Are there any acute risk factors present?

NO

No therapy indicated

Observe for development of risk factors

YES

Is the patient on PPI or H2 blocker therapy at home?

YES

Initiate home med or equivalent

NO

Initiate famotidine 20 mg PO/IV BID

Enteral famotidine or pantoprazole should be used whenever functioning GI is present

Dose adjust famotidine to daily for CrCl ≤ 50 mL/min

Acute risk factors:
1. Mechanical ventilation without enteral nutrition
2. Chronic liver disease
3. Concerning coagulopathy (intrinsic INR > 1.5 or platelets < 50)
4. Burns > 35% TBSI
5. 2 or more of the following moderate risk factors:
   a. Mechanical ventilation with enteral nutrition
   b. AKI
   c. Sepsis
   d. Shock (MAP < 65)
