

First Year Advising

At the University of South Alabama academic advising is about you. During your first year at South, you are required to meet with your academic advisor once each term. You and your advisor will work together to develop your academic plan. To ensure that your personal and academic needs are met, be sure to share with your advisor your values, goals and career objectives. These should be reflected in your academic plan. Your advisor is also knowledgeable about many aspects of university life and can provide you information and advice on utilizing the opportunities available on campus. Your advisor will help you continue to map out your educational goals.

For information about your major:

Students of the College of **Allied Health**
