WELCOME TO THE UNIVERSITY OF SOUTH ALABAMA
Surrounding Cities:

- Anchorage
- Honolulu
- Los Angeles
- Seattle
- Portland

SOUTH STUDENTS come from all 50 states and over 50 countries! We have a campus environment that fosters diverse experiences and meaningful relationships, which is why so many students have chosen to call South “home.” You can get here from anywhere, and we encourage you to come see our vibrant community for yourself!

Go to SouthAlabama.edu/visit or call (251) 341-3951 to schedule a tour.
THESE ARE GENERAL ADMISSIONS STANDARDS

The University of South Alabama will occasionally admit students who do not meet these exact criteria. Students should apply for admission if their grades and scores are close to the standards.

Students can also apply to South test-optional. This is a great path for students with good grades. Test-optional students may be asked to provide additional materials, and test-optional admissions are based on performance, course selection and other key academic factors.

GENERAL ADMISSIONS STANDARDS ACT 19 / SAT 990 / GPA 2.5

APPLICATION PROCESS

1. APPLY ONLINE
   SouthAlabama.edu/apply

2. SUBMIT TEST SCORES AND TRANSCRIPTS
   Request an official transcript be sent to USA Office of Admissions. Request that your ACT or SAT scores be sent to USA.

3. NOTIFICATION OF ACCEPTANCE
   You will be notified by email, or you can check your status on the admissions portal.

4. LOG INTO PAWS AND JAGMAIL
   Your acceptance letter will include your J number. Use this to sign in.

5. APPLY TO LIVE ON CAMPUS
   SouthAlabama.edu/MyUSAHousing

6. PRE-ORIENTATION AND ORIENTATION
   Prior to orientation, you should submit immunization records and complete an online alcohol-prevention program.

7. ACADEMIC ADVISING
   Your academic advisor will assist you with course selection.

8. ATTEND YOUR ORIENTATION SESSION

COLLEGE OF NURSING
Nursing
MARIAM OMAR is a junior chemical engineering major on the pre-medicine track and a proud member of the USA Honors College. Although she was born and raised in Mobile, Alabama, her family is originally from Palestine. While in high school Mariam decided that she wanted to pursue medicine, but not through the traditional route. Following the footsteps of her older brother Yousef, Mariam chose to major in chemical engineering rather than the typical pre-health majors such as biology or biomedical sciences.

A core aspect of Honors is research, a discipline that Mariam knows well. Through the Summer Undergraduate Research Fellowship, she worked 10 hours a day in a lab at the Mitchell Cancer Institute and is now researching sustainable energy in the Department of Chemical and Biomolecular Engineering. During her time at South, Mariam has been a leader in campus organizations, helping to raise money for UNICEF’s Lebanon relief fund and Camp SMILE.
ESHAUN WRAY’S decision to major in speech and hearing sciences was deeply personal. As a teenage tennis player in Helena, Alabama, she began having trouble breathing, to the point that she would sometimes pass out. A pediatrician diagnosed asthma and prescribed an inhaler which didn’t help. A pulmonologist ran tests and found no sign of asthma. She referred Eshaun to a speech-language pathologist (SLP), who then diagnosed her with vocal cord dysfunction.

Breathing exercises were prescribed by the SLP, and they worked, allowing Eshaun to play tennis again. And she had found her calling in life. “I wanted to be able to impact other people as much as that SLP impacted my life.” The field of speech-language pathology is broad, and graduates can be researchers, clinicians, professors and advocates. Eshaun is pursuing a master’s in communicative sciences and disorders and plans to pursue a doctorate with a goal of becoming a college professor, maybe even back at South.

PAT CAPPS COVEY COLLEGE OF ALLIED HEALTH PROFESSIONS

The Pat Capps Covey College of Allied Health Professions is dedicated to providing the highest quality in basic medical sciences and health professional education to meet healthcare needs and to contribute to new knowledge through research. The College has seven departments: Biomedical Sciences, Emergency Medical Services, Occupational Therapy, Physical Therapy, Physician Assistant Studies, Radiologic Sciences, and Speech Pathology and Audiology. SouthAlabama.edu/alliedhealth
KALEB NAILER received a history degree from South in 2019 and now works as an international trade compliance analyst at Ingalls Shipbuilding. “I apply what I learned at the University of South Alabama in almost everything I do,” he said.

Ingalls builds ships for the U.S. Navy and Coast Guard in Pascagoula, Mississippi, less than 20 miles east of Nailer’s hometown, Ocean Springs. The compliance office vets anything imported or exported to make sure that everyone follows the many applicable laws and regulations.

Studying history combined his lifelong love for the subject with practical concerns: He thought that developing a historian’s skills in research, reading comprehension, writing and formulating arguments would prepare him for law school (still a possible future career path). “History’s not so much about finding what’s concrete as it is the pursuit of the fullest understanding.”
CAR MEN HERNAN DE Z, as a student, has already had the experience of issuing weather warnings to private businesses who are clients of USA’s Coastal Weather Research Center. “Not a lot of undergraduate programs let you have the ability to issue a warning like that,” Hernandez said.

Growing up in Shreveport, Louisiana, she got hooked on weather because of 2005’s Hurricane Rita, one of the strongest hurricanes ever. “Seeing how much it could affect us, even as a tropical storm by the time it got up to us, just got me really interested,” Hernandez said. “I kept going from there, learning more about meteorology.” She chose South’s meteorology program partly because she received in-state tuition rates through the Academic Common Market, an agreement among 15 Southern and mid-Atlantic states, but also because it’s a small program. You’re able to have one-on-one contact with the professors, and if you want to do any research, it’s easy to get involved.
worked at a Target store in St. Louis during high school and developed an admiration for the human resources officer. “Whenever we had an issue, we went to her, and she helped us figure it out. She was just there for everybody.” So as Mitchell looked for a university in a warm locale, majoring in management with a concentration in human resources at the Mitchell College of Business seemed perfect. Earning a Mitchell Scholarship sealed the deal.

Human resources appealed to her as “a good mix of numbers and people.” She soon realized the complexity of that mix. “In management, you aren’t just learning about people and managing them, but you also do delve into the numbers side or the marketing. I learned the importance of having something that you’re strong in besides just managing people.” Eventually, she would like to work at a staffing agency that supplies workers for businesses in a variety of industries.

MITCHELL COLLEGE OF BUSINESS

The Mitchell College of Business offers undergraduate majors in accounting, economics and finance, general business, international business, management, marketing, and supply chain and logistics management. The College also offers a Master of Business Administration, a Master of Accounting and a Doctor of Business Administration with concentrations in business analytics, management and marketing. It holds AACSB accreditations in both business and accounting. The Mitchell College of Business emphasizes experiential learning opportunities throughout the curriculum through internships, course assignments and center-driven projects. The College prides itself in ensuring that its students are more than just a number.

DEMARCUS WILLIAMS
liked to tinker with the family computer and his PlayStation console. “What particularly interested me was making the games behave in ways they weren’t meant to” – like getting characters to walk through walls. He grew up in Montgomery, Alabama, and graduated from the University of South Alabama in 2018 with a degree in computer science. He worked first for the defense contractor Raytheon before moving to Maryland to work for Amazon Web Services, the world’s biggest cloud computing company. He’s a security engineer, and his job is to make important parts of the internet behave exactly as they’re meant to.

“I interview candidates for Amazon, so I look at resumes all the time. Anybody can go to class and do their schoolwork and that’s it. But the people who go above and beyond, who may participate in competitions, who may have a side project or two, those are the candidates that stick out coming right out of college.”

SCHOOL OF COMPUTING
Establishing a skilled computing workforce is essential to the long-term economic stability of the region and can provide South Alabama students long-term, recession-resilient employment opportunities. Whether you are interested in creating computer games, defending cyberspace, building computer networks or finding computing solutions to business challenges, South’s School of Computing offers education and support to help you start your career. Our graduates are equipped with a broad spectrum of technological and analytical skills. Students have been placed in high-tech companies such as Microsoft, Northrop Grumman and Cisco. The School of Computing also offers a scholarship program that leads directly to cyber defender jobs in the federal service sector.

SouthAlabama.edu/SOC

See page five for a full listing of programs in the School of Computing.
MIA PENNISON, a special education major at South, grew up in Folsom, Louisiana, and got a glimpse of her future in the sixth grade. When a boy bullied an autistic girl in class, she stood up to him, and their argument turned into a trip to the principal’s office. When another student with disabilities struggled in math class, she tried to help, and the teacher asked if she would begin tutoring him. “I started sitting in at lunch with him and practicing all our stuff,” she said. “I remember his grade going from a D to a B, and his grandma sent me a card.”

At South, Pennison works with PASSAGE USA, which stands for Preparing All Students Socially and Academically for Gainful Employment. She’s learned to look beyond labels and work with individuals on practical solutions to problems in day-to-day life. After graduation, she’d like to stay at South and earn a master’s degree in special education. She wants to become a graduate assistant with PASSAGE. She’s interested in things like the Special Olympics.
CHRIS WILHITE
grew up in Atlanta and Mobile, and earned the nickname Mr. Perfect when he was growing up. During arguments, he would lay out his carefully backed evidence, and he would not waver. “If I was sure I was right about something, I was going to stick to that,” he said. So it’s no surprise that he grew up to major in civil, coastal and environmental engineering at South. Engineers research and analyze. When they come to a conclusion, they have to be able to stand behind it. They have to be perfect. If they don’t get things right, disaster may ensue.

South’s engineering program has given him not only technical knowledge and skills but also a broader understanding of what engineering is all about. A favorite professor told him not to focus on getting A’s. Instead, Willhite said, “If your focus is learning the big topics of the class and taking what you’re supposed to take away from the class, then you’re going to be more successful as an engineer and more successful in life.”

COLLEGE OF ENGINEERING

The College of Engineering at the University of South Alabama is recognized for the quality of our graduates. Our students have done well in industrial and government careers, not only in the local Gulf Coast region, but also nationally and internationally. The College offers five baccalaureate degrees, five master’s degrees and a doctoral degree in systems engineering. The foundation of the College of Engineering is its excellent faculty, with their dedication to teaching and researching new knowledge.

SouthAlabama.edu/engineering

See page five for a full listing of programs in the College of Engineering.
The University of South Alabama has a history of investment in marine sciences education and research, supporting a faculty of renowned experts in a range of marine-related disciplines. The USA School of Marine & Environmental Sciences within the College of Arts and Sciences is designed to address pressing environmental concerns of the coastal regions. The School trains the next generation of marine and environmental scientists, conducts cutting-edge research, and extends the impact of this training and research through service activities. SouthAlabama.edu/marinesciences

LEAH TOWNSEND would like to put in a good word for a misunderstood creature. “A bunch of people are scared of sharks,” Townsend said. “They don’t realize that sharks aren’t out to get them or attack them when they go swimming. Most of the time, sharks are just doing their thing, and we’re the ones getting in their way.”

Growing up in Tuscaloosa, Alabama, Townsend became obsessed with sea animals while watching Shark Week programs on the Discovery Channel with her dad. She came to the University of South Alabama for the marine sciences program. She loved the opportunity to take classes at the renowned Dauphin Island Sea Lab. Marine sciences majors spend a Semester at Sea there with the option of living at the lab.

Townsend’s studies at South got her interested in two possible career paths: rescuing and rehabilitating marine mammals or researching sharks. She plans to take a gap year between undergraduate and graduate school to gain experience, possibly as a volunteer, at aquariums or research facilities.
FAITH EDGELL
thought she wanted to be a physician, but planned for a backup career in case medical school didn’t work out. So she began pre-med studies at another university, majoring in biomedical engineering. The main thing she learned was that engineering was not for her. So she headed back to the Gulf Coast (home is Ocean Springs, Mississippi) to the University of South Alabama College of Nursing.

Her mother is an EMT. Her stepmother is a nurse, as is her older brother. “I was like, ‘I want to go above and beyond. I want to go to medical school.’ And then I was like, ‘No I don’t.’” Her studies have proved challenging as well as fulfilling. Helping to treat actual suffering patients, especially children, was gut-wrenching at first. “I was leaving the hospital every clinical rotation crying,” Edgell said. “My instructors really pulled me through.” She hopes to go into pediatric nursing. “I have a hard time imagining myself not working with children.”
STUDY ABROAD

Study Abroad is the opportunity for South students to spend time in a different country while earning credit toward their degree through taking classes, interning, volunteering and more. Studying abroad can be one of the highlights of a student’s university career, giving students a wonderful and challenging experience that will allow students to grow both academically and professionally.

Get started today!

- $100,000 awarded in study abroad scholarships every year
- Programs in over 60 countries
- Internships, volunteer programs and research opportunities available
- Trips can be as short as one week or as long as one year.
- Study abroad and finish in four years.

The USA Visual Arts in Italy program provided students from all majors the opportunity to explore firsthand the art, architecture, archaeology, and culture of Italy.

ALLISON DOLLUS

South gave me an opportunity to study abroad. It allowed me to experience a new culture while earning credits for my degree! The Study Abroad office provided me with different countries I could study in. Students can apply for different types of programs lasting a few weeks, a semester or all year. South offers scholarship opportunities for students who would like to study abroad. These scholarships assist in covering the cost of tuition and living expenses. As a Spanish minor, I chose to study abroad in Spain for six weeks with a USA faculty member, and I received nine credits to complete my Spanish minor. Studying abroad gave me a new perspective on different cultures. I was able to increase the level of my Spanish skills by immersing myself in the language and being exposed to a different way of living. Without the help and guidance of the South faculty and Study Abroad program the memories and the sights I experienced would not have been possible.

HOUSING

Stay close and stay connected! USA Housing offers 33 unique on-campus residence halls, all of which are:

- A short walk or tram ride to classes.
- Close to on-campus dining options.
- Near the Rec Center and fitness trail.
- Right next to Hancock Whitney Stadium.

Live on campus and you get everything in one affordable package: parking, wireless internet, cable TV, furniture, utilities, free unlimited laundry access and support staff who are available 24 hours a day.

South students who live on campus say it’s the best way to get involved, make friends and stay on top of studies.

To see all the housing choices and benefits of living on campus, visit SouthAlabama.edu/Housing.

DINING

USA Dining offers a wide variety of food and convenient services across campus. These services are designed with your needs in mind, providing flexibility and convenience to meet your demanding schedule. The meal plan options for residential students offer quality food at a discounted price. The Dining Hall is conveniently located within the residential area. Commuter meal plans are also available.

Other campus dining options include:

- Starbucks
- Einstein Bros. Bagels
- Greens to Go
- P.O.D. (Provisions On Demand)
- Chick-fil-A
- Delta Deli
- Moe’s Southwest Grill
- Panda Express
- Prowler Bowls

*Tuition value is up to 30 credit hours at the Arts & Sciences rate per year (fall/spring). Out-of-state students awarded one of these awards receive in-state tuition.

USA also offers scholarships in the amounts of $2,000 - $9000 for students who chose to apply test optional to South. Those scholarships are awarded on the basis of GPA, course selection (honors, AP, etc.), and a variety of other holistic factors.

In addition, South offers need-based funding to admitted students who qualify through their FAFSA’s. These awards are made after initial scholarship consideration, so it is possible to receive one award and then a few weeks later receive another.

Students should always check JagSPOT for additional scholarship opportunities and be sure to apply for them by February 15.

FINANCIAL AID

You can submit your Free Application for Federal Student Aid (FAFSA) at FAFSA.gov starting Oct. 1 of your senior year. Financial assistance can help you make a college education possible and South is eager to help you as you and your family make this most important investment. Financial aid is awarded annually for the academic year, which begins each August. The University uses FAFSA to evaluate students for federal and need-based aid.
