

Information Technology Assessment

- **Information Services Strategic Governance Committee**
- **Information Security Office**
- **Organizational Structure**

Information Services Strategic Governance Committee

The Information Services Strategic Governance Committee will approve both Campus and Health System IT visions and guiding principles.

It will also approve and prioritize key University IT initiatives, and ensure that IT strategy is aligned with USA's Strategic Plan.

Information Security Office

Establish an Information Security Office that would span Main Campus and Health System.

Oversight to include:

- Security incident analysis and response
- Identity and access management
- Employee information security training
- Information security policy formation and maintenance
- IT risk assessments

Organizational Structure

- Computer Services Center will continue to consolidate campus departmental IT staff for better use of personnel resources, improved service response, and consistent application of IT policies and procedures.
- With the implementation of Cerner, the Health System will make significant changes to the Health System Information Services (HSIS) structure.
