SUMMARY

Dr. Stephanie Smallegan is an assistant professor of coastal engineering at the University of South Alabama with expertise in physical changes of sandy beaches, such as beach erosion and accretion, due to short-term and long-term processes. Smallegan has served on National Science Foundation Extreme Event Reconnaissance teams where she surveyed geotechnical and structural damage due to natural hazards. Smallegan also uses hydrodynamic and morphodynamic modeling to analyze the impacts of civil infrastructure on morphological changes on barrier islands during tropical cyclones.
