

Siemens Optipoint Phone Quick Reference

Setting up Voice Mail:

- The extension number to reach the Voice Mail system is: 6-1380, DID 461-1380. (There is also a "Voice Mail" key on the handset programmed to dial 6-1380 that will also connect you to the Voice Mail System.)
- The default Security Code is: 0000
- You must complete the entire Voice Mail setup process or you will be required to change the security code each time you enter the Voice Mail setup following each non-completed setup.
- Follow all of the voice prompts, however contrary to the voice instructions, please include your name in your personal greeting.
- The "Mailbox" lamp is similar to the "Mgswt" lamp on the old system.
 - a. Depressing the "Mailbox" button will not connect you to the Voice Mail service.
 - b. Depressing the "Mailbox" button while the "Mailbox" lamp is illuminated by the Voice Mail system will produce the message "Mailbox not Possible" on the handset display.
 - c. When the "Mailbox" lamp is illuminated by the Voice Mail system you must clear your Voice Mail messages in order to turn off the "Mailbox" lamp.
- If you experience problems with your Voice Mail system following the initial setup, please contact Telcom at 460-7114.
