

Open-Rank Faculty Member, Doctor of Physical Therapy Program

The University of South Alabama, in partnership with the national search firm Scott Healy & Associates, invites applications and nominations for the position of **Open-Rank Faculty Member, Doctor of Physical Therapy Program**. The University seeks candidates with a shared vision of educating and impacting future physical therapists and the future of the physical therapy profession.

Applications for a 12-month, full-time faculty position in the Doctor of Physical Therapy (DPT) Program are currently being accepted. The rank of position is open. Rank will be commensurate with the applicant's qualifications and experience.

Our core faculty have a common belief that educating within their area of expertise can inspire and motivate physical therapy students to become leaders within the field of physical therapy and create lifelong learners who desire to make their patients, communities, and profession better.

Responsibilities:

- Teaching graduate courses in physical therapy within the one's area of expertise
- Conducting, publishing, and presenting scholarly work; pursuing extramural funding
- Advising and mentoring students; contributing to student recruitment initiatives
- Collaborating with faculty
- Participating in curriculum development and program/curriculum assessment
- Providing service to the Department, University, and community
- Demonstrated effective teaching practices including ability to create experiential learning opportunities
- Actively engage in program- related student and community activities

Qualifications:

- Eligibility for physical therapy licensure in Alabama
- Academic doctoral degree (Ph.D., Ed.D. or D.Sc.) in physical therapy or a related field at the time of appointment
- Board certification in a clinical specialty with two (2) or more years of didactic teaching experience

Candidates at the **assistant level** should exhibit strong potential for engaging in high-quality research and the ability to teach effectively to graduate students.

Candidates at the **associate level** should have a more established record of scholarly productivity and demonstrate the capacity to teach and mentor DPT students.

Candidates at the **full level** must demonstrate a well- established national and/or international record of research productivity, including a documented history of grant funding (e.g., intramural, foundation, and/or federal awards). In addition, the full level should exhibit the capacity to further strengthen the scholarly reputation of the DPT program.

About the University of South Alabama:

The University of South Alabama, founded in 1963, is a dynamic public research institution and academic health center serving more than 14,000 students across over 115 academic programs. The University fosters an environment that couples engaging learning experiences with high-level research, empowering faculty and students to become leaders in their disciplines while advancing the Gulf Coast region and beyond. Over the past decade, South's beautiful 1,200-acre campus has been transformed through significant investments in facilities and resources supporting teaching, housing, recreation, health sciences, the arts, engineering, computer science, and athletics. Guided by a strategic plan centered on Student Access and Success, Enhancement of Research and Graduate Education, Global Engagement, Excellence in Health Care, and University-Community Engagement, the University continues to build a strong and forward-looking vision for the future.

The University's impact on the coastal region is strengthened through the USA Health system, which includes Children's & Women's Hospital, University Hospital, Providence Hospital, the Mitchell Cancer Institute, and numerous clinics that collectively provide care to hundreds of thousands of individuals each year. Supported by the Frederick P. Whiddon College of Medicine, College of Nursing, and Covey College of Allied Health Professions, USA Health serves as both a leading healthcare provider and an important training ground for future healthcare professionals. Across campus, students are encouraged to discover and strengthen their passions while building meaningful lifelong connections through academic, clinical, research, service, and community engagement opportunities.

About the Covey College of Allied Health Professions:

The Covey College of Allied Health Professions is dedicated to the provision of the highest quality in basic medical sciences and health professional education to meet healthcare needs and contribute to new knowledge through research. Since 1975, the College has made a meaningful impact on both students and the surrounding community through its commitment to academic excellence, innovation, and service. The departments of instruction within the College include Biomedical Sciences, Emergency Medical Services, Occupational Therapy, Physician Assistant Studies, **Physical Therapy**, Radiologic Sciences, and Speech Pathology and Audiology, offering a wide range of certificate, undergraduate, and graduate programs. Educational programs across the College emphasize active learning opportunities that prepare students for their futures as researchers and clinical professionals dedicated to enriching the scientific and healthcare communities. Students benefit from opportunities to engage in research, internships, clinical fieldwork, study abroad experiences, and interprofessional collaboration that fosters teamwork, communication, mutual respect, and shared values.

The Covey College of Allied Health Professions is home to a community of faculty who are excellent scientists, academicians, and clinicians dedicated to supporting students as they reach their full potential as scientists and clinical practitioners. Faculty members are actively engaged in the creation and dissemination of new knowledge through research aimed at addressing healthcare needs across the Gulf Coast region and beyond, while also mentoring student researchers in developing the skills needed to pursue graduate study and research careers. Students in the College's clinical programs engage in extensive simulation and clinical training experiences, utilizing state-of-the-art computerized human simulators and standardized patients before advancing into clinical rotations across private practices, specialty clinics, hospitals, schools, and other healthcare settings. Through these experiences, the College develops graduates who are committed to evidence-based practice, professionalism, compassionate patient care, and excellence in healthcare delivery.

About the DPT Program:

The DPT Program at USA has provided quality physical therapy education for more than 40 years with continuous accreditation. The Doctor of Physical Therapy program is offered in an 8-semester (32 continuous months) format and combines hands-on clinical practical labs, faculty-led instruction, clinical problem-solving

activities, research opportunities, and 34 weeks of full-time clinical internships. Students benefit from placements across more than 200 affiliated clinical sites, primarily throughout the Southeastern region, and graduate prepared for professional practice with strong skills in clinical reasoning, communication, evidence-based practice, and patient care.

About the Community:

Mobile, AL, located along Alabama's Gulf Coast, is the second-most populous city in the state. Mobile serves as the center of a growing metropolitan region known for its rich history, cultural diversity, and strong sense of community. Often referred to as the cultural center of the Gulf Coast, Mobile blends historic charm with ongoing economic growth and innovation. Founded more than 300 years ago, the city is home to beautiful historic architecture, a vibrant downtown district, and year-round traditions and festivals that reflect its unique blend of cultures and influences. Residents enjoy a welcoming coastal lifestyle with outstanding local dining, live music, shopping, museums, and outdoor recreation, all within a city that maintains the feel of a connected and livable community.

Mobile's location also provides convenient access to some of the Gulf Coast's most popular beach destinations and outdoor attractions. Dauphin Island, known for its relaxed atmosphere and natural beauty, is located approximately 45 minutes south of downtown Mobile, while the white sand beaches of Gulf Shores and Orange Beach are about an hour to 90 minutes away, depending on traffic and season. The region offers abundant opportunities for boating, fishing, kayaking, hiking, and waterfront dining, making it an attractive place to live for those seeking both professional opportunity and a high quality of life.

Application and Nomination Process:
