If source is HIV positive and employee wishes to receive PEP, EH will provide a prescription to Pharmacy for PEP meds at appropriate hospital pharmacy and instruct employee via telephone on how to obtain medications and discuss follow up labs.	
	EH will notify employee of all lab results when completed and if follow up is necessary from EH in regards to Hep B and Hep C. If source positive for Hep B and/or Hep C, EH will follow employee with periodical labs for determined time frame.	

The EXPOSURE protocol described above is administered for USA Health employees—including physicians and residents.

USA COM Students in Hospitals or Clinic setting, will follow the same process outlined above.

When the student presents at admitting for outpatient lab, the student must provide their personal health insurance card. Students will be required to file their insurance for the services required as part of this protocol. In admitting, students will be presented with a packet of information which will need to be completed in the event PEP meds are required to be administered. Employee Health will notify Dr. Roveda and/or Dr. Estrada and/or Dr. Vanderwaa so appropriate documentation and follow up with students is completed.
