The Degree Evaluations feature in PAWS is getting an upgrade for Summer 2022! Degree Evaluations will be offline from 8 a.m. CT Friday, May 20, 2022 until 9 a.m. CT Monday, May 23, 2022.

Noteworthy changes include:

- Pre-requisite requirements are now indicated with the 🔄 icon instead of an asterisk.
- Repeated courses will be identified with the (R) notation.
- The Banner Refresh button is now located at the top right of the page under the Worksheets heading. 
  NOTE: Not all users have access to the Banner Refresh button since Banner data refreshes nightly in Degree Works.

- The History tab has been replaced with a drop-down field directly on the Academic audit.

- The Process New button is now just “Process.” The button is now located just below the historic audit drop-down box. See screenshot above.
- The Freeze Audit feature is now called ‘Save audit’ and is located just above the degree block.
Degree Works 5.0.6

- The Look Ahead feature has been incorporated into the What-If Analysis (see "Future classes").
- The GPA Calculator, Class History, and Notes features are now consolidated under the three vertical dots at the top right of the page.
- We can now email students directly from Degree Works using the envelope icon at the top right of the page.

Tips:
- Exceptions now have a Details box to add more information.
- Grade replacements can be viewed in Degree Works in the Class-Dtl section of the Student Data Report. If ‘HA’ is in the Class Status column, that means the course was repeated. ‘HE’ indicates a grade replacement.
