisite: (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C).

MAS 475 Marine Ecology 4 cr
The relationship of marine organisms to their environment, (usually taught in the summer semester). Equivalent to BLY 475. Requires permission of Department Chair.
Pre-requisite: ( (BLY 121 Minimum Grade of C or BLY 141 Minimum Grade of C) and (BLY 122 Minimum Grade of C or BLY 142 Minimum Grade of C) and (BLY 301 Minimum Grade of C or BLY 341 Minimum Grade of C) and (BLY 302 Minimum Grade of C or BLY 311 Minimum Grade of C) and (BLY 303 Minimum Grade of C or BLY 325 Minimum Grade of C) )

MAS 490 Special Topics 1 TO 4 cr
An in-depth tutorial exposure to specific areas in the marine sciences. Credit and title will be arranged to examine the subject matter in the area of current interest to one group of students. Specialized topics not currently listed in catalog course offerings.

MAS 510 Oceanography and Marine Bio 3 cr
Oceanography is an interdisciplinary science at the intersection of geology, chemistry, physics and biology. This course is designed to be a survey course of these four disciplines with special emphasis on the biological aspects of ocean sciences. In-class lectures will provide the students with the foundation to understand the principles discussed, and will be supplemented with discussion of the modern ways in which these disciplines are pursued.

MAS 511 Marine Analytical Methods 3 cr
This course will provide an introduction to the analytical methods most commonly used in marine science: spectrometry, fluorometry, calorimetry, gas and liquid chromatography and the use of radio-isotopes. The course will consist of lectures covering the theory of each method and laboratory exercises in their use. Throughout, there will be a focus on the quality of the data being collected, as derived from quantitative assessments of accuracy, precision and repeatability; and propagation of errors. Students will be assessed on problem-sets based on data collected in the labs and on a research project using the instruments and techniques of their choice.
MAS 515  Environmental Toxicology  4 cr
Introduction to the scientific and technical principles of toxicological processes in the context of the ecosystem. Students will understand the types of major environmental toxicants and how to properly evaluate their toxicity and factors that influence toxicity. Students will recognize and coherently formulate risk assessment and by using the tools and techniques acquired, develop and communicate proposals for remediation.
Pre-requisite: (BLY 301 Minimum Grade of C and BLY 302 Minimum Grade of C) and (CH 201 Minimum Grade of C and CH 202 Minimum Grade of C) and (CH 540 Minimum Grade of B and CH 541 Minimum Grade of B).

MAS 520  Marine Resource Management  3 cr
Designed to acquaint graduate students concerned with management of marine resources; development of legislation, evolution of policy, legal processes, impacts on human resources. The emphases will be placed on living resources.

MAS 521  Marine Conservation Biology  3 cr
This course will develop student's understanding of conservation biology in marine habitats. Lectures and assigned or student-selected readings will cover the widest possible range of current topics in marine conservation biology. Regular field trips will supplement and exemplify lecture topics. Each class will include an introductory lecture that presents an overview of basic ecological concepts and historical perspective for the assigned readings, followed by discussion. Students will lead discussion of student selected papers and write a topical term paper.

MAS 522  Horseshoe Crabs- Resource Mgmt  2 cr
The course will travel to Delaware Bay, home of the largest population of horseshoe crabs in the world. Students will gain and apply information on recent conflicts in horseshoe crab research and fishery management to explore political, ecological, and economic values of marine resources, options for management, conservation, and outreach, conflict resolution and applied ecology.

MAS 523  Anthropogenic Impacts on Coast  3 cr
This course will offer a state-of-the-art review of the nature and extent of anthropogenic impacts on marine coastal ecosystems, including climate change, destruction of wetlands, overfishing and nutrient pollution.

MAS 524  Scientific Communication  3 cr
Instruction on the principles of scientific communication and opportunities to practice different forms of written and oral communication common to marine and other sciences. Topics include: 1) the rationale for scientists to communicate effectively, 2) how to identify and share information to different audiences, 3) successful scientific date presentations, 4) writing, editing, publishing, and reviewing abstracts, scientific papers, and proposals, and 5) biases in scientific communication.

MAS 525  Chemical Ecology  3 cr
Chemical Ecology focuses on chemically medicated interactions within organisms in both aquatic and terrestrial environments. The topics covered include: chemoreception, chemical defense, chemical attraction, and the impact of chemical ecology on humans.

MAS 530  Marine Microbial Ecology  3 cr
A general survey of the types of microorganisms found in the marine environment. Emphasis will be on the interaction of microorganisms with each other and with their environment. In particular, the role of microorganisms in carbon cycling and biogeochemical processes will be stressed. Readings from current literature will expose students to the latest techniques and research.

MAS 531  Physiol Eco Marine Microalgae  3 cr
This course will cover the acclimative responses of marine microalgae to variability in light, nutrients, temperature and other environmental factors. Stress responses that are engendered when variability in these environmental factors exceeds the organisms' acclimative capacity will also be covered. The course will emphasize the commonality of these processes across taxa as well as considering taxon-specific responses that allow different groups to exploit their niches. Methods such as molecular biology, active fluorescence and remote sensing that can be used to investigate population dynamics and growth over a range of spatial and temporal scales will be covered.

MAS 532  Marine Trophic Processes  3 cr
This course will examine the nature and controls of the trophic routes followed by primary production and resulting carbon budgets in coastal ecosystems. Trophic processes in marine ecosystems such as herbivory, consumption by secondary consumers, decomposition, export/import and burial will be studied. The course will also offer a review of anthropogenic impacts, such as eutrophication and climate change, on the trophic rate of primary production and carbon budgets in coastal ecosystems. Students are expected to contribute with personal experimental projects and critical reading and discussion of seminal papers.
MAS 533  Marine Molecular Ecology  3 cr
The use of molecular biology in ecological studies has been increasing rapidly with the development of new techniques. These techniques can supplement the laboratory and field studies traditionally part of ecology. This course seeks to introduce the use of molecular techniques in marine ecology through lectures accompanied by computer exercises using data from public databases. Lectures will pull data from the primary literature, with emphasis on examples of applications in marine science. Computer exercises will introduce students to how data is analyzed as well as to some of the programs available to carry out this analysis.

MAS 540  Sediment Biogeochemistry  3 cr
Detailed examination of sediment biogeochemical processes and the implications thereof on nutrient cycles, plant production, and animal distribution, including discussion of early diagenesis in coastal sub-tidal and wetland sediment systems. Permission of instructor.

MAS 548  Marine Biogeochem Processes  2 cr
The course will examine the interaction between biological, chemical and geological processes in the marine environment. This will be done by first reviewing the cycling of several of the major elements (e.g. carbon, nitrogen, phosphorus, sulfur, and iron) in the sea, and then examining how these cycles differ between various marine ecosystems (e.g. open ocean surface waters, estuaries, coral reefs, seagrass systems and tidal marshes). The focus will be on developing an understanding of how biogeochemical processes serve to regulate ecosystem function in these various habitats. Prerequisites: Organic chemistry, geology, marine ecology.

MAS 550  Fisheries Techniques  3 cr
Students are exposed to a detailed, semi-quantitative introduction to current biological and technological methodologies for studying fishes and aquatic habitats, with emphasis on study design and integration across sub-disciplines.

MAS 551  Quant Methods Fish and Ecology  3 cr
Ecological and fisheries research has progressed beyond qualitative inference and is continuing to adopt more quantitative methods. A diversity of modeling and experimental approaches exists for ecologists and fisheries scientists. This course is designed to familiarize the students with the most commonly used quantitative approaches. Requires permission of instructor.

MAS 555  Fisheries Oceanography  2 cr
Students examine the relationships between fish life history, recruitment dynamics and harvest potential, and local-, meso- and global scale oceanographic processes. Students are exposed to the evolution in thinking on the role of interaction between biology and physics relative to fish and fisheries.

MAS 560  Mar Exp Ecol  4 cr
Advances in marine ecology and oceanography are dependent on the ability of researchers to design effective and robust experiments to test hypothesis. Understanding the power, limitations and potential biological and statistical artifacts are critical to achieving this goal. The course focuses on fundamental concepts in the design and analysis of experiments in marine sciences, ecology and fisheries. Primary emphasis will be placed on design and interpretation and secondarily on techniques for analyses. Various analysis of variance models will be introduced beginning with completely randomized designs and factorial treatment structures, and proceeding through block and split-plot designs. In-class demonstrations and take-home problems will provide students with experience in performing many of these analyses.
Pre-requisite: BLY 520 Minimum Grade of C or ST 540 Minimum Grade of C and ST 545 Minimum Grade of C. ST 545 can be taken concurrently with this course.

MAS 570  Ocean Var and Global Change  2 cr
This course will examine large scale, spatial and temporal variability in the Earth/ocean system as evidenced by present-day and paleo records. Variability such as the El Nino Southern Oscillation will be covered. It will critically evaluate the evidence for and the consequences of modern global change as it pertains to the marine environment. Emphasis will be placed on potential changes in climate, biogeochemical cycles, hydrologic cycles, eutrophication/ species diversity, and UV light fluxes. Prerequisites: Permission of instructor.

MAS 571  Marine Hydrodynam-Biomechanics  4 cr
To present an introduction to the importance of small scale fluid dynamics, thermodynamics, and solid mechanics to marine science and to present techniques for measurement of important parameters.

MAS 572  Estuarine Hydrodynamics  3 cr
This course will address physical processes in estuarine environments. With physical processes in estuaries occurring in various time scales, discussion will proceed in terms of three different time scales: turbulent, tidal, and residual time scales. Emphasis will be placed on mass transport by physical transport processes (water movement). Pre-requisite: MAS 601 Minimum Grade of B.

MAS 573  Oceanology of Gulf of Mexico  3 cr
This course provides a survey of the physics, chemistry, biology, geology and meteorology of the continental margins and deep ocean regions in the Gulf of Mexico and adjacent waters. Requires permission of instructor.

MAS 574  Marine Ecosystem Modelling  3 cr
An introduction to the principles, tools, and applications of marine ecosystem modelling. Emphasis will be placed on biological and physical coupling and numerical representations of these processes. Students will develop facility with numerical tools and learn how to apply coupled models to their ecosystems of interest.
MAS 575  Marine Ecology  4 cr
The course covers general ecological principles and how they apply to marine ecosystems. Both open ocean and nearshore waters are considered. Specific topics covered include: adaptations of marine organisms for life in the intertidal vs. sub-tidal zones; different modes of feeding and reproduction in marine organisms; and the importance of predation, competition, adult/larval interactions and dispersal mechanisms. The second half of the course is devoted to discussion of specific habitats including: coral reefs, mangrove swamps, kelp forests, and hydrothermal vents.

MAS 576  Benthic Ecology  2 cr
This course covers the evolutionary history and the ecology of marine benthic communities from the earliest fossils to present. The importance of scale and of proper design will be considered. Other topics include: predation, competition, adult/larval interactions and dispersal mechanisms. There will be discussion of productivity and materials cycling in benthic systems. Special topics of students' suggestions will conclude the course.

MAS 577  Coastal Processes  3 cr
The coastal ocean has a physical regime that is distinct from that of the open ocean. This physical regime contributes to disproportionately high levels of ecological productivity associated with these areas. Because of the often close coupling of physical and biogeochemical processes in the coastal ocean, the solutions to the problem facing these ecosystems typically require interdisciplinary perspectives. The objective of the course is to introduce the main physical processes and fisheries in the coastal ocean. The course will provide an overview of the physics operating in the coastal ocean and link the physical forcings to biogeochemical processes and ecosystem function. The course will cover topics from shelf break-open ocean interactions to the fundamental processes operation in estuarine environments. The end goal is for graduate students to acquire a fundamental understanding of the physical mechanisms driving the circulation and the associated hydrographic properties in the coastal ocean and how those physical phenomena link to biogeochemical processes.
Pre-requisite: MAS 601 Minimum Grade of C. MAS 601 can be taken concurrently with this course.

MAS 579  Coastal Ecosystem Dynamics  2 cr
Coastal Ecosystem Dynamics will allow students to investigate the basic principles of ecosystem structure and function. The course is divided into 2 parts: an instructional phase for learning basics of ecosystem modeling, and a student-led investigation of the structure and function of a variety of coastal ecosystems. This approach will give the student a set of quantitative tools for modeling ecosystems. Also, students will learn to evaluate differences and similarities of energy and nutrient processing in disparate ecosystems. There will be one 2 hr class meeting each week during which students will learn to use the ecological modeling software packages 'Ecopath' and 'Ecoism'. During the initial period, students will 'dissect' published models (obtained from the Internet) as a mechanism to understand the utility of ecosystem modeling as well as the basics of this particular software. The second half of the course will be devoted to student-conducted ecosystem models. The models will be constructed from data and pathway descriptions in Alonji's 'Coastal Ecosystem Processes' (CRC Press). A synthesis of these models will be constructed and placed on the WWW.

MAS 578  Marine Biogeo and Paleoecology  3 cr
This graduate level course will give students a broad overview of the time course of evolutionary changes in the structure and function of marine ecosystems, and will consider the interacting roles of both historical and current factors as they influence the distribution and abundance of marine organisms. Lectures will be mixed with discussions of assigned readings from the primary literature to stimulate critical thinking about the various topics.

MAS 581  Advanced Marine Ecology  2 cr
This course will build on the foundations provided by introductory ecology courses to enhance understanding of the mechanisms that control the distribution and abundance of marine plants and animals. The class periods will be dominated by discussions of assigned readings from the primary literature, which will be complemented by summary lecture material.

MAS 582  Marine Larval Ecology  2 cr
An in depth treatment of the taxonomy, nutrition, dispersal, bio-energetics, behavior, and bio-physical coupling of larval forms of marine species.

MAS 583  Field Marine Science I  2 cr
The Field Marine Science course will consist of an 11 day field exercise in representative coastal sites in Maine with emphasis on rocky intertidal, kelp bed and eelgrass habitats. Two faculty members will accompany the students, participate in the pre-trip readings and evaluate the product developed by each student.
MAS 584 Oceanographic Experience  1 TO 3 cr
This course provides students with practical skills involved in oceanographic research. Skills may include hydrographic, hydroacoustic, and organismic sampling, gear deployment and use of analytical instrumentation at sea. Students participate in one or more oceanographic cruises during a semester and carry out a defined project using research tools available on the ship. A final report on the project forms the major part of the course grade. Cruises are available only on an ad hoc basis so permission of the instructor is required.

MAS 585 Marine Zooplankton  3 cr
This course familiarizes the student with the taxonomic breadth of estuarine and marine zooplankton ranging from protistans through all major phyla of metazoa. Though the focus of the course is on taxonomic familiarization, basic biology (including reproduction and feeding) of all major taxa represented in the plankton will be covered. Students will also learn basic and advanced field collection, laboratory and statistical techniques. Although not a prerequisite, it is useful for students to have a background in invertebrate zoology.

MAS 586 Marine Restoration Ecology  3 cr
The course examines factors in the evolution current U.S. and International marine and coastal policy related to the management of natural resources. Course includes policy components, policy information implementation, change processes and economic criteria for evaluating policy effectiveness. The course also surveys the basic approaches to economic valuation of marine resources.

MAS 587 Seagrass Ecosystem Ecology  2 cr
A survey of current literature on topics related to the ecology of seagrass ecosystems. Students will read assigned papers to be analyzed in faculty lead discussion format. A final research paper will be prepared by each student.

MAS 588 Field Marine Science II  3 cr
The Field Marine Science course will consist of an 8-12 day field exercise in representative coastal sites. Faculty members with diverse interests will accompany the students, participate in pre-trip discussions and evaluate the product developed by each student. The course is designed to familiarize students with habitats and research conditions on the Northern Gulf Coast. Field trip locations are selected on the basis of faculty and student interest, economics, and availability of logistic support. Students pay their room and board costs for the field exercise. The course is primarily for graduate students, but advanced undergraduates may enroll with consent of instructor. Both MAS 588 and MAS 583 may be taken for credit when each is taught in a different environment.

MAS 589 Marine Plankton  3 cr
The course familiarizes the student with the taxonomic breadth of phytoplankton, bacterioplankton and zooplankton in estuaries, coastal seas and open oceans. Though the focus of the course is on taxonomic familiarization, basic biology (including reproduction and feeding) of all major taxa represented in the plankton will be covered. Student will learn fundamental, as well as "cutting-edge", field laboratory and statistical techniques. Two hours of lectures each week will be accompanied by two hours of hand-on laboratory work. Prerequisites: Graduate status in one of the physical or biological sciences.

MAS 590 Sp Top -  1 TO 4 cr
An in-depth tutorial exposure to specific areas in the marine sciences. Credit and title will be arranged to examine the subject matter in an area of current interest to one or group of students. Specialized topics not currently listed in catalog course offerings. MAS 590 is available to master students - MAS 690 is available to Ph.D. students.

MAS 592 Seminar  1 cr
Students and faculty meet weekly in an interactive discussion of current literature in marine sciences. The focus will be on "state-of-the-art" theories and methodologies as they occur in the primary marine literature. Student presentation is required to receive credit.

MAS 594 Directed Studies  1 TO 4 cr
Independent research, not related to the thesis, under the direction of a member of the graduate faculty. May be used to learn new techniques or explore research questions of special interest. A maximum of 4 hours may be earned for this course toward the MS degree.

MAS 599 Thesis  1 TO 8 cr
Independent research by the student under the sponsorship of a member of the department. Progress reports of the work accomplished are required every six months.

MAS 601 Physical Oceanography  4 cr
Physical properties and circulation of the worlds oceans. Topics to be covered include: basic physical laws; properties of heat, water, and salt budgets; waves; tides; large and small scale circulations; sea-level fluctuations; interactions of the sea with the atmosphere and land masses; light and acoustics.

MAS 602 Chemical Oceanography  4 cr
An in-depth examination of the chemistry of sea water and its relationship with biological, geological, and physical processes in the oceans. Coverage of sea water composition, buffering capacity, redox potential, and photochemistry will form the basis for an in-depth analysis of dynamic equilibria of gases, organic materials, nutrients, and trace elements in the sea. Critical evaluation of recent primary literature in chemical oceanography will be used to illustrate state-of-the art research approaches.
MAS 603 Geological Oceanography 4 cr
Geological Oceanography encompasses the historic and current consequences of both geophysical and classical geological processes. Included topics are tectonic theory and its development, sedimentary processes in coastal and oceanic provinces, stratigraphy, structural geology, micropaleontology, erosion, diagenesis and the formation of hydrocarbons.

MAS 604 Biological Oceanography 4 cr
A comprehensive survey of marine organisms and their interaction including pelagic and benthic communities of the oceans, coastal waters and estuaries. Primary formation of particulate material, feeding processes, kinetics of food webs, biogeochemical processes, patterns of distribution, ecology of biotic systems, human interactions and current concerns are topics to be covered.

MAS 690 Sp Top - 1 TO 4 cr
An in-depth tutorial exposure to specific areas in the marine sciences. Credit and title will be arranged to examine the matter in an area of current interest to one or group of students. Specialized topics not currently listed in catalog course offerings. MAS 590 is available to master students - MAS 690 is available to Ph.D. students.

MAS 692 Seminar 1 cr
Students and faculty meet weekly in an interactive discussion of current literature in marine sciences. The focus will be on "state-of-the-art" theories and methodologies as they occur in the primary marine literature. Student presentation is required to receive credit.

MAS 694 Directed Studies 1 TO 4 cr
Independent research, not related to the dissertation, under the direction of a member of the graduate faculty. May be used to learn new techniques or explore research questions of special interest. A maximum of 4 hours may be earned for this course toward a Ph.D. degree.

MAS 799 Dissertation 1 TO 8 cr
Independent research by the student under the sponsorship of a member of the department.

Marketing (MKT) (MKT)

MKT 310 Intro International Business 3 cr
This course focuses on exploring the terminology, scope, status and evolving patterns of international business. Specifically, the course addresses the role of cultural, political, ethical, technological, and economic factors in the international business context and how businesses deal with uncertainty and risk. The course examines the impact of global forces on businesses at home and abroad, the role of governments in promoting and protecting business interests, the role of international agencies in the business environment.

MKT 320 Principles of Marketing 3 cr
Study of the institutions involved in creating transactions necessary to satisfy the needs of households, businesses and government and international customers. Topics include marketing planning, market segmentation, societal and ethical obligations, strategies for product, promotion and channel decisions.

MKT 336 International Marketing 3 cr
Examination of cultural, economic, and political factors that affect marketing of goods and services worldwide. Emphasis is placed on developing global marketing strategies of multinational corporations within existing trade structure and regulations. Both product and service flows between countries and regions are discussed. Pre-requisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D).

MKT 340 Marketing Analytics 3 cr
Contemporary marketers acquire large amounts of data. Marketing Analytics explains a) the most common marketing metrics, and b) how to compute and interpret these metrics to improve decision making. Pre-requisite: MKT 320 Minimum Grade of D and BUS 245 Minimum Grade of D.

MKT 350 Digital Marketing 3 cr
Examination of the interactive processes and transactions involved in satisfying the needs of consumers, businesses, and government. Involves the study of marketing planning, consumer research, segmentation, and implementation of marketing strategies. Pre-requisite: (MKT 320 Minimum Grade of D or BMS 371 Minimum Grade of D or MKT 371 Minimum Grade of D).

MKT 355 Customer Relationship Mgt 3 cr
The course provides a comprehensive business model integrating customers and suppliers along the value chain. The focus is on the methodologies, tools, and techniques required for customer acquisition, retention, and profitability in competitive buyer/supplier environments. Pre-requisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D.

MKT 374 Consumer Behavior 3 cr
Study of the contributions of the behavioral sciences to the interpretation of market information. Involves the use of behavioral information which pertain to the analysis of consumers and organizational buyers in both domestic and international settings. Pre-requisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D.
MKT 375  Supply Chain Management  3 cr
This course encompasses the design and management of the supply chain system that collectively provides for the exchange of title, physical movement, and storage activities in marketing, including the use of new technologies. This course examines the role of manufacturers and intermediaries in channel strategies including scope, methods, problems, and opportunities of total supply chain coordination.
Pre-requisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D.

MKT 376  Business to Business Marketing  3 cr
Study of the participants, channels, and relationships that govern the behavior of industrial buyers and marketers.
Pre-requisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D.

MKT 377  Pricing Strategies  3 cr
Pricing strategies encompass the design and monitoring of an integrative framework for making pricing decisions. The purpose of this course is to synthesize economic and behavioral principles with marketing, accounting, and financial information, and to analyze the various pricing options within legal, market, and corporate constraints. This course covers both theory and application of pricing strategies for national and multinational concerns organized as either a profit or non-profit entity.
Pre-requisite: (MKT 320 Minimum Grade of D or BMS 371 Minimum Grade of D or MKT 371 Minimum Grade of D).

MKT 379  Retailing  3 cr
Study of the management of retail operations. Topics include store location and layout, merchandise buying and planning, legal and ethical issues, promotion, pricing, human resource management, financial planning, information systems and customer services.
Pre-requisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D.

MKT 380  Integrated Mkt Communications  3 cr
Study of the fundamentals of marketing communications from a strategic perspective. Examines the roles of and relationships between a variety of marketing communication elements including advertising, direct marketing, database marketing, interactive marketing, media planning, public relations, sales promotion, and personal selling.
Pre-requisite: (MKT 320 Minimum Grade of D or BMS 371 Minimum Grade of D or MKT 371 Minimum Grade of D).

MKT 381  Sales Mgt & Personal Selling  3 cr
Study of the principles and practices of sales management in planning, organizing, directing, and controlling, the sales organization in both domestic and international markets. Included in the course are skills developed through presentation, discussion, and role playing. Special emphasis is directed to recruiting, selecting, training, evaluating, compensating, and supervising sales personnel and sales organizations.
Pre-requisite: MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D.

MKT 382  Brand Management  3 cr
Systematic examination of strategies involved in tangible and intangible product decisions. Issues and strategies involved in identifying and implementing the development of new goods and services for both domestic and international markets are examined in-depth, as well as the management of mature products.
Pre-requisite: (MKT 320 Minimum Grade of D or BMS 371 Minimum Grade of D or MKT 371 Minimum Grade of D).

MKT 384  Market Research  3 cr
Study of information gathering techniques, research methods and procedures used to solve marketing problems in consumer and organizational in both domestic and international markets.
Pre-requisite: (BUS 255 Minimum Grade of D or ST 275 Minimum Grade of D or BMS 250 Minimum Grade of D or BMS 255 Minimum Grade of D or BMS 300 Minimum Grade of D) and (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D).

MKT 385  Services Marketing  3 cr
Study of the unique features of services marketing and the service sector. Examines the strategies and activities of organizations and industries whose core product is service, such as sports, hospitality, healthcare, financial services, information technology, and event marketing.
Pre-requisite: (MKT 320 Minimum Grade of D or BMS 371 Minimum Grade of D or MKT 371 Minimum Grade of D).

MKT 477  Export-Import Management  3 cr
Study of exporting and importing strategies used by both domestic and multinational firms including a concentration in the areas of international pricing, governmental assistance, and channel selection. Emphasis is placed on the best practices and procedures of packing and documentation.
Pre-requisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D) and (MKT 336 Minimum Grade of D or MKT 383 Minimum Grade of D).

MKT 479  Marketing Policy - W  3 cr
The capstone course for marketing majors. Integration and application of marketing concepts requiring analysis of both domestic and international marketing problems.
Pre-requisite: (MKT 320 Minimum Grade of D or MKT 371 Minimum Grade of D or BMS 371 Minimum Grade of D and MKT 374 Minimum Grade of D and MKT 384 Minimum Grade of D or MKT 474 Minimum Grade of D).

MKT 490  Special Topics  3 cr
Designed to provide senior students an opportunity to study selected topics of particular interest. A student may count no more than six hours of Special Topics in the concentration.
Prerequisite: Approval of Department Chair.
Pre-requisite: MKT 320 Minimum Grade of D.

</thead>
<tbody>
<tr>
<td>MKT 492</td>
<td>Applications in Intl Business</td>
<td>3 cr</td>
<td>This course may take several formats to allow students who have achieved senior status the best method of applying concepts learned in other courses to the international business environment. The formats include a case-based course, a lecture-based course, an experiential course or mixture of those and other alternatives. Pre-requisite: MKT 320 Minimum Grade of D and MKT 310 Minimum Grade of D.</td>
</tr>
<tr>
<td>MKT 494</td>
<td>Directed Study in Marketing</td>
<td>1 TO 3 cr</td>
<td>Primarily designed to give superior students an opportunity to study selected topics of particular interest. Conferences, a bibliography, and a formal research report are required. Grades are awarded on a satisfactory/unsatisfactory basis. Prerequisites: Junior or senior standing, a cumulative GPA of 2.5 or better, and approval of the department chair following the evaluation of a written proposal.</td>
</tr>
<tr>
<td>MKT 496</td>
<td>Marketing Internship</td>
<td>3 cr</td>
<td>The internship program is designed to give students practical experience in their field of study. Students complete directed projects under the supervision of Department Chair. No more than three hours of internship credit may be counted toward a degree in the Mitchell College of Business. Prerequisites: Junior or Senior standing, declared major in marketing, overall GPA of at least 2.5, and Internship Agreement signed by department chair.</td>
</tr>
<tr>
<td>MKT 497</td>
<td>Marketing Internship II</td>
<td>3 cr</td>
<td>The internship program is designed to give students practical experience in their field of study. Students complete directed learning experiences under the supervision of the Department Chair. Prerequisites: Junior or Senior Standing, declared major in marketing, overall GPA of at least 2.5 and internship agreement signed by Department Chair. Pre-requisite: MKT 496 Minimum Grade of P.</td>
</tr>
<tr>
<td>MKT 499</td>
<td>Special Topics -</td>
<td>3 cr</td>
<td>Designed to provide graduate students an opportunity to study selected topics. A student may count no more than 3 hours of Special Topics in the MBA degree program. Approval of Department Chair.</td>
</tr>
<tr>
<td>MBA 501</td>
<td>Analysis using Info Sys</td>
<td>3 cr</td>
<td>Advanced management requires the ability to process datasets, interpret data with datasets and calculate statistics from data. This course covers all the processes of building, interpreting, calculating data and finally making decisions on the outcomes of that process. A significant part of the grade in this course comes from decision making exercises.</td>
</tr>
<tr>
<td>MBA 502</td>
<td>Managing Accounting Info</td>
<td>3 cr</td>
<td>This course focuses on making decisions using Accounting information which includes how to generate relevant and appropriate data and how to use accounting analysis to enhance success in making decisions. Pre-requisite: ACC 211 Minimum Grade of C.</td>
</tr>
<tr>
<td>MBA 503</td>
<td>Managing in the Bus. Env’t</td>
<td>3 cr</td>
<td>The course evaluates managerial decisions in a business environment impacted by ethical considerations, sustainability, social responsibility and stakeholder interests. The course also focuses on developing student skills in communication. Pre-requisite: ECO 215 Minimum Grade of C.</td>
</tr>
<tr>
<td>MBA 504</td>
<td>Customers &amp; Supply Chains</td>
<td>3 cr</td>
<td>This MBA course focuses on the role of customers and vendors on organizations. The course uses projects and decision scenarios to address the issues that result from managing supply chains and customer relationships.</td>
</tr>
</tbody>
</table>
MBA 505  Managing People  3 cr
This MBA course emphasizes the role of people within an organization and the issues and the decisions related to managing human assets. The course develops a number of techniques and scenarios that emphasize the importance of effective human resource management.
Pre-requisite: MGT 300 Minimum Grade of C.

MBA 506  Managing Finance and Capital  3 cr
Business managers must have a strong grasp of the role of finance and capital in the organization. The course focuses on establishing a strong knowledge base and the key decisions needed to be a successful manager.
Pre-requisite: FIN 315 Minimum Grade of C.

MBA 507  Managing Strategic Decisions  3 cr
The MBA Capstone course emphasizes decision making in a strategic context and builds upon all the courses taken prior to and concurrently with the course. The course includes decisions at the strategy development and strategy execution levels. The evaluation exercises include an assessment of ethical, socially responsible, and sustainability issues.
Co-requisite: MGT 599

MBA 590  Special Topics  3 cr
The MBA Program includes courses that are designed to allow students the opportunity to learn management skills and applications through non-traditional formats. This course is designed to achieve that objective. Subject to the approval of the Director of Graduate studies.

Maternal Child Nursing (MCN)
(MCN)

MCN 347  NuChild-Bearing/Child Rearing  4 cr
Analysis of theories, concepts, evidence, and issues and trends in professional nursing care of the childbearing and childrearing family. Emphasis on the use of the nursing process and other systematic approaches to plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with individuals and families in various stages of childbearing and childrearing, as well as the gynecological care of women in a variety of acute and community settings.
Co-requisite: MCN 348
Pre-requisite: CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and (NU 211 Minimum Grade of C or NU 300 Minimum Grade of C) and (NU 221 Minimum Grade of C or NU 301 Minimum Grade of C). CMN 350 and CMN 351 can be taken concurrently with this course.

MCN 348  Childbearing/Childrearing Clin  4 cr
The purpose of this course is to provide students the opportunity to engage in clinical practice with childbearing and childrearing families as well as the gynecologic care of women. Emphasis is on the role of the professional nurse in the application of concepts and theories related to health promotion and maintenance, illness care and rehabilitation with childbearing and childrearing families.
Co-requisite: MCN 347
Pre-requisite: CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C and (NU 211 Minimum Grade of C or NU 300 Minimum Grade of C) and (NU 221 Minimum Grade of C or NU 301 Minimum Grade of C). CMN 350 and CMN 351 can be taken concurrently with this course.

MCN 352  OB & GYN Nursing Care  2 cr
Analysis of theories, concepts, evidence, and issues and trends in professional nursing care of the obstetric or gynecologic client and their families. Emphasis is on the use of the nursing process and other systematic approaches to plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with individuals and families in various stages of pregnancy and childbirth, as well as the gynecologic care of women in a variety of acute and community settings.
Co-requisite: MCN 353
Pre-requisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C). CMN 350 and CMN 351 can be taken concurrently with this course.

MCN 353  OB & GYN Nsg Care Clinical  2 cr
The purpose of this course is to provide students the opportunity to engage in clinical practice with obstetric and gynecologic clients and their families. Emphasis is on the role of the professional nurse in the application of concepts and theories related to health promotion and maintenance, illness care and rehabilitation with obstetric and gynecologic clients.
Co-requisite: MCN 352
Pre-requisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C). CMN 350 and CMN 351 can be taken concurrently with this course.

MCN 354  Pediatric Nursing Care  2 cr
Analysis of theories, concepts, evidence, and issues and trends in professional nursing care of the pediatric client and their family. Emphasis is on the role of the professional nurse in the application of concepts and theories related to health promotion and maintenance activities, illness care, and rehabilitation with clients and families in various stages of development.
Co-requisite: MCN 355
Pre-requisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C). CMN 350 and CMN 351 can be taken concurrently with this course.
MCN 355  Pediatric Nsg Care Clinical  2 cr
The purpose of this course is to provide students the opportunity to engage in clinical practice with the pediatric client and their family. Emphasis is on the role of the professional nurse in the application of concepts and theories related to health promotion and maintenance, illness care, and rehabilitation of clients and families in various stages of development.
Co-requisite: MCN 354
Pre-requisite: (NU 300 Minimum Grade of C and NU 301 Minimum Grade of C and CMN 350 Minimum Grade of C and CMN 351 Minimum Grade of C). CMN 350 and CMN 351 can be taken concurrently with this course.

MCN 538  Intro to Women's Health NP  3 cr
The purpose of this course is to expand the Women's Health Nurse Practitioner student's knowledge and skills for obtaining, recording and analyzing a systematic health assessment of women. Emphasis is on the synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.
Co-requisite: MCN 541
Pre-requisite: NU 545 Minimum Grade of C and NU 518 Minimum Grade of C. NU 545 and NU 518 can be taken concurrently with this course.

MCN 540  Women's Hlth NP Cl Progression  1 TO 4 cr
The purpose of this progression practicum is to facilitate student independence in the Women's Health Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Women's Health Nurse Practitioner role.

MCN 541  HPDP Women's Health NP  2 cr
The purpose of this didactic course is to prepare the Women's Nurse Practitioner student to identify and implement appropriate health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.
Co-requisite: MCN 538

MCN 542  Women's Health NP I  3 cr
The purpose of this didactic course is to prepare the Women's Health Nurse Practitioner student to assess, diagnose, and manage selected health care needs of women. The focus is on advanced practice nursing with women primary, acute, and chronic health care settings. Emphasis is on wellness and the pathophysiology and epidemiology underlying acute and chronic health problems.
Co-requisite: MCN 543
Pre-requisite: MCN 538 Minimum Grade of C and NU 578 Minimum Grade of C. NU 578 can be taken concurrently with this course.

MCN 543  Women's Health NP Pract I  3 cr
The purpose of this practicum course is to provide opportunities for the Women's Health Nurse Practitioner student to apply concepts from MCN 542 Advanced Women's Health Nursing II in select clinical settings. Focus is on advanced practice nursing with women and families in primary, acute, and chronic health care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking.
Co-requisite: MCN 542
Pre-requisite: NU 578 Minimum Grade of C.

MCN 544  Women's Health NP II  3 cr
The purpose of this course is to provide the Women's Health Nurse Practitioner student an in-depth study of the health care management of women within the framework of advanced nursing. The focus is on selected acute and chronic complex health care problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.
Co-requisite: MCN 545
Pre-requisite: MCN 542 Minimum Grade of C.

MCN 545  Women's Health NP Pract II  3 cr
The purpose of this course is to provide opportunity for the Women's Health Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of women. Emphasis is on collaboration with other health care providers in a culturally diverse environment.
Co-requisite: MCN 544

MCN 546  Women's Health NP Prac III  4 cr
The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Women's Health Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.
Co-requisite: MCN 547
Pre-requisite: MCN 544 Minimum Grade of C and NU 608 Minimum Grade of C and NU 607 Minimum Grade of C. NU 608 and NU 607 can be taken concurrently with this course.
MCN 547  Women's Health NP III  3 cr
The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in advanced women's health nursing care. Emphasis is on critical analysis and management of issues by the Women's Health Nurse Practitioner student in an interdisciplinary health care system.
Co-requisite: MCN 546
Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.

MCN 548  Intro to Ped Primary Care NP  3 cr
The purpose of this first didactic course is to prepare Advanced Pediatric Primary Care Nurse Practitioner students to assess, diagnose, and manage selected health care needs of children. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.
Co-requisite: MCN 551
Pre-requisite: NU 545 Minimum Grade of C and NU 518 Minimum Grade of C. NU 545 and NU 518 can be taken concurrently with this course.

MCN 551  HPDP Pediatric Primary Care NP  2 cr
The purpose of this didactic course is to prepare the Pediatric Primary Care Nurse Practitioner student to identify and implement appropriate health promotion and disease prevention strategies for children from birth to adolescence. The focus is on the advanced practice nursing of children and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary, and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.
Co-requisite: MCN 548

MCN 552  Pediatric Prim Care NP I  3 cr
The purpose of this didactic course is to prepare the Advanced Pediatric Primary Care Nurse Practitioner student to assess, diagnose, and manage selected health care needs of children from birth to school age. The focus is on advanced practice nursing with children and families in primary care settings. Emphasis is on the wellness, and the pathophysiology and epidemiology underlying acute and chronic health problems.
Co-requisite: MCN 553
Pre-requisite: MCN 548 Minimum Grade of C and NU 578 Minimum Grade of C. NU 578 can be taken concurrently with this course.

MCN 553  Ped Prim Care NP Prac I  3 cr
The purpose of this practicum course is to provide opportunities for the Advanced Pediatric Primary Care Nurse Practitioner student to apply concepts in select clinical settings. Focus is on advanced practice nursing with children and families in primary care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking.
Co-requisite: MCN 552
Pre-requisite: NU 578 Minimum Grade of C.

MCN 554  Pediatric Primary Care NP II  3 cr
The purpose of this course is to provide the Advanced Pediatric Primary Care Nurse Practitioner student an in-depth study of the health care management of children from school age to adolescence within the framework of advanced nursing. The focus is on selected acute and chronic complex health problems. Emphasis is on the interaction among health care providers in a culturally diverse environment.
Co-requisite: MCN 555
Pre-requisite: MCN 552 Minimum Grade of C.

MCN 555  Ped Prim Care NP Prac II  3 cr
The purpose of this course is to provide opportunity for the Pediatric Primary Care Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the health care management of children. Emphasis is on collaboration with other health care providers in a culturally diverse environment.
Co-requisite: MCN 554

MCN 556  Ped Prim Care NP Pract III  4 cr
The purpose of this culminating course is to provide a preceptor and faculty facilitated experience in the Pediatric Primary Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.
Co-requisite: MCN 557
Pre-requisite: MCN 554 Minimum Grade of C and NU 608 Minimum Grade of C and NU 607 Minimum Grade of C. NU 608 and NU 607 can be taken concurrently with this course.

MCN 557  Pediatric Primary Care NP III  3 cr
The purpose of this course is to provide a forum for the evaluation of issues and trends encountered in advanced pediatric primary care health nursing. Emphasis is on critical analysis and management of issues by the Advanced Pediatric Primary Care Nurse Practitioner in an interdisciplinary health care delivery system.
Co-requisite: MCN 556
Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.
MCN 558  Intro Pediatric Acute Care NP  3 cr
The course will introduce the Acute Pediatric Nurse Practitioner student to entry level NP decision making, evidenced based practice, documentation and resource optimization with an introductory emphasis on critical thinking skills in the development of appropriate history and examination, assessment, different diagnosis, as well as diagnostic and treatment plans for pediatric patients in primary and acute care settings, as they prepare to start clinical rotations.
Co-requisite: MCN 571
Pre-requisite: NU 518 Minimum Grade of C and NU 545 Minimum Grade of C. NU 518 and NU 545 can be taken concurrently with this course.

MCN 561  Peds Acute NP Clin Progression  1 TO 4 cr
This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply more clinical time so as to master clinical concepts and improve competence before moving on to the subsequent term, or in their last clinical course before graduation.

MCN 562  Pediatric Acute Care NP I  3 cr
This course provides Acute Care Pediatric Nurse Practitioner students to assess, diagnose, and manage selected health care needs of children. The focus is on advanced practice nursing with children and families in acute care settings, evaluation diagnostic probability, evidenced based care and managing both inpatient and primary health care needs. Emphasis is placed on wellness, pathophysiology and epidemiology underlying acute and chronic health problems, as well as diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resource optimization.
Co-requisite: MCN 563
Pre-requisite: MCN 558 Minimum Grade of C and NU 578 Minimum Grade of C and MCN 571 Minimum Grade of C. NU 578 can be taken concurrently with this course.

MCN 563  Ped Acute Care NP Pract I  3 cr
This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply concepts from Acute Care Pediatric Nurse Practitioner I course in select clinical inpatient and outpatient settings. The emphasis is on diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resource optimization. Practicum experiences will include primary care, inpatient hospitalist rotations, pediatric surgery rotations and urgent care rotations.
Co-requisite: MCN 562
Pre-requisite: NU 578 Minimum Grade of C.

MCN 564  Pediatric Acute Care NP II  3 cr
This course prepares Acute Care Pediatric Nurse Practitioner students to assess, diagnose, and manage selected health care needs of both acute and chronically ill children, focusing on technology dependent children, hematology, transplant, infectious disease as well as those with hematological, medical and surgical emergencies. Emphasis is on diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resource optimization.
Co-requisite: MCN 565
Pre-requisite: MCN 562 Minimum Grade of C and MCN 563 Minimum Grade of C.

MCN 565  Ped Acute Care NP Pract II  3 cr
This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply concepts from Acute Care Pediatric Nurse Practitioner II in select clinical inpatient and outpatient settings. The emphasis is on diagnostic reasoning, articulation of evidence based management plans, decision making, critical thinking and resources optimization. Practicum experiences will include chronic subspecialty clinics and inpatient environments.
Co-requisite: MCN 564
Pre-requisite: MCN 562 Minimum Grade of C and MCN 563 Minimum Grade of C.

MCN 566  Ped Acute Care NP Pract III  4 cr
This course provides an opportunity for the Acute Care Pediatric Nurse Practitioner student to apply concepts from Acute Care Pediatric Nurse Practitioner III in select clinical inpatient and outpatient settings. The emphasis is on diagnostic reasoning, decision making/critical thinking and resource utilization. Practicum experiences will include emergency departments and critical care/intensive care units.
Co-requisite: MCN 567
Pre-requisite: MCN 564 Minimum Grade of C and MCN 565 Minimum Grade of C or NU 607 Minimum Grade of C or NU 608 Minimum Grade of C or NU 610 Minimum Grade of C or NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.
MCN 567  Pediatric Acute Care NP III  3 cr
This course prepares the Acute Care Pediatric Nurse Practitioner student to appropriately assess, diagnose and manage selected acute, emergent, unstable and life threatening pediatric health care conditions, focusing on psychiatric emergencies, trauma, shock, burns, organ failure, toxicology/ingestions, environmental exposures, neurological presentations, as well as those requiring life support and end of life/palliative care, as the student prepares to graduate and assume a professional ACPNP role. The focus is on application and synthesis of knowledge and skills acquired in all previous courses.
Co-requisite: MCN 566
Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and MCN 564 Minimum Grade of C and MCN 565 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.

MCN 568  Intro to Neonatal NP  3 cr
The purpose of this first didactic course is to prepare Advanced Neonatal Nurse Practitioner students to assess, diagnose, and manage selected health care needs of neonates. Emphasis is placed on synthesis and application of nursing and related theories and scientific knowledge to the development of differential/nursing diagnoses as a basis for health promotion and management.
Co-requisite: MCN 571
Pre-requisite: NU 545 Minimum Grade of C and NU 518 Minimum Grade of C. NU 545 and NU 518 can be taken concurrently with this course.

MCN 571  HPDP NNP/Peds Acute NP  2 cr
The purpose of this didactic course is to prepare the Neonatal and Acute Care Pediatric Nurse Practitioner students to identify and implement appropriate health promotion and disease prevention strategies for the neonate to age 21 years. The focus is on the advanced practice nursing of individuals and families in primary care settings. Emphasis is placed on health promotion/disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice role.

MCN 572  Neonatal NP I  3 cr
The purpose of this didactic course is to prepare the Advanced Neonatal Nurse Practitioner student to assess, diagnose, and manage selected health care needs of neonates. The focus is on neonates and families in primary, acute, and chronic health care settings. Emphasis is placed on wellness and the pathophysiology and epidemiology underlying acute and chronic health problems.
Co-requisite: MCN 573
Pre-requisite: MCN 568 Minimum Grade of C and NU 578 Minimum Grade of C. NU 578 can be taken concurrently with this course.

MCN 573  Neonatal NP Pract I  3 cr
The purpose of this practicum course is to provide opportunities for the Advanced Neonatal Nurse Practitioner student to apply concepts in select clinical settings. Focus is on advanced nursing practice with neonates and their families in primary, acute, and chronic health care settings. The emphasis is on diagnostic reasoning and decision making/critical thinking.
Co-requisite: MCN 572
Pre-requisite: NU 578 Minimum Grade of C.

MCN 574  Neonatal NP II  3 cr
The purpose of this course is to provide the Advanced Neonatal Nurse Practitioner student an in-depth study of the neonate within the framework of nursing. The focus is on selected acute and chronic complex health problems of neonates in the primary, acute, and chronic care settings. Emphasis is on the interaction among health care providers in a culturally diverse environment.
Co-requisite: MCN 575
Pre-requisite: MCN 572 Minimum Grade of C.

MCN 575  Neonatal NP Pract II  3 cr
The purpose of this course is to provide opportunity for the Advanced Neonatal Nurse Practitioner student to practice within an advanced nursing framework. The focus is on the role of the advanced practice nurse in the management of the neonate. Emphasis is on collaboration with other health care providers in a culturally diverse environment.
Co-requisite: MCN 574

MCN 576  Neonatal NP Pract III  4 cr
The purpose of this culminating course is to provide a preceptor-faculty facilitated experience in the Advanced Neonatal Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses.
Co-requisite: MCN 577
Pre-requisite: MCN 574 Minimum Grade of C and NU 607 Minimum Grade of C and NU 608 Minimum Grade of C. NU 607 and NU 608 can be taken concurrently with this course.

MCN 577  Neonatal NP III  3 cr
The purpose of this course is to provide a forum of the evaluation of issues and trends encountered in advanced neonatal nursing care. Emphasis is on critical analysis and management of issues by the Advanced Neonatal Nurse Practitioner in an interdisciplinary health care system.
Co-requisite: MCN 576
Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.

MCN 578  Neonatal NP Clin Progression  1 TO 4 cr
The purpose of this culminating course is to provide a preceptor-faculty supervised experience in the Neonatal Nurse Practitioner role with a focus on the application and synthesis of knowledge and skills acquired in all previous courses.
MCN 581  Peds Primary NP Cl Progression  1 cr
TO 4 cr
The purpose of this progression practicum is to facilitate student independence in the Pediatric Primary Care Nurse Practitioner role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Pediatric Primary Care Nurse Practitioner role.

MCN 604  Pediatric Acute Care NP PP&D  3 cr
This course assists the Pediatric Acute Care Nurse Practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Acute Care Pediatric Nurse Practitioner students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination. Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

MCN 617  Pediatric Acute Care NP Res I  3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the student will work with the primary faculty advisor to complete projects and advance their selected practice area. The student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, students must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required. Pre-requisite: MCN 604 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

MCN 618  Pediatric Acute Care NP Res II  3 cr
Provides students the opportunity to fully express all DNP competencies. The student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project. Pre-requisite: MCN 617 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

MCN 619  Pediatric Acute Cre NP Res Ill  3 cr
Final course in residency series as student continues to implement and evaluate project plan. Provides student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project. Pre-requisite: MCN 618 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

MCN 644  Women's Health NP PP&D  3 cr
This course assists the women's health nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the women's health nurse practitioner student's selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination. Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

MCN 645  Women's Health NP Residency I  3 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The women's health nurse practitioner student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the women's health nurse practitioner student will work with the primary faculty advisor to complete projects and advance their selected practice area. The women's health nurse practitioner student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the women's health nurse practitioner student's career trajectory and approval by collaborating faculty. During the residency semester, the women's health nurse practitioner student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required. Pre-requisite: MCN 644 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

MCN 646  Women's Health NP Residency II  3 cr
Provides women's health nurse practitioner students the opportunity to fully express all DNP competencies. The women's health nurse practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project. Pre-requisite: MCN 645 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.
MCN 647 Women's Health NP Res III 3 cr
Final course in residency series as women’s health nurse practitioner student continues to implement and evaluate project plan. Provides women’s health nurse practitioner student the opportunity to fully express all DNP competencies. The women’s health nurse practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system’s change project.
Pre-requisite: MCN 646 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

MCN 654 Pediatric Primary Care NP PP&D 3 cr
This course assists the pediatric primary care nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the pediatric primary care nurse practitioner student's selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

MCN 655 Ped Prim Care NP Residency I 3 cr
This course assists the neonatal nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the neonatal nurse practitioner student's selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

Pre-requisite: MCN 654 Minimum Grade of C and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

MCN 656 Ped Primary Care NP Res II 3 cr
Provides pediatric primary care nurse practitioner students the opportunity to fully express all DNP competencies. The pediatric primary care nurse practitioner student, guided by the faculty facilitator, will implement the scholarly doctoral system’s change project.
Pre-requisite: MCN 655 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

MCN 657 Ped Primary Care NP Res III 3 cr
Final course in residency series as the Pediatric Primary Care Nurse Practitioner student continues to implement and evaluate project plan. Provides the Pediatric Primary Care Nurse Practitioner student the opportunity to fully express all DNP competencies. The Pediatric Primary Care Nurse Practitioner student, guided by the core faculty and advisor completes quality improvement evidence-based system’s change project.
Pre-requisite: MCN 656 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

MCN 674 Neonatal NP PP&D 3 cr
This course assists the neonatal nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the neonatal nurse practitioner students’ selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

MCN 675 NNP Residency I 3 cr
This course assists the neonatal nurse practitioner DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the neonatal nurse practitioner student’s selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.
MCN 677  NNP Residency III  3 cr
Final course in residency series as neonatal nurse practitioner student continues to implement and evaluate project plan. Provides neonatal nurse practitioner student the opportunity to fully express all DNP competencies. The neonatal nurse practitioner student, guided by the core faculty and advisor, will implement the scholarly doctoral system's change project. Pre-requisite: MCN 675 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

MCN 692  MCN DNP Project Progression  3 cr
Students will register for this course to complete residency course work under supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

Mathematics (MA) (MA)

MA 105  Algebra for Math Placement  4 cr
Introduction to equations of straight lines in various forms and transition between these forms; Manipulation and solution of linear equations and linear inequalities; graphing solution sets on the number line and expression of solution sets in both set and interval notation. Simplification, multiplication, and division of polynomials; Factoring quadratic expressions and the solution of quadratic equations by factoring; Solution of basic rational equations; Addition, subtraction, multiplication and division of rational expressions; simplification of complicated ratios of rational expressions. Working with set operations: Absolute value inequalities and equations and compound inequalities; Addition, subtraction, multiplication, division, and simplification of expressions with radicals and/or rational exponents and rationalization of numerator or denominator. Credit for both MTH 100, MTH 101 and MA 105 is not allowed.

MA 110  Finite Mathematics  3 cr
This course is intended to give an overview of topics in finite mathematics together with their applications. The course includes logic, sets, counting, permutations, combinations, basic probability, descriptive statistics and their applications. Students are required to have a scientific calculator. Core Course. Note: May be offered for Honors credit NOTE: MA 110 is not a Pre-requisite for nor is it intended to be preparatory for any course listed below except MA 201 and MA 202.

MA 112  Precalculus Algebra  3 cr
The course covers algebraic, graphical and numerical properties of functions, focusing on linear, quadratic, general polynomial, absolute value, rational, exponential, and logarithmic functions. Topics also include equations, inequalities, and complex numbers. Applications of mathematics to modeling real world situations are emphasized. Credit for both MA 112 and MA 115 not allowed. Core Course. Pre-requisite: ACT Math 22 or MTH 100 Minimum Grade of C or MyMathTest 070 or MTH 101 Minimum Grade of C or MA 105 Minimum Grade of C or SAT Mathematics 510 or MATH SECTION SCORE 540 or TRNFR Math Placement 2. MTH 100 can be taken concurrently with this course.

MA 113  Precalculus Trigonometry  3 cr
Continuation of MA 112. Topics include numerical, graphical and algebraic properties of trigonometric functions, inverse trigonometric functions, right angle trigonometry, parametric equations, polar coordinates, and conic sections. Development and application of mathematical models to real-world situations is emphasized. Credit for both MA 113 and MA 115 not allowed. Core Course. Pre-requisite: ACT Math 24 or MyMathTest 080 or MA 112 Minimum Grade of C or SAT Mathematics 560 or MATH SECTION SCORE 580 .

MA 115  Precal Algebra-Trigonometry  4 cr
This fast-paced course is designed as a review of the algebra and trigonometry needed in calculus. It covers the material of MA 112 and MA 113 in one semester. Topics include numerical, graphical and algebraic properties of polynomial, rational, exponential, logarithmic, and trigonometric functions; inverse trigonometric functions; right angle trigonometry; parametric equations; polar coordinates and conic sections. Applications of mathematics to modeling real world situations are emphasized. Credit for both MA 112 and MA 115 not allowed; credit for both MA 113 and MA 115 not allowed. Core Course. Pre-requisite: ACT Math 25 or MyMathTest 080 or SAT Mathematics 570 or MATH SECTION SCORE 590.

MA 120  Calculus and Its Applications  3 cr
Introduction to calculus with an emphasis on problem solving and applications. Key concepts are presented graphically, numerically and algebraically, although the stress is on a clear understanding of graphs and tabular data. The course covers: algebraic, exponential and logarithmic functions, their properties and their use in modeling; the concepts of derivative and definite integral and applications. Students are encouraged to have a graphing calculator. Credit for both MA 120 and MA 125 not allowed. Students must have sufficient Mathematics Placement Exam score. MA 120 is not a prerequisite for subsequent calculus courses. Core Course. Pre-requisite: ACT Math 23 or MyMathTest 080 or MA 112 Minimum Grade of C or MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or SAT Mathematics 530 or MATH SECTION SCORE 560.
MA 125  Calculus I  4 cr
The course provides an introduction to calculus with emphasis on differential calculus. Topics include limits of functions, derivatives of algebraic and transcendental functions, application of the derivative to curve sketching, optimization problems, and examples in the natural sciences, engineering, and economics. The course concludes with an introduction to anti-derivatives, definite integrals, and the fundamental theorem of calculus. Credit for both MA 120 and MA 125 is not allowed. Prerequisite: Sufficient Mathematics Placement Exam score. Core Course. NOTE: MA 110, MA 112, MA 113, MA 115, MA 120, and MA 125 have strict Pre-requisites. To be able to enroll in these courses a student needs either to pass the Pre-requisite course with C or better or to have a sufficient Mathematics Placement Exam score. Pre-requisite: ACT Math 27 or MyMathTest 090 or MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or SAT Mathematics 620 or MATH SECTION SCORE 640.

MA 126  Calculus II  4 cr
This course is a continuation of MA 125 with emphasis on integral calculus. Topics include techniques of integration; applications of the definite integral to geometry, natural sciences, engineering, and economics; improper integrals; infinite sequences and series; Taylor polynomials and Taylor series; parametric equations and polar coordinates. Core Course. Pre-requisite: MA 125 Minimum Grade of C.

MA 150  Contemporary Math-Stat Seminar  1 cr
This course gives an overview of modern mathematics and statistics from the point of view of the practitioners. The course is designed for majors in mathematics and statistics at all levels as well as those students who are considering mathematics or statistics as a major or minor area of study. Topics usually included are elements of geometry, algebra, analysis, methods of statistical inference, the role of the computer in the analytical sciences; these topics vary from semester to semester. This course cannot be taken for credit simultaneously with ST 150. NOTE: May be offered for Honors Credit.

MA 201  Math for Elem Teachers I  3 cr
An examination of some of the major ideas encountered in the teaching of elementary mathematics. Topics include introduction to problem solving, sets, relations, logic, numeration systems, elementary number theory, properties and operations for whole numbers, integers, rational numbers, and real numbers. NOTE: MA 201 does not fulfill graduation requirements for any curriculum other than College of Education and Professional Studies. Pre-requisite: MA 110 Minimum Grade of C or MA 112 Minimum Grade of C or MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or MA 120 Minimum Grade of C or MA 125 Minimum Grade of C or MA 126 Minimum Grade of C or MA 150 Minimum Grade of C.

MA 202  Math for Elem Teachers II  3 cr
Topics covered are those that a prospective elementary or middle school teacher should expect to encounter in the teaching of geometry in elementary or middle school. Topics include geometric shapes, measurement, triangle congruence and similarity, and coordinate geometry. NOTE: MA 202 does not fulfill graduation requirements for any curriculum other than College of Education and Professional Studies. Pre-requisite: MA 110 Minimum Grade of C or MA 112 Minimum Grade of C or MA 113 Minimum Grade of C or MA 115 Minimum Grade of C or MA 120 Minimum Grade of C or MA 125 Minimum Grade of C or MA 126 Minimum Grade of C or MA 150 Minimum Grade of C.

MA 227  Calculus III  4 cr
Vectors; functions of several variables; partial derivatives; local linearity; directional derivatives; the gradient; differential of a function; the chain rule; higher order partial derivatives; optimization of functions of several variables; multiple integrals and their applications; parametric curves and surfaces; vector fields; line and surface integrals; vector calculus. Core Course. Pre-requisite: MA 126 Minimum Grade of C.

MA 237  Linear Algebra I  3 cr
This course provides an introduction to linear algebra. Topics include systems of linear equations, matrices, Gaussian elimination, rank, linear independence, subspaces, basis, dimension, linear transformations, determinants, eigenvalues and eigenvectors, change of basis, diagonalization, the abstract concept of a vector space, and applications. Core Course. Pre-requisite: MA 126 Minimum Grade of C.

MA 238  Differential Equations I  3 cr
This course provides an introduction to ordinary differential equations. Topics include first order differential equations, higher order linear differential equations, systems of first order linear differential equations, Laplace transforms, methods for approximating solutions to first order differential equations, applications. Students should have taken or be taking MA 227. Core Course. Pre-requisite: MA 227 Minimum Grade of D. MA 227 can be taken concurrently with this course.

MA 267  Discrete Math Structures  3 cr
This course is an introduction to discrete mathematics for students majoring in computer-related areas. Students will be introduced to concepts and methods that are essential to theoretical computer science. A strong emphasis is placed on mathematical reasoning and proofs. Topics include sets, functions, induction, recursion, combinatorics and graphs. Students must have sufficient mathematics placement exam score. Pre-requisite: ACT Math 23 or MyMathTest 080 or MA 113 Minimum Grade of C or MA 115 Minimum Grade of C.

MA 290  Special Topics  1 TO 3 cr
Selected topics in elementary undergraduate mathematics. This course may be repeated for a maximum of six credits.
MA 303 Math for Elem Teachers III 3 cr
An exploration of problem solving strategies. Problems exemplifying the various problem solving strategies studied. Emphasis on the development of problem solving skills by exploring interesting problems which demand for their solution that the student select from a wide variety of possible strategies and use a wide variety of conceptual tools. NOTE: MA 303 does not fulfill graduation requirements for any curriculum other than elementary education.
Pre-requisite: MA 202 Minimum Grade of C.

MA 311 Intro to Number Theory 3 cr
An introduction to classical number theory with a balance between theory and computation. Topics include mathematical induction, divisibility properties, properties of prime numbers, the theory of congruences, number theoretic functions, continued fractions.
Pre-requisite: MA 126 Minimum Grade of C.

MA 316 Linear Algebra II 3 cr
A continuation of MA 237. Topics include inner product spaces, spectral theorem for symmetric operators, complex vector spaces, Jordan canonical form. Additional topics such as duality and Tensor products among others to be included at the discretion of the instructor.
Pre-requisite: MA 237 Minimum Grade of C.

MA 320 Foundations of Math - W 3 cr
A transition to higher mathematics with an emphasis on proof techniques. Topics include symbolic logic, elementary set theory, induction, relations, functions, and the structure of the number system. Mathematics and Statistics majors are encouraged to take MA 320 as soon as possible after completing MA 125.
Pre-requisite: MA 125 Minimum Grade of C and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

MA 321 Elementary Geometry 3 cr
This course covers the major topics from the secondary school curriculum of plane and solid geometry from a modern viewpoint. Emphasis will be placed on axioms, undefined terms, definitions, theorems, and proofs. Topics include straightedge and compass constructions, Euclidean geometry, Euclidean space, congruence, isometry, reflection, rotation, translation, vectors, parallel postulate, similarity, Pythagorean theorem, coordinate geometry, non-Euclidean geometry, projective geometry, projective space, perspective, homogenous coordinates.
Pre-requisite: MA 320 Minimum Grade of C.

MA 332 Differential Equations II 3 cr
Pre-requisite: MA 227 Minimum Grade of C and MA 238 Minimum Grade of C.

MA 334 Advanced Calculus I 3 cr
This is the first of a two course sequence designed to provide students with the theoretical context of concepts encountered in MA 125 through MA 227. Topics covered include Completeness Axiom, sequences of real numbers, supremum and infimum, Cauchy sequences, open sets and accumulation points in Euclidean space, completeness of Euclidean space, series of real numbers and vectors, compactness, Heine- Borel Theorem, connectedness, continuity, Extremum Theorem, Intermediate Value Theorem, differentiation of functions of one variable.
Pre-requisite: MA 227 Minimum Grade of C and MA 237 Minimum Grade of C and MA 320 Minimum Grade of C.

MA 335 Advanced Calculus II 3 cr
This is the second of a two course sequence designed to provide students with the theoretical context of concepts encountered in MA 125 through MA 227. Topics covered include integration of functions of one variable, pointwise and uniform convergence, integration and differentiation of series, differentiable mappings of several variables, chain rule, product rule and gradients, Mean Value Theorem, Taylor's Theorem, Inverse Function Theorem, Implicit Function Theorem.
Pre-requisite: MA 334 Minimum Grade of C.

MA 354 Comp Assist Math Modeling - W 3 cr
This course is intended to provide the basic ideas regarding formulation, development, testing and reporting of mathematical models of various real world problems. Deterministic and stochastic models, optimization and simulations will be covered. Emphasis will be on careful mathematical formulations and the use of computer software, such as Microsoft Excel, Mathematica and Matlab. A term project will be an important component of this course. The course is taught in a laboratory setting with computers as lab equipment.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and MA 227 Minimum Grade of C and MA 238 Minimum Grade of C.

MA 367 Combinatorial Enumeration 3 cr
An introduction to the mathematical theory of counting. Basic counting principles, permutations and combinations, partitions, recurrence relations, and a selection of more advanced topics such as generating functions, combinatorial designs, Ramsey theory, or group actions and Poyla theory.
Pre-requisite: MA 126 Minimum Grade of C.

MA 390 Special Topics 1 TO 3 cr
Selected topics in advanced undergraduate mathematics. This course may be repeated for a maximum of six credits.

MA 410 History of Mathematics - W 3 cr
Historical survey of the general development of mathematics with a balance of historical perspective and mathematical structure.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and MA 320 Minimum Grade of C).
MA 413  Abstract Algebra I - W  3 cr
An introduction to group theory and ring theory. Topics
include permutations and symmetries, subgroups, quotient
groups, homomorphisms, as well as examples of rings,
integral domains, and fields.
Pre-requisite: MA 237 Minimum Grade of C and (MA 311
Minimum Grade of C or MA 320 Minimum Grade of C or MA
334 Minimum Grade of C) and (EH 102 Minimum Grade of
C or EH 105 Minimum Grade of C).

MA 414  Abstract Algebra II - W  3 cr
A continuation of MA 413 focusing on rings and fields.
Topics include rings, ideals, integral domains, fields and
extension fields. Geometric constructions and Galois theory
are introduced.
Pre-requisite: MA 413 Minimum Grade of C and (EH 102
Minimum Grade of C or EH 105 Minimum Grade of C).

MA 434  Topology  3 cr
An introduction to topology with emphasis on the geometric
aspects of the subject. Topics covered include surfaces,
topological spaces, open and closed sets, continuity,
compactness, connectedness, product spaces, and
identification and quotient spaces. Credit for both MA 434
and MA 542 is not allowed.
Pre-requisite: MA 227 Minimum Grade of C and MA 237
Minimum Grade of C and MA 320 Minimum Grade of C.

MA 436  Numerical Analysis  3 cr
Topics include methods of numerical solution of nonlinear
equations in one variable, fixed points, contraction
mapping and functional iteration methods, interpolation
and approximation methods, numerical differentiation
and integration, numerical solution of ordinary differential
equations, analysis of error for various numerical
procedures. Implementation of Mathematica of all numerical
methods discussed in class is an essential part of the
course.
Pre-requisite: MA 227 Minimum Grade of C and MA 238
Minimum Grade of C. MA 238 can be taken concurrently
with this course.

MA 437  Complex Variables  3 cr
Arithmetic of complex numbers; regions in the complex
plane, limits, continuity and derivatives of complex functions;
elementary complex functions; mapping by elementary
functions; contour integration, power series, Taylor
series, Laurent series, calculus or residues; conformal
representation; applications. Credit for both MA 437 and MA
537 not allowed.
Pre-requisite: MA 238 Minimum Grade of C.

MA 451  Probability  3 cr
A comprehensive introduction to probability, the
mathematical theory used to model uncertainty, covering
the axioms of probability, random variables, expectation,
classical discrete and continuous families of probability
models, the law of large numbers and the central limit
theorem. Credit for both MA 451 and MA 550 is not allowed.
Pre-requisite: MA 227 Minimum Grade of C and MA 237
Minimum Grade of C.

MA 452  Financial Mathematics  3 cr
Introduction to financial mathematics and a brief introduction
to financial economics. Students will learn about the time
value of money, annuities, loans, bonds, general cash flows
and portfolios, immunization, general derivatives, options,
forwards and futures, swaps and hedging from the point of
view of an actuarial scientist.
Pre-requisite: MA 126 Minimum Grade of C.

MA 458  Operations Research - W  3 cr
An introduction to linear programming. The course will
include a study of the simplex method as well as using
computers to solve linear systems of equations. As time
permits, topics covered will include sensitivity analysis,
duality, integer programming, transportation, assignment,
transshipment, and networks. Credit for both MA 458 and
MA 567 is not allowed.
Pre-requisite: (MA 215 Minimum Grade of C or MA 237
Minimum Grade of C) and (EH 102 Minimum Grade of C or
EH 105 Minimum Grade of C).

MA 467  Mathematical Logic  3 cr
An introduction to formal first-order logic, first-order
metatheory, and its extensions. Topics include axiom
systems and their models, completeness, compactness, and
recursive sets and functions. Identical with PHL 467. Credit
cannot be received for both PHL 467 and MA 467.
Pre-requisite: PHL 321 Minimum Grade of C or MA 311
Minimum Grade of C or MA 316 Minimum Grade of C or MA
318 Minimum Grade of C or MA 320 Minimum Grade of C
or MA 321 Minimum Grade of C or MA 332 Minimum Grade
of C or MA 334 Minimum Grade of C or MA 335 Minimum
Grade of C or MA 354 Minimum Grade of C or MA 367
Minimum Grade of C or MA 410 Minimum Grade of C or MA
413 Minimum Grade of C or MA 414 Minimum Grade of C
or MA 434 Minimum Grade of C or MA 436 Minimum Grade
of C or MA 437 Minimum Grade of C or MA 451 Minimum
Grade of C or MA 458 Minimum Grade of C or MA 490
Minimum Grade of C or MA 537 Minimum Grade of C or MA
542 Minimum Grade of C or MA 550 Minimum Grade of C.

MA 481  Cryptography  3 cr
This course provides an introduction to classical and
modern methods of message encryption and decryption
(cryptography) as well as possible attacks to cryptosystems
(cryptanalysis). Topics include classical (symmetric)
cryptosystems (DES, AES), public-key (asymmetric)
cryptosystems (Diffie-Hellman, RSA, ElGamal), modes of
operation, one-way and trapdoor functions, Hash functions,
cryptographic protocols. Credit for both MA 481 and MA 581
is not allowed.
Pre-requisite: MA 311 Minimum Grade of C or (MA 126
Minimum Grade of C and MA 267 Minimum Grade of C).

MA 540  Special Topics  1 TO 3 cr
Selected topics in advanced undergraduate mathematics.
This course may be repeated for a maximum of six credits.

MA 494  Directed Studies  1 TO 3 cr
Directed individual study. Requires permission of
department chair.
MA 499  Honors Senior Project - H  3 TO 6 cr
With the guidance and advice of a faculty mentor, honors students will identify, and carry out a research project in Mathematics. The outcome of the research project will include a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three members of the faculty, chaired by the faculty mentor.

MA 501  Number Systems  3 cr
A case study of axiom systems and the deductive method for graduate students in Mathematics Education. It is expected that students in this course will practice and improve their logical skills, better understand proof as a mathematical activity, and study the similarities and differences between several commonly used number systems.
Pre-requisite: MA 321 Minimum Grade of C or MA 413 Minimum Grade of C.

MA 502  Intro to Abstract Algebra  3 cr
An introduction to the fundamental concepts of modern algebra such as groups, rings, and fields through concrete examples. This course is designed for graduate students in the College of Education and Professional Studies. Pre-requisite: MA 413 Minimum Grade of C.

MA 503  Introduction to Analysis  3 cr
A careful look at the elements, procedures, and applications of differential and integral calculus. This course is designed for graduate students in the College of Education and Professional Studies. Pre-requisite: MA 227 Minimum Grade of C.

MA 504  Introduction to Geometry  3 cr
An introduction to the foundations of geometry using both synthetic and metric approaches. Euclidean, finite, projective, and hyperbolic geometrics are discussed. The axioms for various geometries are discussed. The course is designed for graduate students in the College of Education and Professional Studies. Pre-requisite: MA 321 Minimum Grade of C.

MA 505  Mathematical Problem Solving  3 cr
An in-depth activity-based approach to the methods and strategies for mathematical problem solving for students in Mathematical Education. Problems selected from logic, algebra, analysis, geometry, combinatorics, number theory and probability. This course is designed for graduate students in the College of Education and Professional Studies.
Pre-requisite: MA 126 Minimum Grade of C.

MA 506  Statistics for Teachers  3 cr
Prepares in-service and pre-service teachers to teach statistics in high schools using data-based approach. Uses hands-on-activities approach and simulation of situations to teach concepts and technology to teach data analysis. This course is designed for graduate students in the College of Education and Professional Studies.
Pre-requisite: MA 126 Minimum Grade of C.

MA 507  Adv Ordinary Differential Eqns  3 cr
A graduate-level introduction to topics of ordinary differential equations and their applications in physics and engineering.

MA 508  Adv Partial Differential Eqns  3 cr
A continuation of MA 507 with more emphasis on theory of partial differential equations, as well as their applications in physics and engineering problems.

MA 511  Algebra I  3 cr
A graduate level introduction to group theory. Topics include quotient groups, homomorphisms, group actions, Sylow theorems, composition series, simple groups, free groups, fundamental theorem of abelian groups.

MA 512  Algebra II  3 cr
A graduate level introduction to ring theory and fields. Topics include ring homomorphisms, quotient rings, ideals, rings of fractions, Euclidean domains, principal ideal domains, unique factorization domains, modules, finite fields, field extensions.
Pre-requisite: MA 511 Minimum Grade of C.

MA 515  Number Theory  3 cr
Modular arithmetic, arithmetic functions; prime numbers; algebraic number theory.

MA 516  Topics in Number Theory  3 cr
A second course in number theory, covering topics of interest to the students and instructor.
Pre-requisite: MA 515 Minimum Grade of C.

MA 518  Linear Algebra I  3 cr
Fields, vector spaces, dual spaces, quotient spaces, multilinear forms, linear transformations, algebras, adjoints, eigenvalues.

MA 519  Linear Algebra II  3 cr
Triangular form, nilpotence, Jordan form, inner products, self-adjoint transformations, positive transformations, isometries, Spectral Theorem, polar decomposition, applications to analysis.
Pre-requisite: MA 518 Minimum Grade of C.

MA 521  Enumerative Combinatorics  3 cr
Pigeonhole principle, basic counting techniques, binomial coefficients, inclusion-exclusion principle, recurrence relations, generating functions, systems of distinct representatives, finite fields.

MA 525  Graph Theory  3 cr
Fundamental concepts, connectedness, graph coloring, planarity and Kuratowski’s theorem, four-color theorem, chromatic polynomial, Eulerian and Hamiltonian graphs, matching theory, network flows, NP-complete graph problems, Markov chains, matroids.

MA 535  Real Analysis I  3 cr
An introduction to real analysis. Topics include: the metric topology of the reals, limits and continuity, differentiation, Riemann-Stieltjes integral. Prerequisite: Undergraduate course in advanced calculus.
MA 536  Real Analysis II  3 cr
A continuation of MA 535. Topics covered include
sequences and series of functions, differentiation and
integration in several variables, an introduction to to the
Lebesgue integral and differential forms as time allows.
Pre-requisite: MA 535 Minimum Grade of C.

MA 537  Complex Analysis  3 cr
Arithmetic of complex numbers; regions in the complex
plane; limits, continuity and derivatives of complex functions;
complex functions mappings; elementary functions; contour integration; power series; Taylor
series; Laurent series; calculus of residues; conformal
representation; applications. Credit for both MA 537 and MA
437 is not allowed.
Pre-requisite: MA 238 Minimum Grade of C or MA 338
Minimum Grade of C.

MA 538  Topics in Complex Analysis  3 cr
A second course in complex analysis, covering topics of
interest to the students and instructor.
Pre-requisite: MA 537 Minimum Grade of C.

MA 539  Measure Theory  3 cr
Foundations of the general theory of measure and
integration with particular attention to the Lebesgue integral.
Function spaces, product measure and Fubini's theorem,
the Radon-Nikodym theorem and applications to probability
theory are discussed, and possibly additional topics such as
Haar measure or the Ergodic Theorem.
Pre-requisite: MA 536 Minimum Grade of C.

MA 540  Differential Geometry  3 cr
Local and global theory of curves and surfaces in three-
dimensional space.

MA 542  Topology I  3 cr
An introduction to topology with emphasis on the geometric
aspects of the subject. Topics covered include surfaces,
topological spaces, open and closed sets, continuity,
compactness, connectedness, product spaces, and
identification and quotient spaces. Credit for both MA 542
and MA 434 is not allowed.

MA 543  Topology II  3 cr
A continuation of MA 542. Topics covered include the
fundamental group, triangulations, classification of surfaces,
homology, the Euler-Poincare formula, the Borsuk-Ulam
theorem, the Lefschetz fixed-point theorem, knot theory,
covering spaces, and applications.
Pre-requisite: MA 542 Minimum Grade of C or MA 434
Minimum Grade of C.

MA 550  Probability  3 cr
A comprehensive introduction to probability, the
mathematical theory used to model uncertainty, covering
the axioms of probability, random variables, expectation,
classical discrete and continuous families of probability
models, the law of large numbers and the central limit
theorem. Credit for both MA 550 and MA 451 is not allowed.
Pre-requisite: (MA 227 Minimum Grade of C or MA 237
Minimum Grade of C).

MA 551  Theory of Statistics  3 cr
A comprehensive introduction to the mathematical
foundations of statistics. Sufficient statistics and information,
parameter estimation, maximum likelihood and moment
estimation, optimality properties of estimators and
confidence intervals. Hypothesis testing, likelihood ratio
tests and power functions. Credit for both MA 551 and ST
470 is not allowed.
Pre-requisite: MA 451 Minimum Grade of C or MA 550
Minimum Grade of C.

MA 555  Statistical Analysis I  3 cr
A first course in an integrated two course sequence in
applied statistical theory and methods for research workers
in technical fields. Coverage includes probability and basic
probability models, mathematical expectations, random
sampling processes and central limit theorem, estimation,
hypothesis testing and power analysis, some applications of
the theory of least squares. Computer assisted data analysis
is used.

MA 560  Statistical Analysis II  3 cr
A second course (continuation of MA 555) in an integrated
two-course sequence in applied statistical theory and
methods for research workers in technical fields. Coverage
includes regression analysis, design and analysis of
experiments, factorial experiments, analysis of covariance,
nonparametric analytical techniques, analysis of count data.
Computer assisted data analysis is used.
Pre-requisite: MA 555 Minimum Grade of C.

MA 565  Numerical Analysis  3 cr
An introduction to Numerical Analysis. Topics include error
analysis, systems of linear equations, nonlinear equations,
integration, ordinary differential equations among others.
Pre-requisite: MA 535 Minimum Grade of C.

MA 567  Operations Research  3 cr
An introduction to linear programming. The course will
include a study of the simplex method as well as using
computers to solve linear systems of equations. As time
permits, topics covered will include sensitivity analysis,
duality, integer programming, transportation, assignment,
transshipment, and networks. Credit for both MA 567 and
MA 458 is not allowed.
Pre-requisite: (MA 215 Minimum Grade of C or MA 237
Minimum Grade of C).
MA 568  Topics in Operations Research  3 cr
A second course in operations research, covering topics of interest to the students and instructor.
Pre-requisite: MA 567 Minimum Grade of C.

MA 571  Ordinary Diff Equations  3 cr
An introduction to ordinary differential equations from a dynamical systems perspective. Topics include existence and uniqueness theorems, dependence on initial data, linear systems and exponential of operators, stability of equilibria, Poincare-Bendixon theorem. Additional topics such as applications to population dynamics, classical mechanics, periodic attractors among others will be included at the discretion of the instructor.
Pre-requisite: MA 518 Minimum Grade of C.

MA 572  Partial Differential Equations  3 cr
An introduction to partial differential equations emphasizing spectral methods. Topics include elementary Hilbert spaces, Fourier series and integrals and their applications to the study of the basic partial differential equations of mathematical physics. More advanced topics such as asymptotic properties and regularity of solutions and nonlinear equations among others will be included at the discretion of the instructor.
Pre-requisite: MA 536 Minimum Grade of C.

MA 581  Cryptography  3 cr
This course provides an introduction to classical and modern methods of message encryption and decryption (cryptography) as well as possible attacks to cryptosystems (cryptanalysis). Topics include classical (symmetric) cryptosystems (DES, AES), public-key (asymmetric) cryptosystems (Diffie-Hellman, RSA, ElGamal), modes of operation, one-way and trapdoor functions, Hash functions, cryptographic protocols. Credit for both MA 481 and MA 581 is not allowed.
Pre-requisite: MA 311 Minimum Grade of C or (MA 126 Minimum Grade of C and MA 267 Minimum Grade of C).

MA 590  Special Topics -  1 TO 3 cr
Selected topics in elementary graduate mathematics. This course may be repeated for a maximum of six credits.

MA 592  Seminar  1 cr
Student Seminar. Topics covered vary. This course may be repeated indefinitely, but only two credits count towards the degree. Grading system: satisfactory/unsatisfactory.

MA 594  Directed Study  1 TO 3 cr
Directed individual study. Prerequisites: Approval of the department chair.

MA 599  Thesis  1 TO 6 cr
Thesis. Requires approval of research prospectus by Department Graduate Committee.

MTH 100  Essentials for Precalculus  3 cr
This course covers the foundations required for success in Precalculus Algebra. This course will provide an introduction to manipulating and solving algebraic expression, linear and quadratic equations and inequalities. Graphing functions, lines, piecewise functions, and quadratics will be explored. The algebraic manipulation of exponents, logarithms, rational and radical expressions, and polynomials will be discussed. Practical applications and problem solving are also included.
Co-requisite: MA 112
Pre-requisite: (MyMathTest 060 or ACT Math 18 or MATH SECTION SCORE 500 )

MTH 101  College Algebra  4 cr
This course combines Introductory Algebra and Intermediate College Algebra. Topics include fractions, percents, and order of operations. Various forms of linear equations manipulated; the solutions and graphs of linear equations and linear inequalities explored. Also included, rate of change, functions and graphs, piecewise-defined functions, solutions to absolute value inequalities expressed in set and interval notation, and systems of inequalities. Simplification of rational expressions, operations on rational and radical expressions, and solutions to rational and radical equations explored. Quadratic expressions factored and solutions to quadratic equations by factoring and graphing. Practical applications to problem solving are included. Pre-requisite: None. Credit for both MTH 100, MTH 101 and MTH 105 is not allowed.

Mechanical Engineering (ME) (ME)

ME 135  Engr Graphics and Comm  3 cr
Graphical representation of objects, orthographic, oblique, and isometric views. Freehand lettering and sketching, computer aided graphics, presentation of graphics based on numerical data using spreadsheet, word processor and presentation software. Fee.
Pre-requisite: MA 125 Minimum Grade of C. MA 125 can be taken concurrently with this course.

ME 312  Mech Engr Thermodynamics  3 cr
Thermodynamics power and refrigeration cycles, gas mixtures, psychrometrics, and combustion. One-half hour of design.
Pre-requisite: EG 270 Minimum Grade of C.

ME 314  Machine Component Design  3 cr
Analysis and design of machine elements to accomplish given tasks within limits of stress and size. One hour of design.
Pre-requisite: EG 284 Minimum Grade of C and EG 315 Minimum Grade of C.

Mathematics For College (MTH) (MTH)
ME 316  Instrumentation & Exp Method  3 cr
Measuring system analysis and design, signal conditioning, analysis of data, statistical error analysis, communication of results.
Pre-requisite: (EG 220 Minimum Grade of C and MA 238 Minimum Grade of C and PH 202 Minimum Grade of C and ME 328 Minimum Grade of C).

ME 317  Heat Transfer  3 cr
Steady and transient, multi-dimensional conduction, forced and natural convection, radiation, and heat exchangers. One-half hour of design.
Pre-requisite: EG 270 Minimum Grade of C and ME 328 Minimum Grade of C and MA 238 Minimum Grade of C and EG 360 Minimum Grade of C.

ME 319  Instrumentation & Exp Method Lab  1 cr
Laboratory component of ME 316 Instrumentation. The same grade will be given in both courses.
Co-requisite: ME 316
Pre-requisite: EG 220 Minimum Grade of D and (MA 238 Minimum Grade of D or MA 338 Minimum Grade of D) and (PH 202 Minimum Grade of D or PH 217 Minimum Grade of D).

ME 326  Materials Science  3 cr
Mechanical, chemical, and physical properties of materials. Relationship between structure, processing, and properties engineering materials. One-half hour of design.
Pre-requisite: (PH 202 Minimum Grade of C or PH 217 Minimum Grade of C) and (CH 115 Minimum Grade of C or CH 131 Minimum Grade of C) and EG 315 Minimum Grade of C.

ME 328  ME Analysis  4 cr
Numerical solutions of differential equations with applications to ME simulation and design. Introduction to Finite Element Analysis. One-half hour of design.
Pre-requisite: MA 227 Minimum Grade of C and MA 237 Minimum Grade of C and MA 238 Minimum Grade of C.

ME 336  Material Science Lab-W  1 cr
Experimental study on the effect of thermal and mechanical processing on properties.
Pre-requisite: ME 326 Minimum Grade of D and PH 202 Minimum Grade of C and CH 131 Minimum Grade of C and EG 315 Minimum Grade of C. ME 326 can be taken concurrently with this course.

ME 365  Design of Fluid Power Systems  3 cr
Fluid power components are studied in detail. Design of complete hydraulic systems is stressed. One hour of design.
Pre-requisite: EG 284 Minimum Grade of D and EG 315 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 328 Minimum Grade of D.

ME 410  Principles of Eng Design-W  3 cr
In this course, students learn to apply engineering theory and methods to the design process. Topics include problem definition, concept development and evaluation, project management, materials selection, risk analysis, quality improvement and ethics in design (0-3-0).
Pre-requisite: ME 314 Minimum Grade of C and EG 231 Minimum Grade of C and ME 336 Minimum Grade of C and ME 317 Minimum Grade of C and ME 316 Minimum Grade of C. ME 336 and ME 317 can be taken concurrently with this course.

ME 411  Thermal System Design  3 cr
Thermal system design using principles of thermodynamics, fluid mechanics, heat transfer, and numerical simulation. Communication of results. Three hours of design.
Pre-requisite: ME 312 Minimum Grade of D and ME 317 Minimum Grade of D and ME 328 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D).

ME 412  Thermal Science Laboratory  1 cr
Experimental study of thermal science principles and systems. Communication of results.
Pre-requisite: ME 312 Minimum Grade of D and ME 316 Minimum Grade of D and ME 317 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D).

ME 414  Capstone Design  1 cr
This course is considered a "Senior Capstone Course."
Co-requisite: ME 416
Pre-requisite: ME 410 Minimum Grade of D.

ME 416  Capstone Design Project  2 cr
This is a team-based capstone project course. Each team is assigned a unique design problem in mechanical engineering or a closely-related field. Students must be enrolled concurrently in ME 414 - Capstone Design.
Co-requisite: ME 414
Pre-requisite: ME 410 Minimum Grade of D.

ME 417  Dynamics of Machines  3 cr
A study of the effects of external forces and moments on the motion of machines. Topics include the study of the position, velocity and acceleration of machine components during operation and the determination of forces on the connections and members. One hour of design.
Pre-requisite: EG 284 Minimum Grade of D and EG 315 Minimum Grade of D and ME 328 Minimum Grade of D.

ME 419  Computer Aided Design & Manu  3 cr
Introduction to computer aided design (CAD) and computer aided manufacturing (CAM) principles and their practical applications as fundamental elements of contemporary product design and manufacturing. This course is dual listed with an equivalent 500-level mechanical engineering course. One hour of design.
Pre-requisite: ME 135 Minimum Grade of D and ME 314 Minimum Grade of D.

<tr>
<td>ME 421</td>
<td>Mechanical System Design</td>
<td>3 cr</td>
<td>A study of design techniques as applied to mechanical components and systems. Computer simulation and numerical techniques. Communication of results. Three hours of design. Pre-requisite: ME 314 Minimum Grade of D and ME 328 Minimum Grade of D.</td>
<td></td>
</tr>
<tr>
<td>ME 422</td>
<td>Gas Turbines</td>
<td>3 cr</td>
<td>Introduction to gas turbines covering thermodynamics, fluid mechanics, combustion, cycle analysis, compressors, turbines and component design. One hour of credit. Pre-requisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D.</td>
<td></td>
</tr>
<tr>
<td>ME 426</td>
<td>Dynamic Systems and Control</td>
<td>3 cr</td>
<td>Modeling dynamic systems. Introduction to the principles of feedback control systems. Analysis of linear systems. Pre-requisite: (MA 238 Minimum Grade of D or MA 338 Minimum Grade of D) and ME 316 Minimum Grade of D and ME 328 Minimum Grade of D.</td>
<td></td>
</tr>
<tr>
<td>ME 429</td>
<td>Controls &amp; Instr. Lab</td>
<td>1 cr</td>
<td>Design and implementation of analog and digital feedback control of systems. Design and implementation of measurement systems, including signal conditioning, analog-to-digital and digital-to-analog conversion, statistical estimation of error, data analysis. Communication of laboratory results is emphasized. Pre-requisite: ME 426 Minimum Grade of D. ME 426 can be taken concurrently with this course.</td>
<td></td>
</tr>
<tr>
<td>ME 430</td>
<td>Mechanism Synthesis</td>
<td>3 cr</td>
<td>Kinematic synthesis of planar linkages for function, path, and motion generation. Topics include: degrees of freedom; graphical, linear analytical, and nonlinear analytical methods; and curvature theory. This course is dual-listed with an equivalent 500-level mechanical engineering course. One hour of design. Pre-requisite: EG 284 Minimum Grade of D and ME 328 Minimum Grade of D.</td>
<td></td>

<td>Turbomachinery</td>
<td>3 cr</td>
<td>Energy transfer between fluid and rotor; fluid flow in turbomachines, centrifugal and axial flow pumps and compressors; radial and axial flow turbines. One hour of design. Pre-requisite: (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D) and ME 312 Minimum Grade of D.</td>
<td></td>
</tr>
<tr>
<td>ME 466</td>
<td>Aerospace Propulsion</td>
<td>3 cr</td>
<td>Airbreathing engines course. Apply fluids, thermodynamics, and heat transfer to analysis of air breathing engines. Topics to include: ideal cycle analysis, component performance, non-ideal cycle analysis, and blade aerodynamics. Pre-requisite: ME 312 Minimum Grade of D and ME 317 Minimum Grade of D and (EG 360 Minimum Grade of D or CE 365 Minimum Grade of D or ME 324 Minimum Grade of D).</td>
<td></td>
</tr>
<tr>
<td>ME 469</td>
<td>Aircraft Stability and Control</td>
<td>3 cr</td>
<td>Introduction to flight dynamics of aerospace vehicles. Basic overview of stability analysis and linear feedback control. Pre-requisite: ME 328 Minimum Grade of C and EG 360 Minimum Grade of C.</td>
<td></td>
</tr>
<tr>
<td>ME 472</td>
<td>Vibration Analysis-Synthesis</td>
<td>3 cr</td>
<td>Steady-state and transient vibration analysis of discrete and continuous systems. Vibration problems as related to design are also included. Pre-requisite: EG 284 Minimum Grade of C and EG 315 Minimum Grade of C and ME 328 Minimum Grade of D.</td>
<td></td>
</tr>
<tr>
<td>ME 474</td>
<td>Noise and Vibration Control</td>
<td>3 cr</td>
<td>Principles of acoustics; human response to noise; control of noise and vibration by means of vibration isolation, sound barriers, and absorption. One hour of design. Pre-requisite: ME 472 Minimum Grade of D.</td>
<td></td>
</tr>
<tr>
<td>ME 490</td>
<td>Special Topics</td>
<td>1 TO 3 cr</td>
<td>Topics of current mechanical engineering interest. Prerequisite: Consent of instructor</td>
<td></td>
</tr>
<tr>
<td>ME 494</td>
<td>Directed Studies</td>
<td>1 TO 3 cr</td>
<td>Selected mechanical engineering topics of special or current interest not available to regularly scheduled courses. Prerequisite: Consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>ME 499</td>
<td>Honors Senior Project - H</td>
<td>1 TO 6 cr</td>
<td>Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of Mechanical Engineering study, that will lead to a formal presentation at the Annual Honors Student Colloquium. The senior project will be judged and graded by three faculty, chaired by the honors mentor. This course is required for Honors recognition. A minimum of 4 credit hours is required, but students may enroll for a maximum of 6 credit hours over two semesters. Prerequisites: Completion of an approved project prospectus.</td>
<td></td>
</tr>
<tr>
<td>ME 518</td>
<td>Adv Mechanical Engr Analysis</td>
<td>3 cr</td>
<td>Application of numerical methods including finite differences; finite element and boundary element techniques to the solution of problems in Mechanical Engineering. Prerequisite: Consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>ME 519</td>
<td>Computer Aided Design/Manufac</td>
<td>3 cr</td>
<td>Introduction to computer aided design (CAD) and computer aided manufacturing (CAM) principles and their practical applications as fundamental elements of contemporary product design and manufacturing. This course is dual listed with an equivalent 400-level mechanical engineering course.</td>
<td></td>
</tr>
<tr>
<td>ME 520</td>
<td>Advanced Fluid Mechanics</td>
<td>3 cr</td>
<td>Analysis of steady and unsteady motion of a viscous fluid. Topics include: conservation equations, Newtonian fluids and the Navier-Stokes equations, vorticity, analytical solutions, boundary layers, instability of viscous flows. Prerequisite: Consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>ME 522</td>
<td>Gas Turbines</td>
<td>3 cr</td>
<td>Introduction to gas turbines covering thermodynamics, fluid mechanics, combustion, cycle analysis, compressors, turbines, and component matching. Pre-requisite: ME 520 Minimum Grade of C.</td>
<td></td>
</tr>
<tr>
<td>ME 525</td>
<td>Boundary Layer Theory</td>
<td>3 cr</td>
<td>Development of Navier-Stokes and boundary layer equations, perturbation theory application and boundary layer transition. Prerequisite: Consent of instructor.</td>

<td>ME 530</td>
<td>Mechanism Synthesis</td>
<td>3 cr</td>
<td>Kinematic synthesis of planar linkages for function, path, and motion generation. Topics include: degrees of freedom; graphical, linear analytical, and nonlinear analytical methods; and curvature theory. This course is dual-listed with an equivalent 400-level mechanical engineering course. Prerequisite: Consent of instructor.</td>
<td></td>
</tr>
<tr>
<td>ME 538</td>
<td>Finite Element Analysis</td>
<td>3 cr</td>
<td>Introduction to the finite element method. Engineering application to stress-strain analysis is emphasized. Other field problems are also considered. This course is dual-listed with an equivalent 400-level mechanical engineering course. Prerequisite: Consent of instructor. Pre-requisite: MA 507 Minimum Grade of C or MA 508 Minimum Grade of C. MA 507 and MA 508 can be taken concurrently with this course.</td>
<td></td>
</tr>
</tbody>
</table>
ME 539  Boundary Elements I  3 cr
Fundamental concepts of the boundary element method of numerically solving partial differential equations. Application to potential flow problems in heat transfer. This course is dual listed with an equivalent 400 level mechanical engineering course. Requires special permission of instructor.

ME 540  Advanced Heat Transfer  3 cr
Steady and transient conduction, external and internal forced convection, natural convection, radiation with participating media, boiling heat transfer, Stefan condition. Prerequisite: Consent of instructor.

ME 541  Conduction Heat Transfer  3 cr
Closed form analytical and approximate numerical solutions of one, two- and three-dimensional steady state and transient problems in conduction heat transfer. Prerequisite: Consent of instructor.
Pre-requisite: MA 507 Minimum Grade of C.

ME 542  Convection Heat Transfer  3 cr
Fundamental laws of motion and energy balance for a viscous fluid, classical solution of the Navier-Stokes and energy equations, laminar/turbulent hydrodynamic and thermal boundary layers, convection heat transfer in laminar/ turbulent internal flows. Prerequisite: Consent of instructor.

ME 543  Radiation Heat Transfer  3 cr
Blackbody radiation, diffuse-gray surfaces, radiative exchange in a multi-surface enclosure, gas radiation in enclosures with participating media, introduction to available numerical methods. Prerequisite: Consent of instructor.

ME 544  Heat Trans - Change of Phase  3 cr
Boiling heat transfer and critical heat flux, condensation heat transfer, Stefan problem, freezing and melting, ablation, introduction to available numerical techniques. Prerequisite: Consent of instructor.
Pre-requisite: ME 540 Minimum Grade of C or ME 542 Minimum Grade of C.

ME 545  Exp Fluid Mech and Heat Trans  3 cr
Uncertainty analysis, system response, sampling theory and FFT, differential pressure measurement and multi-hole probes, thermo-couple and RTD, thermal anemometry, LDV and other non-intrusive optical methods, flow visualization. Prerequisites: Consent of instructor

ME 550  Combustion  3 cr
Introduction to the theory of combustion processes, chemical equilibrium, adiabatic flame temperature, reaction kinetics, flame structure. This course is dual-listed with an equivalent 400-level mechanical engineering course. Prerequisite: Consent of Instructor.

ME 551  Classical Thermodynamics  3 cr
Postulational treatment of the physical laws of equilibrium, equations of state, processes, equilibrium, stability, reactive systems, phase transition. Prerequisite: Consent of instructor.

ME 552  Statistical Thermodynamics  3 cr
Principles of kinetic theory, quantum mechanics, and statistical mechanics with particular reference to thermodynamic systems. Conclusions of classical thermodynamics are established from the microscopic viewpoint. Prerequisite: Consent of instructor.

ME 553  IC Engines  3 cr
Principles for analysis and design of internal combustion (I.C.) engines. Topics include: fuel-air cycles, fuel, air and exhaust flows, heat and mass transfer, engine performance.

ME 560  Compressible Fluid Flow  3 cr
Foundations of fluid dynamics and thermodynamics of one dimensional flow and heat transfer, isentropic flow, shock waves and method of characteristics. Prerequisite: Consent of Instructor.

ME 561  Turbomachinery  3 cr
Energy transfer between fluid and rotor; fluid flow in turbomachines, centrifugal and axial-flow pumps and compressors; radial and axial flow turbines. Prerequisite: Consent of instructor.

ME 564  Turbulent Flow  3 cr
Reynolds equations, statistics of turbulence, analysis of inviscid and viscous incompressible flow problems, emphasis on finite volume method, introduction to finite element and spectral method. Prerequisite: Consent of instructor.

ME 563  Comp Fluid Dyn - Heat Trans I  3 cr
Governing equations in general coordinates, differential geometry for curvilinear coordinates, grid generations, numerical uncertainties. Prerequisite: Consent of instructor.
Pre-requisite: ME 562 Minimum Grade of C.

ME 565  Lubrication  3 cr

ME 566  Aerospace Propulsion  3 cr
Airbreathing engines course. Apply fluids, thermodynamics, and heat transfer to analysis of air breathing engines. Topics to include: ideal cycle analysis, component performance, non-ideal cycle analysis, and blade aerodynamics.

MET 140  Introduction to Meteorology  3 cr  
This course focuses on introducing the student to the basic concepts of meteorology. Major topics include the structure of our atmosphere, heat balance, meteorological measurements, atmospheric stability, atmospheric motion, and wind circulations on both the global and local scales. Other areas covered may include an introduction to air masses, fronts, and precipitation processes. The analysis of US Government weather charts is also introduced. Core course.  
Co-requisite: MET 140L

MET 191  Tropical Weather Discussion  1 cr  
Tropical Weather Discussion is an introductory course in current or recently-active tropical weather systems. This course mainly reviews the structure, behavior, history and potential forecasts of tropical cyclones in the Atlantic, Pacific, and Indian Ocean basins from a meteorological perspective with special emphasis on activity in the Atlantic basin. The course is taught during the Fall Semester because it overlaps with the most active period of the Atlantic Hurricane Season. Other tropical weather topics such as El Nino, La Nina, monsoon troughs, tropical upper-tropospheric troughs, Madden Julian Oscillation, and hurricane climatology are discussed during weeks of inactivity when no tropical cyclones may be occurring. This course may be repeated for credit up to two times for a total of three hours; however, the course may only count once toward a meteorology elective.

MET 342  Severe Weather  3 cr  
A study of the causes, structure and impact of tornadoes, hurricanes, thunderstorms and severe weather systems (identical to GEO 342).  
Pre-requisite: MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C.

MET 353  General Meteorology  4 cr  
An overall view of the field of meteorology for science majors and minors. This course uses a quantitative approach to study the composition of the atmosphere, atmospheric processes, global circulation, and storm development. Laboratory exercises pay particular attention to hands-on analysis of meteorological charts (identical to GEO 353.) Fee.  
Pre-requisite: (MET 140 Minimum Grade of D and MET 140L Minimum Grade of D) or (MA 112 Minimum Grade of C or MA 171 Minimum Grade of C) or (MA 113 Minimum Grade of C or MA 172 Minimum Grade of C) or (MA 125 Minimum Grade of C or MA 132 Minimum Grade of C).

MET 354  Dynamic Meteorology I  3 cr  
Dynamic meteorology is the study of atmospheric motions that control our weather and climate. Using fundamental laws of physics (fluid dynamics and thermodynamics), a set of mathematical equations that describe how the atmosphere behaves, is derived. These equations are too complex to solve analytically, but with certain assumptions they can be simplified so that approximate solutions can be found. Even though approximate, these solutions still give useful information about the current state of the atmosphere and its evolution into the future. The theories derived in dynamic meteorology underlie all forecasting rules and techniques. Thorough understanding of these theories is invaluable to becoming a skilled forecaster.  
Pre-requisite: (MA 126 Minimum Grade of C or MA 233 Minimum Grade of C) and (PH 201 Minimum Grade of C or PH 216 Minimum Grade of C).

MET 355  Dynamic Meteorology II  3 cr  
The circulation of the atmosphere and the structure of storms is quantitatively analyzed using equations of atmospheric flow. The jet stream, atmospheric waves, mid-latitude cyclones, and the concept of vorticity are given considerable attention.  
Pre-requisite: MET 354 Minimum Grade of C or GEO 344 Minimum Grade of C or GEO 354 Minimum Grade of C.

MET 356  Physical Meteorology  3 cr  
A detailed investigation of adiabatic processes, thermodynamic diagrams, atmospheric stability, and precipitation processes. Additional topics include atmospheric composition and aerosols, radiation and electricity.  
Pre-requisite: (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C) and (MA 126 Minimum Grade of C or MA 233 Minimum Grade of C) and (PH 201 Minimum Grade of C or PH 216 Minimum Grade of C). MET 353 and GEO 353 and MA 126 and MA 233 and PH 201 and PH 216 can be taken concurrently with this course.

MET 357  Meteorological Instrumentation  2 cr  
Design, calibration, use and maintenance of existing and newly developed meteorological instruments and instrumentation systems. Analysis of data collected by instruments and instrument systems.  
Pre-requisite: (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C).

MET 358  Radar Meteorology  4 cr  
This course is designed to give the student a three-fold introduction to weather radar and its value in the workplace. Basic radar principles and assumptions applicable to all radars are presented; the Doppler function and limitations are covered in depth with final emphasis on properly utilizing weather radar in an operations setting.  
Pre-requisite: (MET 354 Minimum Grade of C or GEO 344 Minimum Grade of C or GEO 354 Minimum Grade of C) and (PH 202 Minimum Grade of C or PH 217 Minimum Grade of C).
MET 359  Introduction to TV Weather  2 cr  
This course gives the students the basic skills necessary for broadcasting weather information on TV. This course will focus on the basic principles and techniques of effective TV weather broadcasting.  
Pre-requisite: (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C).

MET 360  Atmospheric Analysis  1 cr  
Analysis of meteorological charts. Provides additional preparation prior to Synoptic. Fee.  
Pre-requisite: (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C) and (MET 354 Minimum Grade of C or GEO 344 Minimum Grade of C or GEO 354 Minimum Grade of C).

MET 370  Satellite Meteorology  3 cr  
This course is an introduction to the weather satellite and its influence on meteorological observations and forecasting. Both radiative propagation theory and satellite interpretation of meteorological features will be covered extensively.  
Pre-requisite: MET 356 Minimum Grade of C and (PH 202 Minimum Grade of C or PH 217 Minimum Grade of C).

MET 401  Weather Forecasting I  2 cr  
A course specifically designed for students minoring in Meteorology. Students are introduced to weather forecasting concepts and methods.  
Pre-requisite: (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C).

MET 402  Weather Forecasting II  2 cr  
A course specifically designed for students minoring in Meteorology. Weather forecasting techniques are discussed with an emphasis on the use of meteorological models and severe weather forecasting.  
Pre-requisite: MET 401 Minimum Grade of C.

MET 410  MET Phenomenology - W  3 cr  
This class is an introduction to reading meteorological journal and professional writings and to writing some of the standard scientific forms common in both operational and research meteorology: summaries, conference abstracts, and scientific journal articles. The students will engage in brief examination of some of the fundamental phenomena in the atmosphere through selected journal articles and write about these topics in an appropriate manner as inquisitive meteorologists.  
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C) and (MET 354 Minimum Grade of C or GEO 344 Minimum Grade of C or GEO 354 Minimum Grade of C) or MET 401 Minimum Grade of C).

MET 420  Computer Apps in Earth Science  4 cr  
An introduction to basic Python programming, with examples and exercises pertinent to Earth Science and GIS applications.  
Pre-requisite: MA 112 Minimum Grade of D or MA 110 Minimum Grade of C.

MET 430  Mesoscale Meteorology  3 cr  
Assessment of mesoscale phenomena, including frontogenesis and frontolysis, low-level jet streams, nocturnal boundary layer wind maxima, sea and land breezes, gravity waves, dry lines, lake-effect snow, and deep moist convection. Emphasis on scale analysis, subsynoptic-scale dynamics, interactions with larger-scale processes, and case study examples.  
Pre-requisite: (MET 355 Minimum Grade of C or GEO 345 Minimum Grade of C or GEO 355 Minimum Grade of C).

MET 440  Air Pollution Meteorology  2 cr  
Air Pollution Meteorology is a survey course in air pollution topics taught primarily from an atmospheric perspective. This course covers topics on air pollution history, methods of measuring air quality, sources of air pollution, basic atmospheric pollution dispersion concepts, basic principles of air pollution modeling and prediction, and an overview of the impacts of polluted air on human health and the environment.  
Pre-requisite: MET 140 Minimum Grade of C or GEO 101 Minimum Grade of C and MA 110 Minimum Grade of C.

MET 442  Tropical Meteorology  2 cr  
This course presents an overview of meteorology in the tropics. The tropical realm is defined and the importance of solar radiation and distribution of temperature, moisture and precipitation in driving tropical weather systems is discussed. The general circulation in the tropics is explored along with seasonal and non-seasonal variations, including the Monsoon and El Niño/La Niña. Certain mesoscale and local circulations common to the tropics are also discussed. Several weeks will be spent investigating tropical cyclones.  
Pre-requisite: MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C.

MET 443  Climatology - W  3 cr  
Analysis of global climate as aggregate weather. Component elements, factors controlling distribution, resulting area patterns, and climatic classification are studied (identical to GEO 443). Fee  
Pre-requisite: MET 140 Minimum Grade of C or GEO 101 Minimum Grade of C.

MET 454  Synoptic Meteorology I  6 cr  
Principles of dynamic and physical meteorology are applied to current surface and upper air analyses of frontal cyclones. An emphasis is placed on forecasting techniques, daily weather discussions, continuity and analysis.  
Pre-requisite: MET 355 Minimum Grade of C and MET 356 Minimum Grade of C.
MET 455 Synoptic Meteorology II 6 cr
This course continues the development of principles learned in MET 454. Principles of atmospheric dynamics and conceptual models will be studied and employed through the use of surface and upper air analyses, satellite and radar data. A multi-week overview of numerical weather prediction principles and concepts will be accomplished along with the integration and interpretation of model guidance of actual modeling simulations using basic concepts of numerical weather prediction. Topics on mid-latitude cyclones and fronts will continue to be expanded beyond Synoptic I. Ensemble prediction and atmospheric oscillations will be discussed along with intrinsic predictability limitations. This course serves as the capstone class for meteorology majors.
Pre-requisite: MET 454 Minimum Grade of C.

MET 456 Applied Climatology - W 3 cr
Training in the application of climatology to solve real world problems. In addition to an examination of present day climate patterns, their causes, and mechanisms, the course focuses on the El Nino, recent and past climates, the natural and human impact on the Earth’s energy balance, global warming, ozone hole and the chaos theory.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C) and (MET 341 Minimum Grade of C or GEO 341 Minimum Grade of C). EH 102 and MET 353 can be taken concurrently with this course.

MET 490 Sp Top - 1 TO 4 cr
Meteorological topics not covered in current meteorology courses. May be repeated when content varies for a maximum of four hours. May require permission of instructor.

MET 492 Seminar - 1 TO 4 cr
Departmental seminar investigating a special field of meteorology. (Topic announced prior to registration.) May be repeated when content varies for a maximum of eight hours. Requires permission of instructor.

MET 494 Directed Studies 1 TO 4 cr
Independent research in field, laboratory, or library under the direction of a member of the meteorology faculty. Prerequisite: Requires permission of instructor. May be taken for a total of eight hours.

MET 495 Mesonet Internship 1 cr
Students will learn various aspects of mesonet (mesoscale weather station network) operation and maintenance. Students will take part in routine weather station site visits, emergency site visits when a sensor malfunctions, and quality control of incoming data. Once a year every weather station receives a complete retrofit where all sensors are replaced with freshly calibrated sensors. If such a retrofit occurs during the semester of a student’s internship, the student will be given the opportunity to take part in this process as well. A large component of this course will consist of field work. Depending on student schedules and mesonet behavior, time will also be spent in the lab performing manual data quality control using the USA Mesonet website.
Pre-requisite: (MET 353 Minimum Grade of C or GEO 353 Minimum Grade of C).

MET 496 Internship in Meteorology 1 TO 3 cr
On-the-job learning through occupational, professional, or research work with an approved firm, agency, or meteorology faculty member. Open only to meteorology majors. Prerequisite: Permission of department chair.

MET 497 Broadcast Meteorology Pract I 3 cr
This course focuses on introducing the student to the ever evolving technology in broadcast meteorology. Emphasis is placed on the application of meteorological data through the use of professional television weather graphics systems in order to develop a "weather story". Particular attention is given to the use of chroma key mechanics/techniques for public viewing.
Pre-requisite: MET 359 Minimum Grade of C.

MET 498 Broadcast Meteorology Pract II 3 cr
This course focuses on communicating accurate forecasts and other important weather information to the public. Attention is given to fine-tuning the on-air weather presentation style, as well as developing a professional resume tape of weather shows in order to gain employment as a broadcast meteorologist. Special attention is given to severe weather cut-ins and accurately conveying severe weather threats to the public.
Pre-requisite: (MET 355 Minimum Grade of C or GEO 345 Minimum Grade of C or GEO 355 Minimum Grade of C) and MET 497 Minimum Grade of C. MET 355 can be taken concurrently with this course.

MET 540 Topics in Air Pollution MET 3 cr
Topics in Air Pollution Meteorology is a graduate course on advanced air pollution topics taught primarily from an atmospheric perspective. This course provides an overview of “dry” meteorological processes, such as temperature, pressure, wind, and general circulation combined with topics on air pollution history, methods of measuring air quality, sources of air pollution, atmospheric pollution dispersion concepts, principles of air pollution modeling and prediction, and the impacts of polluted air on human health and the environment.
MET 590  Meteorology  1 TO 6 cr
An in-depth course for advanced students in meteorology. Topics and titles will be selected to examine the subject matter in an area of current interest to students and in an area of particular faculty expertise. Includes specialized topics not currently listed in the Bulletin.

MET 594  Grad Dir St in Meteorology-  1 TO 4 cr
Graduate level independent study in Meteorology under the direction of a member of Meteorology's Graduate Faculty. Student must have an approved topic and must be accepted by a Graduate Faculty mentor before registering for this class. Prerequisite: Graduate standing.

Microbiology/Immunology - MD (MIC)

MIC 400  Microbiology Externship  1 TO 4 cr
To be determined.

MIC 480  Molec Basis of Pathogenesis  1 TO 4 cr
Bench research on the biology or the Rickettsiales family of intracellular pathogens and on the pathogenesis of the diseases caused by these organisms. Participation in ongoing research or initiation of new projects are possible.

MIC 530  Microbes & Host Defense  3 cr
Presents the fundamental aspects of microbiology including morphology, metabolism of micro-organisms, the basic principles of the use of antibiotics and chemotherapeutic agents, microbial genetics, virology, and medical microbial ecology. The principles of immunology and infection in relation to clinical disease are discussed with special emphasis on laboratory diagnosis.

MIC 536  Literature Reports  1 cr
Students and faculty participate in a supervised reading of the current literature and meet periodically to interact in a discussion of the selected article or topic. The goal of this course is to maintain the faculty’s and students’ level of information at a “state of the art” in both methods and theory in the discipline and to develop critical skills in reviewing the literature.

MIC 537  Dir St - Microbiology  1 TO 6 cr
Students participate in research under the direction of a graduate faculty member. This course should be taken by students who have completed their lab rotations, but have not yet submitted a formal research proposal.

MIC 590  Sp Top -  1 TO 3 cr
Each course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions, examine the subject matter in an area of current interest either to one student or a group of students. Credit and title are arranged with an individual faculty member.

MIC 630  Adv Microbial Pathogenesis  3 cr
This course discusses the fundamentals of this area with particular emphasis on Escherichia coli and Salmonella typhimurium as model systems. The development of problem solving skills will be stressed. Topics including aerobic vs. anaerobic metabolism, membrane physiology, biosynthesis of macromolecules and regulation of gene expression provide view of microbial cell. Pre-requisite: IDL 580 Minimum Grade of B and IDL 581 Minimum Grade of B.

MIC 632  Advanced Immunology  3 cr
Selected topics in immunology are considered using formal lectures followed by student presentations. Design and interpretation of immunological experiments are emphasized throughout the course. Pre-requisite: IDL 580 Minimum Grade of B and IDL 581 Minimum Grade of B.

MIC 633  Advanced Virology  3 cr
This course reviews the reproductive cycles of important human viruses and subviral agents and the diseases they cause. The focus is on the molecular biology of animal viruses and their mechanisms of regulation, assembly, and pathogenesis. Human immunodeficiency virus will be considered in detail. The course is constructed as an interactive lecture series with student reports and literature surveys. Pre-requisite: IDL 580 Minimum Grade of B and IDL 581 Minimum Grade of B.

MIC 636  Microbiology-Immun Res Sem  1 cr
Students present a research topic for discussion before members of the department. Usually scheduled on a rotational basis. Student participation required after end of second year. Attendance required.

MIC 799  Research-Dissertation  1 TO 6 cr
Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Military Science (MS) (MS)

MS 101  Basic Leadership Skills I  1 cr
An introductory course of instruction and participation in common military task and leadership skills. Students are encouraged to attend Physical Training (PT) Lab three (3) times per week for 1 hour per session and a 2 hour leadership lab every other week. Fee.
MS 102  Basic Leadership Skills II  1 cr
A continuing course of instruction and participation in individual common military task and leadership skills. Students are encouraged to attend Physical Training (PT) Lab three (3) times per week for 1 hour per session and a 2 hour leadership lab every other week. Fee.

MS 201  Intermediate Military Skills I  3 cr
A further development of common task and leadership skills required to prepare cadets to lead small military units. Emphasis on practical application of basic military skills and ability through development of leadership skills. Students are required to attend Physical Training (PT) Lab three (3) times per week for 1 hour per session and a 2 hour leadership lab every other week. Fee.
Pre-requisite: MS 101 Minimum Grade of D and MS 102 Minimum Grade of D.

MS 202  Inter Military Skills II  3 cr
A further development of common task and leadership skills required to prepare cadets to lead small military units. Emphasis on practical application of basic military skills and ability through development of leadership skills. Students are required to attend Physical Training (PT) Lab three (3) times per week for 1 hour per session and a 2 hour leadership lab every other week. Fee.
Pre-requisite: MS 101 Minimum Grade of D and MS 201 Minimum Grade of D.

MS 301  Adaptive Team Leadership  3 cr
Challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to military operations containing ethical dilemmas. Cadets receive systematic and specific feedback on their leadership attributes and actions. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities. Cadets also conduct physical fitness training three times per week focusing on development of individual flexibility, muscular strength, and cardiorespiratory endurance. Students are required to attend Physical Training (PT) Lab three (3) times per week for 1 hour per session and a 2 hour leadership lab every week. Contact Hour Distributions: 3 hours and 1 lab. Fee.

MS 302  Applied Team Leadership  3 cr
Increasingly intense situational leadership challenges in order to develop a cadet’s awareness and critical thinking skills while in a leadership role. Cadets review aspects of combat, stability, and support operations. They also conduct military briefings and develop proficiency in the operational orders process. Cadets also conduct physical fitness training three times per week focusing on development of individual flexibility, muscular strength, and cardiorespiratory endurance. Students are required to attend Physical Training (PT) Lab three (3) times per week for 1 hour per session and a 2 hour leadership lab every week. Fee.
Pre-requisite: MS 301 Minimum Grade of C.

MS 401  The Army Profession  3 cr
MS 401 introduces Cadets to the challenges of mission command and gaining an understanding of the Army Profession. Cadets learn the basics of what mission command is and how it is used in Army operations. Students will examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on developing basic knowledge and comprehension of Army leadership while gaining a big picture of understanding the Reserve Officers’ Training Corps (ROTC) program, its purpose in the Army, and its advantages for the student. In addition, MSL IVs are rotated through a variety of leadership positions that support a variety of ROTC battalion training and recruiting events throughout the semester where the MSL IV student will receive detailed and constructive feedback on their leader attributes and core leader competencies from experienced cadre. Students are required to attend Physical Training (PT) Lab three (3) times per week for 1 hour per session and a 2 hour leadership lab every week. Fee.
Pre-requisite: MS 301 Minimum Grade of C and MS 302 Minimum Grade of C.

MS 402  The Company Grade Officer  3 cr
MSL 402 explores the dynamics of leading Soldier's in Full Spectrum Operations in the Operating Environment (OE). This course will introduce you to the Army Operating Concept, Combatant Commands (COCOM), and Unified Land Operations. Additionally, it will discuss platoon leadership, how to take charge of your platoon and the additional duties you may have as a 2LT. Students will continue to examine the Army Profession and what it means to be a professional in the U.S. Army. The overall focus is on broadening the students knowledge of the Army.
Pre-requisite: MS 401 Minimum Grade of C.

MS 494  Directed Studies  1 TO 3 cr
Directed study and research. May be repeated in different subject areas. Course work will be specified by the instructor prior to the beginning of the semester. Studies may include but are not limited to research papers, special projects, and leadership seminars. One and three hour courses are available. Fee.

Museum Studies (MUM) (MUM)

MUM 201  Intro to Museum Studies  3 cr
This course is designed to provide a general introduction to museum history, practice, and the role of museums in contemporary society. The class will explore a range of museum positions, curatorial practices, collection management, museum administration, and the academic and public roles museums play in society.
Pre-requisite: EH 102 Minimum Grade of C.
MUM 290  Special Topics -  3 cr
Different subjects or themes in museum studies as announced. This course may be repeated twice when content varies, for a maximum of nine credit hours. Prerequisite: To be announced.

MUM 390  Special Topics -  3 cr
Different subjects or themes in museum studies as announced. This course may be repeated twice when content varies, for a maximum of nine credit hours. Prerequisite: To be announced.

Music Education (MUE) (MUE)

MUE 010  Music Education  0 cr
The Piano Proficiency documents mastery of minimum piano proficiency skills for students who do not need to enroll in class piano.

MUE 102  Elementary Class Piano  1 cr
Functional keyboard playing. Open to music majors and minors only. No previous knowledge in piano necessary. To be taken in sequence. Fee.

MUE 103  Elementary Class Piano  1 cr
Functional keyboard playing. Open to music majors and minors only. Fee. Pre-requisite: MUE 102 Minimum Grade of D.

MUE 120  Elementary Class Voice  1 cr
Beginning voice instruction emphasizing the fundamentals of singing and the vocal mechanism. This is the first semester of a two semester sequence.

MUE 121  Intermediate Class Voice  1 cr
This course is a continuation of MUE 120. Vocal fundamentals and the mechanics of singing will be emphasized. More advanced vocal exercises, diction, and interpretation will be stressed. Pre-requisite: MUE 120 Minimum Grade of D.

MUE 170  Elementary Class Percussion  1 cr
Beginning percussion instruction with emphasis on development of sight-reading, concert style/mallet techniques and basic concepts of percussion instruments.

MUE 182  Elementary Class Guitar  1 cr
Beginning guitar instruction with the development of proficiency in sight reading and correct right and left hand techniques. No previous knowledge of guitar is necessary. Open to any university student except guitar majors. To be taken in sequence.

MUE 183  Elementary Class Guitar  1 cr
Beginning guitar instruction with the development of proficiency in sight reading and correct right and left hand techniques. Pre-requisite: MUE 182 Minimum Grade of D.

MUE 202  Intermediate Class Piano  1 cr
A continuation of elementary class piano including sight reading and keyboard harmony. Open to music majors and minors only. Fee. Pre-requisite: MUE 103 Minimum Grade of D.

MUE 203  Intermediate Class Piano  1 cr
A continuation of elementary class piano including sight-reading and keyboard harmony. Open to music majors and minors only. Fee. Pre-requisite: MUE 202 Minimum Grade of D.

MUE 212  Adv Keyboard Musicianship I  1 cr
MUE 212 is the first of four courses required of all concentration level and performance level piano majors. During the course students develop sight reading ability, read lead sheets, learn accompanying strategies and practice systematic piano technique. Class piano pedagogy is also addressed. Prerequisite: Piano major or concentration. Fee.

MUE 213  Adv Keyboard Musicianship II  1 cr
The second of four courses required of all concentration level and performance level piano majors. During the course, students develop sight-reading ability, read lead sheets, learn accompanying strategies and practice systematic piano technique. Class piano pedagogy is also addressed. Fee. Pre-requisite: MUE 212 Minimum Grade of D.

MUE 236  Mus-Lit Integ for Early Childhd  3 cr
This course examines the use of music and literature integration in the early childhood classroom - establishing an active-learning environment, identifying elements of music in children's literature, engaging students in the storytelling process, and preparing music-literature instruction.

MUE 240  String Methods  1 cr
The techniques of teaching the string instruments in class situations and the development of some proficiency on each string instrument.

MUE 241  Woodwind Methods  1 cr
The techniques of teaching the woodwind instruments in class situations and the development of some proficiency on each of the main woodwinds.

MUE 242  Brass Methods  1 cr
The techniques of teaching the brass instruments in class situations and the development of some proficiency on each of the main brass instruments.

MUE 243  Percussion Methods  1 cr
The techniques of teaching percussion instruments in class situations and the development of some proficiency on all percussion instruments.

MUE 301  Music Literacy Child and Youth  3 cr
The fundamentals of music, music reading, and instruction for those working with children and youth in group settings.
MUE 312  Adv Keyboard Music III Vocal  1 cr
MUE 213 is the third of four courses required of all concentration and performance level piano majors. Students will develop sight reading ability, read lead sheets, learn accompanying strategies and practice systematic piano technique. Vocal accompanying workshops and class piano pedagogy are included. Fee. Pre-requisite: MUE 213 Minimum Grade of D.

MUE 313  Adv Keyboard Music IV Inst  1 cr
MUE 313 is the fourth of four courses required of all concentration and performance level piano majors. During the course, students develop sight reading ability, read lead sheets, learn accompanying strategies and practice systematic piano technique. Instrumental accompanying workshops and class piano pedagogy are included. Fee. Pre-requisite: MUE 312 Minimum Grade of D.

MUE 322  Early Chld/Elem Mus Perf Mthds  3 cr
The study of music and performance methods as used in dance and theatre throughout various early childhood and elementary settings.

MUE 336  Performing Arts for Young Child  3 cr
This course provides an overview of the planning, preparation, and delivery of the performing arts in a developmentally appropriate environment. Students will explore dramatic arts, improvisation, use of musical instruments, and vocal exploration as a means of communication, expression, and learning for the young child. Appropriate learning environments and routines will be discussed regarding the individual child's needs of social, physical, and sensory motor skills and the role of facilitating the growth through discovery.

MUE 346  Marching Band Techniques  1 cr
The techniques of organization, administration, instruction, and rehearsal of the marching band.

MUE 411  Woodwind Pedagogy  2 cr
A survey of the teaching techniques, instruments, accessories and pedagogical materials for woodwind instruments. Prerequisite: Upper division studio study in woodwinds or permission of instructor

MUE 412  Brass Pedagogy  2 cr
This course is intended as a technique course specific to high and low brass instruments. Topics of study will include: development of technique, etudes, performance preparation, pedagogical literature, performance anxiety. Upper division studio study in brass or permission of instructor.

MUE 413  Percussion Pedagogy  2 cr
A comprehensive study of methods and materials used to teach percussion instruments. Upper division studio study in percussion or permission of instructor.

MUE 414  Guitar Pedagogy  2 cr
A survey of the teaching techniques, instruments, accessories and pedagogical materials for guitar. Prerequisite: Upper division studio study in guitar or permission of the instructor.

MUE 415  String Pedagogy  3 cr
A comprehensive study that is intended as a technique course specific string instruments. Topics of study include: development of technique, performance preparation, pedagogical literature, and performance anxiety. Prerequisite: Upper division studio study in strings or permission of instructor.

MUE 430  Exceptional Music  3 cr
The philosophical and practical approach to increasing the effectiveness of learning and content retention for the exceptional student through music.

MUE 434  Keyboard, Voice, Guitar  3 cr
The study of music literature, note reading, and the effective practice of incorporating keyboard, voice, and guitar through music education and music therapy.

MUE 436  Integrating Arts in Education  1 TO 3 cr
This course examines arts integration as a philosophical approach to increasing the effectiveness of learning and content retention in the PK-12 classroom.

MUE 444  Elementary/General Music  3 cr
Music program, methods, music literature, and teaching aids for elementary and middle school students. Prerequisites: Junior level or above in music education, concentration, admission to candidacy, completion of two-thirds of teaching field. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

MUE 446  Piano Pedagogy  2 cr
Methods and materials for the private lesson. Lab practice in teaching included. Offered in alternate years. Prerequisite: Piano major or piano concentration.

MUE 448  Vocal Pedagogy  2 cr
Theory and practice of the art of teaching singing as it relates to Voice Science, with regard to both current and historical practices, physiology, function, acoustics, observations, and hands-on experience. Prerequisite: Upper division in vocal studio studies or permission of instructor.

MUE 455  Tch Mu in Middle-Scndary Sch  3 cr
Assists the student in organizing materials and in developing methods of teaching music in middle and secondary schools. Prerequisites: Junior level or above in music education concentration, admission to candidacy, completion of two-thirds of teaching field.
MUE 494 Directed Studies - 1 TO 3 cr
An individual project concerned with the student's special interests in music education. May be repeated for a maximum of six hours. Prerequisite: Department Chair permission.

MUE 501 Instrumental Music Education 3 cr
Study of the organization, development, appraisal, role and future trends of instrumental programs in the public schools.

MUE 502 Choral Music Education 3 cr
Choral Music Education is designed to provide broad exposure to elements that comprise a comprehensive choral program at the elementary and secondary levels.

MUE 512 Foundations of Music Education 4 cr
Sequential study of major philosophies guiding music teaching and the history of music education that have led to contemporary issues and problems in Music Education. Major philosophies including Pestalozzi, Reimer, and the praxial approach of Mark and history from perspectives of sociology, psychology, philosophy, curriculum, history and comparative curricula, including emerging trends in the profession.

MUE 513 Curr and Assess in Music Ed 4 cr
Critical evaluation of current literature, research, and assessment tools used in the curriculum and teaching of music. This course examines the relationship between curriculum theory and philosophy of music education. Through the study of traditional and contemporary models of curriculum development and evaluation, students broaden their understanding of curriculum as it impacts the learning process. Field experience required.

MUE 515 String Pedagogy 3 cr
A comprehensive study that is intended as a technique course specific to all string instruments. Topics of study will include: development of technique, etudes, performance preparation, pedagogical literature, and performance anxiety.

MUE 519 Brass Pedagogy 3 cr
A teaching techniques course specific to brass instruments. Topics of study will include teaching philosophy and techniques, pedagogical literature, lesson structure, and resources for further brass research.

MUE 520 Adv Stdy in EC/Elem/Gen Music 4 cr
Music supervision and administration, program development, conducting children's choirs, inclusion, instructional materials and innovative teaching techniques for early childhood and elementary music programs, including Kodaly, Orff, Dacroze, and Gordon.

MUE 534 Keyboard, Voice, Guitar 3 cr
The study of music literature, note reading, and the effective practice of incorporating keyboard, voice, and guitar through music education and music therapy.

MUE 536 Integrating Arts in Education 1 TO 3 cr
This course examines arts integration as a philosophical approach to increasing the effectiveness of learning and content retention in the PK-12 classroom.

MUE 540 Adv Study in Tchg Choral Music 4 cr
Focus of the course is to enhance the student's knowledge of rehearsal techniques and instructional strategies, strengthening the role of the conductor, techniques for analytical preparation of choral music, and organization of choral programs. Emphasis will also be given to expanding knowledge of choral repertoire and resources for the choral conductor.

MUE 548 Graduate Vocal Pedagogy 2 cr
Vocal Pedagogy is a 2 credit hour course for the upper level undergraduate voice major and graduate vocal performance majors. It focuses on the art, science and profession of teaching singing. Class meetings will be dedicated to lecture, class discussion, presentations, and workshops with various pedagogical and voice science topics.

MUE 560 Adv Study in Tchg Instr Music 4 cr
The purpose of this course is to help the student develop teaching materials, gain greater familiarity with instrumental music repertoire, and develop instructional strategies for instrumental music. Emphasis will be placed on rehearsal procedures, analytical techniques, organizational structure, instrumental music program management, and advanced instrumental conducting.

MUE 564 Woodwind Pedagogy 3 cr
This course involves the study of teaching principles of the woodwind family, with specialized instruction given to students' primary woodwind instrument. Focusing on the art of teaching by examining pedagogical concepts and history, woodwind performance majors will experience teaching demonstrations and the discovery of new and standard teaching literature for woodwind instruments.

MUE 585 Practicum in Music Education 1 TO 4 cr
Observation and involvement in the teaching of undergraduate music courses at the college level with opportunities for individual research and teaching experiences.

MUE 587 Percussion Pedagogy 2 cr
A comprehensive study of methods and materials used to teach percussion instruments.

MUE 589 Reading and Conference 1 cr
Guided study in preparation of the portfolio-video recording and self critique, pedagogical project and research paper - which should be taken in conjunction with preparation of the final portfolio.
**MUE 590  Special Topics -**  1 TO 3 cr
Special topics in music education designed to meet specific needs and special interests, and to explore current issues in the field. May be repeated for a maximum of nine hours when content varies. Requires permission of department chair.

**Music Literature (MUL) (MUL)**

**MUL 101  Introduction to Music**  3 cr
Music, what it is and how to listen to it; basic materials of music and the great style periods of music literature in the Western World. Attendance at approved concerts is required.

**MUL 201  Contemporary Music**  3 cr
An introduction to music-literature trends in the 20th century.

**MUL 235  Survey Musical Masterworks I**  2 cr
This course is the first of a two semester sequence and will familiarize the student with the vocabulary, traditions, conventions, genres, and repertoire of the art music world. The course will focus on the 'greatest hits' of the concert repertory and other works of a regional/timely interest. Pre-requisite: MUL 113 Minimum Grade of C.

**MUL 236  Survey Musical of Masterwks II**  2 cr
This course is the second of a two semester sequence and will familiarize the student with the vocabulary, traditions, conventions, genres, repertoire of the art music world. The course will focus on the 'greatest hits' of the concert repertory and other works of a regional/timely interest. Pre-requisite: MUL 235 Minimum Grade of D.

**MUL 315  History of Music Theatre - W**  3 cr
A comprehensive overview of the origins and evolution of American Music Theatre to present time. The course also includes both general and specific information toward appropriate performance choices. Cross-listed with DRA 315. Credit cannot be received for both DRA 315 and MUL 315.

**MUL 335  History of Music I - W**  3 cr
Music of the Western World from pre-Christian times to 1750: evolution of forms, styles, and media. Pre-requisite: MUL 113 Minimum Grade of C and MUL 236 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

**MUL 336  History of Music II - W**  3 cr
Music of the Western World from 1750 to the present: evolution of forms, styles, and media. Pre-requisite: MUL 335 Minimum Grade of D and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

**MUL 411  Woodwind Literature**  3 cr
A survey of the major works of the solo, concerto, and chamber music repertoire for the woodwind instruments. Prerequisites: Upper division studio study in woodwinds or permission of instructor.

**MUL 412  Brass Literature**  3 cr
A survey of the major works of the solo, concerto, and chamber music repertoire for brass instruments. Prerequisite: Upper division brass studio study or permission of instructor.

**MUL 413  Percussion Literature**  3 cr
A survey of the major works of the solo, concerto, and chamber music repertoire for percussion instruments. Prerequisite: Upper division studio study in percussion or permission of instructor.

**MUL 414  Guitar Literature**  3 cr
A survey of the major works of the solo, concerto, chamber music repertoire for guitar. Prerequisite: Upper division studio study in guitar or permission of instructor.

**MUL 415  String Literature**  3 cr
A survey of the major works of the solo, concerto, chamber music repertoire for string instruments. Prerequisite: Upper division studio study in strings or permission of instructor.

**MUL 438  Keyboard Literature**  3 cr
Major works and styles in the keyboard literature from English Virginalists through the contemporary period. Offered in alternate years. Prerequisites: Upper division piano study or instructor permission.

**MUL 442  Organ Literature**  3 cr
Music for pipe organ, both secular and sacred. Offered in alternate years. Prerequisites: Upper division organ study or instructor permission.

**MUL 444  Vocal Solo Literature**  3 cr
A comprehensive overview of standard solo vocal repertoire within the foundation of historical performance practice of sacred and secular vocal music from its beginnings to the present. Pre-requisite: MUL 335 Minimum Grade of D and MUL 336 Minimum Grade of D.

**MUL 494  Dir St -**  1 TO 3 cr
An individual project concerned with the student's special interests. May be repeated for up to 6 hours. Requires Department Chair permission.

**MUL 501  Graduate Research in Music**  2 cr
Methods and materials of research in music. Bibliography and bibliographical aids. Introduction to musicology. Critical and historical writing. A survey of references and sources consulted in graduate music courses; format for papers and thesis, including footnotes and bibliography.

**MUL 512  Brass Literature**  3 cr
A survey of the major works of the method, solo, orchestral, and chamber music repertoire for brass instruments.
MUL 515  String Literature  3 cr
A survey of the major works of the solo, concerto, and
chamber music repertoire for string instruments.

MUL 530  Symphonic Literature  3 cr
A survey of the development of the symphony and related
forms from its origins through the twentieth century.

MUL 535  American Music  4 cr
Early music in the colonies. Various attempts to create an
individual 'American' musical style. Diversity of influences:
European, African American, Native American, Spanish-
Mexican, religious, jazz, folk song, minstrel, etc. Music
of Billings, Mason, Gottschalk, MacDowell, Sousa, Ives,
Gershwin, Copland, and others.

MUL 544  Art Song Literature & History  2 cr
Art Song Literature and History is an advanced study of
art song literature from 1800-present for the graduate
vocal performance major. Elements of form, style, poetic
materials, and performance practice will be covered. Special
emphasis will be given to elements of preparation and
literature exploration for the emerging performer.

MUL 545  Opera Literature and History  2 cr
Opera Literature and History is designed to provide the
student with a comprehensive study of opera from its
earliest development to the present day. Elements of
form, style, social/political influences, and stagecraft
will be explored. Critical analysis of operatic works will
be developed through guided listening and viewing
assignments.

MUL 546  Collab Piano Lit for Vocal  3 cr
The graduate-level Vocal Accompanying Literature course
offers a survey of music composed for voice(s) and piano
from the pianist's perspective. Music for solo voice and
piano will be explored chronologically. Additional units will
feature standard choral music, choral/vocal music for church
services, strategies for playing musical theater scores and
techniques for operatic score reduction.

MUL 564  Woodwind Literature  3 cr
Woodwind Literature examines solo and chamber woodwind
literature. The course will focus on the evolution of
woodwind literature and masterworks in the repertoire.

MUL 566  Coll Piano Lit for Instruments  3 cr
Graduate-level Collaborative Piano Literature for keyboard
and various instruments is a survey course which seeks to
expose students to musical works written for solo instrument
and piano/keyboard, standard chamber music (piano trios,
quartets and quintets), non-standard chamber music and
piano concertos. Collaborative duos will be explored by
instrument type (violin, flute, trumpet, etc.), while chamber
music will be studied chronologically.

MUL 585  Grad Piano Literature Survey  2 cr
The chronological survey includes units on pre-piano
literature from England, France, Germany and Italy, early
development of the classical sonata, the Viennese Classical
period, late Beethoven and Schubert, the Romantics,
Brahms and Nationalism, Debussy and Impressionism,
piano music from 1920-1950, piano music since 1950.

MUL 587  Percussion Literature  3 cr
A survey of the major works of solo, concerto and chamber
music repertoire for percussion instruments.

MUL 590  Spec Topics in Music History  1 TO 4 cr
A study of works and styles appropriate to the topics listed:
(1) Middle Ages; (2)Renaissance; (3) Baroque Period; (4)
Classical Period; (5) Romantic Period; (6) Modern. May be
repeated for credit when topics vary.

Music Organization (MUO)

MUO 111  University Concert Choir  .5 OR 1 cr
This large ensemble is open to all majors, and performs
the masterpieces of choral literature. Required of all
voice majors, and a placement audition is required for all
participants.

MUO 114  Chamber Singers  .5 cr
A small, select ensemble devoted to the performance of
vocal chamber music. Audition and instructor permission
required.

MUO 115  Chorale  .5 OR 1 cr
The Chorale is the preeminent choral ensemble on campus.
Chorale members are chosen through special auditions,
and perform in area schools and venues to promote the
University and the Department of Music.

MUO 116  USA Opera Theatre  .5 TO 1 cr
A performing ensemble dedicated to training students in the
fundamentals of stage craft, performance, and production
through experience with music for the stage. Standards of
opera, operetta, and American musical theater are explored
in scene exercises and fully-staged productions on and off
campus. Enrollment is open to all students through audition
or permission of the instructor. Course is cross-listed with
DRA 116. Credit cannot be received for both MUO 116 and
DRA 116.

MUO 117  University Symphony Band  .5 OR 1 cr
A large performing ensemble of woodwind, brass and
percussion instrumentalists with an emphasis on wind band
literature and live performance. Open to music majors and
non-music majors with prior instrumental performance
experience in high school or junior college.

MUO 118  Woodwind Ensemble  .5 cr
The study and performance of literature for all combinations of
woodwind instruments.
MUO 119  Brass Ensemble  .5 cr
The study and performance of literature for all combinations of brass instruments.

MUO 120  Percussion Ensemble  .5 cr
The study and performance of literature for all combinations of percussion instruments.

MUO 121  Jazz Band  .5 cr
The ensemble study of jazz with an emphasis on literature and live performance.

MUO 122  Basketball Pep Band  .5 cr
Performs for USA Basketball Games throughout the basketball season. Schedule varies annually.

MUO 123  String Ensemble  .5 cr
The study and performance of literature for all combinations of string instruments.

MUO 124  Piano Ensemble  .5 cr
The study and performance of two-piano and piano-ensemble literature. Required of piano majors.

MUO 125  Guitar Ensemble  .5 cr
The study and performance for ensemble literature for guitar Required for all guitar majors.

MUO 126  Collegium Musicum  .5 cr
A performing ensemble dedicated to combined chamber music experience of both vocal and instrumental forces, playing one-to-a-part, and focusing on music written before 1800. Enrollment is open to the entire university community through audition or permission of the co-directors. By virtue of the terms of the attached constitution, members will learn to choose repertoire, budget and raise small funds, develop programs, reserve performance space, organize print material, and explore the dynamics of team production. This team-taught course will also be dedicated to sharing cultural forces and encouraging the exchange of attitudes shared historically by all people.

MUO 127  Wind Ensemble  .5 OR 1 cr
A select performing ensemble of woodwind, brass, and percussion instrumentalists with an emphasis on wind ensemble literature and live performance. Open to music majors and non-majors with prior instrumental performance experience in high school or junior college. Audition or permission of instructor required for participation.

MUO 129  Mixed Chamber Ensemble  .5 cr
The study and performance of chamber literature for all combinations of instruments and voices.

MUO 130  University Marching Band  1 cr
A large performing ensemble of woodwind, brass, percussion instrumentalists, and appropriate auxiliary personnel with an emphasis on live performance for athletic events. Open to music majors and non-music majors with prior instrumental performance experience in high school or junior college.

MUO 131  University Winterguard  .5 OR 1 cr
A large performing ensemble consisting of appropriate auxiliary personnel (flags, rifles, sabres, etc.) with an emphasis on live performance.

MUO 133  University Orchestra  .5 OR 1 cr
A large performing ensemble of string, woodwind, brass, and percussion instrumentalists with an emphasis on orchestral literature and live performance. Open to music majors and non-music majors with prior instrumental performance experience in high school or junior college. Audition or permission of instructor required for participation.

MUO 136  World Music Ensemble  .5 cr
The study and performance of world literature for all combinations of instruments with an emphasis on music from non-Western cultures.

MUO 137  University Band  .5 OR 1 cr
A performing ensemble of woodwind, brass, and percussion instrumentalists with an emphasis on concert band literature and live performance. Open to music majors and non-majors with prior instrumental performance experience in high school, junior college, or at the university level. No audition is required for this ensemble and it is open to the entire campus community as well as faculty and staff.

MUO 138  Flute Choir  .5 cr
The study and performance of literature for all combinations of flutes.

MUO 139  Trumpet Ensemble  .5 cr
The study and performance of literature for all combinations of trumpets.

MUO 140  Horn Choir  .5 cr
The study and performance of literature for all combinations of horns.

MUO 141  Trombone Choir  .5 cr
The study and performance of literature for all combinations of trombones.

MUO 142  Tuba-Euphonium Ensemble  .5 cr
The study and performance of literature for all combinations of tubas and euphoniums.

MUO 143  Brass Choir  .5 cr
The study and performance of literature for large brass ensemble.

MUO 144  USA Steel Band  .5 cr
The study and performance of literature for steel band including the traditional styles of soca and calypso music from the Caribbean. Instructor permission required.

MUO 145  Clarinet Ensemble  .5 cr
The study and performance of literature for all combinations of clarinets.
MUO 411  University Concert Choir  .5 OR 1 cr
This large ensemble is open to all majors, and performs the masterpieces of choral literature. Required for all voice majors, and a placement audition is required for all participants.

MUO 414  Chamber Singers  .5 cr
A small, select ensemble devoted to the performance of vocal chamber music. Audition and instructor permission required.

MUO 415  Chorale  .5 OR 1 cr
The Chorale is the preeminent choral ensemble on campus. Chorale members are chosen through special auditions and perform in area schools and venues to promote the University and the Department of Music.

MUO 416  USA Opera Theatre  .5 TO 1 cr
A performing ensemble dedicated to training students in the fundamentals of stage craft, performance, and production through experience with music for the stage. Standards of opera, operetta, and American musical theater are explored in scene exercises and fully-staged productions on and off campus. Enrollment is open to all students through audition or permission of the instructor. Course is cross-listed with DRA 416. Credit cannot be received for both MUO 416 and DRA 416.

MUO 417  University Symphony Band  .5 OR 1 cr
A large performing ensemble of woodwind, brass and percussion instrumentalists with an emphasis on wind band literature and live performance. Open to music majors and non-music majors with prior instrumental performance experience in high school or junior college.

MUO 418  Woodwind Ensemble  .5 cr
The study and performance of literature for all combinations of woodwind instruments.

MUO 419  Brass Ensemble  .5 cr
The study and performance of literature for all combinations of brass instruments.

MUO 420  Percussion Ensemble  .5 cr
The study and performance of literature for all combinations of percussion instruments.

MUO 421  Jazz Band  .5 cr
The ensemble study of jazz with an emphasis on literature and live performance.

MUO 422  String Ensemble  .5 cr
The study and performance of literature for all combinations of string instruments.

MUO 424  Piano Ensemble  .5 cr
The study and performance of two-piano and piano-ensemble literature. Required of piano majors.

MUO 425  Guitar Ensemble  .5 cr
The study and performance of ensemble literature for guitar. Required of guitar majors.

MUO 426  Collegium Musicum  .5 cr
A performing ensemble dedicated to combined chamber music experience of both vocal and instrumental forces, playing one-to-a-part, and focusing on music written before 1800. Enrollment is open to the entire university community through audition or permission of the co-directors. By virtue of the terms of the attached constitution, members will learn to choose repertoire, budget and raise small funds, develop programs, reserve performance space, organize print material, and explore the dynamics of team production. This team-taught course will also be dedicated to sharing cultural forces and encouraging the exchange of attitudes shared historically by all people.

MUO 427  Wind Ensemble  .5 OR 1 cr
A select performing ensemble of woodwind, brass and percussion instrumentalists with an emphasis on wind ensemble literature and live performance. Open to music majors and non-majors with prior instrumental performance experience in high school or junior college. Audition or permission of instructor required for participation.

MUO 429  Mixed Chamber Ensemble  .5 cr
The study and performance of chamber literature for all combinations of instruments and voices.

MUO 430  University Marching Band  1 cr
A large performing ensemble of woodwind, brass, percussion instrumentalists, and appropriate auxiliary personnel with an emphasis on live performance for athletic events. Open to music majors and non-music majors with prior instrumental performances experience in high school or junior college.

MUO 431  University Winterguard  .5 OR 1 cr
A large performing ensemble consisting of appropriate auxiliary personnel (flags, rifles, sabres, etc.) with an emphasis on live performance.

MUO 433  University Orchestra  .5 TO 1 cr
A large performing ensemble of string, woodwind, brass, percussion instrumentalists, with an emphasis on orchestral literature and live performance. Open to music majors and non-music majors with prior instrumental performance experience in high school or junior college. Audition or permission of instructor required for participation.

MUO 436  World Music Ensemble  .5 cr
The study and performance of world literature for all combinations of instruments with an emphasis on music from non-Western cultures.

MUO 437  University Band  .5 OR 1 cr
A performing ensemble of woodwind, brass, and percussion instrumentalists with an emphasis on concert band literature and live performance. Open to music majors and non-majors with prior instrumental performance experience in high school, junior college, or at the university level. No audition is required for this ensemble and it is open to the entire campus community as well as faculty and staff.
MUO 438 Flute Choir .5 cr
The study and performance of literature for all combinations of flutes.

MUO 439 Trumpet Ensemble .5 cr
The study and performance of literature for all combinations of trumpets.

MUO 440 Horn Choir .5 cr
The study and performance of literature for all combinations of horns.

MUO 441 Trombone Choir .5 cr
The study and performance of literature for all combinations of trombones.

MUO 442 Tuba-Euphonium Ensemble .5 cr
The study and performance of literature for all combinations of tubas and euphoniums.

MUO 443 Brass Choir .5 cr
The study and performance of literature for large brass ensemble.

MUO 444 USA Steel Band .5 cr
The study and performance of literature for steel band including the traditional styles of soca and calypso music from the Caribbean. Instructor permission required.

MUO 445 Clarinet Ensemble .5 cr
The study and performance of literature for all combinations of clarinets.

MUO 457 Ensemble with Coll Keyboard 1 cr
The Director for Collaborative Keyboard studies will meet with the student enrolled in MUO 507 to determine an ensemble assignment. Assignments may include one of the following: accompany/collaborate with Opera Theater, Symphony Band, Wind Ensemble, Concert Choir, Chorale, Chamber Music Ensemble or smaller ensemble.

MUO 511 University Concert Choir .5 OR 1 cr
This large ensemble is open to all majors, and performs the masterpieces of choral literature. Required for all voice majors, and a placement audition is required for all participants.

MUO 514 Chamber Singers .5 cr
A small, select ensemble devoted to the performance of vocal chamber music. Audition and instructor permission required.

MUO 515 Chorale .5 OR 1 cr
The Chorale is the preeminent choral ensemble on campus. Chorale members are chosen through special auditions, and perform in area schools and venues to promote the University and the Department of Music.

MUO 516 Opera & Musical Theatre Wrkshp 1 cr
A performing ensemble dedicated to training students in the fundamentals of stage craft, performance, and production through experience with music for the stage. Standards of opera, operetta, and American musical theatre are explored in scene exercises and fully-staged productions on and off campus. Enrollment is open to all students through audition or permission of the instructor.

MUO 517 University Symphony Band .5 OR 1 cr
A large performing ensemble of woodwind, brass and percussion instrumentalists with an emphasis on wind band literature and live performance. Open to music majors and non-music majors with prior instrumental performance experience in high school or junior college.

MUO 518 Woodwind Ensemble .5 cr
The study and performance of literature for all combinations of woodwind instruments.

MUO 519 Brass Ensemble .5 cr
The study and performance of literature for all combinations of brass instruments.

MUO 520 Percussion Ensemble .5 cr
The study and performance of literature for all combinations of percussion instruments.

MUO 521 Jazz Band .5 cr
The ensemble study of jazz with an emphasis on literature and live performance.

MUO 523 String Ensemble .5 cr
The study and performance of literature for all combinations of string instruments.

MUO 524 Piano Ensemble .5 cr
The study and performance of two-piano and piano-ensemble literature. Required of piano majors.

MUO 525 Guitar Ensemble .5 cr
The study and performance of ensemble literature for guitar. Required of guitar majors.

MUO 526 Collegium Musicum .5 cr
A performing ensemble dedicated to combined chamber music experience of both vocal and instrumental forces, playing one-to-a-part, and focusing on music written before 1800. Enrollment is open to the entire university community through audition or permission of the co-directors. By virtue of the terms of the attached constitution, members will learn to choose repertoire, budget and raise small funds, develop programs, reserve performance space, organize print material, and explore the dynamics of team production. This team-taught course will also be dedicated to sharing cultural forces and encouraging the exchange of attitudes shared historically by all people.
MUO 527  Wind Ensemble  1 cr
A select performing ensemble of woodwind, brass and percussion instrumentalist with an emphasis on wind ensemble literature and live performance. Open to music majors and non-majors with prior instrumental performance experience in high school or junior college. Audition or permission of instructor required for participation.

MUO 529  Mixed Chamber Ensemble  .5 cr
The study and performance of chamber literature for all combinations of instruments and voices.

MUO 530  University Marching Band  1 cr
A large performing ensemble of woodwind, brass, percussion instrumentalists, and appropriate auxiliary personnel with an emphasis on live performance for athletic events. Open to music majors and non-majors with prior instrumental performance experience in high school or junior college.

MUO 531  University Winterguard  .5 OR 1 cr
A large performing ensemble consisting of appropriate auxiliary personnel (flags, rifles, sabres, etc.) with an emphasis on live performance.

MUO 533  University Orchestra  .5 OR 1 cr
A large performing ensemble of string, woodwind, brass and percussion instrumentalists with an emphasis on orchestral literature and live performance. Open to music majors and non-majors with prior instrumental performance experience in high school or junior college. Audition or permission of instructor required for participation.

MUO 536  World Music Ensemble  .5 cr
The study and performance of world literature for all combinations of instruments with an emphasis on music from non-Western cultures.

MUO 537  University Band  .5 OR 1 cr
A performing ensemble of woodwind, brass and percussion instrumentalists with an emphasis on concert band literature and live performance. Open to music majors and non-majors with prior instrumental performance experience in high school, junior college, or at the university level. No audition is required for this ensemble and is open to the entire campus community as well as faculty and staff.

MUO 538  Flute Choir  .5 cr
The study of performance of literature for all combinations of flutes.

MUO 539  Trumpet Ensemble  .5 cr
The study and performance of literature for all combinations of trumpets.

MUO 540  Horn Choir  .5 cr
The study and performance of literature for all combinations of horns.

MUO 541  Trombone Choir  .5 cr
The study and performance of literature for all combinations of trombones.

MUO 542  Tuba - Euphonium Ensemble  .5 cr
The study and performance of literature for all combinations of tubas and euphoniums.

MUO 543  Brass Choir  .5 cr
The study and performance of literature for large brass ensemble.

MUO 544  USA Steel Band  .5 cr
The study and performance of literature for steel band including the traditional styles of soca and calypso music from the Caribbean. Instructor permission required.

MUO 545  Clarinet Ensemble  .5 cr
The study and performance of literature for all combinations of clarinets.

Music Studio (MUS) (MUS)

MUS 201  Intro to Music Edu Technology  2 cr
Application of current Music Technology for the N-12 curriculum. Laboratory experience is given in selected software programs appropriate to music education. Pre-requisite: MUT 113 Minimum Grade of C.

MUS 202  Vocal Diction I  1 cr
A lecture/performance course, rooted in the International Phonetic Alphabet (IPA), designed to enable singers to analyze and perform vocal repertoire in English and Italian. Prerequisite: Open to music majors and minors only.

MUS 203  Vocal Diction II  1 cr
A lecture/performance course, rooted in the International Phonetic Alphabet (IPA), designed to enable singers to analyze and perform vocal repertoire in French and German. Pre-requisite: MUS 202 Minimum Grade of D.

MUS 204  Introduction to Music Business  3 cr
A general overview of the music industry is the primary objective of the course. Some emphasis will be placed on career options.

MUS 304  Principles of Music Business I  3 cr
A continuation of MUS 204, 304 will place emphasis on the legal aspects of the music industry. Pre-requisite: MUS 204 Minimum Grade of D.

MUS 305  Principles Music Business II  3 cr
A continuation of MUS 304, 305 will address marketing and promoting in music. Pre-requisite: MUS 304 Minimum Grade of D.

MUS 404  Recording Technology  2 cr
This course provides an overview of analog and digital audio, introduces students to basic recording/mixing tools and topics include: microphone and mixer preparation, studio and computing capture/edit. Also addressed: project management, assets, and project. Pre-requisite: MUT 213 Minimum Grade of C.
MUS 421 Music - Sound and Multimedia 2 cr
This course familiarizes students with the techniques and materials for incorporating sound and music in the Wintel and Macintosh multimedia environments. Topics to be addressed will include making music with and without MIDI, sound resources, special effects, commercial libraries and sounds, digital sequencing, authoring environments, and legal issues.

MUS 422 Sequencing 2 cr
To familiarize students with professional-level music sequencing software, hardware, and techniques. Students will gain practical skills with MIDI recording, playback, and editing.

MUS 470 Internship Music Bus 9 TO 12 cr
Internship is a program that provides qualified university students with supervised experience in production practices, management techniques, research applications, personnel matters, and other activities found in the modern music industry. Prerequisites: Completion of the Music Industry Concentration core including College of Business course requirements, permission of the participating business-organization, and approval of the departmental internship coordinator and department chair.

MUS 490 Special Topics 1 TO 3 cr
This course introduces students to fundamental techniques and materials for working with studio-quality sound, hardware and software. Topics will be drawn from: MIDI/music networks, graphic notation, MIDI controllers/sequencers, sampling basics, and film and video synchronization fundamentals. May be repeated for a maximum of nine credit hours. Pre-requisite: MUS 421 Minimum Grade of D and MUS 422 Minimum Grade of D.

MUS 499 Senior Honors Proj in Music-H 3 TO 6 cr
With the guidance and advice of a faculty mentor, Honors Students will identify, and carry out a research project in music. The outcome of the research project will include a written report and formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three members of the faculty, chaired by the faculty mentor. Requires permission of department chair.

MUS 501 Music Education Technology 3 cr
Application of current Music Technology for the N-12 curriculum. Laboratory experience is given in selected software programs appropriate to music education.

MUS 521 Music - Sound and Multimedia 3 cr
To familiarize students with the techniques and materials for incorporating sound and music in the multimedia environment. Topics to be addressed will include making music with and without MIDI, sound resources, special effects, commercial libraries and sounds, digital sequencing, authoring environments, and legal issues.

MUS 522 Sequencing 2 cr
This course familiarizes students with professional-level music sequencing software, hardware, and techniques. Students will gain practical skills with MIDI recording, playback, and editing. Instructor permission required.

MUS 585 Practicum in Coll Keyboard 2 cr
The Director for Collaborative Keyboard studies will meet with the student enrolled in MUS 585 to assign literature, which will be studied during the semester. Assignments may include several selections with vocalists, as well as collaboration with strings, woodwinds and brass. The goal of the course is to gain practical experience as collaborator studying standard repertoire with a varied group of vocalists and instrumentalists.

MUS 587 Arranging for Percussion 1 cr
The analysis of existing musical works from various genres and the ability to create effective musical arrangements scored only for percussion instruments.

MUS 590 Sp Top in Music Technology 1 TO 3 cr
Special topics in Music Technology. May be repeated for a maximum of 9 hours. Pre-requisite: MUS 522 Minimum Grade of D.

Music Theory (MUT) (MUT)

MUT 112 Basic Music Theory I 3 cr
Integrated course in aural and non-aural music theory including music skills, part writing analysis, counterpoint, sight singing, dictation, keyboard harmony, and computer applications in part writing and ear training.

MUT 113 Basic Music Theory II 3 cr
Elementary part-writing in two, three, and four voices. Sight-singing, ear-training, and keyboard harmony. Must be taken in sequence. Pre-requisite: MUT 112 Minimum Grade of C.

MUT 212 Intermediate Music Theory I 3 cr
A continuation of elementary theory. Chromatic harmony and remote modulation; sight-singing, ear training, keyboard harmony. Must be taken in sequence. Pre-requisite: MUT 113 Minimum Grade of C.

MUT 213 Intermediate Music Theory II 3 cr
A continuation of elementary theory. Chromatic harmony and remote modulation; sight-singing, ear-training, keyboard harmony. Must be taken in sequence. Pre-requisite: MUT 212 Minimum Grade of C.

MUT 312 Integrated Analytical Tech I 2 cr
This is the first semester of a two semester sequence designed to familiarize students with the rudiments of formal analysis, counterpoint, and practical orchestration for 18th, 19th, and 20th century music - particularly emphasizing classical, jazz, pop, and selected world-music styles. Pre-requisite: MUT 213 Minimum Grade of C.
MUT 313  Integrated Analytical Tech II  2 cr
This is the second semester of a two semester sequence designed to familiarize students with the rudiments of formal analysis, counterpoint, and practical orchestration for 18th, 19th, and 20th century musics—particularly emphasizing classical, jazz, pop, and selected world-music styles.
Pre-requisite: MUT 312 Minimum Grade of C.

MUT 314  Introduction to Composition  2 cr
Compositional techniques and the writing of original compositions for solo instruments and small ensembles.
Pre-requisite: MUT 213 Minimum Grade of D.

MUT 361  Fundamentals of Conducting  3 cr
Basic baton technique; simple and complex rhythms; score reading; practical choral and instrumental conducting techniques.
Pre-requisite: MUT 213 Minimum Grade of D.

MUT 362  Instrumental Conducting  3 cr
Advanced baton technique; psychology of rehearsal; interpretative and conducting techniques for instrumental organization.
Pre-requisite: MUT 361 Minimum Grade of D.

MUT 364  Choral Cond and Lit  3 cr
Advanced conducting with attention to the harmonic and formal analysis of choral works; special emphasis on performance practice.
Pre-requisite: MUT 361 Minimum Grade of D.

MUT 412  Orchestration  2 cr
The techniques of scoring for the orchestra, band, and small ensembles.
Pre-requisite: MUT 213 Minimum Grade of D.

MUT 413  Band Arranging  2 cr
The techniques of scoring for the modern concert wind band. Offered in alternate years.
Pre-requisite: MUT 213 Minimum Grade of D.

MUT 421  Composition I  3 cr
Original work in musical composition. To be taken in sequence. Offered by special arrangement only.
Pre-requisite: MUT 314 Minimum Grade of D.

MUT 422  Composition II  3 cr
Original work in musical composition. To be taken in sequence. Offered by special arrangement only.
Pre-requisite: MUT 421 Minimum Grade of D.

MUT 431  Jazz Improvisation I  2 cr
The study of elementary improvisation techniques used in contemporary jazz performance. Instructor permission required.

MUT 432  Jazz Improvisation II  2 cr
The study of intermediate to advanced improvisation techniques used in contemporary jazz performance. Instructor permission required.

MUT 490  Special Topics -  1 TO 3 cr
Special topics in music theory and composition. May be repeated for a maximum of six hours credit when content varies.

MUT 512  Intro Analysis of Music Lit  4 cr
Introduction to the techniques of analysis applied to a selection of music literature emphasizing works from the seventeenth century to the middle of the twentieth century.

MUT 513  Pedagogy of Theory  1 TO 4 cr
Practices and principles of teaching music theory, emphasizing most desirable and practical offerings possible. A comparative survey of current systems and materials for teaching music theory and aural skills. Review of materials and methods used in teaching the written music theory sequence and in teaching aural skills (music dictation and sight singing). Includes review of textbooks and technology used in the classroom.

MUT 531  Jazz Improvisation I  2 cr
The study of elementary improvisation techniques used in contemporary jazz performance. Instructor permission required.

MUT 532  Jazz Improvisation II  2 cr
The study of intermediate to advanced improvisation techniques used in contemporary jazz performance. Instructor permission required.

Native American Studies (NAS) (NAS)

NAS 101  Intro Native American Studies  3 cr
This course is designed to provide a general introduction to Native American Studies. The class will explore a range of topics covering historical and contemporary issues from the perspective of Native Americans.

NAS 390  Directed Studies-  1 TO 6 cr
Directed Studies consists of readings or projects relating to Native American Studies chosen by the student and completed under direct supervision of the course director.

NAS 490  Special Topics -  3 cr
An investigation of issues and concepts in Native American Studies for advanced undergraduate students. May be repeated, when content varies, for a total of six hours.

NAS 496  Internship Native Am Studies  3 TO 6 cr
Internship in Native American Studies allows the student to combine academic learning with practical experience as an intern with a position relevant to Native American Studies.

Natural Science Educ (NSE) (NSE)
NSE 201  Intro to Physical Science  3 cr
The scientific attitude, the application of physical laws and principles to modern life, and assembling of apparatus and materials for demonstrating these principles are studied. (Not open to science majors.)

NSE 202  Intro to Physical Science  3 cr
The scientific attitude, the application of physical science laws and principles to modern life, and assembling of apparatus and materials for demonstrating these principles are studied. (Not open to science majors.)

NSE 403  Aerospace Education  3 cr
Basic principles of flight; survey of space exploration, military, commercial, and general aviation. Preparation of materials for use in teaching.

NSE 404  Aerospace Education  3 cr

NSE 494  Dir St -  1 TO 3 cr
Directed study. No more than 6 hours can be accepted for a Bachelor's Degree and Class B Certificate. Prerequisite: Permission of department chair.

NSE 501  Adv Aerospace Education  3 cr

NSE 594  Dir St and Research  1 TO 3 cr
Students explore through directed study problems and issues of special interest or signification in Science Education. No more than 3 hours of any departmental 594 courses can be applied toward a degree program. Prerequisite: Permission of department chair.

Linguistics (LNG) (LNG)

LNG 300  Intro to Linguistics  3 cr
LNG 300-Introduction to Linguistics is the introductory class for the Applied Linguistics minor. It will introduce linguistics concepts to the students and give them the foundation needed for the higher level classes required as part of the minor. Required core course. Prerequisite: Sophomore standing.

Pre-requisite: (LG 201 Minimum Grade of C and LG 202 Minimum Grade of C) or (LG 211 Minimum Grade of C and LG 212 Minimum Grade of C) or (LG 231 Minimum Grade of C and LG 232 Minimum Grade of C) or (LG 241 Minimum Grade of C and LG 242 Minimum Grade of C) or (LG 251 Minimum Grade of C and LG 252 Minimum Grade of C) or (LG 271 Minimum Grade of C and LG 272 Minimum Grade of C) or (LGS 201 Minimum Grade of C and LGS 202 Minimum Grade of C) or (LGS 206 Minimum Grade of C and LGS 207 Minimum Grade of C) or (LGS 210 Minimum Grade of C and LGS 211 Minimum Grade of C) or (LGS 221 Minimum Grade of C and LGS 222 Minimum Grade of C) or (LGS 241 Minimum Grade of C and LGS 242 Minimum Grade of C) or (LGS 261 Minimum Grade of C and LGS 262 Minimum Grade of C) or (LGS 281 Minimum Grade of C and LGS 282 Minimum Grade of C) or (LG 201 and LG 202 and LG 211 and LG 212 and LG 231 and LG 232 and LG 241 and LG 242 and LG 251 and LG 252 and LG 271 and LG 272 and LGS 201 and LGS 202 and LGS 206 and LGS 207 and LGS 210 and LGS 211 and LGS 221 and LGS 222 and LGS 241 and LGS 242 and LGS 261 and LGS 262 and LGS 281 and LGS 282 can be taken concurrently with this course.

LNG 305  History of Euro Languages  3 cr
LNG 305-History of European Languages is an elective class for the Applied Linguistics minor. It will introduce students to the emergence and development of the European Languages as we know them today, tracing their historical development from the beginning to the modern era. Elective course.

Pre-requisite: LNG 300 Minimum Grade of C.

LNG 306  Contemporary Poetry and Trans  3 cr
In this course, students will broaden their knowledge of contemporary poetry in either the Chinese, French, German, Russian or Spanish language and become conversant with translation theory. They will also begin to work towards expertise in the translation of this poetry into English.

Pre-requisite: LG 212 Minimum Grade of C or LG 232 Minimum Grade of C or LG 252 Minimum Grade of C or LG 272 Minimum Grade of C or LG 273 Minimum Grade of C.

LNG 400  Applied Linguistics  3 cr
LNG 400- Applied Linguistics is the second linguistics class for the Applied Linguistics minor. It will introduce Second Language Acquisition theory and concepts to the students and give them the theoretical foundation needed for the minor. This is the last required class of the Applied Linguistics minor. Required core course.

Pre-requisite: LG 300 Minimum Grade of C. LG 300 can be taken concurrently with this course.
**LNG 465  Foreign Lang Pedagogy**  3 cr  
LNG 465-Foreign Language Pedagogy is an elective class for the Applied Linguistics minor. It will introduce students to the theories and methodologies of the surrounding second language instruction, tracing their historical development of these methodologies from the beginning to the modern era. Elective course. Special Permission of the Instructor required to enroll in course.  
Pre-requisite: LNG 300 Minimum Grade of C and LNG 400 Minimum Grade of C.  

**LNG 490  Special Topics**  3 cr  
LNG 490-Special Topics is an elective class for the Applied Linguistics minor. A variety of topics can be covered in this class as determined by student interest and the discretion of the Director of Applied Linguistics Program. Elective course.  
Pre-requisite: LNG 300 Minimum Grade of C and LNG 400 Minimum Grade of C.  

**LNG 494  Directed Studies**  3 cr  
LNG 494-Directed Studies is an elective class for the Applied Linguistics minor. A variety of topics can be covered in this class as determined by student interest and the discretion of the Director of Applied Linguistics Program. Elective course.  
Pre-requisite: LNG 300 Minimum Grade of C and LNG 400 Minimum Grade of C.  

**LNG 496  Intern. Applied Ling**  3 cr  
LNG 496-Internship in Applied Linguistics is an elective class for the Applied Linguistics minor. Allows Applied Linguistics students the opportunity for hands-on practice of the theories and methodologies learned as part of the Applied Linguistics minor. Elective course.  
Pre-requisite: LNG 465 Minimum Grade of C.  

**LNG 500  Introduction to Linguistics**  3 cr  
Introduction to Linguistics will introduce Linguistics concepts to the students and give them the foundation needed for studies in applied linguistics.  

**LNG 510  Applied Linguistics**  3 cr  
Applied Linguistics will introduce second language acquisition theory and concepts to the students and give them the theoretical foundation needed for studies in applied linguistics.  

**NU 325B  Health Assessment**  3 cr  
The purpose of the course is to provide students the opportunity to acquire basic nursing assessment skills. The emphasis is on the assessment skills of the whole person, including physical, psychological, sociocultural, and spiritual aspects of persons from all stages of life. Students will learn skills associated with obtaining a health history and performing health assessments across the lifespan. Prerequisite: Admission to professional component or special permission of instructor. Restricted to students in the RN to BSN program.  
Co-requisite: NU 311  

**NU 327B  Patho Basis of Nursing**  3 cr  
The purpose of the course is to provide students the opportunity to acquire the theory and evidence applicable to the physiology and alterations in physiology of individuals across the lifespan. The emphasis of this course is alterations in cardiovascular, pulmonary, genitourinary, gastrointestinal, immune, neurological, musculoskeletal, and endocrine systems. Prerequisite: Admission to professional component or special permission of instructor. Restricted to students in the RN to BSN program.  

**NU 101  Freshman Seminar in Nursing**  2 cr  
The purpose of this course is to introduce the unique requirements and opportunities of professional nursing to beginning students who have declared nursing as their major and are considering nursing as a major. The course focuses on the value of higher education as a base for a career in nursing and develops an awareness of activities and support services available within the University to enhance student success. Academic rules and regulations and policies related to admission, progression, and graduation in the University and College are discussed.  

**NU 300  Foundations of Prof Nsg**  5 cr  
The purpose of the course is to provide students the opportunity to appraise theories, concepts, evidence, issues and trends in promoting the health of an adult-geron population experiencing commonly occurring health care needs. Emphasis is on the use of the nursing process and other systematic approaches to assess, plan, implement, and evaluate health promotion and maintenance activities, illness care, and rehabilitation with adults in a variety of acute and community settings.  
Co-requisite: NU 301  
Pre-requisite: NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and HSC 343 Minimum Grade of C and NU 311 Minimum Grade of C and HSC 342 Minimum Grade of C.
NU 301  Foundations of Prof Nsg Clin  3 cr
Application of concepts and theories related to health promotion and maintenance, illness care, and rehabilitation with an adult-gerontology population experiencing commonly occurring health care needs. Emphasis is the role of the professional nurse and on the use of the nursing process with an adult-gerontology population in a variety of acute and community based settings.
Co-requisite: NU 300
Pre-requisite: NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and (HSC 243 Minimum Grade of C or HSC 343 Minimum Grade of C) and NU 311 Minimum Grade of C and HSC 342 Minimum Grade of C.

NU 302  Essentials of Professions Nsg  4 cr
The purpose of this course is to provide an overview of pathophysiology, pharmacology, clinical skills assessment, and medication administration. The course focuses on the responsibility of the professional nurse in ensuing quality and safety.
Pre-requisite: (NU 325 or NU 311) and (NU 327 or HSC 343). NU 325 and NU 311 and NU 327 and HSC 343 can be taken concurrently with this course.

NU 304  Evidence Based Practice NU- W  3 cr
The purpose of this course is to introduce evidence-based practice (EBP) to the undergraduate nursing student. Emphasis within the course is one evaluation of literature relevant to nursing practice, and the implications of its application to care provided to the patient. Ethical implications of research and EBP, including the roles of clinical expertise, patient values and preferences in EBP are also examined in the course. This course requires professional component standing.
Pre-requisite: (NU 311 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C and NU 327 Minimum Grade of C and HSC 343 Minimum Grade of C).

NU 311  Clinical Nursing Skills  3 cr
The purpose of this course is to provide students the opportunity to acquire basic nursing care skills. The emphasis is on the responsibilities of the professional nurse in ensuring quality and safety. Students are introduced to simulation as an approach to sharpen clinical reasoning and communication skills in a safe environment. Prerequisites: Admission or special permission of instructor.
Co-requisite: NU 325
Pre-requisite: NU 312 Minimum Grade of C. NU 312 can be taken concurrently with this course.

NU 312  Clinical Skills Immersion  1 cr
Application of concepts and theories related to health promotion and maintenance, illness care, and rehabilitation with an adult-gerontology population experiencing commonly occurring health care needs. Emphasis on the role of the professional nurse and on the use of the nursing process with an adult-gerontology population in a variety of community based settings.
Pre-requisite: (NU 325 Minimum Grade of C and NU 311 Minimum Grade of C). NU 325 and NU 311 can be taken concurrently with this course.

NU 325  Health Assessment  3 cr
The purpose of the course is to provide students the opportunity to acquire basic nursing assessment skills. The emphasis is on the assessment skills of the whole person, including physical, psychological, sociocultural, and spiritual aspects of persons from all stages of life. Students will learn skills associated with obtaining a health history and performing health assessments across the lifespan. Prerequisite: Admission to professional component or special permission of instructor.
Co-requisite: NU 311

NU 327  Patho Basis of Nursing  3 cr
The purpose of the course is to provide students the opportunity to acquire the theory and evidence applicable to the physiology and alterations in physiology of individuals across the lifespan. The emphasis of this course is alterations in cardiovascular, pulmonary, genitourinary, gastrointestinal, immune, neurological, musculoskeletal, and endocrine systems. Prerequisite: Admission to professional component or special permission of instructor.
Pre-requisite: (NU 311 and NU 325). NU 311 and NU 325 can be taken concurrently with this course.

NU 332  Clinical Nutrition  2 cr
The purpose of this course is to provide students the opportunity to acquire nutritional theory and evidence required for health promotion and disease prevention of individuals across the lifespan.
Pre-requisite: (NU 327 Minimum Grade of C and NU 325 Minimum Grade of C and HSC 343 Minimum Grade of C). NU 327 and NU 325 and HSC 343 can be taken concurrently with this course.

NU 390  Sp Top -  1 TO 8 cr
Study of a significant topic or problem in Nursing and the Health Professions. This course may be repeated for a total of four credits. Requires special permission.

NU 394  Directed Study -  1 TO 4 cr
Individual study in a nursing area chosen in consultation with instructor. Requires special permission.
NU 395 Study Abroad Cultural Exp 0 TO 9 cr
The purpose of this course for the undergraduate student is to develop an improved understanding of culture, Leininger's theory of Diversity and Universality, to recognize any cultural practices that affect health care, to incorporate this understanding into the provision of care. Culture will be examined through writing, cultural experiences, through collaboration. The course is underpinned by Dr. Leininger's definition of culture and her theory of culture care.

NU 404 EBP & Informatics 3 cr
This course is designed for Registered Nurse students to apply principles of research, evidence-based practice (EBP) and informatics to practice problems. The focus of the course is interpreting and incorporating research for the improvement of health care. Emphasis is on critical appraisal of research and use of data in quality improvement.

NU 412 Dec Making Prof Nsg Practice 3 cr
This course focuses on continuing the leadership development of the student within the context of providing professional nursing care to patients and families across the lifespan. Decision-making, delegation, and motivation competencies are emphasized.
Co-requisite: NU 460
Pre-requisite: (CMN 420 Minimum Grade of C and CMN 421 Minimum Grade of C and AHN 447 Minimum Grade of C and AHN 448 Minimum Grade of C and NU 414 Minimum Grade of C). CMN 420 and CMN 421 and NU 414 can be taken concurrently with this course.

NU 414 Issues & Trends Healthcare -W 3 cr
The purpose of this web based course is to provide students the opportunity to integrate leadership roles and functions, management strategies, current issues and trends affecting nursing and health care and continued professional development, into a personal lifelong learning plan. Emphasis is on the professional nurse as a leader in improving patient care and cost effectiveness of health care and the development of a current nursing workforce. National interest areas such as patient safety, policy, patient centered care, and the process for quality improvement are primary focuses.
Co-requisite: NU 412
Pre-requisite: (AHN 447 Minimum Grade of C and AHN 448 Minimum Grade of C and NU 311 Minimum Grade of C and NU 304 Minimum Grade of C and NU 312 Minimum Grade of C and NU 325 Minimum Grade of C). AHN 447 and AHN 448 can be taken concurrently with this course.

NU 422 Healthcare Leadership & Collab 3 cr
The purpose of this course is to continue the professional development of Registered Nurse students through initiation leadership and collaborative roles in healthcare or community settings. The course focuses on professionalism, leadership roles and functions, management strategies, and emerging trends in nursing and health care. The emphasis of the course is on the professional nurse as a leader in improving health care. Activities include a practice integrated experience application of quality improvement process to promote optimal health care delivery.

NU 450 Lead/Mang Roles Prog Nsg Pra-W 4 cr
The purpose of this course is the continued development of conceptual and practical knowledge of professional nursing leadership and management roles in a complex adaptive healthcare system. Content includes but is not limited to: management, systems leadership, professional values, personal vs organizational philosophy, quality improvement, and performance appraisal. Other topics related to professional nursing include social, political, legal, and ethical issues.

NU 451 Current Issues/Trends Prof Nsg 4 cr
Current issues and trends affecting nursing and healthcare in society will be reviewed. Emphasis will be on the development of professional nursing contributions to the changing healthcare environment. Content includes but is not limited to: issues in the healthcare environment including social, legal, ethical, safety and political. Pre-requisite: (NU 450 Minimum Grade of C). NU 450 can be taken concurrently with this course.

NU 452 Clinical Preven & Pop Health 4 cr
Theoretical concepts related to healthcare promotion/ disease prevention to improve health at individual, family, and population level in the global community. Content includes but is not limited to: health behaviors, health literacy, at-risk populations, genetics, chronic illness, socioeconomic status, environmental exposures, ethics, advocacy, social justice, civic responsibility and strategies of risk reduction and improvement in disparities in outcomes are evaluated and applied to population health. Pre-requisite: (NU 450 Minimum Grade of C). NU 450 can be taken concurrently with this course.

NU 453 Infor Manag & Tech in Hlthcare 4 cr
This course will prepare Registered Nurse students to recognize the critical role of information management and patient care technology in identifying technological solutions to enhance delivery of quality patient care and outcomes. Content includes but is not limited to: nurse sensitive indicators (assessment, pathophysiology), safety, ethical and legal aspects. Pre-requisite: (NU 450 Minimum Grade of C and NU 451 Minimum Grade of C and NU 452 Minimum Grade of C). NU 452 can be taken concurrently with this course.
NU 454  Research & EBP Practicum-W  4 cr
This course allows Registered Nurse students to analyze basics research process and methodology. Students will complete direct and indirect clinical care experiences, identify practice issues, levels of evidence, identify and synthesize evidence, and propose practice initiatives by participating in quality improvement in a variety of diverse healthcare or community systems. Content includes but is not limited to: organizational models, change theory, critical thinking, ethical, legal and political influences. *Practice integrated experience - develop a quality improvement initiative to address a system or community health need or problem. This is a direct and indirect clinical course. Pre-requisite: (NU 450 Minimum Grade of C and NU 451 Minimum Grade of C and NU 452 Minimum Grade of C and NU 453 Minimum Grade of C and NU 455 Minimum Grade of C) or (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C. NU 452 and NU 453 and NU 455 can be taken concurrently with this course.

NU 455  Concept Interprofessional Care  4 cr
Develop skills to support communication and collaboration among healthcare professionals and delivery of safe, high quality patient care. Focus on applying current Interprofessional Education Collaborative (IPEC) competencies, including collaborative strategies and resource management in complex healthcare systems. Pre-requisite: (NU 450 Minimum Grade of C and NU 451 Minimum Grade of C and NU 452 Minimum Grade of C and NU 453 Minimum Grade of C and NU 454 Minimum Grade of C). NU 453 and NU 454 can be taken concurrently with this course.

NU 460  Practicum  5 cr
Culminating clinical practice course to provide students an in-depth learning experience in a selected area of nursing practice. The leadership, management, and caregiver roles of the professional nurse with patients and their families in a selected area of nursing practice is emphasized. Students are assigned to nurse preceptors and with faculty guidance focus on leadership and management, and application of the nursing process theories, concepts, research, issues and trends in caring for patients in a variety of preceptorship placements in acute and community settings. Co-requisite: NU 412 Pre-requisite: CMN 420 Minimum Grade of C and CMN 421 Minimum Grade of C and AHN 447 Minimum Grade of C and AHN 448 Minimum Grade of C and NU 414 Minimum Grade of C. CMN 420 and CMN 421 and NU 414 can be taken concurrently with this course.

NU 461  Integration Prof Practice - W  4 cr
The purpose of this course is to provide Registered Nurse students the opportunity to integrate professional role characteristics with a capstone practice integrated experience. This in-depth learning activity draws on prior work in evidence-based practice, nursing role development, scientific and humanistic foundations, and collaboration. The focus is on application of principles of leadership to create a substantive activity contributing to healthcare improvement. Emphasis is on implementation and evaluation of an initiative in a selected practice setting addressing a health need or problem.

NU 490  Special Topics  0 TO 9 cr
Study of a significant topic or problem in nursing and the health professions. This course may be repeated for a total of four credits. Requires special permission.

NU 496  Service Abroad Hlth Related EX  0 TO 9 cr
This is a service learning course that will culminate in select communities in the international setting Emphasis is on providing culturally competent care by providing and immersion experience. Pre-requisite: AHN 448 Minimum Grade of C. AHN 448 can be taken concurrently with this course.

NU 499  NU Honors Senior Project  1 TO 6 cr
The purpose of the course is to provide students the opportunity to investigate scholarly undergraduate research, service-learning, or study abroad experiences resulting in development of the written honors thesis. Nursing Honors Program. Requires special permission. Pre-requisite: HON 301 Minimum Grade of D. HON 301 can be taken concurrently with this course.

NU 500  Explore Culture Sexual Assault  2 cr
The purpose of this course is to provide nursing students an in-depth exploration of forensic nursing concepts and principles related to caring for the victim and survivor of sexual violence from a population health care perspective with a cultural emphasis. A spectrum of compassionate care incorporating cultural understanding and respect that is cognizant from assault to post trauma aftermath including life-long sequelae and its prevention is utilized. Prevention and health promotion models of care within the context of transcultural global health priorities are reviewed. Forensic nursing concepts and principles related to caring for the victim of sexual violence from a culturally congruent population healthcare perspective across the lifespan are explored including compassionate continued care post-sexual assault.
NU 502 Sexual Assault Vic Practicum 1 cr
The purpose of this course is to provide nursing students opportunities to apply didactic principles to ensure competency in the care of the sexually traumatized patient with particular emphasis on complex forensic histories involving special populations and challenging treatment situations. Students will conduct forensic interviews, exams, preserve evidence, and determine proper techniques involving patients from diverse cultural backgrounds. Students will identify, critical analyze, determine follow up, and evaluate patient responses that may include a variety of cultural, economic, and physical challenges.
Pre-requisite: NU 500 Minimum Grade of C. NU 500 can be taken concurrently with this course.

NU 503 Trauma Care Sexual Assault Vic 2 cr
The purpose of this course is to expand the graduate nursing student's knowledge of trauma, particularly sexual trauma. The focus is on examining ongoing threats to safety among individuals, communities, and witnesses to trauma. The course will facilitate students to create policy initiatives, community service activities, and to become violence prevention advocates. The student will understand NP leadership in collaboration with SART, professional nurse testimony and participation in the legal process to empower victims, decrease revictimization, and ensure social justice and healthcare access to the victim, suspect, witness and communities impacted by sexual violence.
Pre-requisite: NU 500 Minimum Grade of C.

NU 504 Adv Pharm Care Post Assault 2 cr
The purpose of this course is to examine the pharmacological principles and the current treatment modalities of post-sexual assault care. The focus is the selection and monitoring of drug therapy of sexual assault victims throughout the lifespan and across post trauma disease processes. Motivational patient education and follow-up to incentivize adherence and prevent complications will be explored using the pathology of infectious and communicable disease, psychosocial science, pediatric growth and development, and the legal systems as its framework.
Pre-requisite: NU 500 Minimum Grade of C.

NU 505 Sup Care Comorbid Post Assault 2 cr
The purpose of this course is to increase the graduate student's knowledge of the victim/survivor's response to trauma, particularly sexual trauma. The focus is on examining the behavioral, psychological, and physiologic response of victims/survivors across the lifespan with consideration of gender and socio-cultural factors. The emphasis is on patient centered care and includes a multidisciplinary team approach to developing individualized plans of care to facilitate restorative healing for victims/survivors of sexual trauma.
Pre-requisite: NU 500 Minimum Grade of C.

NU 509 Bioethics Advan Practice Nsg 1 cr
This course examines bioethical topics that emerge in contemporary health care and explores the socio-political, legal, technological, and economic variables that contribute to these issues. Students will gain understanding of ethical and legal concepts and apply the principles in advanced nursing practice.

NU 510 Addictions Practicum I 1 cr
This course serves as one of three practicum courses in the Addictions Subspecialty nursing program. The purpose of this practicum course is preparation in prevention, screening, assessment, diagnosing, and management/treatment including recovery care of OUD/SUD integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional-age populations.
Co-requisite: HSC 580

NU 511 Addictions Practicum II 2 cr
This course serves as a one of three practicum courses in the Addictions Subspecialty nursing program. The purpose of this practicum course is preparation in prevention, screening, assessment, diagnosing, and management/treatment including recovery care of OUD/SUD integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional-age populations.
Co-requisite: HSC 581
Pre-requisite: (NU 510 Minimum Grade of C and HSC 580 Minimum Grade of C).

NU 512 Addictions Practicum III 2 cr
This course serves as a one of three practicum courses in the Addictions Subspecialty nursing program. The purpose of this practicum course is preparation in prevention, screening, assessment, diagnosing, and management/treatment including recovery care of OUD/SUD integrated health care and telehealth settings across the lifespan. While preparation is across the life span, emphasis will be focused on child, adolescent, and transitional-age populations.
Co-requisite: HSC 582
Pre-requisite: (NU 510 Minimum Grade of C and NU 511 Minimum Grade of C and HSC 580 Minimum Grade of C and HSC 581 Minimum Grade of C).
NU 515  Clinical Concepts/CNS Role I  2 cr
The purpose of this course is to introduce students to the role of the Clinical Nurse Specialist and examine the epidemiologic, assessment, diagnostic, management and evaluation of adolescent/adult/old adult patients across the continuum of healthcare services (from wellness through acute care). The course focuses on health promotion, health protection, and disease management of patients with cardiovascular, pulmonary, and musculoskeletal health issues to include differential diagnoses and pharmacotherapeutics. The course explores the dynamic interplay between the pathophysiologic basis of disease and the psychosocial and socio-cultural responses to acute illness and injury as clinical decision-making skills are developed. Emphasis within the course is placed on synthesizing and applying the core competencies of the Clinical Nurse Specialist.
Pre-requisite: NU 545 Minimum Grade of C and NU 578 Minimum Grade of C and NU 608 Minimum Grade of C. NU 545 and NU 578 and NU 518 and NU 608 can be taken concurrently with this course.

NU 516  Clinical Concepts/CNS Role II  3 cr
The purpose of this course is to integrate advanced pharmacology and pathophysiology, and assessment for the provision of advanced nursing care across the continuum of healthcare services (from wellness through acute care) to meet the specialized needs of adolescent/adult/old adult patients. The course focuses on health promotion, health protection, and disease management of patients with endocrine, neurologic, gastrointestinal, renal, and genitourinary health problems. Emphasis within the course is placed on the CNS’s influence on health care incorporating the perspectives of technology, social justice, fiscal stewardship, patient advocacy, and evidence-based practice.
Co-requisite: AHN 517
Pre-requisite: NU 515 Minimum Grade of C and AHN 516 Minimum Grade of C.

NU 517  Clinical Concepts/CNS Role III  3 cr
The purpose of this course is to provide a forum for the analysis, synthesis, and application of knowledge required for the CNS role in the management of acute and chronic problems as well as management and prevention of exacerbations of chronic health problems from adolescent/adult/older adult age groups. The course focuses on health promotion, health protection, and disease management of patients with hematology/oncology, immunology, infectious disease, integumentary, and psychosocial health issues. The emphasis is on the CNS spheres of influence to identify problems, manage resources and fiscal outcomes, design and select therapeutic interventions, and evaluate products and devices for use with patients and health team members from diverse cultural and ethnic backgrounds. Potential for contributions and entrepreneurial opportunities within nursing will be addressed.
Co-requisite: AHN 518
Pre-requisite: NU 516 Minimum Grade of C and AHN 517 Minimum Grade of C and NU 607 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 610 and NU 613 can be taken concurrently with this course.

NU 518  Adv Nursing Assessment  3 cr
This course is designed to further develop the student’s advanced knowledge and skills for obtaining and recording a systematic health history and advanced physical examination of individuals and families across the lifespan. The course involves synthesis and application of nursing, biologic, psychologic, and socio-cultural knowledge and theories in comprehensive health assessment for the purposes of health promotion, differential diagnosis, and development of health records. The central objective is the development of cognitive and clinical skills needed to provide comprehensive care to individuals of all ages in primary, secondary, and tertiary care settings.

NU 535  Clin Ldr Role & Competencies  3 cr
The purpose of this course is to explore the role and function of the clinical nurse leader. The course focuses on the implementation of the role which will vary across settings and facilities. The emphasis is on evidenced-based practice and knowledge and skills that the CNL role requires for successful enactment of the role.
Co-requisite: NU 536
Pre-requisite: NU 607 Minimum Grade of C and NU 518 Minimum Grade of C and NU 545 Minimum Grade of C and NU 578 Minimum Grade of C. NU 518 and NU 545 and NU 578 can be taken concurrently with this course.
NU 536  Clin Nurse Ldr Pract I  5 cr
The purpose of this first of two capstone Clinical Nurse Leader courses is to provide students an in-depth preceptor-based clinical experience in a selected area of nursing practice. The focus of the course is on the CNL as caregiver, leader, and care manager. Emphasis is on the application of the nursing process, theories, concepts, research, issues and trends in providing care in complex patient situations and managing the care of a group of patients.
Co-requisite: NU 535
Pre-requisite: (NU 607 Minimum Grade of C and NU 578 Minimum Grade of C).

NU 537  Clin Nurse Leader Synthesis  3 cr
The purpose of this culminating synthesis course for the CNL role is provide students an opportunity to analyze and evaluate actual CNL practice patterns. The course focuses on continuing to build the students competencies in clinical decision making, problem identification, resource management, and outcome measurement for a selected patient population at the point of care. The emphasis is on working with patients and health team members from diverse cultural and ethnic background, accountability for coordination, delegation and supervision of care within a multidisciplinary team.
Co-requisite: NU 538
Pre-requisite: (NU 535 Minimum Grade of C and NU 536 Minimum Grade of C) and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 607 Minimum Grade of C.

NU 538  Clinical Jrse Ldr Prac II  4 cr
The purpose of this second of two capstone Clinical Nurse Leader courses is to provide students an immersion experience in the CNL role in a selected area of nursing practice. The focus of the course is to further develop CNL competencies with emphasis on team leading and building, advocacy, communication, resource and outcomes management, and evidenced based practice.
Co-requisite: NU 537
Pre-requisite: NU 535 Minimum Grade of C and NU 536 Minimum Grade of C.

NU 539  Intro to Nursing Informatics  3 cr
The purpose of this course is to provide the student an introduction to nursing informatics and the evolving importance of the application and evaluation of information technology in nursing and health care. The emphasis of the course is to provide the students the expertise and knowledge to function effectively in the modern health care information technology (IT) environment.

NU 545  Physio-Patho Basis of Adv Nsg  3 cr
The purpose of this course is to provide the advanced practice nurse with knowledge of normal physiology and alterations in physiology in individuals across the life span. The focus is theory and research applicable to organ systems and cellular events. Emphasis is on regulatory and compensatory functions in health and in pathophysiological conditions.

NU 553  Administrative Concepts  2 cr
The purpose of this course is to examine concepts, theories and current trends in healthcare administration. The focus is the identification of leadership and management strategies in the management of physical, financial, and human resources in healthcare systems. Emphasis is placed on organizational leadership and management theories, ethical and legal issues, human resource management, and teamwork and collaboration to meet the health care needs of vulnerable populations in culturally diverse communities.
Co-requisite: NU 554
Pre-requisite: NU 607 Minimum Grade of C. NU 607 can be taken concurrently with this course.

NU 554  Resource Manag Field Study  1 cr
The purpose of the supervised field study activity is to provide the student with a clinical experience to investigate the purpose and structure of a health care agency in the community. The course focus is on administration and resource management in health care organizations. Emphasis within the course is placed on the synthesis of the knowledge acquired in previous courses.
Co-requisite: NU 553
Pre-requisite: NU 607 Minimum Grade of C. NU 607 can be taken concurrently with this course.

NU 556  Informatics & Qual Care Improv  3 cr
The purpose of this course is to focus on quality improvement models and methods which will use client outcome measures across a broad range of health care settings. Emphasis will be placed on Continuous Quality Improvement (CQI) methods and their relationships with current health care systems.
Co-requisite: NU 557
Pre-requisite: ISC 555 Minimum Grade of C and NU 565 Minimum Grade of C and NU 539 Minimum Grade of C and ISC 550 Minimum Grade of C and NU 554 Minimum Grade of C. NU 565 and NU 539 and ISC 550 can be taken concurrently with this course.

NU 557  Clinical Informatics Pract I  2 cr
This clinical course allows students to integrate concepts and theories in clinical informatics in selected health care settings. This practicum offers students an opportunity to work closely with a health care vendor and integrate concepts/theories in clinical informatics. Additionally students will begin to learn how to configure and customize operating systems. Students will also begin to identify their site for Clinical Informatics Practicum II.
Co-requisite: NU 556
NU 558 Seminar in Nursing Informatics 3 cr
This course will provide students the opportunity to discover the responsibilities of the Nursing Informatics Specialist's role by applying legal/ethical concepts to selected case studies in a variety of situations.
Co-requisite: NU 559
Pre-requisite: NU 607 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 608 Minimum Grade of C. NU 607 and NU 610 and NU 613 and NU 608 can be taken concurrently with this course.

NU 559 Clinical Informatics Pract II 2 cr
This clinical course allows students to integrate and apply informatics competencies in the nurse informatics specialty role while working closely with a guided preceptor. This role may take place within a variety of health care settings.
Co-requisite: NU 558

NU 560 Adm & Mgt for Adv Nsg Practice 3 cr
The purpose of this course is to examine concepts and methods of nursing administration. The focus is on management of physical, financial, and human resources in dynamic healthcare systems. Emphasis is on leadership, communication, interprofessional team functioning, and collaboration to meet healthcare needs in culturally diverse populations.
Pre-requisite: NU 607 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 613 can be taken concurrently with this course.

NU 561 Nursing Admin Concepts-Theory 3 cr
The purpose of this course is to introduce the role of the nurse executive. The course focuses on role expectations and professional competency requirements. Emphasis within the course is placed on the influential role of the nurse executive in improving patient care, improving health of populations, and reducing healthcare costs.
Co-requisite: NU 566

NU 563 Exec Admin Clin Progression 1 TO 4 cr
The purpose of this progression practicum is to facilitate student independence in the Executive Nurse Administrator role. The focus is on the application and synthesis of knowledge and skills acquired in all previous courses and to develop the necessary skills to progress to the next level of competency in the Executive Nurse Administrator role.

NU 565 Nursing Administration Finance 3 cr
The purpose of this course is to introduce nurse administrators to healthcare financial management. The course focuses on reimbursement and expenditures for healthcare delivery. Emphasis within the course is placed on basic accounting, financial decision-making, statement analysis, & staffing plans.
Pre-requisite: NU 607 Minimum Grade of C. NU 607 can be taken concurrently with this course.

NU 566 Nursing Admin Field Study 4 cr
The purpose of this first practicum course is to provide the nurse executive student a faculty and preceptor facilitated clinical experience in a healthcare setting. The course focuses on the professional role and competencies of the nurse executive. Emphasis within the course is placed on the application and synthesis of knowledge and skills acquired in previous courses.
Co-requisite: NU 561
Pre-requisite: NU 565 Minimum Grade of C and NU 554 Minimum Grade of C and HSC 571 Minimum Grade of C.

NU 567 Nursing Admin Internship 3 cr
The purpose of this culminating practicum course is to provide students a faculty and preceptor facilitated clinical experience in a healthcare setting. The course focuses on continued professional role and competencies development of the nurse executive. Emphasis within the course is placed on the application and synthesis of knowledge and skills acquired in previous courses.
Co-requisite: NU 568
Pre-requisite: NU 566 Minimum Grade of C and NU 539 Minimum Grade of C and NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C. NU 607 and NU 608 and NU 610 and NU 613 can be taken concurrently with this course.

NU 568 Nursing Admin Seminar 3 cr
The purpose of this course is to prepare students for the role of nurse executive. The course focuses on professional competency development. Emphasis within the course is placed on strategic planning, governance, regulations, politics, and current issues trend.
Co-requisite: NU 567
Pre-requisite: NU 539 Minimum Grade of C and NU 561 Minimum Grade of C and NU 566 Minimum Grade of C.

NU 569 Exec Admin Shadowing Intensive 1 cr
The purpose of this course is to provide opportunity for the Executive Administration Nursing student to gain experience in an executive nursing setting prior to entering executive administration nursing specialty specific courses.
NU 570  Emergency NP I  2 cr  
This course is the first course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of this didactic course is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, and ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential as a basis of care management; (2) treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the emergency care settings with thoracic-respiratory and cardiovascular disorders.

Co-requisite: NU 571

NU 571  Emergency NP Practicum I  1 TO 3 cr  
This course is the third course in a series of four practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose of the practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired thorough coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on advanced practice nursing role in caring for individuals of all ages in the emergency care setting.

Co-requisite: NU 570
Pre-requisite: NU 578 Minimum Grade of C.

NU 572  Emergency NP II  2 cr  
This course is the second course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of the didactic courses is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in acute health problems across the lifespan based on current evidence based practice; and (3) collaboration and communication among health care providers in culturally diverse environment. The focus is on the advanced practice nursing role in caring for individuals in the emergency care setting with dermatologic, abdominal, and non-traumatic musculoskeletal disorders.

Co-requisite: NU 573
Pre-requisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C.

NU 573  Emergency NP Practicum II  1 TO 3 cr  
This course is the second course in a series of three practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose this practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on advanced practice nursing role in caring for individuals of all ages in the emergency care setting.

Co-requisite: NU 572
Pre-requisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C.

NU 574  Emergency NP III  2 cr  
This course is the third course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of the didactic courses is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus is on the advanced practice nursing role in caring for individuals in the emergency care setting with renal, genitourinary, endocrine, nervous, and head, eye, ear, nose, and throat system disorders.

Co-requisite: NU 575
Pre-requisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C and NU 573 Minimum Grade of C.

NU 575  Emergency NP Practicum III  1 TO 3 cr  
This course is the third course in a series of four practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose of this practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired thorough coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on advanced practice nursing role in caring for individuals of all ages in the emergency care setting.

Co-requisite: NU 574
Pre-requisite: NU 570 Minimum Grade of C and NU 571 Minimum Grade of C and NU 572 Minimum Grade of C and NU 573 Minimum Grade of C.
NU 576  Emergency NP IV  2 cr  This course is the final course in a series of four didactic courses for the Emergency Nurse Practitioner student. The purpose of the didactic courses is to prepare Emergency Nurse Practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, ambulatory care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus is on advanced practice nursing role in caring for individuals in the emergency care setting with traumatic and psychiatric disorders.  

NU 577  Emergency NP Practicum IV  1 TO 3 cr  This course is the final course in a series of four practicum courses for the Emergency Nurse Practitioner student that will provide intensive study into clinical specialty. The purpose of this practicum course is to provide the Emergency Nurse Practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in advanced emergency nursing is expected throughout the four clinical courses. The focus is on the advanced practice nursing role in caring for individuals of all ages in the emergency care setting.  

NU 578  Pharm Adv Practice Nurses  3 cr  The purpose of this course is to expand the pharmacological knowledge of the advanced practice nurse. The focus is the selection and monitoring of drug therapy for persons throughout the lifespan. Emphasis is on pharmacokinetics and pharmacotherapeutics of major drug classifications. Pre-requisite: NU 545 Minimum Grade of C. NU 545 can be taken concurrently with this course.  

NU 579  Family/Emerg Nursing Intensive  1 cr  This course is a clinical practice course for the registered nurse to gain experience providing emergency care to patients across the lifespan. The focus of the course is on application of theories, concepts, research, and issues in emergency nursing. The emphasis is on the role of the professional nurse in emergency nursing and on the use of the nursing process to provide emergency care for individuals across the lifespan that are experiencing an emergency medical condition.  

NU 580  Hlth Promo & Ds Prev/FNP/ENP  2 cr  The purpose of this course is to prepare the emergency nurse practitioner student to identify and implement appropriate and culturally competent health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary and emergency care settings. Emphasis is placed on health promotion and disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice nurse role.  

NU 581  Family/Emergency NP I  5 cr  This course is the first course in a series of four didactic courses for the emergency nurse practitioner student. The purpose of this didactic course is to prepare emergency nurse practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.  

NU 582  Family/Emerg NP Practicum I  2 cr  This course is the first course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.  

NU 580  Hlth Promo & Ds Prev/FNP/ENP  2 cr  The purpose of this course is to prepare the emergency nurse practitioner student to identify and implement appropriate and culturally competent health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary and emergency care settings. Emphasis is placed on health promotion and disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice nurse role.  

NU 581  Family/Emergency NP I  5 cr  This course is the first course in a series of four didactic courses for the emergency nurse practitioner student. The purpose of this didactic course is to prepare emergency nurse practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.  

NU 582  Family/Emerg NP Practicum I  2 cr  This course is the first course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.  

NU 580  Hlth Promo & Ds Prev/FNP/ENP  2 cr  The purpose of this course is to prepare the emergency nurse practitioner student to identify and implement appropriate and culturally competent health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary and emergency care settings. Emphasis is placed on health promotion and disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice nurse role.  

NU 581  Family/Emergency NP I  5 cr  This course is the first course in a series of four didactic courses for the emergency nurse practitioner student. The purpose of this didactic course is to prepare emergency nurse practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.  

NU 582  Family/Emerg NP Practicum I  2 cr  This course is the first course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.  

NU 580  Hlth Promo & Ds Prev/FNP/ENP  2 cr  The purpose of this course is to prepare the emergency nurse practitioner student to identify and implement appropriate and culturally competent health promotion and disease prevention strategies across the lifespan. The focus is on the advanced practice nursing of individuals and families in primary and emergency care settings. Emphasis is placed on health promotion and disease prevention with strategic planning at the primary, secondary and tertiary levels of prevention. Various issues are explored pertinent to the advanced practice nurse role.  

NU 581  Family/Emergency NP I  5 cr  This course is the first course in a series of four didactic courses for the emergency nurse practitioner student. The purpose of this didactic course is to prepare emergency nurse practitioner students to assess, diagnose, and manage the health care needs of patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.  

NU 582  Family/Emerg NP Practicum I  2 cr  This course is the first course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.
NU 583 Family/Emergency NP II  5 cr
This course is the second course in a series of four didactic courses where the Emergency Nurse Practitioner student will continue to develop and define assessment, diagnostic, and management skills needed to care for patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute and chronic health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.
Co-requisite: NU 584
Pre-requisite: NU 581 Minimum Grade of C and NU 582 Minimum Grade of C.

NU 584 Family/Emerg NP Practicum II  4 cr
This course is the second course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.
Co-requisite: NU 583
Pre-requisite: NU 581 Minimum Grade of C and NU 582 Minimum Grade of C.

NU 585 Family/Emergency NP III  5 cr
This course is the third course in a series of four didactic courses where the emergency nurse practitioner student will continue to develop and define assessment, diagnostic, and management skills needed to care for patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute and chronic health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.
Co-requisite: NU 586
Pre-requisite: (NU 583 Minimum Grade of C and NU 584 Minimum Grade of C).

NU 586 Family/Emerg NP Practicum III  4 cr
This course is the third course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.
Co-requisite: NU 585
Pre-requisite: (NU 583 Minimum Grade of C and NU 584 Minimum Grade of C).

NU 587 Family/Emergency NP IV  5 cr
This course is the final course in a series of four didactic courses where the Emergency Nurse Practitioner student will continue to develop and define assessment, diagnostic, and management skills needed to care for patients across the lifespan in emergent, urgent, and primary care settings. Emphasis is placed on (1) synthesis and application of critical thinking, diagnostic reasoning, and scientific knowledge in the development of differential diagnosis as a basis for care management; (2) the treatment of acute and chronic health problems across the lifespan based on current evidence-based practice; and (3) collaboration and communication among health care providers in a culturally diverse environment. The focus of this course is on the advanced practice nursing role in caring for individuals in the primary and emergency care setting with disorders of selected body systems.
Co-requisite: NU 588
Pre-requisite: NU 585 Minimum Grade of C and NU 586 Minimum Grade of C.

NU 588 Family/Emerg NP Practicum IV  4 cr
This course is the final course in a series of four practicum courses for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses.
Co-requisite: NU 587
Pre-requisite: NU 585 Minimum Grade of C and NU 586 Minimum Grade of C.
NU 589  Family/Emerg NP Cl Progression  1 TO 4 cr
This course is a practicum progression course for the emergency nurse practitioner student that will provide intensive study into the family nurse practitioner role and the emergency nurse practitioner specialty. The purpose of this practicum course is to provide the emergency nurse practitioner student the opportunity to apply and integrate knowledge acquired through coursework. Development and refinement of clinical expertise in primary and emergency care is expected throughout the four clinical courses. At the discretion of the Emergency Nurse Practitioner track coordinator, satisfactory completion of this course may be required.
Pre-requisite: NU 582 Minimum Grade of C.

NU 590  Special Topics -  0 TO 9 cr
Study of significant topics or problems in nursing and the health professions. Content will vary. May be repeated.

NU 594  Directed Studies  1 TO 11 cr
Directed study under the direction of a member of the graduate faculty.

NU 595  Study Abroad Cultural Exp  0 TO 9 cr
The purpose of this course for the graduate student is to develop an improved understanding of the culture, Leininger’s theory of Diversity and Universality, to recognize any cultural practices that affect health care and to incorporate this understanding into the provision of care. Culture will be examined through writing cultural experiences, and through collaboration. The course is underpinned by Dr. Leininger’s definition of culture and her theory of culture care.

NU 596  Service Abroad Hlth Related Ex  0 cr
This is a service learning course that will culminate in select communities in the international setting. Emphasis is providing culturally competent care by providing an immersion experience.

NU 597  Intro to Scholarly Writing  3 cr
The purpose of the course is to enhance scientific writing skills and provide a review of basic and advanced grammar, and development of rhythm, voice, and purpose in writing. There will be a focus on developing skills to utilize bibliographic search methodology and the American Psychological Association (APA) editorial format.

NU 599  Thesis  1 TO 3 cr
The purpose of this course is to provide an opportunity to complete a research study with the guidance of a graduate faculty committee. The focus is on research in advanced nursing practice.
Pre-requisite: NU 513 Minimum Grade of C.

NU 607  Scientific Underpinnings Adv Nsg  3 cr
The purpose of this course is for the MSN/DNP student to explore the scientific underpinnings that define the nature of health and healthcare delivery and to provide the basis for practice at the highest level of nursing. The focus of this course is to explore the structure and nature of nursing science as it relates to advanced nursing practice. The course emphasis is on the exploration of a clinically relevant phenomena of interest that will be examined from the philosophical, theoretical, ethical, and conceptual context.

NU 608  EBP & Quality Improvement HCS  3 cr
The purpose of this course is to provide the MSN/DNP student with the foundational components required for effective utilization of evidence based practice within the scope of advanced nursing practice. The course focuses on the use of analytic methods to critically appraise existing literature and other evidence to determine and implement the best evidence for practice. The course emphasis is on the application of quantitative, qualitative, and quality improvement methodologies to promote safe, effective care within healthcare systems.

NU 610  Healthcare Policy & Finance  3 cr
The purpose of this course for the MSN/DNP student is to develop advanced nursing leaders who have the knowledge and skills to design, analyze, influence, and implement policies that frame health care financing, practice regulation, access, safety, quality, and efficacy. The course focuses on major contextual factors and policy triggers that influence health policy making at various levels. Principles of finance, business, and health care economics will be presented. The course emphasis is on developing essential competencies in health care policy advocacy and health care financing.

NU 611  Translat Evidence Practice Sys  3 cr
The purpose of this course for the DNP student is to provide the methodological basis for translating evidence into practice systems in a variety of healthcare settings. The course focuses on locating, evaluating, synthesizing, channeling, applying, and explaining appropriate findings from laboratory and experimental settings to improve the efficiency and effectiveness of nursing care. The course emphasis is on the use of applied techniques for evidence translation with an exploration of ethics and the protection of human research subjects.
Pre-requisite: NU 608 Minimum Grade of C and NU 607 Minimum Grade of C. NU 608 and NU 607 can be taken concurrently with this course.
NU 612  Clinical Prev Population Hlth  3 cr
The purpose of this course for the DNP student is to explore the multifaceted issues pertaining to population health and health promotion in the local, regional, national, and global populations across the lifespan. The course focuses on health issues and strategies to eliminate health disparities across all population groups. The course emphasizes the use of health surveillance measures and determinants of health to characterize geographical locations and population groups as well as effective health promotion and disease and accident prevention strategies.
Pre-requisite: NU 608 Minimum Grade of C and NU 607 Minimum Grade of C. NU 608 and NU 607 can be taken concurrently with this course.

NU 613  Organizational & Sys Leadrshp  3 cr
The purpose of this course for the MSN/DNP student is to synthesize leadership and organizational theory within the context of complex healthcare systems. The course focuses on the exploration and application of principles of advanced communication, collaboration, and team building to the process of systems change to prepare the student for advanced roles in leading change. Emphasis within the course is placed on assessment of organizational culture as a basis for improvement of individual and aggregate healthcare outcomes; models of quality improvement and project planning, implementation, and evaluation are also examined.

NU 615  Qual Improv & Outcomes Assmnt  3 cr
The purpose of this course is to build on the foundation established in NU 608 Evidence Based Practice and Quality Improvement in Healthcare Systems to provide the DNP student with additional knowledge and skills to develop, implement, and evaluate programs that improve health outcomes. The course focuses on the design, implementation, and evaluation of quality improvement methodologies. The course places emphasis on applying quality improvement processes to evaluate outcomes of practice against national benchmarks to determine variances in practice outcomes and population trends. Pre-requisite: NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 611 Minimum Grade of C. NU 607 and NU 608 and NU 611 can be taken concurrently with this course.

NU 616  Data & Dec Mkng Healthcare Sys  3 cr
The purpose of this course is to prepare the DNP student to be proficient in the evaluation and use of technology and information systems appropriate to specialized areas of advanced nursing practice. The course focuses on information systems and current technology in the management of healthcare outcomes. Within the course, emphasis is placed on the use of information systems and technology based resources to support clinical and administrative decision making.

NU 620  Prin Teach/Learn/Assess Nu Ed  3 cr
The purpose of this course is to provide a foundation of principles of teaching and learning, including theories, styles, and application to the diverse learner. Emphasis is on analysis of teaching in the classroom and clinical setting, assessment techniques, and implementation of technology, all while incorporating evidence-based teaching practices.

NU 621  Curr Design/Outcome Eval Nu Ed  3 cr
Analysis and synthesis of theories and concepts related to curriculum development and outcomes. Emphasis is on institutional purposes, goals, nursing curricula design, and outcomes evaluation that supports the requirements of the institution, the program, and accrediting agencies.

NU 622  Current Topics in Nu Education  2 cr
The purpose of this course is to engage the student in an analysis of concepts and theories basic to the nurse educator role in academic and in practice settings. Emphasis is on current issues and trends in nursing education, the role of the academic nurse educator, and professional, social, political, legal, cultural, and other issues related to nursing education.

NU 623  Nsg Educ Synthesis Practicum  3 cr
The purpose of this course is the synthesis of nursing education theory in practicum experience. Focus is on the application of nursing education theory in developing, teaching, and evaluating an education unit, exemplifying the nurse educator role, and adhering to institutional and legal guidelines.
Pre-requisite: NU 620 Minimum Grade of C and NU 621 Minimum Grade of C and NU 622 Minimum Grade of C. NU 621 and NU 622 can be taken concurrently with this course.

NU 625  Nursing Informatics PP&D  3 cr
This course assists the Nursing Informatics DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Nursing Informatics students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination.
Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.
NU 657 Nursing Informatic Residency I 3 TO 6 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Nursing Informatics student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Nursing Informatics student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the Nursing Informatics student's career trajectory and approval by collaborating faculty. During the residency semester, student must participate in scheduled scholarly seminars online. Pre-requisite: NU 656 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

NU 658 NU Informatics Residency II 3 TO 6 cr
Provides Nursing Informatics students the opportunity to fully express all DNP competencies. The Nursing Informatics student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project. Pre-requisite: NU 657 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

NU 659 NU Informatics Residency III 3 TO 6 cr
Final course in residency series as Nursing Informatics student continues to implement and evaluate project plan. Provides Nursing Informatics student the opportunity to fully express all DNP competencies. The Nursing Informatics student, guided by the core faculty and advisor completes quality improvement evidence-based system's change project. Pre-requisite: NU 612 Minimum Grade of C and NU 658 Minimum Grade of C. NU 612 can be taken concurrently with this course.

NU 661 Executive Nsg Admin PP&D 3 cr
This course assists the Nurse Executive Administration DNP student to learn the processes embedded in developing a doctoral synthesis project. The course will address all aspects of project planning and development as a preliminary step to the Nurse Executive Administration students' selection of a topic or phenomenon of interest for the project and will incorporate well-built questions, search strategies and outcomes, identification of resources needed, plan for evaluation and dissemination. Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.

NU 662 Nurse Exec Admin Res I 3 TO 6 cr
Theories of leadership, motivation, power, and change are used to influence change in health care organizations. This course will implement evidence-based clinical models and evaluate their effectiveness in health outcomes. The Nurse Executive Administration student will synthesize, critique, and apply evidence to support quality clinical or organizational practices. In this mentored and supervised experience, the Nurse Executive Administration student will work with the primary faculty advisor to complete projects and advance their selected practice area. The Nurse Executive Administration student will have access to and authority for expanded scope of practice to master the DNP competencies. Residency sites will depend upon the student's career trajectory and approval by collaborating faculty. During the residency semester, the Nurse Executive Administration student must participate in scheduled scholarly seminars online. Clinical hours of direct practice/management is required. Pre-requisite: NU 661 Minimum Grade of S and NU 615 Minimum Grade of C. NU 615 can be taken concurrently with this course.

NU 663 Nurse Exec Admin Res II 3 TO 6 cr
Provides Nurse Executive Administration students the opportunity to fully express all DNP competencies. The student, guided by the faculty facilitator, will implement the scholarly doctoral system's change project. Pre-requisite: NU 662 Minimum Grade of C and NU 616 Minimum Grade of C. NU 616 can be taken concurrently with this course.

NU 664 Nurse Exec Admin Res III 3 TO 6 cr
Final course in residency series as the Nurse Executive Administration student continues to implement and evaluate project plan. Provides the Nurse Executive Administration student the opportunity to fully express all DNP competencies. The student, guided by the core faculty and advisor, completes quality improvement evidence-based system's change project. Pre-requisite: NU 663 Minimum Grade of C and NU 612 Minimum Grade of C. NU 612 can be taken concurrently with this course.

NU 680 Family/Emergency NP PP&D 3 cr
In this course, students will begin a systematic investigation of a clinically based topic relevant to the practice of the emergency nurse practitioner. Integration of scientific underpinnings, human caring values, ethical principles, and cultural competencies is expected. Emphasis is placed on developing a proposal for the Doctor of Nursing Practice scholarly project. Students will select and analyze strategies, models, and theories to plan, implement, and evaluate the scholarly project. Pre-requisite: (NU 607 Minimum Grade of C and NU 608 Minimum Grade of C and NU 610 Minimum Grade of C and NU 613 Minimum Grade of C and NU 611 Minimum Grade of C). NU 611 can be taken concurrently with this course.
NU 681  Family/Emerg NP Residency I  3 cr
This course is the first course in a progressive sequence of three residency courses that will develop the Emergency Nurse Practitioner student into a practice scholar. The purpose of the residency course is to integrate the application of leadership, theoretical, and specialty knowledge to improve patient and population health outcomes in the emergency care setting. The focus of this residency course is to provide the Emergency Nurse Practitioner student with faculty supervised and preceptor mentored experiences to begin the development and implementation of the Doctor of Nursing Practice scholarly project.
Pre-requisite: NU 680 Minimum Grade of S.

NU 682  Family/Emerg NP Residency II  3 cr
This course is the second course in a progressive sequence of three residency courses that will develop the Emergency Nurse Practitioner student into a practice scholar. The purpose of the residency course is to integrate the application of leadership, theoretical, and specialty knowledge to improve patient and population health outcomes in the emergency care setting. The focus of this residency course is to provide the Emergency Nurse Practitioner student with faculty supervised and preceptor mentored experiences to implement the Doctor of Nursing Practice scholarly project.
Pre-requisite: NU 681 Minimum Grade of C.

NU 683  Family/Emerg NP Residency III  3 cr
This course is the final course in a progressive sequence of three residency courses that will develop the Emergency Nurse Practitioner student into a practice scholar. The purpose of the residency course is to integrate the application of leadership, theoretical, and specialty knowledge to improve patient and population health outcomes in the emergency care setting. The focus of this residency course is to provide the Emergency Nurse Practitioner student with faculty supervised and preceptor mentored experiences to disseminate the findings of the Doctor of Nursing Practice scholarly project.
Pre-requisite: NU 682 Minimum Grade of C.

NU 690  Sp Top -  1 TO 9 cr
Selected topics in Nursing Science and/or Nursing Education. Requires special permission.

NU 692  DNP Project Progression  3 cr
Students will register for this course to complete residency course work under the supervision of faculty. Students must remain continuously enrolled until all residency requirements are completed.

NU 694  Directed Study and Research  1 TO 6 cr
Directed study and research facilitated by a member of the graduate faculty. Requires special permission.

Occupational Therapy (OT) (OT)

OT 201  Intro to Occupational Therapy  3 cr
An introduction to the occupational therapy profession and the scope of occupational therapy practice. Includes self assessment and development strategies to enhance students' readiness for the professional component of the occupational therapy curriculum. Familiarizes students with the functions, policies and services of the University, College and Department and includes an exploration of related allied health professions.

OT 499  Senior Honors Project - H - W  3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project relevant to the field of Occupational Therapy study that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty members chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours.

OT 500  Occupation in Context  3 cr
An in depth study of human occupation in context with emphasis on analysis of the person, the environment, and the task utilizing official occupational therapy documents. Includes an introduction to the evidence-based occupational science literature and discussion of the impact of occupation on health an wellbeing.

OT 501  Occupational Development  4 cr
This course will include the study of typical human development throughout the life span with emphasis on best practice screening and assessment, theories of development, and normative and non-normative influences on development.

OT 504  Neurosci Basis of Occ Perform  3 cr
Study of the neural development, chemistry, structure, function and pathology of the nervous system. Emphasizes the application of basic science knowledge as it relates to human occupational performance.

OT 505  Scientific Inquiry I  2 cr
An introduction to qualitative and quantitative research concepts and statistical methods with emphasis on evidence-based practice and outcomes research. Includes library search strategies, critical analysis of scientific literature, application of statistical methods and research designs, and scientific writing skills.

OT 506  Research Design  1 cr
An introduction to writing a research design proposal. Students will work in small groups and be mentored by faculty to complete a research proposal.

<tbody>
<tr>
<td>OT 507</td>
<td>ADL/IADL Eval &amp; Intervention</td>
<td>2 cr</td>
</tr>
<tr>
<td></td>
<td>Occupational therapy best practice assessment and evidence-based interventions to improve participation in ADL/IADL skills in children and adolescence.</td>
<td></td>
</tr>
<tr>
<td>OT 508</td>
<td>Experiential Learning-Peds</td>
<td>2 cr</td>
</tr>
<tr>
<td></td>
<td>This course will consist of experiential learning activities focused on occupational therapy evaluation and interventions for ADL and IADL participation in children and adolescence.</td>
<td></td>
</tr>
<tr>
<td>OT 509</td>
<td>OT Foundations</td>
<td>3 cr</td>
</tr>
<tr>
<td></td>
<td>This course will promote student knowledge of the theories, frames of reference, historical and sociopolitical influences, and professional documents guiding the profession of occupational therapy. Active participation in OT professional organizations will be encouraged.</td>
<td></td>
</tr>
<tr>
<td>OT 511</td>
<td>Neuromusculoskeletal Assessment</td>
<td>1 cr</td>
</tr>
<tr>
<td></td>
<td>This course is a study of the structure and function of human body in order to enhance foundational knowledge for evaluation of occupational performance. Instruction include an emphasis on biomechanical assessment of limb range of motion and manual muscle testing.</td>
<td></td>
</tr>
<tr>
<td>OT 513</td>
<td>Neuromusculoskeletal Experient</td>
<td>2 cr</td>
</tr>
<tr>
<td></td>
<td>This course will provide experiential learning of the structure and function of the human body and assessment of limb range of motion and muscle strength. Students will learn to administer assessments of client factors using appropriate and safe procedures and protocols.</td>
<td></td>
</tr>
<tr>
<td>OT 515</td>
<td>Psychosocial Eval &amp; Intervent</td>
<td>3 cr</td>

<tr>
<td></td>
<td>A directed experience in evaluation, planning and implementing occupational therapy services under the supervision of an experienced, certified occupational therapist. Designed to emphasize clinical reasoning, entry-level skill acquisition and integration of didactic knowledge with practice.</td>
<td></td>
</tr>
</tbody>
</table>
OT 551  Pract. IV Psych/Soc  1 cr  Observation and limited participation in clinical and community-based settings serving clients with psychosocial and behavioral needs. Students will study evidence-based interventions that promote performance of various age appropriate and culturally relevant occupations. Emphasis will be placed on the behavioral, psychological and/or social factors promoting or hindering performance.

OT 552  OT School-Based Practice  3 cr  This course will focus on Occupational Therapy in School-Based Practice Settings. Emphasis will be on evidence-based practices to enhance occupational performance in the context of school. Therapeutic interventions will emphasize problem-solving, critical reasoning, and occupational performance synthesis to enhance occupational performance and adaptation. This course will explore current legislation impacting the role of OT in the schools, the evaluation process and assessment tools for this environment and populations, working within various educational team models, transition planning, and promotion of life skill development.

OT 553  OT and the Older Adult  2 cr  This course focuses on the practice of occupational therapy with the older adult. Course content includes conceptual foundations in gerontology, age-related changes affecting occupational performance, evidence-based interventions, the gerontological continuum of care and the intradisciplinary and interprofessional collaborations that impact the delivery of services to this population.

OT 554  OT & the Older Adult Exp Learn  2 cr  This course focuses on the practice of occupational therapy with the older adult. Course content includes demonstration and analysis of assessments and evidence-based interventions used with the older adult population. This course also applies the OT process inside the gerontological continuum of care and emphasizes the intradisciplinary and interprofessional collaborations that impact the delivery of services to this population.

OT 555  Level II Fieldwork - B  6 cr  A directed experience in evaluation, planning and implementing occupational therapy services under the supervision of an experienced, certified occupational therapist. Designed to emphasize clinical reasoning, entry-level skill acquisition and integration of didactic knowledge with practice.

OT 557  OT for the Young Child  3 cr  This course will provide the best practice knowledge regarding occupational therapy for children birth to 5 years of age. Emphasis will be on early intervention and preschool services. Focus will be placed on client- and family-centered, occupation-based practice, which includes current and emerging practice areas for this population. Emphasis will be on OT evaluations and intervention planning.

OT 558  Tech & Environ Interven in OT  3 cr  An introduction to technology and environmental intervention (TEI; including but not limited to assistive, electronic, information, and rehabilitative) strategies used to increase, maintain or improve functional capabilities of individuals with disabilities and/or to design and implement accessible environments to support full participation in life activities. This course is designed to meet the basic level of competency in TEI for the entry level occupational therapist.

OT 559  OT for UE Injuries and Work  2 cr  Occupational therapy assessments and intervention for persons with developmental and acquired impairments and disabilities with emphasis on UE impairments impacting daily life skills and work. This course will be placed specifically on UE and hand injuries and appropriate interventions. Therapeutic interventions will emphasize problem-solving, critical reasoning, and occupational performance synthesis to enhance occupational performance and adaptation.

OT 561  UE Injuries & Work Experientia  2 cr  This course will consist of hands-on experiences with student reflection that focuses on occupational therapy assessments and interventions for persons with developmental and acquired impairments and disabilities. This course emphasizes UE conditions and impairments impacting daily life skills and work.

OT 567  OT for UE Injuries and Work  2 cr  Occupational therapy assessments and intervention for persons with developmental and acquired impairments and disabilities with emphasis on UE impairments impacting daily life skills and work. This course will be placed specifically on UE and hand injuries and appropriate interventions. Therapeutic interventions will emphasize problem-solving, critical reasoning, and occupational performance synthesis to enhance occupational performance and adaptation.

OT 568  UE Injuries & Work Experientia  2 cr  This course will provide in depth knowledge on OT best practice for working collaboratively with a variety of interprofessional teams. Content will include examination of IPEC competencies as well as experiential practice sessions with other disciplines.

OT 571  Interprofessional Collaboration  1 cr  This course will provide in depth knowledge on OT best practice for working collaboratively with a variety of interprofessional teams. Content will include examination of IPEC competencies as well as experiential practice sessions with other disciplines.

OT 572  Eval and Intervention Child an  2 cr  This course will provide in depth knowledge on best practices OT evaluation and intervention for middle childhood to adolescence. Emphasis will be on outpatient settings and include both individual and group interventions. Content will included transition planning, community mobility, and best practice evidence based evaluations and interventions.

OT 573  OT in Acute Care  2 cr  Occupational therapy assessments and intervention for persons in the acute hospital setting with acquired impairments and/or disabilities affecting self-care and functional mobility skills. This course will have emphasis on physical rehabilitation, occupational performance components and context. Therapeutic interventions will emphasize problem-solving, critical reasoning, and occupational performance synthesis to enhance occupational performance and adaptation.

OT 574  OT and Wellness  3 cr  This course will provide in depth knowledge on OT best practice for prevention, health promotion, and wellness. Focus will be on development of prevention/improvement for high-risk, high-need population based interventions.
OT 575  Advanced Professional Writing  2 cr
Covers a variety of types of professional writing useful to occupational therapists including: grant proposals; journal articles; books; client education materials; and presentation proposals and papers. Includes both the form and content of a range of technical documents as well as the processes of writing, peer review and critique.

OT 576  Res Analysis and Presentation  1 cr
Students will work in small groups with faculty mentor to conduct research study and collect data. Students will complete the data analysis started in previous research classes and then complete a poster presentation of their research.

OT 577  Management and Supervision  3 cr
Explores the application of the principles of organizational management and supervision to the development and administration of occupational therapy programs and occupational therapy personnel.

OT 578  Intervention Competencies  2 cr
This course will provide an overview of evaluation and interventions to promote student clinical reasoning and hands on practice in preparation for clinical fieldwork. Content will be comprehensive of previous courses with emphasis on case-based clinical reasoning skills and appropriate selection and accurate and safe demonstration of OT evaluations and interventions. Three comprehensive practical competency exams are required. One comprehensive written exam is required. Students must pass with grade B or better to proceed to fieldwork.

OT 580  Level II Fieldwork - C  4 cr
A directed experience in evaluation, planning and implementing occupational therapy services under the supervision of an experienced, certified occupational therapist. Designed to emphasize clinical reasoning, entry-level skill acquisition and integration of didactic knowledge with practice.

OT 581  Clinical Practice I  2 cr
Explores concepts and theories of leadership and emphasizes the importance of leadership in context, interdisciplinary teaming and the nature of change processes and diffusion of innovations. Also includes a focus on clinical practice and preparing for the board exam.

OT 582  Clinical Practice II  2 cr
Explores concepts and theories of leadership and emphasizes the importance of leadership in context, interdisciplinary teaming and the nature of change processes and diffusion of innovations. Also includes a focus on clinical practice and preparing for the board exam. This course is a continuation of OT 581 Clinical Practice I.

OT 585  Level II Fieldwork - D  4 TO 12 cr
A directed experience in evaluation, planning and implementing occupational therapy services under the supervision of an experienced, certified occupational therapist. Designed to emphasize clinical reasoning, entry-level skill acquisition and integration of didactic knowledge with practice.

OT 590  Special Topics -  1 TO 6 cr
A variable topics course covering areas not available in other occupational therapy courses. A subtitle identifying the topic will be entered on the student's record.

OT 598  Independent Study in OT  1 TO 6 cr
Special studies directly relevant to the practice of occupational therapy. The student will select an area of interest in which they wish to become more proficient. A faculty member will provide guided study, supervision and assistance in developing appropriate learning experiences.

PE-Activity Courses (PE) (PE)

PE 101  PE Activity -  1 cr
Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit.

PE 102  Weight Training  1 cr
A progressive resistance training course designed to improve muscular strength and endurance. May be repeated for credit.

PE 103  PE Activity -  1 cr
Instruction and practice of sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.

PE 104  PE Activity -  1 cr
Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.

PE 105  PE Activity -  1 cr
Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.

PE 106  Gymnastics  1 cr
Instruction and practice in gymnastic skills. A varying content course treating different skill levels in gymnastics. May be repeated for credit.

PE 107  PE Activity -  1 cr
Instruction and practice of basic sport and activity skills. A varying content course that gives students choices from designated semester offerings. May be repeated for credit. An additional fee will be charged for these activities.
PE 108 Ballroom Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of ballroom dancing through demonstration, practice and partnering.

PE 109 Swing Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of swing dancing through demonstration, practice, and partnering.

PE 110 Dance - 1 cr
Instruction and practice in dance. A varying content course treating different types of dance such as but not limited to social, folk, square, and dance performance. May be repeated for credit.

PE 112 Latin Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of Latin dancing through demonstration, practice, and partnering.

PE 113 Creative Dance 1 cr
An introduction to dance as an art form; the vocabulary for movement as a means of self-expression. May be repeated for credit.

PE 114 Aerobics 1 cr
Aerobic exercise is a physical fitness program that offers complete and effective conditioning. It involves jogging, lunging, kicking, and stretching to music.

PE 115 Ballroom and Swing Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of ballroom and swing dancing through demonstration, practice and partnering.

PE 116 Cajun and Swing Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of Cajun and Swing dancing through demonstration, practice, and partnering.

PE 117 Ballet 1 cr
Instruction and practice in ballet. A varying content course treating the different skill levels of ballet with emphasis on correct body placement through barre and centre exercises. May be repeated for credit.

PE 118 Jazz Dancing 1 cr
Instruction and practice in jazz dancing. A varying content course treating the various skill levels of jazz with emphasis on correct body placement through isolation and locomotor techniques. May be repeated for credit.

PE 119 Modern Dance 1 cr
Instruction and practice in modern dance. A varying content course with exposure to various skill levels and modern dance styles. May be repeated for credit.

PE 120 Tennis - Basic 1 cr
Instruction and practice in beginning and intermediate tennis. May be repeated for credit.

PE 121 Golf - Basic 1 cr
Instruction and practice in beginning golf. May be repeated for credit.

PE 122 Bowling 1 cr
Instruction and practice in beginning bowling. Requires special fee. May be repeated for credit.

PE 123 Archery 1 cr
Instruction and practice in beginning archery. May be repeated for credit.

PE 124 Latin and Swing Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of Latin and Swing dancing through demonstration, practice, and partnering.

PE 125 Badminton 1 cr
Instruction and practice in beginning and intermediate badminton. May be repeated for credit.

PE 126 Ballroom and Latin Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of Ballroom and Latin dancing through demonstration, practice, and partnering.

PE 127 Country West/Partner Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of Country Western/Partner dancing through demonstration, practice, and partnering.

PE 128 Dance Performance 1 cr
Knowledge, skills, and techniques associated with various forms of Dance Performance through demonstration and practice.

PE 129 Folk and Square Dancing 1 cr
Knowledge, skills, and techniques associated with various forms of Folk and Square dancing through demonstration and practice.

PE 130 Beginning Swimming 1 cr
Instruction and practice in beginning swimming and water safety. Participation fee required. May be repeated for credit.

PE 131 Intermediate Swimming 1 cr
Instruction and practice in intermediate swimming and water safety. Participation fee required. May be repeated for credit.

PE 132 Step Aerobics 1 cr
A physical activity class which includes the instruction and practice of step aerobics. The course is designed to improve cardiovascular and muscular endurance and improve coordination.
PE 133  Muscle Toning and Conditioning  1 cr
Muscle Toning and Conditioning is a physical activity course in which the student, through active participation, will develop knowledge and skills sufficient to tone the body and improve cardiorespiratory fitness using weights, body bars, resistance tubes, and other equipment.

PE 134  Karate I  1 cr
A beginning course in Karate designed to develop physical fitness, self-discipline, the fundamentals and techniques of blocking, punching, striking, kicking, and stances.

PE 135  Karate II  1 cr
An intermediate course in Karate designed as a continuation of Karate I with the introduction of additional blocks, kicks, and footwork. Self-discipline and physical fitness continue to be stressed.

PE 136  Karate III  1 cr
An advanced course in Karate designed as a continuation of Karate II with the addition of more advanced and versatile concepts of speed, distance, timing, and footwork. Vigorous training methods are used and self-discipline is stressed.

PE 138  Tai Chi  1 cr
Tai Chi training presents basic concepts and techniques to enhance physical fitness and develop mental discipline for stress reduction and personal wellness.

PE 139  Yoga  1 cr
The purpose of this course is to introduce the basic concepts of yoga theory, to teach safe yoga posture, and to help participants in developing balance and fitness, as well as manage stress wisely.

PE 141  Softball  1 cr
Instruction and practice in softball. May be repeated for credit.

PE 142  Volleyball  1 cr
Instruction and practice in volleyball. May be repeated for credit.

PE 143  Basketball  1 cr
Instruction and practice in basketball. May be repeated for credit.

PE 144  Soccer  1 cr
Instruction and practice in soccer. May be repeated for credit.

PE 145  Jogging  1 cr
Instruction and practice in the activity of jogging designed to improve cardiovascular endurance.

PE 146  Bicycling  1 cr
An introductory course to bicycling for leisure and fitness emphasizing the selection and care of bicycles, safety concerns, apparel, route selection, bike handling skills, and development of a bicycle fitness program.

PE 147  Racquetball  1 cr
Instruction and practice in racquetball. May be repeated for credit.

PE 148  Intermediate Golf  1 cr
Instruction and practice in intermediate golf. Demonstrable beginner golf skills necessary.

PE 149  Ultimate Frisbee  1 cr
Fundamental skills, rules, and strategies with frisbees with opportunities for participation.

PE 155  Martial Arts -  1 cr
Instruction and practice in various forms of Martial Arts. A varying-content course treating different skill levels of karate, judo, kung-fu etc. Requires special fee. May be repeated for credit.

PE 157  ICA - Varsity Sports  1 cr
Restricted to members of South Alabama intercollegiate athletic teams by special permission of the respective coaches. Includes but not limited to basketball, soccer, baseball, track, golf, tennis, and volleyball. May be repeated for credit with exception of Education majors.

PE 158  Life Skills - Student Athletes  0 TO 1 cr
This course is designed to help the student acquire specific tools and life skills necessary to be a successful student-athlete on the field, in the classroom, and in life. Modeled after the NCAA Champs/Life Skills program, the course explores and develops proficiency in the areas of: academic excellence, athletic excellence, personal development, career development, and community service. The structure will be a combination of class lectures, group discussions, speakers, and activities. Prerequisites: Students enrolled in PE 158 must be an NCAA varsity student-athlete at the University of South Alabama.

Passage USA (PSG) (PSG)

PSG 001  Adult Development Seminar I  0 cr
A learner-centered approach to developing self-advocacy, academic/career, independent living, and community integration skills is used. Seminar I focuses on personal safety and prevention, campus navigation, learning with technology, and personal care.

PSG 002  Internship/Work Experiences I  0 cr
Individualized instruction focused on career exploration and soft skill development. Students will explore different job and career options during the semester as well as develop skills related to employment.

PSG 003  Adult Dev Sem II  0 cr
A holistic instructional approach addresses individual learning goals in areas of functional skills and knowledge, application, integration, caring, and learning to learn is used. Seminar II focuses on goal setting, self-care, well-being, budgeting, and learning strategies.
PSG 004  Intern/Wrk Exp II  0 cr
Individualized instruction focused workplace documentation, characteristics of good employees and employment development. Students will explore different job and career options while practicing skills they have learned in class in supervised work experiences.
Pre-requisite: PSG 002 Minimum Grade of S.

PSG 005  Adult Dev Sem III  0 cr
Students will participate in valuable and diverse learning experiences generalized to multiple environments. Seminar III focuses on transportation to and from campus, managing personal, fiances, interpersonal skills development, and citizenship responsibilities.

PSG 006  Intern/Wrk Exp III  0 cr
Students will be placed in supervised internship/work placements and receive on job training. Individual job training will address Adult Education Program goals as well a student's needs.

PSG 007  Adult Dev Sem IV  0 cr
Through individualized instructions students will refine self-advocacy, academic/career, independent/daily living, and community integration skills. Seminar IV focuses on advanced transportation, budgeting and finances, interpersonal, well-being, and self-care skills.

PSG 008  Intern/Wrk Exp IV  0 cr
Students will have a supervised internship/work experience. Instruction will focus on the skills needed to gain and/or maintain paid employment. Individualized instruction will be provided.

PSG 009  Work Pract I  0 cr
Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 6 hours a week.

PSG 010  Work Pract II  0 cr
Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 6 hours a week. Pre-requisite: PSG 009 Minimum Grade of S.

PSG 011  Work Pract III  0 cr
Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 10 hours a week.

PSG 012  Work Pract IV  0 cr
Students will engage in supervised work-based experience in a practicum setting(s) for a minimum of 10 hours a week.

PSG 090  Special Topics  0 cr
Guided study topics of specific interest to the student. Students will participate in inclusive classes that are part of the USA undergraduate curriculum.

Pharmacology (PHA) (PHA)

PHA 546  Pharmacology Lit Reports  1 cr
Students and faculty participate in a supervised reading of the current literature and meet periodically (usually once a week) to interact in a discussion of the selected article or topic. The goal of this course is to maintain the faculty's and students' level of information at a "state of the art" in both methods and theory in the discipline and to develop critical skills in reviewing the literature. Student presentation is required to receive credit.

PHA 547  Dir St in Pharmacology  1 TO 6 cr
Students participate in research under the direction of a graduate faculty member. The student may pursue independent research or participate in a literature project. This course should be taken by students who have completed their laboratory rotations, but have not yet submitted a formal research proposal.

PHA 548  Physiological Pharmacology  6 cr
This course covers both cellular and organ system physiology. It is designed to prepare graduate students for Medical Pharmacology (PHA 540), and for research in pharmacology.

PHA 590  Sp Top -  1 TO 3 cr
Each course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

PHA 640  Molecular-Cellular Pharmacology  3 cr
This course consists of presentations and literature discussions. The central themes of signal transduction from cellular receptor to amplified response, structure-activity relationships, and drug design are studied comprehensively. Specific topics include receptor-ligand interactions, receptor structure and coupling mechanisms, the biochemical and molecular aspects of G-proteins, protein phosphorylation mechanisms, molecular modeling and protein crystallography. A comprehensive course in biochemistry is prerequisite for this course.

PHA 643  Molecular-Cellular Toxicology  3 cr
This course is concerned with the mechanisms by which toxic substances exert their effects at the molecular and cellular level. Detailed analysis of the processes by which toxic materials are metabolized to toxic intermediates is addressed. The mode of action of how toxic compounds interact with structural proteins and other macromolecules, enzymes and receptors, and the genome is included. Examples of toxicity of the heart, liver, lung, pancreas, brain, including teratogenic, mutagenic and carcinogenic effects are discussed at the mechanistic level.
### Courses

**PHA 646  Cell Signaling Seminar**  
1 cr  
Students present a research topic for discussion before members of the department. The presentations are usually on a rotational basis. The student may present research data for critique by the faculty.

**PHA 799  Research Dissertation**  
1 TO 6 cr  
Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

### Philosophy (PHL) (PHL)

**PHL 110  Introduction to Philosophy**  
3 cr  
An introduction to philosophical analysis and criticism through a survey of the major branches of philosophy. Topics may include, but are not limited to: the mind/body problem, theory of knowledge, skepticism, ethics, political philosophy, aesthetics, and philosophy of religion. Fulfills the General Education Requirement.

**PHL 120  Critical Thinking**  
3 cr  
This course will examine complex types of reasoning, including statistical judgment, decision making, and causal and analogical thinking. Emphasis will be placed on the analysis of concrete examples of reasoning in various fields, including science, religion and theology, politics, law as well as alternative medicine and other non-traditional disciplines. Students will be encouraged to improve their own judgment and decision making by learning how to evaluate arguments and by learning about fallacies, common errors, and biases in reasoning and decision making. There will also be extensive discussion on the relation between how people do reason and how they ought to reason. Fulfills the General Education Requirement.

**PHL 121  Introduction to Logic**  
3 cr  
Studies arguments: what they are, how to identify them, and how to judge their quality; and examines inductive and deductive arguments in both their informal and formal aspects. Fulfills the General Education Requirement. MA 110 or equivalent is recommended.

**PHL 131  Introduction to Ethics**  
3 cr  
Examines ideas about good and bad, right and wrong, and moral obligation through a survey of major ethical systems in western philosophy. The course includes consideration of how these ideas apply to moral problems and issues. Fulfills the General Education Requirement.

**PHL 220  Medical Reasoning**  
3 cr  
This course will examine complex types of reasoning, including statistical judgment, decision making and causal and analogical reasoning. Emphasis will be placed on the analysis of concrete examples of reasoning in the medical field. Students will learn how to evaluate arguments, fallacies, common errors, and biases in medical reasoning and decision making.

**PHL 231  Social Ethics**  
3 cr  
Readings and analyses of ethical issues in society. Topics may include euthanasia, sexual equality, sexual morality, censorship, world hunger, animal rights, the environment, and capital punishment. Fulfills the General Education Requirement.

**PHL 240  Western Philosophy: Classical**  
3 cr  
Survey of classical Greek philosophy. The philosophers surveyed may include Presocratic philosophers, Socrates, Plato, Aristotle, and Hellenistic philosophers. Fulfills the General Education Requirement. Identical with CLA 240. Credit cannot be received for both PHL 240 and CLA 240.

**PHL 242  Western Philosophy - Medieval**  
3 cr  
A survey of Medieval Western Latin, Jewish and Islamic philosophers. Identical with REL 242. Credit cannot be received for both REL 242 and PHL 242.

**PHL 245  Renaissance-Enlightmnmt - W**  
3 cr  
Survey of Western philosophy from F. Bacon to Kant with emphasis on the empiricists, rationalists, and Kant. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

**PHL 251  Philosophy and Cognitive Sci**  
3 cr  
A survey of central concepts and issues in cognitive science, including an informal introduction to automata theory, intelligent systems architecture, and the philosophical issues arising out of computational models of language and cognition.

**PHL 290  Special Topics -**  
1 TO 3 cr  
Different themes and issues of philosophical significance will be studied as announced. May be repeated for a maximum of 9 hours.

**PHL 301  Skepticism in Media-Philosophy**  
3 cr  
This course examines some of the most fundamental questions about human knowledge, belief and rationality and compares the treatment of such issues in philosophical discussions and contemporary media, especially film. Identical with CA 301. Credit cannot be received for both CA 301 and PHL 301. Pre-requisite: EH 102 Minimum Grade of D or EH 105 Minimum Grade of D.
PHL 310 Classical Mythology 3 cr
Through the disciplines of English and Philosophy, this course will provide an introduction to myths and to the literature that recounts the myths, legends, and folktales of ancient Greece and Rome. This course will also look at how different writers treat the material and why their treatments vary. Credit cannot be received for both PHL 310 and either EH 310 or REL 310 or CLA 310.
Pre-requisite: (ACT English 27 or SAT Critical Reading 610 or University - EH101 Exempt P or EH 101 Minimum Grade of C or EH 110 Minimum Grade of D or EH 190 Minimum Grade of D or USA 010 Minimum Grade of S) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

PHL 311 Classical Political Thought 3 cr
The course examines the central themes of classical Western political philosophy through the reading and discussing of the primary works of such thinkers as Plato, Aristotle, Augustine, and Aquinas. (Cross-listed as CLA 311 and PSC 311)

PHL 312 Renaissance Political Thought 3 cr
The course examines central themes of Renaissance and modern Western political philosophy through the reading and discussing of the primary works of such thinkers as Machiavelli, Hobbes, Locke, and Rousseau. (Cross-listed as PSC 312)
Pre-requisite: PSC 130 Minimum Grade of C.

PHL 313 Modern Political Thought - W 3 cr
The course examines central themes of modern Western political philosophy through the reading and discussing of the primary works of such thinker as Hegel, Mill, Marx, and Nietzsche. (Cross-listed as PSC 313)
Pre-requisite: PSC 130 Minimum Grade of C.

PHL 321 Symbolic Logic 3 cr
A study of sentential and predicate logics and related topics.

PHL 327 Philosophy of Science 3 cr
Studies such topics as method and explanation in the sciences; the demarcation between science and pseudoscience; realist and anti-realist views about scientific theories; the logic of scientific change; confirmation; reduction; laws of nature; underdetermination; and society, science, and values.

PHL 331 Constitutional Law 3 cr
The study of the principles of constitutional powers and liberties examined through an analysis of decisions and opinions by the U.S. supreme Court. (Cross-listed as CJ 331 and PSC 331)

PHL 333 Biomedical Ethics - W 3 cr
Ethical analyses of problems and issues in the biomedical and health-related fields. Topics may include genetic research and technology, abortion, health care, experimentation, and death and dying. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

PHL 334 Man and Technology 3 cr
Examines the most common impacts that technology is envisioned to have on both the spirit of the human person and the environment in which that person lives. Both the technologist and anti-technologist arguments will be explored.

PHL 336 The Law and Legal Theory 3 cr
Explores issues and problems in the area of law, including the nature and rule of law, the aims and roles of legal systems, morality, and law, obligations to obey the law, and systematic injustices related to race, ethnicity, gender. (Cross-listed as PSC 336 and CJ 336)

PHL 337 Liability and Punishment 3 cr
Explores theoretical issues and problems in the areas of law--especially criminal law--concerning liability and punishment. Topics to be examined include diminished capacity, theories of punishment, and capital punishment. (Cross-listed as PSC and CJ 337)

PHL 339 Philosophy of Culture 3 cr
Acquaints students with Cassirer's philosophy of culture, with emphasis on the unity of human experience as ramified into myth, language, religion, art, history, science, and politico-social life.

PHL 345 Post-Kant Anglo-American 3 cr
An examination of selected themes and issues in Anglo-American philosophy since 1800. Topics may include pragmatism, ideal language philosophy, and ordinary language philosophy.
Pre-requisite: PHL 121 Minimum Grade of C or (PHL 321 Minimum Grade of C or PHL 324 Minimum Grade of C).

PHL 348 19th C Contl Phl-Lit Theory 3 cr
An examination of selected themes and issues in 19th Century Continental Philosophy and Literary Theory. Topics may include Idealism, Romanticism, Existentialism, Marxism, Freidusianism. Identical with EG 348 and LG 348. Credit cannot be received for both PHL 348 and either EG 348 or LG 348. (For LG credit, students will be required to do some coursework in their language of concentration.)

PHL 349 20th C Cntl Phl-Lit Theory 3 cr
An examination of selected themes and issues in 20th Century Continental Philosophy and Literary theory. Topics may include Phenomenology, Existentialism, Hermeneutics, Structuralism, and Post-Structuralism. Identical with EH 349. Credit cannot be received for both PHL 349 and either EH 349 or LG 349. (For LG credit, students will be required to do some coursework in their language of concentration.)

PHL 351 Philosophy of Religion - W 3 cr
Investigates the nature of religion, including religious experience, religious language, arguments for the existence of God, and the problems of evil. Identical with REL 351. Credit cannot be received for both PHL 351 and REL 351. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

<tbody>
<tr>
<td><strong>PHL 352</strong> World Religions 3 cr</td>
<td><strong>PHL 421</strong> Literary Criticism to 1900 - W 3 cr</td>
</tr>
<tr>
<td>This course is an introduction to the religions of the world. It is divided into three basic units: Indigenous Religions (Africa, North America, and Oceania); Eastern Religions (Hinduism, Buddhism, Daoism, Confucianism, Jainism) and Western Religions (Judaism, Christianity, Islam). The emphasis is on grasping the core principles of each tradition, seeing the ways in which religion meets basic human needs, and religion as a cultural artifact that borrows, adapts, and changes over time. Course is identical with REL 352 and SY 352. Credit cannot be received for both PHL 352 and REL 352 or SY 352.</td>
<td>Classical, Neoclassical, Romantic, and Victorian literary theory. Identical with EH 421. Credit cannot be received for both PHL 421 and EH 421. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).</td>
</tr>
<tr>
<td><strong>PHL 354</strong> Philosophies of India 3 cr</td>
<td><strong>PHL 422</strong> Literary Criticism Sn 1900 - W 3 cr</td>
</tr>
<tr>
<td>Introduces the major religions and philosophies of India by way of the classical Realist/Anti-Realist debate in India. Study of the major religious doctrines of theistic and non-dualist Vedanta, Buddhism, and Jainism, and their philosophical articulation in the Nyaya, Advaita Vedanta, Madhyamaka, and other schools. Identical with REL 354. Credit cannot be received for both PHL 354 and REL 354.</td>
<td>Modern and Contemporary Literary Theory. Identical with EH 422. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).</td>
</tr>
<tr>
<td><strong>PHL 355</strong> Chinese Philosophy 3 cr</td>
<td><strong>PHL 431</strong> Advanced Ethical Theory 3 cr</td>
</tr>
<tr>
<td>Introduces the major classical religious and philosophical systems of China by way of an examination of early Confucianism, Mohism, Yangism, Legalism, Taoism, and Chinese Buddhism. Particular emphasis will be placed upon the role of these schools in the development of Chinese religion, morality, and political organization. Identical with REL 355. Credit cannot be received for both PHL 355 and REL 355.</td>
<td>Problems in traditional and recent value theory and ethics.</td>
</tr>
<tr>
<td><strong>PHL 361</strong> Philosophy of Mind 3 cr</td>
<td><strong>PHL 441</strong> Theory of Knowledge 3 cr</td>
</tr>
<tr>
<td>A study of the concept of consciousness and related concepts (e.g., mind, self, thinking) as applied to man, other animals, non-terrestrials, and machines.</td>
<td>Examines knowledge, its scope and limits. Topics may include the conditions, criteria, and grounds for knowledge, and theories of truth and meaning. Pre-requisite: PHL 110 Minimum Grade of C or PHL 121 Minimum Grade of C.</td>
</tr>
<tr>
<td><strong>PHL 370</strong> Philosophy of Art 3 cr</td>
<td><strong>PHL 461</strong> Metaphysics - W 3 cr</td>
</tr>
<tr>
<td>Acquaints students with main issues in aesthetics. Includes such issues as the nature and function of art and the criteria of aesthetic judgment. Identical with ARH 370. Credit cannot be received for both PHL 370 and ARH 370.</td>
<td>Studies philosophical theories about the nature of reality, including such topics as what is real, change, the nature of things, universals, and such views as monism, materialism, realism, and idealism. Capstone course for all philosophy concentrations. Pre-requisite: (PHL 240 Minimum Grade of C or CLA 240 Minimum Grade of C or PHL 241 Minimum Grade of C) and (PHL 243 Minimum Grade of C or PHL 245 Minimum Grade of C) and (PHL 321 Minimum Grade of C or PHL 324 Minimum Grade of C). PHL 240 and CLA 240 and PHL 241 and PHL 243 and PHL 245 and PHL 321 and PHL 324 can be taken concurrently with this course.</td>
</tr>
<tr>
<td><strong>PHL 390</strong> Special Topics - 1 TO 3 cr</td>
<td><strong>PHL 467</strong> Mathematical Logic 3 cr</td>
</tr>
<tr>
<td>Different figures or topics of philosophical significance will be studied as announced. May be repeated for a maximum of 9 hours.</td>
<td>An introduction to formal first-order logic, first-order metatheory, and its extensions. Topics include axiom systems and their models, completeness, compactness, and recursive sets and functions. Identical with MA 467. Credit cannot be received for both PHL 467 and MA 467. Pre-requisite: (PHL 321 Minimum Grade of C or PHL 324 Minimum Grade of C) or MA 311 Minimum Grade of C or MA 316 Minimum Grade of C or MA 318 Minimum Grade of C or MA 320 Minimum Grade of C or MA 321 Minimum Grade of C or MA 332 Minimum Grade of C or MA 334 Minimum Grade of C or MA 335 Minimum Grade of C or MA 354 Minimum Grade of C or MA 367 Minimum Grade of C or MA 410 Minimum Grade of C or MA 413 Minimum Grade of C or MA 414 Minimum Grade of C or MA 434 Minimum Grade of C or MA 436 Minimum Grade of C or MA 437 Minimum Grade of C or MA 451 Minimum Grade of C or MA 458 Minimum Grade of C or MA 490 Minimum Grade of C or MA 537 Minimum Grade of C or MA 542 Minimum Grade of C or MA 550 Minimum Grade of C.</td>
</tr>
<tr>
<td><strong>PHL 418</strong> American Political Thought 3 cr</td>
<td><strong>PHL 421</strong> Literary Criticism to 1900 - W 3 cr</td>
</tr>
<tr>
<td>This course examines the central themes, issues, and evolution of American political thought, including how we understand our role and responsibilities in contemporary democracy. Pre-requisite: PSC 130 or PHL 110 or PHL 120 or PHL 121 or PHL 131.</td>
<td>Classical, Neoclassical, Romantic, and Victorian literary theory. Identical with EH 421. Credit cannot be received for both PHL 421 and EH 421. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).</td>

</tr>
<tr>
<td>Modern and Contemporary Literary Theory. Identical with EH 422. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).</td>
<td>Problems in traditional and recent value theory and ethics.</td>
</tr>
<tr>
<td><strong>PHL 441</strong> Theory of Knowledge 3 cr</td>
<td><strong>PHL 461</strong> Metaphysics - W 3 cr</td>
</tr>
<tr>
<td>Examines knowledge, its scope and limits. Topics may include the conditions, criteria, and grounds for knowledge, and theories of truth and meaning. Pre-requisite: PHL 110 Minimum Grade of C or PHL 121 Minimum Grade of C.</td>
<td>Studies philosophical theories about the nature of reality, including such topics as what is real, change, the nature of things, universals, and such views as monism, materialism, realism, and idealism. Capstone course for all philosophy concentrations. Pre-requisite: (PHL 240 Minimum Grade of C or CLA 240 Minimum Grade of C or PHL 241 Minimum Grade of C) and (PHL 243 Minimum Grade of C or PHL 245 Minimum Grade of C) and (PHL 321 Minimum Grade of C or PHL 324 Minimum Grade of C). PHL 240 and CLA 240 and PHL 241 and PHL 243 and PHL 245 and PHL 321 and PHL 324 can be taken concurrently with this course.</td>
</tr>
<tr>
<td><strong>PHL 467</strong> Mathematical Logic 3 cr</td>
<td><strong>PHL 467</strong> Mathematical Logic 3 cr</td>
</tr>
<tr>
<td>An introduction to formal first-order logic, first-order metatheory, and its extensions. Topics include axiom systems and their models, completeness, compactness, and recursive sets and functions. Identical with MA 467. Credit cannot be received for both PHL 467 and MA 467. Pre-requisite: (PHL 321 Minimum Grade of C or PHL 324 Minimum Grade of C) or MA 311 Minimum Grade of C or MA 316 Minimum Grade of C or MA 318 Minimum Grade of C or MA 320 Minimum Grade of C or MA 321 Minimum Grade of C or MA 332 Minimum Grade of C or MA 334 Minimum Grade of C or MA 335 Minimum Grade of C or MA 354 Minimum Grade of C or MA 367 Minimum Grade of C or MA 410 Minimum Grade of C or MA 413 Minimum Grade of C or MA 414 Minimum Grade of C or MA 434 Minimum Grade of C or MA 436 Minimum Grade of C or MA 437 Minimum Grade of C or MA 451 Minimum Grade of C or MA 458 Minimum Grade of C or MA 490 Minimum Grade of C or MA 537 Minimum Grade of C or MA 542 Minimum Grade of C or MA 550 Minimum Grade of C.</td>
<td></td>

</tbody>
</table>
PHL 490  Special Topics  3 cr
An investigation of issues and concepts in philosophy for advanced undergraduates and graduate students. May be repeated, when content varies, for a total of six hours. Prerequisites: junior, senior, or graduate standing.

PHL 492  Seminar -  1 TO 3 cr
An investigation of issues and concepts in philosophy for advanced undergraduates and graduate students. May be repeated, when content varies, for a total of 6 hours.

PHL 494  Directed Studies  1 TO 3 cr
Directed research in philosophy under the guidance of a member of the department. May be repeated, if content varies, for a total of 6 hours. Prerequisites: Junior or senior standing and approval of directing professor and department chair. Prerequisites: Junior, senior, or graduate standing.

PHL 499  Honors Thesis - H (W)  3 TO 6 cr
Extended research paper prepared under direction of thesis advisor plus two-person committee selected by advisor in consultation with student. Prerequisites: The student must have developed a proposal for the thesis in consultation with the advisor, and received permission for the work from the committee. In addition, the student must be a senior major or minor, have completed the logic and history of philosophy requirements, have at least two courses at the 300-level or higher, and have at least a 3.3 GPA in the Philosophy Concentration of the Philosophy major. Credit for this course is only given as an addition to the hours required for the major.

PHL 590  Special Topics -  1 TO 3 cr
Study of individuals or topics of philosophical significance. May be repeated for credit when content varies. Enrollment is limited to students in disciplines other than philosophy. May be repeated, if content varies, for a total of 6 hours.

PHL 594  Directed Studies  3 cr
Directed research in philosophy under the guidance of a member of the department. May be repeated, if content varies, for a total of six hours. Prerequisite: Graduate Student in Department conferring a Graduate Degree (hence not open to Philosophy majors in any Concentration in Philosophy).

Physical Therapy (PT) (PT)

PT 101  Orientation to PT  1 cr
An orientation to the physical therapy profession, college life and the physical therapy department.

PT 490  Special Topics  1 TO 3 cr
Directed study of topics of interest related to human movement and physical therapy.

PT 499  Senior Honors Project-H-W  3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project relevant to the field of Physical Therapy study that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty members chaired by the honors mentor. This course is requires permission of the department chair and completion of an approved project prospectus.

PT 501  Kinesiology/Lab  3 cr
A study of human movement as it relates to clinical physical therapy practice with an emphasis on biomechanical principles of movement and normal gait. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

PT 502  Foundational Concepts/Lab  3 cr
An introduction to the principles and techniques of patient care utilized in physical therapy practice. These basic therapeutic skills include, but are not limited to, positioning, draping, patient transfers, assistive gait devices, wheelchair use, and basic examination. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

PT 503  Therapeutic Modalities/Lab  3 cr
A study of specific techniques of therapeutic intervention in physical therapy practice including electrophysical agents and manual therapy techniques. The electrophysical agents unit will include the physical principles, physiological effects, therapeutic uses and clinical application of thermal, mechanical, electrical and photic energy. The manual intervention unit will include manual therapy techniques including soft tissue massage. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

PT 504  Examination Methods/Lab  3 cr
An introduction to the principles and techniques of patient care utilized in physical therapy practice. Basic examination methods such as assessment of joint range of motion, muscle strength testing, and muscle length testing are presented. Performance of basic patient interview/history is also included. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

PT 505  Prosthetics & Orthotics/Lab  3 cr
A course to identify disablement risk factors and provide educational intervention to prevent certain diseases and facilitate a positive change in the health behavior of patients. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree.
### PT 506 Orthopedic Science/Lab
**3 cr**
Etiology, diagnostic procedures and radiography, medical management, physical therapy examination, evaluation, and intervention of selected musculoskeletal disorders with an emphasis on the upper extremities. Additionally includes the fundamentals, principles, and practice of therapeutic exercise. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

### PT 507 Neurologic Science/Lab
**3 cr**
This course includes study of the principles and concepts of normal human movement and PT examination/evaluation in patients with disorders of the neuromuscular systems across the lifespan. The course will focus on examination (patient/client history, systems review, tests and measurements), evaluation of examination data (clinical decision-making), with formulation of problems list, functional goals and PT plan of care. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

### PT 508 Therapeutic Exercise/Lab
**3 cr**
Etiology, diagnostic procedures and radiography, medical management, physical therapy examination, evaluation, and intervention of selected musculoskeletal disorders with an emphasis on the upper extremities. Additionally includes the fundamentals, principles, and practice of therapeutic exercise. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

### PT 509 Cardiovascular & Pulmonary Sci
**3 cr**
A study of the principles and practice of physical therapy for patients with cardiovascular and pulmonary disease, including radiography, and medical and surgical management. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree. Includes laboratory study.

### PT 510 Differential Diagnos & Assess
**3 cr**
A course focusing on the use of screening tests and clinical tools to enhance the therapist's role as an independent practitioner with the ability to identify medical conditions of concern that require referral to an appropriate health care provider. This course counts toward the Masters of Physical Therapy degree but does not count toward the Doctor of Physical Therapy degree.

### PT 520 Clinical Kinesiology
**3 cr**
A study of human movement as it relates to clinical physical therapy practice with a emphasis on biomechanical principles of movement and normal gait. Include laboratory study.

### PT 521 Introductory PT Skills
**4 cr**
A introduction to the principles and techniques of patient care utilized in physical therapy practice. These basic therapeutic skills include, but are not limited to, positioning, draping, patient transfers, assistive gait devices, wheelchair use and basic examination. Techniques including assessment of joint range of motion, muscle strength and length testing, massage, and soft tissue mobilization are presented. Include laboratory study.

### PT 525 Therapeutic Intervention
**4 cr**
A study of specific techniques of therapeutic intervention in physical therapy practice including electrophysical agents and manual therapy techniques. The electrophysical agents unit will include the physical principles, physiological effects, therapeutic uses and clinical applications of thermal, mechanical, electrical, and photic energy. The intervention unit will include therapy techniques including soft tissue massages, include laboratory study.

### PT 527 Medical Screening
**2 cr**
A course focusing on the use of screening tests and clinical tools to enhance the therapist role as an independent practitioner with the ability to identify medical conditions of concerns that require referral to an appropriate health care provider.

### PT 590 Sp Tp-
**1 TO 3 cr**
Directed study of topics of interest to human movement and physical therapy.

### PT 600 Human Anatomy I
**3 cr**
A comprehensive study of human anatomy concentrating on the nervous, skeletal, arthrodial, muscular and circulatory systems of the superficial back, upper extremities, head, neck, and face. Lab consists of prosected material and dissection of aforementioned body parts. Skeletal models and diagnostic imaging will be introduced of each area of dissection. Labs also include surface palpation on live human subjects. Special fee.

### PT 601 Human Anatomy II
**3 cr**
A comprehensive study of human anatomy concentrating on the nervous, skeletal, arthrodial, muscular and circulatory systems of the deep back, trunk, pelvis, and lower extremity. Lab consists of prosected material and dissection of the aforementioned body parts. Skeletal models and diagnostic imaging will be introduced for each area of dissection. Labs also include surface palpation on live human subjects. Special fee. Pre-requisite: PT 600 Minimum Grade of C. PT 600 can be taken concurrently with this course.

### PT 602 Life Span Human Development
**2 cr**
A study of the process of typical human development and aging across the life span, including neuromotor development in childhood and changes associated with aging. Pre-requisite: PT 682 Minimum Grade of S.
PT 603  Neuroscience in Phys Therapy  3 cr
A survey of the structure and function of the nervous system, with emphasis on principles related to physical therapy practice. Includes laboratory study of anatomic specimens. Special fee.
Pre-requisite: PT 601 Minimum Grade of C and PT 682 Minimum Grade of S.

PT 604  Pathophysiology I  2 cr
A physiological approach to the study of pathological changes in the human body brought about by trauma or disease, including cell injury, inflammation, immunopathology, neoplasia, infections, and the musculoskeletal and endocrine systems.
Pre-requisite: PT 601 Minimum Grade of C.

PT 605  Human Learning  1 cr
This course incorporates application of the principles of human learning to patient/client management including patient, family/caregivers, and community education. Roles of the physical therapist as a clinical educator and academician are discussed as well as opportunities/responsibilities for lifelong learning and professional development.
Pre-requisite: PT 673 Minimum Grade of C.

PT 606  Pharmacology in Rehabilitation  2 cr
A study of pharmacological principles in relation to rehabilitation, with emphasis on the possible benefits and side-effects of chemotherapeutic agents on patients receiving physical therapy treatment.
Pre-requisite: PT 607 Minimum Grade of C and PT 682 Minimum Grade of S.

PT 607  Pathophysiology II  2 cr
A physiological approach to the study of pathological changes in the human body brought about by trauma or disease, including vascular, hematopoietic, nutritional, neurologic, urogenital, GI and hepatobiliary systems.
Pre-requisite: PT 604 Minimum Grade of C.

PT 610  Principles of Research & EBP  2 cr
An introduction to evidence-based practice as it relates to physical therapy, including basic understanding of research designs and research statistics, formulating appropriate clinical questions based on patient/client, accessing current evidence using databases and other resources to answer clinical/practice issues, and summarizing evidence for clinical case application.

PT 611  Research Proposal Development  2 cr
This course prepares students to achieve professional competence in critical appraisal of professional literature and in the design of a clinically relevant research proposal as an entry-level Doctor of Physical Therapy student. The course focuses on the foundational aspects of research methodology including research design, data analysis, and critical evaluation of research evidence.

PT 612  Research Project  2 cr
This course focuses on implementation of the research proposal developed in PT 611. In addition, this course is designed for the student to contribute to the evidence for practice through the dissemination of clinical research outcomes, including professional reporting of the results to peers in written and oral platform presentation formats.
Pre-requisite: PT 611 Minimum Grade of C.

PT 613  Clinical Case Report  2 cr
This course allows the student to develop a clinical case report based on a patient the student has treated during a full-time internship, an administrative/education process or a clinical risk management situation. An in-depth analysis of research from recent publications related to the case is required. The student will prepare a written case report and a presentation in seminar format.
Pre-requisite: PT 612 Minimum Grade of C and PT 674 Minimum Grade of C.

PT 620  Introductory PT Skills  4 cr
An introduction to the principles and techniques of patient care utilized in physical therapy practice. These basic therapeutic skills include, but are not limited to, positioning, draping, patient transfers, assistive gait devices, wheelchair use, and basic examination. Techniques including assessment of joint range of motion, muscle strength and length testing, massage, and soft tissue mobilization are presented. Includes laboratory study.

PT 621  Exercise Physiology  4 cr
A study of the effect of physical activity on human physiology with an emphasis on the musculoskeletal, cardiovascular/pulmonary, and endocrine systems. Modes of exercise, environmental considerations, and selected clinical populations are also covered in this course. Includes laboratory study.

PT 622  Therapeutic Intervention  4 cr
A study of specific techniques of therapeutic intervention in physical therapy practice including electrophysical agents and manual therapy techniques. The electrophysical agents unit will include the physical principles, physiological effects, therapeutic uses and clinical application of thermal, mechanical, electrical and photic energy. The manual intervention unit will include manual therapy techniques including soft tissue massage. Includes laboratory study.

PT 625  Health Prom & Prev in PT  2 cr
A course to identify disablement risk factors and provide educational intervention to prevent certain diseases and facilitate a positive change in the health behavior of patients.
Pre-requisite: PT 622 Minimum Grade of C.
PT 627 Medical Screening 2 cr
A course focusing on the use of screening tests and clinical tools to enhance the therapist's role as an independent practitioner with the ability to identify medical conditions of concern that require referral to an appropriate health care provider.
Pre-requisite: PT 607 Minimum Grade of C.

PT 628 Mobility Ortho & Prosthetics 2 cr
The study of human functional mobility, including pathological aspects of locomotion. The course will also address related topics including prosthetics and orthotics.
Pre-requisite: PT 620 Minimum Grade of C.

PT 631 Musculoskeletal Disorders I 4 cr
Etiology, diagnostic procedures and radiography, medical management, physical therapy examination, evaluation, and intervention of selected musculoskeletal disorders with an emphasis on the upper extremities. Additionally includes the fundamentals, principles, and practice of therapeutic exercise. Includes laboratory study.
Pre-requisite: PT 601 Minimum Grade of C.

PT 632 Musculoskeletal Disorders II 3 cr
Etiology, diagnostic procedures and radiography, medical management, physical therapy examination, evaluation, and intervention of selected musculoskeletal disorders with an emphasis on the lower extremities. Includes laboratory study.
Pre-requisite: PT 631 Minimum Grade of C. PT 631 can be taken concurrently with this course.

PT 633 Musculoskeletal Disorders III 4 cr
A continuation of PT 632 that includes etiology, diagnostic procedures and radiography, medical management, physical therapy examination, evaluation, and intervention of selected musculoskeletal disorders with an emphasis on the lumbar spine and pelvis. Includes laboratory study.
Pre-requisite: PT 632 Minimum Grade of C.

PT 634 Musculoskeletal Disorders IV 3 cr
A continuation of PT 633 that includes etiology, diagnostic procedures and radiography, medical management, physical therapy examination, evaluation, and intervention of selected musculoskeletal disorders with an emphasis on the cervical and thoracic spine. Includes laboratory study.
Pre-requisite: PT 633 Minimum Grade of C. PT 633 can be taken concurrently with this course.

PT 635 Musculoskeletal Disorders V 2 cr
Special topics in the management of musculoskeletal conditions including, but not limited to, industrial medicine, sports physical therapy, and chronic musculoskeletal issues. Includes laboratory study.
Pre-requisite: PT 634 Minimum Grade of C.

PT 640 Neuromusc PT Exam/Eval 4 cr
This course includes study of the principles and concepts of normal human movement and PT examination/evaluation in patients with disorders of the neuromuscular systems across the lifespan. The course will focus on examination (patient/client history, systems review, tests and measurements), evaluation of examination data (clinical decision-making), with formulation of problem list, functional goals and PT plan of care. Includes laboratory study.
Pre-requisite: PT 602 Minimum Grade of C and PT 603 Minimum Grade of C.

PT 641 Ped Neuromusc PT Exam/Eval 2 cr
This course prepares the student to provide services to children with special health care needs/disabilities and their families in a manner consistent with family-centered care; includes patient/family history, systems review, and tests and measures and opportunities for clinical decision-making and establishing a plan of care based on examination data with emphasis on prognosis for a wide variety of pediatric diseases, conditions, and syndromes impacting typical development. Review of pediatric practice settings and legislation, medical management, pharmacologic treatment, radiographic imaging and other diagnostic testing related to neuromuscular disorders and developmental delay are included.

PT 642 Neuromuscular PT Intervention 4 cr
A course to follow PT 640 and 641 with added emphasis on principles and concepts of physical therapy intervention in patients with disorders of the neuromuscular systems. Includes laboratory study.
Pre-requisite: PT 641 Minimum Grade of C.

PT 650 PT in Integumentary Disorders 4 cr
A study of the practice of physical therapy in management of skin disorders and underlying disease with an emphasis on the patient with open wounds, including burns. Includes laboratory study.
Pre-requisite: PT 604 Minimum Grade of C.

PT 660 PT Cardio/Pulmonary Disorders 4 cr
A study of the principles and practice of physical therapy for patients with cardiovascular and pulmonary disease, including radiography, and medical and surgical management. Includes laboratory study.
Pre-requisite: PT 607 Minimum Grade of C and PT 622 Minimum Grade of C and PT 682 Minimum Grade of S.

PT 671 Clinical Case Studies I 1 cr
A case-based course providing opportunities to develop clinical judgment as part of patient management including establishment of differential diagnosis, patient prognosis, and development of a plan of care for patients with musculoskeletal disorders of peripheral joints. Students will also analyze cases involving ethical, legal and psychosocial concerns for which professional decisions and interprofessional practice or referrals are necessary.
PT 672  Clinical Case Studies II  1 cr
A case-based seminar designed to provide opportunities to develop clinical reasoning and communication skills as part of patient management. Students will develop skills in communicating with the healthcare team, recognizing and ameliorating barriers to patient outcomes, and developing plans of care for patients with complex health and psychosocial issues.
Pre-requisite: PT 671 Minimum Grade of C and PT 682 Minimum Grade of C.

PT 673  Clinical Case Studies III  1 cr
A case-based course to provide opportunities to apply clinical reasoning to promote evidence-based physical therapy practice by integrating best available evidence for patient management and to challenge the status quo of practice to raise it to the most effective level of care.
Pre-requisite: PT 672 Minimum Grade of C.

PT 674  Clinical Synthesis & Pat Mgmt  1 cr
A review and synthesis of physical therapy examination, evaluation, and development of a plan of care in patient management for specific clinical disorders, emphasizing clinical decision-making based on clinical experience and evidence.
Pre-requisite: PT 627 Minimum Grade of C and PT 635 Minimum Grade of C and PT 642 Minimum Grade of C.

PT 675  Comprehensive Capstone  1 cr
This course is a continuation of PT 674 that emphasizes comprehensive review and preparation for taking the National Physical Therapy Examination. All students must pass the final capstone exam to be awarded the DPT degree.
Pre-requisite: PT 674 Minimum Grade of C and PT 683 Minimum Grade of C.

PT 676  Advanced Topics in PT  1 cr
This elective course involves advanced study (beyond entry level) of selected topics within physical practice, research, education and leadership. Topics vary from year to year.
Pre-requisite: PT 673 Minimum Grade of S and PT 635 Minimum Grade of C and PT 642 Minimum Grade of C and PT 650 Minimum Grade of C and PT 660 Minimum Grade of C.

PT 680  Professional PT Practice  2 cr
A study of physical therapy as a profession with emphasis on the history of physical therapy; role and scope of practice; professional, ethical, and legal responsibilities; licensure; physical therapy education; contemporary practice issues; and professional communication.

PT 681  Clinical Practice Issues - W  2 cr
This course is designed to prepare the student for clinical practice by incorporating the patient management model, clinical decision-making models, health care systems, patient documentation including electronic health records, cultural competence, universal precautions, and risk management.
Pre-requisite: PT 680 Minimum Grade of C.

PT 682  PT Internship I  6 cr
A planned learning experience of clinical education designed to integrate previous didactic knowledge in a full time, supervised clinical internship in Physical Therapy practice settings.
Pre-requisite: PT 620 Minimum Grade of C and PT 625 Minimum Grade of C and PT 632 Minimum Grade of C.

PT 683  PT Internship II  8 cr
A continuation of PT 682, providing another planned learning experience, designed to integrate previous knowledge in a full time, supervised clinical internship in Physical Therapy practice settings. Good Academic Standing with no required course retakes pending.
Pre-requisite: PT 635 Minimum Grade of C and PT 642 Minimum Grade of C and PT 650 Minimum Grade of C and PT 660 Minimum Grade of C and PT 682 Minimum Grade of S.

PT 684  PT Internship III  6 cr
A continuation of PT 682 and 683, providing another planned learning experience, designed to integrate previous knowledge in a full time, supervised clinical internship in Physical Therapy practice settings. Good Academic Standing with no required course retakes pending.
Pre-requisite: (PT 683 Minimum Grade of C or PT 683 Minimum Grade of S).

PT 685  Management of PT Practice  3 cr
A study of current organizational and management principles and issues related to health care delivery systems with special emphasis on the current and future roles of Physical Therapy.
Pre-requisite: PT 687 Minimum Grade of C.

PT 686  PT Internship IV  6 cr
A continuation of PT 682, 683 and 684, providing another planned learning experience, designed to integrate previous knowledge in a full time, supervised clinical internship in physical therapy practice settings. Good academic standing with no required retakes pending.
Pre-requisite: (PT 684 Minimum Grade of S or PT 684 Minimum Grade of C). PT 684 and PT 684 can be taken concurrently with this course.

PT 687  Profess Topics in PT Practice  1 cr
This course entails a continuation of professional practice issues including interprofessional education and practice, communication between patient/client and healthcare provider, patient-centered care, and cultural aspects of patient care which all relate to professional development as a competent healthcare provider.
Pre-requisite: PT 681 Minimum Grade of C.

PT 689  Evidence Library Skills  1 cr
Discussion of evidence-based practice (EBP) and the importance of literature searching and information management skills.
PT 690  Update in Exercise Physiology  1 cr
This course reviews the effects of exercise intervention upon human physiology and the acute and chronic adaptations associated with physical activity.

PT 691  Clinical Reasoning  2 cr
This course should be one of the first courses taken and will include principles of evidence-based practice, access and evaluation of scientific literature, and application to clinical decision making in specific patient populations.

PT 692  Applied Human Movement  2 cr
This course will focus on recent advances in the understanding of human movement with particular emphasis on biomechanics, kinesiology and motor control.

PT 693  Adv in Musculoskeletal PT  2 cr
An interactive discussion and exploration of physical therapy practice for populations with orthopedic disorders, including examination, intervention and outcome. The focus will be on evidence-based clinical practice. Course topics will include updated research on operative and non-operative procedures for the peripheral joints and spine, spinal and peripheral joint diagnostic imaging (radiography), pharmacology, therapeutic exercise, clinical reasoning, and lifespan issues with a focus on geriatrics.

PT 694  Adv in Neuromuscular PT  2 cr
An interactive discussion and exploration of physical therapy practice for populations with neuromuscular disorders, including examination through intervention and outcomes. The focus will be on clinical practice in this population based on evidence. The course will include diagnostic imaging (radiography), pharmacology, therapeutic exercise, clinical reasoning, and lifespan issues with a focus on geriatrics.

PT 695  Adv in Integumentary PT  2 cr
An interactive discussion of new developments in skin and wound care with an emphasis on development of a plan of care that evolves over the episode of care, prevention of recurrence, and the interaction with the patient and other health care providers.

PT 696  Adv in Cardiovasc/Pulmonary PT  2 cr
An in-depth, interactive discussion of issues related to the examination, evaluation, and plan of care for patients/clients with primary and secondary cardiovascular and pulmonary disorders across the lifespan. Clinical reasoning, pharmacology and imaging techniques will be emphasized.

PT 697  DPT Directed Study  1 TO 3 cr
Directed research or comprehensive review of evidence-based literature completed in a clinical area of interest under the supervision of a faculty mentor. The student will document incorporation of course content into their current clinical practice. This course may be repeated up to two times with a different focus-topic each time.

PT 698  Professional Issues/Ethics  2 cr
Discussion of current professional issues including clinical practice, management, legal, ethical/moral and psychosocial topics embedded within the current health care market faced by health care providers. This course will include interactive discussions among students and instructor and will include literature to support discussion topics.

PT 699  DPT Seminar  1 TO 8 cr
An elective seminar to update information in specific areas of study. Course number may be repeated three times.

Physician Assistant Stds (PA) (PA)

PA 510L  CM I Lab  1 cr
PA 520L  CM II Lab  1 cr
PA 530L  CM III Lab  1 cr
PA 540L  CM IV Lab  1 cr

PA 501  Clinical Preceptorship I  4 cr
The student is assigned to a clinical setting to obtain knowledge, skills and attitudinal/behaviors professional components. These competencies are to be obtained while engaging in all aspects of patient care through: the medical interview, history and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention measures.

PA 502  Clinical Preceptorship II  4 cr
The student is assigned to a clinical setting to obtain knowledge, skills and attitudinal/behavioral professional components. These competencies are to be obtained while engaging in all aspects of patient care through: the medical interview, history, and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention measures.

PA 503  Clinical Preceptorship III  4 cr
The student is assigned to a clinical setting to obtain knowledge, skills and attitudinal/behavioral professional components. These competencies are to be obtained while engaging in all aspects of patient care through: the medical interview, history and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention measures.
PA 504  Clinical Preceptorship IV  4 cr
The student is assigned to a clinical setting to obtain knowledge, skills, and attitudinal/behavioral professional components. These competencies are to be obtained while engaging in all aspects of patient care through: the medical interview, history and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention measures.

PA 505  Clinical Preceptorship V  4 cr
The student is assigned to a clinical setting to obtain knowledge, skills and attitudinal/behavioral professional components. These competencies are to be obtained while engaging in all aspects of patient care through the medical interview, history and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention measures.

PA 506  Clinical Preceptorship VI  4 cr
The student is assigned to a clinical setting to obtain knowledge, skills and attitudinal/behavioral professional components. These competencies are to be obtained while engaging in all aspects of patient care through: the medical interview, history and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention measures.

PA 507  Clinical Preceptorship VII  4 cr
The student is assigned to clinical setting to obtain knowledge, skills and attitudinal/behavioral professional components. These competencies are to be blended while engaging in all aspects of patient care through: the medical interview, history and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention measures.

PA 508  Clinical Preceptorship VIII  4 cr
The student will choose from a variety of available elective rotations in order to engage in all aspects of patient care including: the medical interview, history, and physical exam, critical thinking, knowledge base, diagnosis, treatment plan, patient education, appropriate health maintenance and disease prevention measures. The goal of elective rotations is to provide the student the opportunity to explore areas of interest for further employment and increase knowledge in areas of weakness.

PA 509  Clinical Preceptorship IX  4 TO 8 cr
The student will choose from a variety of available elective rotations in order to engage in all aspects of patient care including: the medical interview, history, and physical exam, critical thinking, knowledge base, diagnosis and treatment plan, patient education, appropriate health maintenance and disease prevention measures. The goal of elective rotations is to provide the student the opportunity to explore areas of interest for further employment or increase knowledge in areas of weakness.

PA 510  Clinical Medicine I  4 cr
Clinical Medicine I (PA 510) is the introductory course in a four part series covering primary care clinical medicine. It is designed to incorporate and integrate topics and content both horizontally and vertically throughout the didactic and clinical curricula. The course is divided into lecture and lab sections that will be graded separately and will provide opportunities for the student to develop critical thinking skills essential to patient evaluation and management. The use of patient simulations is included. Introductory subject matter covered during this first course will include physical examination skills and use of medical instruments, patient history taking, patient counseling, patient education, interpersonal and communication skills, and epidemiology. Additional topics will include an introduction to behavioral medicine, professionalism, interprofessional education, medical research methods, introduction to medical literature, introduction to laboratory diagnosis and introduction to nutrition. Finally, medical and social topics addressed will include the primary care medical home, rural and medically underserved populations, social determinants of health, healthy people 2020, public health issues and community health.

PA 511  Human Gross Anatomy  5 cr
This is a course in gross anatomy of the human body systems utilizing human cadavers and prosections. Emphasis is placed on the relationships between structure and function.

PA 512  Physiology  6 cr
Physiology (PA 512) is the scientific basis of medicine. This course will provide the PA student with sufficient in-depth knowledge of cellular and organ physiology necessary for understanding of normal and abnormal human body function and for advancement to courses in pathophysiology, pharmacology, and clinical medicine. This course is divided into six sections which present the basic scientific concepts of human physiology with clinical applications and relevance to disease states: 1) cellular, neuromuscular, autonomic, and cardiac physiology; 2) circulatory physiology; 3) respiratory physiology; 4) renal, electrolyte, and acid-base physiology; 5) gastrointestinal and metabolic physiology; 6) endocrinology.

PA 514  Intro to Infectious Disease  1 cr
This course is designed to provide PA students a solid foundation in basic immunology, microbial genetics, structure, nutrition and basic host-parasite relationships. The course will place particular emphasis on the role and application of these subject matters in disease manifestations as well as use/development of diagnostic and treatment modalities. Vulnerability of special populations and interactions between various environmental, social and behavioral factors with the human host in relationship to infection control and treatment will also be emphasized.
PA 516  Physician Assistant Issues I  2 cr
Physician Assistant (PA) Issues I is the introductory course in a three part Social Science and Public Health Course Series to integrate the social sciences with the clinical and basic sciences. Health and health problems result from a complex interplay of factors: 1) individual health-related behaviors, 2) physical environment, 3) health care; access and quality, and 4) social and economic environments. This course will also cover commonly encountered clinical practice issues and their impact on physician assistant practice. Patient education across the lifespan and health education in health care are explored in this course series with community outreach and service learning projects utilizing resources from USA Center for Academic Service-Learning and Civic Engagement. This course requires active student participation in all lectures, discussions, readings, group projects, field exercises, presentations, writing assignments, and other methods of instruction.

PA 517  Clinical Preceptorship X  4 cr
The student is assigned to a clinical settings to obtain knowledge, skills and attitudinal/behavioral professional components. These competencies are to be obtained while engaging in all aspects of patient care though: the medical interview, history and physical exam, critical thinking, knowledge based, diagnosis, treatment plan, and patient education. As well as appropriate health maintenance and disease prevention on measures.

PA 518  Clinical Preceptorship XI  4 TO 8 cr
The student will choose from a variety of available elective rotations in order to engage in all aspects of patient care including: the medical review, history and physical exam, critical thinking, knowledge base, diagnosis and treatment plan, patient education, appropriate health maintenance and disease prevention measures. The goal of elective rotations is to provide the student the opportunity to explore areas of interest for further employment or increase knowledge in areas of weakness.

PA 520  Clinical Medicine II  6 cr
Clinical Medicine II (PA 520) is the second course in a four part series covering primary care clinical medicine and surgery topics. It is designed to incorporate and integrate topics and content both horizontally and vertically throughout the didactic and clinical curricula. The course is divided into lecture and lab sections that will be graded separately and will provide opportunities for the student to develop critical thinking skills essential to patient evaluation and management. The use of standardized patients, patient simulations and clinical experiences are included. Topics will include a continuation of physical examination skills, patient history taking, patient counseling, patient education, epidemiology, history of the PA Profession, professionalism, interpersonal and communication skills, interprofessional education, medical research methods, and researching medical literature, the primary care medical home, rural and medically underserved populations, social determinants of health, healthy people 2020, public health issues, and community health care. Specific topics covered in PA 520 include dermatology, ophthalmology, ENT, cardiovascular medicine, EKG, pulmonary medicine, nephrology, and GU medicine. Imbedded in this course will be topics in infectious disease and diagnostic data that will align with the subject matter covered during this semester.

PA 521  Pathophysiology I  4 cr
Pathophysiology I (PA 521) is the first course in a three-part series that covers the alterations in normal physiology that occur in human disease states. This course will provide the PA student with sufficient in-depth knowledge of pathophysiology necessary for understanding of abnormal human body function and for advancement to subsequent courses in pathophysiology, pharmacology, and clinical medicine. Topics will include an overview of cellular pathophysiology, followed by specific topics that align with the organization of the clinical medicine series: cardiovascular pathophysiology, EKG, pulmonary pathophysiology, and renal/GU pathophysiology.

PA 522  Pharmacology I  4 cr
Pharmacology I (PA 522) is the first course in a three-part series that covers the basic scientific concepts of drug classification, mechanism of action, toxicity, and clinical use of drugs. Introductory topics will include the laws and regulations governing the use of pharmaceuticals, prescriptive practices, basic science and properties of drug molecules, drug interactions, and clinical pharmacology of the autonomic nervous system. Specific topics will align with the organization of the clinical medicine series: cardiovascular drugs, pulmonary drugs, drug therapy of renal and genitourinary disease.
PA 523  Diag Data and Interp I  2 cr
(Previously PA 524) Interpretation of Diagnostic Data and Studies I, will introduce students to basic concepts of laboratory medicine including different methods of sample gathering and transport, basic phlebotomy, interpretation of blood counts and analysis of the differential blood counts, coagulation studies and anticoagulant monitoring, interpretation of metabolic panels, evaluating electrolyte abnormalities, and ordering and interpreting bacterial culture and susceptibilities. The course will focus on and correlate with laboratory assays and procedures taught during Clinical Medicine II. Syllabi and tentative schedules of lectures for the course are attached.

PA 526  Physician Assistant Issues II  2 cr
This course is the second in a three part series covering commonly encountered issues and their impact on physician assistant practice. Introductory subject matter covered during this second course will include social determinants of health affecting diversity and inclusion; cultural competence; workforce shortage; health disparities; health literacy; public health, primary care medicine with a focus on rural and medically underserved medicine, evidence-based medicine, patient belief systems, health care delivery systems, professionalism, interprofessional education and collaboration, social determinants of healthcare, medical ethics, and population/public health. Equally important is the challenge and significance of patient education across the lifespan and health education in health care. This course requires active student participation in all lectures, discussions, readings, group projects, field exercises, presentations writing assignments, and other methods of instruction.

PA 530  Clinical Medicine III  6 cr
Clinical Medicine III (PA 530) is the third course in a four part series covering primary care clinical medicine and surgery topics. It is designed to incorporate and integrate topics and content both horizontally and vertically throughout the didactic and clinical curricula. The course is divided into lecture and lab sections that will be graded separately and will provide opportunities for the student to develop critical thinking skills essential to patient evaluation and management. The use of standardized patients, patient simulations and clinical experiences are included. Topics will include a continuation of complete and focused physical examination skills, patient history taking, patient counseling, patient education, epidemiology, normal and abnormal development, history of the PA Profession, professionalism, interpersonal and communication skills, interprofessional education, medical research methods, and researching medical literature, the primary care medical home, rural and medically underserved populations, social determinants of health, healthy people 2020, public health issues, and community health care. Specific topics covered in PA 530 include neurology, rheumatology, hematology/oncology, orthopedic medicine, gastrointestinal medicine, and psychiatric/behavioral medicine. Included in this course will be topics in infectious disease and diagnostic data that will align with the subject matter covered during this semester.

PA 531  Pathophysiology II  4 cr
Pathophysiology II (PA 531) is the second course in a three-part series that covers the alterations in normal physiology that occur in human disease states. This course will provide the PA student with sufficient in-depth knowledge of pathophysiology necessary for the understanding of abnormal human body function and for advancement to subsequent courses in pathophysiology, pharmacology, and clinical medicine. Topics will align with the subject matter in Clinical Medicine II (PA 530): neurology, rheumatology, endocrinology, hematology, oncology, gastrointestinal, and psychiatric disorders.

PA 532  Pharmacology II  4 cr
This course is the second of a proposed three part pharmacology series that used to be taught in two sections during the spring and summer semesters as PA 532 and PA 542. The course will continue to cover the basic scientific concepts of drug classification, mechanism of action, toxicity, and clinical use of drugs. Other topics will include drug interaction and the properties of drug molecules. Specific topics will align with the organization of the clinical medicine series.
PA 533 Interpretation of Diagnostic Data and Studies II 2 cr
This course will focus on ordering and interpretation of laboratory tests and imaging studies associated with diseases of the urinary tract system, including basic and advanced urinalysis and their interpretation, laboratory tests and imaging studies associated with diseases of the gastrointestinal tract to include liver, pancreas, small intestine and colorectal regions, basic and advanced immunohematology and imaging to investigate autoimmune disorders, and advanced genetic testing and procedures. This course will advance the students' knowledge of laboratory medicine and will focus on those laboratory assays relevant to the topic covered in Clinical Medicine III.

PA 536 Physician Assistant Issues III 2 cr
Issues in Healthcare and Population Health is a course designed to prepare the graduate for the NCCPA exam. The goal is for the student to gain a deeper understanding of many aspects of practicing medicine. Issues in Healthcare and Population Health IV (PA 536) is the first in a three part series covering commonly encountered issues and their impact on physician assistant practice. This series is designed to incorporate and integrate topics and content both horizontally and vertically throughout the didactic and clinical curricula. The course will utilize a variety of teaching strategies getting the student involved in the learning process.

PA 540 Clinical Medicine IV 7 cr
Clinical Medicine IV (PA 540) is the final course in a four part series covering primary care clinical medicine and surgery topics. It is designed to incorporate and integrate topics and content both horizontally and vertically throughout the didactic and clinical curricula. The course is divided into lecture and lab sections that will be graded separately and will provide opportunities for the student to develop critical thinking skills essential to patient evaluation and management. The use of standardized patients, patient simulations and clinical experiences are included. Topics will include a continuation of complete and focused physical examination skills, patient history taking, patient counseling, patient education, interpersonal and communication skills, epidemiology, normal and abnormal development, history of the PA Profession, professionalism, interprofessional education, medical research methods, and researching medical literature, the primary care medical home, rural and medically underserved populations, social determinants of health, healthy people 2020, public health issues, and community health care. Specific topics covered in PA 540 include geriatric medicine, pediatric medicine, surgery, OB/GYN medicine, emergency medicine, ACLS, and clinical year transition. Included in this course will be topics in infectious disease and diagnostic data that will align with the subject matter covered during this semester.

PA 541 Pathophysiology III 3 cr
This course is the third of three sections of pathophysiology that used to be taught during the fall semester as a single course PA 523. The course will provide students with an understanding of abnormal body functions including an overview of cellular pathophysiology followed by specific topics that align with the organization of the clinical medicine series.

PA 542 Pharmacology III 3 cr
This course is the third of a proposed three part pharmacology series that used to be taught in two sections during the spring and summer semesters as PA 532 and PA 542. The course will continue to cover the basic scientific concepts of drug classification, mechanism of action, toxicity, clinical use of drugs, drug interaction and the properties of drug molecules. Specific topics will align with the organization of the clinical medicine series.

PA 544 Diagnostic Data and Interpret III 2 cr
(Previously PA 541) Interpretation of Diagnostic Data and Studies III, will introduce students to basic radiology concepts by teaching fundamentals of radiology, basic imaging techniques (ultrasound, vascular imaging, advanced imaging techniques (CT Scan and MRI with and without contrast), and PET scan. The course will hone student knowledge of all diagnostic modalities through intensive case-based approach to the interpretation of laboratory assays.

PA 595 Summative Evaluation 4 cr
PA 595 is designed to evaluate student learning at the end of the 27 month PA training program. The assessments used in this course will help determine the level at which students achieved the expectations for their learning as prescribed and to identify instructional areas that may need additional attention. The summative assessments include: 1) comprehensive examination, 2) OSCE with standardized patient, 3) on-line board review and 4) Capstone Project. A comprehensive written examination will be administered as a final evaluation of the student's progress. This test is also designed to prepare the graduate for the NCCPA exam.

Physics (PH) (PH)

PH 101L Introduction to Astronomy Lab 0 cr
Laboratory course for the Introduction to Astronomy course. Students must pass this laboratory course to receive a passing grade in the PH 101 course. Students must take PH 101L concurrently with PH 101 and pass the lab. The PH 101L grade is a component of the PH 101 course grade. Co-requisite: PH 101
PH 104L Concepts of Physics Laboratory 0 cr
Laboratory course for the Concepts of Physics course. Student must pass this laboratory course to receive a passing grade in the PH 104 course. Students must take PH 104L concurrently with PH 104 and pass the lab. The PH 104L grade is a component of the PH 104 course grade. Co-requisite: PH 104

PH 114L Alg-Trig Based Physics I Lab 0 cr
Laboratory course for the first semester of a two-semester introductory sequence in algebra/trigonometry-based physics. Student must pass this laboratory course to receive a passing grade in the PH 114 course. Students must take PH 114L concurrently with PH 114 and pass the lab. The PH 114L grade is a component of the PH 114 course grade. Co-requisite: PH 114

PH 115L Alg-Trig Based Physics II Lab 0 cr
Laboratory course for the second semester of a two-semester introductory sequence in algebra/trigonometry-based physics. Student must pass this laboratory course to receive a passing grade in the PH 115 course. Students must take PH 115L concurrently with PH 115 and pass the lab. The PH 115L grade is a component of the PH 115 course grade. Co-requisite: PH 115

PH 201L Calculus-Based Physics I Lab 0 cr
Laboratory course for the first semester of a two-semester introductory sequence in calculus-based physics. Student must pass this laboratory course to receive a passing grade in the PH 201 course. Students must take PH 201L concurrently with PH 201 and pass the lab. The PH 201L grade is a component of the PH 201 course grade. Co-requisite: PH 201

PH 202L Calculus-Based Physics II Lab 0 cr
Laboratory course for the second semester of a two-semester introductory sequence in calculus-based physics. Student must pass this laboratory course to receive a passing grade in the PH 202 course. Students must take PH 202L concurrently with PH 202 and pass the lab. The PH 202L grade is a component of the PH 202 course grade. Co-requisite: PH 202

PH 303L Modern Physics Lab 0 cr
Laboratory course for the Modern Physics Course. Students must take PH 303L concurrently with PH 303 and pass the lab. The PH 303L grade is a component of the PH 303 course grade. Co-requisite: PH 303

PH 385L Experimental Physics Lab 0 cr
Laboratory course for the Experimental Physics course. Students must take PH 385L concurrently with PH 385 and pass the lab. The PH 385L grade is a component of the PH 385 course grade. Co-requisite: PH 385

PH 101 Introduction to Astronomy 4 cr
This is a descriptive survey course of elementary astronomy with laboratory intended for both non-science and science majors. Topics covered include a description of the celestial sphere, a tour of the Solar System, techniques for measuring and classifying stars, stellar evolution, white dwarfs, black holes, neutron stars, galaxies, and Big Bang cosmology. Students must take PH 101L concurrently and pass the lab. The PH 101L grade is a component of the PH 101 course grade. Fee. Core course. Co-requisite: PH 101L

PH 104 Concepts of Physics 4 cr
A descriptive overview of the entire field of physics with laboratory, including the concepts of scalars and vectors, Newton's law, momentum and energy conservation, rotational motion, fluids, heat and thermodynamics, sound, electricity and magnetism, optics, atomic and nuclear physics, relativity, and elementary particle physics. This course is intended to provide the non-scientist with substantial insight into the physical behavior of matter and energy. Extensive demonstrations accompany the presentation of material to illustrate key concepts. Fee. Students must take PH 104L concurrently and pass the lab. The PH 104L grade is a component of the PH 104 course grade. Core course. Co-requisite: PH 104L

PH 107 Contemporary Topics in Physics 1 cr
Intended for physics majors in their first year or others interested in physics as a possible major. This course will survey current "hot topics" in physics, basic useful techniques in physics problem-solving, physics as a career, and research in physics at USA. This course is not intended to satisfy the science requirements within the College of Arts & Sciences.

PH 114 Physics with Algebra-Trig I 5 cr
First semester of a two-semester introductory course in algebra/trigonometry-based physics with laboratory and recitation. This course covers mechanics and thermodynamics: one- and two-dimensional motion, vectors, Newton's laws of motion, work and energy, momentum and collisions, circular motion, rotational motion, properties of solids and fluids, the laws of thermodynamics, kinetic theory of matter, simple harmonic motion, and wave motion. The laboratory uses computerized data acquisition and analysis for most of the experiments. Students must take PH 114L concurrently and pass the lab. The PH 114L grade is a component of the PH 114 course grade. Fee. Core course. Co-requisite: PH 114L

Pre-requisite: ACT Math 25 or MA 113 Minimum Grade of D or MA 115 Minimum Grade of D or MA 125 Minimum Grade of D or MA 120 Minimum Grade of D.
PH 115  Physics with Algebra -Trig II  5 cr
Second semester of a two-semester introductory course in algebra/trigonometry-based physics with laboratory and recitation. This course covers electrostatics, DC circuits, RC circuits, magnetic fields and forces, Faraday's Law, AC circuits, geometrical optics, interference and diffraction of light, the special theory of relativity, quantum physics, and atomic and nuclear physics. The laboratory uses computerized data acquisition and analysis for most of the experiments. Students must take PH 115L concurrently and pass the lab. The PH 115L grade is a component of the PH 115 course grade. Fee. Core course.
Co-requisite: PH 115L
Pre-requisite: PH 114 Minimum Grade of D.

PH 194  Dir St - Variable Content Lab  1 cr
A directed studies course to substitute for a laboratory credit for students who have successfully completed an introduction to astronomy or concepts of physics course at another university without the laboratory. Students taking this course must get the approval of the Physics Department Chair. This course may be taken up to two times (once for each course). Fee.

PH 201  Calculus-Based Physics I  4 cr
First semester of a two-semester introductory course in calculus-based physics with recitation and laboratory. This course covers: one and two-dimensional motion, vectors, Newton's laws of motion and their applications, work and energy, momentum and collisions, circular motion, rotational motion, properties of materials, simple harmonic motion, wave motion and topics in thermodynamics. The laboratory uses computerized data and analysis for most of the experiments. Core course.
Co-requisite: MA 126, PH 201L
Pre-requisite: MA 125 Minimum Grade of D and (EH 101 Minimum Grade of C or ACT English 27 or SAT Critical Reading 610 ).

PH 202  Calculus-Based Physics II  4 cr
Second semester of a two-semester introductory course in calculus-based physics with laboratory. This course covers electrostatic fields and Gauss' law, electric potential, electric circuits, magnetic fields, Ampere's law, Faraday's law, inductance, Maxwell's equations, electromagnetic waves and optics. The laboratory uses computerized data acquisition and analysis for most of the experiments. Students must take PH 202L concurrently and pass the lab. The PH 202L grade is a component of the PH 202 course grade. Fee. Core course.
Co-requisite: PH 202L
Pre-requisite: PH 201 Minimum Grade of D and MA 126 Minimum Grade of D and (EH 101 Minimum Grade of C or ACT English 27 or SAT Critical Reading 610 ).

PH 290  Special Topics-  1 TO 4 cr
Topics of current interest but not available in regularly scheduled sophomore level courses. This course may be repeated once for credit when the content varies and may be taken twice for up to eight hours.

PH 294  Dir St - Variable Content Lab  1 cr
A directed studies course to substitute for a laboratory credit for students who have successfully completed a calculus or algebra-based physics lecture course at another university without the laboratory. Students taking this course must get the approval of the Physics Department Chair. This course may be taken up to two times (once for each of the missing laboratories). Prerequisite: Permission of the Department Chair
Pre-requisite: EH 101 Minimum Grade of C.

PH 301  Introductory Astrophysics  3 cr
Application of the principles of physics to the study of astronomical phenomena. Topics include celestial mechanics, stars and stellar evolution, the Milky Way and other galaxies, and cosmological models. Prior knowledge of astronomy is not required.
Pre-requisite: PH 115 Minimum Grade of D or PH 202 Minimum Grade of D and MA 125 Minimum Grade of D.

PH 303  Modern Physics  4 cr
This course, with laboratory, surveys physics of the twentieth century. Topics covered include special relativity, wave-particle concepts, the Schrödinger equation and quantum theory of the hydrogen atom, atomic spectra and structure, molecular spectra, the solid state, nuclear structure, radioactivity, and elementary particles. The accompanying laboratory includes experimental investigations of important topics in the subject of Modern Physics. Computerized numerical and graphical analysis of data is extensively used in the laboratory. Laboratory reports are written with word processors and submitted in a format consistent with articles submitted to student research journals. Students must take PH 303L concurrently and pass the lab. The PH 303L grade is a component of the PH 303 course grade.
Co-requisite: PH 303L
Pre-requisite: PH 303L and MA 125 Minimum Grade of D and PH 202 Minimum Grade of D or PH 115 Minimum Grade of D. PH 303L can be taken concurrently with this course.

PH 311  Condensed Matter Physics  3 cr
This is an introductory course which covers modern condensed matter physics. Topics include crystal structure and properties; electronic structure of insulators, semiconductors and metals; and phenomena of current research interest and technological relevance. Methods used to measure and analyze these phenomena will also be discussed.
Pre-requisite: PH 303 Minimum Grade of D.

PH 346  Classical and Modern Optics  3 cr
Wave motion, reflection, refraction, dispersion, diffraction, interference phenomena. Fourier spectroscopy, lasers and other modern applications of optics.
Pre-requisite: PH 202 Minimum Grade of D and MA 125 Minimum Grade of D.
PH 348  Electricity and Magnetism I  3 cr
First of two-semester sequence in electromagnetism. Topics include a review of vector analysis, Coulomb's law, Gauss' law, calculation of the scalar potential, electric fields in matter, the Biot-Savart law, Ampere's law, the vector potential, magnetostatics in matter, electrodynamics, Faraday's law, inductance, Maxwell's correction to Ampere's law and Maxwell's equations.
Pre-requisite: MA 227 Minimum Grade of D or PH 115 Minimum Grade of D.

PH 349  Electricity and Magnetism II  3 cr
Second of two-semester sequence in electromagnetism. Topics include electromagnetic wave propagation in free space, electromagnetic wave propagation in materials, reflection and transmission at interfaces, wave guides, electromagnetic radiation, optical dispersion, and electrodynamics extended to the special theory of relativity.
Pre-requisite: PH 348 Minimum Grade of D.

PH 354  Electronics  3 cr
This course is intended to provide a theoretical and practical background in electronics. Topics include AC circuits, diode circuits, single-stage amplifiers, op-amps and feedback, and digital electronics. This course is not intended to satisfy the technical elective requirements for Electrical Engineering. The course will include periodic laboratory work.
Pre-requisite: MA 126 Minimum Grade of D and PH 202 Minimum Grade of D or PH 115 Minimum Grade of D.

PH 366  Physical Mechanics I  3 cr
First course in a two-semester sequence in classical mechanics. Topics include motion of particles in one-dimension, one-dimensional motion theorems, harmonic oscillations, damped oscillations, forced oscillations, kinematics in multiple dimensions, momentum and energy theorems, the central force problem, motion under inverse square law forces, planetary orbital motion, Rutherford scattering, conservation theorems for multi-particle systems and their applications, collisions, coupled-harmonic oscillators, and rigid body rotation about a fixed axis.
Pre-requisite: MA 227 Minimum Grade of D and PH 202 Minimum Grade of D.

PH 367  Physical Mechanics II  3 cr
Second course in a two-semester sequence in classical mechanics. Topics include: moving and rotating coordinate systems. Lagrange's equation and applications, Hamiltonian formulation, inertia and stress tensors, rotations of rigid bodies and the theory of small oscillations.
Pre-requisite: PH 366 Minimum Grade of D.

PH 385  Experimental Physics - W  3 cr
A course in the methods and techniques of experimental physics. A number of experiments in the area of classical mechanics, atomic physics, molecular physics, and nuclear physics will be performed and analysis is required. Computerized numerical and graphical analysis of data is extensively used in the laboratory. Laboratory reports are written with word processors and submitted in a format consistent with articles submitted to a student research journal. Students must take PH 385L concurrently and pass the lab. The PH 385L grade is a component of the PH 385 course grade.
Co-requisite: PH 385L
Pre-requisite: PH 385L and PH 303 Minimum Grade of D. PH 385L and PH 303 can be taken concurrently with this course.

PH 390  Special Topics -  1 TO 3 cr
Topics of current interest not available in a regularly scheduled course. This course may be repeated once for credit and may be taken for up to six hours credit.

PH 411  Computational Methods in Phys  3 cr
Use of computers in physics research (industrial, applied, or basic) is now common. This course will introduce advanced undergraduate physics students to computer solutions of physics problems. Particular attention will be paid to problems that have no analytic solutions and may only be solved numerically. This course will introduce several numeric methods and apply them to specific problems from quantum mechanics, electrodynamics, and mechanics.
Students will write a series of programs in the Fortran or the C programming language and use them to solve undergraduate level physics problems.
Pre-requisite: PH 303 Minimum Grade of D and MA 238 Minimum Grade of D and CIS 210 Minimum Grade of D or CIS 227 Minimum Grade of D.

PH 448  Elementary Quantum Mechanics I  3 cr
The first course of a two-semester sequence in Quantum Mechanics. Topics include an introduction to Hilbert space and operators, the quantum state and observables, the Heisenberg uncertainty principle, time evolution of the quantum state, application of the Schrodinger equation to one-dimensional systems, and the solution of the hydrogen atom.
Pre-requisite: MA 238 Minimum Grade of D and PH 303 Minimum Grade of D or CH 302 Minimum Grade of D.

PH 449  Elementary Quantum Mechanics II  3 cr
The second course of two-semester sequence in Quantum Mechanics. Topics include a continuation in the mathematical formulation of quantum mechanics, angular momentum, perturbation theory, identical particles and spin, collision theory, and the semi-classical treatment of radiation. This course is recommended for students anticipating graduate study in physics.
Pre-requisite: PH 448 Minimum Grade of D.
PH 463 Thermodynamics-Stat Mechanics 3 cr
An in-depth course in thermodynamics and statistical mechanics. Topics include simple thermodynamics systems, work, heat and the first law of thermodynamics, ideal gases, the second law of thermodynamics, entropy, enthalpy, Helmholtz and Gibbs functions, TdS equations, heat capacity, partition function, equipartition of energy, statistical distribution of molecular speeds, thermal properties of solids, higher order phase transitions, chemical equilibrium, Thomson effect, Bose-Einstein statistics, Nuclear Magnetism, and the third law of thermodynamics. Pre-requisite: PH 202 Minimum Grade of D and MA 227 Minimum Grade of D.

PH 494 Directed Studies - 1 TO 3 cr
PH 494 Directed Studies 1-3 cr Directed research under the supervision of a faculty member. Topics generally coincide with the research interest of the supervising faculty member. Pre-requisite: Permission of the Physics department chair. May be taken three times for up to 9 hours.

PH 499 Senior Thesis-Honors - H 3 cr
A written thesis that is part of the Honors Senior Project which is submitted to partially satisfy the requirements for a Degree in Physics with distinction. The Senior Thesis will be written on research done in collaboration with an Honors Physics Faculty member in the Junior/ Senior year. The Senior Thesis will be reviewed by a committee of Honors Physics Faculty. Upon approval by the committee the Senior Honors candidate will present the Senior Thesis at Honors Student Colloquium. This course may be repeated once for credit. Prerequisite: The Honors candidate must have developed in the last semester of the previous year a prospectus with the Physics Faculty Mentor and presented this prospectus at the Annual Honors Student Colloquium, also permission of the Department Chair. Pre-requisite: EH 102 Minimum Grade of C.

PHS 590 Special Topics - 1 TO 3 cr
Each course provides in-depth tutorial exposure to specific areas in the discipline. Student and/or faculty presentations followed by group discussions (usually in the Socratic mode), examine the subject matter in an area of current interest either to one student or to a group of students. Credit and title are arranged with an individual faculty member.

PHS 651 Adv Cardiovascular Physiology 5 cr
This is an advanced course covering cardiac function and metabolism, peripheral circulation, and microcirculation. The objective is to provide the student with a thorough understanding of cardiovascular physiology at both the organ and cellular level.

PHS 654 Transport Physiology Barriers 2 cr
This course is designed to present a detailed analysis of physiological membranes and the physical principles governing the movement of solute and water across these barriers.

PHS 656 Cell Signaling Seminar 1 cr
Students present a research topic for discussion before members of the department. The presentations are usually scheduled on a rotational basis. The student may present research data for critique by the faculty.

PHS 799 Research-Dissertation 1 TO 6 cr
Independent research by the student under the sponsorship of the graduate faculty in individual departments in the Basic Medical Sciences. Students are required to submit a research project description form before enrolling in this course. Progress reports of the work accomplished are required every six months.

Political Science (PSC) (PSC)

PSC 130 Intro to US Government 3 cr
Examines the principles of the United States Constitution and roles of Congress, the President, and the courts, the mass media, interest groups, and more in our U.S. political system. PSC majors and minors must pass with a grade of 'C' or better.

PSC 250 Comparative Politics 3 cr
This course examines government systems across the globe, including both democracies and authoritarian systems. It analyzes strategic interactions between political actors in a diverse set of contexts, as well as the key theories that helps us to understand politics.

PSC 270 International Relations 3 cr
This introductory course in the theory and practice of International Relations includes topics such as IR's importance and principal actors, as well as causes of conflict and war, conflict resolutions, international law, globalization, global events, issues, and problems.
PSC 301  Public Policy  3 cr
This course provides an overview of policy and the policymaking process in the United States. Topics include what issues rise to the public agenda; how politicians, groups, and citizens shape and implement policy; and how political scientists can analyze public policy.
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 310  Research Methods-W  3 cr
This course examines research methodologies in the social sciences, covering the tools and techniques for designing and conducting research, including collecting and analyzing data, and presenting findings. (Cross-listed as CJ 310).
Pre-requisite: (PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

PSC 311  Classical Political Thought  3 cr
The course examines the central themes of classical Western political philosophy through the reading and discussing of the primary works of such thinkers as Plato, Aristotle, and Aquinas. (Cross-listed as PHL 311 and CLA 311)
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 312  Renaissance Political Thought  3 cr
The course examines central themes of Renaissance and modern Western political philosophy through the reading and discussing of the primary works of such thinkers as Machiavelli, Hobbes, Locke, and Rousseau. (Cross-listed as PHL 312)
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 313  Modern Political Thought-W  3 cr
The course examines central themes of modern Western political philosophy through the reading and discussing of the primary works of such thinkers as Hegel, Mill, Marx, and Nietzsche. (Cross-listed as PHL 313)
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 330  Judicial Process  3 cr
The study of the U.S. judicial process at both federal and state court levels. (Cross-listed as CJ 330)
Pre-requisite: (PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C).

PSC 331  Constitutional Law  3 cr
The study of the principles of constitutional powers and liberties examined through an analysis of decisions and opinions by the U.S. Supreme Court. (Cross-listed as CJ 331 and PHL 331)
Pre-requisite: (PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C).

PSC 332  Criminal Law  3 cr
An overview of what constitutes crime and of the body of law governing the punishment of crime. (Cross-listed with CJ 332.)
Pre-requisite: PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

PSC 336  The Law and Legal Theory  3 cr
Explores issues and problems in the area of law, including the nature and rule of law, the aims and roles of legal systems, morality and law, obligations to obey the law, and systematic injustices related to race, ethnicity, and gender. (Cross-listed as CJ 336 and PHL 336)
Pre-requisite: PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

PSC 337  Liability and Punishment  3 cr
Explores theoretical issues and problems in the areas of law--especially criminal law--concerning liability and punishment. Topics to be examined include diminished capacity, theories of punishment, and capital punishment. (Cross-listed as CJ 337 and PHL 337)
Pre-requisite: PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

PSC 340  Race, Gender, & Politics  3 cr
This course examines the role of race and gender in shaping political outcomes, experiences, and institutions.
Pre-requisite: PSC 130 Minimum Grade of C or GS 101 Minimum Grade of C or AFR 101 Minimum Grade of C.

PSC 345  Women and Politics  3 cr
This course examines gender as a conceptual construct in the study of politics.
Pre-requisite: PSC 130 Minimum Grade of C or GS 101 Minimum Grade of C.

PSC 347  Public Opinion and Polit Part  3 cr
The formation, composition, distribution, and measurement of public opinions and its effect upon public policy.

PSC 348  Media and Politics  3 cr
Examining the role and influence of mass media in politics, exploring how and why the media contribute to and shape democracy.
Pre-requisite: (PSC 130 Minimum Grade of C or CA 100 Minimum Grade of C or CA 101 Minimum Grade of C).

PSC 360  Politics of Europe  3 cr
The course provides an overview of the political systems, institution, public policies, and actors in European Politics. Countries covered may include Germany, France, Great Britain, and Russia.
Pre-requisite: PSC 130 Minimum Grade of C or PSC 250 Minimum Grade of C or IS 100 Minimum Grade of C.

PSC 363  Crime and Politics in LatinAm  3 cr
An examination of the violent crime epidemic affecting many parts of Latin America, with specific focus on the themes of democratic transition, political economy, and foreign relations with the United States. Same as CJ 363 and IS 363.
Pre-requisite: (PSC 130 or CJ 105 or IS 100).
PSC 365  Politics of the Middle East-W  3 cr
The course introduces to the Middle East. Besides a timeline of Middle Eastern history and a brief profile of the Middle Eastern countries, the course focuses on the political histories and current politics of a select influential Middle Eastern countries.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (PSC 130 Minimum Grade of C or PSC 250 Minimum Grade of C or IS 100 Minimum Grade of C).

PSC 368  Politics of South Asia-W  3 cr
This course introduces and explains the importance of South Asia. While briefly profiling all South Asian countries, the course focuses on the political histories, leaders, current politics, and sociocultural environments of India, Pakistan, Bangladesh, and Afghanistan.
Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C) and (PSC 130 Minimum Grade of C or PSC 250 Minimum Grade of C or IS 100 Minimum Grade of C).

PSC 372  American Foreign Policy  3 cr
This course examines the political development and theories of U.S. foreign policy, from the Cold War to the present. Topics include power; nationalism; trade; defense; security and terrorism and other threats; and prospects and challenges in today's global society.
Pre-requisite: PSC 130 Minimum Grade of C or PSC 250 Minimum Grade of C or PSC 270 Minimum Grade of C or IS 100 Minimum Grade of C.

PSC 390  Special Topics -  3 cr
Study of a significant topic or problem in political science. May be repeated up to two times when content varies.
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 401  Public Administration  3 cr
The study of the implementation of public policy at the national, state, and local levels, and the study of the planning, organization and coordination of government operations.
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 411  Criminal Justice Admin  3 cr
This course applies management and organization theories to a broad range of criminal justice institutions, actors, and agencies—including police, courts, and corrections, treatment centers, drug traffickers, and homeland security. (Cross-listed as CJ 411)
Pre-requisite: PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C.

PSC 418  American Political Thought  3 cr
The course examines the central themes, issues, and evolution of American political thought, including how we understand our role and responsibilities in contemporary democracy. (Cross-listed as PHL 418)
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 430  Criminal Procedure - W  3 cr
An overview of the processes used by criminal investigators and the roles of those involved in the judicial process, as well as the interaction that occurs between the police, prosecutors, defense attorneys and the judiciary. (Cross-listed as CJ 430)
Pre-requisite: (PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

PSC 432  State and Local Government  3 cr
An overview of U.S. state and local government systems, including an analysis of the politics, public policy, and administration within the U.S. states and localities.
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 436  Politics of Urban Govt  3 cr
A study of urban growth with an analysis of the major problems facing large cities in this country. Political, administrative, social, and economic aspects will be covered.

PSC 437  US Congress and Policymaking  3 cr
An inside view of the U.S. Congress centered on the process for passing laws and policymaking, including an examination of influential legislation.
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 438  US Presidency  3 cr
A study of the U.S. presidency covering the political development and organization of the office; executive powers and responsibilities; elections and campaigns; and presidential communication.
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 440  Adv Studies in Pub Policy  3 cr
Advanced study in the field of public policy.
Pre-requisite: PSC 130 Minimum Grade of C.

PSC 450  Adv Study Comparative Pol  3 cr
Advanced study in the field of comparative politics.
Pre-requisite: PSC 250 Minimum Grade of C or PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C.

PSC 452  Politics of the Muslim World  3 cr
This course introduces students to the Muslim World. Subjects covered will include Islam, Islamic civilization, Islamism, and a timeline of Muslim political history. It also profiles the most influential Muslim countries, Islamists, and Islamic organizations.
Pre-requisite: PSC 130 Minimum Grade of C or PSC 250 Minimum Grade of C or IS 100 Minimum Grade of C.

PSC 453  Campaign and Election Comm.  3 cr
Focuses on political communication in the context of U.S. campaigns and elections. Same as CA 453.
Pre-requisite: (PSC 130 Minimum Grade of C or CA 100 Minimum Grade of C or CA 101 Minimum Grade of C).
PSC 456  Social Media and Politics  3 cr
An examination of how and why digital information technologies are used by citizens, activists, journalists, and politicians to shape and influence individual's political participation and engagement and public policy and society. Pre-requisite: (PSC 130 or CA 100 or CA 101 ).

PSC 469  Criminal Justice Policies  3 cr
This course examines how public policy has shaped both the criminal justice system and its results, with particular emphasis on crime control. Pre-requisite: CJ 105 or PSC 130.

PSC 470  Adv Study Intl Relations  3 cr
Advanced study in the field of international relations. Pre-requisite: PSC 270 Minimum Grade of C or PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C.

PSC 473  International Law  3 cr
The course covers major issues, cases and topics in public and private international law. Course coverage includes individuals and corporations, diplomatic relations, jurisdiction, human rights, economic relations, treaties, environmental law, and more. Pre-requisite: (PSC 130 Minimum Grade of C or CJ 105 Minimum Grade of D or CJ 205 Minimum Grade of C or IS 100 Minimum Grade of C).

PSC 481  Public Policy and Aging  3 cr
This course examines government responses to the growing number of older Americans. Topics include retirement and pensions, health care, housing, social services, intergenerational issues, and policy advocacy for the elderly. Pre-requisite: PSC 130 Minimum Grade of C.

PSC 484  Healthcare Around the World  3 cr
This course examines global connections within healthcare. Objectives include understanding health, its impact on populations, and how policy shapes healthcare. These objectives are studied within a global framework with emphasis on improving health and health equity. Pre-requisite: PSC 130 Minimum Grade of C or PSC 250 Minimum Grade of D or IS 100 Minimum Grade of C.

PSC 488  Armed Conflict  3 cr
The study of armed conflict from an interdisciplinary perspective incorporating criminology, political science, security studies, conflict and peace studies, and international law. Pre-requisite: (PSC 130 Minimum Grade of C or PSC 270 Minimum Grade of D or CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or IS 100 Minimum Grade of C).

PSC 489  Leadership and World Leaders  3 cr
An overview of the definitions, characteristics, and typologies of leadership, with a focus on lives and legacies of global influential political leaders over the past century. Pre-requisite: PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C.

PSC 490  Special Topics  3 cr
Study of a significant topic or problem in political science. May be repeated up to two times when the content varies. Pre-requisite: PSC 130 Minimum Grade of C.

PSC 491  Seminar on Terrorism  3 cr
This course will introduce students to the meaning, characteristics, typology, history, and causes of terrorism. The course will also summarize the biographies of the most prominent terrorists, past and present, and conclude, with a discussion of counter-terrorism strategies. Cross-listed with IS 491. Pre-requisite: CJ 105 Minimum Grade of C or CJ 205 Minimum Grade of C or PSC 130 Minimum Grade of C or IS 100 Minimum Grade of C.

PSC 492  PSC Capstone Seminar-W  3 cr
The Capstone course brings together key components from across political science. As part of the course, students will write a research paper, present their research, and take a comprehensive exam. PSC majors must earn a grade of C or better for graduation. Pre-requisite: PSC 130 Minimum Grade of C and PSC 250 Minimum Grade of D and PSC 270 Minimum Grade of D and (PSC 310 Minimum Grade of D or CJ 310 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

PSC 493  Study Abroad  3 cr
This course is an advanced Political Science course taught as part of a faculty-led study abroad program. Topics and credit hours vary. May be repeated when content varies. Up to 6 hours may be applied toward the PSC major or minor. Pre-requisite: PSC 130 Minimum Grade of C or PSC 250 Minimum Grade of D or PSC 270 Minimum Grade of D.

PSC 494  Directed Studies  1 TO 3 cr
Students will pursue directed research or readings on an approved topic in political science. Pre-requisite: PSC 130 Minimum Grade of C.

PSC 496  Internship  3 cr
An opportunity to gain experiential learning through a supervised internship offered by a variety of political science and government related agencies. Pre-requisite: PSC 130 Minimum Grade of C.

PSC 499  Honors Thesis - W  3 TO 6 cr
The research and writing of a major paper in the field of political science. Registration is open to political science majors in the Honors College or those pursing Department Honors. Pre-requisite: PSC 130 Minimum Grade of C.

PSC 500  Organization Theory Public Mgt  3 cr
This course provides a comprehensive overview of the field of organization theory. The course exposes students to seminal works in the field as well as covering more recent developments. Pre-requisite: PSC 130 Minimum Grade of C.
### COURSES

**PSC 501  Public Administration  3 cr**
The study of the implementation of public policy at the national, state and local levels, and the study of the planning, organization, and coordination of government operations.
Pre-requisite: PSC 130 Minimum Grade of C.

**PSC 510  Intergov-Interorg Relations  3 cr**
A review of the political, fiscal, and administrative relationships between various levels of government in America. In addition, the emerging nexus to 3d sector non-profit organization will be examined.

**PSC 511  Crim. Justice Admin.  3 cr**
This course applies classical and modern management and organization theories to a broad range of institutions, actors, and agencies, including police, courts, and corrections, as well as drug traffickers, sexual offender treatment centers, and homeland security agencies.

**PSC 520  Research Methods and Design  3 cr**
Social science research methodologies will be used to help students develop skills for policy analysis and decision making in the public service. Stresses the understanding of research methods and data collection in a Public Administration setting. Theoretical development and elaboration, and an overview of the variety of research designs used in social science research will be included.

**PSC 530  Quantitative Analysis  3 cr**
Focus is on application of statistical analysis techniques to Public Administration problems and issues. Computer analysis and interpretation of descriptive statistics will be emphasized. Topics will include fundamentals of probability, sampling, hypothesis testing, point estimation, association, correlation, and multi variate analysis.

**PSC 532  State and Local Government  3 cr**
An overview of U.S. state and local government systems, including an analysis of the politics, public policy, and administration within the U.S. states and localities.
Pre-requisite: PSC 130 Minimum Grade of C.

**PSC 537  Legislative Process in the US  3 cr**
Principles, procedures, and problems of law making, with special attention to the U.S. Congress.

**PSC 540  Human Resource Management  3 cr**
This course will cover contemporary topics in public administration, including public-employee unionization, relevance of the traditional civil-service approach, the challenge of employee productivity and motivation, equal opportunity, and public service ethics.
Pre-requisite: PSC 130 Minimum Grade of C.

**PSC 541  Leadership Theory and Practice  3 cr**
The course will provide the analytical and intellectual thought, careful examination and reflection of the core issues in the practice of leadership. Models and influence on leadership will be critically examined.

**PSC 550  Public Budgeting  3 cr**
This course emphasizes the political management and public-policy implications of budget reform, maintenance, and development. It explores the conceptual framework for program and performance budgeting and the increasing congressional role of Congress in federal budget policy.
Pre-requisite: PSC 130 Minimum Grade of C.

**PSC 560  Comparative Public Admin  3 cr**
A study of the operation of government systems throughout the world-their history, features, similarities, and differences.

**PSC 570  Administrative Law  3 cr**
Pre-requisite: PSC 130 Minimum Grade of C.

**PSC 572  Environmental Law  3 cr**
This course will introduce the student to some of the fundamental concepts of environmental law. It will utilize the philosophy and history of environmental law as it has developed from the Common Law of England to provisions of a Municipal Code.

**PSC 576  Adm Issues CJ Men Health  3 cr**
An overview of the relevant federal and state laws, federal regulations, and court rulings that address the issues of criminal justice for preserving the rights of those citizens who suffer from mental illness.

**PSC 580  Public Pol Analysis and Eval  3 cr**
This course is an introduction to policy and program evaluation incorporating various qualitative and quantitative techniques for analyzing.
Pre-requisite: PSC 520 Minimum Grade of B and PSC 530 Minimum Grade of B and PSC 130 Minimum Grade of C.

**PSC 581  Public Policy and Aging  3 cr**
This course examines government responses to the growing number of older Americans. Topics include retirements and pensions, health care, housing, social services, intergenerational issues, and policy advocacy of the elderly.
Pre-requisite: PSC 130 Minimum Grade of C.

**PSC 582  Crim. Just. Policy Evaluation  3 cr**
This course examines the most effective and commonly used forms of policy and program evaluation and applies them to criminal justice system. It explores policy and program evaluation related a number of subfields, including policing, drug policy, and gun control, recidivism, and police use of force.
Pre-requisite: PSC 520 Minimum Grade of C and PSC 530 Minimum Grade of C.

**PSC 583  Social Construction of Policy  3 cr**
This course examines the implications of the U.S. policy process through the lens of social construction theory as applied to the functionality of health care systems.
Pre-requisite: PSC 130 Minimum Grade of C. PSC 130 can be taken concurrently with this course.
### PSC 584 Healthcare Around the World  3 cr
This course examines global connections within healthcare. Objectives include understanding health, its impact on populations, and how policy shapes healthcare. These objectives are studied within a global framework with emphasis on improving health and health equity.

### PSC 585 Health Policy  3 cr
This course focuses on two distinct aspects of American Health Policy. First, the policy making process is examined in the context of health care and the major decision making powers (Congress, presidency, bureaucracy, and special interests). Second, existing health care policies are examined with an emphasis on the implications for access, financing, and quality of care. Finally, existing U.S. health policies are compared and contrasted with those of similar and dissimilar political systems.

### PSC 586 Health Administration  3 cr
Applications of management principles to health care organizations with a focus on governance and leadership, human resources, control systems, strategic planning, and accountability.

### PSC 587 Health Politics & The Elderly  3 cr
This course focuses on the health policy process and issues impacting the elderly with particular attention given to the politics of legislation, financing mechanisms, and strategies for reform.

### PSC 589 Leadership and World Leaders  3 cr
An overview of the definitions, characteristics, and typologies of leadership, with a focus on lives and legacies of global influential political leaders over the past century.

### PSC 590 Special Topics -  3 cr
Study of a significant topic in Public Administration. May be repeated for credit when the content varies.

### PSC 594 Dir St -  1 TO 6 cr
Under the guidance of a faculty member, student will pursue directed study of approved topics in public administration. For non-thesis students.

### PSC 596 Prof St - Intern Publ Admin  3 TO 6 cr
Relates the participants' classroom studies to occupational and professional experiences in an approved public agency. Written reports required. May be taken for a total of nine hours. (For further details, see section on Internship.)

### PSC 599 Thesis  3 TO 6 cr
Completion and oral defense of a master's thesis based upon original research. May be repeated for up to six hours credit. A minimum of six hours credit is required to meet degree requirements. Prerequisite: Approval of research prospectus including IRB or Animal Use and Care Committee approval if applicable.

## Process Technology (EPT) (EPT)

### EPT 113 Intro to Process Technology  3 cr
Introduction to Process Technology is part of the NAPTA Series for Process Technology. It provides learning material for the first course of a process technology program. The course was developed in partnership with Industry and Education. It covers history of the process industry, green technologies, career as a process technician, working as a team member, basic physics, basic chemistry, safety, health and environmental protection, principles of quality and process equipment. It explores the industry's modern-day processes and legislative influences and includes new critical thinking. This course is the foundation for and supports a consistent curriculum and exit competencies for process technology graduates.

### EPT 141 Process Quality  3 cr
Process Quality is part of the NAPTA Series for Process Technology. This course is the study of the background and application of quality concepts. Topics include team skills, quality tools, and economics and continuous improvement. Students will define terms associated with quality systems; demonstrate team skills; and apply principles and tools of quality to process systems. The course was developed in partnership with Industry and Education. It covers Total Quality Management (TQM), customer service and personal effectiveness, team skills, variance and operating consistency, continuous improvement and corrective/preventive action, group problem solving, Statistical Process Control (SPC), data collection, analysis and interpretation. This course supports a consistent curriculum and exit competencies for process technology graduates.

### EPT 142 Process Technology I - Equip  4 cr
Process Technology I - Equipment is part of the NAPTA Series for Process Technology. It focuses on the tools and equipment of the process industry. The course was developed in partnership with Industry and Education and provides a common national standard for the process technology equipment course of a process technology degree program. It covers piping, tubing, valves, pumps, compressors, turbines, motors & engines, power transmission & lubrication, heat exchangers, cooling towers, furnaces, boilers, filters, dryers, vessels, towers & columns, reactors, tanks & drums, flares, and process diagrams. This course includes a lab and field trip where students will demonstrate their ability to identify and describe the purpose of process equipment. This course supports a consistent curriculum and exit competencies for process technology graduates.
EPT 151  Safety, Health & Environment  3 cr
Safety, Health and Environment are part of the NAPTA Series for Process Technology. This course covers the development of knowledge and skills to reinforce the attitudes and behaviors required for safe and environmentally sound work habits. Emphasis is placed on safety, health, and environmental issues in the performance of all job tasks and regulatory compliance issues. Students will list components of a typical plant safety and environmental program; describe the role of a process technician in relation to safety, health, and environment; and identify and describe safety, health, and environmental equipment uses. The course was developed in partnership with Industry and Education. It covers types of hazards and their effects, site security, hazard controls, process safety management, audits, investigations and reporting, work permitting systems, personal protective equipment and first aid, fire, rescue and emergency response. This course supports a consistent curriculum and exit competencies for process technology graduates.

EPT 171  Process Instrumentation  3 cr
Process Instrumentation is part of the NAPTA Series for Process Technology. This course is the study of instruments and instrument systems used in chemical processing industry, including terminology, primary variables, symbology, control loops, and basic troubleshooting. Students will identify and explain the function of instruments used in the chemical processing industry; explain the relationship of process control elements in a control loop; and define and apply terms and symbols used in instrumentation. The course was developed in partnership with Industry and Education. It covers process variables, elements and instruments, control loops, switches, relays, alarms, instrument air systems, interlocks, symbology, and instrumentation troubleshooting. This course supports a consistent curriculum and exit competencies for process technology graduates.

Psychology (PSY) (PSY)

PSY 120  Introduction to Psychology  3 cr
A survey of the basic theories, concepts, principles, and research findings in the field of Psychology. Core course.

PSY 121  Honors Gen Psychology - H  3 cr
This course will provide a survey of the basic theories, concepts, principles, and research findings in the field of Psychology. Along with the broad overview provided by the course, students will participate in a more in-depth examination of selected special topics (e.g. those topics generating controversy in the research community and in our society) as selected by the instructor. By contrast with the PSY 120 Introduction to Psychology course already being taught, the Honors General Psychology course will provide a more thorough coverage of selected topics. Prerequisite: Special permission.

PSY 220  Res Design and Analysis I  3 cr
Research methods in psychology with an emphasis on the experimental method. Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (EH 102 Minimum Grade of D or EH 105 Minimum Grade of D).

PSY 221  Research Desgn/Analysis I-Apps  1 cr
Laboratory in research methods in psychology with an emphasis on the experimental method. Fee. Co-requisite: PSY 220
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 210 Minimum Grade of D) or PSY 121 Minimum Grade of D and (EH 102 Minimum Grade of D or EH 105 Minimum Grade of D).

PSY 250  Life Span Development  3 cr
An overview of human development from conception to death. Special emphasis will be placed on cognitive and social development. Core course.

PSY 270  Psy of Black Experience  3 cr
Theories and principles of psychology pertaining to the experience of black Americans. Includes the development of the black psychological perspective, African-American historical developments and philosophy, identity development and the determinants of the black personality, and contemporary issues in the black community.

PSY 290  Special Topics -  1 TO 3 cr
Selected topics in psychology. May be repeated for credit when course content varies for a total of 12 credit hours. Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).

PSY 310  Biological Psychology I  3 cr
An introductory survey of research and theory in neuroscience as it applies to the understanding of behavior. Focus will be on understanding basic mechanisms of neuron function and general coverage of topics such as sensory and motor systems, motivation and emotion, learning and memory, language and thinking, and mental disorders. Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).

PSY 317  Applied Behavior Analysis I  3 cr
An introduction to the principles of behavior intended as a prerequisite to the specific strategies and procedures practiced by behavior analysts. This course will present the historical and scientific foundations of behavior analysis as applied in educational and other human service settings. Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 120 Minimum Grade of D or PSY 220 Minimum Grade of D).
PSY 320  Res Design-Analysis II-W  3 cr
Experience in applying methodological and statistical concepts introduced in PSY 220 and ST 210, as well as instruction in additional topics such as research and analysis. The course will emphasize the use of computers in conducting behavioral research (e.g. literature searches, collecting data, analyzing data, writing reports).
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

PSY 321  Research Design/Analysis II-App  1 cr
Laboratory in research methods in psychology with an emphasis on applying methodological and statistical concepts introduced in PSY 220 and PSY 320. Fee. Co-requisite: PSY 320
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 210 Minimum Grade of D) or PSY 121 Minimum Grade of D and (PSY 220 Minimum Grade of D and PSY 222 Minimum Grade of D) and (EH 102 Minimum Grade of D and EH 105 Minimum Grade of D).

PSY 340  Abnormal Psychology  3 cr
Nature and development of deviant behavior.
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).

PSY 350  Child and Adolescent Dev  3 cr
The development and psychosocial aspects of childhood and adolescence.
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).

PSY 394  Directed Study  1 TO 3 cr
Specific topics and research findings introduced through the reading of appropriate professional and scientific literature. Requires special permission. May be repeated for a total of 8 credit hours.
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).

PSY 395  Psychology Practicum  1 TO 6 cr
Supervised experience in an area of psychology. May include supervised placement in an applied setting. May be repeated for a total of 12 credit hours.
Pre-requisite: (PSY 120 Minimum Grade of C or PSY 121 Minimum Grade of C or PSY 210 Minimum Grade of C).

PSY 412  History-Systems Psy - W  3 cr
The historical foundations of modern psychology and the development of major theories in psychology.
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

PSY 414  Introduction to Clin Psych  3 cr
This course serves as a practical capstone for Psychology students interested in careers in professional Psychology. Through a series of lectures, readings, exercises, films, and demonstrations, this course will introduce student to the ways that clinical psychologists approach the conceptualization, assessment, diagnosis, and treatment of health problems. The course will focus on the scientific basis for the practice of clinical psychology.
Pre-requisite: PSY 120 Minimum Grade of D or EH 102 Minimum Grade of D or EH 105 Minimum Grade of D.

PSY 416  Cognition  3 cr
An overview of psychological research and theory in cognitive psychology. The course will emphasize how people gather, process, represent, and use information to guide thought and action. This course is an approved elective for students seeking gerontology certification.
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D).

PSY 418  Applied Behav Analysis II-Meth  3 cr
Behavioral assessment techniques and operant and respondent methods for deceleration of inappropriate behavior will be covered. Operant methods for accelerating appropriate behaviors, teaching new behaviors, and maintaining behaviors will be covered. Data-based decision making strategies will be used in developing and altering individual programs.
Pre-requisite: PSY 317 Minimum Grade of C.

PSY 419  App Behav Analysis Ill-Adv App  3 cr
Behavioral assessment techniques and experimental designs for the evaluation of behavior change programs will be covered. Data-based decision making strategies for formative program evaluation and modification are also included.
Pre-requisite: PSY 417 Minimum Grade of C.

PSY 420  Psychology of Learning  3 cr
Theories, experimental findings, and methods of investigation in learning.
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D).

PSY 425  Mental Health and Law  3 cr
Selected topics in psychology and criminal justice. An overview of the relevant federal and state laws, federal regulations and court rulings which address the issues of justice for preserving the rights of individuals with mental illness.
Pre-requisite: PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D.

<th>Description</th>
<th>Prerequisites</th>
</tr>
</thead>
<tbody>
<tr>
<td>PSY 428</td>
<td>Perception</td>
<td>3 cr</td>
<td>A critical analysis of the main theories and research trends in sensation and perception. This course will include computer simulations and demonstrations, and will also emphasize computer applications for data collection, data analysis, and for reporting results. This course is an approved elective for students seeking gerontology certification. Fee.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D) and (PSY 310 Minimum Grade of D or PSY 380 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 435</td>
<td>Social Psychology</td>
<td>3 cr</td>
<td>A survey and analysis of major theoretical and experimental topics of interest in social psychology, such as how we perceive others, attitude, interpersonal attraction, aggression, prejudice and altruism.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 440</td>
<td>Psychology of Personality</td>
<td>3 cr</td>
<td>A survey and critical analysis of major historical and current theories about personality. The course will also examine research relevant to the different approaches and consider various techniques of personality assessment.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 456</td>
<td>Adult Development and Aging-</td>
<td>3 cr</td>
<td>The development and psychosocial aspects of adulthood and late life. This course is an approved elective for gerontology certification.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 460</td>
<td>Industrial Psychology</td>
<td>3 cr</td>
<td>Application of psychological principles and techniques to business, industry, and government.</td>
<td>PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D.</td>
</tr>
<tr>
<td>PSY 465</td>
<td>Intro to Measurements-Tests</td>
<td>3 cr</td>
<td>This course will provide a survey of the methodology of assessment, test design and construction, test administration and scoring, achievement and intelligence testing, personality observations and inventories, and issues in ethics and applications of testing.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or ST 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 470</td>
<td>Intellectual Disabilities</td>
<td>3 cr</td>
<td>The study of theories and research in intellectual disabilities and related areas.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 475</td>
<td>Comparative Evolutionary Psy</td>
<td>3 cr</td>
<td>A critical analysis of the main theories and research trends in comparative and evolutionary psychology. This course is an approved elective for students seeking gerontology certification.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 480</td>
<td>Health Psychology - W</td>
<td>3 cr</td>
<td>Current theories, research and applications in health psychology.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D) and (PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).</td>
</tr>
<tr>
<td>PSY 485</td>
<td>Psychology of Gender</td>
<td>3 cr</td>
<td>The study of psychological research on gender differences and theories regarding the origins of these differences.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 490</td>
<td>Special Topics</td>
<td>1 TO 3 cr</td>
<td>Selected topics in psychology. May be repeated for a total of 12 credit hours when course content varies.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 492</td>
<td>Seminar -</td>
<td>1 TO 3 cr</td>
<td>A survey of basic theories, concepts, principles, and research findings in a particular focal topic in psychology. Students will study topics in depth by reading and presenting research reports, review papers and book chapters, and through active in-class discussion of the reading materials. Requires permission of department chair. May be repeated up to 2 times when content varies for a total of 6 credit hours.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
<tr>
<td>PSY 494</td>
<td>Directed Studies -</td>
<td>1 TO 3 cr</td>
<td>Directed study and research. Requires special permission. May be repeated for a total of 8 hours.</td>
<td>(PSY 120 Minimum Grade of D or PSY 121 Minimum Grade of D or PSY 210 Minimum Grade of D).</td>
</tr>
</tbody>
</table>
PSY 499  Honors Senior Thesis-H  3 TO 6 cr
Student conducts an independent research project under
the supervision of a faculty sponsor. Recommended for
psychology majors planning graduate school. Permission of
department chair is required prior to registration. Requires
GPA of 3.3 or higher. May be repeated for a total of 6 credit
hours.
Pre-requisite: (PSY 120 Minimum Grade of D or PSY 121
Minimum Grade of D or PSY 210 Minimum Grade of D) and
(PSY 220 Minimum Grade of D or PSY 222 Minimum Grade of D).

PSY 500  Proseminar in Psychology  1 cr
Research presentations will be given by faculty and
advanced graduate students. In addition, discussion of
project and thesis requirements and procedures will take
place. Required of all students registered for PSY 500 , 502,
and 503.

PSY 501  Research Design and Stats I  3 cr
Theories and principles of research design and elements
of modern statistics. Introduction to computer programs for
statistical analysis will be included. Fee.
Co-requisite: PSY 500

PSY 502  Research Design and Stats II  3 cr
Theories and principles of advanced research design
and elements of modern statistics. The use of computer
applications such as SPSS to analyze empirical data sets
will be covered. Fee.
Co-requisite: PSY 501 Minimum Grade of B or PSY 521
Minimum Grade of B.

PSY 503  Quantitative Methods II  3 cr
Elements of modern statistics with emphasis on application
to psychological research. Multivariate statistical techniques
to include multiple regression, multivariate analysis of
variance, discriminant, canonical, and factor analysis will be
discussed. Fee.
Co-requisite: PSY 500
Pre-requisite: (PSY 502 Minimum Grade of B or PSY 522
Minimum Grade of B).

PSY 507  History of Psych & Prof Ethics  3 cr
This course provides instruction through readings,
lecture, and case studies in the application of ethics in the
professional practice of psychology. In addition, the course
focuses on the philosophical foundations, professional
identity, and standards of practice found in both clinical
psychology and counseling psychology.

PSY 510  Physiological Psychology  3 cr
This course provides a foundation in the techniques of
advanced psychophysiological methods. The course
covers the history of psychophysiology, including the
electrical properties of cells, and major organ systems, with
particular emphasis on the electroencephalogram (EEG)
and neuroimaging techniques. Students are introduced to
the principles of psychophysiological recording, common
applications of psychophysiology, safety and ethics in
psychophysiological research, instrumentation, and
research design issues in psychophysiology. Relevant
statistical treatment of psychophysiological data will be
discussed, including multiple regression, complex ANOVA,
scaling of data, and non-parametric alternatives such as
boot-strapping.

PSY 512  Adv History/Systems Psychology  3 cr
An advanced course in the historical foundations of modern
psychology and the development of major theories in
psychology.

PSY 514  Learning  3 cr
A survey of research and theory in learning.

PSY 516  Cognitive Psychology  3 cr
An advanced survey of research and theory in cognitive
psychology. Topics include pattern recognition, attention,
memory, language processing, decision making, and
problem solving. This course is an approved elective for
students seeking gerontology certification.

PSY 520  Personality Res and Theory  3 cr
A critical analysis and evaluation of major theories and
current research trends in personality.

PSY 522  Soc & Personality Psychology  3 cr
This course provides a foundation for conducting
quantitative research in personality and social psychology.
Topics covered will include (a) measurement of personality
and individual differences (e.g., narcissism, self-esteem),
(b) measurement of cognitive and behavioral outcomes
in laboratory and non-laboratory settings (e.g. decision-
making, implicit cognitions), and (c) data analytic techniques
(e.g. testing for mediation/moderation, structural equation
modeling).

PSY 524  Lifespan Development  3 cr
Analysis of theories, research methods, and major findings
of sensory, perceptual, social, and cognitive changes across
the lifespan, from infancy to late life. Research in social and
cognitive development, including cognitive disabilities, the
underlying mechanisms involved in thinking and learning
processes, and age-related cognitive models are central
to this course. **This course is an approved elective for
students seeking gerontology certification.
PSY 528  Sensation and Perception  3 cr
This course provides a multidisciplinary analysis of how the sensory systems analyze physical stimuli to support perception and successful actions. Consideration is given to how the anatomy and physiology of the major sensory systems extract information using low- and high-level mechanisms to create meaningful percepts. Other topics include psychophysics, comparative studies, communication, production and performance, face and object recognition, attention, and event perception.

PSY 530  Applied Psy & Dx Interviewing  3 cr
Theories, principles and techniques of interviewing, behavioral observation and classification of psychological disorders.

PSY 532  Psychopathology  3 cr
Current research and theoretical aspects of psychopathology in children and adults.

PSY 540  Psychometrics  3 cr
Theories and methods of test construction and principles of measurement and evaluation in the behavioral sciences.

PSY 542  Cognitive Assessment  3 cr
Principals and methods of individual intelligence testing, including the administration of the Wechsler and the Stanford-Binet tests. Practical experience in the administration, interpretation and report writing of a psychological evaluation using intelligence tests.
Pre-requisite: PSY 530 Minimum Grade of B and (PSY 540 Minimum Grade of B or PSY 571 Minimum Grade of B).

PSY 544  Personality & Affective Assmt  3 cr
Theory, development and interpretation of selected personality assessment instruments. Methods and procedures in administering and interpreting personality, aptitude and career interest tests.
Pre-requisite: (PSY 540 Minimum Grade of B or PSY 571 Minimum Grade of B) and (PSY 542 Minimum Grade of B or PSY 575 Minimum Grade of B).

PSY 550  Evidenced Based Clin/Coun Prac  3 cr
Study of the theoretical and empirical foundations of the major systems of psychotherapeutic change.

PSY 552  Multicultural Issues in Psy  3 cr
This course will focus on theoretical models, research, techniques, and interventions for working with culturally diverse populations in various settings. Specific issues to be addressed include world views, acculturation and acculturative stress, prejudice and prejudice-reduction techniques, racial/ethnic identity, culture and assessment, and the nature of multicultural competence in Psychology. Issues related to ethnic and racial identity will form the primary focus; however, other types of diversity (e.g., religion, gender, sexual orientation, physically challenged) will also be considered.
Pre-requisite: (PSY 550 Minimum Grade of B or PSY 589 Minimum Grade of B) and PSY 506 Minimum Grade of B and PSY 530 Minimum Grade of B and (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B).

PSY 554  Cognitive Behavior Therapy  3 cr
A follow up course to PSY 550, this course will survey theory, research and application of cognitive behavior therapy. Focus will be on treatment strategies and application to a variety of psychological disorders of adults and children.
Pre-requisite: PSY 530 Minimum Grade of B and (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B) and (PSY 550 Minimum Grade of B or PSY 589 Minimum Grade of B).

PSY 556  Practicum  1 TO 3 cr
Supervised experience with adult and children clients. Includes case conference and seminars. May include supervised placement in an applied setting. May be repeated up to five times for a total of 18 credit hours.
Pre-requisite: (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B) and (PSY 550 Minimum Grade of B or PSY 589 Minimum Grade of B).

PSY 558  External Practicum  3 TO 5 cr
Supervised placement in an applied setting. May be repeated four times for a total of 15 credit hours.
Pre-requisite: PSY 552 Minimum Grade of B and PSY 554 Minimum Grade of B.

PSY 570  Intel Disable/Autism Spec Dis  3 cr
A study of theories and research related to Intellectual Disabilities and Autism Spectrum Disorders.

PSY 572  Child Psychopathology  3 cr
The description and etiology of deviant behavior patterns in children and adolescents.
Pre-requisite: (PSY 532 Minimum Grade of B or PSY 561 Minimum Grade of B).
PSY 575  Comparative Psychology  3 cr
An in-depth analysis of the proximal and ultimate causes of animal and human behavior examined from the perspectives of comparative and evolutionary psychology, psychobiology and ethology. Relevant research in animal models of biological and cognitive systems, learning and motivation, lifespan development and related biopsychosocial factors will be included. ** This course is an approved elective for students seeking gerontology certification.

PSY 586  Cognitive Neuroscience  3 cr
This course includes an advanced and integrative study of the experimental study of cognition and neuroscience. Topics include sensation and perception, memory, learning, language, metacognition, intelligence, problem solving, decision making, mental imagery, consciousness, attention, and the development of cognition through the life span. Major theoretical perspectives and current research within the fields of cognition and neuroscience are discussed. This course also provides students with a basic understanding of the neural underpinnings of a variety of cognitive processes.

RAD 301  Clinical Education II  4 cr
Hospital-based laboratory allowing the student to obtain clinical experience in those areas presented in RAD 307. Pre-requisite: RAD 300 Minimum Grade of C and RAD 304 Minimum Grade of C and RAD 307 Minimum Grade of C and RAD 310 Minimum Grade of C and RAD 312 Minimum Grade of C.

RAD 302  Clinical Ed III  4 cr
Hospital-based laboratory allowing the student additional clinical experience.

RAD 304  Patient Care & Ethics  3 cr
Basic knowledge concerning patient care and ethical situations with which the radiologic technologist must be familiar. Class time is allotted for the student to practice certain techniques pertinent to obtaining vital signs, handling of patients, sterile technique, tray setup, first-aid measures, and general operating room and bedside radiography procedures.

RAD 307  Osseous I  4 cr
This course includes the demonstration and practice in positioning and phantom radiography of the chest, general abdomino-pelvic viscera, and the upper and lower extremities to include shoulder and pelvic girdles.

RAD 308  Osseous II  4 cr
Continuation of RAD 307 to include the axial skeleton, sternum, sternoclavicular joints and introductory topics relating to special radiographic procedures.

RAD 309  Osseous III  3 cr
Continuation of RAD 308 to include demonstration and practice in positioning and phantom radiography of the cranium, facial bones, optic foramina, TMJs, orbits, overview of mastoids, stereoscopy, tomography, long bone measurements, foreign body localization and fetal imaging.

RAD 310  Radiation Biology  2 cr
A study of health physics and methods used to reduce exposure to personnel and patients in diagnostic and therapeutic radiology. The biological effects of ionizing radiation are stressed along with applied mathematical principles.

RAD 312  Princ of Radiographic Exposure  4 cr
A beginning study of the principles involved in image formation including exposure factors affecting image quality.

RAD 315  Contrast Media  2 cr
A detailed study of contrast media, preparation and administration, radiographic positions, technique, and anatomy and physiology of the organs studied. Pre-requisite: RAD 300 Minimum Grade of C and RAD 304 Minimum Grade of C and RAD 307 Minimum Grade of C and RAD 310 Minimum Grade of C and RAD 312 Minimum Grade of C.

<td>5 cr</td>
<td>A continuation of RAD 424 allowing the student to gain clinical experience in ultrasound procedures, with emphasis on superficial structures, pediatric scans, and ultrasound guided procedures.</td>
</tr>
<tr>
<td>RAD 427</td>
<td>Procedural Guidelines in Ultra</td>
<td>3 cr</td>
<td>This course will include a review of guidelines for ultrasound exams, ethics in ultrasound and preparation for the ultrasound registry. Assigned student papers and oral presentations addressing ultrasound topics are required.</td>
</tr>
</tbody>
</table>
RAD 430  Healthcare Communication  3 cr
This course will provide knowledge of information technology and applications of IT in the healthcare setting. Topics of discussion will include how to foster interdisciplinary communication, development of action plans for areas that are compliant/non-compliant with organizational objectives, and utilization of electronic or manual systems.

RAD 432  Healthcare Human Resource Mgmt  3 cr
This course will enable students to develop an effective recruitment and staffing program, implement a retention program, conduct staff performance evaluations, establish and develop processes to expand employee competence, implement a leadership development program, develop a succession plan and create an employee recognition program.

RAD 433  Health Care Financial Mgmt  3 cr
Course provides students with knowledge of both fiscal and asset management health care organization with tools and techniques to include health care accounting and financial statement, making major capital investments, determining cost and using cost information in decision making, and budgeting performance management.

RAD 435  Health Care Operations Mgt - W  3 cr
Provide knowledge to use surveys, focus groups, and interviews, use quality improvement methods, develop industry partnerships and develop new opportunities, develop marketing and public relations plans, develop policies and procedures to follow federal, state, and other regulatory guidelines, enforce policies and procedures with monitoring techniques, and develop a quality management program.

RAD 437  Image Analysis  3 cr
Student radiographs taken during the clinical periods will be viewed and critiqued within the classroom.
Pre-requisite: RAD 403 Minimum Grade of C and RAD 411 Minimum Grade of C and RAD 415 Minimum Grade of C.

RAD 440  Radiology Management Preceptor  1 cr
To achieve the aims of the Radiology Management program, students require experience in a variety of settings, in addition to learning theory content in their management courses. This course will provide a valuable component of student development by providing an opportunity to work with professional radiology managers/supervisors/administrators in the field of Radiology.
Pre-requisite: RAD 430 Minimum Grade of C and RAD 432 Minimum Grade of C and RAD 433 Minimum Grade of C and RAD 435 Minimum Grade of C.

RAD 441  Clinical Education I  5 cr
Through structured sequential assignments in clinical education settings, concepts of team practice, patient-centered clinical practice, and professional development are presented. Course designed to provide development, application, analysis, integration, synthesis, and evaluation of concepts and theories in radiation therapy.

RAD 442  Clinical Education II  6 cr
A continuation of RAD 441. Through structured sequential assignments in clinical education settings, concepts of team practice, patient-centered clinical practice, and professional development are presented. Course designed to provide development, application, analysis, integration, synthesis, and evaluation of concepts and theories in radiation therapy.

RAD 443  Clinical Education III  7 cr
A continuation of RAD 442. Through structured sequential assignments in clinical education settings, concepts of team practice, patient-centered clinical practice, and professional development are presented. Course designed to provide development, application, analysis, integration, synthesis and evaluation of concepts and theories in radiation therapy.

RAD 446  Orientation to Oncology - W  3 cr
Examines Oncology terminology, concepts of diagnosis and treatment, orientation to equipment and procedures and the role of the radiation therapist. Ethical, legal and quality assurance concerns will also be discussed.

RAD 448  Radiation Therapy Physics  3 cr
Processes in radiation production, interactions, detection, and measurement, units, calibration, are presented. Routine and emergency protection procedures for radiation-producing devices and radioactive sources are emphasized. Includes discussions on quality assurance methods, treatment unit calibration, dose monitoring, beam verification, and radiation protection for the patient, healthcare worker, and the public.

RAD 450  Patient Care in Oncology  1 cr
Fundamentals of oncology patient care with emphasis on physical and psycho-social needs assessment, treatment and disease side-effect management, nutritional care and pain management.

RAD 452  Prin Pract of Rad Oncology I  3 cr
A study of techniques used for simulation and treatment delivery. Includes general and site-specific instruction, with attention given to technical details aimed at optimizing the dose delivery planned during simulation and accomplished during treatment. Time will be dedicated to demonstration of techniques.

RAD 453  Prin Prac of Rad Oncology II  3 cr
A study of techniques used for simulation and treatment delivery. Includes general and site-specific instruction, with attention given to technical details aimed at optimizing the dose delivery planned during simulation and accomplished during treatment. Time will be dedicated to demonstration of techniques.

</table>
COURSES

RAD 491  Prof. Radiological Practice  6 cr
A bridge bridge for certified radiographers to transition from Radiographer to BS program.

RAD 494  Directed Independent Study  2 cr
A comprehensive registry review to include written assignments and a presentation.

RAD 496  Radiologic Science Research I-W  1 cr
Writing intensive course that prepares students to perform a research project in one of the imaging modalities.
Pre-requisite: EH 102 Minimum Grade of C.

RAD 497  Rad Science Research II  1 cr
Continuation of RAD 496. Students will design and perform a research project.
Pre-requisite: RAD 496 Minimum Grade of C.

RAD 499  Senior Honors Project - H - W  1 TO 3 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project relevant to the field of Radiologic Sciences study that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty members chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours. Prerequisite: Permission of the department chair and completion of an approved project prospectus.
Pre-requisite: RAD 403 Minimum Grade of C or RAD 423 Minimum Grade of C or RAD 441 Minimum Grade of C or RAD 460 Minimum Grade of C or RAD 464 Minimum Grade of C or RAD 468 Minimum Grade of C or RAD 472 Minimum Grade of C.

Reading Instruction (RED) (RED)

RED 110  Effect Read-Lang-Study Skills  3 cr
A laboratory experience to increase facility in reading, language and study skills.

RED 330  Found of Read Instruction - W  3 cr
A course to orient the student to fundamentals in the teaching of reading and provides practice in basic skills.

RED 331  Teaching Reading  3 cr
A course focusing on methodology, materials, and techniques for developing systematic instruction and diagnosis appropriate for early childhood and elementary children. This course has a required field experience.
Co-requisite: EEC 335, EEC 336, EEC 337, EEC 345
Pre-requisite: RED 330 Minimum Grade of C and EEC 346 Minimum Grade of C and RED 333 Minimum Grade of C and EEC 332 Minimum Grade of C.

RED 333  Literature for Children - W  3 cr
A course for the selection and use of literature based on the interests, abilities, and needs of children from prekindergarten through the elementary school. Particular emphasis on creative ways of sharing books with children. This course has a required field experience.
Co-requisite: RED 330

RED 334  Lit for the Young Child - W  3 cr
A survey course dealing with methods of writing literary materials with children in preschool through the primary grades. It is designed to assist those who wish to become widely acquainted with books and related materials for today's young children.

RED 348  Lang Dev in Early Childhood - W  3 cr
An introduction to speech and language development birth through the primary grades and teaching practices that support language and literacy development. Includes discussion of cultural and developmental factors that influence language development and appropriate methods for helping young children acquire language and literacy skills.

RED 352  Literature for Adolescents  3 cr
Discussion and evaluation of literature for students in grades 7 through 12 with extensive reading, listening, and viewing of materials.

RED 451  Content Area Literacy - W  3 cr
Methods and materials in the teaching of reading. Development of effective study and skills at the secondary level is stressed.
Pre-requisite: SED 340 Minimum Grade of C and SED 341 Minimum Grade of C. SED 341 can be taken concurrently with this course.

RED 458  Crit Read in Content Field - W  3 cr
An examination of non-fiction (and some fiction) which emphasizes critical reading skills. Various types of prose will be considered including that found in textbooks, newspapers and other periodicals, popular fiction, and non-fiction.

RED 520  Reading Foundations  3 cr
Introduces students to the fundamentals of the teaching of reading, including concepts of print, phonological awareness, phonics, fluency, vocabulary, and comprehension and how these areas are assessed. This course has a required field experience.

RED 530  Crnt Approach Read Writing Ins  3 cr
Intensive training and modeling in the theories and practices in the teaching of reading and writing with an emphasis on writing theory and practice.

RED 531  Trends-Practices Tchg Reading  3 cr
 Begins with in-depth study of the nature of reading as a process and its place in the total school program and extends through assessments, methods, materials, and personalized procedures for pupils and teachers. Pre-requisite: RED 520 Minimum Grade of C.
RED 533  Diag-Corr Reading Disabilities  3 cr
First, an intensive study of steps in the diagnosis of reading disabilities; second, a survey of corrective and remedial techniques for eliminating the difficulties; the third, application of diagnostic and instructional techniques to specific type of disabilities.
Pre-requisite: RED 531 Minimum Grade of B.

RED 534  Remed-Clinic Proced in Reading  3 cr
A practicum in remediating reading disabilities. Each student receives close supervision in work with actual cases at varying disabilities levels.
Pre-requisite: RED 533 Minimum Grade of B.

RED 541  Literacy in the Content Area  3 cr
This course includes the methods and materials for literacy-based instruction in the content areas. The incorporation of literacy-based activities such as reading, writing, and thinking; and the use of strategies to promote student comprehension are emphasized. Prerequisite: Admission to teacher education program.

RED 544  Wrtg Process Skls Read Writing  3 cr
Intensive writing applications with an emphasis on the writing process, action research, and the reading and discussion of reading and writing pedagogy and research.

RED 545  Lit for Children - Adolescents  3 cr
Provides a comprehensive survey of books written for children and adolescents, and makes appropriate interspersions of periodicals and other media. Through varied class activities, with emphasis on techniques for encouraging literary enjoyment, the student will increase skills in making children’s literature an integral part of the school curriculum.

RED 547  Lit Early Childhood Classroom  3 cr
Provides a comprehensive survey of books written for children in the pre-K-3 classroom, and incorporates periodicals, media and technology appropriate for teaching young children. A variety of class activities intended to motivate and encourage children to become lifelong readers is included.

RED 548  Literacy Coaching  3 cr
Includes an in-depth study of coaching techniques, specifically the role of coaching in the school setting. This course includes strategies for encouraging teachers to engage in the coaching process, coaching teachers to meet the literacy needs of their students, as well as providing school-based professional development and maximizing moments with struggling readers.
Pre-requisite: RED 531 Minimum Grade of B.

RED 557  Practicum in Reading Education  1 TO 9 cr
Experiences in working in the area of reading instruction and/or diagnosis under the supervision of a reading teacher or supervisor and a college supervisor.

RED 560  Materials Workshop -  3 cr
A topical workshop in which participants have experiences in creating, designing, constructing and using instructional materials and activities. This will work emphasize reading and language arts. No more than 6 hours can be applied toward a degree program. Prerequisite: Permission of instructor.

RED 590  Sp Top -  3 TO 6 cr
Guided investigation of topics in reading education, such as curriculum revision, course or program design, newly evolved trends in reading education, and implications of research in reading education. No more than 6 hours can be applied toward a degree program.

RED 594  Dir St - Research  1 TO 3 cr
Students explore through directed study research problems and issues of special interest or significance in reading education. No more than 3 hours of any departmental 594 courses can be applied toward a degree program. Prerequisite: Permission of department chair.

RED 595  Internship in Reading Educ  1 TO 9 cr
The internship is a supervised learning experience in a work setting similar to that in which an educator will eventually be employed. The internship provides students with an opportunity to apply the theories and concepts learned during the graduate program.
Pre-requisite: PRAXIS-Reading Specialist 164 and RED 533 Minimum Grade of B and RED 534 Minimum Grade of B.

RED 599  Thesis  1 TO 9 cr
A student selects a project, study, or investigation which is related to reading education. The project will form the basis for the thesis. A thesis committee will provide direction during the investigation and during the writing of the thesis.

RED 611  Theor Lang Dev Tchg Reading  3 cr
Emphasizes theories of language acquisition and development. Includes linguistics, language development of the culturally different child, and application of theory to classroom practices in reading and related areas. Requires special permission.

RED 612  Socio Influences in Rdg Instr  3 cr
Focuses upon the history of reading instruction, sociological factors influencing reading, reading in relation to other media of communication, and ways of applying these findings in classroom and clinical practice. Requires special permission.

RED 613  Admn and Supv the Rdg Program  3 cr
Analyzes and interprets administrative and supervisory roles and functions as they relate to the total school program, elementary through high school. Stress is upon facilitating and enhancing all aspects of the program. Requires special permission.
RED 615  Diag - Rem Severe Rdg Disab  3 cr
Provides laboratory experiences in studying severe cases of reading disabilities and in developing plans and procedures for their remediation. Requires special permission.

RED 630  Psy Factors in Tchg Reading  3 cr
Relates pertinent psychological concepts and principles to (1) current definitions of the reading process, (2) methods of teaching, and (3) special procedures for reluctant and disabled readers. The student may apply these concepts and principles in regular or laboratory settings.

RED 640  Research in Reading  3 cr
A critical analysis and evaluation of the significant research studies in reading from which reading concepts emerge and from which implications for teaching and further research may be drawn.

RED 648  Literacy Coaching Teacher/Ldrs  3 cr
A purpose of this course is to prepare professional educators through teaching, research, and service to become committed to life-long learning and to facilitate the process of building better communities. Students will demonstrate best educational practices and professional dispositions and will learn how to create a positive, motivational learning environment in schools while recognizing, appreciating, and including diverse learners and perspectives. Additionally, students are expected to demonstrate satisfactory skills in curriculum leadership; to engage in action research related to schools; to engage in literacy coaching; to address current family, community, regional, and national issues related to scholastic achievement, and to use tenets of instructional leadership to guide teachers and other professionals toward improving student achievement.

RED 690  Sp Top -  3 cr
Guided investigation of topics in reading education such as curriculum revision, course or program design, newly evolved trends in reading education, and implications of research in reading education.

RED 694  Dir St - Research  1 TO 3 cr
Students explore through directed study problems and issues of special interest or significance in reading education. No more than 3 hours of any departmental 694 courses can be accepted toward a degree program. Prerequisite: Permission of department chair.

RED 699  Research Project  1 TO 3 cr
A supervised research project, study, or investigation in reading. Student will conduct an investigation, and apply concepts and skills learned during the sixth-year program. May be taken more than one semester. Prerequisite: Permission of department chair. Pre-requisite: IDE 692 Minimum Grade of B or EDU 692 Minimum Grade of B.

RTH 194  Leisure Crafts  3 cr
Adapting various crafts media for use in recreational programs. Design and execution of creative crafts with emphasis on use of indigenous materials.

RTH 292  Outdoor Recreation-Adventure  3 cr
A classroom introduction to a wide range of outdoor recreation pursuits with an emphasis on safety, minimum impact, and "how to get started" in outdoor activities like backpacking, canoeing, rafting, car camping, hiking, and others.

RTH 295  Intro to Therapeutic Rec  3 cr
Introduces students to the field of therapeutic recreation including the history, foundations, and philosophy of the field. In addition, characteristics and leisure needs of numerous special populations will be introduced.

RTH 298  Practicum in Ther Rec  3 cr
Supervised practical experience that provides observation, participation, and application of therapeutic recreation and leisure studies concepts. Includes classroom instruction and exploration of career opportunities. Minimum 90-hours of practical experience required.

RTH 375  Mgmt in Therapeutic Recreation  3 cr
Management and organization of therapeutic recreation programs including professional and agency standards, staff development, internship and credential requirements, fiscal planning, continuous quality improvement, equipment maintenance, advocacy, and public relations. Pre-requisite: RTH 295 Minimum Grade of D or LS 295 Minimum Grade of D.

RTH 395  Therapeutic Rec Process (W)  3 cr
This course introduces the comprehensive program planning process and the elements of assessment and documentation in a variety of therapeutic recreation service settings. A field work component may be required. Pre-requisite: RTH 295 Minimum Grade of D or LS 295 Minimum Grade of D.

RTH 397  Intergenerational Rec/Wellness  3 cr
This course is an intergenerational experience combining theory and practice in aging and recreation. Students utilize the therapeutic recreation process (assessment, program planning, implementation and evaluation) with older adults who have special needs, to promote health, wellness, and rehabilitation.

Recreational Therapy (RTH)
RTH 465  TR Prog Des & Interventions I  3 cr
This course provides an examination of Therapeutic Recreation interventions and the role of research and theory in influencing practice. Course topics include: activity analysis, programming techniques, scope of service, intervention descriptions, historical perspectives, current research, and theoretical foundations related to TR intervention. A field work component of 40 hours is required that will allow students to gain experience implementing TR programs.
Pre-requisite: (RTH 295 Minimum Grade of D and RTH 298 Minimum Grade of C) or (LS 295 Minimum Grade of D and LS 298 Minimum Grade of C).

RTH 466  TR Prog Des & Interventions II  3 cr
This course examines modalities and issues in therapeutic recreation practice with the primary emphasis on leisure education, scope of service, nature of populations served, systematic programming, activity analysis and documentation of results. The course also addresses contemporary problems and issues in therapeutic recreation, and acquiring knowledge of medical terminology and therapeutic drugs.
Pre-requisite: (LS 295 Minimum Grade of D and LS 298 Minimum Grade of C) or (RTH 295 Minimum Grade of D and RTH 298 Minimum Grade of C).

RTH 467  TR for Phys Disabilities  3 cr
This course will familiarize the student with the etiology, characteristics, and course of treatment provided to individuals with various physically disabling conditions, and promote awareness of the role of therapeutic recreation in the physical rehabilitation process. A field work component of 40 hours is required.

RTH 468  Facilitation Techniques in TR  3 cr
Study of the concepts and intervention techniques used in the application and process aspects of therapeutic recreation. Content includes evidence-based practice, planning and leading interventions, instructional techniques, counseling theory and practice, implementing groups, communication techniques, and facilitation techniques. A practical learning component is included.

RTH 469  TR for Pysch Impairments  3 cr
This course will familiarize students with etiology, characteristics, and course of treatment provided to individuals with psychological impairments and developmental disabilities and promote awareness of the role of therapeutic recreation in the habilitation/rehabilitation process. A field work component of 40 hours is required.

RTH 471  Evaluation & Research in HKS-W  3 cr
This course offers an overview of the research and evaluation process in health, kinesiology, and sport. The first part of the course will emphasize the scope, meaning, and basic concepts of scientific research including aspects of research design. The second part of the course will focus on the application of the basic skills in a practical context in the environment of health, kinesiology, and sport.

RTH 479  Leisure and Aging  3 cr
This course will provide an overview of the changes affecting the psychomotor, cognitive and affective domains of the aged; implications of leisure and retirement; and institutional and community settings that provide leisure services for the older adult.

RTH 490  Special Topics  3 cr
Selected topics in recreational therapy. Topics will vary according to needs and interests of students. Course may be repeated for credit when content varies.

RTH 492  Outdoor Ed and Interpretation  3 cr
Theories, philosophies, and principles of outdoor education with emphasis on the development of interpretive programs.

RTH 495  Internship in Rec Therapy  3 TO 12 cr
Supervised experiences in an assigned recreation therapy or related agency. HKS advisor approval required.

RTH 569  Leisure and Society  3 cr
An exploration of the economic, religious, political, and socio-cultural factors which influence leisure behavior in modern society.

RTH 570  Procedures in TR I  3 cr
Procedures in Therapeutic Recreation I was designed to prepare the graduate student for the more complex areas of present day professional issues and service provision including: an in-depth analysis of historical and philosophical influences, therapy and facilitation techniques, quality management, ethics, standards of practice, clinical supervision, healthcare reimbursement and professional credentialing.

RTH 571  Procedures In TR II  3 cr
This course is designed to familiarize the graduate student with the therapeutic recreation process. Content areas will include analysis of assessment procedures, sources and processes, treatment planning, interdisciplinary procedures, medical record documentation, activity-based interventions, and evaluation of program effectiveness.

RTH 573  Issues and Trends in TR  3 cr
An in-depth examination of current issues and trends in recreational therapy with respect to their impact on the profession and society.

RTH 576  Conceptual Foundations of TR  3 cr
Designed to introduce the student to the field of therapeutic recreation including philosophy, history, current issues and trends, administration and program development. The course will also provide an overview of various disabling conditions.

RTH 585  Mgmt in Recreational Therapy  3 cr
An in-depth examination into the research, foundations, and functions in the delivery of recreational therapy, including current practices in management of fiscal procedures, budgeting, and grants.
RTH 590  Special Topics  3 cr
A varying-content course treating various aspects of Leisure Studies. May be repeated for credit when course content varies.

RTH 592  Outdoor Rec - Adventure Prog  3 cr
Study and practicum in popular adventure activities (e.g., shooting sports, angling, backpacking, orienteering, rock climbing, canoeing). Emphasis on attitudes, skills, environmental awareness, teaching methodology, and principles of group leadership as they relate to adventuresome activities.

RTH 595  Internship in Recreational The  3 TO 9 cr
An individually planned practicum experience in an approved recreational therapy setting. Requires a minimum of 150 work hours per 3 hours of credit. HPELS advisor approval required.

RTH 596  Special Projects  3 cr
An individually planned experience whereby a student conceptualizes and researches a special problem relevant to the leisure services profession. Students will share their experiences in a weekly seminar (non-thesis option).

Rehab Sci Occup Therapy (RSO) (RSO)

RSO 510  Occupational Therapy Foundation  3 cr
This course is an introduction to the profession of occupational therapy including documents, terminology, professional behaviors, and occupational therapy settings and common interventions.

RSO 511  Human Motion and Movement Lab  2 cr
This course is a study of structures and functions of the human body with emphasis on biomedical functions.

RSO 512  Environmental Adapt and Rehab  3 cr
This course is an introduction to rehabilitation technological and environmental adaptations to increase, maintain, or improve functional capabilities of individuals with disabilities.

RSO 513  Neurological and Sensorimotor  4 cr
Occupational Therapy evaluation and intervention for person with selected developmental and acquired impairments and disabilities affecting self-care skills.

RSO 520  Rehabilitation  3 cr
Occupational Therapy evaluation and interventions for person with selected developmental and acquired impairments and disabilities.

RSO 521  Neurological and Sensorimotor  3 cr
This course will cover evidence-based OT evaluation and interventions for selected common pediatric conditions.

RSO 522  Biomedical Functions and Inter  3 cr
This course will provide instruction on common upper extremity conditions and interventions for persons with acquired impairments and disabilities that impact daily life skills, work, and IADLs. Emphasis will be placed on therapeutic interventions that emphasize problem-solving, critical reasoning, and occupational performance and include orthotic intervention strategies.

RSO 523  Rehabilitation and Aging Adult  3 cr
This course will explore the typical aging process, health promotion, and OT evaluation and evidence-based interventions for this population.

RSO 530  Evidence-Based Clinic Learning  3 cr
An introduction to critical analysis of scientific literature application of statistical methods and scholarly writing and presentation.

RSO 532  Psychosocial Occupational Ther  3 cr
This course will explore best practice evidence-based OT evaluation and interventions to address psychosocial needs of clients and populations. This course counts toward the Rehabilitation Sciences in Occupational Therapy Master’s Degree but does not count towards the Master of Science in Occupational Therapy degree.

Rehab Sci Speech Therapy (RST) (RST)

RST 521  Advanced Speech Science  3 cr
This survey course covers physical and acoustic properties of speech perception and speech production. Instrumental measurement and analysis of the physical and acoustic properties of speech perception and production will be addressed.

RST 535  Pediat Speech & Lang Disorders  3 cr
This survey course covers terminology, assessment and intervention for children from birth to age 21 years who present with spoken and written language disorders, including language impairment associated with other developmental disabilities, in particular, autism spectrum disorders. Additionally, one unit is speech therapy services for children and adults who present with fluency disorders/stuttering.

RST 540  Clinical Phonetics  2 cr
This course will study the dynamics of speech sound production, and provide the knowledge and skills for transcription and analysis of normal and disordered sound production.
RST 541  Ped Sp Sound Disorders  2 cr
Study of speech-sound production in children emphasizing disorders with organic (including cleft/resonance) and functional bases (i.e., phonological impairments) and childhood apraxia of speech. In addition to addressing the assessment and treatment of pediatric speech sound disorders, students acquire knowledge of speech perception, production, and typical acquisition for English speakers and crosslinguistically.

RST 551  Voice and Resonance Disorders  3 cr
This course focuses on the study of normal mechanisms, etiologies, pathologies, symptoms, diagnostic processes, and treatment methodologies associated with voice and resonance disorders across the lifespan.

RST 565  Neuromotor Disorders of Comm  3 cr
This course will address neuroanatomy and neurophysiology of structures responsible for speech production. Students will learn how to assess and manage motor speech disorders. This course counts toward the Rehabilitation Sciences in Speech-Language Pathology Master's degree but does not count toward the Master of Science in Speech-Language Pathology degree.

RST 566  Aphasia & Neuro Lang Disorders  3 cr
This course will provide the requisite knowledge for understanding, assessing, and treating language impairments associated with damage to the left or right hemisphere. Specifically, students will learn about the neural substrates for language; language assessment principles and procedures; and the nature and treatment of aphasia and right hemisphere disorders. This course counts toward the Rehabilitation Sciences in Speech-Language Pathology Master's degree but does not count toward the Master of Science in Speech-Language Pathology degree.

RST 567  Acq Cognitive Comm Disorders  2 cr
This course will provide the requisite knowledge for understanding, assessing, and treating cognitive-communication impairments in adults with acquired cognitive-communication disorders. Specifically, students will learn about the neural substrates for cognition; cognitive assessment principles and procedures; and the nature and treatment of disorders such as traumatic brain injury and dementia. This course counts toward the Rehabilitation Sciences in Speech-Language Pathology Master's degree but does not count toward the Master of Science in Speech-Language Pathology degree.

RST 568  Dysphagia  3 cr
This course will address healthy and disordered swallowing function across the lifespan. Students will learn anatomy and physiology of the swallow mechanism, how to assess swallowing function, and how to manage swallowing disorders. This course counts toward the Rehabilitation Sciences in Speech-Language Pathology Master's degree but does not count toward the Master of Science in Speech-Language Pathology degree.

RST 580  Clinical Methods & Observation  1 cr
TO 3 cr
Introduction to the clinical setting for persons interested in working with individuals with communication impairments but who will not be seeking ASHA certification. Instrumentation, procedures and approaches to assessment and intervention will be discussed. General guidelines for developing goals and treatment plans will be assessed through written documentation submission. Observation of clients with communication and swallowing disorders, both in the clinical setting and online is a primary part of this course.

RST 588  Audiology for Speech-Lang Path  3 cr
This interprofessional education (IPE) course will address the foundational knowledge and skills necessary for members of interprofessional healthcare teams working with individuals with communication disorders. Scope of practice, screenings across the life span, referrals, report literacy, and co-management of services to children and adults with a variety of communication disorders will be discussed.

 Religion (REL) (REL)

REL 100  Intro to the Study of Religion  3 cr
As a general introduction to the academic study of religion, REL 100 examines the function of religion in relation to human beliefs, social practices, and culture in general. The course surveys a broad number of important debates in the history of religious studies, such as the definition of religion, the insider/outsider problem, theories on the origins of religion, the comparison of religions, religion's psychological, sociological, and political functions, and the manner in which human communities authorize systems of behavior.

REL 200  Old Testament/Hebrew Bible  3 cr
An introduction or survey of the literature and social world of the Old Testament/Hebrew Bible. As a way of further illuminating these materials, attention will also be given to the history and religion of Israel as well as the other peoples of the ancient Near East. Fulfills the General Education Requirement.

REL 201  Survey of the New Testament  3 cr
This course is an introductory survey of the New Testament, including the life and ministry of Jesus Christ, apostolic history, related Greco-Roman history and archeology, principal critical issues, and the unity and diversity of New Testament theology. Fulfills the General Education Requirement.

REL 242  Western Philosophy: Medieval  3 cr
A survey of Medieval Western Latin, Jewish, and Islamic philosophers. Identical with PHL 242. Credit cannot be received for both REL 242 and PHL 242.

REL 290  Special Topics -  3 cr
Different themes and issues of significance in religion will be studied as announced.
REL 310 Classical Mythology 3 cr
Through the disciplines of English and Philosophy, this course will provide an introduction to myths and to the literature that recounts the myths, legends, and folktales of ancient Greece and Rome. This course will also look at how different writers treat the material and why their treatments vary. Cross-listed with EH 310, PHL 310 and CLA 310. Credit cannot be received for both REL 310 and either EH 310 or PHL 310 or CLA 310.
Pre-requisite: (ACT English 27 or SAT Critical Reading 610 or University - EH101 Exempt P or EH 101 Minimum Grade of C or EH 110 Minimum Grade of D or EH 190 Minimum Grade of D or USA 010 Minimum Grade of S) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

REL 331 History of England to 1603 3 cr
The history of England from the Roman occupation to the Age of Tudors. Identical with HY 331. Credit cannot be received for both REL 331 and HY 331.

REL 343 Witchcraft and Magic 3 cr
The history of beliefs and practices concerning witches, magic, and witch-hunting in Medieval and Early Modern Europe. Identical with HY 343. Credit cannot be received for both REL 343 and HY 343.

REL 347 The Holocaust 3 cr
The history of the systematic mass murder of Europe's Jews and other groups by Nazi Germany during World War II. Cross-listed with HY 347. Credit cannot be received for both REL 347 and HY 347.

REL 351 Philosophy of Religion - W 3 cr
Investigates the nature of religion, including religious experience, religious language, arguments for the existence of God, and the problem of evil. Identical with PHL 351. Credit cannot be received for both REL 351 and PHL 351. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

REL 352 World Religions 3 cr
This course is an introduction to the religions of the world. It is divided into three basic units: Indigenous Religions (of Africa, North America, and Oceania); Eastern Religions (Hinduism, Buddhism, Daoism, Confucianism, Jainism) and Western Religions (Judaism, Christianity, Islam). The emphasis is on grasping the core principles of each tradition, seeing the ways in which religion meets basic human needs, and religion as a cultural artifact that borrows, adapts, and changes over time. Course is identical with PHL 352 and SY 352. Credit cannot be received for both REL 352 and PHL 352 or SY 352.

REL 353 Reformation Europe 1300-1520 3 cr
The role of religious change in the 16th and 17th centuries. Identical with HY 353. Credit cannot be received for both REL 353 and HY 353.

REL 354 Philosophies of India 3 cr
Introduces the major religions and philosophies of India by way of the classical Realist/Antirealist debate in India. Study of the major religious doctrines of theist and non-dualist Vedanta, Buddhism, and Jainism, and their philosophical articulation in the Nyaya, Advaita Vedanta, Madhyamaka, and other schools. Identical with PHL 354. Credit cannot be received for both REL 354 and PHL 354.

REL 355 Chinese Philosophy 3 cr
Introduces the major classical religious and philosophical systems of China by way of an examination of early Confucianism, Mohism, Yangism, Legalism, Taoism, and Chinese Buddhism. Particular emphasis will be placed upon the role of these schools in the development of Chinese religion, morality, and political organization. Identical PHL 355. Credit cannot be received for both REL 355 and PHL 355.

REL 364 Islamic Civilization to 1453 3 cr
This course will cover the political, economic, social, and cultural history of Islamic Civilization from its beginnings in the Arabian Peninsula in the sixth century to the Ottoman conquest of Constantinople in 1453. Cross-listed with HY 364. Credit cannot be received for both REL 364 and HY 364.

REL 365 Islamic Civilization 1465 - W 3 cr
This course will cover specific topics in the history of Islamic civilization. Prerequisite: Junior or Senior status. Cross-listed with REL 365. Credit cannot be received for both HY 365 and REL 365.

REL 373 Religion in American History 3 cr
Examines the role of religion in United States history from the colonial era to the present. Identical with HY 373. Credit cannot be received for both REL 373 and HY 373. Pre-requisite: (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

REL 390 Special Topics - 3 cr
Different figures or topics of significance in religion will be studied as announced. May be repeated, when content varies, for a total of six hours.

REL 420 Sociology of Religions 3 cr
An analysis of religion as a social institution with emphasis on modern western societies. Topics include the functions of religion for society and individuals, changing patterns of religious belief and practice and the relationship between religion and other social institutions. Identical with SY 420. Credit cannot be received for both REL 420 and SY 420. Pre-requisite: SY 109 Minimum Grade of C.

REL 465 Studies of HY of Islamic Civ 3 cr
This course will cover specific topics in the history of Islamic civilization. May be repeated for credit when content varies. Prerequisite: Junior or Senior status. Cross-listed with HY 465. Credit cannot be received for both REL 465 and HY 465.
REL 492 Seminar - 3 cr
An investigation of issues and concepts in religion for advanced undergraduates and graduate students. May be repeated, when content varies, for a total of six hours.

REL 494 Directed Studies - 1 TO 3 cr
Directed research in religion under the guidance of a member of the department. Credit according to the magnitude of the individual project. May be repeated, if content varies, for a total of three hours. Prerequisites: Junior or senior standing and approval of directing professor and department chair.

REL 499 Honors Thesis - H - W 3 TO 6 cr
Extended research paper prepared under the direction of thesis advisor plus two-person committee selected by advisor in consultation with student. Prerequisites: The student must have developed a proposal for the thesis in consultation with the advisor, and received permission for the work from the committee. In addition, the student must be a senior major or minor, have completed the Common Core, and have at least a 3.3 GPA in the Religion Concentration of the Philosophy major. Credit for this course is only given as an addition to the hours required for the major.
Pre-requisite: (PHL 120 Minimum Grade of D and PHL 240 Minimum Grade of D and PHL 245 Minimum Grade of D and PHL 321 Minimum Grade of D and PHL 461 Minimum Grade of D) and (PHL 310 Minimum Grade of D or REL 310 or CLA 310 Minimum Grade of D).

SED 340 Fundamentals of Teaching - W 3 cr
Theory and practice of planning for instruction. Conducted as a system for individually guided mastery.

SED 341 Teaching Skills - W 3 cr
Study and practice of selected instructional skills and classroom management focusing on middle level education and the transition to secondary education. Prerequisites: Junior standing and admission to candidacy.
Pre-requisite: SED 340 Minimum Grade of C and (RED 351 Minimum Grade of C or RED 451 Minimum Grade of C) and (EPY 455 Minimum Grade of C or EPY 355 Minimum Grade of C) and (SED 453 Minimum Grade of C or SED 454 Minimum Grade of C or SED 456 Minimum Grade of C or SED 457 Minimum Grade of C). RED 351 and RED 451 and EPY 455 and EPY 355 and SED 453 and SED 454 and SED 456 and SED 457 can be taken concurrently with this course.

SED 342 Secondary Field Experience 1 cr
Supervised practice in teaching curriculum areas in middle and high school classroom settings during the semester in which block courses are taken.
Pre-requisite: SED 340 Minimum Grade of C.

SED 350 Intro to Teaching-Middle Sch 3 cr
A study of the concerns of pre-service middle school teachers, including program development, characteristics of the middlestudent learners, nature of student-oriented instruction, and facilitation of learning of exceptional youth within the regular learning groups. Prerequisite: Junior standing.

SED 453 Tch Lang Subj Sec Sch 3 cr
Assists the student in organizing materials and in developing methods of teaching language subjects in secondary schools. Offered in Fall Semester only. Prerequisites: Admission to candidacy, completion of two-thirds of teaching field(s), and SED 340 or SED 555.
Pre-requisite: SED 340 Minimum Grade of C or SED 555 Minimum Grade of B.

SED 454 Tch Math Secondary Schools 3 cr
Assists the student in organizing materials and in developing methods of teaching mathematics in secondary schools. Offered in Fall Semester only. Prerequisites: Admission to candidacy, completion of two-thirds of teaching field, and SED 340 or SED 555.
Pre-requisite: SED 340 Minimum Grade of C or SED 555 Minimum Grade of B.

SED 455 Tch Music in Secondary Sch 3 cr
Assists the student in organizing materials and in developing methods of teaching music in secondary schools. Offered in Fall Semester only. Prerequisites: Admission to candidacy, completion of two-thirds of teaching field, and SED 340 and 341 or SED 555 and 559.
Pre-requisite: SED 340 Minimum Grade of C and SED 341 Minimum Grade of C) or (SED 555 Minimum Grade of C) or (SED 559 Minimum Grade of C).
SED 456  Tch Science in Secondary Sch  3 cr
Assists the student in organizing materials and in developing methods of teaching science in secondary schools. Offered in the Fall Semester only. Prerequisites: Admission to candidacy, completion of two-thirds of teaching field, and SED 340 or SED 555. Pre-requisite: SED 340 Minimum Grade of C or SED 555 Minimum Grade of B.

SED 457  Tch Social Studies in Sec Sch  3 cr
Assists the student in organizing materials and in developing methods of teaching social studies in secondary schools. Offered in Fall Semester only. Prerequisites: Admission to candidacy, completion of two-thirds of teaching field, and SED 340 or SED 555. Pre-requisite: SED 340 Minimum Grade of C or SED 555 Minimum Grade of B.

SED 459  Creative Exper in Oral Lang  3 cr
Background in the theory and function of oral language, and techniques for developing oral and dramatic communicative skills. Emphasis will be on everyday oral language, rather than on formal speech or theater.

SED 463  Stu Tchg Middle School  9 TO 12 cr
Observation and supervised teaching in the middle schools with opportunity for study and discussion of the problems and issues encountered. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Prerequisite: Appropriate methods course

SED 464  Stu Tchg in High School -  9 TO 12 cr
Observation and supervised teaching in high schools with opportunity for study and discussion of the problems and issues encountered. Students will be placed with person holding a valid teaching certificate in the appropriate field. Pre-requisite: SED 340 Minimum Grade of C and SED 341 Minimum Grade of C and (SED 453 Minimum Grade of C or SED 454 Minimum Grade of C or SED 456 Minimum Grade of C or SED 457 Minimum Grade of C).

SED 465  Internship  3 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Prerequisite: Appropriate methods course.

SED 466  Stu Tchg Lang Arts in the HS  9 TO 12 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Prerequisites: Admission to candidacy, SED 340 and SED 341, appropriate methods course(s), completion of three-fourths of teaching field(s), and a PRAXIS II score of 151 or higher. Pre-requisite: PRAXIS-Eng Lang, Lit and Comp 151 and SED 340 Minimum Grade of C and SED 341 Minimum Grade of C and SED 453 Minimum Grade of C.

SED 467  Stu Tchg Soc Studies in the HS  9 TO 12 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Prerequisites: Admission to candidacy, SED 340 and SED 341, appropriate methods course(s), completion of three-fourths of teaching field(s), and a PRAXIS II score of 151 or higher. Pre-requisite: PRAXIS-Soc St Cont Knowledge 153 and SED 340 Minimum Grade of C and SED 341 Minimum Grade of C and SED 457 Minimum Grade of C.

SED 468  Student Tchg Science in the HS  9 TO 12 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Prerequisites: Admission to candidacy, SED 340 and SED 341, appropriate methods course(s), completion of three-fourths of teaching field(s), and a PRAXIS II score of 146 or higher. Pre-requisite: PRAXIS-Gen Sci Cont Knowledge 147 and SED 340 Minimum Grade of C and SED 341 Minimum Grade of C and SED 456 Minimum Grade of C.

SED 469  Student Tchg Math in the HS  9 TO 12 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Prerequisites: Admission to candidacy, SED 340 and SED 341, appropriate methods course(s), completion of three-fourths of teaching field(s), and a PRAXIS score of 118 or higher. Pre-requisite: PRAXIS-Math Cont Knowledge 126 and SED 340 Minimum Grade of C and SED 341 Minimum Grade of C and SED 454 Minimum Grade of C.

SED 470  Stu Tchg N-12 Program  9 TO 12 cr
Observation and supervised teaching with opportunity for study and discussion of problems and issues encountered in the N-12 program. Students will be placed with a person holding a valid teaching certificate in the appropriate field. Pre-requisite: PRAXIS-Math Cont Knowledge 126 and SED 340 Minimum Grade of C and SED 341 Minimum Grade of C and SED 454 Minimum Grade of C.

SED 471  Special Topics  3 cr
Current topics of special concern to secondary educators. Not more than 6 hours may be earned in Special Topics courses.

SED 490  Dir St -  1 TO 3 cr
Directed study. No more than 6 hours can be accepted for a Bachelor's Degree and Class B Certificate. Prerequisites: Permission of department chair.
SED 499 Senior Honors Project - H 3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project, relevant to the field of secondary study, that will lead to a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three faculty chaired by the honors mentor. This course is required for Honors recognition and may be repeated for up to 6 credit hours. Prerequisite: Participant in honors program and junior level status.

SED 529 Grad Field Experience 0 TO 3 cr
Supervised practice in teaching curriculum areas in middle and high school classroom settings during the semester in which the corresponding methods course is taken. Pre-requisite: (AED 540 Minimum Grade of C or ELT 530 Minimum Grade of C or SED 553 Minimum Grade of C or SED 554 Minimum Grade of C or SED 556 Minimum Grade of C or SED 557 Minimum Grade of C or SED 558 Minimum Grade of C). AED 540 and ELT 530 and SED 553 and SED 554 and SED 556 and SED 557 and SED 565 can be taken concurrently with this course.

SED 544 Guiding Lrng in the Sec School 3 cr
Study of methods and techniques of teaching in the secondary schools. Assists students in organizing materials, developing strategies for teaching their discipline area in secondary school. Includes field experience.

SED 547 Tchg Basic Writing Skills 3 cr
Background in theories of the writing process and techniques to help students develop writing skills. The main emphasis will be on teaching the process of writing: evaluation of writing and the issue of non-standard English will also be considered.

SED 551 The Secondary School Student 3 cr
Study of the physical, mental, and social development of students at secondary school age levels. The objectives and procedures of American secondary education are related to the development of adolescents in our culture. Included are the level of significance of specific individual differences among students in the various fields, the relationship of student self-concept to learning, students study through use of records, a variety of diagnostic materials, and group study projects.

SED 552 The High School Curriculum 3 cr
The study of the purpose of American secondary education and how these are reflected in the school curriculum. Curriculum organization, professional roles in curriculum development, and forces shaping the curriculum today are examined.

SED 553 Tchg Lang Subj in Sec School 3 cr
Assists students in organizing materials and developing methods of teaching language subjects in secondary schools. Includes field component. Pre-requisite: SED 555 Minimum Grade of B.

SED 554 Tchg Math in Sec Schools 3 cr
Assists students in organizing materials and developing methods of teaching mathematics in secondary schools. Includes field component. Pre-requisite: SED 555 Minimum Grade of B.

SED 555 Curriculum-Tchg in Sec School 3 cr
This course provides an introduction to effective instructional practices in the secondary classroom. The focus is on planning for instruction and classroom management. This course has both required class meetings and field experiences.

SED 556 Tchg Science in Sec Schools 3 cr
Assists students in organizing materials and developing methods of teaching science in secondary schools. Includes field component. Pre-requisite: SED 555 Minimum Grade of B.

SED 557 Tchg SS in Secondary Schools 3 cr
Assists students in organizing materials and developing methods of teaching social studies in secondary schools. Includes field component. Pre-requisite: SED 555 Minimum Grade of B.

SED 558 The Middle School Curriculum 3 cr
A study of the Middle School program in light of the characteristics and educational needs of youth in early adolescence.

SED 559 Adv Teaching Techniques 3 cr
Study and practice of selected instructional strategies and classroom management for middle level education and secondary education.

SED 560 Graduate Research Seminar 3 cr
Research in problems confronting American secondary education. Selected topics are explored by students which provide the basis for seminar discussions. A seminar paper is presented by each student. This course also includes a field-based practicum. Prerequisite: Permission of the department chair. Pre-requisite: IDE 510 Minimum Grade of C.

SED 561 Trends-Prac Tchg Lang Sec 3 cr
Current trends and practices in curriculum, instruction, selection of materials, and derivation of procedures for guiding learning in reading, listening, writing, and speaking.

SED 562 Trends-Prac Tchg Soc St 3 cr
Current trends and practices in organizing and teaching social studies in the secondary school. The selection and use of content, materials, methods, and the development and appraisal of typical units are emphasized.

SED 563 Trends-Prac Tchg Math Sec 3 cr
Current curriculum trends in teaching mathematics. Included are the selection of materials and a study of methods appropriate for teaching mathematics in the secondary school.
SED 564  Trends-Prac Tchg Science  3 cr
Current curriculum trends in teaching science in the
secondary school. Included are the selection of materials
and an evaluation of those methods which are appropriate
for teaching the biological and physical sciences.

SED 565  Trends - Prac Tchg Foreign Lan  3 cr
Current trends and practices in curriculum, instruction,
selection of materials, and derivation of procedures for
guiding learning in reading, listening, writing, and speaking
in Foreign Languages.
Pre-requisite: SED 555 Minimum Grade of B.

SED 567  Multicultural Exper Sec School  3 cr
In an increasingly diverse society, teachers must be able
to work with students from a variety of backgrounds, some
quite different from teachers' own cultural backgrounds. This
course responds to the growing need for better training for
teachers in how to work with a diverse population, increase
academic achievement, and prepare students for a global
workplace.

SED 590  Sp Top -  3 cr
Current topics of special concern to secondary educators. A
different topic will be used each time the course is offered.
No more than 6 hours may be applied toward a degree
program.

SED 593  Intern in Sec Educ Forgn Lan  3 TO 6 cr
The internship is a supervised learning experience in a work
setting similar to that in which an educator will eventually
be employed. The internship provides the student with an
opportunity to apply the theories and concepts learned
during the graduate secondary foreign language program.
Not more than six hours may be taken. Prerequisite: An
acceptable PRAXIS II test score.
Pre-requisite: EDU 453 Minimum Grade of C and SED
555 Minimum Grade of C and SED 559 Minimum Grade of
C and SED 556 Minimum Grade of B or PRAXIS-French
World Language 162 or PRAXIS-German World Language
163 or PRAXIS-Spanish World Language 168 .

SED 594  Dir St - Research  1 TO 3 cr
Students explore through directed study problems and
issues of special interest or significance in secondary
education. No more than 3 hours of any departmental 594
courses can be applied toward degree program. Requires
permission of department chair.

SED 595  Intern in Sec Edu Lang Arts  3 OR 6 cr
The internship is a supervised learning experience in a work
setting similar to that in which an educator will eventually
be employed. The internship provides the student with an
opportunity to apply the theories and concepts learned
during the graduate secondary language arts program. Not
more than 6 hours may be taken. Prerequisite: PRAXIS II
test score of 151 or higher.
Pre-requisite: (EDU 453 Minimum Grade of C or SED 553
Minimum Grade of B) and SED 555 Minimum Grade of C
and SED 559 Minimum Grade of C and PRAXIS-Eng Lang
Arts-Cont Know 167 .

SED 596  Intern in Sec Edu Soc Studies  3 OR 6 cr
The internship is a supervised learning experience in a work
setting similar to that in which an educator will eventually
be employed. The internship provides the student with an
opportunity to apply the theories and concepts learned
during the graduate secondary social studies program. Not
more than six hours may be taken. Prerequisite: PRAXIS II
test score of 151 or higher.
Pre-requisite: (EDU 457 Minimum Grade of C or SED 557
Minimum Grade of B) and SED 555 Minimum Grade of C
and SED 559 Minimum Grade of C and (PRAXIS-Soc St
Cont Knowledge 155 or PRAXIS-Soc Stud Cont Knowledge
155 ).

SED 597  Intern in Sec Educ Science  3 TO 6 cr
The internship is a supervised learning experience in a work
setting similar to that in which an educator will eventually
be employed. The internship provides the student with an
opportunity to apply the theories and concepts learned
during the graduate secondary science program. Not more
than six hours may be taken. Prerequisite: PRAXIS II test
score of 146 or higher.
Pre-requisite: (PRAXIS-Gen Sci Cont Knowledge 152 or
PRAXIS-Gen Science Cont Knowl 152 ) and (EDU 456
Minimum Grade of C or SED 556 Minimum Grade of B)
and SED 555 Minimum Grade of C and SED 559 Minimum
Grade of C.

SED 598  Intern in Sec Educ Math  3 TO 6 cr
The internship is a supervised learning experience in a work
setting similar to that in which an educator will eventually
be employed. The internship provides the student with an
opportunity to apply the theories and concepts learned
during the graduate secondary math program. Not more
than six hours may be taken. Prerequisite: PRAXIS II test
score of 118 or higher.
Pre-requisite: (EDU 454 Minimum Grade of C or SED 554
Minimum Grade of B) and SED 555 Minimum Grade of C
and SED 559 Minimum Grade of C and PRAXIS-Math Cont
Knowledge 160 .

SED 599  Thesis  1 TO 9 cr
A student selects a project, study, or investigation in
secondary education related to his area of specialization.
The project forms a basis for the thesis. The thesis
committee will give guidance during the investigation and
during the writing of the thesis.

SED 699  Research Project  1 TO 3 cr
The culminating experience which the candidate must
synthesize and apply the various program components
in a selected instructional setting. The student completes
a research project in a public school setting under the
guidance of a department faculty committee. May be taken
more than one semester. Prerequisite: Permission of the
department chair.
Pre-requisite: IDE 692 Minimum Grade of B or EDU 692
Minimum Grade of B.
Social Work (SW) (SW)

SW 200  Intro to SocWork-SocWelfare  3 cr
Introduction to the profession of social work. Topics include historical development, nature of profession, professional associations, practice theory, values and ethics.

SW 201  Human Behav/Social Environ I  3 cr
The Person-In-Environment model of human behavior. Course examines individual, family and group behavior in the social context.
Pre-requisite: (BLY 101 Minimum Grade of C and BLY 101L Minimum Grade of C) or (BLY 121 Minimum Grade of C and BLY 121L Minimum Grade of C).

SW 214  SW Skills and Field Experience  3 cr
Service learning experience in social work. Forty hours of agency-based experience is required. Students must attend two hour weekly skills development lecture.
Pre-requisite: SY 109 Minimum Grade of C or SY 112 Minimum Grade of C.

SW 220  Power, Privilege & Oppression  3 cr
This course is designed as an introduction to the field of social work with diverse populations. The purpose is to prepare students to work with diverse groups of people locally and globally. This course examines issues related to the creation of race in America, the oppression of people on the basis of their gender, ethnicity, race, culture, sexual orientation, physical or mental ability, age, religion and national origin.

SW 300  Ethical Decision-Making-W  3 cr
This course provides a more in-depth analysis of the Social Work Code of Ethics and overviews frameworks for ethical decision-making. The emphasis is on improving students' ability to more readily identify ethical problems and thoughtfully work through these issues through the use of case studies.
Pre-requisite: EH 101 Minimum Grade of C or EH 102 Minimum Grade of C.

SW 301  Social Welfare Policy  3 cr
Social Policy in relation to Social Work Practice. Course addresses social policy analysis, social advocacy, diversity and social and economic justice.

SW 302  Human Behav/Social Environ II  3 cr
The Person-In-Environment Model of human behavior. Course examines task groups, organizations, and community systems in the social context.
Pre-requisite: SY 109 Minimum Grade of C.

SW 310  Community Context  3 cr
The rural and urban contexts of social work practice. Emphasis of the course is placed on how these contexts affect human behavior and the practice of social work.

SW 340  Family Violence  3 cr
Study of the social problems of family violence including domestic violence, intimate partner violence, child abuse, and elder abuse. The role of the social worker, social services, and social policy will be examined.
Pre-requisite: SY 109 Minimum Grade of C.

SW 350  Child Welfare Services  3 cr
General survey of the Social Work field of child welfare services with a focus on child protective services.

SW 360  SW Practice in Mental Health  3 cr
This course is designed to provide the student with an overview of the mental health system and focuses specifically on issues related to the role of a social worker in a mental health setting.
Pre-requisite: SW 200 Minimum Grade of C.

SW 380  International SW Practice  3 cr
This course explores social work as an international profession and the application of social work practice methods with various populations around the world. Students will learn cross-cultural practice methods and apply conceptual frameworks, such as those based on human rights, social development, and sustainable development, to a range of global social problems.

SW 401  Generalist Practice I  3 cr
The Generalist Model of social work applied to individuals, families, and groups. Emphasis is placed on diversity, social work values and ethics, and evidence based practice.
Pre-requisite: (SW 302 Minimum Grade of C or SW 202 Minimum Grade of C). SW 302 can be taken concurrently with this course.

SW 402  Generalist Practice II  3 cr
The Generalist Model of social work applied to organizations, communities and task groups. Emphasis is placed on diversity, social work values and ethics and social justice.

SW 412  Field Instruction  3 TO 12 cr
Field Instruction in social work. Four hundred thirty-six hours of supervised experience in social work setting. SW 412 can be taken during a single semester or over multiple semesters.
Co-requisite: SW 414
Pre-requisite: SW 401 Minimum Grade of C and SW 402 Minimum Grade of C and SY 382 Minimum Grade of C.

SW 414  Senior Seminar - W  3 cr
This is the capstone senior level course in social work. Class discussion and assignments are designed to facilitate integration between field instruction experience and curriculum content. SW 412 must be taken concurrently.
Fee.
Co-requisite: SW 412
Pre-requisite: SW 401 Minimum Grade of C and SW 402 Minimum Grade of C.

</tbody>
</table>
SY 350  Evolutionary Sociology  3 cr
This course considers social behavior and social phenomena as manifestations of the observable properties of the organisms that make up societies (i.e. ‘human nature’). The core of the course will involve constructing a brief but sound model of human behavior and then seeing how well that model can help explain a spectrum of behavior and phenomena. In addition, we will consider different religious, cultural, and scientific views on human nature, as well as some of the classic philosophical debates (e.g. nature/nurture) that revolve around questions of human nature.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 352  World Religions  3 cr
This course is an introduction to the religions of the world. It is divided into three basic units: Indigenous Religions (of Africa, North America, and Oceania); Eastern Religions (Hinduism, Buddhism, Daoism, Confucianism, Jainism) and Western Religions (Judaism, Christianity, Islam).
The emphasis is on grasping the core principles of each tradition, seeing the ways in which religion meets basic human needs, and religion as a cultural artifact that borrows, adapts, and changes over time. Course is identical with PHL 352 and REL 352. Credit cannot be received for both SY 352 and PHL 352 or REL 352.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 350  Evolutionary Sociology  3 cr
SY 352  World Religions  3 cr
SY 360  Soc of Work and Occupations  3 cr
Examines work, occupations and careers in modern societies. Course topics include: the evolution of work, the meaning of work, the demography of work, unions, jobs, occupations, professions, industries, classes, unions, technology and alienation, labor market segmentation, nonstandard and contingent work, work and the family, work and economic inequality, job satisfaction and organizational commitment.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 372  Social Gerontology - W  3 cr
Sociological aspects of aging in contemporary American society. Within its parameters are related problems of economics, health, and social contacts.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 381  Research Methods  3 cr
The goal of this course is to provide you with a foundation in social science research methods. The course will cover basic concepts used in social science research, sampling, survey instrument construction, observational and experimental research designs, and qualitative research. In addition to providing you with a foundation in research methods, SY 381 and SY 382 will give you the computing skills needed to create and analyze quantitative data using SPSS and EXCEL.
Pre-requisite: SY 109 Minimum Grade of D.

SY 382  Research Analysis  3 cr
This course, along with SY 381, provides a foundation in social research methods and statistics. In this course you will develop a mastery of descriptive and inferential statistics, basic probability theory, and significance testing. The computer lab portion of this course will continue to build upon the research and skills you acquired in SY 381.
Pre-requisite: SY 109 Minimum Grade of D.

SY 390  Special Topics  1 TO 6 cr
Special topics courses are classes that are not part of the sociology curriculum, and so may be offered irregularly, or even only once, but for which students receive credit as a junior-level (upper division) elective.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 394  Directed Studies  1 TO 3 cr
Field or library pursuits through which special interests or needs of the student may be pursued on an individual, supervised, or tutorial basis. No more than six hours may be used in the degree. Arrangements must be made with the instructor prior to registration. Requires permission of Department Chair.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 401  Disasters and Society  3 cr
The Sociological examination of natural, technological, and human-initiated disasters. The social impacts of disasters will be reviewed through case-studies of major twenty-first century catastrophes and issues of community vulnerability, resiliency and recovery will be addressed.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 406  Sociological Theory  3 cr
An exploration of the role of theorizing, with introduction and application to major paradigms of social explanation from the 18th Century to today.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.
SY 407  Social Research Design  
This course provides an introduction to sociological and social science methodology, including epistemology, research ethics, observational and experimental designs, survey and qualitative methods of data collection, comparative and historical research, and program evaluation.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 409  Social Research Analysis  
This course provides instruction in quantitative analysis in sociological and social science research. It provides instruction in basic and inferential statistics including, descriptive statistics, probability, confidence intervals, one and two sample significance tests, Chi Square tests of independence, and an introduction to bivariate linear models. The course also provides computer instruction in the use of SPSS software.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 411  Population - W  
An introduction to the study of human populations: population growth and decline; fertility, mortality, and migration; characteristics of populations; population, food and economic development; demographic analysis; population policies.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 412  Applied Sociology - W  
A survey of the specialties and techniques of professional sociologists, including the kinds of social problems and how these problems are addressed.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 415  Soc of Mental Health-Illness  
A sociological analysis of mental health and illness including social epidemiology, effects of social integration and support, labeling mechanisms, social evolution of treatment systems, and cultural factors in the recognition and diagnosis of disorders.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 418  Adv Family Studies  
This course examines interaction patterns in different types of family structure, with emphasis on marital adjustment, parent-child interaction, and sibling interactions.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 420  Sociology of Religion  
The study of religion is at or near the core of sociology. This course is an exploration of the sociological dimensions of religion within the classical theoretical traditions of Durkheim, Weber and Marx, augmented with more recent theory and research. We consider the definition, functions and origins of religion, the role of beliefs and rituals in it, the interaction of religion with other aspects of society, and secularization of the future of religion, among other topics.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 421  Social Stratification - W  
This course introduces students to the patterns and processes of inequality in its major forms. It includes discussions of social class, sex, race, ethnicity, and policy. Additionally, this course satisfies the University's writing requirement. As such, students will acquire knowledge through writing assignments and will demonstrate mastery of new information in written form.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 426  Social and Cultural Change  
This course is designed to familiarize students with major theories and processes of social and cultural change, the factors influencing social and cultural change, diffusion of innovations, and adoption of new ideas and practices.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 428  Gender and Society  
Description and analysis of gender roles and inequality in contemporary Western societies in cross-cultural and historical context.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 430  Sociology of Culture  
Examines the major perspectives in the sociology of culture, with emphasis on the problems of culture in modern and post-modern societies.  
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.
SY 435 Health Disparities Life Span 3 cr
This course examines differences in health status across the life span. The course will focus heavily on racial/ethnic and socioeconomic disparities in health applying a social determinants' of health framework. Issues that will be considered include how income, education, neighborhood conditions, access to health care, and other community factors shape opportunities to be healthy. The course is cross-listed as SY 435 and GRN 435 and has been approved as an elective for the Undergraduate Certificate in Gerontology and the interdisciplinary minor in Gerontology. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 440 Deviance and Social Control 3 cr
The study of societal norms and their violation. Focus on social construction, control, condemnation and accommodation of deviant behavior. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 445 Majority-Minority Relations-W 3 cr
The study of relationships between 'majorities' and 'minorities' in society. This course will explore the macro-social forces that bring these relationships about and the institutional setting where different group members come into contact with each other. A variety of key concepts and theories surrounding majority and minority relations will be defined and analyzed. Historical and current case studies will be examined to illustrate the development of these relations. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 455 Self and Certainty 3 cr
This course explores the complex relationship between the individual and the groups they are a part of, with a special emphasis on the challenges of identity and knowledge in modern society. Draws primarily upon the work of classical social psychologists like Mead, Berger & Luckman, Foggman and Simmel, as well as modern extensions of their work. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 458 Crowds Riots Soc Movements - W 3 cr
A survey of the theoretical and historical foundations of collective behavior, riots, and social movements. A variety of situations and behaviors will be analyzed including social movement participation; growth and organization; strategies, tactics, and consequences for participants and society. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 459 Medicine and Society 3 cr
The sociological study of medical care, with topics ranging from the micropolitics of doctor-patient communication through macro-level investigation of comparative health care systems. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 460 Social Organization - W 3 cr
This course provides the student with a comprehensive behavioral science approach to understanding modern social organizational trends. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 467 Environmental Sociology 3 cr
This course will cover topics such as public awareness and the social construction of environmental issues, especially acid rain, biodiversity, biotechnology and technological disasters. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 472 Sociology of Aging and Family 3 cr
The class focuses on sociological theories of family and aging and the linkages of families and their aging members with organizations that deliver services, including: government agencies, healthcare organizations, legal services, corporations/businesses, and religious organizations. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 475 Dev of Sociological Theory 3 cr
The development of theories in sociology, as related to social thought, institutions, and theories of social progress. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 490 Special Topics 1 TO 3 cr
A sociological examination of advanced topics. This course may be taken for a maximum of 9 hours credit when the subject matter varies. Prerequisite: Upper division status. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 492 Seminar - W - 3 cr
Selected topics in sociology for students with junior or senior standing. Note: SY 492 is not intended for graduate students. Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.
SY 494 Directed Studies 1 TO 3 cr
Designing a study, carrying out the research, and writing the result of a thesis. No more than six hours credit may be applied to major. Prerequisites: Requires upper division status and permission of department chair.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 496 Sociology Internship 3 TO 6 cr
Provides an opportunity to combine academic principles with practical experience in an agency dealing with human relationships. Specifics of the assignment result from a mutual agreement among student, faculty supervisor and agency. Course may be repeated for a maximum of six hours of credit. The 3-hour internship requires 100 contact hours: the 6-hour internship requires 200 contact hours. Requires permission of Faculty Supervisor and Department Chair. Fee.
Pre-requisite: SY 109 Minimum Grade of D or SY 112 Minimum Grade of D. SY 109 and SY 112 can be taken concurrently with this course.

SY 500 Orientation 1 TO 3 cr
Introduces students to graduate study in sociology by providing information about applicable academic degrees, career opportunities, and professional activities in the discipline.

SY 501 Disasters and Society 3 cr
The sociological examination of natural, technological, and human-initiated disasters. The social impacts of disasters will be reviewed through the case-studies of major twenty-first century catastrophes and issues of community vulnerability, resiliency, and recovery will be addressed.

SY 505 Adv Principles of Sociology 3 cr
Systematic review and integration of major propositions, concepts, and research data from various fields of sociology. Development of a comprehensive orientation for the description and explanation of social phenomena.

SY 506 Sociological Theory 3 cr
An exploration of the role of theorizing, with introduction and application to major paradigms of social explanation from the 18th Century to today.
Pre-requisite: SY 109 Minimum Grade of C.

SY 507 Social Research Design 3 cr
Advanced treatment of topics in sociological methodology, including: logic of scientific explanation; experimental, quasi-experimental, survey and qualitative research designs; and research ethics.

SY 508 Social Research Analysis 3 cr
This is an applied course in the application of data analysis and statistical methods in social research. The course covers basic regression models with limited and categorical independent variables. It assumes knowledge of basic and inferential statistics. The course includes weekly instruction in data analysis and statistical computer use. This course is usually taught in the Spring semester.

SY 510 Qualitative Inquiry 3 cr
This course introduces students to methods of qualitative inquiry in sociology, focusing on ethnography and participant observation.

SY 511 Introduction to Population 3 cr
An introduction to the study of human populations: population growth and decline, fertility, mortality and migration: characteristics of populations: population, food and economic development: demographic analysis: population policies. Students will be able to substantively analyze in any discussion of past and future population problems and its related factors that affect different societies.

SY 512 Applied Sociology 3 cr
A survey of the specialties and techniques of professional sociologists and the conditions under which sociological knowledge is applied to social problems, the kinds of problems addressed, and the degree of effectiveness of applications. A variety of methods will be discussed including social impact analysis, program evaluation, needs assessment, and social indicators. Requires SY 508 and SY 509 or instructor's permission.
Pre-requisite: SY 508 Minimum Grade of B and SY 509 Minimum Grade of B.

SY 515 Soc of Ment Health and Illness 3 cr
A sociological analysis of mental health and illness including social epidemiology, effects of social integration and support, labeling mechanisms, social evolution of treatment systems, and cultural factors in the recognition and diagnosis of disorders.

SY 518 Advanced Family Studies 3 cr
This course examines interaction patterns in different types of family structure, with emphasis on marital adjustment, parent-child interaction, and sibling interactions.

SY 520 Sociology of Religion 3 cr
An analysis of religion as a social institution with emphasis on modern western societies. Topics include the function of religion for societies and individuals, changing patterns of religious belief and practice, and the relationship between religion and other social institutions.

SY 521 Poverty, Inequal/Social Stat 3 cr
A sociological approach to the study of class, status, power and poverty with a particular emphasis on American society. Students will present material in the classroom and conduct an advanced research project in the area of social inequality.
SY 523  Aging in American Society  3 cr
The role of the elderly in today's society, problems, adaptability, crises, functions. Comparisons with youth and working adults. Survey of social programs and resources in formal and informal support networks.

SY 528  Gender and Society  3 cr
Description and analysis of gender roles and inequality in contemporary Western societies in cross-cultural and historical context.

SY 530  Sociology of Culture  3 cr
This course will introduce students to the major perspectives in the field of the sociology of culture. Particular attention will be given to each perspective's diagnosis of the problems of culture in modern and postmodern capitalist societies.

SY 535  Health Disparities Life Span  3 cr
The main purpose of this seminar is to provide students with an understanding of how social factors contribute to racial/ethnic, socioeconomic and gender disparities in health and health care. We will examine how dyadic relationships such as interpersonal forms of discrimination, marriage, and social ties may contribute to health disparities. We will also examine the ways in which neighborhood and community context, as well as inequalities in socioeconomic status materially shape health and access to health care services. The course is cross-listed as SY 535 and GRN 435/535 and has been approved as an elective for the Undergraduate/Graduate Certificate in Gerontology and the interdisciplinary minor in Gerontology.

SY 540  Deviance and Social Control-  3 cr
Deviance includes acts that violate norms. Social control is the groups' efforts to induce people to conform to these norms. This course includes discussions of what actually is deviance, how things become deviant, and how sociologists explain deviance. Several weeks are devoted to talking about specific forms of deviance, ranging from alcohol and drugs to mental illness. The last part of the course is spent discussing elite deviance.

SY 547  Sociology of Law  3 cr
Overview of predominant theoretical approaches, classical and contemporary in legal sociology, and their application in empirical studies engaging legal phenomena.

SY 550  The Community  3 cr
An advanced consideration of the concept of community.

SY 555  Self and Certainty  3 cr
This course explores the complicated relationship between individuals and the groups they are part of, with a special emphasis on the challenges of identity and knowledge in modern society. Draws primarily upon the work of classical social psychologists like Mead, Berger, Luckmann, Foggman and Simmel as well as modern extensions of their work.

SY 559  Medicine and Society  3 cr
The sociological study of medical care, with topics ranging from the micropolitics of doctor-patient communication through macro-level investigation of comparative health care systems. Explores extant research methods and theories of medical sociology to prepare graduate students to do sociological research in health care settings.

SY 567  Environmental Sociology  3 cr
This course will cover topics such as public awareness and the social construction of environmental issues, especially acid rain, biodiversity, biotechnology, and technological disasters.

SY 572  Sociology of Aging-Family  3 cr
The class focuses on sociological theories of family and aging, and the linkages of families and their aging members with organizations that deliver medical and social services, with government bureaucracies, the legal system, corporations and businesses, and religious organizations.

SY 590  Sp Top -  3 cr
Selected topics in graduate sociology. Course may be repeated for different topics.

SY 591  Papers & Presentations Seminar 1 TO 2 cr
A self-directed studies course, guided by graduate faculty mentors, to develop and enhance the career and scholarly interests, and professional socialization, of advanced master's students through written work and presentation opportunities. Pre-requisite: MASY Comprehensive Exam Score P

SY 592  MA Practicum Report Proposal  3 cr
Based on student work in a local agency (in conjunction with course co-requisite SY 596, Sociology Internship) to generate a practicum report proposal (directed by a member of the sociology graduate faculty) that the student must formally defend. Pre-requisite: SY 596. SY 596 can be taken concurrently with this course.

SY 593  Master's Practicum Report  3 cr
Course in which students prepare and defend a formal report based on work in course pre-requisite SY 596 and SY 592. Pre-requisite: SY 596 Minimum Grade of B and SY 592 Minimum Grade of B. SY 596 can be taken concurrently with this course.

SY 594  Directed Studies -  1 TO 3 cr
Field or library projects through which special interests of the student may be pursued on a tutorial basis with a graduate faculty member. Arrangements must be made with the professor prior to registration. Permission of the Department Chair is required.

SY 595  SY Research Apprenticeship  1 TO 3 cr
Students pursue research-related interests as directed by, and with prior approval from, a member of the graduate faculty.
SY 596  Sociology Internship  3 TO 6 cr
Relates the student's classroom studies to occupational and professional experiences in an approved community agency that culminates with a written report. Requires permission of the Graduate Coordinator and Department Chair as well as proof of insurance. The 3 hour internship requires 100 contact hours; the 6 hour internship requires 200 contact hours.

SY 597  Sociology Teaching Apprentice  1 TO 3 cr
The student will work directly with a member of the Sociology faculty to learn pedagogy, innovation in teaching, and course content that will equip the student for future teaching assignments.

SY 598  Master's Thesis Proposal  3 cr
Focused on a specialized subject area of research interest in sociology (directed by a member of the sociology graduate faculty) to generate a thesis proposal that the student must formally defend.

SY 599  Master's Thesis  1 TO 6 cr
Focused on a specialized subject area of research interest in sociology to generate a master's-level thesis that the student must formally defend. (Pre-requisite: SY 598, Master's Thesis Proposal). Pre-requisite: SY 598 Minimum Grade of B.

Special Education (SPE) (SPE)

SPE 200  Field Exp in SPE Settings  1 cr
A series of in-field opportunities for students in Special Education. A variety of appropriate placements will be employed depending on each student's interest and needs. May be repeated for credit.

SPE 201  Field Exp in Sp Ed Setting  1 cr
A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 312.

SPE 202  Field Exp in Sp Ed Setting  1 cr
A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 410. Co-requisite: SPE 410

SPE 203  Field Exp in Sp Ed Setting  1 cr
A series of in-field opportunities in special education. A variety of appropriate placements will be employed depending on each student's interests and needs. To be taken with SPE 410. Co-requisite: SPE 410

SPE 205  Init Field Exp in SPE Setting  1 cr
An in-field opportunity for early field-based practicum in a variety of placements. To be taken with SPE 400 by Special Education majors.

SPE 311  Intro to Partnerships in SPE  3 cr
Emphasis is on the special problems found in the home, community, and school of the exceptional child, the teacher, the family, and community resource agencies. Ways for the teacher to form teamships to work collaboratively with all human resources involved in the child's life are explored and ethical and moral standards examined.

SPE 312  Intellect and Phys Disabs  3 cr
A study of the intellectual and physical disability which usually require substantial curriculum adaptations or ecological accommodation. Historical perspectives, etiology, definitions, classification, treatment, social aspects and interdisciplinary team work will be explored. Co-requisite: SPE 201

SPE 313  Lrng and Behavr Disordrs  3 cr
An examination of the definitions, characteristics, and prevalence of children with learning and/or behavioral disabilities. Emphasis is placed on the causes of problems in motor, perceptual, social, academic, affective, and behavioral development. Students will be introduced to current service delivery models and the programming options for individuals with learning and behavioral disabilities.

SPE 342  Dev-Tchg Ecological Curriculum  3 cr
An ecological systems view which emphasizes curricular design as a multisystem interaction involving the individual, family, school, occupational setting, and society.

SPE 362  Behav Mgt of Except Child - W  3 cr
Presentation of the principles and applications of behavioral modification, data collection procedures, and single-subject research designs as related to exceptional children and youth in special education environments. Pre-requisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C.

SPE 363  Tch Adpt Curr Spec Nds Lrrr  3 cr
An examination of regular and special education K-12 curricula, materials, and procedures. Specific emphasis will be placed on the selection modification, and adaptation of curricula, materials, and procedures to meet the needs of individuals with learning and behavioral disabilities. Pre-requisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C.

SPE 373  Teaching Reading to Stu Dis  3 cr
Introduces the student to the curriculum, teaching the methodologies and instructional activities and materials associated with effective and appropriate developmental and functional reading instruction for students with disabilities. Pre-requisite: SPE 313 Minimum Grade of C and SPE 342 Minimum Grade of C and SPE 454 Minimum Grade of C.
SPE 400  Edu for Except Child and Youth  3 cr
Introduction to the field of exceptional children and youth, involving
the study of various areas of exceptionality.

SPE 410  Formal-Informal Assessment  3 cr
Assesses developmental levels, academic, and non-
academic performance of exceptional individual
through the administration and interpretation of criterion
referenced, formal and informal measures. Evaluation of
classroom teaching and special education programs is also
emphasized.
Co-requisite: SPE 202, SPE 203
Pre-requisite: SPE 313 Minimum Grade of C and SPE 342
Minimum Grade of C and SPE 454 Minimum Grade of C.

SPE 432  Impact Typ and Atyp Dev on Edu  3 cr
An examination of typical child development and
developmental characteristics of infants, toddlers, and
young children with disabilities from the prenatal period
through age 8. Characteristics of disabling conditions and
their impact upon development are also discussed.

SPE 433  Iss in Edu Young Child W-Dis  3 cr
This course prepares students to work with infants, toddlers,
and young children with disabilities and their families.
Topics covered include specific teaching and intervention
techniques, special education laws and regulations, and
service delivery models.

SPE 443  Voc Ed-Career Dev Dis Indiv  3 cr
Issues and practices involved in the vocational preparation
and training of students with disabilities, including career
awareness, exploration, preparation, and use of vocational
resources. Vocationally related programs and services, both
within and outside the special education environment are
included.
Pre-requisite: SPE 313 Minimum Grade of C and SPE 342
Minimum Grade of C and SPE 454 Minimum Grade of C.

SPE 444  Senior Seminar - W  3 cr
Topics based upon students’ experiences in internship.
Students develop personal growth plans to enhance
professional functioning.

SPE 454  Curric Meth Develop Young  3 cr
Curriculum and methods of instruction for individuals who
function in the lower levels of cognitive, motor, self care,
communicative, and/or social behaviors. Emphasis is on
physical management, class/individual scheduling, adapted
aids and equipment, task analysis, and functional life skills.

SPE 484  General Education Curriculum  3 cr
A Curriculum course designed to emphasize general
education and special education K-12 curriculum. Students
learn content of general education curricula through study
of scope and sequence charts and strategies for adapting
the curricula for students with exceptionalities, especially in
inclusionary settings.
Pre-requisite: SPE 313 Minimum Grade of C and SPE 342
Minimum Grade of C and SPE 454 Minimum Grade of C.

SPE 489  Pre-Practicum  3 cr
Supervised experience in the teaching field which allows the
teacher’s performance to be evaluated qualitatively.

SPE 490  Sp Top -  3 cr
Varies in content and deals with issues, trends, and topics of
current interest in the field of educating exceptional
individuals. May be repeated for credit when course content
varies.

SPE 494  Dir St -  3 cr
Directed Study. No more than two directed studies may
be applied to programs at the undergraduate level or for
certification.

SPE 495  Internship K-6  9 cr
Observation and supervised K-6 classroom teaching
experience providing the opportunity to synthesize all
previous instruction. This culminating activity provides
opportunity for study and discussion of problems and issues
encountered in the practicum situation.
Pre-requisite: PRAXIS-Elem Ed Cont Knowledge 137 and
SPE 363 Minimum Grade of C and SPE 410 Minimum
Grade of C.

SPE 496  Internship 6-12  9 cr
Observation and supervised 6-12 classroom teaching
experiences providing the opportunity to synthesize all
previous instruction. This culminating activity provides
opportunity for study and discussion of problems and issues
encountered in the practicum situation.
Pre-requisite: SPE 363 Minimum Grade of C and SPE 410
Minimum Grade of C.

SPE 497  Internship ECSE  9 cr
Observation and supervised ECSE classroom teaching
experiences providing the opportunity to synthesize all
previous instruction. This culminating activity provides
opportunity for study and discussion of problems and issues
encountered in the practicum situation.
Pre-requisite: PRAXIS-Elem Ed Cont Knowledge 137 and
SPE 363 Minimum Grade of C and SPE 433 Minimum
Grade of C.

SPE 499  Senior Honors Project-H  3 TO 6 cr
Under the advice and guidance of a faculty mentor, honors
students will identify and carry out a research project,
relevant to the field of study in Special Education, that will
lead to a formal presentation at the annual Honors Student
Colloquium. The senior project will be judged and graded by
three faculty chaired by the honors mentor. This course is
required for Honors recognition and may be repeated for up
to 6 credit hours. Prerequisite: Participate in honors program
and junior level status.

SPE 500  Nat-Needs of Exc Child and Yth  3 cr
Introduction to the field of special education involving the
study of all exceptionality areas. Developmental and
maturational sequences of exceptional children/youth are
included.
SPE 504 Seminar in Spec Educ 3 cr
Designed to allow students an indepth exploration of topics of special concern to them related to children with disabilities or high potential.

SPE 505 Admn and Supv of SPE 3 cr
Establishing, maintaining, supervising, and evaluating special education programs in school districts and systems. Legislation and litigation, budgeting and finance, trends and issues in special education are included.

SPE 510 Intro to Lrng Char Tchg in SPE 3 cr
An examination of the definitions, characteristics, and prevalence of children with learning disabilities, emotional and/or behavioral disabilities, mental retardation and multiple disabilities. Emphasis is placed on the environmental and biological causes of problems in motor, perceptual, social academic, affective, and behavioral development. Students will be introduced to current service delivery models and the programming for individuals with disabilities.

SPE 511 Curr - Reg Class and Adapt 3 cr
Examination of all curricula as represented by various state course of study documents. Students will study and develop relevant adaptations of curricula to meet needs of various exceptional children.

SPE 512 Ecological Curr and Method 3 cr
From an ecological systems view, methods of individually deriving a functional, life-centered curriculum for students with mild to severe disabilities as well as educational strategies for teaching and training within such a framework.

SPE 514 Teaming and Collaboration 3 cr
An intensive study of the nature of teaming and collaborative practices with an emphasis on developing skills to organize and participate in a variety of such situations. Pre-requisite: SPE 512 Minimum Grade of B and SPE 516 Minimum Grade of B and SPE 589 Minimum Grade of S.

SPE 515 Data and Behav Mgmt 3 cr
Behavioral assessment techniques and experimental designs for the evaluation of behavior change programs. Operant and respondent methods for deceleration of inappropriate behavior. Operant methods for accelerating appropriate behaviors, teaching new behaviors and maintaining behaviors. Data-Based decision making strategies for formative program evaluation and modifications.

SPE 516 Methods Spec Needs Learners 3 cr
An examination of the methodologies employed in teaching special needs learners. The course covers the theoretical underpinnings and practical application of techniques with media, and materials.

SPE 517 Communication - Lang and Read 3 cr
Major topics include the nature of language, language development and language problems in exceptional students; and remedial procedures. Informal and formal language and reading assessment. Relationship of reading to writing, phonetic, sight and combination means of reading instruction.

SPE 518 Assessment 3 cr
Advanced assessment of developmental levels, academic and non-academic performance of exceptional individuals through the administration and interpretation of standardized tests, criterion-referenced instruments, and informal measures.

SPE 521 Children W-High Potential 3 cr
Study of the intellectual, creative, emotional, and other psychological facets of gifted and talented children. Attention will be paid both to those individuals whose potential is realized and those who are considered underachievers.

SPE 522 Creative and Prod Thinking 3 cr
Geared to understanding the creative process, personality, and product of gifted and talented children as well as how to foster creativity and productive thought in the classroom.

SPE 523 Tchg Children W-High Potential 3 cr
Various curricular emphases and program approaches employed for gifted, creative, and talented children are studied. Insights are offered into articulating educational efforts.

SPE 524 Atyp Children W-High Potential 3 cr
This course is an in-depth study of the unique needs of atypical populations of gifted students. Attention will be directed to the culturally diverse gifted, economically disadvantaged gifted, underachieving gifted, gifted in rural areas, gifted females, highly/profound gifted, gifted handicapped, gifted with ADD/ADHD/SLD, and gifted preschoolers.

SPE 525 Impact of Typical Atypical Dev 3 cr
An examination of typical childhood and developmental characteristics of infants, toddlers, and young children with disabilities from the prenatal period through age eight. Characteristics of disabling conditions and their impact upon development are also discussed.

SPE 532 Issue Edu Young Child Disabil 3 cr
This course prepares students to work with infants, toddlers, and young children with disabilities and their families. Topics covered include specific teaching and intervention techniques, special education laws and regulations, and service delivery models.
SPE 534  Assessment Devel Young  3 cr
This course contains information on basic psychometric qualities of screening, evaluations, and assessments, tools for use with infants, toddlers, and young children with disabilities, conducting family assessments, adapting measures for children with disabilities and using screening assessment, and evaluation in individualized programming.

SPE 535  Collaborating with Families  3 cr
This course prepares students to work with families of children with special needs. It contains information on understanding families, working with traditional and non-traditional families, and providing family-centered services.

SPE 538  Advanced Practicum Experience  3 cr
The purpose of this course is to provide a field experience focusing on evaluation and program improvement in academic and behavioral assessment, program planning, and experiences in implementation of special education programming.
Pre-requisite: EDM 510 Minimum Grade of C.

SPE 539  Pre-Practicum Experience  3 OR 6 cr
Supervised experience in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 540  Sp Top  -  3 cr
A course with varying content dealing with issues, trends, and topics of current interest in the field of education exceptional individuals. May be repeated for credit when course content varies. Composition of activity. Total credit cannot exceed 6 hours.

SPE 541  Multicategory Prac Seminar  3 cr
Combines field experiences and technology-based simulations and learning experiences with an ongoing seminar to address a wide-range of disabilities and educational implications. Course content will be individualized according to the students educational and professional background.

SPE 542  Collaborative Pract-Seminar  3 cr
A seminar which enables students to discuss controversial issues related to the role and function of the collaborative teacher. Students lead and respond to discussion on topics which include teaming, inclusion, and collaboration.

SPE 543  Classroom Exp Prac  -  3 cr
Supervised experience in the teaching field which allow the teacher's performance to be evaluated qualitatively.

SPE 544  Dir St - Research  3 cr
Students explore through directed individual study and research, problems and issue of special interest or significance in Special Education.

SPE 545  Intern/Prac SPE Coll Tch K-6  3 OR 6 cr
Supervised experiences in Collaborative Teaching K-6 in the teaching field which allow the teacher's performance to be evaluated qualitatively.
Pre-requisite: SPE 500 Minimum Grade of B and SPE 514 Minimum Grade of B and SPE 516 Minimum Grade of B and SPE 515 Minimum Grade of B and SPE 591 Minimum Grade of B and (PRAXIS-Mathematics Subtest 157 or PRAXIS-Mathematics Subtest 157 ) and (PRAXIS-Social Studies Subtest 154 or PRAXIS-Social Studies Subtest 154 ) and (PRAXIS-Science Subtest 158 or PRAXIS-Science Subtest 158 ).

SPE 546  Intern/Prac SPE Coll Tch 6-12  3 OR 6 cr
Supervised experiences in Collaborative Teaching 6-12 in the teaching field which allow the teacher's performance to be evaluated qualitatively.
Pre-requisite: SPE 500 Minimum Grade of B and SPE 514 Minimum Grade of B and SPE 516 Minimum Grade of B and SPE 515 Minimum Grade of B and SPE 591 Minimum Grade of B.

SPE 547  Intern/Prac SPE ECSE  3 cr
Supervised experiences in Collaborative Teaching ECSE in the teaching field which allow the teacher's performance to be evaluated qualitatively.
Pre-requisite: PRAXIS-Elem Ed Cont Knowledge 137

SPE 548  Intern/Prac SPE G/T  3 cr
Supervised experiences in Collaborative Teaching Gifted/Talented in the teaching field which allows the teacher's performance to be evaluated qualitatively.

SPE 549  Thesis  3 cr
A student selects a project, study, or investigation in Special Education related to the student's area of specialization. The project forms a basis for the thesis. A thesis committee will give guidance during the investigation and during the writing of the thesis.

SPE 601  Advanced Eval in SPE  3 cr
Methods and procedures for developing criterion-referenced instruments and assessment batteries for classroom use in evaluating exceptional children and youth.

SPE 602  Adv Study of Excep Children  3 cr
Comparison of the normal development progress and that usually seen in the various exceptionality categories of special education especially cognitive, communication, motor, social and emotional development.

SPE 641  Seminar Behav Disorders  3 cr
Advanced study and review of the state of present knowledge in areas relevant to the psycho-pathological disorders of childhood including etiology, assessment, treatment and education.
UNIVERSITY OF SOUTH ALABAMA
COURSES 1531

SPE 642  Clinical Teaching I  3 cr
A study of the principles of behavioral theory upon which
strategies for change in cognitive and social behavior rest
and the evaluative designs used to monitor behavioral
change and validate strategies.

SPE 643  Clinical Teaching II  3 cr
A study and review of clinical research relevant to the
curriculum requirements in the education and treatment of
exceptional children and the identification of research needs
in the various areas of exceptionality.

SPE 651  Seminar in LD  3 cr
Current trends and issues in the education of learning
disabled individuals are discussed, various theoretical
approaches and current empirical evidence provide the
basis for discussion.

SPE 671  Seminar in ID Educ  3 cr
Current trends and issues in the education of individuals
with intellectual disabilities. Class and recent professional
literature are the basis for developing perspectives.

SPE 690  Sp Top -  3 cr
A course with varying content dealing with issues, trends,
and topics of current interest in the field of education
exceptional individuals. May be repeated for credit when
course content varies.

SPE 694  Dir St - Research  3 cr
Students explore through directed study problems and
issues of special interest or significance in Special
Education.

SPE 699  Research Project  1 TO 3 cr
The Research Project, as the culminating experience in
the Specialist Program, provides an opportunity for the
candidate to synthesize and apply the various program
components in a selected instructional setting. Suitable
agreements are reached with the appropriate public school
system by the candidate. MR majors may not take more
than 8 hours.
Pre-requisite: IDE 692 Minimum Grade of B or EDU 692
Minimum Grade of B.

Speech Lang Pathology
(SLP) (SLP)

SLP 521  Advanced Speech Science  3 cr
The study of physical and acoustic concepts involved in
speech production and perception including instrumental
measurement and analysis.

SLP 532  Clinical Linguistics  3 cr
This course gives the student an overview of the linguistic
theories and approaches that are relevant to the field of
speech sciences. There will be a particular emphasis on
those areas of linguistics that underpin the diagnostic and
assessment procedures used in Speech Pathology. The
course will focus on development and language use in
normal populations and will show how knowledge of the
pattern of typically developing language users can be
applied to clinical contexts.

SLP 533  Pediatric Language Disorders  3 cr
Clinical assessment and management of language problems
in infants, toddlers, and preschoolers, including language
disorders associated with other developmental disorders
and AAC.

SLP 534  School-Aged Language Disorders  3 cr
This course covers assessment and intervention
approaches for school-age language disorders, children
beyond age 5 years. Topics include speech-language
services at the discourse level; the relationship between
language and literacy; service delivery models including
integration; educational laws and policies.

SLP 541  Adv Articulation Disorders  3 cr
Advanced study of disordered speech-sound production
including these: development, assessment and intervention
of articulation and phonological disorders in children.

SLP 545  Assist Tech for Comm Disorders  2 cr
Introduction to the study an application of assistive
technology, including low-to-high tech augmentative and
alternative communication devices to aid communication for
persons with communication disorders. The course includes
device characteristics, program features, and intervention
strategies as well as current trends in research for individual
with complex communication needs.

SLP 551  Voice and Resonance Disorders  3 cr
Advanced study of pathology, symptomatology, etiology,
and treatment of voice and resonance disorders in children
and adults.

SLP 561  Fluency Disorders  3 cr
Study of theories, research, and contemporary treatment
procedures in the area of fluency disorders.

SLP 565  Neuromotor Disorders of Commun  3 cr
Review of neuroanatomy and physiology, nature of
neuromuscular pathologies, methods of assessment and
rehabilitation of neuromotor disorders of speech production.
SLP 566  Aphasia & Neuro Lang Disorders  3 cr
Study of the nature, characteristics, and clinical management of acquired neurogenic language disorders associated with focal lesions to the left or right hemisphere, including aphasia and right hemisphere syndrome.

SLP 567  Acq Cognitive Comm Disorders  3 cr
Study of the nature, characteristics, and clinical management of cognitive-communication disorders associated with diffuse brain lesion, including traumatic brain injury and dementia.

SLP 568  Dysphagia  4 cr
This course provides an in-depth study of healthy and disordered swallowing function across the lifespan. Specifically, students will learn normal anatomy and physiological processes of the upper aerodigestive tract, how to conduct clinical and instrumental evaluations of swallowing function, and develop individualized, targeted treatment plans for various swallowing impairments.

SLP 567  Acq Cognitive Comm Disorders  3 cr
Study of the nature, characteristics, and clinical management of cognitive-communication disorders associated with diffuse brain lesion, including traumatic brain injury and dementia.

SLP 568  Dysphagia  4 cr
This course provides an in-depth study of healthy and disordered swallowing function across the lifespan. Specifically, students will learn normal anatomy and physiological processes of the upper aerodigestive tract, how to conduct clinical and instrumental evaluations of swallowing function, and develop individualized, targeted treatment plans for various swallowing impairments.

Speech And Hearing Sci (SHS) (SHS)

SHS 201  Intro to Comm Disorders  3 cr
Overview of major disorders of human communication and the role of the Audiologist and Speech-Pathologist in assessing and treating them.

SHS 210  Culturally Responsive Practice  3 cr
This course presents a practical approach to systemic development of specific professional skills for providing effective, culturally sensitive clinical health services to ethnically and linguistically diverse patients. Building on standard models of multicultural competence that emphasize knowledge, awareness, and skills, students will be introduced to culturally humility, culturally specific approaches to practice, and frameworks for equity and empowerment.

SHS 302  Audiology and Hearing Sciences  3 cr
This course addresses basic principles of hearing science, including the physical properties of sound, sound generation, transmission, and measurement, anatomy and physiology of the hearing mechanisms; an introduction to the profession of audiology.

SHS 315  Fundamentals of Speech Science  3 cr
An introduction to the anatomy and physiology of speech production and the acoustic properties of speech.

SHS 331  Normal Language Acquisition-W  3 cr
Acquisition of communicative behavior in normal children during the first decade of life; development of syntax, semantics, pragmatics, cognition; clinical laboratory experience with children. Pre-requisite: SHS 341 Minimum Grade of C.

SHS 341  Clinical Phonetics  4 cr
Transcription techniques for the analysis of speech. Includes a study of the dynamics of speech sound production. Pre-requisite: SHS 201 Minimum Grade of C. SHS 201 can be taken concurrently with this course.

SHS 373  Audiology I  4 cr
This course is an introduction to the following topics: disorders of hearing, etiologies of auditory and vestibular disorders found in populations of all ages, and evaluation techniques used by audiologists. Pre-requisite: SHS 302 Minimum Grade of C.

SHS 374  Audiology II  3 cr
This course is a study of the principles of the management of hearing loss in children and adults; relevant legislation; and treatment and education options. Pre-requisite: SHS 373 Minimum Grade of C.
SHS 414  Neurobiol Bases Human Comm  3 cr
Introduction to neuroscience and clinical neurology as they apply to the processes of normal and disordered communication. Topics include neurophysiology, neuroanatomy, and neuropathologies.
Pre-requisite: SHS 315 Minimum Grade of C and SHS 331 Minimum Grade of C and SHS 341 Minimum Grade of C.

SHS 431  Intro to Language Disorders  3 cr
A survey of language disorders in preschool and school-age children; assessment and intervention.
Pre-requisite: SHS 331 Minimum Grade of C.

SHS 431  Intro to Speech Disorders  3 cr
An introduction to disorders of articulation, voice, and fluency. Theoretical and etiological foundations will be surveyed as well as philosophical orientations to therapy.
Pre-requisite: SHS 331 Minimum Grade of C.

SHS 453  Intro to Clinical Pract - W  3 cr
Introduction to the clinical setting; organizations and statutes that govern professional service; instrumentation, procedures and approaches to remediation. Observation of therapy and indirect participation as a clinical aide are also a major part of this course. Special permission is required from instructor to take course.
Pre-requisite: SHS 331 Minimum Grade of C and SHS 341 Minimum Grade of C.

SHS 480  Issues in Clinical Pract - W  3 cr
This is a clinical practicum course designed as an introduction to the clinical setting; documentation procedures and guidelines; organizations and statutes that govern professional service; instrumentation, procedures, and approaches to remediation. Written documentation observation of therapy (live and in-class video) and participation as a clinical aide are also significant course requirements.
Pre-requisite: (SHS 302 Minimum Grade of B and SHS 315 Minimum Grade of B and SHS 331 Minimum Grade of B and SHS 341 Minimum Grade of B and SHS 373 Minimum Grade of C) and (EH 102 Minimum Grade of C or EH 105 Minimum Grade of C).

SHS 490  Special Topics -  1 TO 3 cr
Topics to be determined by student need and interest. Content will vary. A subtitle identifying the topic will be entered on the student's record. May be repeated for a total of 6 hours. Requires permission of the department chair.

SHS 494  Directed Independent Study  1 TO 3 cr
Independent study under the direction of a faculty member. Requires permission of the department chair.

SHS 499  Senior Honors Project - H - W  1 TO 6 cr
Under the advice and guidance of a faculty mentor, honors students will identify and carry out a research project relevant to the field of Speech Pathology and Audiology. The senior project will be judged and graded by three faculty members chaired by the honors mentor. This course is required for Honors recognition. Permission of the department chair and completion of an approved project prospectus is required.

Sports Management (SM) (SM)

SM 191  Intro to Sport Mgt/Rec Studies  3 cr
An introduction to the Sport Management and Recreation Studies professions; its history and philosophies. Includes an orientation to community agencies.

SM 276  Introduction to Sport Mgt  3 cr
A study of the activities, organizations, and businesses involved in producing, facilitating, and organizing sport, fitness, and recreation related products and services.

SM 280  Hospitality Services  3 cr
A study of hotel/motel resort services. Includes an overview of recreation services, food and beverage, guest services, marketing, housekeeping, maintenance, and fiscal concerns.

SM 286  Sport Governance and Policy  3 cr
A detailed analysis of power, decision making, oversight and control methods for sport and recreation programs at the community, scholastic, collegiate, professional, and international sport levels. Includes governance and authority of regulatory concerns related to legal, risk/safety, social, political, economic, geographical, and managerial policies, procedures and practices.

SM 297  Campus Recreation  3 cr
Planning, organization, and leadership of intramural recreation and community sport activities.

SM 300  Global Tourism  3 cr
Examination of the impact of recreational socio-cultural, economic, physical environment and governmental factors on leisure travelers within the global tourism industry.

SM 384  Sport Marketing  3 cr
An examination of marketing and media concepts and theories applied to the sport industry. Content areas include basic marketing, target marketing and segmentation, advertising and sponsorships, event marketing and promotions, branding, public relations, social media, consumer behavior research, sponsorship proposals, and sport marketing plans.

</tbody>
</table>
SM 595  Internship in Sport Management 3 TO 6 cr
A supervised learning experience in a sport management or related agency work setting. Provides the student with an opportunity to apply theories and concepts learned during the graduate program. No more than six semester hours of SM 595 can be accepted toward a degree program. Program advisor approval required.

SM 599  Thesis 1 TO 6 cr
Independent research by the student under the sponsorship of the graduate faculty. Approved formal research prospectus and approval by thesis committee chair required.

Statistics (ST) (ST)

ST 150  Contemporary Math-Stat Seminar 1 cr
This course gives an overview of modern mathematics and statistics from the point of view of the practitioners. The course is designed for majors in mathematics and statistics at all levels as well as those students who are considering mathematics and statistics as a major or minor area of study. Topics usually included are elements of geometry, algebra, analysis, methods of statistical inference, the role of the computer in the analytical sciences; these topics vary from semester to semester. This course cannot be taken for credit simultaneously with MA 150, but may be repeated in different semesters. NOTE: May be offered for Honors Credit.

ST 210  Stat Reason and Application 3 cr
An introduction to modern statistics designed to provide the student with a solid foundation in statistical concepts, reasoning and applications. Emphasis given to problem identification, methodology selection and interpretation of results. Analysis of data accomplished by extensive use of statistical computer software, thereby minimizing manual computation. Coverage includes descriptive statistics, probability models, estimation, and hypothesis testing. High School level algebra is recommended. Computer Lab fee. NOTE: ST 210 is intended for students in all disciplines except Engineering and Computer Science. Credit for both ST 210 and ST 315 not allowed. May be offered for Honors Credit.

ST 305  Applied Stat Health Sciences 3 cr
An introduction to statistical reasoning and data analysis for the health sciences. Coverage includes descriptive statistics, methods of data collection, estimation, hypothesis testing, non-parametric statistics, ANOVA, repeated measures, correlation and other measures of association, modeling data with linear and logistic regression. Critique of selected research articles and case studies incorporating research and evidence-based practice will be adopted to connect statistics to daily work in healthcare field. Statistical computer software (e.g. Minitab) will be extensively used for data analysis. Computer Lab fee. Note: This course is offered only as a fully online course and only for health sciences students. Pre-requisite: MA 110 Minimum Grade of C or MA 112 Minimum Grade of C.

ST 310  Stat Research Techniques 3 cr
This course is a continuation of ST 210. Coverage includes analysis of experimental designs such as completely randomized design, randomized block design, and factorial design using analysis of variance (ANOVA), correlation, simple and multiple regression analysis, model building, nonparametric techniques, contingency table analysis, sampling and survey methods. Time permitting topics such as time series analysis and statistical simulations will be covered. Statistical computer software will be extensively used for data analysis. Computer Lab fee. NOTE: Credit for only ONE course from ST 310, ST 315 and ST 320 is allowed. Pre-requisite: ST 210 Minimum Grade of C.

ST 315  Applied Probability-Statistics 3 cr
Concepts of probability theory, discrete and continuous probability distributions including gamma, beta, exponential and Weibull, descriptive statistics, sampling, estimation, confidence intervals, testing of hypothesis, ANOVA and multiple comparisons, linear and multiple regression, correlation, nonparametric analysis, contingency table analysis, computer-assisted data analysis using appropriate statistical software. Computer Lab fee. Pre-requisite: MA 125 Minimum Grade of C.
**ST 320  Applied Stat Analysis**  3 cr  
Descriptive statistics, probability distributions, sampling, estimation, confidence intervals and hypothesis testing, experimental designs, ANOVA and multiple comparisons, linear and multiple regression, correlation, nonparametric analysis, goodness of fit, contingency table analysis, quality control, acceptance sampling, computer-assisted data analysis using appropriate statistical software. Computer Lab fee. NOTE: ST 315 and ST 320 are intended for students in Engineering, Computer Science, and Mathematics. ST 315 covers additional probability distributions while ST 320 additionally covers concepts of quality control and acceptance sampling. Students in these disciplines should consult with their academic advisor for appropriate choice between ST 315 and ST 320. Computer Lab fee. NOTE: Credit for only ONE course from ST 310, ST 315, and ST 320 is allowed.  
Pre-requisite: MA 125 Minimum Grade of D.  

**ST 335  Applied Regression Analysis**  3 cr  
Simple, polynomial and multiple linear regression; residual and lack-of-fit analysis; simple, multiple, partial and multiple-partial correlation analysis; model building algorithms; dummy variables; analysis of covariance; model comparisons; analysis of experimental designs including messy data; nonlinear regression models; computer-assisted data analysis using appropriate statistical software. Computer Lab fee. NOTE: Satisfies the Technology Proficiency Requirement for Math/Stat majors.  
Pre-requisite: ST 210 Minimum Grade of C or ST 315 Minimum Grade of C or ST 320 Minimum Grade of C.  

**ST 340  Design-Analysis of Experiments**  3 cr  
Principles, constructions, and analysis of experimental designs to include completely randomized, randomized complete block, Latin square and split plot designs, factorial experiments, designs with nested and/or crossed factors, multifactor experiments with randomization restrictions, transformations, incomplete block designs, multiple comparisons including contrasts, confounding, fractional replication, computer-assisted data analysis. Computer Lab fee.  
Pre-requisite: ST 210 Minimum Grade of C or ST 310 Minimum Grade of C or ST 315 Minimum Grade of C or ST 320 Minimum Grade of C.  

**ST 345  Sampling-Survey Techniques**  3 cr  
Sampling concepts and designs for survey investigations; sampling methodologies including applications of simple random, stratified, one-and-two stage cluster, and systematic sampling; sample size determination; ratio and regression estimation; population size estimation; random response modeling; acceptance sampling including applications of single and multiple 2-class attribute sampling plans; computer-assisted data analysis using appropriate statistical software. Computer Lab fee.  
Pre-requisite: ST 210 Minimum Grade of C or ST 310 Minimum Grade of C or ST 315 Minimum Grade of C or ST 320 Minimum Grade of C.  

**ST 350  Applied Time Series Analysis**  3 cr  
Fundamental concepts; classical regression models as forecasting models, exponential smoothings, stationary and nonstationary models, additive and multiplicative decompositions, moving average, autoregressive, ARMA and ARIMA processes, estimation in MA, AR ARMA, and ARIMA processes. Box-Jenkins methodology, computer-aided modeling, applications. Computer Lab fee.  
Pre-requisite: ST 210 Minimum Grade of D or ST 315 Minimum Grade of D or ST 320 Minimum Grade of D or ST 335 Minimum Grade of D.  

**ST 355  Nonparametric Stat Methods**  3 cr  
Distribution-free analysis of location and scale measures, nonparametric treatment of fundamental statistical designs, nonparametric comparison procedures, association and contingency table analysis, nonparametric goodness-of-fit procedures, and tests for randomness, nonparametric regression and other measures of association, computer intensive statistical methods. Computer Lab fee.  
Pre-requisite: ST 210 Minimum Grade of D or ST 315 Minimum Grade of D or ST 320 Minimum Grade of D.  

**ST 415  Stat Qual Control Reliability**  3 cr  
Probability distributions in quality control, inferences about process quality, control charts for attributes and variables, process capability analysis, economic design of control charts, custom charts, acceptance sampling by attributes and variables, six sigma concepts, reliability concepts, censoring, definitions and properties of survival distributions, methods of estimating and comparing reliability distributions, Kaplan-Meier estimation, burn-in models with a major emphasis on computer-assisted data analysis. Computer Lab fee.  

**ST 425  Applied Linear Models**  3 cr  
Some results of matrix algebra, multivariate normal distributions, distributions of quadratic forms, general linear models, design models with one factor and two factors including interaction, component-of-variance models, and computing techniques. Computer Lab fee.  
Pre-requisite: MA 237 Minimum Grade of D and ST 335 Minimum Grade of D or ST 320 Minimum Grade of D.  

**ST 450  Categorical Data Analysis**  3 cr  
Analysis of two-way, three-way and higher dimension contingency tables using log-linear models, measures of association for nominal and ordinal tables, multiple-factor models, multiple response models, logistic regression, and weighted least squares. Computer Lab fee.  

**ST 460  Multivariate Stat Analysis**  3 cr  
Multivariate normal distribution, sampling distribution, hypothesis testing, principal components and introduction to factor analysis, canonical correlation analysis, discriminant and classification analysis, and MANOVA. Computer Lab fee.
ST 470  Theory of Statistics  3 cr
A comprehensive introduction to the mathematical foundations of statistics. Sufficient statistics and information. Parameter estimation, maximum likelihood and moment estimation, optimality properties of estimators and confidence intervals. Hypothesis testing, likelihood ratio tests and power functions. Credit for both ST 470 and MA 551 is not allowed.
Pre-requisite: MA 451 Minimum Grade of D or MA 550 Minimum Grade of D.

ST 475  Stat Computing and Graphics  3 cr
Introduction to computer-assisted data analysis with statistical computer software, including SAS, R/S-Plus. Coverage includes basics of SAS, common SAS statistical procedures, high-dimensional data visualization, some elements of statistical computing such as numerical computation, semi-numerical computation, symbolic and graphical computation, and special topics selected by instructor. (Credit for ST 475 and ST 575 is not allowed. Computer Lab fee.
Pre-requisite: ST 210 Minimum Grade of C or ST 315 Minimum Grade of C or ST 540 Minimum Grade of C.

ST 478  Stat Learning Tech in Data Sci  3 cr
Statistical learning refers to a set of tools for modeling and understanding complex datasets. It is a recently developed area in statistics and blends with parallel developments in computer science and, in particular, machine learning. The purpose of this course is to provide the student with a foundation in modern (non-traditional) statistical learning techniques to deal with small to large complex datasets. Analysis of data is accomplished by extensive use of statistical software thereby minimizing manual computation. Coverage includes introduction to statistical learning, classification or supervised learning methods, resampling methods, linear and non-linear model selection techniques, support vector machines and tree-based methods. Credit for both ST 478 and ST 580 not allowed.
Pre-requisite: ST 335 Minimum Grade of C and CSC 121 Minimum Grade of C. ST 335 and CSC 121 can be taken concurrently with this course.

ST 480  Statistical Practicum - W  1 cr
Relates to the student's classroom studies with actual statistical problems encountered in practice. Working with the departmental statistical consultant, the student will participate in providing statistical assistance to research faculty in applied fields. Computer Lab fee.
Pre-requisite: and ST 335 Minimum Grade of C and ST 340 Minimum Grade of C.

ST 490  Special Topics  1 TO 3 cr
Selected topics in advanced undergraduate applied statistics. This course may be repeated for a maximum of six credits.

ST 494  Directed Studies  1 TO 3 cr
Directed Study. May be repeated for a maximum of six credits. Prerequisite: Permission of Department Chair.

ST 499  Honor Senior Project - H  3 TO 6 cr
With the guidance and advice of a faculty mentor, Honors Students will identify, and carry out a research project in Statistics. The outcome of the research project will include a formal presentation at the annual Honors Student Colloquium. The senior project will be judged and graded by three members of the faculty, chaired by the faculty mentor.

ST 525  Appl Stat for Clinical Trials  3 cr
This course introduces the fundamental concepts of clinical trials and statistical methods in clinical trials with examples. Topics include clinical trial design and development, randomization, blindness, sample size and power calculation, data collection and management, missing data, survival analysis, association and reproducibility, crossover trials, Bayesian adaptive methods, and others. Most of the statistical methods will be implemented using R. Procedures or subroutines from other statistical software packages, such as SAS and SPSS, will also be introduced as needed.
Pre-requisite: ST 210 Minimum Grade of C or ST 305 Minimum Grade of C or ST 315 Minimum Grade of C or ST 540 Minimum Grade of C.

ST 540  Stat in Research I  3 cr
A service course for graduate students in disciplines other than mathematics and statistics. A non-calculus exposition in support of application. Coverage includes descriptive statistics, probability and probability distributions, sampling, estimation, tests of significance, analysis of variance, correlation, linear, polynomial, and multiple linear regression including residual and lack of fit analysis, nonparametric procedures, contingency table analysis, and computer-assisted data analysis using appropriate computer software. Computer lab fee.

ST 545  Stat in Research II  3 cr
Continuation of ST 540. Coverage includes regression analysis through matrices, multiple, partial and multiple-partial correlation analysis, model building algorithms, non-linear regression, analysis of covariance, completely randomized, randomized complete block, and factorial experimentation for equal and unequal cell replication, logistic regression, resampling, basic multivariate techniques, and computer-assisted data analysis. Computer Lab fee.
Pre-requisite: ST 540 Minimum Grade of C.

ST 550  Environmental Statistics  3 cr
Sampling environmental populations; parametric and nonparametric and estimation; applications of lognormal, Weibull, gamma and beta distributions; locating hot spots; censored data; outlier detection; trend analysis, seasonality; estimation of animal abundance. Computer Lab fee.
Pre-requisite: ST 210 Minimum Grade of C or ST 315 Minimum Grade of C or ST 540 Minimum Grade of C.
ST 555  Categorical Data  3 cr
Introduction to categorical response data, probability distributions for categorical data, statistical inference for proportions, contingency tables and measures of association, logistic regression, log-linear models for contingency tables, multi-category response models, models for matched pairs categorical response variables. Credit for both ST 450 and ST 555 is not allowed.
Pre-requisite: ST 540 Minimum Grade of C or ST 315 Minimum Grade of C or ST 335 Minimum Grade of C.

ST 560  Appl Design & Analysis of Exper  3 cr
A software aided introduction to the design and analysis of experiments for univariate and multivariate data. The coverage includes designs such as block designs, factorial designs, repeated measurement designs, hierarchical designs, response surface methods, and Taguchi methods along with various ANOVA techniques for univariate data, ANCOVA for the correlated data, and MANOVA for multivariate data. Analysis of data will be accomplished by extensive use of statistical software. Computer lab fee.
Pre-requisite: ST 540 Minimum Grade of B.

ST 575  Stat Computing and Graphics  3 cr
Introduction to computer assisted data analysis with statistical computer software, including SAS, R/S-Plus. Coverage includes basics of SAS, common SAS statistical procedures, high-dimensional data visualization, some elements of statistical computing such as numerical computation, semi-numerical computation, symbolic and graphical computation, and special topics selected by instructor. (Credit for both ST 475 and ST 575 is not allowed. Computer Lab fee.
Pre-requisite: (ST 540 Minimum Grade of C or ST 315 Minimum Grade of C or ST 210 Minimum Grade of C).

ST 580  Stat Learning Tech in Data Sc  3 cr
Statistical learning refers to a set of tools for modeling and understanding complex datasets. It is a recently developed area in statistics and blends with parallel developments in computer science and, in particular, machine learning. The purpose of this course is to provide the student with a foundation in modern (non-traditional) statistical learning techniques to deal with small to large complex datasets. Analysis of data is accomplished by extensive use of statistical software thereby minimizing manual computation. Coverage includes introduction to statistical learning, classification or supervised learning methods, resampling methods, linear and non-linear model selection techniques, support vector machines and tree-based methods. Credit for both ST 450 and ST 580 is not allowed.
Pre-requisite: ST 540 Minimum Grade of C.

ST 585  Nonparametric Modeling  3 cr
This course is designed to introduce an alternative set of methodologies to existing and non-existing statistical methods with emphasis on distribution-free and robust procedures. The coverage includes distribution-free analysis of location and scale measures. Nonparametric treatment of fundamental statistical designs, nonparametric multiple comparison procedures, association and contingency table analysis, goodness-of-fit procedures. Nonparametric regression and other measures of association and computer intensive methods. Statistical computer software is intended to enhance the facility with applications of various techniques covered in this course.
Pre-requisite: ST 335 Minimum Grade of C and ST 540 Minimum Grade of C.

ST 590  Sp Topic:  1 TO 3 cr
Selected topics in advanced applied statistics. This course may be repeated for a maximum of six credits.

## Supply Chain & Logistics (SCL) (SCL)

SCL 350  Intro to Business Logistics  3 cr
An integrative approach highlighting the supply chain component encompassing the flow of goods, services, and information in manufacturing and services organizations, that deliver consistent value to a range of upstream and downstream customers.
Pre-requisite: MKT 320 Minimum Grade of D.

SCL 351  Strategic Sourcing & Supply Mg  3 cr
An integrative approach combining both strategic and operational components in planning for and acquiring the necessary inputs and resources for organizational success. Focal points include creating and delivering value through astute purchasing and supply management, across a range of organizations, including services, manufacturing, governmental, and non-profits.
Pre-requisite: MKT 320 Minimum Grade of D and MKT 375 Minimum Grade of D.

SCL 352  Port Management  3 cr
A comprehensive overview of global port management practices, including the associated economic, regulatory, financial, commercial, socio-political, and data environments influencing port operations.
Pre-requisite: MKT 320 Minimum Grade of D and MKT 375 Minimum Grade of D.

SCL 353  Distribution Center Mgt  3 cr
An integrative perspective of distribution center management and materials handling, encompassing distribution planning and control, warehousing management, replenishment strategies, and the design of storage and handling systems.
Pre-requisite: MKT 320 Minimum Grade of D and MKT 375 Minimum Grade of D.
SCL 400  Supply Chain Analytics  3 cr
A comprehensive overview of the analytical tools and techniques necessary to enhance supply chain efficiency and effectiveness to ensure customer satisfaction. Focal points will include data analysis, performance measurement, big data, forecasting, and tactical, sales and operations planning, and network management.
Pre-requisite: MKT 320 Minimum Grade of D and MKT 375 Minimum Grade of D.

SCL 405  Curr Issues in Sup Chain Mgt  3 cr
An integrative course highlighting the major managerial challenges in key components of the supply chain, including sourcing, production, and logistics, with special emphasis on supply chain integration, customer value and performance measurement.
Pre-requisite: MKT 375 Minimum Grade of D.

Systems Engineering (SE) (SE)

SE 500  Engr Probability & Statistics  3 cr
Probability and statistical concepts; discrete, continuous, and joint distributions; point and interval estimation; hypothesis testing; regression and correlation analysis; analysis of variance.

SE 501  Engineering Optimization  3 cr
Model construction, linear programming, network models, dynamic models, stochastic models, queuing theory, and decision theory.
Pre-requisite: SE 500 Minimum Grade of B. SE 500 can be taken concurrently with this course.

SE 590  Special Topics in SE  3 cr
Topics of current interest in Systems Engineering. Fee

SE 592  Directed Study in SE  3 cr
Directed study, under the guidance of a faculty advisor, of a topic from the field of Systems Engineering not offered in a regularly scheduled course. Requires Instructor's permission.

SE 594  Projects in SE  3 cr
An investigation of an original problem in Systems Engineering, under the guidance of a faculty advisor. Approval of the project prospectus by the student's advisory committee and consent of the Director of Engineering Graduate Studies.

SE 599  Thesis  1 TO 6 cr
An investigation of an original problem in Systems Engineering under the guidance of the student's major professor. Approval of the dissertation prospectus by the student's Advisory Committee, the Graduate School, and consent of the Director of Engineering Graduate Studies.
Pre-requisite: SY 598 Minimum Grade of B.

SE 601  Systems Eng Fundamentals  3 cr
Fundamentals of systems engineering, structure of complex systems, system development process, systems engineering management and documentation, needs analysis, requirements development, engineering design and development, integration and test, change management, process improvement. Fee.

SE 602  Risk and Failure Analysis  3 cr
Risk Analysis needs, risk analysis methods, performance requirement analysis, trade studies, failure analysis needs, failure analysis tracking, and failure analysis methods.
Pre-requisites: Requires a background in calculus-based statistics and permission of instructor. Fee.

SE 603  Integration, Test & Evaluation  3 cr
Interface control documents, design reviews, requirements management, allocation of test methods to requirements, test plans, test procedures, test execution, and failure tracking and resolution. Fee.
Pre-requisite: SE 601 Minimum Grade of C.

SE 604  Software Systems Engineering  3 cr
Software development methodologies, software development tools, change management, software concept development, software requirements development and allocation, coding and unit test, program technical interfaces, software engineering management. Fee.
Pre-requisite: SE 601 Minimum Grade of C.

SE 605  Project Engineering  3 cr
Management of system design, development and risk, work breakdown, structure, systems engineering management plan, design reviews, budget and schedule analyses, negotiation and conflict resolution, contracts, customer interactions, team selection, failure resolution. Fee.

SE 606  Systems Architecture  3 cr
The systems architecture is that foundational structure of a system, capturing the core capability and structure of the system. This course will cover principles of systems architecting, system architecture drivers, relationship of systems architecture to system requirements, common tools and techniques to include design structure matrices, IDEF0, SysML, and simulation.
Pre-requisite: SE 601 Minimum Grade of C.

SE 607  Systems Simulation  3 cr
This course rigorously examines system modeling and simulation methodologies, emphasizing statistical analysis and discrete-event simulation via simulation software.

SE 608  Reliability Engineering  3 cr
This course rigorously examines reliability, and maintainability methodologies, emphasizing mathematical constructs, design concepts, and data analysis employed to quantify reliability, availability, and maintainability measures for operational readiness, support system design, and system effectiveness.
SE 609  Engineering Research Methods  3 cr
This course is a fast tracked course examining quantitative and qualitative methods for conducting meaningful inquiry and research. Topics include research ethics, intent, design, methodologies, techniques, formatting, data management, analysis, publication, and presentation utilizing common statistical approaches.

SE 610  Systems Thinking  3 cr
The act of systems thinking is taking a step back from the details considered during engineering design, and looking at the whole picture. This class exposes the student to a conceptual framework to allow them to properly define complex systems and enterprises drawing from synthesizing techniques from systems science, soft systems methodologies, and systems engineering. The class demonstrates the ability to leverage the simultaneity of perspectives, the role of paradox, and the centrality of soft issues in resolving complexity.

SE 611  Socio-Technical Systems  3 cr
Socio-Technical systems are those systems which contain and/or are strongly influenced by human, social and institutional elements. Because of those influences, they quickly become dependent on community partnerships, infrastructure constraints, and government-aspects that are not traditionally part of the engineering equation. This course considers the systems engineering approach as it relates to the challenges of socio-technical systems. Pre-requisite: SE 601 Minimum Grade of C.

SE 612  Production System Engineering  3 cr
This course rigorously examines principles, design, models and techniques for operational planning and analysis of production and distribution systems emphasizing quantitative methods.

SE 613  Decision Analysis  3 cr
This course will give the engineering student the analysis techniques used to assess single participant multiple criteria and multiple participant multiple criteria decisions. As decisions occur throughout the lifecycle of a system, the variety of engineering decision techniques introduced can be applied to a myriad of decisions.

SE 614  Sys Lifecycle Cost Analysis  3 cr
Systems engineering considers the entire lifecycle of a system. Therefore, it makes sense to consider the entire cost of the product or system form cradle to grave. This course presents methods, processes, and tools needed to conduct cost analysis, estimation, and management of complex systems.

SE 615  Engineering Management  3 cr
Engineering management is an integral part of any engineered system. Topics to be covered include team project vision, mission, goals, organization, tools, management and leadership, managing technical issues, coordination and control. This course is relevant to any engineering or technical discipline.

SE 690  Special Topics in SE  3 cr
Topics of current interest in Systems Engineering. Fee.

SE 692  Directed Studies  3 cr
Directed study, under the guidance of a faculty advisor, of a topic from the field of Systems Engineering not offered in a regularly scheduled course. Prerequisite: Instructor's permission.

SE 699  Dissertation  1 TO 6 cr
An investigation of an original problem in Systems Engineering under the guidance of the student's major professor. Prerequisite: Approval of the dissertation prospectus by the student's Advisory Committee, the Graduate School, and consent of the Director of Engineering Graduate Studies.

Undergraduate Research (UGR) (UGR)

UGR 091  Research:  0 cr
Research project or creative activity for current high school students under the direct mentorship of faculty member.

UGR 191  Research:  0 cr
Research project or creative activity for first-year students under the direct mentorship of a faculty member.

UGR 291  Research:  0 cr
Research project or creative activity under the direct mentorship of a faculty member for students in the junior year of their academic programs.

UGR 491  Research:  0 cr
Research project or creative activity under the direct mentorship of a faculty member for students in the senior year of their academic programs.
## Faculty Directory

### A

#### ABEYNA, GAYAN S.
Assistant Professor
BS, Univ of Colombo
MS, Louisiana State University
PHD, Louisiana State University

#### ADAMS, AMY D.
Assistant Professor
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of South Alabama

#### ADAMS, ELIZABETH M.
Associate Professor
BS, Spring Hill College
PHD, University of South Alabama

#### ADAMS, JAMES R.
Instructor
BS, Spring Hill College
MS, University of South Alabama

#### AFFUSO, ERMANNO
Associate Professor
MS, Polytechnic University of Bari
PHD, Auburn University

#### AHEARN, LORRAINE
Assistant Professor
BA, University of NC- Greensboro
MA, University of NC- Greensboro
PHD, University of NC- Chapel Hill

#### AL-MEHDI, ABU B.
Professor
BS, Univ de Salamanca
MD, Univ de Salamanca
MD, Crimen St Medical University
PHD, Crimen St Medical University

#### ALBINS, MARK A.
Part-Time Instructor
BA, University of Hawaii At Hilo
PHD, Oregon State University

#### ALEXEYEV, MIKHAIL F.
Professor
BS, Ukraine National Univ
PHD, National Agri Univ Ukraine

#### ALLISON II, DAVID T.
Associate Professor
BS, University of Alabama
PHD, Florida State University

#### AMARE, NICOLE E.
Professor
BA, University of Wisconsin-Madis
MA, Kansas State University
MA, University of Alabama
PHD, University of Alabama

#### ANASTASIO, RANDALL J.
Senior Instructor
BS, University of Southern Miss
MS, University of Southern Miss
MS, University of Southern Miss

#### ANDEL, TODD R.
Professor
BS, University of Central Florida
MS, Air Force Inst of Technology
PHD, Florida State University

#### ANDERSON, JENNIFER A.
Assistant Professor
BSN, University of South Alabama
MSN, Spring Hill College
DNP, University of South Alabama

#### ANTOINE ARMSTRONG, MISCHA K.
Instructor
BS, University of South Alabama
MED, University of South Alabama

#### ARD, STEPHANIE E.
Assistant Librarian
AA, Mississippi Gulf Coast CC
BA, Mississippi U For Women
MA, University of South Alabama
MLS, University of Alabama

#### ARRIETA, MARTHA
Associate Professor
BMED, Univ of San Agustin
MPH, University of South Florida
PHD, University of South Florida

#### AUDIA, JONATHON
Professor
BS, McMaster University
MS, McMaster University
PHD, University of South Alabama

### B

#### BAKER, MELANIE R.
Assistant Professor
AS, Delgado Community College
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of South Alabama

#### BAKER, RONALD
Assistant Professor
BS, James Cook University
PHD, James Cook University

#### BAKER, SAMUEL H.
Assistant Professor
BA, Yale University
MPHIL, University of Cambridge UK
PHD, Princeton University

#### BALCZON, RONALD D.
Associate Professor
BS, Florida State University
PHD, Florida State University

#### BALDWIN, AMELIA A.
Professor
BSBA, Auburn University
MAC, Auburn University
PHD, Virginia Polytechnic Inst and

#### BALENA, DANIEL D.
Instructor
BA, University of Georgia
JD, Georgia State University
MS, University of South Alabama

#### BARRINGTON, ROBERT A.
Associate Professor
BS, Oregon State University
PHD, Loyola University of Chicago

#### BATES, ROBIN E.
Instructor
BS, University of South Alabama
MHS, University of South Alabama

#### BAUER, NATALIE R.
Associate Professor
BS, Delta State University
PHD, University of South Alabama
BAUGHN, CHRISTINA L.
Assistant Professor
BSN, University of South Alabama
MSN, University of South Alabama
DNP, Samford University

BLACK, MICHAEL E.
Assistant Professor
BS, University of South Alabama
MS, University of South Alabama
PHD, Capella University

BAXTER, ABIGAIL
Professor
AB, Guilford College
MA, University of Maryland-Bal Cnt
PHD, Vanderbilt University

BOHNET, ANDRA C.
Professor
BM, University of The Pacific
MM, University of Southern CA
PHD, Texas Tech University

BEASON, LARRY
Professor
BS, Stephen F Austin State U
MA, Stephen F Austin State U
PHD, Texas A & M University

BOLEMAN, MICHAEL W.
Senior Instructor
BS, University of West Georgia
MS, University of Kentucky

BOLTON, MARYANNE
Assistant Professor
BSN, Rutgers The St U Central Offic
MS, University of South Alabama
DNP, University of South Alabama

BONNINGTON, LAUREN R.
Assistant Professor
BS, University of South Alabama

BRAND, SALLIE M.
Assistant Professor
BSN, Univ of Alabama-Birmingham
MBA, Samford University
MSN, Samford University
DNP, Samford University

BREAZEALE, HAIDI S.
Assistant Professor
BS, University of South Alabama
MS, University of South Alabama
DNP, Samford University

BRICK, STEPHEN G.
Associate Professor
BA, University of California-Berk
MA, University of California-Berk
PHD, University of California-Berk

BRITT, KRISTY L.
Senior Instructor
BA, University of South Alabama
MA, University of CA-Santa Bar

BROACH, MARY E.
Associate Professor
BS, University of South Alabama
MS, University of South Alabama
EDD, University of Georgia
BROOKS, JASON L.
Instructor
BA, Judson College
MA, American Public University
EDD, Walden University

BROWN, GIDGET R.
Instructor
BSSH, University of South Alabama
MS, University of South Alabama

BROWN, TRACY L.
Instructor
ND, Coastal Alabama Comm College
BSN, University of South Alabama
MS, University of South Alabama
CERT, University of South Alabama
DNP, University of South Alabama

BRYAN, VALERIE L.
Associate Professor
BA, University of Kentucky
MSW, University of Kentucky
PHD, University of Kentucky

BUNCH, JACLYN A.
Associate Professor
BA, Pace University-New York
MS, Florida State University
PHD, Florida State University

BURLEY, TROY R.
Assistant Professor
BS, California Polytechnic-San Lui
MPT, Western U Of Health Sciences
PHD, Rocky Mtn Univ of Hlth Profess

BURNS, KARA K.
Associate Professor
BA, University of Arizona
MA, University of Oregon
PHD, University of Arizona

BUSH, NADIA K.
Senior Instructor
BA, University of South Alabama
MA, University of South Alabama

BUTLER, CHONDRA N.
Assistant Professor
BS, University of LA at Lafayette
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of Alabama

BYDALEK, KATHERINE A.
Associate Professor
BS, University of Saint Francis
MSN, University of South Alabama
PHD, Touro College

BYRD, KELLY O.
Assistant Professor
BS, Florida State University
MAT, University of Florida
PHD, University of Southern Miss

BYRD, LISA M.
Assistant Professor
BSN, Mississippi College
MSN, Mississippi U For Women
PHD, University of Southern Miss

BYRNE, MARIA A.
Associate Professor
BS, University of Notre Dame
MS, University of Notre Dame
PHD, University of Notre Dame

CAGE, ERIN C.
Associate Professor
AB, Dartmouth College
MA, Johns Hopkins University
PHD, Johns Hopkins University

CAHANIN IV, RICHARD L.
Assistant Professor
BS, Louisiana State University
DPT, University of South Alabama
PHD, Rocky Mtn Univ of Hlth Profess

CAMPBELL, AMY A.
Assistant Professor
BSN, Tennessee Technological U
MSN, University of South Alabama
DNP, University of South Alabama

CAMPBELL, AMY C.
Assistant Professor
BA, University of Mississippi
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of South Alabama

CAMPBELL, STEPHEN M.
Associate Professor
BS, Tennessee Technological U
MBA, Tennessee Technological U
PHD, University of NC- Charlotte

CARMICHAEL, RUTH H.
Professor
BA, University of Chicago
MA, Boston University
PHD, Boston University

CARMOUCHE, MILLICENT L.
Assistant Professor
BA, University of Arkansas- PB
MA, Eastern Kentucky University
PHD, Georgia State University

CARR, NICOLE T.
Associate Professor
BA, College of William and Mary
MA, College of William and Mary
PHD, Louisiana State University

CARR, PHILIP J.
Professor
BA, University of Louisville
MA, University of Tennessee-Knox
PHD, University of Tennessee-Knox

CAULEY, LANIER S.
Associate Professor
BS, Virginia Polytechnic Inst and
MS, Virginia Polytechnic Inst and
PHD, Clemson University

CESARINI, J P.
Associate Professor
BA, Amherst College
PHD, Rutgers State Univ New Bruns

CHAPMAN, DEBRA L.
Assistant Professor
BS, University of Southern Miss
MS, University of South Alabama
PHD, University of Southern Miss

CHESHIRE, KRISTY L.
Assistant Professor
BA, University of Miami
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of South Alabama

CHILTON, LYNN L.
Professor
BSN, Marquette University
MSN, Mississippi U For Women
DSN, Univ of Alabama-Birmingham

southalabama.edu/bulletin 2021-22 GRADUATE/UNDERGRADUATE BULLETIN
CHILUKURI, SRIDEVI
Instructor
BS, Kakatiya University
MS, Osmania University

CHOI, DAHYE
Assistant Professor
BA, Ewha Womans University
MA, Ewha Womans University
PHD, Vanderbilt University

CHOI, JUNG H.
Assistant Professor
BA, Michigan State University
MA, Michigan State University
PHD, University of Texas-Austin

CHOW, ALAN F.
Associate Professor
BS, Louisiana State University
MS, Louisiana State University
PHD, University of South Alabama

CHUPP, ADAM D.
Assistant Professor
BS, Ohio University-Main Campus
MS, Virginia Commonwealth U
PHD, Southern Illinois U-Carbondale

CLANTON, CLISTA C.
Senior Librarian
BA, University of Alabama-Huntsv
MLS, University of NC-Chapel Hill

CLARK, ANGELA M.
Senior Instructor
BS, University of South Alabama
MS, University of South Alabama

CLARK, JENNIFER E.
Instructor
BS, University of South Alabama
PHD, University of South Alabama

CLEARY, JOHN C.
Associate Professor
BCE, Cleveland State University
MS, Cleveland State University
PHD, Case Western Reserve U

CLEMMONS, TROY A.
Assistant Professor
BS, Troy University-Main

CLEVELAND, DONNA G.
Instructor
BS, University of South Alabama
MED, University of South Alabama

CLIFFORD, AMANDA M.
Instructor
BS, University of South Alabama
MA, American Public University

CLONTZ JR., STEVEN C.
Assistant Professor
BS, Auburn University
MS, Auburn University
PHD, Auburn University

CLOUDIER, ROBERT J.
Professor
BS, United States Naval Academy
MBA, Eastern University
PHD, Stevens Inst of Technology

CLOYED, CARL S.
Part-Time Instructor
BA, Prescott College
PHD, University of Louisville

COAKER, JOSHUA C.
Instructor
EMTB, University of South Alabama
EMTP, University of South Alabama

COCHRAN, MELANIE R.
Instructor
BS, University of Southern Miss
MS, University of Southern Miss

COCKRELL, JEANENE Q.
Senior Instructor
AS, University of Mobile
BSN, University of Saint Thomas
MSN, University of South Alabama

COHEN, MICHAEL V.
Professor
AB, Harvard University
MD, Harvard University

COLORUSO, MARK A.
Assistant Professor
BS, Queens University
MA, University of California-San D
PHD, University of California-San D

COLE, SONYA L.
Assistant Professor
BA, Alabama State University
MS, Troy University-Montgomery
EDD, Alabama State University

COLEMAN, ROBERT L.
Associate Professor
BS, Virginia Commonwealth U
MA, Virginia Commonwealth U
PHD, Rutgers State Univ New Bruns

COLOUHOUN, RYAN J.
Assistant Professor
BS, Florida Atlantic U-Boca Raton
MS, University of South Florida
PHD, Oklahoma State University

COOKE, KATHY J.
Professor
BA, Calvin College
MA, University of Chicago
PHD, University of Chicago

COOPER, CATHARINE M.
Senior Instructor
BSRS, University of South Alabama
MS, University of South Alabama

COOPER, KIM M.
Instructor
BSN, William Carey College
MSN, William Carey College

COPELAND, DONNA J.
Assistant Professor
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of South Alabama

COWLEY, CHRISTOPHER M.
Senior Instructor
BA, University of South Alabama
MA, University of Florida

COYM, JASON W.
Associate Professor
BS, University of Texas-Austin
PHD, Florida State University

CUMMINGS, JOHN R.
Senior Instructor
BS, University of South Alabama
MA, University of Florida

CUMMINGS, JOHN R.
Associate Professor
BA, University of NC-Chapel Hill
MBA, University of Mobile
DBA, Kennesaw State University
CURRIER, JOSEPH M.
Associate Professor
BA, University of St Thomas
MA, Wheaton College
PHD, University of Memphis

CURTIS, MARY A.
Instructor
BSRS, University of South Alabama
MS, University of South Alabama

DADZIE, CHARLENE A.
Assistant Professor
AB, University of Georgia
MH, Cornell U-Ny St Statutory Cols
PHD, University of North Texas

DAHAL, ARJUN P.
Assistant Professor
MS, University of Minnesota-Duluth
PHD, University of South Florida

DAILEY, LISA A.
Assistant Professor
BSN, University of Wisconsin-Gr By
MSN, University of South Alabama
DNP, University of South Alabama

DAILEY, CASEY L.
Assistant Professor
BA, Birmingham-Southern College
MPH, Univ of Alabama-Birmingham
PHD, Univ of Alabama-Birmingham

DARBY, LATONYA C.
Senior Instructor
BS, University of Mobile
MED, University of South Alabama

DASGUPTA, SANTANU
Assistant Professor
BS, University of Calcutta
MS, University of Calcutta
BSED, Jadavpur University
PHD, Jadavpur University

DASINGER, JACOB A.
Senior Instructor
BS, University of South Alabama
MS, University of South Alabama
PHD, University of Southern Miss

DAVIES, JAMES H.
Professor
AB, University of North Alabama
MS, Vanderbilt University
PHD, University of South Alabama

DAVIS JR., JAMES H.

Assistant Professor
AAS-AT, Bishop State Community College
MSN, Spring Hill College
EDD, University of Alabama

DAVIS, SARA L.
Assistant Professor
BS, Spring Hill College
BSN, University of South Alabama
MSN, University of South Alabama
PHD, Univ of Alabama-Birmingham

DAVIS, TARA M.
Associate Professor
BA, Louisiana State University
MCD, Louisiana State U - Hlth Sci
PHD, University of Texas-Dallas

DAVIS, WESLEY D.
Assistant Professor
BSN, Chamberlain College of Nursing
DNP, University of South Alabama
MSN, University of South Alabama

DEBOSE, JENNIFER
Part-Time Instructor
BS, Texas A&M Univ At Galveston
MS, University of California-Davis
PHD, University of California-Davis

DEROY, TIFFANY L.
Instructor
BSBA, University of South Alabama
MAC, University of South Alabama

DEACY, ROBIN M.
Assistant Professor
BS, Univ of Alabama-Birmingham
MS, Univ of Alabama-Birmingham

DELANEY TUCKER, CYNTHIA L.
Senior Instructor
BS, University of West Florida
MS, University of South Alabama

DELMAS, PEGGY M.
Assistant Professor
BA, University of West Florida
MA, University of Alabama
PHD, Univ of Alabama-Birmingham

DIXON, NERKISSA C.
Assistant Professor
BSN, University of South Alabama
MSN, University of South Alabama
EDD, Walden University

DIZBAY-ONAT, MELIKE
Assistant Professor
BSN, Auburn University
MSEE, Auburn University
PHD, Univ of Alabama-Birmingham

DOLAN, CAROLYN M.
Professor
BSN, Auburn University
MS, University of South Alabama
JD, Faulkner University

DONALDSON, AMANDA B.
Instructor
BS, University of Alabama
MS, University of Alabama
DORGAN, KELLY M.
Associate Professor
BS, University of CA-Santa Cruz
PHD, University of Maine

DURANT, DAVID Z.
Professor
BM, University of Florida
MM, University of Florida
DMA, University of Alabama

DURANTY, EDWARD R.
Assistant Professor
BS, Georgia Southern University
PHD, Tennessee Tech Ctr- Knoxville

DZWONKOWSKI, BRIAN
Associate Professor
BA, The College of New Jersey
MS, University of Delaware
PHD, University of Delaware

FAILE, JENNY L.
Senior Instructor
BS, University of South Alabama
MA, University of Alabama

FERGUSON, SUSAN N.
Associate Professor
BS, Auburn University
MED, Auburn University
MED, Auburn University
PHD, Auburn University

FIELDS, PHILLIP A.
Professor
BS, University of Florida
PHD, Texas A & M University

FINLEY, JOYCELYN A.
Professor
BBA, Eastern Michigan University
MBE, Eastern Michigan University
PHD, University of Michigan-Ann Arb

FINNEY, ROBERT Z.
Professor
BS, Auburn University
MBA, University of Mississippi
PHD, University of Alabama

FINNEY, TREENA L.
Professor
BA, Clemson University
MS, Clemson University
PHD, Depaul University

FITZSIMMONS, SUSAN G.
Assistant Professor
AB, Webster University
MFA, Southern Illinois U-Carbondale

FLAGGE, ASHLEY G.
Assistant Professor
BS, University of South Alabama
AUD, University of South Alabama
PHD, University of South Alabama

FORBES, DAVID C.
Professor
BS, University of Florida
PHD, University of Illinois-Urbana

FORESTER, BROOKE E.
Associate Professor
BS, University of South Alabama
MED, University of South Alabama
PHD, Florida State University

FRANCIS, CHRISTOPHER M.
Assistant Professor
BS, Auburn University
PHD, University of South Alabama

FRANK, MARTIN J.
Assistant Professor
BS, Emory University
PHD, Baylor University

EL-SHARKH, MOHAMED Y.
Associate Professor
BS, Ain Shams Univ
MS, Ain Shams Univ
PHD, University of Alabama

ELKINS, JOHN C.
Associate Professor
BSN, University of South Alabama
MSN, University of South Alabama
MED, North Central University
DNP, Samford University

ELLZIE, JOEL T.
Instructor
BSEMS, University of South Alabama

EMLEY, LISABETH N.
Instructor
BSN, University of South Alabama
MSN, University of South Alabama

ERWIN, CHARLES O.
Senior Instructor
BA, University of South Alabama
MA, American Public University
EDD, University of South Alabama

FAIR II, HENRY W.
Assistant Professor
BS, University of West Florida
MS, University of West Florida

FANG, QINGMING
Assistant Professor
MMED, Dept of Edu Train Chinese
CDC

FARBER, JOSEPH E.
Assistant Professor
BSBA, University of Arizona
BSN, University of Mississippi
MSN, University of Southern Miss

FAUS, ROBERT E.
Senior Instructor
BS, Manhattan College
MA, Ball State University
PHD, University of Missouri-Columb

FELDOSS, JORG
Professor
MA, Univ Hamburg
DNS, Univ Hamburg

FENSKE, RACHEL F.
Assistant Librarian
BA, University of South Alabama
MLS, University of Alabama

FEBER, SUSAN N.
Associate Professor
BS, Auburn University
MED, Auburn University
MED, Auburn University
PHD, Auburn University

FLETCHER, PHILLIP A.
Professor
BS, University of Florida
PHD, Texas A & M University
FRANKLIN, KIP E.
Assistant Professor
BM, Central Michigan University
MM, Michigan State University
MM, Michigan State University
DMA, Michigan State University

FRAZER, GREGORY H.
Professor
BA, Indiana University-Bloomington
MA, Ball State University
PHD, Southern Illinois U-Carbondale

FREEZ, CHRISTOPHER R.
Associate Professor
BA, Union College
MA, Cuny Queens College
PHD, Cuny Graduate School And U Ctr

FREDEGAU, LAUREN A.
Associate Professor
BS, Stonehill College
MA, University of Mass-Boston
PHD, Pennsylvania State University

FRIZELL, CARL A.
Assistant Professor
BS, Mississippi State University
MS, Univ of Alabama-Birmingham
MA, Univ of Alabama-Birmingham
MS, University of Lynchburg

FRUH, SHARON M.
Professor
BS, Triton College
BA, Bethany Bible College
MA, Rush University
PHD, Universit of Illinois-Chicago

FRYE, DORIS A.
Instructor
BS, Saint Leo College
MA, Louisiana State University

G

GAPUD, ALBERT A.
Associate Professor
BS, University of Kansas
PHD, University of Kansas

GARRAND, KENDREA L.
Assistant Professor
BA, North Carolina State U-Raleigh
MS, Purdue University-Main Campus
CSCD, University of Pittsburgh
PHD, Medical U of South Carolina

GARD, ANTHONY L.
Professor
BS, University of Iowa
PHD, University of Iowa

GARMON, DAVID F.
Senior Instructor
BS, Univ of Alabama-Birmingham
MA, Univ of Alabama-Birmingham

GASSMAN, NATALIE R.
Assistant Professor
BA, Michigan State University
PHD, University of CA-Los Ang

GASTON, JOSEPH P.
Assistant Professor
BA, University of South Alabama
MAT, Spring Hill College
EDS, University of West Florida

GETCH, YVETTE Q.
Professor
BS, Florida State University
MED, University of Arkansas-Fayette
PHD, University of Arkansas-Fayette

GIBBS, CONSTANCE D.
Professor
BFA, Auburn University
MFA, Virginia Commonwealth U

GILES, REBECCA M.
Professor
BS, Texas State Univ-San Marcos
MED, University of Texas-Austin
PHD, University of Southern Miss

GILLESPIE, MARK N.
Professor
BS, University of Kentucky
PHD, University of Kentucky

GILLIGAN, MARIE A.
Assistant Professor
BSN, University of South Alabama
MSN, University of South Alabama

GILLIS, WILLIAM E.
Professor
BS, US Air Force Academy
MBA, University of West Florida
PHD, Florida State University

GLOVER, THOMAS G.
Associate Professor
BS, Georgia Inst of Tech - Main
PHD, Vanderbilt University

GODANG, ROMULUS
Professor
BS, University of North Sumatra
MS, Virginia Polytechnic Inst and
PHD, Virginia Polytechnic Inst and

GONG, NA
Associate Professor
PHD, SUNY at Buffalo

GORDON-HICKEY, SUSAN
Associate Professor
BS, University of Florida
AUD, University of South Alabama
PHD, University of South Alabama

GORELIK, GABRIELA
Assistant Professor
PHD, Univ of Buenos Aires

GRAHAM, WILLIAM
Associate Professor
BS, University of NC-Wilmington
MS, University of CA-Santa Cruz
PHD, University of CA-Santa Cruz

GRANT, CHARLES T.
Professor
BS, University of Alabama
MPAC, University of Texas-Austin
PHD, Florida State University

GRAVES, REBECCA J.
Associate Professor
BS, University of Southern Miss
BSN, University of South Alabama
MSN, University of South Alabama
PHD, University of Tennessee-Knox

GREEN JR., RICKY E.
Instructor
BSITE. University of South Alabama
MSCIS, University of South Alabama
GREEN, WANDA M.  
Associate Professor  
BS, Millsaps College  
MED, Mississippi College  
EDD, University of North Texas

GREENWOOD, MATTHEW R.  
Instructor  
BM, University of Louisville  
MM, Florida State University

GREGORICKA, LESLEY A.  
Associate Professor  
BA, University of Notre Dame  
MA, Ohio State U-Main Campus  
PHD, Ohio State U-Main Campus

GRELET, SIMON P.  
Assistant Professor  
BS, Uni of Reims Champagne-Ardenne  
MS, Uni of Reims Champagne-Ardenne  
PHD, Uni of Reims Champagne-Ardenne

GUFFEY, SARAH K.  
Assistant Professor  
BS, University of NC-Wilmington  
MA, East Carolina University  
PHD, University of Wyoming

GUNN, JENNIE A.  
Professor  
BS, University of Southern Miss  
MSN, Univ of Mississippi Med Center  
PHD, Univ of Mississippi Med Center

GURT, DEBORAH  
Assistant Librarian  
BA, University of Michigan-Ann Arb  
MA, Gratz College  
MLIS, Rutgers State Univ New Bruns

GUY, MISTY D.  
Assistant Professor  
BSN, University of South Alabama  
MSN, University of South Alabama  
CERTG, University of South Alabama  
DNP, University of South Alabama

GUZY, ANN M.  
Associate Professor  
BS, Southern Illinois U-Edwardsvi  
MA, Southern Illinois U-Edwardsvi  
PHD, New Mexico State U-Main Campus

H

HAAS, LAURIE F.  
Instructor  
BA, Huntingdon College  
MSW, Tulane University

HABEL, PHILIP D.  
Professor  
AB, Washington University  
PHD, University of Illinois-Urbana

HAIR JR., JOSEPH F.  
Professor  
BA, University of Florida  
MA, University of Florida  
PHD, University of Florida

HALBROOKS, JOHN V.  
Associate Professor  
BA, University of NC-Chapel Hill  
MA, College of William and Mary  
PHD, Tulane University

HALL, HEATHER R.  
Professor  
BSN, University of South Alabama  
MSN, University of South Alabama  
PHD, Univ of Tenn Hlth Sci Center

HAMILL, TRAY W.  
Senior Instructor  
BS, Univ of Alabama-Birmingham  
MS, University of South Alabama

HAMILTON, KAREN M.  
Associate Professor  
BSN, University of South Alabama  
MSN, University of South Alabama  
PHD, University of South Alabama

HAMILTON, MARSHA L.  
Associate Professor  
BA, Purdue University-Main Campus  
MA, University of California-River  
PHD, State University of New York

HAMMONDS, LINDA S.  
Assistant Professor  
BSN, SUNY at Albany  
MSN, East Carolina University  
DNP, University of South Alabama

HAN, JIANING  
Associate Professor  
BS, Hebei University  
MS, Hebei University  
PHD, University of Virginia

HANKS, ROMA  
Professor  
BA, David Lipscomb University  
MA, Vanderbilt University  
PHD, University of Delaware

HARDIN, JAMES R.  
Professor  
BSBA, Appalachian State University  
MA, Appalachian State University  
PHD, University of Mississippi

HARLAN, CHRISTOPHER T.  
Associate Professor  
BSN, University of South Alabama  
MSN, University of South Alabama  
DNP, University of TN-Memphis

HARLAN, SHANA M.  
Assistant Professor  
BSN, University of South Alabama  
MSN, University of South Alabama  
DNP, University of South Alabama

HARRELL, KRISTA L.  
Part-Time Instructor  
BS, Old Dominion University  
MSED, Old Dominion University  
PHD, Old Dominion University

HARRINGTON, ELLEN B.  
Professor  
BA, Fordham University  
MA, Tulane University  
PHD, Tulane University

HARRIS, JAMES L.  
Professor  
BSN, University of South Alabama  
MSN, Univ of Alabama-Birmingham  
DSN, Univ of Alabama-Birmingham  
MBA, University of New Orleans

HARRIS, SHANNON K.  
Assistant Professor  
BSN, University of South Alabama  
MSN, University of Mobile  
DNP, University of South Alabama
HAUFF, CAITLYN R.
Assistant Professor
BS, Baldwin-Wallace University
MS, Georgia Southern University
PHD, University of Wisconsin-Milwau

HE, JIA
Associate Librarian
BA, Tianjin Normal University
MIS, Tianjin Normal University
MLIS, University of Wisconsin-Milwau

HEAVNER, TRACY L.
Professor
BME, Appalachian State University
MME, Appalachian State University
DME, University of Northern CO

HENBEST, VICTORIA S.
Assistant Professor
BSED, University of Arkansas- Fayette
MS, Missouri State U-Springfield
PHD, University of SC-Columbia

HENNING, JEREMIAH A.
Assistant Professor
BS, University of Wisconsin-Oshko
MS, University of Wisconsin-Oshko
PHD, University of Tennessee-Knox

HENRY, ALISON K.
Instructor
BS, Texas A & M University
MS, Virginia Polytechnic Inst and
EDD, University of South Alabama

HERMANCE, MEGHAN E.
Assistant Professor
BS, Texas A & M University
PHD, University of Texas Med-Galv

HILL, BENJAMIN D.
Professor
BS, Coastal Carolina University
MA, Wake Forest University
PHD, Louisiana State University

HILL, GRAYSON B.
Instructor
BS, University of Montevallo
MS, University of Montevallo

HILL, JOHN T.
Assistant Professor
BFA, Art Institute Of Atlanta
MFA, Academy of Art College

HILLMAN, TIMOTHY A.
Associate Professor
BA, Millsaps College
MA, University of Mississippi
PHD, Purdue University-Main Campus

HILLYER, RICHARD
Professor
BA, University of Exeter, UK
MA, University of Michigan-Ann Arb
PHD, University of Michigan-Ann Arb

HOADLEY, KENNETH D.
Part-Time Instructor
BS, University of NC- Chapel Hill
MS, University of NC-Wilmington
PHD, University of Delaware

HOFMANN, ALMA R.
Associate Professor
BA, Univ of Puerto Rico-Central Ad
MFA, Iowa State University

HOLDEN, SHELLEY L.
Associate Professor
BS, University of South Alabama
MED, University of South Alabama
EDD, University of West Florida

HOLIFIELD, JEFFREY
Instructor
AAS-AT, Community College Of Air
Force
BS, Southern Illinois U-Carbondale
MA, George Washington University
MMOAS, Air University
MSCIS, University of South Alabama

HOLLEY, AMY G.
Instructor
BSN, University of North Alabama
MSN, University of North Alabama

HOLLINGSWORTH, CRISTOPHER V.
Associate Professor
BA, Amherst College
MA, Rutgers State Univ New Bruns
PHD, Rutgers State Univ New Bruns

HOLLINGSWORTH, MICHAEL A.
Assistant Professor
BA, University of Alabama
BSW, University of Alabama
MS, University of Alabama
PHD, Old Dominion University

HOLM, ROBERT E.
Professor
BA, Point Loma Nazarene University
MM, University of Illinois-Urbana
DM, University of Illinois-Urbana

HONKANEN, RICHARD E.
Professor
BS, University of Georgia
PHD, University of Georgia

HORTON, HEATHER V.
Assistant Professor
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of South Alabama

HOSSAIN, MOHAMMAD D.
Associate Professor
BA, University of Dhaka
MA, University of Dhaka
MA, Southern Illinois U-Carbondale
PHD, Southern Illinois U-Carbondale

HOWARD, MATTHEW C.
Assistant Professor
BA, Virginia Polytechnic Inst and
BS, Virginia Polytechnic Inst and
MS, Pennslyvania State University
PHD, Pennsylvania State University

HOWELL, JACQUELYN S.
Instructor
BS, University of South Alabama
MS, University of South Alabama

HSIAO, KUANG-TING
Professor
BS, Natl Taiwan University
PHD, University of Delaware

HSU, KO-CHENG
Associate Professor
BS, Illinois State University
MS, Illinois State University
MS, Iowa State University
PHD, University of Memphis

LEE, VAUGHAN H.
Professor
PHD, University of South Alabama
BS, University of South Alabama
PHD, University of South Alabama

LEHRTER, JOHN C.
Associate Professor
BS, University of North Alabama
MS, University of Alabama
PHD, University of Alabama

LEMLEY, LUTHER T.
Senior Librarian
BA, University of Louisville
MM, Indiana University-Bloomington
BA, Indiana University-Bloomington
MA, Indiana University-Bloomington
JD, Indiana University-Bloomington
MLIS, University of Texas- Austin

LEWIS, ANDREW M.
Associate Professor
BS, University of Alabama
MA, Washington University
PHD, Washington University

LEWIS, ANGELIA D.
Assistant Professor
AS, College of Central Florida
BSN, University of Mobile
MSN, University of Mobile
DNP, University of Alabama

LEWIS, CHRYSTAL L.
Assistant Professor
BSN, Univ of Alabama-Birmingham
MSN, University of Missouri-St Loui
PHD, University of Missouri-St Loui

LI, JIANFENG
Assistant Professor
MS, University of Oklahoma-Norman
PHD, University of Oklahoma-Norman

LIEBERTZ, SCOTT S.
Assistant Professor
BA, University of Notre Dame
MS, University of Bridgeport
MS, Florida State University
PHD, Florida State University

LILLIAN, TODD D.
Assistant Professor
BS, Brigham Young University
MSME, University of Michigan-Ann Arb
PHD, University of Michigan-Ann Arb

LIM, SSANG TAEK S.
Associate Professor
BS, Seoul National University
MA, Seoul National University
PHD, Univ of Alabama-Birmingham

LIN, CHRISTOPHER C.
Assistant Professor
BA, Boston University
MS, University of California-Irvin
PHD, University of California-Irvin
LIN, MIKE
Associate Professor
BS, Univ of British Columbia
MS, Loma Linda University
PHD, Loma Linda University

LINDEMAN, CHRISTINA K.
Associate Professor
BA, Arizona State University-Main
MA, Arizona State University-Main
PHD, University of Arizona

LINDSEY, DAKOTA R.
Assistant Professor
BS, Georgia Inst of Tech - Main
PHD, Vanderbilt University

LIOI, JOSHUA D.
Assistant Professor
BS, Clemson University
MS, University of Notre Dame

LUCAS, RHONDA L.
Instructor
BS, University of South Alabama
MS, University of South Alabama

LYN, HEIDI
Associate Professor
BA, University of Pennsylvania
BSE, University of Pennsylvania
MA, Georgia State University
PHD, Georgia State University

LYNCH, COLLEEN M.
Assistant Professor
BS, Francis Marion University
BS, Francis Marion University
MSN, Univ of Alabama-Birmingham
DNP, University of South Alabama

MACALUSO, KEVIN R.
Professor
BS, Colorado State University
MS, Sul Ross State University
PHD, Oklahoma State University

MACDONALD, REBECCA N.
Assistant Professor
BS, Georgia Inst of Tech - Main
MA, Virginia Commonwealth U
MS, University of Alabama
PHD, University of Alabama

MACDONALD, REBECCA N.
Assistant Professor
BS, Georgia Inst of Tech - Main
MA, Virginia Commonwealth U
MS, University of Alabama
PHD, University of Alabama

MACS, JANE D.
Professor
BS, State University of New York
MA, University of South Alabama
PHD, University of Southern Miss

MAJOR, KELLY M.
Professor
BA, Elmira College
PHD, University of Maine

MANDERS, JEANETTE E.
Assistant Professor
BS, Spring Hill College
MED, University of Georgia
PHD, University of Georgia

MANNING, JACOB A.
Instructor
BS, Auburn University
BS, University of South Alabama
MS, Northwestern State University

MARASS, ASHLEY D.
Associate Professor
BS, University of Alabama
BS, Georgia State University
MS, Georgia State University
DNP, Samford University

MARIN, MIHAELA C.
Associate Professor
BA, Babes-Bolyai University
MA, Babes-Bolyai University

MARK, PATRICIA F.
Associate Professor
BA, University of South Alabama
MBA, University of South Alabama
PHD, University of Southern Miss

MARSHALL, DOUGLAS A.
Professor
BS, Georgia Inst of Tech - Main
MA, University of NC- Chapel Hill

MARYMONT, JOHN V.
Professor
BA, Northwestern University
MD, Vanderbilt University
MBA, Rice University

MATA, JUAN L.
Associate Professor
BA, University of Costa Rica
MS, Univ of Costa Rica
PHD, University of Tennessee-Knox

MAXUITENKO, YULIA Y.
Associate Professor
PHD, Dartmouth College

MCADAMS, ERIN N.
Assistant Professor
BS, University of South Alabama
MHS, University of South Alabama

Professor
AA, Emory University
BS, Utah State University
MS, Utah State University
PHD, Emory University

WOLTER FERREIRA TOUMA, DANIELA
Assistant Professor
BS, Uni de Sao Paulo
MS, Uni de Sao Paulo
DSC, Uni de Sao Paulo

WOLTRING, MITCHELL T.
Assistant Professor
BS, Minnesota St University-Mankato
MS, Middle Tennessee State U
PHD, Middle Tennessee State U
WOOD JR., BOB G.
Professor
BS, Arkansas State University-Main
MBA, Arkansas State University-Main
PHD, Louisiana State University

WOOD, PETER J.
Professor
BS, University of Illinois-Urbana
MM, University of Wisconsin-Madison
DM, Indiana University-Bloomington

WOODFORD, KELLY C.
Professor
BS, Spring Hill College
JD, Georgetown University

WOODMANSEE, BRENDA K.
Assistant Professor
AS, Mississippi Gulf Coast CC
BSN, University of South Alabama
MSN, University of South Alabama
DNP, Samford University

WOODS, ROGER C.
Professor
DPHIL, University of Oxford England
MA, University of Oxford England
DSC, University of Oxford England

WOOSTER, DONNA M.
Associate Professor
AS, Quinsigamond Community College
BS, Worcester State College
MS, University of Connecticut
PHD, University of South Alabama

WRIGHT, ROGER A.
Professor
BFA, Moorhead State University
MFA, Southern Illinois U-Carbondale

WRIGHT, THERESA F.
Associate Professor
BSN, University of South Alabama
MSN, University of South Alabama
DNP, University of South Alabama

WU, SHENGHUA
Assistant Professor
BS, Central South University
MS, Hunan Normal University
PHD, Washington State University

YADOLLAHI, AREF
Assistant Professor
BS, Semnan University
MS, Iran University of Sci and Tech
PHD, Mississippi State University

YASINSAC, ALEC F.
Professor
BS, Appalachian State University
MS, Naval Postgraduate School
PHD, University of Virginia

YATES, MARK C.
Associate Professor
BS, Louisiana State University
MS, Univ of Louisiana at Monroe
PHD, University of Kansas

YET, LARRY
Associate Professor
BS, Univ of British Columbia
MS, Ohio State U-Main Campus
PHD, Ohio State U-Main Campus

YOUNCE, ALICE B.
Assistant Professor
BSN, Troy University-Main
MSN, Univ of Alabama-Birmingham
DNP, University of South Alabama

ZHA, SHENGHUA
Assistant Professor
BA, Huazhong Univ of Science and Technology
MA, Shanghai Jiao Tong Univ
PHD, University of Missouri-Columbia

College of Nursing

Adult Health Nursing
Community/Mental Health Nursing
Maternal/Child Health Nursing

School of Computing

Computer and Information Sciences
Computer Science
Computing PhD
Health Informatics
Information Systems
Information Technology

Degrees Conferred

Pat Capps Covey College of Allied Health Professions

Bachelor of Science in Biomedical Sciences
Bachelor of Science in Emergency Medical Services
Bachelor of Science in Professional Health Sciences
Bachelor of Science in Radiologic Sciences
Bachelor of Science in Speech and Hearing Sciences
Master of Science in Occupational Therapy
Master of Rehabilitation Science in Occupational Therapy
Master of Science in Physical Therapy
Master of Health Science (Physician Assistant Studies)
Master of Science in Speech - Language Pathology
Master of Rehabilitative Science in Speech Therapy
Doctor of Audiology
Doctor of Philosophy (Communication Sciences and Disorders)
Doctor of Physical Therapy

College of Arts and Sciences

Bachelor of Arts
Bachelor of Fine Arts
Bachelor of Music
Bachelor of Science
Bachelor of Social Work
Master of Arts (Communication) (English) (History) (Sociology)
Master of Public Administration
Master of Science (Biological Sciences) (Marine Sciences) (Mathematics) (Psychology)
Doctor of Philosophy (Marine Sciences)

Mitchell College of Business
Bachelor of Science in Business Administration
Master of Accounting
Master of Business Administration

School of Computing
Bachelor of Science in Computer Science
Bachelor of Science in Information Systems
Bachelor of Science in Information Technology
Master of Science in Computer and Information Sciences
Doctor of Philosophy in Computing

College of Education and Professional Studies
Master of Education
Master of Science
Educational Specialist
Doctor of Philosophy (Instructional Design and Development)

College of Engineering
Bachelor of Science in Chemical Engineering
Bachelor of Science in Civil Engineering
Bachelor of Science in Computer Engineering
Bachelor of Science in Electrical Engineering
Bachelor of Science in Mechanical Engineering
Master of Science in Chemical Engineering
Master of Science in Civil Engineering
Master of Science in Electrical Engineering
Master of Science in Mechanical Engineering

Doctor of Science in Systems Engineering

Graduate School

Interdisciplinary Master of Science in Environmental Toxicology

Interdisciplinary Doctor of Philosophy in Clinical and Counseling Psychology

College of Medicine

Doctor of Philosophy (Basic Medical Sciences)

College of Nursing

Bachelor of Science in Nursing

Master of Science in Nursing

Doctor of Nursing Practice

All degrees are conferred at the commencement exercises in May and December.
Bulletin Index

A

About the University.......................... 7
Academic Advising & Transfer Services.................. 62
Academic Bankruptcy.......................... 79
Academic Common Market Non-Resident Tuition Readmission.... 28
Academic Deans................................ 1565
Academic Dismissal.............................. 79
Academic Policies & Procedures....................... 77
Academic Probation/Suspension/Dismissal.................. 79
Academic Recognition............................... 79
Academic Services............................... 82
Academic Status Policy........................... 79
Accelerated College Enrolment Program (ACEP) College of Medicine Early Acceptance Program (EAP) Physical Therapy Early Acceptance Program (PTEAP).................. 18
Accounting....................................... 174, 1212
Accounting (BSBA)............................... 176
Accounting (MACc)............................... 771
Accounting (Minor)................................ 181
Accreditations..................................... 10
